While the tactical troops of the 9th Infantry Division were bogged down just over the German border, the 9th CIC Detachment, in late September, moved from Rotgen to cover counterintelligence targets in the town of Zweifall, five miles south of Stolberg. Careful searches were made of all places used by Nazi Officials, with the result that numerous valuable documents were uncovered. The Agents found a document listing all the citizens of Zweifall with notations made to indicate Nazis and anti-Nazis. This list led directly to several arrests. Twenty of the people categorized as strong anti-Nazis were interrogated for tactical information. CIC organized the local police to enforce Military Government regulations and look for enemy deserters.***

The 9th CIC Detachment arrested of Zweifall when a search of his home and property revealed a German rifle with ammunition, shotgun ammunition, a Nazi dagger and uniforms. During his interrogation signed

** 3d Armored Division, List of Civil Officials for Breinig, (CONFIDENTIAL). This document has notes by CIC concerning the results of the investigations run on each official. (Kansas City Records Center, Bx 25104).

*** 9th Infantry Division, Daily CIC Detachment Report, 25 September 1944, from First U.S. Army, G2 Journal, 28 - 30 September 1944. (UNCLASSIFIED) (Departmental Records Branch, AGO, Alexandria, Virginia).

a statement to the effect that he was still a member of the Nazi Party and a loyal follower of Hitler. stated that the only reason that he had never committed espionage or sabotage was because Hitler never told him to do so. Brandt was tried by Military Government Court and sentenced to four years in prison.*

The 9th CIC also found a German soldier who had become ill with pneumonia while on leave to visit his parents in Zweifall and had not returned to his unit. After the Americans took Zweifall, the presence of the soldier was not reported to CIC. When he finally was discovered, the soldier was evacuated for hospitalization and subsequent Prisoner of War internment. The parents of the soldier were turned over to Military Government. Due to mitigating circumstances, they were fined only 100 marks for their violation.

The Americans were not so clement in another case that involved a civilian resident who was discovered to have harbored a German soldier wearing civilian clothes and to have deceived the American authorities as to the soldier's identity. The civilian was delivered to Military Government and later sentenced to five years in prison.**

In late October, the 9th Infantry Division was moved south to take up defensive positions from Monschau to Losheim, towns just within the border of Germany. Counterintelligence coverage of Zweifall was handled briefly by the 28th CIC Detachment. On 7 November, the task was turned over to the 4th CIC Detachment.***

Although the possibility of uncovering additional information was slight, because the town had been worked over by two preceding detachments, the 4th CIC Detachment, commanded by Captain Oliver D. Appleton, began a four-day screening of residents of Zweifall. Among the 1,040 persons screened, 30 former party members and 15 German Soldiers discharged for medical reasons, all relatively unimportant men, were found. Because these men were not leaders, the 4th CIC Detachment did not arrest them, preferring to watch them closely and apprehend them at the first sign of suspicious activity.****

Interrogators Find Loopholes in Young Man's Story

For the remainder of the month, the 4th CIC Detachment ran day-to-day security checks in the Zweifall area, but investigated only one case of great importance.

On 2 December, troops of the 22d Infantry Regiment picked up Christoph Stecher crossing the American lines near Zweifall. Stecher was turned over to the 4th CIC and interrogated by 2d Lt Robert H. Williams and Special Agent Herbert Schindler. Although Stecher was a dirty 16-year-old youth with long, shaggy blond hair, he seemed alert and willingly answered all questions. On every occasion, he attempted to steer the interrogation toward tactical information which he offered without hesitation. He seemed somewhat upset that CIC considered him a possible enemy agent.

During the initial interrogation, Stecher told CIC that he had journeyed from Cologne in search of blankets for his home. Later he changed his story, claiming that he had left Cologne to escape the Schutz Staffeln evacuation and to move into American occupied territory. Stecher claimed he was a Communist and that his father was a Communist party member of long standing. He repeatedly denied charges that he had crossed American lines to gain information for the Nazis.

Subsequent interrogations aroused considerable suspicion about the youth. Dates concerning his travel and the reasons for his crossing the lines changed each time the Agent questioned Stecher. Stecher's map reading ability and his persistent attempts to discuss tactical information rather than his own travels and activities increased the CIC doubts. He was forwarded to Master Interrogation Center for further interrogation.*

The 4th CIC Detachment handled several unusual cases in Zweifall. A regimental S2 turned over to the unit on 16 November a 78 year-old woman who had been found wandering in the vicinity of gun emplacements. The investigating Agents found that the woman owned the land on which she was apprehended and was checking to see if it was suitable pasture for her cows. CIC's interrogation of the old lady revealed only that she was so foggy minded that she was totally unaware that a war was in progress a few miles from her home. The woman was placed in the custody of her son and daughter-in-law who were told that another violation would lead to her arrest.**

---

* 4th Infantry Division, G2 Journal of 2-6 December 1944, Memorandum For The Officer In Charge, Subject: Christoph Stecher, Suspect linecrosser, Re: Interrogation of Subject, 4 December 1944, /s/ Robert H. Williams, 2d Lt, Inf, (UNCLASSIFIED) (Departmental Records Branch, AGO, Alexandria, Virginia).

** 4th Infantry Division, Daily CIC Detachment Report, 16 November 1944, from First US Army, G2 Journal, 15-18 November 1944, (UNCLASSIFIED) (Departmental Records Branch, AGO, Alexandria, Virginia).

On 30 November, CIC agents picked up a stray American soldier on a highway leading away from the front. The soldier, a recent replacement, had been separated from his unit during a German attack. He could not give the name of his Commanding Officer or the code name of his regiment. He did have his "dog tags" and pay book for identification. After interrogation, the soldier was turned over to the Provost Marshal's office for final disposition.*

An unusual feature of the 4th CIC's security measures was a canvassing of the two churches in Zweifall on 27 November. Agents attended Catholic mass at 0800 and 1000, and Protestant services at 1000 to see if the pulpit was being used as a cover for anti-American propaganda. Sermons were found to be confined to religious topics.**

In early December, Agents of the 4th CIC Detachment reported a rumor current among the troops that the Division was soon to be moved to Luxembourg.*** On 8 December, the rumor materialized and the Division left for the City of Luxembourg with the CIC Detachment taking over the security of responsibilities from the 83d CIC Detachment.**** Zweifall was left in the hands of the Agents from the 505th CIC Detachment.

CIC Seeks Resistance Groups

In France and the Lowland Countries, counterintelligence operations were made easier by the assistance CIC received from resistance groups. Prior to American entry into Germany, a prime target for all intelligence agencies was information on possible resistance groups operating within Germany itself. The only significant organization uncovered was the Edelweiss Piraten, a rather mysterious youth organization whose only objective was the harassment of the Hitler Jugend. There appeared to be no political or ideological motivation behind this organization. No central control was readily apparent although there

were Edelweiss members reported in all major cities. It was felt that probably the leaders of the Edelweiss had taken great care to keep themselves obscured lest they be discovered by the Gestapo.

Contact with the Edelweiss was a major objective of the first CIC Detachments that entered Germany, but it was soon evident that CIC was in for a disappointment. The few members discovered were extremely young and tended to be impulsive informants. According to Captain Theodore M. Black, Commanding Officer of the 503d CIC Detachment, ten days of experimentation with two young Edelweiss members, planted as informants by his Detachment, were not productive. Members of the Edelweiss, perhaps unaware of the value they could be to the Americans, failed to come forward and offer their assistance to CIC. CIC was particularly unsuccessful in locating the organization's leaders. Nevertheless, CIC continued to search for factions of the Edelweiss in hopes of exploiting the organization's avowed pro-Allied intentions.

There were also numerous reports of Catholic organizations that might have been helpful to CIC, but no immediate contact was established with such organizations in the first months in enemy territory.*

A major bloc of opposition to Nazi rule had come from the members of the Communist party. Some of the problems encountered when great reliance was placed on extreme leftists were exemplified in the previously mentioned case of [redacted]f Stolberg. However, at this time, CIC still held out hope for possible use of Communists as informants in Germany. An Agent of the 1st CIC Detachment, after contact with German Communists, stated: "We can have confidence in recognized high-ranking Communist Party members insofar as they can help us militarily and in apprehending the members of the NSDAP /Nazi Party/. For the most part, the Communists are in the upper age brackets and have not been tainted with the Hitlerism type of Facism; it is reasonable to assume that they have detailed dossiers and organizational knowledge of the NSDAP; they are well versed in underground activity which the Nazis will have recourse to now and later; their intimate knowledge of local areas, militarily and politically, could give CIC reliable information on physical as well as personality targets;

and regardless of their Comintern inspiration, we are Allies, and they, like we, are interested in the same objective - the complete eradication of Naziism."

A Prophesy

Reflecting upon the first two months of CIC activity within the German border, Major James K. Dorsett, Jr., Commanding Officer of the 207th CIC Detachment, wrote of past accomplishments and future potentialities. "When /the VII/ Corps crossed the border into Germany on 15 September, the CIC came armed with few directives, no precedents, uncertainty as to its potentialities, and uneasy expectation of partisan warfare. Thus far pessimistic apprehensions have scarcely materialized. Instead, counterintelligence has come into its own more tangibly and satisfyingly than before in Belgium and France. The role of CIC looms increasingly more significant, and with intelligent readjustment its contribution to the occupying forces in Germany can exceed any past achievement."*

Chapter 4

NINTH ARMY CIC IN HOLLAND AND GERMANY

The northernmost region under the jurisdiction of the 12th Army Group consisted of the province of Limburg, a narrow strip of Dutch territory that separated Belgium and Germany, and that portion of Germany directly east of Limburg which had been taken by the Americans. This area was covered as part of the lengthy front of the First U.S. Army until 22 October when the newly-constituted Ninth U.S. Army was moved up on line. The territory from Sittard, Holland, to an area slightly north of Aachen, a total of fifteen miles, constituted the front line of the Ninth Army during the September-October operations.

By mid-December, the Ninth had two corps and six divisions under its control. Army CIC operations were based in Maastricht, Holland; XIX Corps CIC, with Agents in Heerlen and Kerkrade, Holland, and Alsdorf, Germany, covered the southern part of the front; and XIII Corps CIC, operating in Hoensbroek, Holland, and Ubach, Germany, handled the area to the north.

Under the XIX Corps, the 29th CIC Detachment operated around Alsdorf, the 30th CIC Detachment in Wurselen, Herzogenrath, and Bardenburg, Germany, and the 502d CIC Detachment in Basweiler and Merkstein, Germany. For the XIII Corps, the 507th CIC Detachment operated around the Corps area with the 84th CIC Detachment in Eygelshoven, Holland, and the 102d CIC Detachment in Ubach and Brunssum, Holland.

The divisions of the XIX Corps were all battle-tested veterans from the First Army, but the XIII Corps divisions were all new to the front lines. As might be expected, the greater burden of counterintelligence duties fell to the men under the command of XIX Corps.*

Two Prominent Resistance Groups Found In Holland

In the Netherlands, CIC found two major anti-Nazi resistance groups, the Orde Dienst and the Koninkluke Patrouille. Generally, the Orde Dienst, the larger of the two groups, was composed of substantial middle-class elements which tended to be conservative. The Orde Dienst had remained more or less passive during the German Occupation, assuming an active role only after the Allied

* 12th Army Group, Semi-Monthly Counterintelligence Report No. 9, for the period 1-15 December 1944, dated 15 December 1944, from the Office of the AC of S, G2, 12th Army Group, /s/ Edwin C. Lee, Lt Col, GSC, Executive for the AC of S, G2, (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.).

liberation. In contrast, the well-organized, capably led Koninkluke Patrouille had conducted active sabotage and other resistance operations against the Germans.*

CIC found that Orde Dienst and Koninkluke Patrouille members were generally willing to cooperate. For example, the 84th CIC Detachment reported that its Agents had held a lengthy conference with local Orde Dienst members. The ex-underground personnel agreed to cooperate with CIC by taking action against potentially subversive civilians where sufficient evidence for an arrest by CIC was lacking. The Orde Dienst agreed to post on all houses a notice listing completely the acts which represented threats to the security of American forces. Arrangements were made whereby CIC would receive periodic reports on all persons under investigation by Dutch authorities.**

By December, Ninth Army CIC was utilizing 364 members of the Orde Dienst, Koninkluke Patrouille, and Netherlands Internal Revenue Bureau on 38 stationary posts and 31 roving patrols along the German border.*** In October, resistance group members, manning control posts established by the 502d CIC Detachment, had apprehended two short-range Sicherheitsdienst line-crossers, Nijssen and Thomassen, two hours after they left the German lines. At First Army Interrogation Center, the two men confessed that they had entered Holland on an espionage mission. The Germans were interested in the civilian attitude toward American troops, the general disposition and approximate strength of U.S. troops in the area around Heerlen, and in determining the accuracy of rumors that the Americans had an armored division near Heksenberg. The Agents had been instructed to memorize all the information they gathered and return after three days. Since the men made a complete confession, interrogation at a higher level was unnecessary. These two espionage agents were turned over to Dutch authorities in Maastricht for further investigation and trial under the supervision of the SHAEF Netherlands Mission.

---

* 12th Army Group, Semi-Monthly Counterintelligence Report No. 5, for the period 1-15 October 1944, dated 15 October 1944, from the Office of the AC of S G2, 12th Army Group, /s/ Edwin C. Lee, Lt Col, GSC, Executive, for the AC of S, G2, (SECRET), (Departmental Records Branch, AGO, Alexandria, Va.).

** 84th Infantry Division, 84th CIC Detachment, Daily CIC Detachment Report, 22 November 1944, /s/ Stephen Gernazian, S/A, CIC, (Departmental Records Branch, AGO, Alexandria, Va.).

*** 12th Army Group, Semi-Monthly Counterintelligence Report No. 9, for the period 1-15 December 1944, dated 14 December 1944, from the Office of the AC of S, G2, 12th Army Group, /s/ Edwin C. Lee, Lt Col, GSC, Executive, for the AC of S, G2, (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.).

This case was mentioned in a 12th Army Group report as a "typical example of the type of (enemy) operation to be expected in a relatively stabilized situation." The German Intelligence Service dispatched many low-grade, short term agents with the expectation that a few would evade Allied controls and return with valuable information. Although the apprehension of all these espionage agents was practically impossible, the aid of Dutch resistance members in conscientiously manning control posts gave CIC an efficient counterespionage net.

Germans Forcibly Evacuate 45,000 Refugees Into US Lines

On 25 September, while the province of Limburg was still under First Army control, the Germans forcibly evacuated 45,000 refugees into the American lines near Kerkrade, Holland. CIC personnel of the XIX Corps and the 30th Infantry Division, aided by known reliable persons from Kerkrade, screened all the refugees by sorting them into community and family groups. Individuals who evoked suspicion or did not seem to fit into any group were transported to the First Army Interrogation Center. Many questionable individuals were turned over to the Orde Dienst to be housed and cared for in towns removed from the front lines. Burgermeisters of the towns receiving these refugees were given lists of the individuals moved into their area. Local police were ordered to confine the movement of these persons within the city limits. As soon as the military situation permitted, the refugees were to be returned to their homes.

Although several minor informers were uncovered in the group, no bonafide enemy agents were turned up. However, the CIC report of the operation concluded with the following remark: "It is obvious that the introduction by the German Intelligence Service of, say, 15 agents in such a group (1 agent for every 3,000 refugees) would have considerable likelihood of success, and, if five of these short term agents reported back, the German Intelligence Service might consider the operation to be profitable."*

Friendly Dutch Pose a Problem For CIC

CIC found that the Dutch, like the French people, felt that once the Americans arrived to liberate their home area, all travel restrictions would be cancelled

* 12th Army Group, Semi-Monthly Counterintelligence Report No. 5, for the period 1-15 October 1944, dated 15 October 1944, from the Office of the AC of S, G2, 12th Army Group, /s/ Edwin Lee, Lt Col, GSC, Executive, for the AC of S, G2, (SECRET), (Departmental Records Branch, AGO, Alexandria, Va.).

automatically. People flocked on the highways and travelled to neighboring villages, seeming to the Americans to congregate at strategic road intersections and around American military installations. Furthermore, the American soldiers, as might be expected, welcomed the presence of friendly civilians with pleasure. Harried agents of CIC felt that this situation made control difficult and espionage all too easy. Resistance members on the many check points were called upon to enforce strictly the curfew regulations and to deny civilian entrance into restricted areas.*

Typical measures taken to control the Dutch civilian population was constant patrol under 29th CIC supervision of the main roads to check all travel permits and identification papers of civilians. Those found traveling beyond the prescribed limits were taken to the towns where they claimed residence, were identified, and confined in the local jail for 24 hours.**

A "Twenty-Three Percenter"

On 25 September 1944, resistance group personnel, manning a post on the German-Dutch border, arrested Charles Emile Rene Schmitt, who had crossed the border without a pass. He was placed in the custody of XIX Corps CIC, then maintaining headquarters in Maastricht. Schmitt, who claimed to be an Alsatian, was interrogated by Agents of the 219th and 29th CIC Detachments without the discovery of any major discrepancies in his story. However, the story in itself was enough to place Schmitt in a class with the more unusual collaborators.

Schmitt told his interrogators that he was one of the three owners of the Societe Cabrillac of Paris, a firm which supplied labor for the German-owned May Company of Lille. Schmitt's company chose for hire men whose lack of proper papers made them subject to arrest and deportation to Germany. In payment for helping these "voluntary" workers, Schmitt collected 23% of their salaries. Attempting to justify his lucrative business, Schmitt claimed that the 23% in reality did not come from the workers, but rather from the over-stuffed coffers of the May Company as a kind of monthly bonus to the Societe for supplying such industrious laborers.

* CIC Detachment #29, 29th Infantry Division, Counter Intelligence Report, week ending 2400 hours 8 October 1944, dtd 9 October 1944, /s/ Ellis O. Mayfield, 1st Lt, Inf, Commanding, (SECRET), (Kansas City Records Center, Box 25094).

** Ibid., week ending 2400 hours 3 November 1944, dtd 4 November 1944.

But Schmitt still had to explain his presence in Germany. He claimed that the Germans had forced him to drive to Aachen with a carload of German soldiers. When apprehended, he was attempting to return to his native France.

CIC felt that Schmitt was not an enemy agent, although a rather successful collaborator. He was turned over to the Police in Maastricht with instructions to contact French authorities as soon as possible. A note attached to Schmitt's arrest form contained a masterpiece of understatement: "It is thought that the French Authorities would be interested in seeing this man."*

You Again

Civilians who continually wandered in the area of the front lines constituted a threat to the security of the troops and were dealt with as enemies even when espionage intent could not be established. Such a person was Froninek Rabenda, first picked up by American troops on 14 November 1944 near Eygelshoven. Rabenda stated that he had been transported as a forced laborer from Holland to a farm in Oidtweiler, Germany. With Rabenda when he was apprehended were the farmer and his family; and during the interrogation, Rabenda denounced the farmer as a Nazi. Rabenda was turned over to the 29th Division Military Government for disposition as a displaced person.

But CIC had not seen the last of this man. A week later, Rabenda, was picked up again in the forward area and this time turned over to CIC in Basweiler, Germany. Since there were no means for positive identification and no way to verify his story, Rabenda was sent back to Ninth Army Interrogation Center. CIC felt that Rabenda's persistent movements in the forward areas constituted a threat to the security of American forces.**

---

* Headquarters XIX Corps, Office of the AC of S, G2, CIC Detachment, Memorandum For The Officer In Charge, Subject: Charles Emile Rene Schmitt; French National, Re: Interrogation of Subject, /s/ Philip T. Clark, S/A, CIC, Unclassified, and Attachment to "Arrest Form" (SHAEF AGO Form No. 7) on Charles Emile Rene Schmitt, dtd 22 October 1944, Military or Civil Authority Taking Custody of Prisoner: CIC Detachment #29, /s/ Ellis O. Mayfield, 1st Lt. (Unclassified) (BOTH: Kansas City Records Center, Box 25094).

** Typewritten statement on the reverse of "Arrest Form" (SHAEF AGO Form No. 7) on Froninek Rabenda, dtd 21 November 1944, /s/ Louie L. Gripenstraw, 1st Lt, Unclassified, (Kansas City Records Center, Bx 25094).

Another familiar face for CIC was a female linecrosser, Maria Helena Adams, of Jabeek, Holland, who was told by Agents of the 29th CIC Detachment on 3 October not to cross the German-Dutch border again.

On 7 October, CIC received information that she had left Jabeek headed for Schwesters, Germany. Investigation revealed that the townspeople of Jabeek thought Adams untrustworthy. She was arrested and turned over to Dutch civil authorities in Trubeen for internment.*

A Successful Counterintelligence Alert

On 18 October, at the direction of the 29th Infantry Division G2 and without previous publicity, a counterintelligence alert was put into effect in the division area. In addition to CIC, the alert force included the Intelligence and Reconnaissance Platoons of the Regiments, the Military Police, Headquarters Combat Platoon, Dutch resistance groups and civil police. Under CIC supervision, a great many road blocks were established and manned by the Orde Dienst and Koninkluke Patrouille members. Military Police checked the identification of all persons riding in Army vehicles. Intelligence and Reconnaissance platoons patrolled roads in the regimental areas, checking on both civilians and military personnel. CIC formed roving patrols to apprehend civilans traveling without authority and to check on persons in American uniform who were on the roads.

CIC Agents went through the "chow" lines of most of the Division mess halls to see that positive identification was being made of each individual served. The 29th CIC Detachment operated an interrogation center at Schinveld, Holland, and XIX Corps CIC set up a similar center at Sittard. During the day, thirty persons who could not be positively identified were brought to these points for questioning. Representatives of the local police from all neighboring towns were present at the centers and were able to identify all thirty individuals.

Individuals caught violating travel restrictions were placed in jail for 24 hours, and their names posted on the local bulletin boards with the notation that they had violated military regulations.

* 29th CIC Detachment, 29th Infantry Division, Counter Intelligence Report, week ending 2400 hours 8 October 1944, dtd 9 October 1944, /s/ Ellis O. Mayfield, 1st Lt, Inf, Commanding, (SECRET), (Kansas City Records Center, Bx 25094) and Hq, 29th CIC Detachment, Personality Index (29th CIC Detachment's Activities in ETO All In One Volume), p. 67, undated, Unclassified. (Kansas City Records Center, Bx 25094).

After this first alert, the 29th CIC Detachment made plans for future counterintelligence alerts in an effort to keep constantly aware of all illegal movement in the Division area. It was believed that coverage was virtually 100% complete under the plan used in the first alert.*

Breaches of Security: What Outfit Are You With?

The change-over from First to Ninth Army control was common knowledge among Dutch civilians in the Limburg sector. CIC Agents found that in discussions with American soldiers, the Dutch invariably asked, "Are you from the First or the Ninth?" The change of Armies was so well-known that CIC made no attempt to discover how the information had spread to civilians. Experience had taught CIC Agents that Army troops prevented from revealing the name of their division or corps, had the habit of informing the local inhabitants of the Army to which they were assigned. Such loose talk had probably tipped the local populace off about the presence of Ninth Army.**

There were also some indications that captured American troops were not always tight-lipped. A captured German Prisoner of War interrogation report indicated that nine members of the 29th Infantry Division, captured on 26 October, had talked freely concerning their personal military history, routes of transportation to the front, deployment of units, the replacement system, and other military data that their interrogators wished to know. As soon as the contents of this captured report reached the 29th CIC Detachment, teams of agents were dispatched to the three regiments of the Division to survey the extent and effectiveness of troop security indoctrination.***

The agents first interviewed the S2 of the regiment they had been assigned to canvass. Then they went to the "grass-roots" of the regiment, selecting at random one enlisted man from each of the three battalions to interview. Judging from results of the CIC inquiry, lectures and instruction given the troops seemed to have been adequate. Instruction was usually presented twice a month, although two men of the 115th Infantry Regiment did not remember having heard a security lecture for two months. In all cases, the proper conduct

* 29th CIC Detachment, 29th Infantry Division, Counter Intelligence Report, week ending 2400 hours 22 October 1944, dtd 25 October 1944, /s/ Ellis O. Mayfield, 1st Lt, Inf, Commanding (SECRET), (Kansas City Records Center, Box 25094).

*** Ibid., for the period 20 November - 4 December 1944, dtd 4 December 1944.

for a soldier when captured had been stressed in the lectures. When this survey was completed, the question of why the nine captured soldiers had given the enemy more than the required "name, rank and serial number" still remained unanswered.*

Troops Canvassed on Other Matters

When seeking the answer to an important question, the 29th CIC Detachment made frequent use of polls similar to the one on security indoctrination. On 14 November, agents had 40 enlisted men of all ranks from the three regiments and the 29th Signal Company fill out questionnaires designed to indicate the individual soldier's knowledge of the war situation in Europe. Generally, the CIC poll indicated that the men, although already well-informed, earnestly desired any news concerning the progress of the war on all fronts. Briefings and lectures from their officers and copies of Stars and Stripes seemed to be the main source of information for the troops. The chief complaint voiced to the agents was that not enough copies of Stars and Stripes were available.**

A secondary purpose of this poll was to determine indirectly what effect enemy propaganda had produced on American troops. If these forty men were typical, the answer was: "None whatever."***

*** CIC Detachment #29, 29th Infantry Division, Counter Intelligence Report, for the period 4 November-20 November 1944, undated, /s/ Ellis O. Mayfield, 1st Lt, Commanding, (SECRET), (Kansas City Records Center, Box 25094).

When the G2, 29th Infantry Division, desired information concerning the low morale of the 115th Infantry, the 29th CIC Detachment, on 23 October, promptly organized another poll. Nine Agents canvassed various units of the 115th, asking officers and men the question: "What's wrong with the 115th?" The Agents heard such typical complaints of men from a unit with lengthy front line service as; "When there is a tough job to do, we get it!"; "Men who have seen much combat aren't getting the proper breaks!"; "We didn't get a promised rest period!" Less typically, members of the 115th Infantry seemed to sense that they were part of an outfit which was not too highly regarded by their superiors at Division headquarters and soldiers of the other two regiments. A more immediate cause for the low morale was a recent skirmish with the enemy in which K Company had been almost wiped out.

1st Lt Ellis O. Mayfield, Commanding Officer of the 29th CIC Detachment, summed up the findings of his agents. "It appears that the outfit has built up a pressure within itself. Its commanders and staff have always appeared on the defensive and too tense. They seem to be unable to relax. It is felt that this is caused primarily by the fact that the outfit has become self-conscious of past mistakes and of ridicule from all sides. The 115th has all the qualities of a great outfit, but the officers and men are acutely aware of the fact that it is considered a second rate unit. If this pressure could be relieved by wide spread praise for the 115th, it is felt that confidence and a renewed spirit would pervade the entire regiment."

The technique of polling the troops provided answers to some vital questions. Just as important, it made the troops aware of the existence and mission of CIC. They could see that CIC was actively interested in troop morale and security, an important factor to counteract the belief that CIC Agents were a "bunch of snoopers" trying to get soldiers in trouble.*

29th Division Gasoline Dumps Checked

The static situation that permitted the 29th Division CIC Detachment time for concern with troop education, morale, and security consciousness, also allowed for extensive security surveys. With the troops in more or less permanent stations, the necessity for security surveys increased considerably.

* Seven documents from CIC Detachment #29, Hq, 29th Infantry Division, all Memoranda For The Officer In Charge, all Subject: Check of 115th Infantry Regiment, all dtd 23 October 1944, all to: AC of S, G2, Hq, 29th Infantry Division, documents signed as follows: two by Ellis O. Mayfield, 1st Lt, Commanding; one each by Lynn Nuenschwander, 2d Lt; C.W. Dewalt; Allen R. Mitchall and Gordon M. Anderson; Paul Beauchesne and Jean Gayout; and Hugh J. Palmer and Sam D. Beall, all Unclassified, (Kansas City Records Center, Box 25094).

The seventeen gasoline dumps in the area of the 29th Infantry Division were extremely vulnerable points for enemy sabotage. Not only did the dumps contain the elements for great destruction, but the short supply of gasoline all along the European front meant that any loss would hinder Allied efforts to renew the assault. With this in mind, five teams of agents from the 29th CIC Detachment were dispatched on 16 November to inspect the dumps and report on those most vulnerable to sabotage.

The agents on the survey made particular note of the number of guards and their instructions, the location of the fuel in relation to the motor park, and the potential points of civilian entry.*

Only one of the seventeen gasoline dumps was considered insecure by the inspecting Agents. The main Division Headquarters dump was deemed too close to a main route of Civilian travel, and had to be moved 300 yards away from this route. This distance and the 24-hour guard previously posted were considered sufficient security measures.**

In almost all instances CIC discovered that the officers in charge of the gasoline dumps had received direct orders to maintain strict security measures over all their valuable supplies of fuel.***

Wire Cutting Investigation Proves Futile

On 10 October, the 29th CIC Detachment received a report from the Division Signal Officer of a typical case near the town of Orsbeek, Holland, where approximately one quarter of a mile of a telephone wire running from the forward Command Post to Division rear had been cut and removed. Investigation of this complaint for possible sabotage consumed many hours and resulted only in the compilation of a long list of possibilities, there being little concrete evidence.

* CIC Detachment #29, 29th Infantry Division, Counter Intelligence Report for the period from 4 November-20 November 1944, undated, /s/ Ellis O. Mayfield, 1st Lt, Inf, Commanding, (SECRET), (Kansas City Records Center, Box 25094),

** CIC Detachment #29, Hq 29th Infantry Division, Memorandum For The Officer In Charge, Subject: Physical Check Of All Gasoline Dumps: 29th Cav Recon, Divarty, Div Hqs, Sig Bn, 16 November 1944, /s/ Hugh J. Palmer, S/A, CIC Unclassified. (Kansas City Records Center, Box 25094).

*** Five documents from CIC Detachment #29, Hq, 29th Infantry Division, all Memoranda For The Officer In Charge, all Subject: Physical Check of Gasoline Dumps (of various units), all dtd 16 Nov 1944, /s/ by Agents of the 29th CIC Det, all uncl., (KCD BX 25094).

CIC agents A. Van Otten and Daniel M. Powers learned that the wire had been severed at a point where it ran through an open field. Parallel to the cut wire ran three other telephone wires, all untouched. These four wires had been intentionally strung in an out-of-the-way area in order that they would not be readily noticed. Both cuts in the damaged wire were sharp and clear, indicating that they had been made deliberately with a sharp instrument.

CIC immediately called for the aid of the Orde Dienst officials at Amstendrade who had authority over the Orsbeek area. These men were taken to the field and allowed to make their own inspection of the cutting. The Dutch authorities then questioned some fifty residents of the area but received no information concerning possible suspects. All nearby houses were searched for telephone wires without success.

CIC agents spoke to members of adjacent AAA units and learned that one of these batteries might possibly have rolled up a piece of wire, assuming that it belonged to them.* The Agents also learned that one of the AAA units had recently been short of telephone wire. It was plausible that the AAA unit might have inadvertently taken wire thought to be dead -- or solved their shortage by the not uncommon practice of "moonlight requisitioning."**

There was also the possibility that some Dutch farmer, thinking the Americans had abandoned the area and left the communication line behind, might have picked up the wire for his own use.

The case had become a free-for-all guessing game after the preliminary investigations, and the various individuals working on the case were able to think of countless other possibilities. Mainly because the other three wires running closely parallel to the cut wire had been undamaged, the investigators decided against intentional sabotage.***

Evacuate Area Eight Miles West of Roer River

By December, the 29th CIC was able to report that military security in the forward division area was excellent, mainly due to the total evacuation of civilians from an area at least eight miles west of the Roer River.

The move created a virtual population vacuum between the front lines and the rear, and all persons apprehended in the evacuated area were under immediate suspicion.*

Throughout the Division area, residents of extremely small villages were evacuated to larger towns until such time as the region was out of the combat zone. CIC hoped to keep the civilian population in several central areas, cutting down the chance for innocent individuals to wander into combat zones and making more suspicious any persons apprehended near the front.**

In the first two days after the evacuation of the area west of the Roer, CIC interrogated one particularly suspicious individual. Near midnight on 8 December, a soldier of the 115th Regiment apprehended as he crossed the American lines and entered into the evacuated area.

On the next day who claimed to be from Paris, was interrogated by Agents of the 29th CIC Detachment. stated that he had been a Sergeant in the French artillery prior to his capture by the Germans on 22 June 1940 at La Bourgonie in the Vosges Mountains.*** The Frenchman related his

*** seemed to possess an extraordinary memory for detail. The report of his interrogation continued as follows: "Subject was taken to Strassburg 1 July 1940 and remained there until 26 July. On 26 July 1940, Subject was taken to Stalag 5A near Stuttgart where he stayed for three or four days and was then sent to work on a farm nearby at Leutenbach. After working there for a month, he was sent to work as a carpenter at Winnerden. Subject worked there for a month and a half and then, at the same place, worked for three months in a brick factory. Subject remained at the brick factory from 1 December 1940 to 4 March 1941." statement covered three pages and all events were noted with the exact date and place as in the examples above.

CONFIDENTIAL

experiences as a Prisoner of War, claiming to have escaped several times from his confinement only to be reapprehended by the Nazis. last escape, he said, has been on 26 November 1944. Bicycling from the labor camp at Hamburg, said he arrived in Julich, Germany, near the Roer, 13 miles from the Dutch border, on 7 December, where he abandoned his bicycle on the outskirts of the town and proceeded on foot through the town without being challenged. said he located a small foot bridge and crossed the river at this point. He spent the rest of the night in a brick hut and the next day, set out for the American lines. After going a short distance said he was captured by the Germans who returned him to their Command Post, twenty yards from the foot bridge that he had used to cross the river. When artillery fire was heavy and one shell landed close enough to occupy momentarily the interest of the Germans, said he managed to slip away. Several shots were fired into the dark at but he was not hit. It was shortly thereafter that the Frenchman was apprehended by the American soldier.

CIC felt that there were a number of odd things about story. Suspicion was first aroused by Campana's ability to rattle off, without hesitation the complete detail of events that had taken place four years previously. The interrogators felt that the Frenchman knew his past so well that he might possibly have told them a carefully planned and memorized cover story.

Further, the agents did not believe that a man could travel from Hamburg to Julich without being stopped by anyone. They knew that Julich had been evacuated and also doubted that a person could go through the town in civilian clothes without being picked up. CIC considered it unusual that was able to trace with great care his route through Julich even though he made the trip at night. Furthermore, claimed to have crossed a foot bridge without being challenged, and once on land again, to have apparently passed within 20 yards of a German Command post without being challenged. Finally, CIC felt that who admittedly knew French and German, also knew some English. Several times he inadvertently answered his interrogator in part before hearing the question repeated by the interpreters.*

Because of his unusual account, which he knew to such unbelievable perfection, was sent to the Ninth Army Interrogation Center for further questioning.**

CONFIDENTIAL

Evacuees' Stories Cross-Checked

In the static situation, agents of the 29th CIC Detachment had considerable time to interrogate and cross-check the civilians evacuated from the combat zones. Civilians brought in for interrogation were asked questions pertaining to their personal histories, matters that would probably be common knowledge to their fellow townsmen. Each evacuee's story was then checked by questioning his neighbors about the individual's personal history.

The evacuees were asked about Nazi leaders, police and Gestapo personnel in their region. CIC found that one individual's denunciation of a local Nazi was likely to be confirmed by a great number of other evacuees.

If an evacuee's story could not be verified, because it did not tally with the accounts of other persons in his group or because these or other persons were unable to identify him, he was sent to XIX Corps Interrogation Center or through Displaced Persons channels to higher headquarters. Military Government was notified of the persons cleared by CIC and took the responsibility for adequately housing them in the rear.

The 29th CIC Detachment realized that their system was practicable only when evacuees were brought back in fairly small groups. The agents took advantage of the fact that most of the groups were well below one hundred in number and that time was not a matter of great importance to compile accurate lists of responsible persons and potential trouble-makers.

Security Situation In Alsdorf Deemed Unsatisfactory

While the 29th CIC felt that military security in the forward areas was excellent, security in Alsdorf, Germany, one of the easternmost towns still inhabitated by civilians, was generally unsatisfactory. Among the 6,000 to 8,000 persons in Alsdorf were many evacuees from Aachen and Wurselen. The presence of a large number of strangers in the area made the system of cross-checking an individual's personal history difficult and not particularly fruitful.*

* 29th CIC Detachment, 29th Infantry Division, Counter Intelligence Report for the period 20 November - 4 December 1944, dtd 4 December 1944, /s/ Ellis Mayfield, 1st Lt, Commanding, (SECRET), (Kansas City Records Center, Box 25094).

Military Government in Alsdorf Found Uncooperative

Early in the month there were several indications that Military Government in Alsdorf was refusing to take CIC seriously, and the situation eventually erupted on 14 December in a letter from 1st Lt Mayfield to the Commanding General of the 29th Infantry Division.

Mayfield noted three occasions where Military Government's failure to accept CIC recommendations left the US Army open to ridicule from the German inhabitants. The most striking of these instances involved a German civilian apprehended by CIC for failure to obey a proclamation to turn in all firearms. The German had hidden a double-barreled shot gun and 51 rounds of buckshot in his home. So well hidden was the shot gun that agents, knowing that the German was in illegal possession of a weapon, had to force him to dig it out of its carefully concealed repository. The order to turn in weapons had been publicly issued two weeks prior to this man's arrest. The German stated that he meant to turn in the weapon but had never gotten around to it. Two weeks after CIC's arrest, Military Government held the trial and the German was pronounced guilty. Although the maximum penalty for this offense was death, Military Government decided to give the German a two weeks sentence, retroactive from the time of his arrest. The offender was set free.

Mayfield felt that actions such as this were hardly in line with the policy of "firm orders, fairly given but strictly enforced," outlined at higher headquarters. In Mayfield's opinion the Germans would be quick to take advantage of any "soft dealing" on the part of the Americans.*

The stage was set for a later and more serious argument begun when the 29th CIC Detachment recommended that the pro-Nazi Burgermeister of Alsdorf be ousted.**

A Buried Pistol

On 12 December, the 234th Engineers Combat Team, tracing faulty wiring in the Hotel Alsdorfer Hof in Alsdorf, found three Nazi flags, a National Socialist

** See Vol XVIII, "Last German Offensive", Part I, Ardennes Breakthrough, for the full details of this later Military Government-CIC Argument in Alsdorf.

Motor Corps uniform, a Soldbuch and a pistol permit hidden under the floor boards in the attic. The articles were turned over to the 29th Military Police Investigating Team who decided rightfully that the case would be more appropriately handled by CIC.

On the same day, CIC agents arrested and interrogated the owner of the incriminating articles, Ludwig Shornstein. At first Shornstein denied membership in the National Socialist Motor Corps, the motorized branch of the Nazi Party, but when confronted with the Soldbuch and the uniform, he readily admitted his membership. However, Shornstein denied that he owned a pistol, claiming it had been left in France. Further interrogation brought out the fact that Shornstein had actually buried the pistol in the hotel garden.

The suspect finally admitted that he had buried the pistol on or about 29 September, ten days before the Americans arrived in Alsdorf. Although he claimed to have no knowledge of the proclamation requiring civilians to turn in all firearms, Shornstein had assumed that such an order would be published*

CIC could have no complaint on the Military Government disposition of Shornstein. He was sentenced to seven years imprisonment by the Military Government Court in Alsdorf on 4 January 1945.**

Chapter 5

FIRST ARMY CIC IN BELGIUM AND LUXEMBOURG

The liberation of the Grand Duchy of Luxembourg by Allied Forces had come so quickly after the initial invasion of France that Luxembourgers were overawed by the swiftness of the Allied advance. American troops were back in the little Duchy just 26 years after their World War I entrance.

CIC had been informed that the Germans had attempted in every way possible to influence Luxembourgers to incorporate their nation into the Reich, but these efforts had been thwarted by the intense nationalism of the vast majority of its quarter of a million citizens. Nevertheless, American authorities recognized the distinct possibilities of the Germans having left behind espionage and sabotage networks among the native population. To neutralize such networks, CIC enlisted the aid of loyal Luxembourgers.*

Since the Duchy, which is smaller than the state of Rhode Island, had no formally organized Army, CIC sought assistance from the civilian resistance groups. The most powerful of these was the Lique Des Patriotes Luxembourgeois, but the Roeter Loewe, the Luxembourg Volksliga, and the Luxembourger Freiheitsbund were also important.

All four of these groups, in addition to hiding downed Allied airmen, had engaged in espionage, counterespionage and sabotage for the Allies. The organizations also aided citizens of Luxembourg who were oppressed by the Germans, helped Luxembourg men avoid compulsory German military service, and compiled dossiers on those citizens assisting or collaborating with the enemy.

These organizations had sprung up secretly in different areas of Luxembourg, and there had been little coordination between the groups. With the arrival of American forces, it became possible for the organizations to come out into the open and work toward unification. Soon the Union Fun de Letzeburger Freiheets-organisationen, known informally as the "Union," was formed to coordinate all resistance activities in Luxembourg.**

Many CIC investigations began with the denunciation of an individual by a member of the "Union." The 83d CIC Detachment's investigation of of Walferdange revealed that he was, as had been reported, a member of the Nazi party. has served the party as and as secretary to allegedly had been responsible for the deportation of at least three Luxembourg families to Germany. It was discovered that had acquired considerable wealth through his collaboration with the Germans. When apprehended, did his best to ingratiate himself with the Americans and win their favor. But the evidence of collaboration was too strong. was turned over to Luxembourg authorities for final disposition.*

ADSEC Detachment No. 424, Section P, responsible for counterintelligence coverage in the city of Luxembourg, arrested in mid-November after receiving reports that he had been extremely pro-German during the occupation. apparently had a number of friends among the Nazi "brass." Since the Allied entry, had been working for the Service Defense Arienne in order to gain the opportunity to enter restricted zones where he could demolish partly destroyed buildings. CIC arrested and place him in the Grund prison in the city of Luxembourg.**

These specific cases were only two of many instances where tips from loyal Luxembourgers resulted in CIC's successful arrest of collaborators and potential German agents.

"Union" Organizes Police Force

The "Union" established a police force called the Miliz with a command structure paralleling that of the resistance organization itself. The duties of the Miliz were to operate road control posts, serve on patrols, and perform routine police functions until a permanent police force could be instituted.***

CONFIDENTIAL

Miliz personnel manned the roadblocks at critical junctions in and around the city of Luxembourg, and interrogated extensively all travelers that they did not personally know to be loyal. Those not readily identified as friendly were turned over to CIC Team No. 424, (ADSEC), covering the city of Luxembourg, or the 83d CIC Detachment, responsible for the outlying areas.*

In an attempt to avoid possible impersonation of Miliz personnel, members were cautioned by CIC not to issue a Miliz armband to a new member until he had complete and proper credentials.**

Map Out Two Restraint Lines

On 25 October, with the cooperation of the Civil Affairs Detachment of the 83d Infantry Division, CIC mapped out two parallel restraint lines through which no civilians were allowed to pass without a permit issued by Civil Affairs after screening by CIC. All other travel permits were to be issued by Luxembourg authorities.

The area from the easternmost restraint line to the Sauer and Moselle Rivers was evacuated almost entirely. A few persons were given special Civil Affairs permits, allowing them to remain behind to tend livestock in the area. All civilians picked up in the area without such a Civil Affairs permit were immediately turned over to CIC for investigation and then to Civil Affairs for final disposition.***

On 13 November, CIC arrested Nikolaus Seiler of Grevenmacher, Luxembourg, for failure to comply with the evacuation order. Seiler, a hermit and somewhat mentally deranged, pleaded that he was unaware of any such order.

according to CIC's investigation, was a loyal Luxembourger. He was turned over to the Civil Affairs detachment for final disposition.*

of Luxembourg City was arrested in the evacuation zone on 20 November at Alin, Luxembourg. Interrogation revealed that had been a member of the German Army, and had deserted and crossed the Moselle to give himself up to the American authorities. family and friends in the city of Luxembourg were all loyal, and the interrogation of indicated that he was strongly anti-German. He was evacuated with arrest forms and a detailed report to the Master (First US Army) Interrogation Center on 22 November.

(Four) In late November, CIC apprehended : of Gravenmacher and of Wasserbillig in the evacuated military zone. During their interrogation, the men claimed that they had been evacuated into Saarburg, Germany, by the retreating Germans. Their story was that when they were threatened with service in the Volkssturm, they deserted and were taken into custody by the Americans who, after interning them in a camp near Florence, France, released them and told them to return home. They claimed that in so doing, they had crossed into the evacuated zone.

(Four) Subsequent investigation by the 83d CIC Detachment revealed that had been a voluntary member of the Nazi party during the height of German power. In the light of this fact, the unlikely story told CIC by came to look like complete fabrication. CIC released the men to Luxembourg authorities for final disposition.**

Improper Handling of German Deserters

In general, the restraint lines and restricted zones worked effectively to provide the necessary civil and military security for the Duchy of Luxembourg although complete cooperation was not always received. The ADSEC Team in the city of Luxembourg reported that a number of deserters from the German Army, who, like Leo Probst, had been orginally conscripted from conquered territories, were issued certificates and travel passes by Luxembourg authorities without prior clearance from Civil Affairs. Many of these deserters were harbored in the

* Hq 83d Infantry Division, 83d CIC Detachment, Weekly Counterintelligence Report, To: AC of S, G2, First US Army, dtd 20 November 1944, /s/ Oliver A. Victor, 1st Lt, Commanding, (CONFIDENTIAL), Kansas City Records Center, BX 25095.

[redacted]

homes of loyal Luxembourgers. In some instances, deserters had been discovered by the Miliz and allowed to remain at large without any investigation at all. Steps were taken to enforce the standard procedure of placing deserters in regular Prisoner of War channels.*

Lagging Civil Security Measures

Another weakness of the security program for Luxembourg stemmed from the lack of any civil security measures in the city of Luxembourg, a situation that existed for more than two months after the Allied liberation. CIC Detachment No. 424 (ADSEC), and the detachments that had proceeded it, made vain attempts through the SHAEF mission to Luxembourg to institute the necessary security regulations.

In addition to the usual security measures, CIC hoped to institute a complete re-registration of all citizens of the Duchy. There had been such a variety of identification cards issued by Luxembourg and German authorities during the occupation that it was extremely difficult to prove an individual's true identity on the basis of his credentials. CIC also campaigned at higher levels for a registration of firearms in the Duchy.**

On 14 November, civil security measures for the city of Luxembourg were officially instituted by the local government, and comprise the six following regulations: a curfew for everyone from 2300 hours to 0600 hours, a six kilometer travel limit, an order prohibiting the carrying and use of binoculars and photographic equipment, certain blackout regulations, and a registration of all pigeon lofts. Despite CIC's request, no re-registration of citizens nor registration of firearms was ordered.***

---

* CIC Section P, CIC Detachment 424, Hq, Advance Section, CZ, CI Report, 5-12 Nov 1944, dtd 13 Nov 1944, /s/ G.C. Abrams, 1st Lt, Commdg, (CONFIDENTIAL), (Kansas City Records Center BX 25095).

** Ibid.

*** Ibid, 13-19 Nov 1944, dtd 20 Nov 1944.

The ADSEC Team found that security in Luxembourg was greatly improved as a result of these regulations. There was still much to be desired, and CIC Agents continued to press for the two recommended measures that had not been instituted. Luxembourg officials stated in late November that new identification cards had been ordered from an English engraving firm but had not been received even at that late date.*

208th CIC Detachment Operates In Southeast Belgium

While the 83d CIC Detachment covered the area around the city of Luxembourg, the 208th CIC Detachment maintained security in the regions to the west. This Detachment, commanded by Captain Albert R. Bowen, Jr., had its main offices at VIII Corps Headquarters in Bastogne, Belgium, but agents were also located at Arlon and Houffalize, Belgium and Esch, Luxembourg.**

Belgian Resistance Groups Disbanded

The first CIC unit in this area had experienced many difficulties resulting from the fact that the resistance groups in Belgium had remained armed, while local police and gendarmes had been unarmed. Consequently the legitmately constituted authorities had lacked the means to control the areas under their jurisdiction.

In mid-November, the disbandment and complete disarmament of resistance groups was ordered by Allied authorities. Although the order was complied with by the majority of the resistance group members, general unrest and scattered demonstrations followed in the area under VIII Corps control. Agents of the 208th CIC Detachment indicated they felt some individuals had not complied with the order to turn in all weapons.***

*** 12th Army Group, Semi-Monthly CI Report No. 5, for the period 1-15 Oct 1944, dtd, 15 Oct 1944, from the Office of the AC of S, G2, 12th Army Group, /s/ Edwin C. Lee, Lt Col, GSC, Exec, for the AC of S, G2; (SECRET), (Departmental Records Branch, AGO, Alexandria, Va.), and Hq, VIII Corps, CIC Det No. 208, Weekly CI Report No. 4, for the period 19-25 Nov 1944, dtd 27 Nov 1944, /s/ Albert R. Bowen, Jr. (CONFIDENTIAL), (Kansas City Records Center, BX 25097).

The 208th CIC Detachment reported that a public demonstration on 26 November by resistance members in Bastogne had met with unfavorable reaction from the local populace.* By early December, the agitation had subsided and no further demonstrations were reported by the 208th CIC.**

Inadvertent Prisoner Release Creates Problem

The transmittal and custody of men interned by Allied authorities was often a far from smooth operation. The mistakes that could occur before the final disposition of the individual suspect were many and varied. The 208th CIC encountered one of the most unusual errors. A complaint was received from the l'Auditorat Militarie of Arlon that American authorities at Prisoner of War enclosures and Military Interrogation Centers had released, without first notifying the Belgian authorities, prisoners taken from the Belgians for interrogation on intelligence matters. These prisoners, wanted by the Belgians for various offenses, had been set free by the Allies when they proved to be of no Counter Intelligence interest. This practice was stopped. Subsequently, the Belgian authorities were notified when Allied interrogation of one of their prisoners was complete, so that they could take him back into custody.***

Thus, when was arrested by the Arlon CIC unit, there was close cooperation with local Belgian authorities. had been reported as an associate of the Gestapo during the occupation. Subsequent interrogation revealed that her collaboration consisted solely of sexual relations with the Germans. She was not considered of Counterintelligence interest and was turned over immediately to Belgian authorities for final disposition.****.

The Tampered Water Supply

In late November, officials of the Arlon Water Works, which like all water works in Belgium was municipally operated, told Civil Affairs about a possible poisoning of the local water supply.

A camouflaged manhole cover which was to be removed only in extreme emergency by the officials, had been stolen from its position near the reservoir. Immediate investigation did not disclose whether any one had entered the reservoir area,* although on 26 October, the 208th CIC confined in the Arlon prison a close friend of as a possible suspect.**

CIC supervised bacteriological and contamination tests of the water. When these tests proved negative, the case was referred to Belgian authorities for further consideration.***

CIC Rejects Appointee For Chief of Steinfort Gendarmerie

In late October, VIII Corps Civil Affairs Detachment requested an investigation of Luxembourg. The 208th CIC inquiry disclosed that had been employed in police work in many German Cities between 1940 and 1944. In order to become a member of the German Gendarmerie, it had been necessary for him to take voluntarily an oath of allegiance to the Fuehrer. claimed that he deserted the Germans when he heard that his home town of Steinfort had fallen to the Americans. Local informants contradicted him by reporting to CIC that had been in Steinfort at the time of the town's liberation. Even without the revelation of this discrepancy in his story, the very fact that had volunteered his services to Hitler's regime was enough to deny him any government position under the allied Civil Affairs.****

Three Who Were Interned

Agents of the 208th in Steinfort detained upon receipt of word that he had been an informer for the Gestapo during the occupation. A thorough search of his home in Steinfort revealed the yellow uniform and complete insignia of a Blockleiter. His interrogation left the agents uncertain how to deal with since he appeared to be too stupid to endanger American military security.

A check with a trusted informant in Steinfort, corroborated CIC's impression of . The agents concluded that was of such inferior intelligence as to be incapable of performing espionage and sabotage on his own initiative, and he was released.*

Another of the many individuals investigated as possible espionage agents was at one time a performer for a German circus. came to the small town of Everlange, Luxembourg, on 25 September, apparently in the hope of fraternizing with American soldiers. Although seemed to be a typical "camp follower," her German birth and employment indicated that she possibly could be seeking military information from the soldiers she entertained. On this presumption, was arrested on 7 November and turned over to police authorities in Arlon.**

Early in December, a report from ASCZ CIC indicating that of Buttembourg, Luxembourg, had been a member of the Sturm Abteilungen started 208th CIC Agents on another case. CIC's preliminary inquiries verified membership in the Nazi group,*** and revealed that he had worn the Sturm Abteilungen uniform in Buttembourg. Investigation disclosed that had once quarrelled with his wife in a public cafe over his membership in the Sturm Abteilungen. His wife's anti-Nazi exclamations at this time had led to her internment for sixteen months in a German camp. told CIC that he had worn a Sturm Abteilungen uniform to further his business, a statement that CIC interrogators had heard time and again from former Nazi sympathizers.****

These three investigations conducted by the 208th CIC Detachment of pro-Germans and potential espionage agents were typical of a great number of cases handled by CIC in the Belgium-Luxembourg area. As the American forces came closer to German territory, the number of pro-Nazi individuals brought to CIC attention increased.

Agents Run Security Survey on Vital Steel Works

The Hadir Steel Works of Differdange, Luxembourg, the largest European producer of 100-foot "I" beams, had begun production for the U.S. Army soon after liberation, since the Engineers vitally needed the steel beam for bridge building. On 9 November, Agents of the 208th CIC ran an extensive security survey on the plant. The Agents found that the pre-war directors of the plant, who had been replaced during the war by Nazi sympathizers, had been restored by the American authorities. Investigation indicated that the plant's current directorate and management were composed of loyal Luxembourgers.

The Agents examined briefly the history of the factory's stock arrangement and production levels. The sources of materials needed for production were taken into consideration. The generator which furnished electric power was examined, and a recommendation made that an auxilliary generator be installed, since the breakdown of the single generator in the plant would cause a complete stoppage of production. The CIC agents suggested, as a temporary measure, that the area around the generator be rigidly patrolled by guards. They also examined the ten main blast furnaces, six Bessemer converters, and nine rolling mills for possible points of sabotage.

The agents then compiled a list of the 4,337 workers at Hadir, breaking the list down by nationalities. Among those employed were 77 Germans and 412 Italians, but all had been cleared previously by the labor office in Esch. CIC considered labor union organization and possible areas of friction between management and labor. It was discovered that the plant's fixed base pay rate was unpopular among the union men and that steps were being taken to adjust the rates in line with the workers' demands. The plant management expected no immediate trouble with the Union.

The agents carefully scrutinized the plant's guard system and discovered that the 22 civilian guards and 18 gatemen were all former Hadir factory hands who had been retired to less strenuous work. A platoon of the 731st Engineers Depot supplemented these guards and actually supervised most of the security measures. All persons and vehicles were checked before entering the plant area. For added safety, the CIC Agents recommended that a U.S. Army guard accompany all vehicles to their destination within the plant.

Blackout regulations were enforced by the company guards and checked by Army personnel. Air protection was supplied by the 129th AAA Battalion stationed nearby. A 50-man volunteer fire brigade, equipped with electric and gas pumps, provided fire protection. The water supply was found adequate to meet any emergency.

As a last step, Henri Roger, the managing director of the firm, was interviewed on the question of possible sabotage. Roger stated that the patriotic and pro-Allied sentiments of the workers insured that they would act to prevent any sabotage that might be attempted. Roger felt that the plant was organized so that no single act of sabotage would stop production. CIC agents agreed with him, except on the matter of the single generator which seemed to be the most vulnerable point in the plant's security.

Industrial plant security in an area relatively close to combat zones had a more urgent aspect than measures taken in regions far removed from the front lines, and the apathy of some industrial firms toward military security was not apparent at Hadir. The Luxembourg management of the steel works and the U.S. Army Engineers had anticipated most of the threat to plant security before the CIC agents surveyed the situation.*

Rest Area Security

The VIII Corps maintained from November to mid-December a huge troop rest center in Arlon. To the 208th CIC Detachment fell the task of maintaining security at this camp. All incoming troops were given lectures and printed instructions to make them more security conscious. Posters proclaiming the value of tight security were distributed in places frequented by the troops. Proprietors of establishments most patronized by U.S. personnel were investigated, and, when the owner of a cafe was of a questionable background, CIC recommended that his establishment be placed off limits. All other taverns were declared on limits until 2100 hours, with Military Police checking these establishments after that hour. CIC screened all civilian employees at the rest center and all local girls attending dances sponsored by military units at the camp. During the time the rest camp was in operation, no major security violations were noted by the 208th.**

* Hq, VIII Corps, CIC Det No. 208, Subj: Hadir Steel Works, Differdange, Re: Security Survey and Recommendations, 10 Nov 1944, a supplement to VIII Corps Weekly CI Report No. 2, dtd 15 Nov 1944, /s/ George P. Brown, CIC Agent, (CONFIDENTIAL), (Kansas City Records Center, BX 25097).

Please Explain!

The security checks conducted daily by the 208th CIC became almost too much a matter of routine. Each night agents of the detachment made a blackout check of the VIII Corps area, and the phrase "no violations noted" constituted the full report on most of these checks. On 27 November, the Agents making the check filed such a report. But, in longhand at the bottom of the report was appended a note from Captain Bowen, the Commanding Officer: "The Chief of Staff states that he was out on this night and saw many blackout violations. Please explain!" The phrase "no violations noted" was used less frequently after this incident.*

Europeans In the US Army Uniform Constitute Security Threat

A major obstruction to the enforcement of travel restrictions resulted when loyal French, Belgian, and Dutch boys, who had been utilized by American troops as scouts, guides, interpreters and housekeepers, were sent back home by their units, garbed in U.S. Army uniforms. Upon their release youths usually wandered around behind the lines in their American uniforms, complete with chevrons and shoulder patches. Eventually they were arrested and screened, a process which consumed a lot of CIC's time and made more difficult the detection of espionage agents posing as ex-U.S. Army employees. CIC units were requested to inform all American army forces that when these young patriots were released, they should be sent back as displaced persons through Civil Affairs channels.**

Another problem in enforcing travel restrictions involved civilians who had been given testimonials or letters of introduction by U.S. Army personnel, requesting that the individuals be granted all manner of privileges, most of which ran contrary to existing Army regulations. Almost all the notes included a request for freer movement than was granted by the travel restrictions.***

Agents Become Bird-Watchers

In Luxembourg and Belgium, the breeding and raising of carrier pigeons w a large enough pastime to constitute a definite threat to Allied attempts to prev Nazi espionage. A British VIII Corps communication, distributed to American counterintelligence units in Belgium and Luxembourg, reported that the enemy was running an organized network of "stay-behind" pigeons in the liberated cou tries. Captured agents had claimed that Nazis communicating with Germany b means of pigeons were twice as numerous as those using wireless telegraph. Small clandestine lofts were reported to be established in all areas behind the lines. Pigeons were dispatched from these lofts to larger central lofts, some hind the lines and some in German-held territory. The Nazis then used wireles transmission to relay information from these central lofts to higher headquarte

In all areas in Belgium and Luxembourg, pigeon flights were prohibited, a lofts were to be locked at all times. Security regulations in many areas requir the registration of all pigeons.** First U.S. Army took steps to control the us of pigeons by enlisting the cooperation of the Pigeon Owners Association of Bel- gium. All pigeons found in Germany were to be killed.***

When a person under the remotest suspicion operated a pigeon loft, the bir were confiscated by the Americans. Such a case occurred in Luxembourg City when ADSEC Team No. 424 confiscated the pigeons owned by hairdresser under arrest for collaboration.****

Agents in the field were ordered to notify higher headquarters immediatel after discovering violations of regulations designed to prevent pigeon flights o after confiscating a loft of pigeons owned by a suspicious individual. Misunde standing the order, a 208th CIC Detachment agent sent some confiscated pigeo

on to the Detachment headquarters. Captain Bowen returned the birds with the following note: "Attached pigeons are returned herewith for your disposition. A copy of the memo regarding pigeons is coming down to you. In no sense of the word does this mean that VIII Corps is running a pigeon loft. If you have an espionage suspect who has pigeons, it is well to note in the investigation that such pigeons are there and forward the information along with the detailed reports when the prisoner is evacuated. If higher headquarters desires a pigeon, they will make a special request."*

Four Silent Detachments

No records have been found of the activities of the four division detachments of the VIII Corps during this period. The 2d CIC Detachment was located in St. Vith and Auw, Belgium, while the 9th Armored Division CIC, recently arrived in ETO, covered the area of Mersch, Luxembourg after mid-October. Three large cities in northern Luxembourg, Wiltz, Clervaux and Dierkirch, were covered by Agents from 8th CIC Detachment until mid-October when the 28th CIC Detachment took over.

At that time the 8th CIC Detachment was placed under the V Corps and sent with the 8th Infantry Division to the Rotgen bivouac area.

Pro-German Sentiment Found In Eupen-Malmedy Region

In the region of Eupen and Malmedy, Belgium, near the German border, CIC Agents encountered a deeply-rooted pro-German sentiment in an unusually large proportion of the population. Most of the people in the area had German cultural backgrounds, and estimated 80% of the population speaking German. The area had been incorporated into Belgium after World War I under the terms of the Versailles Treaty. CIC Agents discovered that, from the very first days of Belgian rule, there began strong pro-German underground movements. Liberal's and Socialists in the movement left when Hitler took power, but the organizations continued to gain in strength. Pro-Germanism, with Nazi encouragement, crystallized into the Heimatbund, a Belgian extension of the Nazi party. Membership in the organization was apparently completely voluntary, although "social pressure" often edged a number of lukewarm pro-Germans into the Heimatbund during the occupation.

* VIII Corps, 208th CIC Det, Memo For Lt Ermis, 26 Oct 1944, /s/ Bowen, Unclassified, Incls: 3 boxes of pigeons (uncounted), (Kansas City Records Center BX 25097).

Thus CIC faced the unusual problem of dealing with a supposedly friendly population which tended, in fact, to look with more favor upon the enemy.*

Until 24 October, counterintelligence coverage of Eupen was handled by the First U.S. Army CIC Detachment. All Nazi leaders right down to the Blockleiters fled the town before American authorities arrived. Also evacuated were the Nazi Burgermeister, the editorial staff of the local newspaper, and all of the Gestapo, Ordnungpolizei, and Kriminalpolizei.

In Eupen, party and police records, particularly recent ones, were partially destroyed, but a mass of valuable documents were still available to CIC. From these documents, considerable information on Nazi activities in Eupen was extracted.

CIC found that the population was both fearful and resentful of the Americans. During the early weeks of Allied occupation, civilians were afraid to show any signs of friendship toward the Allies. CIC expected little local assistance in rounding up what few party leaders might remain in Eupen.**

In mid-November, after two months of American control in Eupen, the 205th CIC Detachment took stock of the situation. It was estimated that 1,000 former Heimatbund members had remained behind when the Germans evacuated. Many of this group were still at large in spite of persistent attempts to apprehend them. The most significant arrestees were a Captain of the German Army, Otto Schmitz, caught in civilian clothes, and three Zellenleiters of the Nazi party in Eupen.***

CIC Agents had also discovered that attempts to enforce strict travel control in the area were hindered by the fact that Civil Affairs rather than Military Government operated in this so-called liberated area. There were no effective means of punishment of civilians other than internment through First Army Interrogation facilities, and action that was far from appropriate in many instances.****

Opportunists Fill Top Municipal Positions

Originally Civil Affairs had appointed Edward Schlembach to be Burgermeister, pending a permanent choice by Belgian authorities. The reconstructed Belgian government appointed as Burgermeister Hugo Zimmerman, pre-war Burgermeister, a notorious "fence-sitter" who had somehow managed to avoid controversies during his first term in office. Schlembach continued to do most of the actual work, as Zimmerman traveled to Brussels frequently to maintain his contacts in the capitol. A moderately successful administration was established, but CIC Agents felt that both men were opportunists taking advantage of an extremely confused situation to better their private interests. Although the Zimmerman government was not to be trusted to any great extent, it was felt that a wholesale attempt to clean up the city administration would result in complete chaos. Fortunately, most of the municipal business passed through the hands of a CIC informant, a prominent resistance member, who had been appointed

Belgians From Other Regions Do Police Work in Eupen

A major problem in Eupen for the Belgian government was the establishment of a permanent police force. It was necessary for the Belgians to send 16 members of the Gendarmerie Nationale (National Police) all from outside Eupen, to form the hard core of the new force. The work they did with the CIC Detachment showed a high degree of efficiency.

On the other hand, CIC agents had reason to mistrust the local Municipal police, organized under the pre-war Police Comissaire. There had been indications that members of this force had warned suspects under investigation by the 205th CIC Detachment.

In addition to the Gendarmerie Nationale, CIC Agents utilized members of the Corps de Renseignments Avances, an extremely active resistance group, to check persons under investigation. The 205th CIC Detachment felt that members of this Corps, although turning in accurate information, often passed on matters of a trifling nature as if trying to impress the agents with quantity rather than quality. The Corps de Renseignments Avances shared the reputation for irresponsibility acquired by the Armee Blanche and other Belgian resistance groups and for this reason was soon dissolved by the Belgian government.

During the war, the Armee Blanche in Eupen had operated with almost no direction from a higher headquarters. A local reorganization just prior to the coming of Allied forces made it difficult to tell whether individual members had actually fought the Germans, hidden in the organization to avoid labor camps or military service, or joined just at the end of the war to be sure of being on the right side of the Americans. Consequently, the Armee Blanche was of little use to CIC.

There were persistent rumors during November that the Nazi organizations in the Eupen area were meeting secretly, publishing an underground newspaper, and menacing people who were cooperating with the Americans. CIC units were constantly on the alert for indications of the truth of these reports. A group of clubs, consisting of former Hitler Jugend members, was uncovered, but no other confirming information was received. These youth organizations consisted of irresponsible vandals who had done little more than steal from the Americans. Nevertheless, they could easily have been converted into a militant underground organization by effective leadership. CIC agents arrested some of the youthful leaders of these organizations and infiltrated several loyal Belgian boys into the membership to report on the groups' activities.*

205th CIC Screens 10,000 In Two Weeks In Malmedy

Somewhat less pro-German than Eupen's citizens were the people of Malmedy, 15 miles south of Eupen. Malmedy was covered in October 1944 by the V Corps CIC Detachment, and 10,000 evacuees were screened in a period of two weeks. Many German soldiers in civilian clothes and several other suspicious personalities were apprehended during the operation.**

At another civilian processing point - this one at Verviers, Belgium, eight miles south of Eupen - agents screened about one hundred evacuees a day during October. The arrest of one enemy agent at this point resulted from checking the lists of individuals processed against the file of "wanted" personalities.***

The 205th CIC Detachment also operated in areas just over the German border, principally Monschau and Rotgen. The latter town had been originally covered by the 503d CIC Detachment on 13 September, the first CIC operation within the German border.****

**** Details of the 503d's activities in Rotgen are contained in the Section on First Army in Germany.

V Corps Organizes Security Police Force

In an attempt to relieve counterintelligence personnel of their most routine activities and to supplement the Military Police in all security matters, V Corps created in October a special Military Government Security Police Force. This force was composed of men from various corps units and included a number of German linguists.* Unfortunately further details of how this force operated with CIC have not not been located.

CIC Develops "Blitz Search" Technique

Another counterintelligence innovation devised at this time was the technique of the "blitz search," a large scale, comprehensively planned raid designed to check areas already canvassed by CIC agents.

A typical blitz search was conducted in Monschau from 0500 to 1300 hours on 9 December 1944. Thirty-three CIC agents from the 205th CIC and the ADSEC CIC Detachments, twenty Military Policemen, seventeen Military Intelligence Interpreters, and ninety-four indigenous police from the Military Government section, a total of 164 persons, thoroughly scoured the town. Inhabitants were checked against the Military Government's Master Registration List. All houses and other buildings were searched.

The searching force was divided into ten groups, each with an area containing from twenty to fifty buildings. The courthouse was used as a headquarters for the searchers because of its location in the center of town.

The primary purpose of the raid was to provide experience for the participants; the theory being that few, if any, black-list Nazi would be found. The raid was expected to serve as a valuable sounding board for future similar operations deep inside Germany where many wanted personalities would be more likely to be found. Although of secondary importance, the apprehension of unregistered persons who might be spies, or the confiscation of tools which could possibly be used by enemy agents was not overlooked.

The results ran true to expectations. A few citizens of Monschau who had not been registered were found, although none were suspects, merely elderly or ill people who could not or would not make their presence known. Cameras, binoculars, radio repair materials, pigeon roosts, and illegally possessed U.S. Army rations were confiscated and their owners' names placed on a list for Military Government.

---

* 12th Army Gp, Semi-Monthly CI Rep No. 5, 1-15 Oct 1944, dtd 15 Oct 1944 from AC of S, G2, 12th U.S. Army Group, (SECRET), (Departmental Records Branch, AGO, Alexandria, Va.).

The major lesson learned by the searchers was that this type of raid could be accomplished most effectively if there was only one purpose - either the checking of inhabitants or the confiscation of contraband - because the time involved lessened the blitz effect when both were attempted in a single action. It was felt that two separate raids with individual aims would be better than one with the double purpose.

A similar blitz search was made by the agents of the 8th CIC Detachment, aided by personnel of the 205th CIC, in Rotgen shortly afterward.*

Area Southeast of Malmedy Covered by 4th and 99th CIC Detachments.

Counterintelligence coverage of the small towns to the southeast of Malmedy was provided by the 4th CIC Detachment until that unit was moved to Zweifall, Germany, on 7 November, after which the area was covered by the newly-formed 99th CIC Detachment.

The population of most of these small towns was temporarily evacuated to Malmedy after CIC screening. Several soldiers of the German Army and a few Nazi Party members were turned up during the screening.

On 31 October, when a small group of civilians was needed to return to Hunningen to care for livestock, the Office of Civil Affairs in Malmedy inadvertently allowed a former Blockleiter and definite pro-Nazi, Peter Christian, to choose ten fellow townsmen to return with him. Christian naturally selected men with pro-Nazi sympathies. When these men arrived in Hunningen, the 4th CIC Detachment sent a protest to the 205th CIC Detachment in Malmedy, stating that Civil Affairs in Malmedy had failed to consult them before chosing Christian.

The 4th Division Military Government detachment informed CIC that the eleven men were not needed in Hunningen anyway. Christian and his buddies were hustled back to Malmedy along with a suggestion to Civil Affairs in that city that it would be desirable to consult with CIC officials on all such matters in the future.**

On 31 October, tactical troops of the 4th Infantry Division arrested Edouard Collas who was attempting to infiltrate through the American lines. Collas claimed to have left Poland to go to Honsfeld, near Malmedy, to procure clothes. He told CIC that he had been employed as a railroad worker inside Germany and in Russia and Poland since August 1942. After lengthy interrogation, Collas admitted

deserting the Belgian Army in December 1939. He had immediately joined the German Army, but claimed he was discharged later for refusing to sign a statement that he would obey all orders from his superiors regardless of the nature of the command. Collas eventually also admitted that he had joined the Heimatbund in 1936 and the Nazi Party in 1940. The 4th CIC Detachment evacuated Collas to First Army Interrogation Center through Prisoner of War channels. *

In addition to the 4th and 99th Division CIC Detachments, V Corps CIC had supervision of the 8th CIC Detachment, which moved on 20 October from VIII Corps jurisdiction, to Rotgen; and until late November, the 505th CIC Detachment which operated in Fammonville and the area around Eupen.

Arrests By Resistance Groups Muddle Liege Situation

It has been noted that the unarmed Belgian police, the legitimate law enforcement agency, had been unable to control fully the area under their jurisdiction because resistance groups remained intact and possessed arms.

In Liege, where counterintelligence activities were run by the 301st CIC Detachment, the situation got out of hand immediately after liberation on 7 September. Local resistance groups began wholesale arrests and, after ten days activity, had 3,000 persons under lock and key. The three prisons used for the detention were completely controlled by resistance groups.

No arrest records were kept, and when constituted authorities began to sort over the cases on 18 September, the situation appeared to be hopelessly muddled. A few individuals who were obviously innocent were released immediately, an act which led to friction between Liege authorities and the local resistance organization. Of the 2,500 persons still under arrest as of 1 October, 1,000 were being held for unknown reasons. The tension in Liege resulting from these wholesale arrests made counterintelligence activity in the area extremely difficult and demonstrated that the prestige of an investigative agency could suffer enormously when law enforcement organizations, legally constituted or not, become reckless with justice. **

CIC Penetrates Prisoner Of War Escape Route

By late fall of 1944, the Allied Prisoner Of War Camps were overflowing with beaten, sullen members of the once proud Wehrmacht. As the number of prisoners mounted by the hundreds weekly, the problem of caring for them became increasingly difficult. Not only did tremendous quantities of food, clothing, and medicine have to be diverted for their use, but finding a practical way of containing them became a serious problem. Following a preliminary interrogation, prisoners were shuttled as quickly as possible to a rear area. There they were placed in temporary detention compounds which were often erected in open fields with only a barbed wire fence around the perimeter. Here Prisoners of War were held several weeks while being thoroughly processed. Later, they were shipped to permanent camps in Northern France, the United Kingdom, and the United States.

Escape from these temporary compounds, although difficult as well as dangerous, was not impossible. To a few die-hard Nazis, it was an ever-present opportunity. Yet, of the many thousands of German Prisoners held in these camps, only an infinitesimally small percentage ever attempted to escape. The vast majority were content to enjoy three good meals a day and sit out the remainder of the war.

However, the fact that a large proportion of those who escaped successfully made their way back to the German lines became a great concern to Allied intelligence. CIC suspected, and with good reason, that the prisoners, once outside the confines of their compound, made their way back to the Reich with the aid of an "Underground Railroad," operated by sympathetic civilians, strategically located along key routes who hid them, gave them food, and then led the way to the next station. Downed Allied flyers had been smuggled out of Europe in much the same manner by friendly partisans prior to the Normandy landings.

Confirmation that escape routes did exist behind the U.S. lines came in October 1944 when Tactical Reserve Team No. 3 of the 418th CIC Detachment penetrated a route in the Bastogne-Houffalize sector of Belgium.* Details on the operation are not available, but inconclusive reports from the Detachment indicate that, although several arrests were made, a number of isolated stations eliminated, and traffic temporarily disrupted, the overall structure of the route was not compromised.

---

* Unit Hist of CIC Det No. 418, Tact Res Team No. 3, page 4, document undtd, Staff and Faculty Library.

Almost two months later, the 301st CIC Detachment, which was commanded by Lt. Col. Horace B. Miner, decided to attempt a penetration of an alleged escape route in the First Army area. Although there had been no factual basis for the belief that an escape route was active in the sector, the 301st began an operation that taught many lessons to the veteran CIC men supervising the investigation.

An Austrian, known by the alias of , was approached and recruited to act as an undercover agent for the CIC. had been recommended for the mission by "T" Force CIC, having joined that organization after serving with the Belgian Armee Secrete. CIC Captain Leonard Bessman, who had successfully escaped from a Prison camp in Italy a year previously, briefed the Austrian on his mission. A third CIC veteran, 1st Lt. Charles B. Conick, made arrangements for reception and interrogation at the Army Prisoner of War enclosure, where would receive a military cover story. From the enclosure, was to be evacuated as a "Prisoner of War" to an ADSEC prison camp in Liege where he would work in a quarry with captured German soldiers. Here he was to investigate the possibilities of escape and to find a real Prisoner of War who might be plotting such an attempt. If unsuccessful, was to feign illness, in accord with arrangements which had been made with the camp commandant, in order to be removed from the camp.

was infiltrated into the camp on December and, three days later, pretended illness and was removed to the camp's headquarters where he was contacted by agents of the 301st Detachment. revealed that, on the first day, he had been approached by several members of his "cover" unit, the 76th Eratz Grenadier Regiment, and had passed their superficial interrogation undetected. Later on the same day, a prisoner named : bluntly asked him if he wanted to escape. The undercover agent wisely demurred, giving the opportunity to convince him. Finally swayed, attended a meeting with and six others during which the escape was planned.

On the night of December , at a point where the shadow of a tent fell across the fence, the barbed wire was to be cut and all eight were to escape. They were to wear their fatigue uniforms (the letters "PW" having been washed off with stolen gasoline) and woolen knit caps. Two maps were produced which outlined the escape route: from Liege through the towns of - Herve, Dison, Pepinster, Palleur, Sart, Hockai, and Bernester to the woods south of Bougnez. In Bougnez, one of the prospective escapees would seek help from an inn or bakery. A number of men had already escaped via this route, intimated. To secure arms they would ambush individual American soldiers. They planned to travel only by night.

This information was turned over to the camp commandant by CIC along with the suggestion that the escape attempt be thwarted without taking obvious countermeasures.

on the night of December, dressed in U.S. Army clothing, including the woolen cap but excluding a helmet, was to penetrate the final charted link in the escape route. He entered the inn, which had been reconnoitered earlier, and explained his "plight" to the proprietress.

Returns With Information

Believing him to be a German escapee who was anxious to return to the Reich, she led across the road to a farm. The owner of the farm rushed the pair into the stable, questioned then gave him food and diagrammed a route to Losheim where there was a German outpost. left immediately and walked one mile toward Losheim before returning to the 301st CIC Detachment. He had not obtained any additional leads or new information concerning "safe houses."

A second agent, an anti-German Prisoner who had been selected for the mission by the First Army Interrogation Center, was inserted in the escape route in Bougnez on 12 December.

The proprietress at the inn and the farmer, , aided him as they had however, was able to secure the name and address of another contact: near Billingen. On the following evening, was taken to Billingen and he made his way to house. angry and suspicious at first, became satisfied with story and outlined the remainder of the escape route for the CIC-plant, providing three addresses along the way. had indicated that was the central figure in the chain. searched the home, after had left in the morning, but found nothing incriminating. He returned to the CIC office in Billingen. Further penetration of the route was frustrated by a German attack on 16 December. was arrested, however, trying to return to his home, which at that time was in German hands again.*

Another Mission For

meanwhile, was taken to Liege for another penetration attempt, to begin at the house of whose name had been secured from a

* 301st CIC Det, Hq, FUSA, Monthly Information Report for Dec 1944 and Jan 1945, dtd 15 Feb 1945; (SECRET), Staff & Faculty Library.

printed commercial card found on a recaptured German escapee. proved less trustworthy than he had on the previous trial, but since some time elapsed before his double-crossing was discovered, CIC was never able to establish definitely which parts of his reports were true and which were fabrications. According to his story, proceeded along thirty-five miles of the escape route on which started him. He reported almost daily to the CIC officer under whom he operated and gave lengthy detailed reports on the personalities and places involved in the system. On his own initiative, introduced his mistress into his operation, but she lasted only one stop. At CIC insistence, she discontinued her efforts.

ceased his penetration at the final stop before an alleged escapee collecting point, as it was believed, despite his cover story, that he would fail to pass more than a cursory interrogation. He had no German military experience and was vulnerable in that respect.

Later, two independent attempts were made to introduce more suitable agents into the same underground system. The German offensive had failed by then, however, and though cordial to the pseudo-escapees, appeared too frightened of his own position to help others to safety. From findings, the route appeared too well organized to permit infiltration at a midway point. It was decided to act immediately on the uncorroborated information.

A mass arrest was planned, but, on the day before the scheduled operation, Belgian authorities--who had not been informed of the CIC enterprise--arrested on a two-year-old charge. This increased the possibility of prepared stories of innocence on the part of other suspects whom CIC arrested the next day.

Twenty-five suspects, the results of descriptions, were caught in the round-up. Interrogation began immediately, and investigation of the places described produced a certain amount of concrete evidence substantiating his account, namely:

(1) In one cellar, in which said he had hidden, a secret opening into another cellar room was found. The other room contained pieces of U.S. Army clothing and Army rations.

(2) according to told him that the in Havelange would give him an ace of diamonds which he would lay on the table of . A raiding party found in the home two decks of playing cards from which various cards, including both aces of diamonds, were missing.

The ace of diamonds in a third deck was the single marked card, bearing the name "Dempsey" on it; an eight of clubs was found with the name and address of the cafe proprietor on it.

(3) A photographer, who was supposed to have taken identity photos for false identifications cards for the escapees, admitted photographing two men of military age who were unknown to him and spoke with Germanic accents.

(4) In the home of a garage owner in the escape route, a hole cut through the back of a closet gave entry to the courtyard.

(5) admitted his contact with and the other two agents, but denied any escape route knowledge.

(6) Three escaping German Prisoners were known locally to have been in the area and around the farm at the time said he had been assisted.

Information Points To Inconsistency In Story

Imposing as this wall of evidence seemed, after 24 hours of interrogation, none of the suspects had been broken and one proved to have an iron-clad alibi. Furthermore, certain information indicated inconsistencies in testimony.

Not wanting to alienate by showing lack of confidence in him, aggressive interrogation of the CIC informant had been deemed unwise up to this point. Now a new approach was required.

At the First Army Interrogation Center, was asked simply to recite his account once again. mistress was located and brought to a living room in CIC quarters which had been wired with a microphone. was taken to her after being informed that she was leaving soon for the Interrogation Center. The agents left them alone, ostensibly to arrange for transportation. searched the room and tested the walls for microphones, but failed to locate the one CIC had planted. Then he whispered instructions to his mistress, rehearsing her in the story she was to tell and bullying her during the conversation. When the CIC agents returned, the couple was separated, thinking his mistress was on her way to Interrogation Center. However, she was questioned immediately and her cover story quickly broken. Her admissions discredited some of account, and he was interrogated and later confessed to the hoax he had perpetrated for monetary gain.

2299

But as a result of the CIC efforts at penetrating the escape route, was arrested and confessed, as did . The proprietress of the inn was believed to have been killed in a bombardment.

In the second phase, only and those immediately connected with him were apprehended. The rest, due to fabrication, were freed. himself was arrested for giving fraudlent and malicious information during this phase of the operation.

Agents Pass On Advice

The Monthly Information Report of the 301st CIC Detachment, which contained the disappointing news of the second attempt to , advanced some sage advice for those who would conduct similar types of enterprises. The statement follows:

"In addition to the necessity for assiduously carrying out the checks which were applied in this case, the story of any agent provocateur must be checked in detail when he first gives it. He should be cross-examined as to physical detail, times and places. At some subsequent time, say a week later, he should be reinterrogated as to detail. If this process is routine from the beginning, the agent need feel no loss of confidence. Extremely detailed accounts of the agent's observations are required for later suspect interrogation in any case. The use of two agents, operating independently of one another, is essential, if at all possible...."*

ADSEC CIC Collects Information On Belgian Resistance Groups

The greater part of Belgium was covered for CIC by ADSEC Teams. An important operation for these units was the collection of all available information on the strength, disposition and armament of the Belgian resistance groups, principally the , an active aggressive organization with a hard core of Communists in control. This investigation proved to be difficult and delicate work, requiring the utmost in diplomacy and thoroughness.

ADSEC Teams felt that "the strongest single force in Belgian life was the resistance movement." Unlike the situation encountered by the 301st CIC Detachment in Liege, ADSEC CIC found that the resistance groups had done a fine job of rounding up collaborators immediately

* Hq, FUSA, 301st CIC Det, Monthly Information Report, 4 Mar 1945, (SECRET), (Staff and Faculty Library).

after the liberation.

ranks of the
began to reach for political power by open recruiting even though the war was over in their area. Resistance members were frequently found guilty of extorting food, cigarettes, and money from unarmed civilians. Soon arrests were being made without discrimination and often without reason.

In late October and early November, the resistance groups prodded by the many Communists in their ranks, organized an armed force which not only threatened the Belgian National Government, but the security of the Allied rear areas as well. The national order to disband and disarm the groups resulted in public protests throughout the country. Various groups planned to march on the capitol building in Brussels to overthrow the government. For a short time, it looked as if the Supreme Commander would have to take action to disarm the trouble-makers, and there was a distinct possibility that Allied soldiers far from the fighting lines would soon be pressed into combat on the local scene. CIC worked to compile voluminous records on the groups so that target information would be on hand should American forces go into action against the resistance organizations.

When Allied authorities made it clear that they were issuing no idle threats, the obeyed their government's order and turn in their weapons.*

Chapter 6

THIRD ARMY CIC IN FRANCE

Third Army Takes Metz

The main objective of the Third U.S. Army during the autumn of 1944 was the fortress city of Metz where the Nazis held out until mid-November, although troops of the XX Corps had been within sight of the city two months before.

Supply shortages proved to be only one of the many reasons for the long delay in taking Metz. Fortresses like the legendary Fort Driant, five-miles southwest of the city, manned by elite German troops, eventually had to be demolished by U.S. artillery and air bombardments. Further complications resulted when heavy autumn rains turned the Moselle River into a raging torrent.

Finally, on 20 November 1944, the newly-arrived 95th Infantry Division reduced the last remaining German resistance in Metz. Mean while, other elements of the Third Army worked toward the Saar River.*

A Quick Start For A New CIC Unit

The 95th Division which had landed in Normandy during mid-September moved onto the line in the bridgehead sector south of Metz on 1 November to relieve the 5th Infantry Division.**

The 95th CIC Detachment got off to an auspicious start by apprehending Roger Necru, a French short-range linecrosser, near Les Mesnils on 21 October. Interrogation revealed that Necru had been recruited to obtain unit identifications between Pont a Mousson and St. Avold and then return to the German lines. Necru was subsequently shot.***

Although the 95th CIC was the first American unit to enter Metz, it fell to the 5th CIC Detachment to exploit counterintelligence targets inside the city.

*** 12th Army Group Report of Operations, (Final After-Action Report), Vol IV, G2 Section, (Part V through VII), p. 208, RESTRICTED.

To supplement the 5th CIC, two officers and eight agents of the Tactical Reserve Team #7 of the 418th CIC Detachment arrived in Metz on 21 November. One week later, the remaining eleven men of that team reported to Capt Lyndon B. Allen, Commanding Officer of the 5th CIC Detachment, for duty.*

CIC personnel in Metz had at their disposal four separate black lists, one of which appeared in the Counterintelligence Brief for Germany, Wehrkreis XII. The other lists were obtained from the T-Force originally scheduled to enter Metz, the Office of Strategic Services (OSS), and the Securite Militaire (SM).

During the first week in the city, 159 target personalities were sought, of which only four minor collaborators were apprehended. One of the four, a slaughter house foreman believed to have been a denunciator for the Gestapo, was deemed to have enough information of counterintelligence interest to be sent to a higher echelon for intensive interrogation.

At the end of November, the 5th CIC Detachment reported that their attempts to locate 37 target personalities had been completed with negative results, and 65 other cases remained pending. Both the Securite Militaire, charged with locating 47 target personalities, and , assigned approximately 25 individuals, reported negative results.

Establishments in Metz of counterintelligence interest were searched between 21 and 24 November. Agents found nothing except small quantities of blank paper and various office supplies.

The delay in taking Metz had apparently given the Germans time to evacuate important personalities and destroy or remove all documents and equipment of value. CIC received a report from the French Forces of the Interior that all buildings occupied by Germans have been searched by a special security squad after their abandonment.

On 22 November, a CIC Prison and Interrogation Center was established at the Metz civilian jail where all persons arrested for counterintelligence reasons by either the Americans or the French were to be registered and processed. By the end of November, eight persons had been processed through this center and evacuated to the Third Army Interrogation Center; thirty-four others had been completely processed at the Metz center.

In addition, security control posts and patrols were maintained in Metz with nine fixed posts located at strategic points on the south and east sides of the city.

---

* 5th Infantry Division, G2 After-Action Report, 1-30 November 1944, G2 Jnl and File, 305-2 (6610), Master, Departmental Records Branch, AGO, Alexandria, Virginia.

Each post was manned by a non-commissioned officer and six men from the Gardes-Mobiles, with two men on duty at all times. Five two-man patrols roamed the city looking for offenders of the travel restrictions.

In performing their counterintelligence functions, the 5th CIC Detachment apprehended and placed in Prisoner of War channels 131 deserters from the German Army.*

The 220th CIC Detachment Operates Around Thionville

While the 5th CIC Detachment operated at Metz, the security of the areas north and west of the city was the responsibility of the 220th CIC Detachment. The main body of the Detachment operated out of Thionville, 17 miles north of Metz on the Moselle. Thionville, which the Germans had defended with the same tenacity as Metz, had fallen to troops of the 90th Infantry Division on 12 November.** XX Corps CIC agents were also located in Conflans, 15 miles west of Metz, and in Sierck and Bouzonville near Thionville.***

While Thionville was still in the combat zone, CIC's major concern was the speed with which the German garrison across the Moselle spotted American gun positions. It was discovered that pro-Germans in Thionville were signalling the Nazi forces every time U.S. gun positions were changed. A proclamation from the mayor urging citizens to stay in their houses at all times failed to stop this activity.

On 13 November, CIC suggested, and the mayor agreed, that the best solution was the confinement of the ninety-seven German aliens known to be in metropolitan Thionville.****

By 1200 hours on 14 November, French authorities had completed this operation. Later that day, the mayor issued a proclamation warning that if the

signalling of American gun positions continued, he would be forced to evacuate the town, and requesting that the loyal citizens be on the lookout for pro-Germans.*

Once Thionville was out of the range of enemy weapons, a major problem for CIC became control of the stream of refugees seeking to cross the Moselle at the Thionville bridge. Such travel was in direct violation of restrictions proclaimed for the area east of the Moselle by Civil Affairs on the recommendation of CIC. Nevertheless, from 24 November to 30 November, more than 1,600 civilians were processed at the control point that had been established at the bridge, manned by CIC personnel and civilian auxiliary police.** As the situation stabilized east of the Moselle, refugee traffic through this point dwindled to only 935 for the first two weeks of December.***

Although many complaints were registered concerning pillaging by American soldiers, relations between the liberating Americans and local French officials and civilians were generally excellent. The Thionville Commissioner of Police cooperated to the fullest with CIC, although the chief of the prison was reluctant to intern CIC's prisoners. Even when this reluctance was overcome, the jail facilities proved inadequate because the 220th CIC apprehended many collaborators and several espionage agents in the area around Thionville.****

Among those charged with collaboration was a pre-war who had been retained by the Nazis. Certain also that had contacts with the Nazis, the 220th CIC sent him to the Third Army Interrogation Center on 20 November.*****

At the Interrogation Center, stated that he had become a member of the Nazi Party so that he could remain in office. Although he admitted that he

CONFIDENTIAL

reported on the political reliability of his neighbors, claimed that his accounts were so different from those of other informers that his word was not highly regarded. claimed that he had not complied with the German orders to evacuate Thionville because he strongly wished to remain in France.

The interrogators of felt that he was "a civil service man who considered his job and comfort higher than his loyalty to France," although not a threat to the security of American troops. was turned over to French authorities for final disposition.*

Acting upon reports from a confidential informant in nearby Mandern which indicated that the had been extremely pro-Nazi during the war, CIC arrested him on 26 November. admitted that three days after his return to Mandern in September 1940, the Germans had appointed him and that he took the job voluntarily. In February 1943, he became a member of the Nazi party. His wife had always been active in the Nazi Women's League. The family had contributed five children to the Nazis cause: one son was in the German Army, two others were members of the Hitler Jugend and two daughters were members of the Bund Deutcher Madel. With the consent of Civil Affairs, was removed from his position and turned over to the French gendarmes for further action.**

During his interrogation, stated that the real leader of the Nazis in Mandern had been As a result, was apprehended by Agent G. J. Hagen of the 220th CIC Detachment on 26 November. Although was apparently not a Party member, he readily admitted his pro-German sympathies and bragged that the Nazis had used his list of politically unreliable persons as a basis for wiping out resistance. With pride, told his interrogators that the report was the reason why a man named Niderkorn had been taken from Mandern by the Germans. admitted close contact with the German Commissar of Sierck and further claimed that he had been placed in charge of a detail that dug fortifications for the Wehrmacht in the Mandern area.

Because of his admitted Nazi connections, was sent to the Third Army Interrogation Center for further questioning.***

CIC investigation was also responsible for the removal of the When combat troops liberated the city, a French officer proceeded to appoint as temporary mayor. When agents of the 220th CIC arrived on the next day, they found that had refused to take the position because the townspeople were denouncing him as a collaborator and he feared their wrath. was removed and, with the assistance of French Civil Authorities, another mayor was selected. was found to have been a frequent informer for the Germans, amassing a large sum of money for his troubles. He was sent to the French internment camp at Metz.*

Two Espionage Agents Apprehended

On 7 November, French police arrested Hubert Albrecht and Hubert Rawe at Moyeuvre and turned them over to the 220th CIC Detachment. Intensive interrogation revealed that Albrecht was a non-commissioned officer and Rawe a private in the German Army and that they had crossed the line in civilian clothes with the specific mission of learning the number, disposition and future plans of Allied forces in Moyeuvre.

Albrecht, a career soldier, admitted that he had been chosen for the mission by his battalion commander who had instructed him to pose as an escapee from the forced labor camp in Metz if he were caught. Rawe was under the impression that the mission had been given to him as a disciplinary measure. He suspected that he had been in trouble with his superiors ever since the lieutenant for whom he was orderly had been arrested for his friendly relations with the French.

Albrecht and Rawe had left their units on 5 November and roamed the neighborhood of Moyeuvre observing military traffic. On 7 November they were to return with whatever information they had collected. The timely arrest by the French police thwarted these plans, and Albrecht and Rawe, considered enemy agents, were subsequently shot.**

"We've Got Him Already"

On 25 November, Third Army Headquarters sent to the 220th CIC Detachment a copy of a report from a section of the 422d CIC Detachment operating in Commercy, thirty-seven miles southwest of Metz, indicating that a suspected agent of the Gestapo, was in the Thionville area. The report stated that was operating a that served as a cover for his espionage activity.*

Promptly CIC began a search that ended the next day when agent Robert B. Oyler found that was safely comfined in the prison in Hayange. Oyler wrote: "A check in Thionville discloses that Subject is in prison in Hayange. Was arrested about eight days ago - why and by whom no one seems to know."** When it was established definitely that had worked for the Nazis, he was left in the care of the French Gendarmes.***

90th CIC Detachment Operating East of Thionville

The 90th CIC Detachment, commanded by 1st Lt Walter D. Osborne, did not stop to exploit counterintelligence targets in Thionville, but moved eastward with the 90th Infantry Division in the Third Army push to the banks of the Saar. The 90th CIC, operating by December in the small villages of Veckring, Oberesch, and Laumfeld, found it necessary to place more rigid restrictions on the civilian population as they went deeper into Lorraine and came closer to the German border.

Even in October, before the fall of Thionville, the Detachment had reported numerous failures to observe security regulations, particularly the curfew and travel restrictions. In some critical areas near the front, troops had been ordered to fire immediately on all civilians moving about after curfew. Intense German patrol activity and alarm over the large number of German soldiers in civilian clothes recently captured in the area had caused this strict order.****

** Handwritten note attached to report on from 422d CIC Det, dtd 26 Nov 44, Subj: /s/ Oyler, CIC Det #220, (UNCLASSIFIED), (Kansas City Records Center, Bx 25098).

*** Hq, XX Corps, CIC Det, Bi-Weekly Rpt for 16-30 Nov 1944, dtd 2 Dec 1944, (SECRET), /s/ Anthony W. Lobb, Capt, Commanding, (Kansas City Records Center, Bx 25098).

**** 12th Army Group, Semi-Monthly Counterintelligence Report No. 6, for the period 16 Oct - 31 Oct 1944, dtd 21 Oct 1944, from the office of the AC of S, G2, 12th Army Group, (SECRET),(Departmental Records Branch, AGO, Alexandria, Virginia).

As the 90th Infantry Division pushed closer to the Saar River, the many small towns near the front lines were ordered sealed off by Military Police patrols, and all military highways were posted "off limits" to civilians. All persons found violating travel restrictions were detained at a new civilian annex to the Division Prisoner of War cage. Here the offenders were held for a minimum period of 48 hours and were thoroughly screened by CIC before release.

The tight controls apparently impressed the civilians, for the 90th CIC Detachment was able to report by early December that violations were decreasing.*

In mid-November, the 510th CIC Detachment of the newly-arrived 10th Armored Division moved into the combat area northeast of Metz, south of the region of operations of the 90th Infantry Division.

5th CIC Detachment Also Reports Travel Regulation Violations

Prior to entering Metz on 20 November, the 5th CIC Detachment operated in the area to the south of the fortress city, covering the towns of Pagny, Thiaucourt, and Chambley.

Like the 90th CIC Detachment to the north, the 5th CIC reported an alarming number of travel regulation violations. It was felt that the cause of these misdemeaners was insufficient travel control in the region of Pont-a-Mousson and Nancy, south of the area under 5th Infantry Division jurisdiction. Many civilians from these two towns had been apprehended in the Chambley area for traveling without passes. It was noted that while Civil Affairs permission was required to cross the Moselle River in the area of the 5th Infantry Division, the forces to the south allowed free and unregulated passage across the river. People who had, for instance, crossed to the east bank at Pont-a-Mousson and then tried to return to the west bank at Pagny were violating Civil Affairs regulations. The system was standardized by an order that travel passes would also be required in the Pont-a-Mousson-Nancy area.**

Agents of the Headquarters Team of the 5th CIC Detachment did find one area where there were absolutely no travel violators. Checking the village of Pournoy

on 21 September, the agents found that all civilians in the town were off the streets and in their homes. But the citizens had good cause for their seclusion: The village was under heavy enemy artillery barrage, and a German infantry assault seemed imminent.*

On 3 October, Thiaucourt civilians wishing to travel more than the standard six kilometer limit were required to possess a pass issued by the newly appointed mayor and countersigned by CIC.** After several days, the mayor was authorized to issue civilian passes at his discretion with CIC from time to time reviewing the list of permits granted.***

MPs Refuse To Honor Passes Signed By CIC

An unfortunate misunderstanding was uncovered in the Chambley area when it was reported that XX Corps Military Police in that region were refusing to honor passes countersigned or vouched for by CIC. The Military Police claimed that they were instructed to honor only passes countersigned by SHAEF, Army, and Corps Headquarters, and Corps Provost Marshal or Civil Affairs. The 5th CIC Detachment reported the matter to the Division Civil Affairs Officer.

However, the Military Police in Chambley apparently did know where to send persons found traveling without passes. In mid-October, Corps Military Police turned in to CIC approximately sixty persons who had exceeded the six kilometer limit without permission.****

Another "snafu" involving passes arose in late September when two Frenchmen, apprehended near the front lines, produced a pass authorizing travel in the forward areas. The pass had been issued by the Officer-In-Charge of the Military Intelligence Interpreter Team of the 7th Armored Division, but had not been signed. A hurried call to the G2 Section of the 7th Armored Division confirmed that the two men were working on intelligence missions for that division. The two Frenchmen were ordered to return to Verdun to have their passes properly signed.*****

(FOUO) Among the persons apprehended by the 5th CIC Detachment prior to their assignment in Metz was arrested in Wabille on 1 October 1944.

CONFIDENTIAL

An informant had claimed that had been an armed and uniformed member of the Sturm Abteilung, had given aid and comfort to retreating Germans, and had shot (it was not reported with what) at an American Piper Club. acknowledged his German citizenship but claimed he had joined the Sturm Abteilung in order to be released from a concentration camp.* denied having ever fired at an American plane. He was evacuated through prisoner of war channels. The 5th CIC Detachment also nabbed two German soldiers in civilian clothes and sent them back through Prisoner of War channels.**

80th CIC Detachment Investigates Outbreak of Sabotage

As American forces opened up the area on the west bank of the Moselle, the 80th CIC Detachment, commanded by Captain Thomas R. McMillen, moved up from near Pont-a-Mousson and took over counterintelligence coverage of the area east of Metz and just west of the combat zone. After 28 November, operations were centered in St. Avold, about twenty miles directly east of Metz, and Faulquement, about twenty miles southeast of Metz.

The 80th CIC Detachment spent much of its time in the region investigating sabotage cases.

In late November, agents investigated the destruction, by an internal charge, of the chimney of a building in use as an observation post by Division troops. It appeared that an enemy patrol or stay-behind group had performed the sabotage, although in a neighboring town several civilians possessing the necessary technical ability to accomplish the act were discovered.***

---

* The chances are good that was speaking the truth. A Third Army report concerning the Sturm Abteilung in Lorraine stated as follows: "Many men joined the Sturm Abteilung because they feared punishment from the Nazis for their previous attitude or acts against the interest of the German Reich. Thus, men who had deserted the German Army during the last war, former German citizens who had become Frenchmen through naturalization, members of the Foreign Legion, and political refugees who had come to Lorraine after Hitler's rise to power in Germany bolstered the ranks of the Sturm Abteilung. As a whole, the Sturm Abteilung consisted of people of a low intellectual standard and, with few exceptions, of people of weak character easily terrorized and influenced."

** 5th Inf Div, G2 After-Action Rpt, 1-21 Oct 1944, G2 Jnl & File, 305-2 (6610). (RESTRICTED), Departmental Records Branch, AGO, Alexandria, Virginia.

Lee, Lt Col, GSC, Executive, for the AC of S, G2, (UNCLASSIFIED), Departmental Records Branch, AGO, Alexandria, Virginia.

CONFIDENTIAL

In Faulquement, a quarter-ton truck was booby trapped by German field wire tied from the wheel of the vehicle to the pull-pin of a U.S. hand grenade in such a way that the grenade was detonated when the vehicle was moved. Agents felt that this was sabotage since booby-trapping by enemy troops was improbable in this heavily-occupied area.

Of more importance, CIC was informed that the retreating Germans had strategically placed a number of time bombs in St. Avold. A timed charge, consisting of four hundred pounds of explosives, was found by agents at the city gas works under a large fuel storage tank. Another bomb, containing 600 pounds of explosives, was uncovered in a former German barracks which the Nazis had assumed would be occupied by U.S. forces. No other explosives were found in this initial CIC search. As a result, CIC borrowed a loudspeaker from a psychological warfare unit and toured St. Avold attempting to enlist volunteers for a thorough search of the town, but not one citizen came forward to help.

On 3 December at 2230 hours, an exploding time bomb destroyed a house in St. Avold. The following day, five additional bombs detonated, demolishing buildings previously used by the Germans. In the barracks where one timed charge had been found previously, another exploded. Now residents of St. Avold willingly joined the CIC search, but no more bombs were uncovered. The report on the series of explosions concluded nervously: "Time devices are capable of running 21 days."

On the less urgent side, the 80th CIC Detachment reported the booby trapping of an outhouse near Farebersville. The device was detonated by a civilian on 5 December and as a result the exact nature of the trap was never learned. A few German hand grenades and a cake of explosives were found undetonated in the outhouse. Because American troops were in the immediate vicinity, CIC investigators decided that German soldiers had arranged the trap in hopes of catching some GI in an unguarded moment.

There was a remote possibility that some of these acts of sabotage were the work of one arrested by the 80th Infantry Division CIC on 6 December when he applied for a Civil Affairs pass to travel from Freyming to St. Avold. Agents interrogating learned that he had attended a sabotage school in Germany and had been parachuted into France to form a sabotage organization. tried to plead his case by claiming that he had entered the American lines in order to avoid his mission. He was sent to the Third Army Interrogation Center. Final disposition of the case is not recorded.*

* Third U.S. Army, Office of the AC of S, G2, Counterintelligence Report No. 8, for the period 26 November - 10 December 1944, dtd 8 December 1944, (SECRET), Staff and Faculty Library.

JOINT DOCTRINE

"T" Force Covers Nancy

Troops from the 35th Infantry Division on 15 September moved into the large French city of Nancy, over 30 miles south of Metz on the Moselle. From 15 September, a "T" Force supplemented by agents of the 35th CIC Detachment reduced the many counterintelligence targets in Nancy. In the three days a total of fifty-four personality targets, all minor collaborators or individuals locally employed by the Gestapo, were arrested. Personalities of outstanding counter-intelligence importance, without exception, had fled to Germany prior to the arrival of the Americans.

The seizure of assigned building targets resulted in the acquisition of some maps of tactical value (quickly transmitted to the G2, 35th Infantry Division), local membership lists of collaborationist parties, and enemy and Vichy propaganda material (turned over to a psychological warfare unit). Of great counter-intelligence significance, the searchers found a directory, dated 1 June 1944, containing a list of individuals in France wanted by the German Security Service* on suspicion of espionage, terrorism, and sedition.

On 25 September, the 35th CIC Detachment left Nancy, and counterintelligence coverage of the city was turned over to the 506th CIC Detachment moving in from Commercy.

Ex-Convicts Performing Espionage For GIS

In October, CIC in Nancy arrested a German Intelligence Service agent named who told his interrogators that prior to the war he had been given a long prison sentence by French authorities, but with the arrival of the Germans, had been released and pressed into service with the German Intelligence Service. The Nazis guessed - and rightly - that he would not surrender to the Allies for fear of being returned to prison. Prior to his capture by the Americans, the Frenchman had successfully completed four espionage missions for the German Intelligence Service. stated that the German Intelligence Service's custom of enlisting former French convicts, many of whom were facing death sentences, was widespread. Approximately one hundred such "convict agents" had left Paris with in late August, headed for the area of the front lines. was able to remember twenty-six names of men in the group.

At the same time, reports of similiar activity were coming from the northermost area under 12th Army Group jurisdiction. Ninth Army CIC heard a man

* 12th Army Group, Semi-Monthly Counterintelligence Report No. 6, for the period 16 Oct - 31 Oct 1944, dtd 31 Oct 1944, from the Office of the AC of S, G2, 12th Army Group, (SECRET), Departmental Records Branch, AGO, Alexandria, Virginia.

CONFIDENTIAL

named [redacted] tell much the same story as [redacted] and the agents obtained a list of names that coincided with the list received by CIC in Nancy.

In an attempt to apprehend more of these "convict agents," 12th Army Group CIC recommended that suspects under interrogation be questioned at length concerning past arrests and convictions. All CIC units were informed that the usual German Intelligence Service procedure was to take the convicts immediately to Compiegne to question them and recruit those seeming to be suitable for espionage work. It was noted that the convicts were then sent to the Hotel Lutetia in Paris, headquarters for the operation, for preliminary training. It was recommended that suspects who admitted having been to those places and seemed to be familiar with the areas, be extensively questioned to ascertain the possibility of their falling into the "convict agent" category.*

In late November, CIC in Nancy apprehended [redacted] identified by [redacted] as a "convict agent." [redacted] admitted that the German Intelligence Service had released her from prison, but claimed that after one interview at the Paris headquarters in May 1944, she had been released. Experience had taught CIC that the original interviews of prospective "convict agents" did not take place in Paris. Equally damaging to [redacted] case, however, was the woman's statement that she had been paid by the German Intelligence Service for espionage work, but had failed to perform actual espionage.**

New Espionage Offensive Discovered

The capture of four newly-arrived agents in the Nancy area in mid-October indicated that the German Intelligence Service was operating a strong espionage offensive against the Allies from a headquarters in Nussdorf, near Landau, in the Palatinate. This headquarters was located centrally for activities against both the Twelfth Army Group and the Sixth Army Group. Of these first agents, two were run-of-the-mill linecrossers, but the other pair proved to be the first verified cases of German agents successfully parachuting into the 12th Army Group zone.***

CONFIDENTIAL

35th CIC Detachment Apprehends Numerous Polish DPs

The 35th CIC Detachment, after its work in Nancy in September, centered its operations in Amance and later in Grille as the 35th Infantry Division drove northeast from Nancy to cross the German border on 8 December and capture the town of Sarreguemines, some ten miles south of Saarbrucken.

In the area of advance of the 35th Infantry Division, where the Germans had employed a large quantity of forced Polish farm laborers, CIC frequently picked up groups of these Poles wandering aimlessly in the combat zones. The high total for one day was ten displaced Polish nationals, but hardly a day went by that a few were not apprehended and screened.*

In late September, two Polish workers were found in the area of installations of the 134th Infantry Regiment. Investigation showed that they had been pressed into service as farm laborers and then left behind when the Nazis retreated. CIC decided that their failure to obey an order to "halt" by an American guard had been due to their low mental capacity. Since these men could not be evacuated through normal Civil Affairs channels, they were restricted to the area of the farm on which they had worked. Their former overseer was ordered to enforce the restriction.**

Raid Parties Operate Under Heavy Enemy Fire

On 12 October, Agent Darrel D. Drolsum of the 35th CIC Detachment, accompanied by Agents Sam M. Unger and Edouard Bras, and Lieutenant Paul Barbier of the French Army, entered the city of Fossieux, east of Nancy, to search vacated German offices for documents of intelligence value. An attempt on the previous day had failed because of intense German artillery fire. Although under constant enemy observation and heavy fire, the team made good their second attempt, searching buildings within one hundred yards of German positions. Although no civilians were left in town, many documents of intelligence value, including a list of Nazi Party members in the vicinity, complete with estimates of each member's reliability and functions, were captured.***

---

* 35th CIC Det, Memo For The Officer In Charge, Subj: CIC Activities, Re: Daily Brief of the AC of S, G2, 35th Inf Div, 28 Sept 1944, (UNCLASSIFIED), Departmental Records Branch, AGO, Alexandria, Virginia.

** 35th Inf Div, Daily CIC Det Rpt, 28 Sept 1944, from 35th Inf Div, G2 Jnl and File, 3-4 Oct 1944, (UNCLASSIFIED), Departmental Records Branch, AGO, Alexandria, Virginia.

*** 35th Inf Div, 35th CIC Det, "Recommendation to Award The Bronze Star Medal," 17 Oct 1944, (SECRET), (Kansas City Records Center, Bx 25094).

Two months later, Agent Drolsum organized a similiar patrol and led it across the Saar River and into the town of Sarreguemines. For his part in this action, Drolsum was awarded the Bronze Star Medal.

The citation told of Drolsum's activities in Sarreguemines: "...On 11 December, he organized and led a CIC patrol across the Saar River and into the town of Sarreguemines, under heavy sniper fire, to search the German Gestapo and Sturm Abteilungen headquarters and secured documents which proved invaluable in removing Gestapo agents and securing the city of Sarreguemines. On the return trip he found that the footbridge initially used to cross the river had been destroyed by enemy fire and at great personal risk searched along the waterfront until he found a boat in which he and his patrol made their way under sniper fire to the friendly shore."

Agent Drolsum's citation further noted that in Sarreguemines, from 12 to 21 December, his tireless efforts resulted in the compilation of a list of 250 local Volksstrum members, nine of which he personally arrested.*

506th CIC Detachment Covers Small Towns

The 506th CIC Detachment left counterintelligence coverage of Nancy in the hands of agents from XII Corps and Third Army CIC on 13 November and proceeded northeast with the 6th Armored Division, covering a series of small villages along the way. By 15 December, the 6th Armored Division was entrenched in defensive positions near Saarbrucken.

One of the more suspicious individuals arrested by the 506th CIC Detachment on the way to the Saar River was Stanislaw Pietrzoik, who claimed to be a Russian recently arrived in Bishwald to do farm work. Although caught in the act of cutting U.S. telephone lines, Pietrzoik steadfastly denied the charges. In another instance, the 506th CIC arrested Joseph Zimmerman after he was reported to have made derogatory remarks in public concerning U.S. troops. Both of these suspects were forwarded to the Third Army Interrogation Center for final disposition.**

In making secure the small villages in the path of the 6th Armored Division, an advance section of the 506th CIC Detachment operated with the lead elements of the Division. By getting into a town as soon after liberation as possible and

* Headquarters, 35th Inf Div, Citation For A Bronze Star Medal, Special Order No. 5, 14 Jan 1945, from Monthly Information Report, Headquarters 2d Inf Div, dtd 12 Feb 1945, (UNCLASSIFIED), (Staff and Faculty Library).

** 12th Army Group, Semi-Monthly Counterintelligence Report No. 9, for the period 1-15 December 1944, dtd 15 December 1944, from the Office of the AC of S, G2, 12th Army Group, /s/ Edwin C. Lee, Lt Col, GSC, Executive, for the AC of S, G2, (UNCLASSIFIED), Departmental Records Branch, AGO, Alexandria, Virginia.

immediately letting the local inhabitants know what was expected of them, the 506th CIC felt the number of civilian violations of security regulations was greatly decreased.

The cure-priest and the prewar Burgermeister were always the first men contacted. Normal security regulations were explained to them with a request to disseminate the restrictions to the townspeople. It was felt that in small towns in friendly territory, it was more effective to have the town leaders rather than a member of the liberating troops explain the regulations to the people.*

Two Silent Detachments

Two division CIC detachments, the 504th and the 26th, operating in the combat zone east of Nancy have left no records. The 504th CIC Detachment was with the 4th Armored Division when Luneville, nearly 20 miles southeast of Nancy, was taken on 16 December. CIC coverage of Luneville was left to the 79th CIC Detachment. The 504th CIC moved on, their Division heading northeast to capture Dieuze on 21 November and reaching German territory in mid-December.

The 26th CIC Detachment had passed through Dieuze with the 26th Infantry Division on the day following the town's capture. The Division then headed northeast to eventually take Saar Union on 2 December.

XII Corps CIC Utilizes "Snap Control Checks"

Divisions in the area around Nancy were under XII Corps, the southermost Corps of the 12th Army Group. XII Corps CIC operated in Nancy and the areas west of the city.

Just as First Army units developed the "blitz search technique" and the 29th CIC Detachment with the Ninth Army utilized the "CI Alert" to make a quick recheck of the security of an area already covered once by a CIC team, XII Corps CIC originated what they called the "snap control check." These checks run periodically at unannounced times, required the cooperation of Civil Affairs, Securite Militaire and the Provost Marshal. XII Corps and Third Army CIC personnel made the first of these checks in Nancy in late October. The city was divided into 96 districts with small teams assigned to cover each area, first priority being given to regions where CIC suspected the existence of wireless telegraph operators and enemy espionage agents.**

* Third U.S.Army, Office of the AC of S, G2, Counterintelligence Report No. 8, for the period 26 Nov - 10 Dec 1944, dtd 8 Dec 1944, (SECRET), Staff and Faculty Library.

** 12th Army Group, Semi-Monthly Counterintelligence Report No. 6, for the period 16 Oct - 31 Oct 1944, dtd 31 Oct 1944, from the Office of the AC of S, G2, 12th Army Group, (SECRET),(Departmental Records Branch, AGO, Alexandria, Virginia).

Refugee Screening Procedure Explained

The 212th CIC Detachment, like many other Detachments, especially those to the rear of the combat zone, found that the greater quantity of their time was consumed in screening refugees. Surmising that screening refugees would take on additional importance in Germany, the 212th CIC, in a Third Army report, passed on their screening system to other detachments.

In the section, "Ninth Army CIC In Holland And Germany," the report mentioned that the 29th CIC had developed a system of screening that proved excellent when a small number of people had to be cleared and time was not a factor. The system used by the 212th CIC was geared for use with a large group when rapid screening was essential.

The refugees were first segregated into town groups, or, in the case of persons from large cities, into neighborhood units. The 212th Detachment recommended segregation into various nationality groups when further division seemed necessary to whittle the groups down to a manageable size.

Next, some person most likely to know all the persons in the group - the village priest, mayor or a city official - was selected by the agents. This individual was thoroughly questioned to establish his reliability and sincerity. Once the agents were satisfied that their man was sincere and trustworthy, he was questioned about the persons in his group. Standard questions included: "How long have you known the various people?"; "How long has each individual lived in the neighborhood?"; "Are there any strangers in the group?"; and "Do you consider anyone in the unit dangerous to the best interests of the U.S. forces?"

Identity papers of each individual were always checked and all names compared to the suspect lists. It was recommended that all the refugees be questioned if time permitted. To speed up the interrogations, agents were advised to interrogate together all the members of one family, attempting to "play off" various families against other households in the group.

All strangers, those who did not naturally fall into a group, were to be interrogated carefully and completely as possible enemy agents. In cases where there was doubt about an individual's favoring the Allied cause, agents were advised to begin the interrogation in a relaxed manner, letting the suspect tell his story all the way through and making no attempt to cross-examine him on the details. It was felt that an espionage agent telling his "cover" story would, in such a situation, tend to deviate from and embellish his story, making statements that might later be used to trip him up. When the suspect had finished his story, the agents were to go into action. The suspect was to be intensively searched, interrogated, and his identity papers checked. Whatever slips the suspect made when the interrogation had been relaxed and easy going were to be exploited as the agents forced the interrogation to become fast paced and incisive.

Former Sicherheitsdienst Man Talks Freely

Among the individuals apprehended by the 212th CIC Detachment was Francois Bier, alias Frang, in Francaltroff on 25 November, on reports that Bier had come to the village in a Sicherheitsdienst uniform and was hiding there. When agents interrogated him, Bier revealed that he was a member of the Staff of the German Embassy and the Sicherheitsdienst in Vichy. Bier gave the agents considerable information on the organization's personalities and operations, all of which were viewed with suspicion by CIC. Bier was cooperative to a suspicious degree during his interrogation, but CIC was unable to attribute any espionage activity to him. He was held at Third Army Interrogation Center pending instructions from higher headquarters.*

In December, the XII Corps picked up Alois Wallen in Bambiderstroff. Wallen claimed to have been an espionage agent for the French Forces of the Interior. Several inconsistencies in his story and the fact that he spoke German with a pronounced Prussian accent, although claiming never to have been in Germany, made Wallen suspected by CIC.**

79th CIC Detachment Active South of Nancy

Until 25 November, the 79th Infantry Division was assigned to the Third Army although attached to the Seventh Army and XV Corps. After that date, the Division was completely under the jurisdiction of the Seventh Army. During the period from 15 September to 25 November, the 79th CIC Detachment, commanded by Captain Irvin Bogatin, operated in the towns of Mirecourt, Charmes, Bayon, and Luneville, in addition to numerous small villages, all in the area south of Nancy.

Agents Meet With Local Leaders In Luneville

The 79th CIC Detachment began coverage of Luneville, their main task during the period, on 20 September while the combat troops were still fighting just east of the city. Two CIC agents attended a meeting with the Mayor, the Chief of Police, the Chief of the Gendarmarie, and the head of the local resistance group. The agents requested membership lists of the police, the Gendarmarie

---

* Third U.S. Army, Office of the AC of S, G2, Counterintelligence Report No.8, for the period 26 Nov - 10 Dec 1944, dtd 8 Dec 1944 (SECRET), Staff and Faculty Library.

** 12th Army Group, Semi-Monthly Counterintelligence Report No. 9, from the period 1-15 Dec 1944, dtd 15 Dec 1944, from the Office of the AC of S, G2, 12th Army Group, /s/ Edwin C. Lee, Lt Col, GSC, Executive, for the AC of S, G2, (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Virginia).

and the French Forces of the Interior and asked the French Forces of the Interior representatives to prepare a black list for Luneville. The town leaders also furnished CIC with a list of buildings used by the Germans for barracks and, these buildings were searched for tactical information, as they were captured.

Because the fighting around Luneville was still intense, all travel passes were frozen and civilian movement out of and into the city had to be strictly forbidden. French Forces of the Interior members and Gendarmarie manned posts along all roads into the city to insure against violation of this regulation.*

By 8 October, the combat zone had advanced sufficiently to allow Civil Affairs and CIC to work together to reconstruct a government in Luneville. Civil Affairs chose a Major Blangenois, the Military Commander of the District of Luneville, to be town mayor. Captain Bogatin met with Blangenois to iron out problems relative to CIC. CIC was notified that on 15 October, a French Army Battalion was to occupy Luneville. A small number of French Forces of the Interior men, thoroughly screened and checked, were to remain on duty, but the remainder of the organization was to be demobilized. All searches of private homes were to be made by the Gendarmarie or the police. However, all suspicious persons were to be turned over to CIC.

Five Screening Points Established

In conjunction with the mayor, CIC set up five 24-hour travel control points to screen all civilians traveling in and out of the city, to arrest persons traveling without passes, to apprehend for interrogation all persons arousing suspicion, and to check all travelers for wireless sets.

Civil Affairs kept control of all "laissez passers," issued automatically to important city officials, and on a temporary basis to persons able to present valid reasons for travel. A CIC agent was kept on permanent duty at the Civil Affairs offices in Luneville to check on those applying for "laissez passers."

On 9 October, editors of all local newspapers were contacted and informed that CIC would maintain a temporary but direct censorship over the contents of their publications. The editors were requested to print the security regulations for Luneville and a notice to the effect that all strange and suspicious persons were to be brought to the CIC office.**

Agents Watch Railroad Station

Because of the movement of American troops through Luneville by rail, CIC maintained a constant surveillance of the local railroad station. All civilians seen in the neighborhood of the station were screened and questioned. Those without sufficient reason for their presence in the area were brought to CIC headquarters for interrogation.

Through the Commissioner of Police, the 79th CIC Detachment was furnished daily with a complete list of all persons registered at hotels and boarding houses in Luneville. It was felt that this check would turn up visitors to Luneville who had not registered with the authorities as non-residents of the town.*

An unusual counterintelligence tactic was employed by an agent of the 79th CIC Detachment, on 19 October, when he requested that Red Cross girls on duty in the XV Corps day room observe the soldiers there, reporting to CIC everything that seemed suspicious. The girls then were given a security lecture by the agent.**

Coverage Of Small Villages Demands Efficiency

Small villages were just as likely to contain troublemakers as large cities, but could not be allotted the time of many CIC agents. Because the village would probably not be revisited by CIC and time was limited during the initial check, work had to be done quickly and efficiently.

Among the great number of small villages covered by the 79th CIC Detachment was Harbouey, checked on 17 and 18 November. Harbouey had a population of 250, increased to 500 due to an influx of refugees, mostly Poles, brought to the village in 1940 and then left behind by the Nazis. The regular inhabitants and the refugees were screened quickly, told that no travel was permitted, and informed of the curfew. Two suspects were uncovered during the screening, but neither was considered dangerous to military security. The next day, the S2 of a 79th Infantry Division regiment reported that civilians of Harbouey had been violating the curfew. CIC quickly instituted more rigid checks during the hours of darkness to apprehend violators. Later in the day, four individuals accused of harboring German wounded were arrested, but investigation failed to substantiate the charge. These men were restricted to their homes until the area was out of the combat zone.

---

* Bound records of the 79th CIC Detachment, Rpt of activities of 11 Nov 1944, (UNCLASSIFIED), (Historical Project Files).

** Ibid., Rpt of unrelated activities of the detachment in Oct 1944.

After these two days of activity, CIC left the village in the hands of the French authorities.*

Absolutely Secure!

Agents of the 79th CIC Detachment covering another small village, Reithenthal, on 19 November were completely efficient. The only civilian in the town was an Italian named Giovanni Milette who, because he was a Todt worker, was placed in Prisoner of War channels. So much for Reithenthal!**

Chapter 7

CIC WITH BASE AND ADVANCE SECTIONS

326 Agents With Base And Advance Section Teams

To the rear of the detachment under the Twelfth Army Group were the many Advance Section And Base Section CIC Teams. At the start of October, 326 agents were distributed throughout the Communications Zone as follows: Normandy Base Section, 34; Brittany Base Section, 61; Loire Base Section, 32; Channel Base Section, 11; Seine Base Section, 32; Paris (ComZ), 52; and Advance Section, 104.* During October, the ComZ Team in Paris was dropped and a small Oise Base Section Team established.

Normandy Base Section operations were centered in the port of Cherbourg with Agents also in Granville to the south. Rennes, Brest, Vannes, and Nantes were the major towns covered by the Brittany Base Section while Paris, Versailles, and the surrounding area fell under the jurisdiction of the Seine Base Section. The Channel Base Section covered the Antwerp-La Harve-Lille area with the Oise Base Section Agents taking care of the region around St. Quentin and Sossions. The Loire Base Section teams covered the area around Angers and Tours.

Advance Section personnel operated as far east as the city of Luxembourg early in the period.** Liege in the north and Verdun and Bar-le-Duc in the south were among the more easterly of the towns covered by ADSEC teams before 15 December ***

Much Counterespionage Turned Over To Bureau de Securite Militaire (BSM)

Much of the counterespionage work in the liberated areas of France received its first thorough coverage from ADSEC Teams since the combat CIC detachments had passed through so rapidly. After the first few months, the American authorities began to delegate a preponderance of counterespionage activity to the Bureau de Securite Militaire (BSM), the French counterintelligence service. ADSEC CIC encouraged this well-organized group to assume authority and assisted them in obtaining supplies. A free and full exchange of information between CIC and the Bureau was established.

* Headquarters, European Theater of Operations, U. S. Army, Office of the AC of S, G2, Counterintelligence Report for the period from 16 Sept 1944 to 1 Oct 1944, dtd 31 Oct 1944, /s/ F. A. Calvert, Jr., Lt Col, GSC, Chief, CIB, (SECRET), (Departmental Records Branch, AGO, Alexandria, Va.).

** Ibid., CI Rpt for the period from 16 Oct 1944 - 31 Oct 1944, dtd 31 Oct 1944.

*** Ibid., CI Rpt for the period from 1 Dec - 15 Dec 1944, dtd 15 Dec 1944.

Soon the strength of the indigenous authorities allowed the Americans to thin out their security forces in the rear areas. Twelfth Army Group issued orders to ADSEC CIC Teams that all arrestees, except those possessing detailed information concerning German intelligence operations, armed forces, and the Nazi Party, be turned over to the Bureau de Securite Militaire. The ability of the French to take over their own security problems greatly lightened the burden of CIC in French areas away from the combat zone.

Takeover Problem Solved

During this period, a satisfactory standard operating procedure for ADSEC CIC Teams relieving CIC units of Army level was finally developed. In the earlier stages of the campaign, Army CIC units notified ADSEC headquarters that they were ready to turn a region over to ADSEC CIC and then immediately left the area. Before the rear area CIC team arrived, a week or two had elapsed.

Under the new arrangement, an ADSEC Team assigned to work in the Army zone was given an overlay of the exact territory to be covered and advised to begin preparations to move forward on Army order. A special agreement allowed Army to direct a team to take over an area without the consent of ADSEC headquarters. Army CIC was not allowed, however, to move either the rear boundry or the location of the Command Post of an ADSEC Team, assuring that no security vacuum would be left at ADSEC's rear. If it was felt that the inclusion of more territory would overtax a rear area unit, either Army CIC or the ADSEC Team notified ADSEC headquarters and a new team was made available.

Through this arrangement Army could relinquish a town with the minimum delay, and yet afford ADSEC teams sufficient notice to prepare for its displacement. ADSEC headquarters was able to retain all essential control of the CIC Teams without imparing these units' operational support of the Armies. The plan was employed throughout the remainder of the campaign with highly satisfactory results.*

Political Situation Interferes With Security

As soon as the combat zone had advanced to within striking distance of the Siegfried Line and the German border, CIC noticed the marked resumption of partisanship in the domestic French political scene and made plans to keep an eye on potentially subversive aspects of this situation.

Until about the end of September, the diverse elements in French politics had worked together to secure an Allied victory. As the enemy retreated to a

* Operational History of Theaters, "ADSEC G2 Section Operations," undated, (UNCLASSIFIED), (Staff and Faculty Library).

CONFIDENTIAL

safe distance, internal political conflicts began to arise. CIC found that the main political differences aligned the leftists, advocating various degrees of state socialism, against the more conservative elements of the population. CIC foresaw a possibility that the friction would break out into violence of some kind, especially if American and British troops moved eastward before the establishment of a strong French military garrison.*

Although the Americans would have preferred to remain apart from domestic French politics, evidence began to pile up that Nazi agents had infiltrated into key spots in the ranks of the French Forces of the Interior and were attempting to make the internal political situation hotter than it already was.**

Because of the probability of Nazi infiltration into the French Forces of the Interior and the certainty that countless other undesirables possessed membership in that organization, the moves to integrate its members into the Etat Majeur de l'Armee evoked a sigh of relief from American authorities. Late in October, a program was established to weed out the undesirable elements from the resistance organization, and training schools were started for the other, more acceptable, members. CIC reported, however, that the fruits of the program might not be apparent for some time.

Trouble Begins After Celebrations End

By the end of October, CIC reported that Army-civilian relationships had become definitely strained in certain regions, especially Normandy. The initial period of enthusiastic welcome had begun to wear off. To show how extreme anti-American sentiment might become so soon after the liberation, CIC reported several quotes from a Cherbourg newspaper. Some hot-headed editor had written: "Uncivilized and beastly scenes at the present time are grieving our country. They seize, rape, and assassinate! All security in the home as well as in the streets has disappeared...Never have we seen such lewdness and criminal attempts."***

Reports from the Normandy Base Section indicated that a month later the tension had subsided. The sporadic military offenders had been court-martialed, and good relations with the civilian population had been established.****

---

* Headquarters, European Theater of Operations, U.S. Army, Office of the AC of S, G2, Counterintelligence Report for the period from 16 Sept 1944 to 1 Oct 1944, dtd 1 Oct 1944, /s/ F.A. Calvert, Jr., Lt Col, GSC, Chief, CIB, (SECRET), (Departmental Records Branch, AGO, Alexandria, Va.).

** Ibid., CI Rpt for the period from 1 Oct 1944 to 15 Oct 1944, dtd 15 Oct 1944.

**** Ibid., CI Rpt for the period 16 Nov to 30 Nov 1944, dtd 30 Nov 1944.

Although the problem may have been cleared up in Normandy, reports from Paris in mid-December indicated that, while relations were "generally cordial," the increasing frequency of brawls involving American soldiers of all ranks threatened to destroy harmony with the French civilian population.

"How You Gonna Keep 'Em Down On The Farm..."

Besides the probable alienation of many French citizens, there was a grave danger to the security of American troops inherent in the celebrations of soldiers stationed in the rear areas. Fun-seeking GI's sooner or later found the company of French girls. The soldier was not likely to be concerned whether the girl was loyal to the Allied cause or a Nazi sympathizer and collaborator working directly for German Intelligence Service headquarters. CIC had to maintain a constant search for women of questionable political affiliations seeking the company of American officers and men. Many investigations were summarized with the following remarks: "suspected of German espionage because she was friendly with German Gestapo officers and is now cultivating the friendship of American officers." In almost all such cases, there was not sufficient proof for arrest.

In one of the cases that did end in an arrest, CIC was able to accumulate enough evidence to apprehend a Parisian woman who had lived during the occupation in a hotel reserved exclusively for Germans and persons carrying German identity papers. She had been seen frequently with German officers and had stated in public that she would be glad to work for the Nazis. As soon as Paris was liberated, the woman began to make the acquaintance of American officers. CIC recommended her arrest after the investigation had turned up the complete facts of her interest in the Nazi cause.*

Petty Thievery By Civilians Investigated

Another area of trouble with the civilian population involved petty thievery of U.S. Army equipment, particularly telephone wire, by Frenchmen. The investigation of such cases, primarily the responsibility of the Provost Marshal's office, involved CIC, not only because sabotage was possible, but because the thefts gave warning that certain Frenchmen were not overly pleased to have American soldiers on their soil.

Thievery was frequent in the Conflans area where an officer from the Provost Marshal's office told CIC that he knew of thirteen instances of stolen wire. The

* Headquarters, European Theater of Operations, U.S. Army, Office of the AC of S, G2, Counterintelligence Report for the period 1 Dec 1944 to 15 Dec 1944, dtd 15 Dec 1944, /s/ F. A. Calvert, Jr., Lt Col, GSC, Chief, CIB (SECRET), (Departmental Records Branch, AGO, Alexandria, Virginia).

estimated value of the stolen wire in these instances ran close to five thousand dollars. Arrangements were made to have such thefts immediately reported to CIC, and all French authorities in the Conflans area were asked for their cooperation. Appropriate notices were run regularly in French papers appealing to the local civilians to refrain from stealing telephone wire, so essential to the Allied effort.*

Use of False Identity Documents Increasing

By the beginning of October, CIC alarmingly noted the wide-spread increase in the use of false identity documents by French citizens. Constant vigilance had to be maintained against the appearance of purported military "laissez-passers."**

CIC was greatly concerned over the practice of some American officers of giving civilian friends "hastily-written notes of thanks, requests for favored treatment, of the 'To Whom It May Concern' variety." Many Frenchmen seemed to interpret these notes as authorizing access to - and even a right to - almost anything.***

One resident of Angers apparently decided that he could move freely if he dressed up in the uniform of a U. S. Army officer and told people he was an agent of CIC. Having presumed the right to do whatever he wished, Michel Gavriloff took to terrorizing civilians near Samur. On 25 September, some real CIC agents arrested him. CIC made a formal repudiation of Gavriloff to the citizens of Samur on 9 October. He stood trial before a Military Tribunal on 30 November on the charge of pillage and robbery in the time of war.

During his trial, Gavriloff claimed to have been engaged for investigative work by a "Lt Victor, Commanding Officer of the 83d CIC Detachment," when the 83d had been in Angers early in September.****

---

* Headquarters, European Theater of Operations, U.S.Army, Office of the AC of S, G2, CI Rpt for the period 1 Nov 1944 to 15 Nov 1944, dtd 15 Nov 1944, /s/ F. A. Calvert, Jr., Lt Col, GSC, Chief, CIB (SECRET) (Departmental Records Branch, AGO, Alexandria, Virginia).

**** Ibid., CI Rpt for the period 1 Dec to 15 Dec 1944, dtd 15 Dec 1944.
NOTE: Gavriloff must have heard of the 83d CIC Detachment. The CO of the 83d was 2d Lt Oliver A. Victor and the Detachment was located in the Nantes-Angers region in September. Records of the 83d CIC Detachment for September contain no mention of Gavriloff.

Civil Security In The Rear Generally Good

The civil security situation to the rear of American lines was found to be generally satisfactory by ADSEC CIC Teams. One exception was the town of Valenciennes in Nord Province close to the Belgian border. Near this town, travel of civilians was not completely under control nor was the related problem of displaced persons. An unruly situation was attributed mainly to the thousands of foreign workers left by the retreating Germans. Near Valenciennes the displaced persons included 10,000 Poles who had migrated to France as early as 1922 to work in local industry. Although many supposedly held pro-German views, CIC had no evidence of acts against the Allied cause.*

Special Privileges

Good relations with the French people required that the Americans did not grant special favors to persons who in any way had aided the Germans. Consequently, when a complaint from a reliable source was registered against some individual given a privilege by American forces, CIC was quick to investigate.

On 15 October, the resistance leader in Bouillon reported to CIC Normandy Base Section that a local collaborator, Georges Gilbert, had been given permission to use barracks, fencing and other materials which had been left by the Allies on a then unused landing field near Gilbert's home. Gilbert had told the resistance leader that CIC in Granville had authorized him to use the equipment and buildings.

When CIC paid Gilbert a visit, he stated that the grant had come from Civil Affairs and that he had never mentioned CIC to the resistance leader. A check with Civil Affairs revealed that the former Collaborator had indeed been granted the authorization he claimed to have. CIC recommended to Civil Affairs that in view of Gilbert's record as a well-known collaborator, it would be unwise to allow him to keep the materials.**

In the rear areas it was necessary for the U. S. Army to employ local civilians in a great number of capacities. Although the majority of these Frenchmen were

Lee, Lt Col, GSC, Executive, for the AC of S, G2, (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Virginia).

** European Theater of Operations, U. S. Army, Office of the AC of S, G2, Counterintelligence Report for the period 16 October - 31 October 1944, dtd 31 October 1944, /s/ F. A. Calvert, Lt Col, GSC, Chief CIB, (SECRET), (Departmental Records Branch, AGO, Alexandria, Virginia).

loyal to the Allied cause, there were some questionable individuals who required investigation.

For example, in November, CIC Normandy Base Section began an investigation of at the Quartermaster Salvage Depot in Cherbourg, on the suspicion that they had exchanged written notes with German Prisoners of War at the depot. Agents searched the clothing of the girls and discovered a note written in German by The girl admitted during interrogation that she had several times tried to pass this message to a Prisoner of War named The were taken into custody and turned over to the Bureau Securite Militaire. Subsequently their apartment in Cherbourg was searched and the findings included four rolls of film, two letters in German, and a lid from a candy box on the inside of which was a note in German. The were tried by the French Tribunal.*

Careless Handling of Classified Documents

During October, CIC in the rear areas learned from divergent sources that considerable Order of Battle information had been compromised by classified documents falling into German hands.

In this respect, the most alarming information was received during the many interrogations of Oberst-Leutnant Karl Zuelch, a captured German intelligence officer. Zuelch stated that the American army security of documents was particularly careless. He claimed that frequently "Top Secret" documents were found in the pockets of American prisoners of war and in captured vehicles. Zuelch recalled one occasion where a search of the clothes of a captured American lieutenant revealed a "Top Secret" Order of Battle document giving the complete re-grouping of the American forces shortly before the break-through at Avranches. When the German interrogators had asked him about his carelessness with classified documents, this imprisoned Lieutenant had remarked, "Well, you cannot keep all this in your head." It was Zuelch's opinion that, had the Germans been able to move their troops at all (they could not owing to American air supremacy), this lack of security would have done the Allies great harm, for moves of Allied troops were always known well in advance.

According to Zuelch, a valuable source of information for the Germans had been the inter-Allied distribution lists appearing on nearly all documents. The German was greatly surprised that such lists were still being used in areas of combat operations.

---

* Headquarters, European Theater of Operations, US Army, Office of the AC of S, G2, Counterintelligence Report for the period 1 November - 15 November 1944, dtd 15 November 1944, /s/ F. A. Calvert, Lt Col, GSC, Chief, CIB (SECRET), (Departmental Records Branch, AGO, Alexandria, Virginia).

CONFIDENTIAL

Zuelch, who had acquired considerable experience on the Russian front in intercepting wireless telegraph messages, stated that this form of intelligence gathering had completely failed in the West. The principal reasons given for the failure were the excellence of the British code system, the superiority of the Allied signal equipment, and badly trained German intelligence personnel.*

None Of Our Business!

Although cases which were not primarily CIC's concern often had an aspect involving counterintelligence, agents at the Paris Interrogation Center found that they were receiving persons to question who were obviously of no counterintelligence interest. These individuals served only to delay the interrogations of more valuable persons. For example, a Jewish French citizen was arrested because, during the German occupation, he had successfully managed to avoid certain restrictions that had been imposed on members of his race. Another Frenchman was handed over to CIC after a soldier staying at his home had heard him make ambiguous statements about President Roosevelt.**

Soldier's Communist Activities Investigated

During World War II, CIC in the European Theater of Operations ran occasional investigations of the Communist activities of individual soldiers. The only such case reported by units outside the combat zone during this period involved a soldier whose blatant disaffection would have made him a subject of CIC investigation regardless of his political philosophy.

On 16 November 1944, CIC agents from the Normandy Base Section, answering a call from the Commanding Officer of the 101st Port Marine Maintenance Company, interviewed the First Sergeant and heard from him that a private assigned to public relations work had recently begun working at night, claiming easier access to all facilities and a quieter atmosphere. This provided the private with two new listeners every night, the Company clerk and the Charge of Quarters, with whom he argued the principles of Communism as opposed to the capitalistic system. The private also made statements opposing Army administration, obedience to orders, and saluting of superiors. The First Sergeant charged that the soldier had managed to influence one of the other privates in the unit to his way of thinking.

---

* It is not recorded how the Americans persuaded this German intelligence officer, so well versed in Allied security leaks, to forget his own security instructions and "spill" all.

** Headquarters, European Theater of Operations, U.S. Army, Office of the AC of S, G2, Counterintelligence Report for the period 15 October - 31 October 1944, dtd 31 October 1944, /s/ F. A. Calvert, Lt Col, GSC, Chief, CIB (SECRET), (Departmental Records Branch, AGO, Alexandria, Virginia).

CONFIDENTIAL

The supposedly "converted" soldier was called into the Commanding Officer's office for interrogation. He acknowledged a resentment towards Army discipline and towards the capitalistic class in general, but showed only an elementary understanding of Communist doctrines.

Next the subject himself was called in for interrogation. He readily admitted complete belief in the Communist form of government. He stated that when he lived in California prior to coming into the service, he had been converted by the teachings of Earl Browder. While in England, he had studied Communist literature and talked to many Communist party members. The private admitted that he had in his possession at the time a recent issue of "New Masses" and further confessed that he felt his real faith lay in the movement to establish Communism in the United States.

The CIC Agents on the case recommended immediate action against the subject, but felt that the zeal of his converted friend could be dissipated "with an expert tactful explanation of the undemocratic principles underlying Communism."

Nearly a month later, the Commanding Officer of the unit told the division G2 that the Communist private, who was still in the company, had refused to come to attention during the playing of the National Anthem at a company social function. The Commanding Officer felt the entire unit would violently protest the private's attendance at any future activity and stated that he desired to be relieved of the responsibility for the personal safety of the Communist.*

Regulations in effect at the time called for the transfer to the United States of all disaffected personnel. Records do not indicate whether or not such action was taken in this case. Records do indicate that the Army felt that it could not uphold a Court Martial on the basis of the evidence received.**

However, records show that the subject was discharged on 20 December 1945, a year after the completion of the investigation. The Federal Bureau of Investigation was given the information collected by CIC on the case.***

Story-Hour At Normandy Base Section

In early November, an American Military Police patrol in Quineville picked up, in U.S. Army uniform, a man who gave the improbable name of Alfred John Buffettee-Catford and freely admitted he often used the alias, George Navarre.

Buffette-Catford unraveled his story for CIC Normandy Base Section. He claimed to have been inducted into the U.S. Army in Louisiana, but when agents informed him that his drawl was not thick enough, the suspect broke down and admitted that actually he had been born in Monte Carlo and was engaged in espionage activities for the Allies. In telling his personal history the third time, Buffette-Catford forgot all about Monte Carlo and decided he was English-born and a deserter from the British army. CIC checked with RAF officers at Cherbourg and discovered that Buffette-Catford was indeed a British citizen. CIC decided, without hesitation, that this man was clearly the responsibility of the English. The British Military Police were awarded the prize, interrogated him fully, and definitely established that Buffette-Catford was a deserter from the British Army.*

The Three-Month Period

Prior to 15 September, the Allied dash across France had kept CIC units with divisions and corps on the move. Only hasty investigations could be accomplished and records turnover had become a major problem. From 15 September to 15 December, a more or less static situation had existed and these detachments had spent several months- and in some cases the whole period - in one area. There had been ample time to investigate Civil Affairs and Military Government municipal government appointees, to supervise area security and to develop new counterintelligence techniques. But, on 16 December, CIC was on the move again as the Germans began a major thrust into the Ardennes forest where forces of the VIII Corps were thinly spread along the line.

U. S. ARMY INTELLIGENCE CENTER
FORT HOLABIRD, BALTIMORE 19, MARYLAND

ACSIH-GC 250/58/M 8 April 1959

SUBJECT: CIC History

TO: All Personnel Reading this Document

1. This volume is a portion of the History of the Counter Intelligence Corps which has been compiled in draft form by this headquarters.

2. Distribution of the History is being made as the volumes become available so that addressees may profit by the problems and accomplishments of the Counter Intelligence Corps in previous years.

3. When completed, the History will cover in as complete and accurate detail as possible, significant incidents and events leading to the organization of the Corps of Intelligence Police during World War I and the Counter Intelligence Corps in World War II. Events, accomplishments, changes, and problems encountered up until 1950 will be included in the thirty volumes planned.

4. In spite of the diligence of researchers and writers, there may be inaccuracies and omissions, since no records are available for some of the more than two hundred CIC detachments which were operational during World War II. Even some of the major campaigns were poorly documented.

5. Any comments should be forwarded to the Commanding General, United States Army Intelligence Center, Fort Holabird, Baltimore 19, Maryland, ATTN: G-3.

Chapter 1

Spreading Over Southern France

In September, while the Twelfth Army Group to the north came to a standstill at the Siegfried Line, General Patch's Seventh Army, having completed its rapid advance up from the Riviera, pivoted to the right and drew up squarely in line with the remainder of Allied Forces. General de Lattre's First French Army held the fifty-mile front above Switzerland; the French First, in addition, was charged with supervision of the Franco-Swiss border. South of Switzerland to the Mediterranean there was but sporadic fighting. The First Allied Airborne Task Force had remained in the Cannes-Nice-Monaco area since their landings in August, but had not sufficient strength to extend the front across the Piedmont Mountains and into Italy.

Close to 40,000 enemy troops remained in Southern France. Contained in ever shrinking pockets by the French Forces of the Interior, they were never again a serious military factor.[1]

Sixth Army Group Becomes Operational

On 15 September 1944, the Sixth Army Group became operational and assumed command of the Seventh Army and the French First Army.[2] CIC with the Sixth Army Group, under the command of Major James Footorap, was concerned solely with Headquarters security and had no field mission. Consequently neither directives nor counterintelligence information came to the 307th CIC Detachment from this Unit.[3]

Difficult Month for 307th CIC

September 1944 was a difficult month for Seventh Army CIC. Advance planning proved worthless as vast areas were suddenly opened up by the rapid advance northward. Since the French Securite Militaire had been caught completely short, the 70-odd officers and enlisted men of CIC were charged with maintaining security in the entire area of advance, roughly 30,000 square miles, during most of the month.[4]

3 Interview with C. Kenneth Crowell, Chicago, Ill., at NCICA Convention, Hotel Waldorf-Astoria, New York, N.Y., 6 August 1955.

4 7th Army Monthly Counterintelligence Report No. 2, Period 1-30 Sep 1944, dated 30 Sep; Extracted from L-1136, CIC Staff Section Repts, 15 Aug - 31 Dec Dec 1944, (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.)

German espionage seemed the greatest single threat to Allied security; it was therefore decided to investigate such cases fully, and, if necessary, leave other work to whatever regional office was handy, whether it be Securite Militaire, French Forces of the Interior, or the police. During the month, sixteen men and a woman were apprehended for espionage with ten of these agents in possession of radio transmitters.

CIC also spent valuable time tracking through reports of an all but non-existent German espionage ring reputedly operating in Limoges, Toulouse, Montpillier, and Perpignan (of these cities, only Montpillier was in Allied hands) under the direction of the Sicherheitsdienst.

These Sicherheitsdienst teams were said to be charged with obtaining and transmitting information of value to Germany, regrouping German nationals and sympathizers to facilitate their evacuation from Southern France; facilitating illegal traffic into Switzerland and Spain and committing sabotage and terrorist acts against Allied agents and installations.

Centers apparently were staffed with teams of about ten members; a chief, three espionage agents, the rest killers or liaison men. CIC believed that there had been three such teams in the city of Grenoble, which was overrun by Seventh Army on 9 September. Two of these teams were reported to have fled into Southern France; the third went off to Switzerland. The organizer of these teams, named Walthers, was killed in Grenoble shortly after the arrival there of American forces. Reports of subsequent months made no reference to any of these teams.[5]

Movement Hinders Travel Control

The rapidity of the advance in Southern France made travel control all but impossible. At the very front, French Forces of the Interior personnel were placed on roadblocks, but little or no control was attempted over civilians within areas of occupation. In no area, even at the front, were blocks sufficient to seal off a zone of any appreciable size. No screening of refugees was attempted. Travel was restricted, however, if not by the Allies by acute shortages of gasoline and vehicles which kept most of the population within walking distance of their homes.

Relations with French civilians, naturally, brought to CIC a variety of problems other than simple travel control.

5 L-1136, G2 History, Seventh Army Operations in Europe, Part Three, 1-30 Sep 1944, (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.)

On one end of the scale was the problem of actively subversive elements. CIC learned that Darnand was forming a French Legion in Saxony, the nucleus of which was some 4,000 Miliciens who had fled France. Now nearing division strength, this Legion was in training for possible action in Alsace and Lorraine.[6]

Such subversive organizations fortunately were not a serious problem in the areas actually overrun by Seventh Army in September; neither the Milice nor the Partie Populaire Francaise, subversive organizations reputedly potent in France, were functioning in the liberated zones. Members of these organizations were believed either to have been taken by the French Forces of the Interior immediately upon liberation of their homelands, or to have retreated with the Germans.[7]

The 307th CIC Detachment was also concerned with the activities of the Communist party, its leaders and aims. The fact that this party was the "strongest and best organized political body in a country disorganized by a lack of adequate communications and lack of strong central government" tended to give the Communists influence that they would not have enjoyed in normal times under a representative government. CIC was alert to indications that the public was accepting the Communist claim of being the only French party truly opposed to the Nazi war machine.[8]

Liaison With French Authorities Essential

Because of the drastically limited number of their own personnel, CIC Agents quickly decided that close and effective liaison with French authorities would have to be maintained if assigned missions were to be fulfilled. An officer and two enlisted men of Securite Militaire worked with each division under Seventh Army, and two officers of Surete sux Arm'ees were also attached to division detachments. Six French officers and three enlisted men worked with VI Corps, and ten officers and thirty-seven enlisted men with Seventh Army CIC.[9]

8 Appendix II to September Situation Summary of the 307th CIC Detachment, Headquarters, Seventh Army, dtd 30 September 1944, (Confidential) (Kansas City Records Center, Box 25099)

9 Seventh Army Semi-Monthly Counterintelligence Report No. 3, Period 1 Oct to 15 Oct 1944, Dated 15 Oct 1944: Extracted from L-1136, G2 CIC Staff Section Repts, 15 August to 31 Dec 1944. Checked against Sixth Army Gp Rept No. 1. L-375 (both Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.).

As for the French Forces of the Interior, throughout the southern campaigns its members had been more willing to co-operate than CIC's French counterpart, Securite Militaire. At the end of September, Seventh Army reported, "The French Forces of the Interior have continued to arrest by far the majority of collaborators." All was not perfect in the relationship, however; Seventh Army continued, "In some cases their zeal for inflicting punishment has proved detrimental where potential informers have been executed." Elsewhere in the report is a more serious condemnation of the French actions: "Documentation of prisoners of the French Forces of the Interior is very poor. At Montluc Prison in Lyon on 13 September there were approximately 1,200 prisoners, and a complete list of names was not available.... In St. Joseph prison (Grenoble) there were 400 suspects, but records ...for only 250." French Forces of the Interior efficiency and fairness seem to have varied from town to town: "Avignon: French Forces of Interior prisoners were turned over in orderly fashion to the Securite Militaire of the 1st French Armored Division." "Orange: A truck with Germans in civilian clothes was captured. The French Forces of the Interior shot 19 of them as Gestapo Agents." [10]

But the French Forces of the Interior was fast becoming less effective. Many units disbanded. Many members joined the French Army; 6,000 joined together near Clermont-Ferrand, and another 6,000 were soon expected from the same region. General Cochet of the French Forces of the Interior approved such assimilation.

French Forces of the Interior were, however, still entrusted with much necessary work. Assigned to guard the Franco-Swiss border, they apparently performed the task conscientiously, [11] although their job was greatly complicated by the thousands of refugees who managed to by-pass the battle lines by entering Northern Switzerland, and returning to France south of the combat area. [12] In the south of France, French Forces of the Interior pecked into the few pockets of remaining German soldiers, and prevented them from ever again hampering the Allied effort in any manner.

12 Ibid., CI Report No. 3, for the period 15 Oct - 1 Nov 1944 dtd 4 Nov 1944.

However, the French Forces of the Interior as well as the Franc-Tireur et Partisans Francais contained elements which, in the long view, had to be recognized as hostile to American interests. CIC investigated the rumor that the Russians and French, not really the Americans and English, had liberated France. The rumor could be traced back no further than to the Franc-Tireur et Partisans. Apparently from the same source was the rumor that upon the withdrawal of the Americans and English, the French would welcome a Revolution of the proletariat -- to take place with Russian blessing. And then, collaborationists were known to have infiltrated both organizations--being placed there with the dual purpose of impeding allied efforts and maintaining their own reputations and lives. Near Lyon illegally armed men, wearing French Forces of the Interior armbands, had driven about in "commandeered" automobiles. With the weeding out of extremists from the French Forces of the Interior, such unpleasant incidents were becoming less common.

Maintaining good relationships with French civilians was often more difficult than keeping profitable liaison with either French Intelligence or French Forces of the Interior. Food was short, as were all supplies during September, and the people, who had held such high hopes when the Americans rode into their areas, were sorely disappointed. Then again, German propaganda had left fretful expectations of American atrocities in the minds of Frenchmen, and the latter understandably exaggerated out of all proportion of the few instances of American soldiers participating in drunken brawls. In short, CIC reported little overt hostility on the part of the French--but it found scarcely more positive co-operation.

Securite Militaire, by and large, employed controls similar to those of CIC. when they took areas under their own control. A pair of regulations were enforced by the French, but not by the Americans: Securite Militaire ordered that within their area cameras should be neither carried nor serviced and the possession of carrier pigeons was deemed illegal. Securite Militaire was no more able than CIC to put travel regulations into effect.

Securite Militaire made up a series of posters designed to prevent sabotage of communications. No sabotage was reported within the French area. CIC had copies of the posters scattered throughout the American zone, and experienced equally good results in avoiding sabotage.

Germans Possess Seventh Army OB

CIC reported that military security was generally good--but not perfect. German prisoners of war reported that captured Americans were obviously security conscious--they watched their words carefully; however, they did allow a variety of vital documents to fall to the enemy. An American captain, in one instance,

was captured while carrying complete identification of Seventh Army units down to regimental size. German intelligence officers were instructed to concentrate on the capture of documents rather than attempts to obtain information through questioning. 13

Seventh Army summed up the entire situation pessimistically: "It must be assumed that the enemy has excellent knowledge of our order of battle." 14

Securite Militaire reported that a newspaper, in its post-liberation exuberance, published the number of the conquering division along with the names and histories of many of the officers. Securite Militaire decided that the false step was accidental; no action other than a reprimand was taken.

Of a more serious nature was the report of an American liaison officer, working with a French division, who was reputedly seen on 13 September in conversation with a Swiss watch salesman on the subject of the American order of battle. Several days later the same pair was again seen discussing the same matter. After the American left, the Swiss was observed in earnest conversation with his friends as they sat passing maps about in a cafe. None of the principals in this affair were ever further identified. 15

Seventh Army left a small sub-detachment behind in Marseille to supervise Port Security work there. Late in September, Seventh Army relinquished control of the southern ports to Delta Base Section, the 427th CIC Detachment. When Seventh Army pulled out, the following measures were in effect: Military Police and French police maintained the physical security of the port areas; port employees were screened by the Gendarmerie, Securite Militaire, and the

Chapter 2

The German Intelligence Reaction

In September the German espionage services had shifted into second gear; in October they swung into high. Successful effort to counter the increased activity made October 1944 one of the great months in the history of Seventh Army CIC.

The first of CIC's four October victories actually began two days before the end of September when local police at Remiremont apprehended one and turned him over to VI Corps CIC there. The only charge against was that he was a "suspicious person."

was given twenty-four hours of "intensive interrogation" by VI Corps CIC. The early hours were fruitless. Born in 1914 in France, now lived in Remiremont with his wife and managed a there. His personal papers were in perfect order; he had documentation for a medical discharge from the French Army, received after being wounded by the Germans. He had, in addition, papers issued by local authorities which covered all periods of his life subsequent to that time. He had once been arrested by the Germans on a black market charge, but was released, ostensibly without penalty. He was not known to be a member of the Milice, Parti Populaire Francais, or other collaborationist organization, nor was he known ever to have associated with the Germans during the occupation.

How was it, asked his CIC interrogators, that he had been released without penalty for his Black Market operations against the German occupation? What were the strings attached to his future freedom? What were the charges? What had he actually done? Who had dealt with his case? What precisely had they said to him? Again and again was put through the same series of questions, and, as the hours passed, his thoughts became vaguer; his statements became confused.

Gradually VI Corps CIC worked his statements into a coherent pattern. had, indeed, fought against the Germans, been wounded in combat, and been honorably discharged in 1940. For four years he avoided trouble; he earnestly ran his and earned the reputation of being a good father and citizen. But he became greedy. In January 1944 contacted, then worked with, the Departmental Director of the Legion des Volontaires Francais (a German collaborationist organization) at Epinal, France, a man who was conducting a Black Market ring until his apprehension by the Feldgendarmerie (literally, "Field Police") in March 1944.

Apprehended in March along with his employer, was removed to the Feldgendarmerie headquarters, and there offered the opportunity to work off his punishment through service as an informer. He accepted, and was sent to radio school at Dijon, France, for a two months' course.

Upon completion of his studies, went to Belfort, France, where, under an alias, he was established as an informer. Specifically, he was to detect Allied secret agents, their contacts and their missions; to determine where more agents were to be dropped by parachute; and to learn the locations of Allied headquarters and ammunition dumps. For this work he was given 168,000 francs, half of which he was to pay the agents who would contact him after the occupation.

On 21 September he returned to Remiremont. Eight days later, before he was able to begin work on his new assignment, he was nabbed by alert French Police.

CIC did not stop the long interrogation here. Before they had finished with his interrogators had learned the names of thirty-odd members of the German espionage service.

One of the persons named by was a woman employed as a letter-drop for agents working through Switzerland.[17] Apprehended while using her radio transmitter, the woman confessed quickly, and identified numerous agents and contacts in and about Dijon. Through her the leading figure in the ring, was apprehended.

turned out to be a long-range German agent who had performed important missions in Belfort, France, and in Switzerland. He had been instructed to remain in Dijon after the arrival there of the Americans, and to penetrate the French War Ministry and various Resistance groups. He was intimate with details concerning the German Espionage Group at Dijon, most of whose members he had recruited, and, in addition, had numerous contacts in other areas. He confessed completely to CIC interrogators.

Seventh Army CIC, working in the Dijon area, assumed the bulk of the work. By mid-October an odd assortment had been impounded: former mistress of an Abwehr agent who was also the late until killed by the Maquis; proprietor of the who had 600,000 francs in his pocket, arrested along with his The sub-detachment in

17 VI Corps Counterintelligence Report No. 7, covering the period 9 Oct to 22 Oct 1944, Dated 22 Oct 1944. (Secret) (Departmental Records Branch, AGO, Alexandria, Va.).

produced respected comissioner of the renowned (he had been drawing information from the institution's credit files), and the arrested along with his wife. And in Bourg-en-Bresse, a pair of fallen Frenchmen were picked up, the one an informer against the Resistance groups with which he had once fought, and the other a specialist in counter-parachute activities (both had been blackmailed by from the Black Market into German espionage).

By 20 October 1944 the ring was completely extirpated. Twenty-one agents connected directly into the Dijon, Bourg-en-Bresse, Monaco ring had been apprehended. Many more leads concerning agents of other systems and in other areas were obtained during the round-up.

The Dijon victory, however, was but one of four major triumphs over the Abwehr. In the long view, the CIC victory most essential to Allied successes was the clean-up of many important stay-behind agents strung by German Intelligence along the Riviera. These men, charged with long term missions, were expected to play a major role in German espionage even after the War.

Many of the agents arrested had penetrated deeply into Allied organizations. Among those apprehended was an Abwehr stay-behind agent who was described as having penetrated "a military unit in a position of trust which would have enabled hir to provide the enemy with information of consequences serious to Seventh Army." Other arrestees included a who had maneuvered himself into the job of at Marseilles, and arrested at Cannes, who was to have become a German consular agent had not the Americans arrived. Twenty-two other agents were arrested in Cannes; arrests were made also all along the Riviera--in Monaco, Nice, Marseilles and Nimes.[18]

---

18 Sixth Army Group Fortnightly Counterintelligence Report No. 2, for the period 1 Oct to 15 Oct 1944, Dated 18 Oct; extracted from L-375, Sixth Army Group Operations' Repts for Sep and Oct 1944 (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.); and Sixth Army Group Fortnightly Counterintelligence Rept No. 3, for the period 16 October to 31 October 1944, dtd 4 November 1944, extracted from L-375, Sixth Army Group Operations' Reports for September and October 1944, (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.) (NOTE: These figures do not include line crossers, a good many of whom, mostly expendable young Italians, walked into captivity in and about Cannes.)

The third October victory of Seventh Army CIC over German Intelligence Service was of vital importance to area tactical commanders: an extraordinary number of line crossers were netted by CIC established roadblocks. The large number of arrests enabled CIC to form valid concepts concerning the type of person usually recruited for such missions, the places from which they would most likely be sent, and the customary patterns of their activity once turned loose. These valid concepts, in turn, made future arrests a far simpler matter.

For two months now the Milice Francaise, the Legion des Volontaires Francais, and Francisme Movement, as well as other collaborationist groups, had been sending members streaming across France before the Allied advances. The German Command had hesitated to allow such a motley group into Germany; many were detained at the border and put to work digging fortifications. CIC learned, however, that others were sent to the sabotage schools at Weisbach, Osnabruck, Hundsbach, Hubacker-Hof (in the Black Forest), Freiburgim-Breisgau, and Frankfurt. CIC also learned in October that the curricula of these schools stressed electronics and parachute training.

Not all the agents had once been collaborators: "Other methods employed by the enemy during October included freeing imprisoned patriots and mixing agents with them as partiots attempting to return to the Allied lines.... and Black Market operators and political and criminal prisoners found themselves confronted with a choice of prison or (of) becoming German agents." [19]

CIC learned further that St. Die, a resort town in the Vosges sixty-five miles south and slightly east of Luxembourg, was the center from which the Abwehr usually sent forth its agents. A central Abwehr office was located there, with smaller offices (Meldkopfs) just to the south in Fraize and, until the Americans moved in, in Remiremont. Falsified papers were usually printed and issued in St. Die. Once dispatched, the agents, hastily trained by mass methods, were prone to follow similar patterns. Seventh Army consolidated results of their arrests, and distributed the findings to other Armies:

---

19 G2 History, Seventh Army Operations in Europe, Part Three, 1-30 September 1944, L-1136 (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.)

"Short-range enemy agents in combat areas: Typical enemy instructions to one of his short-range agents:

1) Cross lines into Allied territory.

2) Openly approach first soldier or Military Policeman you see.

3) Say that you have escaped from German territory, and wish to give valuable tactical information.

4) Ask to be taken to the nearest Command Post to report this information. Allied soldiers will then give you safe conduct past any civilian control points set up in forward areas.

5) At Command Post give enough plausible, but general, information to convince them of your good intentions, so that they will not regard you with suspicion.

6) Tell them that you will go back to the Allied rear area, where you have friends, but instead, circulate in Division area, obtain unit identifications and strength, gun positions, supply dump and Command Post locations, etc.

7) Return to German territory with this information, at which time you will be paid and given instructions for your next cross the line mission. (SUSA)"[20]

Seventh Army discovered a few additional techniques which were not universally used, but nevertheless worth noting: "Other methods employed by the enemy during the period (October) . . . confiscating French passports for use of agents passing through Switzerland; employing the guinea-pig technique of sending low-grade agents through the lines to reconnoiter for future agents."[21]

Reports of investigations indicate that CIC relied on concepts built through just such careful analyses of arrests as those made by Seventh Army CIC during October.

CIC roadblocks naturally turned up a great variety of subversives--not solely espionage agents. Seventh Army CIC discovered that numerous Gestapo informers, subversive French nationals, collaborators, and unclassifiable security hazards could be detected through such means.

Nazi Saboteur Confesses

During October, the Seventh Army CIC laid the groundwork for its fourth major victory over the Abwehr with the apprehension of Ludwig Nebel.

---

20 95th Inf Div, G2 Periodic Rep No. 7, 26 October 1944; extracted from 5[illegible] Div, G2 Journal and File, 23-27 October 1944. (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.)

21 G2 History, Seventh Army Operations in Europe, 1-30 October 1944, (Unclassified) I-1130, (Departmental Records Branch, AGO, Alexandria, Va.)

Nebel began his journey through the battle lines on 31 October. Neatly dressed, although in the clothing of a farm worker, he proceeded along a road near Bruyeres in the Vosges Mountains. Once in American held territory, he attempted to give tactical information to an artillery officer of the 36th Infantry Division. He was arrested on the spot and brought to the 36th CIC Detachment where he was subjected to a two-hour interrogation. A body search, conducted by Agent Philip O'Brian, revealed French, British, American and German currency with the serial numbers of the French money running consecutively. His identification papers, all made out in the name of Karl Haas, an Alsatian, seemed in order, although the agents were not certain of the exact identification documents he should be carrying.

"Haas" claimed to have escaped from Berlin and to be returning to his native France to join the French Army. It was his contention that his varied collection of currency had come from successful black market ventures in Berlin. He was shipped off to Seventh Army CIC for further interrogation.

When Seventh Army CIC failed to crack his story, Nebel was placed in the hands of a team of questioners from Securite Militaire. The Frenchmen gave him a thorough going over physically. Nebel was draped over a log and unmercifully clubbed. Still he did not confess. At this point, three days after the original apprehension, interrogators from the 307th CIC Detachment took over the questioning with Agent George Perper in charge of the team.

"Haas" was asked where he had gotten the sturdy mackinaw he was wearing. The suspect answered that he had picked it up in Paris and then quickly realizing he had slipped, claimed to be extremely tired, and changed the purchase-point to Berlin. With this break to act upon, Perper left the interrogation room, returning with a file which contained photographs of the Paris Gestapo Headquarters. He placed the box in front of the suspect and dramatically picked at random one of the photographs on file. Perper claimed the picture he held in his hand showed the suspect leaving the Gestapo Headquarters in Paris. Nebel admitted defeat with the statement, "You've got me!"

Philip O'Brian, recalling the case, feels that the severe punishment given Nebel by the Securite Militaire had so worn the suspect out that his keen mind, able to parry off all previous questions, had lost its sharp edge, permitting the one slip his interrogators needed.

Nebel admitted that he was an Untersturmführer in the Sabotage Section of the Schutz Staffeln. He confessed to two missions. He was to have established in Paris an espionage office equipped with a radio transmitter. His other mission involved the contamination of three gasoline pipelines being used by the Allied forces in France. Information was to be acquired for the use of a team of saboteurs of which he was

the leader. Nebel stated that he had planned to return to Germany to pick up the explosives and the members of the team after the pipelines had been located. Cached in Germany for use in the operation were about 80 pounds of magnetic demolition charges prepared especially for pipelines.

In mid-October, Nebel had been introduced to two young saboteurs, Maurice Zeller and Ferdinand Vliegen, both fresh from a one month's course in sabotage and explosives given at Badenweiler. On 21 October, this trio had gone to Gerardmer for final briefing. The two young men, also scouting information on the pipelines, were to join their leader north of Paris for the return to Germany. All three men had headed for the area of the American 36th Infantry Division.

A rush alarm was sent out, and an hour and a half later, Maurice Zeller, who was traveling under the more romantic name of Jean Louis Fontanier of St. Die, was apprehended by the 36th CIC Detachment at a CIC-supervised roadblock.

Zeller admitted first to membership in the Communist Party, then to the Parti Populaire Francais, then the Milice, and finally to the trio of saboteurs who were pipeline-seekers. He made an easy and complete confession of the details of the plot.

Vliegen, now Franscoise Verneuil, managed to cross undetected through the lines as a refugee on 2 November. He was apprehended by Securite Militaire on 7 November while applying for a travel permit to Dijon. A search revealed that he possessed 50,000 francs with the serial numbers running consecutively and following the numbers on bills carried by Zeller. He maintained that he had been sent over by Zeller to gain information on civilian morale, troop movements, traffic density and such matters. He admitted that he had expected to meet Zeller north of Paris. The credibility of Vliegen's tale depended upon Zeller and Nebel keeping their knowledge to themselves. Vliegen held grimly to his story which was manifestly inadequate in the light of the testimony given by his comrades.

Nebel was expected back in Germany, and CIC determined not to let him lead disappointment. Agent Perper, in charge of doubling captured agents for counter-intelligence purposes in the Seventh Army area,[22] persuaded Nebel to work for CIC. Nebel returned to Germany where he was put in charge of a sabotage school, proceeding to send saboteurs toward the American lines provided. His cover must have been air-tight for eventually he won an Iron Cross from Hitler for his efforts on behalf of Nazism.

22 In the set-up of intelligence operations in the Twelfth Army Group, doubling of all captured agents was handled by Special Counter Intelligence (SCI), an agency of the Office of Strategic Services (OSS). In Seventh Army operations, CIC assumed responsibility, more or less unofficially, of handling men like Nebel, who were doubled to provide information of a counterintelligence nature

Meanwhile, armed with the necessary information, Agent George Mosely, in charge of travel control in the Seventh Army Area, supervised the apprehension of a series of unfortunate saboteurs as they crossed the lines into American territory.[23]

The Nebel sabotage case might well never have been broken, had the Germans sent the trio over the lines during September., For it was only in October that a stabilized front first enabled CIC to establish proper travel control measures. CIC immediately set a network of roadblocks as far forward as possible in Corps and Division areas. Seventh Army put their blocks and a straggler line further back. Control centers were dropped behind the Army's rear boundary.

No civilian traffic was allowed in combat areas which were defined as the zone forward of the Regimental rear lines. Roadblocks manned by CIC, Securite Militaire, and Military Police operated there in the forward areas, especially on bridges, as did roving patrols, which were usually under the control of a CIC Agent.[24]

By and large, as Seventh Army CIC reported, there were not sufficient French Forces of the Interior personnel to be of much assistance up front: "Travel restrictions, with roadblocks to check travellers, have been established. At first these roadblocks were maintained by local French Forces of the Interior. During the month the French Forces of the Interior were incorporated into the French Army and are no longer available. A satisfactory solution has not been found."

Residents of combat areas were not allowed more that six kilometers from their homes, with the following exceptions: "Cases of death, sickness, marriage, birth, etc.; for handling agricultural products; to deal in food, commerce, or industry for the benefit of the community; to handle financial matters; for medical personnel and purposes; for public officials in the performance of their duties." Seventh Army supplied the pass forms, which the resident obtained from the local police and had

checked by CIC or Securite Militaire. He was required to supply his name, date and place of birth, profession, residence, destination, route, time required for trip, reason for trip, identity card and signature.[25]

Roadblocks back from the front were usually manned by French Forces of the Interior and indigenous police--men who could easily recognize a resident of their own area, and with similar ease detect those unfamiliar with the region. Local police, in addition, checked hotels and lodging houses daily.

At all roadblocks, operating personnel were left with instructions to apprehend all suspicious travellers. Several peculiar identifying points were exploited. It was known that there was a sabotage school which issued its graduates new brown leather jackets. Persons sporting such jackets were immediately suspect. Persons with consecutively numbered currency were always detained as were individuals with a clean skin, indicating a possibility of recent training in the plush atmosphere of a Nazi intelligence school. Once or twice daily CIC would tour the roadblocks and pick up the detained suspects.[26]

CIC soon discovered that the French Cart d'Identite, issued back during the German occupation, had been so widely counterfeited that it was now virtually worthless. Since the French had not yet put a more trustworthy card into circulation, CIC and Securite Militaire were forced to check all travel applications back against the town or area records of the applicant's domicile.

Intensive traffic control served a dual purpose: numerous suspect civilians were apprehended; and roads cleaned of civilian traffic enabled vitally needed supplies to be shipped forward without delay. So complete was travel control within the Seventh Army area that by November Germany Intelligence was instructing its important agents to avoid crossing the lines at points held by Seventh Army.[27]

VI Corps CIC reported that the newly stabilized front enabled them to carry through their assigned missions more smoothly than had been previously possible. By mid-October, VI Corps was able to report that informant nets, never attempted

25 Seventh Army CIC Report No. 3, dtd 15 October 1944, extracted from L-1024, 45th Infantry Division, G2 General Summary for October 1944, (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.)

26 Interviews with C. Kenneth Crowell, Chicago, Ill.; Robert Richards, Columbus, Ohio; William N. Bower, Swarthmore, Pa.; and Robert Brockmeier, Cincinnati, Ohio, at the NCICA Convention, Hotel Waldorf-Astoria, New York, N.Y., 6 August 1955.

27 VI Corps Counterintelligence Report No. 7, covering the period 9 October to 22 October 1944, (Secret) (Departmental Records Branch, AGO, Alexandria, Va.)

during the days of rapid advance, had been profitably established throughout the Corps area. Suspect investigations could now be made more thoroughly; no longer was it necessary to ship off all suspects, large and small intermixed, "back to Army." Civilians working for the Army were being checked. Curfew regulations took on new meaning as enforcement was finally possible. Civilian and military blackouts were similarly improved.

New Divisions Arrive

At the beginning of October Maj Gen Wade Haislip's XV Corps joined the Seventh Army, bringing to General Patch the 79th Infantry Division and the 2d French Armored Division. On 17 October the 44th Infantry Division joined this newly arrived XV Corps. Commanding the 44th CIC Detachment was 1st Lt. Peter Cummins. Then, on 20 October, the 100th Infantry Division landed at Marseille. It moved swiftly up the Rhone, and, early in November, relieved the veteran 45th Infantry Division. The 100th CIC Detachment was commanded by Captain Anthony R. Mattos.

The new Divisions, while moving into Seventh Army area, were instructed to maintain radio silence. Until the units had been in contact with the enemy for a week, all shoulder patches and unit markings on vehicles were prohibited. Additional personnel were requested from Securite Militaire to provide the new Divisions with the French agents who had already proved so beneficial to the Seventh Army units heretofore.

And once again the security conscious Seventh Army caught German Intelligence short. Eleven days after the arrival of the 44th Infantry, Germany loudspeakers beamed into its area an exhortation to the "boys of the 79th" to surrender. Three days later similar bombardments correctly identified the American unit.[28]

Sixth Corps CIC readied itself for one possible disadvantage which could well result from this new order of battle. The presence on the Corps' left flank of the 2d French Armored Division represented a potential security hazard. CIC knew well that adjacent troops could easily be fooled; an agent could claim to the Americans that he was a misplaced French soldier, and to the French that he was a lost Yankee. No such cases were reported, however. In this instance, German Intelligence apparently was slower than American CIC in spotting a situation ripe for easy exploitation.[29]

---

28 Sixth Army Group Fortnightly Counterintelligence Report No. 2, for the period 1 October to 15 October 1944, dtd 18 October 1944, extracted from L-375, Sixth Army Group Operations' Reports for September and October 1944, (Unclassified)(Departmental Records Branch, AGO, Alexandria, Va.)

29 VI Corps Counterintelligence Report No. 7, covering the period 9 October-22 October 1944, (Secret) (Departmental Records Branch, AGO, Alexandria, Va.)

With the approach of American troops to areas traditionally German, increased civilian hostility was anticipated. One example was published by CIC as an example which might prevent many more. On 27 September a French civilian, claiming to be a captain with Strategic Services, approached a lieutenant in the 45th Infantry Division to tell him that Tendon, France, was unoccupied. A twelve-man patrol was dispatched to verify this information; only one man returned alive.[30]

CIC Requests Additional Personnel

During October, Sixth Army Group CIC submitted a request for additional CIC personnel giving as a reason the fact that large areas to the rear necessitated redistribution of available Agents.[31] At the time of the request, Seventh Army had, in its seven Detachments, 23 Officers and 81 Enlisted Men. No additional men were assigned CIC as a result of this request; various Base Section detachments, however, were sent, entire, into the area rearward of Seventh Army, and the latter was thus able to concentrate Agents into the more limited forward areas. Before the arrival of the new units, Seventh Army Detachments had often resorted to quasi-official "requisitions" of qualified linguists from the unit combat forces. These men often stayed with the CIC Detachments throughout the War, and performed regular Counter-intelligence assignments.[32]

Sixth Corps, too, was short-handed. On 24 October Agent Paul J. Martin joined the 206th CIC Detachment, but more help was still needed: "In order to accomplish most effectively the counterintelligence functions of a Corps Detachment, it is necessary that the strength of CIC, VI Corps, be increased. The need for additional personnel is due mainly to the increasing espionage and sabotage activity on the part of the enemy."[33]

---

30 Sixth Army Group Fortnightly Counterintelligence Report No. 2, for The Period 1 October-15 October 1944, dtd 18 October 1944, extracted from L-375, Sixth Army Group Operations' Reports for September and October 1944, (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.)

31 Ibid, The Sixth Army Group summation of their request omits what seems here to be the strongest justification for additional personnel: Divisions joining Seventh Army from the north (such as the 79th Inf) were almost up to the T/O and E (24 Jan 1944) strength of 3 Offs and 14 EM. All Sixth Army Group Divs which had come up from the Riviera, however, had a total Detachment strength of only six. See Appendix 2 for strength report as of 31 October.

32 Interview of Maj Thomas Connors, G3 CIC, by Capt Irene Taylor on 9 Oct 44.

33 Sixth Corps Monthly Situation Summary for Oct 1944, Dated 31 Oct 44, Martin is not further identified. (SECRET), (Departmental Records Branch, AGO, Alexandria, Va.)

"Commissioning With A Purpose"

The officers and Agents coming in with the new division detachments were all inexperienced in combat counterintelligence. The 307th CIC Detachment developed the policy of assigning the commander of these detachments to duty with the 307th and sending down experienced officers or, more often, newly-commissioned agents to take over the new units. This way the recently-arrived outfits had at least one man with the necessary experience to direct operations. A former member of the 307th, William Bower, has referred to this practice as "commissioning with a purpose." The 307th was allowed by General Patch to commission as many agents as necessary without reference to Table of Organization limitations.

When a new detachment joined the Seventh Army, the 307th sent down a representative to the new division's G-2 to instruct him on CIC operations and get permission for the new detachment to dress in civilian uniform.

307th Maintains Tight Control Over Its Units

The Seventh Army CIC maintained sufficiently tight control over its division and corps detachments that, in a sense, the 307th operated over the whole area encompassed by Seventh Army units. The highly-experienced VI Corps CIC was allowed to operate with less direction than the other units who were advised to shuttle suspects back to the 307th for interrogation as soon as possible. To maintain constant contact and liaison with Seventh Army Division and Corps detachments, the 307th utilized a liaison Agent, Robert Blake, to tour subordinate units and keep the 307th informed on their activities. Another agent of the 307th, George Moseley, was in charge of travel control throughout the Army area.

With this degree of supervision from Army level, there were no serious "take-over" or transition problems resulting when detachments moved from one area to another or divisions were replaced in a region by units from corps or Army level.[34]

An Eye On The Future

CIC, well aware of the ever-changing nature of their missions, always kept an eye toward the future. Careful reports were written and circulated concerning the difficulties anticipated once inside Germany. The German "Maquis" was expected to be one problem. CIC investigated reports of this organization, a de-Hitlerized Nazism as it were, throughout October. Blame for the atrocities was all to be shifted upon the "old Nazis" leaving a pure group able to carry through the finer aspects of the Nazi program untainted by the guilt of their elders. They were to disclaim any desire for world conquest, maintaining that these "old Nazis" had brought the last War upon Germany through their frantic search for world markets. These patriots

34 Interviews with C. Kenneth Crowell, Chicago, Ill.; Robert Richards, Columbus, Ohio; William N. Bower, Swarthmore, Pa.; and Robert Brockmeier, Cincinnati, Ohio, at the NCICA Convention, Hotel Waldorf-Astoria, New York, N.Y., 6 August 1955.

in the Maquis were to have no goal other than the liberation and purification of their country.

CIC learned also of a German decision to form an extensive underground net, but to desist from any such activity for the first six months following the American occupation. The reasons for this hiatus were: after six months of occupation German civilians would be so disgruntled that they would be ready for stout action; and six months' inactivity would surely cause American security forces to lower their guards.

A third investigation disclosed the existence of a group whose sole raison d'etre was to spread anti-American rumors throughout occupied areas.

Consolidation of CIC investigations indicated that foreign workers trapped in Germany were united spiritually, and would be able to operate against the Nazis as a powerful and organized unit--even though they lacked a pattern of formal organization. A CIC informant reported seeing a Frenchman slapped by a Nazi official in a crowded streetcar. The fact that not a murmur of protest arose indicated to him that the other passengers thought in a single pattern--and would be able to act in a single pattern were the proper time for their revenge to materialize.[35]

VI Corps summed up its attitude as Germany was being approached: "Security of installations within VI Corps area has been satisfactory for the period. The marked increase in enemy espionage and sabotage activity has been countered with roadblocks. Informant nets and other security measures have been rarified and improved since the last period (September). . . . In order to maintain a security plan of maximum of effectiveness during the approach to and penetration into enemy territory an increase in the present strength of the Corps and Divisional CIC Detachments will be necessitated."[36]

At this time the Seventh Army CIC had no means of realizing the significance of one item buried in a large Army Report: "Information has been received from a deserter that the Germans are recruiting soldiers who have lived in the United States for sabotage missions behind the American lines. The German soldiers will be dressed in American uniforms, and will infiltrate through our forward positions."[37]

35 Sixth Army Group Fortnightly Counterintelligence Report No. 3, for the period 16 October to 31 October 1944, dtd 4 November 1944, extracted from L-375, Sixth Army Group Operations' Repts for October and Nov 1944, (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.).

36 VI Corps Monthly Situation Summary for October 1944; Dated 31 Oct 1944. (Secret)(Departmental Records Branch, AGO, Alexandria, Va.).

37 Seventh Army CIC Rept No. 3, dtd 15 Oct 1944 extracted from L-1024, 45th Infantry Division, G2 Summary for Oct 1944. (Unclassified)(Departmental Records Branch, AGO, Alexandria, Va.).

Experiments in this new type of warfare had been reported early in October: "A small Allied troop were engaged by three Germans dressed in American uniforms and driving an American jeep. . . . Two of the Germans wore enlisted uniforms, while the third wore an American Captain's uniform and helmet with markings."[38]

This report was to attain significance later.[39]

With the 45th Division at the Front

Excerpts from reports of activities of the 45th CIC Detachment for October furnish an illustration of the varied duties of detachments at division level.

On 1 October 1944, the 45th CIC Detachment counted two Officers and four Enlisted Men; in addition, an agent of Securite Militaire was attached to the Detachment. During October, however, Special Agent Fausto Molinet was wounded in the right leg by a mine exploding under his vehicle, and Agent Willard Schutt was hospitalized with pleurisy and bronchitis. Both were expected to be out of action roughly a month.

The remaining Agents of the 45th Detachment worked on a variety of cases.

On 7 October 1944 one Gustave Calippe approached a 45th Division Military Policeman and asked to be taken to the nearest Command Post; he had important information for the Americans. The alert Military Policeman arrested him, and took Calippe to 157th Infantry Regimental Headquarters where he was given a preliminary questioning. Transferred to the 45th CIC Detachment, Calippe was extensively interrogated. He finally admitted to being an Abwehr agent belonging to the Digon group, and that he had crossed into Allied territory on a mission assigned him by German Intelligence. CIC discovered some additional information on other personalities before having Calippe held in the civilian prison at Epinal.

Division Artillery reported a series of petty thefts in Deyvillers, and agents of the 45th were dispatched to run a security survey there. The guard system was strengthened; strict pass and identification systems were instituted for workers in an adjacent tile factory; civilians were excluded from the Div Arty area; the Mayor, under CIC instructions, announced to his people that they were to keep away from areas occupied by American troops.

38 Seventh Army G2 Rept No. 58, 12 October 1944, Extracted from L-1136, Seventh Army Gw Staff Sect Daily Repts. (14), Annex 20, 1-15 Oct 1944, (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.).

39 See Volume XVIII, on the German counteroffensive in the Ardennes.

Fourteen residents of the thirteen towns visited by the detachment were deemed sufficiently interesting to have dossiers on them opened; six of these persons were eventually incarcerated.[40] The most dangerous was quite possibly Jaques Thomas, found near Rambervillers with a variety of passes, requisition forms, letterheads, stamps and other assorted official printing devices. He maintained that these had been used in anti-German Black Market activities, and that he was off to join the French Army. Other arrestees included a Milice recruiter, a collaborationist chief, a stranger with a police record, several German soldiers, and several keepers of these German soldiers.

There were seven 45th Detachment roadblocks in operation during October. Road patrols, at intermittent times, covered almost all of the Division area. Civilian authorities spot checked traffic at Padoux, Sercoeur, Girecourt, Fontaney, and St. Gorgon. The blocks and patrols were first manned by civilian volunteers and the French Forces of the Interior. During October, however, French Forces of the Interior in many towns were mobilized into the French Army. The entire traffic control system all but collapsed. Only an abnormal number of civilian volunteers enabled normal operations to continue. Two of these French volunteers were killed near Aydoilles when they stepped on a German mine.

Coupled with this shortage in French personnel was a critical shortage of Military Policemen. Captain Guenthner, the Detachment Commander, pointed out, however, that Military Policemen, even in sufficient numbers, were unsatisfactory for road guarding and identification duties because of the language barrier. His suggestion was that an arrangement be put through command channels whereby mobilized French Forces of the Interior personnel might be assigned road patrol duties at critical points.

Captain Guenthner suggested further that he be assigned a group of French soldiers, preferably Alsatians, who spoke both French and German, for assistance in the coming operations on the German border.

Lastly, Captain Guenthner pointed out that advance documentation on important CIC targets (such as location of Gestapo Headquarters and white and black list personel) was not coming down to his Detachment. He suggested that, if available, such documentation should be disseminated sufficiently in advance of operations to be of some value thereto.

---

40 During the month combat troops brought many "suspicious persons" to CIC Headquarters. For the sake of keeping forward elements alert, 45th CIC Det Agents carefully investigated such characters. With the exception of the Abwehr Agent. Gustave Calippe, however, none were deemed to be of any counterintelligence interest.

Agents of the 45th Detachment discovered no evidence of sabotage during October, nor were there reported any violations of AR 380-5 or cases of disaffection. There was no evidence of subversive activity against American troops unless one counted a somewhat garbled leaflet which suggested that the Americans might be homesick for the "French Follies" and "that crowd on Broadway" who are "now having (sic) a swell time." This leaflet was found in an abandoned German Command Post, but apparently was never distributed to its intended readers.

By the end of October the two overworked officers and the two agents on duty had moved their CIC Headquarters a few kilometers forward into Bult, France, and next month's operations were under way. [41]

41 45th CIC Detachment Monthly Situation Summary, 1-31 October 1944, dtd 31 October 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

Chapter 3

Reaching the Rhine

During the early weeks of November, Seventh Army, with the American Third on its left flank, moved with painful slowness into the carefully defended Vosges Mountains. Then on 17-18 November German resistance weakened suddenly. The 2d French Armored Division had within the week led XV Corps across 50 miles of mountains and through Strasbourg. By the end of November, Third Army, on the left, and VI Corps, on the right, were on line with Major General Haislip's XV Corps, and, poised together on the banks of the Rhine, the Armies of Generals Patton and Patch readied themselves to cross the last barrier into Southern Germany.

During the first week of November, two new divisions were committed to action in Southern France. The 103d CIC Detachment, with the 103d Infantry Division, was commanded by 1st Lt. Dugald W. Hudson and the 514th CIC Detachment of the 14th Armored Division was commanded by 2d Lt. Edward F. Bierdron.[42]

October had seen new heights reached in CIC's battle with German espionage, and there was speculation on what course the increasingly desperate Germans would choose during November. Many new indications of subversive activity had appeared during late October, and, with each overrun town somewhat more Germanized than its predecessor, CIC was unsure of what next to expect. Further, the shortage of French Forces of the Interior had become critical, first, because most members had been mobilized into the French Army, and secondly, because local French Forces of the Interior would, obviously, be absent where most needed, in Germany proper. CIC's response to these three challenges tells the main story of Seventh Army Counterintelligence for November 1944.

German Intelligence Service (GIS) Avoids Seventh Army

Seventh Army CIC found their counter-espionage work greatly simplified by the GIS: "The (October) efficiency of Seventh Army travel control in apprehending German agents resulted in the GIS warning its agents to avoid roadblocks in the Seventh Army sector."[43] During all of November Seventh Army CIC apprehended only nine known espionage and two sabotage agents--a sharp let-down from the October collections.

---

42 A Monthly Information Report dtd 17 Jan 45 is signed by Bierdron as CO, while a similar document dtd 31 Jan 45 is signed by 2d Lt Edward L. Hahn. It is not known whether the CO had been changed during this brief period or whether Bierdron had been "Acting" CO.

43 Seventh Army G2 After-Action Report, Annex No. 10 for the Period 1-30 November 1944, L-1136, (Unclassified), (Departmental Records Branch, AGO Alexandria, Va.).

Some German agents still held to the formulas employed by the Abwehr for over a month. a 24 year-old Frenchman, crossed Allied ies on 17 November at Aux Tigres. He, like so many before him, had come aight from St. Die. Maintaining that he was a refugee with valuable tactical information, he asked to be taken to the American Military Police; instead, he was taken to 36th Division CIC. Interrogation by 36th CIC Detachment and later by Seventh Army, disclosed that was a skilled linguist and qualified radio operator. A Captain Cavallic had recruited him for a three-week mission in Paris, where was to analyze port facilities, V2 bomb damage, railroad and troop movements, and Communist and Frances Tieurs et Partisans potential. was turned over to Special Counter Intelligence in hope that he might be doubled.

The curious case of another would-be line-crosser, indicated desperation tactics of the once competent and complacent Abwehr. was what would have, at one time, been called a "high-level agent." On 10 September this 17 year-old boy started two months of classes at the German espionage school of Hubacker-Hof, 22 miles east of Strasbourg, where he was one of a score of youthful Frenchmen in training. selected the course in espionage, which dealt chiefly with the organization of the American Army in preference to the radio course, which would have necessitated his jumping by parachute into the Allied sector of France.

Then on 8 November, was selected for what turned out to be his sole ission. He exchanged his German uniform for a set of civilian clothes and was riven to within a mile of the American strongpoint at Acqueville. There he crossed the lines, and, claiming to be a loyal Frenchman, passed by the first soldier to challenge him. He reached a CIC roadblock, however, and was spotted immediately.

Amazingly enough had no identity papers with him. Interrogation quickly revealed that his papers had been taken from him when he entered school, and then never returned. CIC agents supposed that papers were denied possibly to blackmail him into returning--or possibly because any documents forged at St. Die would be too easily recognized--or possibly because the St. Die machinery had been destroyed. CIC never found the answer to this question.

For several weeks CIC Agents continued intermittent interrogations of He supplied information on over forty of the men whom he had known at Hubacker-Hof, most of whom were being trained to enter the Allied zones. Numerous Sixth Army Group reports of subsequent dates carry additional information supplied by on Gestapo informers and members of collaborationist organizations.

was assigned an old mission with a novel twist. He was to approach the front lines from the rear. established himself in Corcieux, France, while the Germans were yet in town. Then, 48 hours after the Allies had pulled through, was to approach the lines, spot artillery locations and note bumper markings and shoulder patches. While attempting to return to German territory, was apprehended by CIC.

But few agents tried to cross into Allied lines during November. CIC arrests were principally of stay-behind agents, or of agents who had crossed over previous to the strict crack-down on travel control.

for one example, had been working many months for the Germans about St. Die. While the city was yet held by the German Army, had been an informer for the Gestapo. Later, he installed a letterbox, which was successfully used to intercept incoming messages, beamed by radio to an Allied Office of Strategic Service (OSS) Agent who had been doubled after his capture by the Abwehr. hoped to retain his employers after the American occupation, and collect strategic intelligence information, but was quickly apprehended by CIC.

On 6 November, boasted to two of his Epinal lady friends that he was an officer in French Intelligence. Suspicious, they relayed their doubts to CIC. On the next day CIC interrogators learned that an accountant, had been supplying the Abwehr with long-range financial information, and that his sister in Nancy was a notorious informer for the Gestapo.

of Roan l'Etape, had attended a meeting of the Vichy Government's Service des Societes Secretes, and was there assigned the task of gathering information on all Freemasons in his region. Brajon-Francois gathered the information conscientiously, but then turned it over to the Sicherheitsdienst in Nancy. CIC presented him to Securite Militaire for trial.

Other arrestees included a nineteen year-old girl and a fifteen year-old boy--she forced into espionage by Black Market convictions; he trained in an espionage school, and then sent across the lines with the mission of enlisting in the French Army.

Less than a dozen such arrests actually constituted the total take of Seventh Army counter-espionage teams for all November--a vast let-down from rushed October activities. German Intelligence Service was not, however, wholly inert. Unable to breach CIC roadblocks, the Abwehr contemplated new devices: ". . . agents stated that the Germans were comtemplating sending high-grade agents to

CONFIDENTIAL

Spain by air and then across the border because so many of their agents have been apprehended by the Allies in the forward areas." [44]

Seventh Army CIC reported another dodge: "It is also known that the enemy's discouragement was so great that (he planned) to take advantage of a commercial treaty between Switzerland and Spain whereby food supplies would be exchanged between the two countries. The German Intelligence Service planned to install agents as truckers on the Spain-Switzerland run." [45]

the young Frenchman captured on 17 November at a CIC roadblock stated that at one time "he was considered for a mission whereby he would have been deposited on the shores of France near La Rochelle by midget submarine. All agents thus landed were to return to the same spot after a lapse of 10 days for a return to Germany."

the credential-less line-crosser schooled at Hubacker-Hof, told CIC interrogators much about the instruction in parachute operations: "According to parachute agents . . . were told to bury their parachutes directly after landing and to avoid all contact with military and civilian personnel (and) to find a cover to camouflage their activities. They were instructed to send messages after their day of work at about 1830 hours. Their messages were intercepted at the school. . . . Radio equipment was of inferior quality; apparatus was very small." There were no reports verified of agents thus hopping into Seventh Army territory. [46]

The static combat situation, subsequent to the breakthrough of 18 November, afforded CIC time to analyze Nazi espionage techniques which immensely aided counter-espionage work once the troops were again fast under way, and new towns were up for liberation. During the rush up from the Riviera, forward detachments had often complained that they were entering towns "cold," with no

SECRET

information on either white and black list personalities or important targets, even though such information had often been unearthed by other units and was somewhere in CIC files. But in November, thanks both to the slowed advance and also to increased organizational efficiency, Sixth Army Group managed to disseminate carefully prepared suspect and target information quickly both to the front and to the rear. [47]

CIC Seeks Subversives

CIC had discovered that in France there were no important movements seeking to subvert either Allied military personnel or French citizens. When not enthusiastic to the Americans, the French were at least passive. German attempts at propagandizing American troops seemed to have caused more derision than desertions. [48]

It was believed that the situation would change markedly with the shift in American status from liberators to invaders. CIC, therefore, was sensitive to slight tokens of ill feeling.

Toward mid-November CIC learned of a Francist-staffed subversive espionage and sabotage group called "Griff." Members worked in units of five; the highest leader was one Bucarat, a man who was said to have boasted that the recent attempt on De Gaulle's life was by one of his men.

At the same time CIC learned of a smaller group named "Mission Marti." This fifteen-man clique had taken it upon themselves to organize "passeurs"-- the men who establish meeting places and hide-outs for line-crossers. They had it as a goal to place a passeur every 20 miles between Paris and the Vosges.

French Forces of the Interior was found often to suffer in reputation for the crimes of the Milice, by now usually referred to as the "Militia" in CIC reports. For instance, 140 Milice members caused havoc among civilians in St. Die. Again, the 141st Infantry Regiment reported hostile acts on the part of a band of

47 Breakdown of Sixth Army Group Rept No. 4, (L-375), discloses detailed information on: 29 new cases on individual suspects; 31 cases under investigation on which some progress has been reported; 54 personalities still under enemy control (many of whom were expected to cross the lines), and 1 case of information received on a carded personality.

48 "A VI Corps Summary of results of enemy leaflet and radio propaganda demonstrated that the enemy underestimated the intelligence of the American soldier and consequently produced more amusement than desired effects." L-375, Sixth Army Group Rept No. 5, 16 November to 1 December 1944 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

Frenchmen. In both cases the bad actors wore French Forces of the Interior armbands and identifications; in neither case, however, were they French Forces of the Interior members.

If the problem of telling the hostile Milice from the usually amicable French Forces of the Interior was all but impossible for CIC, it was not much simpler for the French themselves. The Vosges French Forces of the Interior, late in October, discovered one key: Milice members often sewed a piece of white cloth (2 1/2" by 3 1/2", and stamped with the German Eagle) inside the lining of the lower left front corner on their coat or jacket.

Throughout November German propaganda services stepped up efforts to subvert American troops. Loudspeakers along the front blasted almost continuously into American ears. Newspapers and leaflets floated into American foxholes. Most often drummed out were two themes: the growing nostalgia of Americans, faced with an indefinitely long war; and Inter-Allied disagreements and the danger of Communism.

Intensive propaganda efforts were beamed toward some of the minority groups who were lending support to the Allied cause. "Our Special Correspondent" told Arabian troops that the Allies planned harsh colonization of Arab lands and enslavement of the people. Similarly, he said from Oran to Algerians fighting in France: " an old drunkard" of a French railroad inspector had needlessly allowed a trainload of soldiers to be derailed. Lastly, the German said that occupying forces in a small Algerian village, suspicious of sabotage attempts there, had the town "dynamited" without any investigation.

Personnel Problems Numerous

Meanwhile, Detachment CIC officials fought their never-ending job to obtain personnel in numbers sufficient to do the jobs which CIC had been assigned.

Detachment Commanders, all along the line, requested assignment to their units of German-speaking personnel. Captain Green, Commanding Officer of the 3d CIC Detachment, for instance, had only one agent who spoke any German. He suggested transfers from the combat troops of German-speaking personnel, if no agents were available. 49

49 Sixth Army Group Fortnightly Counterintelligence Report No. 4, for the period 1 - 15 November 1944, dtd 20 November 1944, extracted from L-375, Sixth Army Group Operations' Reports for November 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

Several months prior to entry into Germany, the 307th CIC Detachment had the services of only two German linguists. Fortunately CIC possessed excellent liaison with the Seventh Army G-1 and through him able to establish contact with the G-1 of the 44th Infantry Division. One of the battalions of the 44th was composed of ASTP-trained soldiers that the Army had lumped together into an unhappy infantry outfit. CIC was given a "carte blanch" to appropriate the needed German linguists from this unit. The recruitment program, instituted without directives or recommendations from higher authority resulted in the acquisition of twenty-five to thirty individuals. These linguists were transferred to Seventh Army Headquarters to attend a short course in CIC investigations.

Former members of the 307th recall that these men, who reported in "just hanging with grenades," were extremely grateful to be "picked out of the fox holes." Right from the beginning these linguists were outfitted with CIC credentials and were carried on morning reports as agents. Immediate unit surveys were run on the loyalty and discretion of the linguists and eventually a background investigation reached back to the United States.

It was the general oonsensus of the detachment that these men "turned out well" as agents. Kenneth Crowell, 307th Commanding Officer, felt that the presence of these men, extremely grateful for their CIC assignment, was good for detachment morale.[50]

And then, by the last week of November, the French First Army reported that all French Forces of the Interior members in their areas had been integrated completely into units of the Army. In the American zones the situation was scarcely more favorable. Sixth Army Group stated the problem succinctly; "Additional trained Gendarme personnel to assist in this (CIC) is much needed but difficult to secure. The ranks of the French Forces of the Interior who are helping in this work have been reduced by their inclusion in the regular French Army. Naturally the best are those who enlist, and the rest are none too reliable."[51] Detachment Commanders feared that the problem of obtaining

50 Interviews with C. Kenneth Crowell, Chicago, Ill; Robert Richards, Columbus, Ohio; William N. Bower, Swarthmore, Pa.; and Robert Brockmeier, Cincinnati, Ohio, at the NCICA Convention, Hotel Waldorf-Astoria, New York, N.Y., 6 August 1955. See Appendix 3 for strength report as of 15 December 1944. It is believed that this report reflects the additional numbers obtained through local recruitment.

51 Sixth Army Group Fortnightly Counterintelligence Report No. 4, for the period 1 - 15 November 1944, dtd 20 November 1944, extracted from, L-375, Sixth Army Group Operations' Reports for November 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

local personnel would grow critical once the Rhine was breached and no more local French forces were forthcoming.

While still in France, however, CIC managed to have as much work done by the French as was possible. Fortunately relations between CIC and French authorities continued to be excellent. French Forces of the Interior had always preferred CIC to its French counterpart, Securite Militaire, and the latter similarly proved most cooperative throughout. Case histories abound with instances of suspects and information being shuffled between CIC and Securite Militaire, and on matters demanding united action, such as travel control, they worked often as a single unit.

Seventh Army finally managed to obtain 100 Gendarmes, who were slated eventually to serve as Alsatian police. Until Alsace was overrun they were scattered throughout the Army area to augment personnel at travel control points.

With the entrance of new detachments into areas rearward of Seventh Army and with the front relatively stable, CIC was at last able to place personnel so as to use them most efficiently. No longer was there the wild race of Army keeping up with Corps, and Corps with Division. For the overall effect of the rapid advance of combat troops had been to impede CIC's forward movement; Division teams had to wait well behind the lines for Corps to catch up. Then, when Corps detachments did arrive, Division detachments often left a team of Agents, badly needed at the front, to orient the incoming detachment on local problems. The situation was repeated with the arrival of Army.

The overall effect of the static front, however, was to throw teams forward. By mid November, for example, three of the five Agents in the 3d CIC Detachment were up with Regiment. [52] Similarly, Corps CIC was now able to send an advance team up to Division Headquarters in order to receive briefing on work left undone. Division CIC was thus able to pull out all its Agents together, and arrive in strength at the next target. [53]

Thus Seventh Army CIC faced and attempted to answer the three big issues of November: German espionage, enemy attempts at subversion, and personnel

52 Sixth Army Group Fortnightly Counterintelligence Report No. 5, for the period from 16 November to 1 December 1944, extracted from L-375, Sixth Army Group records, 1-31 December 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

53 3d Infantry Division, CIC Monthly Summary for the period ending 30 November 1944, dtd 3 December 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

shortages. There were, however, three smaller problems: travel control, counter-sabotage efforts, and military security.

German-Speaking Gendarmes Aid Travel Control

Travel control work was immeasurably simplified through the addition of the 100 German-speaking Gendarmes to Seventh Army Security forces. On 26 November, fifty of them were sent into Strasbourg to work there with the "T" force, and twenty more were attached to 100th Infantry Division, which was then up front with XV Corps, clearing Roan l'Etape and St. Blaise. The earnest request of Captain Guenthner, commander of the 45th CIC Detachment, was heeded: he was given fifteen of the Gendarmes, whom he used to supervise roadblocks throughout the Division sector. Each Gendarme was provided with a notebook containing names and descriptions of persons on the CIC wanted lists who might to be expected in his area.

At the end of November, over 100 travel control points were scattered throughout the VI and XV Corps area. In addition, numerous roving patrols covered the roads. Gendarme officers checked the entire system, which was also supervised directly by Corps CIC in collaboration with Seventh Army CIC.

By now CIC was able, themselves, to screen all refugees. To facilitate this task--at least to make it possible--residents of newly liberated towns were ordered to stand fast for the first few days. Actually, there was little long-range refugee migration. Most of these, wishing only to avoid the areas of actual combat, withdrew 10-20 miles from the front, and returned with the cessation there of hostilities. Daily more than 600 such refugees were channeled into Seventh Army refugee reception centers. Seldom did anyone there wish further evacuation.

Scattered Sabotage Attempts

During November, there were scattered reports of German sabotage efforts. When a munitions train exploded in the station at Baume les Dames, Securite Militaire undertook the investigation. Also within the French sector were numerous cases of wire clipping. French Forces of the Interior organized night patrols to check communication security.

Some German sabotage was of a more unusual type. On 18 November, for instance, took place one of the most thorough jobs of road sabotage of the

war. An estimated 1,500 pounds of explosives, painstakingly hidden in a concealed culvert, blew a crater 75 feet long and 25 feet deep into the road between Rambervillers and Baccarat.[54]

Available reports do not indicate the apprehension of any of these saboteurs, nor, for that matter, the capture of any important saboteurs after their strike--during the entire period from August landings through November, for all of Seventh Army.

The most effective counter-sabotage weapon was a thorough knowledge of the enemy's sabotage capabilities and techniques. Seventh Army CIC, with this in mind, consolidated reports on Nipolite, a type of plastic explosive which could be molded into articles of wearing apparel or luggage. First mention of this new material was by enemy agents captured by Seventh Army CIC.[55]

Seventh Army Reports Good Military Security.

Like most of their work, maintaining military security was a constant struggle for Seventh Army CIC. In November Seventh Army was again able to report good, but not perfect, military security.

There was much on the credit side. VI Corps reported that increasingly security conscious troops were supplying substantial amounts of important data to CIC.[56] A Seventh Army security survey of the important railroad yards in and about St. Loup, France, disclosed that no sabotage had been detected there, nor could any probably occur. Security measures were excellent, and the Commanding Officer there appeared sympathetic to and cooperative with the CIC mission. Seventh Army CIC found that the actual demonstration of a low-grade agent during their security lectures made a deep impression on both officers and enlisted men of the audience.

---

54 Sixth Army Group Fortnightly Counterintelligence Report No. 5, for the period from 16 November to 1 December 1944, extracted from L-375, Sixth Army Group records, 1-31 December 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

55 Sixth Army Group Fortnightly Counterintelligence Report No. 6, for the period from 1 December to 15 December 1944, dtd 25 December 1944, extracted from L-375, Sixth Army Group records, 1-31 December 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

56 Seventh Army Semi-Monthly Counterintelligence Rept No. 5, 1-15 Nov 1944, dtd 15 Nov; extracted from L-1136, G2 CIC Staff Section Repts, 15 Aug - 31 Dec 1944., (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

There was also much on the debit side, however, in a telephone booth was found a secret document which contained a list of Corps and Divisions en route to the Western Front. Careful CIC investigation disclosed a variety of security violations, among them failure to classify the document properly, failure to register it, and allowing it to be carried about, unguarded, by a typist. CIC submitted names and evidence for purposes of courts martial.

According to a Prisoner of War, German Infantry units regularly listened in on Allied telephone calls. CIC learned of the compromise of several Allied attacks by this means.[57]

Seventh Army CIC maintained a file on documents and equipment dealing with establishing identification which had been compromised or forged. During November it was reported that the Germans facing Seventh Army were using a round stamp with the letters "CIC" and had also captured roughly 70 French passports, whose numbers were known and recorded.[58]

Sixth Army Group CIC recorded an attack made by 70 enemy dressed in U.S. raincoats and helmets against a Company of the 15th Engineers. The report states that as the Germans attacked they yelled, "G.I.!" Throughout the war German Prisoners of War had, from time to time, maintained that they had been forced into the German Army. As Allied forces approached Alsace more and more prisoners of war attempted this dodge. Two French officers, skilled in interrogating Alsacians, were supplied Seventh Army CIC by Securite Militaire..

Then, as all manner of German expatriates more and more poured their life stories out to interrogators, CIC found itself assuming a new mission: the gathering and disseminating of strategic intelligence. Information, often peripheral to a case proper, possibly spaded out only as an aid in understanding the background or motives of an individual, took on separate importance as it was checked, then rechecked, against other reports on similar subjects. CIC disseminated such compilations of information on intelligence targets, often extremely accurate and complete, simply because the matter was interesting, or because it just might prove of some indirect value to someone in the field, but not, at first, because CIC Agents interpreted such an undertaking to be central to their mission.

---

57 Sixth Army Group Fortnightly Counterintelligence Rept No. 5, for the period from 16 November to 1 December 1944, extracted from L-375, Sixth Army Group records, 1-31 December 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

58 Seventh Army Semi-Monthly Counterintelligence Rept No. 5, 15 November 1944, Annex 2 to L-1136, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

With a mysterious Germany lying close behind the next few hills, Sixth Army Group CIC units devoted more and more of their reports to these briefs, which, however, they invariably tacked on as "Appendices" to the "real" report.[59]

From division reports came information on the political situations and problems as seen directly by observers on the very front. When played together such reports permitted the interpolation of accurate predictions: if a change had been progressing for a month, one could assume continued progress for the next period, or, if increased proximity to Germany had caused more and more of a certain sentiment, one could assume a larger amount once Germany proper was reached.

Sixth Army Group reports of November include material concerning the status of foreign workers kept in Germany, the possibility for partisan activity (especially sniping) in Germany, the French "Journalists" who were stranded, friendless and homeless, in Germany, flights of leading Nazis, revolts of Poles within Germany, personnel shortages, and strangely, abundances[60] in Germany, effects on the Austrians of Russian brutality, status and morale of Waffen Schutz Staffeln members, and Japanese feeling over the German defeats.

By the end of November 1944, CIC had therefore, without stating or realizing that they were doing so, assumed the mission of unearthing, compiling, and propagating certain types of strategic intelligence. As for the type of information which CIC thus handled, it can best be summed up as follows: it had no immediate tactical value; there was no one agency which had requested the information, or to which it would be of exclusive value; it all emanated from regular CIC sources; and it usually was a compilation of extracts from several sources--often what had become "common knowledge" to the detachment, but what was probably unknown in offices more removed from contact with numerous indigenous persons.

The ultra-secret Office of Strategic Service (OSS) reports seldom served the important purpose of educating unit commanders in a general way about overall conditions in Germany. Yet "know thy enemy" has been a cardinal rule of warfare throughout the battles of mankind. By default, CIC assumed the bulk of this work.[61]

---

59 L-375, Sixth Army Group Repts 5-8 form a valid basis for these generalizations.

60 L-375, Sixth Army Group Rept No. 5 states that workers within Germany were kept at their desks even when no materials were available - simply to keep them out of trouble.

61 Sixth Army Group Fortnightly Counterintelligence Report No. 5, for the period from 16 November to 1 December 1944, extracted from L-375, Sixth Army Group Records 1-30 December. (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

Sarrebourg and Strasbourg

For division detachments the screening of freshly liberated towns was probably the most time-consuming job. As such teams traversed France they found the same problems reappearing in each city. The detachments soon developed efficient modus operandi.

Activities of one two-agent team in a single small town, Sarrebourg, France, contrasted strongly with the activities, thirty-five miles off, of a large "T" force unit in the major French city of Strasbourg.

On 20 November "light resistance was being encountered by 44th Division in Sarrebourg and small towns to the north."[62] At 0930 hours on the next morning, 1st Lt. Peter Cummins, Commanding Officer of the 44th CIC Detachment, and Agent Ulysses S. Grant entered Sarrebourg and established CIC headquarters there at the office of the Burgermeister.

French Forces of the Interior had prepared in advance for the arrival of the Americans. Local leaders had drawn up a list of 61 local suspects, which, when checked against a Seventh Army Black List, proved accurate. Lieutenant Cummings immediately organized a synchronized apprehension team of 75 French Forces of the Interior troops. Within two days, forty-five of the wanted individuals were apprehended--along with an additional twenty whom the French Forces of the Interior picked up on their own volition. All were incarcerated in the former Gestapo headquarters and political prison.[63]

On the morning of their arrival the two CIC Agents met with the local leader of the passive resistance group, who assisted them in choosing a Mayor and Assistant Mayor who would serve at least until arrival of XV Corps CIC and Civil Affairs Detachments. At this meeting members of a Town Council and Gendarmerie were also selected. These newly-selected provisional authorities were immediately given a variety of assignments over and above routine administration. They were to impound all mail, restrict the telephone service to the limits of Sarrebourg, and attempt to re-establish the water, gas, and electrical facilities.

In addition, the Mayor was given personal charge of all belongings confiscated from newly arrested prisoners, as well as of substantial amounts of German ordnance material which was captured with the city.

62 G2 History, Seventh Army Operations in Europe, 1-30 November, L-1136, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

63 44th CIC Detachment, Semi-Monthly Counterintelligence Report from 9 November 1944 to 24 November 1944, dtd 24 November 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

The two Agents immediately put into effect the customary regulations intended to restrict the civilian activity which would injure the Allied cause. Residents were instructed to stay within six kilometers of their homes. Laissez-Passer would be issued to those deserving them on arrival of Corps CIC -- but not before. Curfew hours were set: 2000 to 0600 hours. Blackout regulations were to be maintained strictly. Weapons were not to be carried concealed. Lastly, the powers of the provisional government were carefully explained.

Certain categories of citizens received special instructions. Refugees and strangers to the locale were told to register with the Mayor. German deserters had their names taken. They were strictly warned to stay in town, and then to report to XV corps CIC immediately upon its arrival.

The newly-formed Gendarmerie was put to immediate work guarding the rapidly expanding prison and maintaining roadblocks about Sarrebourg.

Lieutenant Cummins and Agent Grant contacted the local printer and arranged to have hand-bills printed and distributed explaining the American regulations. They also contacted the town crier to have him transmit the information, and at a mass meeting, had the newly-appointed Mayor explain the regulations to the entire city population.[64]

By the morning of 24 November, seventy-two hours after their arrival, Cummins and Grant were ready to catch up with the Division front-runners. Before leaving Sarrebourg, however, they wrote careful reports which were left with the Mayor until XV Corps CIC arrived.[65] Information transmitted included the names of all suspects and evidence against them, names of probable suspects, and names of reliable persons.

---

64 Information has been taken from 44th CIC Det Rept of 24 Nov 1944, and checked against 344-CIC-0.3 (24815) 44th CIC Det, Historical Rept (Oct-Nov 1944). Several minor details have been taken from the account of the liberation of Lorquin, Fr., found in the same reports, when such details were missing from the Sarrebourg record.

65 44th CIC Det Rept of 24 Nov 1944. Lt Cummins, more so than most Div Det CO's, held his Agents forward with regimental troops. Therefore his Agents seldom contacted Corps Agents personally. Instead, he arranged with XV Corps to use specific channels to ship back suspects and information. Three weeks prior to V-E Day Lt (then Capt) Cummins was killed in action. Source: Interview with Grant of 14 Aug 1945.

At 1030 hours on 23 November the Command Post of the 2d French Armored Division received the message "Tissue est Dans Iode" (Cloth is in iodine) which, when decoded, informed General Le Clerc that his Task Force Rouvillois had carried through Strasbourg to the Rhine banks. By the end of the day other French forces had secured the city.[66]

CIC, however, had been working out the problems of Strasbourg long before 23 November. For many weeks target sheets had been growing, and the organization of the entering party had received advance attention.

CIC was most interested in notorious recruiter for the Abwehr, who was known to hold Room #1 of the Hotel Metro Pole in Strasbourg. had served in Spain, then fought in the Cavalry for his native France; but when captured he worked equally faithfully for the Germans. He had performed high-level missions in Greece, Bulgaria, Italy, and now France. A variety of line-crossers apprehended by Seventh Army claimed to have been recruited by the persuasive whom they described as 46-68 years old, a man with receding wavy hair and heavy drinker with a accent.

Sixth Army Group also put roommate, the Roumanian Abwehr agent, on their wanted lists. He was described as a tall man with a strong build and a He had large hands and a double chin.

CIC roadblocks had not proved 100 percent efficient. Seventh Army CIC learned of an agent who had twice crossed Allied lines--the first time to go to Paris, the second time on a short-range mission about St. Die. Now living in Strasbourg, this carefully trained agent would be able to furnish valuable information on how he avoided roadblocks, and how more of his kind could then be apprehended.

Many more agents were advertised. One, whose radio, concealed in a brown suit-case, was never out of his reach or that of his stout, now-blond wife. Or founder of the folding who was not connected simultaneously with both Communist and Fascist organizations. There were, of course, many more names on this evergrowing list.[67]

CONFIDENTIAL

A Little Time For Training

The slow-moving combat situation, which gave CIC an opportunity to perform counterespionage operations, also afforded some time for training. The 307th CIC Detachment put in operation in Luneville, France, a school of a few days duration designed for newly-arrived agents of Seventh Army CIC units, but also attended by many of the more experienced men of the command.

The program consisted of classroom lectures and informal discussion groups, and generally involved preparations for operations inside Germany. Much information for the courses was extracted from material in the Seventh Army mobile library. Means for getting along with the civil populace in enemy territory, interrogation methods and roadblock operations were stressed. The men were allowed to view first hand the complete operation of the 307th CIC Detachment.[68]

How To Investigate A General

Perhaps the most extraordinary occurrence in this period of Seventh Army CIC activity involved Agent Victor deGuinzbourg, an operative held in the highest trust by his superiors. While deGuinzbourg was with the 307th in Luneville, he was called in for a private conference with General Alexander Patch, Commander of the Seventh Army. The General had a ticklish assignment for the agent: to investigate, completely on his own, a report of the subversion of an American General. General Patch warned that any repercussions resulting from a slip-up in this investigation would be the sole responsibility of the agent.

According to the report that Patch had received but did not let deGuinzbourg see, the American General, a liaison officer with the First French Army, in charge of getting supplies for the French, was acting against the best interests of the United States.

In regard to leads, deGuinzbourg recalls that "he had nothing to hang on to." He could not run a regular series of interviews without blowing the investigation and leaving himself open to the consequences. Wearing a civilian uniform and supposedly on leave from active duty, deGuinzbourg went to the area where the French Headquarters was located. He put up in a French inn and then ambled over to the Headquarters building, where he called on the General informally and then proceeded to the Officers' Club. For five days, he talked to old acquaintances and many new ones, never approaching the problem directly, but always open to any comments which he could piece together into some kind of conclusion.

---

68 Interviews with C. Kenneth Crowell, Chicago, Ill.; Robert Richards, Columbus, Ohio; William N. Bower, Swarthmore, Pa.; and Robert Brockmeier, Cincinnati, Ohio, at the NICA Convention, Hotel Waldorf-Astoria, N.Y., N.Y., 6 Aug 55

At the end of five days, deGuinzbourg returned to Luneville feeling that there "was not a word of truth" in the allegations. The accused General was doing exactly as he had been instructed. He had achieved good terms with the French authorities just as a liaison officer should. DeGuinzbourg later saw the report of the original accusation. Generally there had been charges of "being nice to the French" and specifically of favoring them in the allocation of supplies. DeGuinzbourg looked upon this document as a "spite report" and after seeing it was more than ever sure of his original conclusions about the General.

DeGuinzbourg recalls that General Patch was "very happy" about the results of the investigation and the manner in which it was handled. [69]

In late November the Seventh Army boundary (on their right flank) was moved several miles northward to permit the First French Army to participate in the capture of Strasbourg. [70]

"T" Force Planned

It was decided that reduction of the city should be accomplished by a "T" (Target) Force -- such as the "S" Forces which had helped secure Rome and Florence, and the other "T" Forces which had operated in Paris, Luxembourg, and Nancy. "T" Forces were created by SHAEF to operate at Army Group Level in its Directive No. 17, dated 7 July 1944. They were formed from personnel of G2, who were in turn assigned additional units and troops from combat forces, and CIC Personnel from as many local detachments as possible. They were charged with seizing, safeguarding, and facilitating the exploitation of important intelligence and counter-intelligence targets in the larger cities. [71]

Strasbourg "T" Force took its personnel where it could. The 100th Infantry Division released twenty Gendarmes to this organization; fifty more were sent across France from Dijon. [72] XV Corps contributed an Infantry Battalion

69 Interview with Victor deGuinzbourg, Brooklyn, New York, in Room 620, Library Building, United Nations, New York, N.Y.

70 Seventh Army FO No. 5, (1944), dated 0001A, 29 Sep 1944; Extracted from The United States Seventh Army, Report of Operations (Heidelberg, Ger., 1946), Vol III, Annex C, p 937.

71 See Volume XV, this history.

72 Sixth Army Group Fortnightly Counterintelligence Report No. 5, for the period from 16 Nov to 1 Dec 1944, extracted from L-375, Sixth Army Group records, 1-31 December, 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

(1st Bn of the 313th Inf Regt) and a Company of Combat Engineers (A Co of the 165th Eng Com Bn). [73] CIC Agents were drawn from VI Corps (206th CIC Det) and 7th Army (307th CIC Det) Personnel. [74]

This "T" Force entered Strasbourg on 25 November 1944, several hours ahead of the 3d Infantry Division forces, who were the first American combat troops scheduled to penetrate the city. [75] CIC immediately began the immense problem of screening buildings. Communication buildings were all given top priority; once checked, they were put under constant guard. The Power Plant was checked, and a system of passes was instituted immediately for workers there. Such passes were all countersigned by CIC.

On 28 November the French Majors le Tallec and Pavard, Gendarme leaders, VI Corps CIC, 3d Infantry Division CIC, "T" Force representatives, and Strasbourg officials met together to discuss security problems current in the city. It was there pointed out that 40,000 German citizens then lived in Strasbourg. Immediate steps were decided upon: first, CIC, French Forces of the Interior, and municipal officials would together attempt to classify all such people; secondly, these German nationals, once classified, would be put under a loose "house arrest" until further action could be taken. Those so detained would be free to walk the streets from 0900 to 1600 hours, but only for the purpose of obtaining food. They would be required to report daily to French Police. Eventually all these nationals were to be sent back to a camp, and from there to the rear.

CIC work was greatly complicated by the complete lack of a local Police force (which, having been Pro-Nazi, had skipped into cover or into Germany). By now 164 gendarmes were serving in Strasbourg, and they, along with numerous French Forces of the Interior Personnel, were substituted. These men were also put on roadblocks throughout Strasbourg and its environs--with one gendarme to a point.

With German forces, including an active artillery, just across the Rhine, Strasbourg was for many weeks very much a military zone. Curfew was set at 1950 hours, and black-out regulations were enforced to the letter. Troops were not allowed within the city unless assigned work there.

---

73 These two units are mentioned in operations Instructions No. 25, (Seventh Army), dated 28 Nov 1944; Extracted from Annex D to the Seventh Army Rept of Operations, p 965, Vol III.

74 Sixth Army Group Fortnightly Counterintelligence Rept No. 8, Period 16 Dec to 31 Dec 1944, dated 7 Jan 1945; Extracted from L-462, Sixth Army Group G2 Repts, Jan 1945, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

75 The Seventh Army Report of Operations, Vol II, p 436.

French Forces of the Interior estimated that 6,000 arrests would eventually be made within the city. CIC found that lists of German soldiers in hiding, their close associates, Gestapo informers, Nazi Party members and officials, and miscellaneous collaborationists and security risks were growing ten times as fast as the arrest list. With all agencies funneling their findings into CIC files, CIC, itself was losing ground. Since there was little time for individual cases during the early days in Strasbourg, CIC made few important arrests during this period.

General Le Clerc appointed a town manager and governing committee, which took office fairly smoothly, despite some protests of the working class.[76]

Political feelings in Strasbourg during the early days of its liberation presented a curious picture. Citizens were suspicious of the French soldiers; American troops, on their part, distrusted the civilians. For beside the 30,000 to 40,000 German nationals in the city, there were many Frenchmen who spoke German. The Americans seemed at last to have breached the enemy's homeland. During the early days in town American suspicions seemed corroborated by the scanty pro-Allied feeling evidenced in town. French and American flags, customarily displayed immediately upon capture of a city, failed to appear.

It now seems, however, that uncertainties of the combat situation were responsible for this passivity. Citizens were not at all certain that Strasbourg would long remain in Allied hands. Indeed, toward the end of November, all combat troops in town were alerted for evacuation. Refugees clogged the roads immediately; citizens openly jeered the Allies as cowards; some, truly loyal to Germany, attempted to reinstate themselves with pro-German elements. The immediate effect was a drop in American prestige, and some retardation of the work of occupying forces.

When the evacuation alert was withdrawn, Seventh Army units of all sorts were put to work spreading the news. Now, at last, French and American flags blossomed over the streets. Arrests were simplified, since many men had shown their true colors during the short period of uncertainty.[77]

76 3d CIC Det Monthly Situation Summary for Period ending 30 Nov 1944; dated 3 Dec 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

77 Sixth Army Group Fortnightly CI Rept No. 8, from the period 16 Dec - 31 Dec 1944, dtd 7 Jan 1945, extracted from L-462, Sixth Army Group G2 reports for Jan 1945, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

The 3d CIC Detachment looked confidently into the future: "The Alsatians are generally a hard-working, clean, altogether intriguing people, who will be content when this sector is again working smoothly." [78]

And then on 2 December the bulk of "T" Force personnel were sent back to their own units, [79] and CIC Agents there settled into their customary patterns of activity. [80]

Early in December personnel of the 307th CIC Detachment received a pleasant surprise, a letter which is here quoted in full: [81]

6 December 1944

AG 330.13-B

SUBJECT: Commendation.

TO: Commanding Officer, 307th Counter Intelligence Corps Detachment, APO 758, U.S. Army.

1. The 307th C. I. C. Detachment has shown the highest of professional standards during the planning and operational phases of the DRAGOON (ANVIL) Operation. For the successful carrying out of all assigned tasks, and for the protection of Seventh Army forces from the insidious attacks of espionage and sabotage agents, I wish to express my appreciation and commendation.

---

78 3d CIC Detachment, Monthly Situation Summary, from the period ending 30 Nov 1944, dtd 3 Dec 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

79 Operating Instructions No. 26 (Seventh Army); Seventh Army Report of Operations, Vo. III, p 965.

80 The T Force operation in Strasbourg was, from its inception, closely coordinated with the work of the ALSOS mission, a group of scientists, technical specialists and intelligence representatives (including CIC Agents). The Army Intelligence commander directed his T Force head to give first priority to ALSOS targets. As a result of early intelligence planning and target exploitation, key areas were secured and placed under guard during the first two days of the operation. Seven University of Strasbourg physicists and chemists were apprehended, and other German scientists who had managed to flee left behind them documents which proved of extreme value in determining the scientific progress in aid of the Reich war effort. The Strasbourg ALSOS operation proved "about the most important: of the Mission's accomplishments during the War. (For further information on ALSOS activities in Strasbourg see Chapter on CIC in Special Missions).

81 Headquarters, Seventh Army; Letter from Gen A.M. Patch to CO 307th CIC Det; Subject: Commendation. Extracted from "CIC Monthly Information Report," (Kansas City Reoords Center, Box 55099).

2. Displaying outstanding initiative, resourcefulness, and leadership, the members of this detachment have caused the development of a splendid system of road-blocks throughout the Seventh Army area, which has led to the apprehension of numerous dangerous enemy agents, thereby defeating enemy plans and efforts to obstruct the progress and injure troops of Seventh Army. This splendid achievement reflects great credit not only on the 307th Detachment but also on the entire Counter Intelligence Corps.

A. M. PATCH
Lieutenant General, U. S. Army
Commanding

The Two-Way Street

Former members of the 307th CIC Detachment have praised General Patch's knowledge of the proper use of CIC. The excellent relations between CIC and the Seventh Army Commander had been established prior to the staging operations in Naples. The process of education of all tactical commanders in the mission and value of CIC had begun long ago in North Africa.

According to Kenneth Crowell, former Commanding Officer of the 307th CIC Detachment, the biggest aid that a troop commander can give CIC is to maintain a policy of not interfering with counterintelligence operations. Such a policy can stem only from a complete realization of the uniqueness of the counterintelligence mission and the means by which this mission is accomplished.

On the other hand, the specialized counterintelligence mission and operations tend to obscure CIC's awareness of belonging to a specific military tactical unit. Mr. Crowell said he felt that much of CIC's troubles in North Africa stemmed from a failure by CIC personnel to recognize that they were, after all, an integral part of the Army establishment. By the time of the Southern France campaign, this basic fact had been instilled in the minds of all 307th CIC personnel.

CIC's operations in Southern France ran more smoothly than in previous campaigns as a result of the better understanding established between the various tactical commanders and the 307th CIC Detachment. [82]

82 Interview with C. Kenneth Crowell, Chicago, Illinois, at the NCICA Convention, Hotel Waldorf-Astoria, New York, N.Y., 6 Aug 55; and interview with Victor de Guinzbourg, Brooklyn, N.Y., at Room 620, Library Building, United Nations, New York, N.Y. 8 Aug 55.

Chapter 4

The First Weeks in Alsace

Now in Alsace, Seventh Army CIC Agents faced the early weeks of December with strong, but mixed, emotions.

Tri-colored French flags fluttering an overhead welcome were of the past; for combat troops were entering an area where most of the population spoke German and a high percentage might be expected to harbor pro-Nazi sentiments. The result was a genuine feeling of extreme uneasiness. [83]

But counter to this wariness came the exhilaration of near victory. CIC agents saw signs which indicated to them that the war was all but over. During November, Seventh Army alone had captured over 23,500 German soldiers, [84] and early December seemed to be bringing no modulation of this figure. Similarly, it was well known that Schutz Staffeln troops were slipping into Switzerland by a variety of means limited only by their imaginations and abilities. [85] And then the Japanese government had ordered Domei, its government-controlled news bureau, to be moved from Berlin to Switzerland. On a smaller scale, one case of defection seemed to CIC as representative of the entire German attitude: the Mayor and Party leaders of Weil am Rein (Rhine) one night requisitioned automobiles, surreptitiously packed their chattel, and, according to a Sixth Army Group report, "went." A leaderless population was left, huddled in discouraged expectation of immediate capture by the Allies.

One new division, the 12th Armored, was added to the Seventh Army in early December. The commanding officer of the 512th CIC Detachment was 1st Lt. Francis B. Criqui.

Early in December, Seventh Army CIC Agents faced a change of emphasis in their work: counter-sabotage efforts suddenly took on a new importance.

During the most of the German occupation of Alsace, described by CIC interrogators as "a laborer . . . stupid, easily led, and the only villager the Nazis could influence," was a member of the Nazi Party in But his status was to change suddenly. In mid June 1944 one Mayor of a near-by hamlet, informed that he was "politically unstable" and that he was shortly to be dropped from the Nazi Party. a choice of two alternatives: he could present himself to a local concentration camp; or, he could receive 10,000 francs for a simple mission and maintain his freedom in the process. chose the latter.

introduced to a German "lieutenant" named gave 10,000 francs on the spot, and gave him also 16 pieces of explosive coal,[86] "in large lumps consisting of a plastic explosive coated with black lacquer, and a camouflaged detonator inserted into the explosive."[87] task was suited to his abilities; he was simply to await the arrival of the Americans, and then place explosive lumps into whatever coal piles along the railroad seemed to be used for stroking locomotives.

With arrival of the Americans a half year later, however, came the rumor that had been apprehended. now feeling himself free of pressures from his former employer, turned himself in to the French Forces of the Interior. On 4 December French Forces of the Interior presented him to XV Corps CIC, who turned him over to Seventh Army CIC.

admitted having been given the money, but maintained that he had passed it to his fiancee. Surprisingly enough, CIC agents located her and the money, totally unspent. They decided that she had no knowledge of its tainted source. Interrogation was conducted by Capt Marion E. Porter and Special Agent Wells Chamberlin, both of the 307th CIC Detachment. After interrogation, was turned over to the Bureaux Securite Militaire Territoriale for trial.[88]

arrest was the first of many. Securite Militaire Agents with the 2d French Armored Division in Strasbourg apprehended the pseudo-lieutenant who had briefed admitted under interrogation that he was in charge of this entire project to sabotage locomotives throughout the Allied holdings

in France. He was authorized to recruit agents by himself. He hinted that the number of saboteurs whom he had signed was large.

Two of them were Monsieur and Madame Mme apprehended because of her Nazi affiliations, admitted to CIC agents that she knew of her husband's having received explosive coal and 10,000 francs. She had thrown the coal (but not the money) in a water-filled bomb crater. CIC located the money under a wardrobe and turned her over to the Bureaux Securite Militaire Territoriale for trial. Several kilometers away her husband was apprehended trying to escape through a CIC roadblock.

a railroad foreman, confessed that he had received forty pieces of coal during a latter part of October 1944. Seventh Army CIC recovered twenty-eight pieces--the rest mysteriously described as "believed to be at the bottom of a well."[89]

The most tragic case was possibly that of a fifty-eight year-old Alsatian who had once received the But he had become a Nazi Party member, then a Gestapo informer against his own employer. Apparently the Nazis turned against him, and took two eight-lump boxes of coal to escape punishment.

By mid December Seventh Army CIC had broken the back of ring. Eight potential saboteurs were under arrest, and forty-four blocks of coal had been impounded. None of the coal had found its way into a boiler; Seventh Army offers two reasons for the saboteurs' failures: "either fear or lack of information from their recruiter."[90]

There was one other sabotage effort discovered during early December. On the second of the month a 31 year-old Alsatian, was arrested by agents of the 3d CIC Detachment as a deserter from the German Army. Interrogations by Capt Walter Greene, Commanding Officer of the 3d CIC Detachment, disclosed one of the greatest potential hazards that Seventh Army CIC had yet been called upon to counter. For described three mammoth time bombs, in all containing 1,100 pounds of explosives, which had been placed about St. Die by the retreating Germans. They were set to explode shortly. Corps Engineers were rushed to the spots named; the charges were located and neutralized.

90 Seventh Army G2 History of Operations In Europe, Part V, December, L-1136, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

Schuler sincerely believed that these were but three of thousands of such charges--which were placed at key spots throughout France. Agents were then being recruited by the Abwehr to penetrate Allied areas and detonate them.

Captain Greene recognized the threat of such a plan. The Germans had managed to overcome four of the difficulties usually present in sabotage attempts: large amounts of high explosives could be employed, since the saboteur did not carry the charges about on his person; the bombs could be placed safely by sabotage experts; although the time clock (which apparently was to be left, but unstarted, with the charges) was somewhat cumbersome, it was a dependable piece of equipment, and, once planted, would not be subject to the vicissitudes of flimsier mechanisms; and, the saboteur had no need to carry any sort of incriminating matter about--he was identifiable only at the exact moment that he started the clock.[91]

Seventh Army grimly concluded: "This type of sabotage by post-occupational agents is expected to increase."[92]

Though much CIC effort during early December was diverted into counter-sabotage work, counter-espionage remained the most time-consuming single task. It is now apparent that the espionage agents sent east into Seventh Army territory in early December were entrusted with a most important assignment: they were discovered operating in the very spots hit by the German attack of late December.[93] "We can still lose this war," [94] wrote none other than the generally optimistic General George S. Patton shortly after the German winter offensive had reached its peak; but the counter-espionage efforts of Seventh Army CIC were one of the factors in limiting the success of this powerful drive.

In all, Seventh Army CIC captured twenty-one espionage agents during the month--the last real flurry of the Germans. This section, however, will treat only those apprehended before 15 December.[95]

95 See Appendix 4 for chart showing expionage and sabotage agents captured by Seventh Army CIC between August 15 and Dec 31, 1944.

When the French Second Armored Division moved into Strasbourg one was suspected and denounced by a loyal Frenchman who heard him say that he had lived in town for several months prior to the Allied arrival. In point of fact, had arrived with the troops--but from the opposite direction. On 2 December, s case still pending, he was turned over to the 3d CIC Detachment. Their interrogation disclosed that suspected to be a member of the Sicherheitsdienst (SD) and SRA (German Information Service), had been assigned a long-range espionage mission. In theory he was to: install an information service in and about Paris; create a chain of agents from the German frontier to Paris; install receiving and transmitting sets; and recruiting radio operators and have them placed in Allied military installations. On 5 December was turned over to Seventh Army.[96]

Seventh Army reports present a quite different picture of the case. now admitted that he was an agent optimistically intended to establish a net in and around Paris, but presented a new picture of the remainder of his mission, maintaining that his was to: prepare a place suitable for parachute drops of agents and equipment; infiltrate Parti Populaire Francaise radio technicians into Allied installations; and obtain from a French engineer microfilmed plans for an anti-aircraft gun which could quickly be manufactured in Germany.

In any event, was turned over to Special Counter Intelligence.

On 1 December a Swiss national, whose last name was probably but had been and the familiar stand-by, was arrested by French Forces of the Interior following a denunciation by his neighbors. A check of Seventh Army les quickly disclosed that was very much wanted, in connection with the espionage ring discovered in Dijon.

A man of good family, had been a professional in espionage work since 1938, at which time he was employed by the French. Six times he had been sent into Germany, returning with valuable air, naval, and industrial intelligence information. In 1939 he switched to the Polish espionage service, a mistake because he was arrested in January of the following year. His German captors convinced him to become a Gestapo "interpreter." Shortly thereafter was inducted into the German Army, but in 1944 he managed to return to his chosen vocation, having himself assigned command of an Abwehr field office. He sent a number of agents into Seventh Army territory, and himself screened and interrogated a number of Allied agents.

---

96 3d CIC Det, Monthly Information Rept (December), dtd 31 Dec 1944, (confidential) (Departmental Records Branch, AGO, Alexandria, Va.).

maintained that he had come to Strasbourg only to visit his wife, and then to reclaim some personal belongings which included 700,000 francs. 2d Lt George Perper of the 307th CIC Detachment, who discovered identity and then carried through the profitable interrogation, suggested that he be turned over to Securite Militaire, which he was.

One of the most valuable arrestees was captured in Selestat by G Company, 143d Infantry Regiment "while intoxicated and trying to entice unwilling soldiers."[97] Her radio transmitter was produced; her confession followed. For herself, she was but a single low-grade agent who was to establish her transmitter and send back local tactical information. But she had had contacts of various sorts with a number of other agents, and through her easy confession, CIC was able to initiate a string of important arrests.

First caught was her comrade Following a hint unwillingly dropped by G Company arrested this man as he attempted to enter Allied lines. Recruited at the famous Cafe Trocadero in Strasbourg, this man had been carefully trained in espionage and radio transmitting at Freibourg. By the nature of his training, had contacts with a large number of other agents, all of whom he described fully to his interrogators.

Both voluntarily offered information on a 29 year-old Frenchman for whom the Germans held high hope. By now a veteran, this man had joined the Abwehr in 1942 and had been sent into the Pyrenees to establish a messenger system between France and Spain. Next he went to Calais, in an unsuccessful effort to find cover employment there with a construction firm. Prior to the Allied invasion, had been selected for a mission to Bologne-sur-Mer, which was cancelled after the landings. Along with his practical experience, had been given extensive schooling in espionage--with special attention paid to radio transmission and repair, cryptography, and secret writing. He was located in Strasbourg and arrested.

By early December, Seventh Army CIC Agents realized that German Intelligence was throwing the heavy artillery of their espionage services into the American positions. Other arrests corroborated this belief.

was another example of a professional agent being employed on a short-range mission by the Abwehr. He was arrested at a CIC roadblock while attempting to give tactical information to American soldiers there. Under interrogation he admitted to five years' espionage experience in Belgium, Strasbourg, Paris, Arras, Senlis, Dworpp, Applecdorn, and Deventer. Eventually he admitted also that

97 Seventh Army Semi-Monthly CI Rept No. 7, 15 December 1944, (Unclassified), L-1136, (Departmental Records Branch, AGO, Alexandria, Va.).

he had caused the death of a pair of English aviators. He said little of his present mission; however, CIC interrogators found a Belgian identity card in his shoes and 100,000 francs (most of which was in new bills in series) in his wallet. He suggested that CIC was fortunate to have located a man with his talent and experience, and offered, if they would give him a radio transmitter, to return to Germany on an espionage mission. He was held for further interrogation.[98]

Many important cases turned out favorably for CIC because of the close liaison that they had painstakingly developed with French authorities and other American units. In early December, Seventh Army concluded that liaison was "excellent in all areas"[99] and, for example, pointed to the daily conferences which were then being held in Strasbourg, and which were attended by representatives of CIC, Securite Militaire, Bureaux Securite Militaire Territoriale, French Forces of the Interior, the Gendarmerie, Civil Affairs, and 3d Division. The meetings were presided over by Lieutenant Colonel Carre, apparently a Frenchman, who was Secretary General of Police for Bas-Rhin and Haut-Rhin (Lower and Upper Rhine).

Possibly the single greatest obstacle to good relations with both French civilians and French officials was the presence of anti-American rumors. CIC agents diligently tracked back such rumors as might upset the rapport. One such was the report picked up and publicized by a war correspondent that the Germans had recaptured a town and promptly arrested several hundred civilians who had dared previously to welcome American soldiers. CIC discovered that there was no factual basis for this rumor, and attempted to propagate such findings.[100]

Sixth Army Group reported two more rumors, equally untrue: that the city of Nice was bombed by the Germans; and that French women were violently mistreated by troops of "some other" unit. The same report concluded that "a careful check indicates that some people are starting the above mentioned rumors for ulterior purposes."[101]

---

98 These cases are all taken from L-1136, Semi-Monthly Counterintelligence Rept. No. 7; Checked against shorter accounts in L-375, Sixth Army Group Fortnightly Rept. No. 6.

99 Sixth Army Group Fortnightly CI Rept No. 6, for the period from 1 Dec-15 Dec 1944, dtd 25 Dec 1944, extracted from L-375, Sixth Army Group records, 1-31 December 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

100 Seventh Army Semi-Monthly CI Report No. 7, 15 December 1944, L-1136, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

101 Sixth Army Group Fortnightly Counterintelligence Report No. 6, for the period from 1 December-15 December 1944, dtd 25 December 1944, extracted from L-375 Sixth Army Group records 1-31 Dec 1944, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

The report suggested two possible types of action: have local newspapers attempt to bring about better feeling toward American soldiers, and thus make the population less receptive to such reports; and maintain close liaison with the incoming Delta Base Section CIC Detachment to inform them of the dangers inherent in the situation.

Despite extreme Germanization of Alsace, CIC found remarkably scant evidence of any genuine subversive activity in the region. VI Corps did find, however, among the mail impounded at Schirmect, a letter containing strong hints of an assassination group organized to exterminate leading French and Communist officials. It was also reported that the rapidity of the Allied rush through Alsace had cut off the flight of an assortment of former Nazi officials. Several hundred town officials, policemen, and ex-soldiers now in civilian clothes were nabbed at CIC roadblocks.

At first American combat forces had little confidence in the strange type of Frenchman who inhabited Alsace. Seventh Army reported "a few isolated instances of misconduct. . . especially where sniping was prevalent." It now seems that these Germanized civilians were mistrusted much as had been the Normans during the early days after the landings of a half year back. In either case the initial reaction of the troops, faced with a people new to them, was doubt.

Seventh Army reported, however, that the relationship was becoming more cordial, and that the Alsatians were winning themselves the reputation of being a clean and honest people.

Military security attentions brought forth all the usual problems plus a few new considerations.

A captured enemy map indicated that the Germans were not yet aware of the arrival of a division which had been on line for nearly a week. On the other hand, units which had been on the front for a longer period were neatly pin-pointed.

Seventh Army established a line of communications' command, and dispatched four Agents back with the overall purpose of protecting supply dumps.

American soldiers, liberated from Prisoner of War camps, reported that German interrogators seemed to indicate a strong interest in sabotage--particularly of Allied pipe lines. All reported being asked the questions, "Do you have a gasoline pipe line from the south? Where is it?" 102

---

102 Seventh Army Semi-monthly Counterintelligence Report No. 7, 15 December 1944, L-1136, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

Agents of the 100th CIC Detachment were called upon to investigate the case of a [illegible] Company. CIC discovered that on 3 December 1944 Company "A" (120 men [illegible]) of the 398th Infantry Regiment entered the town of Wingen for the night. They lived in several houses--all quite close together. Investigation disclosed that: their arrival and placement was noted by some German soldiers nearby; the owner of the largest house occupied by the troops ran straight to the Germans with detailed information concerning the locations of the billets; and there were insufficient guards posted. All of this resulted in the capture of the entire Company by a mere fifteen enemy soldiers.

The informer was arrested; interrogation showed him to be an ardent Nazi. One [illegible] was held on suspicion; he was unable to account for his movements during the time of the company's capture.[103]

Chapter 5

Delta Base Command

As the French First and American Seventh Armies ground northward during the fall of 1944, and then swung toward the east during that winter, large areas of Southern and Western France were left vacated. Division, Corps, and eventually Army teams moved forward with the front; special teams were soon needed to fill the ever-growing rearward areas. The 427th CIC Detachment, named the Delta Base Section (DBS) CIC Detachment, was the first such unit to follow combat CIC Detachments into Southern France.

Planners at SHAEF had anticipated this need:

> "It was arranged that a special Counter Intelligence Detachment should be set up in Marseille for the purpose of supervising travel control personnel at ports and airports in Southern France and on the Franco-Spanish border... Personnel for this Detachment were to be furnished by Allied Force Headquarters and later transferred to SHAEF control. It was further arranged that Counter Intelligence personnel would be sent in by Allied Force Headquarters... and that a specially trained Counter Intelligence Corps Detachment would be sent in to cover the Franco-Spanish frontier."[104]

427th CIC Detachment Ordered to Delta Base Section

On 1 October 1944, Delta Base Section requested the 427th CIC Detachment, and orders relieving it from attachment to Northern Base Section (Corsica) were issued on 17 October 1944. Almost immediately, however, the first of many administrative difficulties struck the unit: "The orders did not include authority for travel from Northern Base Section to Delta Base Section (Marseille) and G3, Northern Base Section, would not approve shipment of the Detachment."

The nucleus of the Detachment, therefore, remained at Northern Base Section for several weeks after the transfer was to have been effected.

Major Clarence Read, Commanding Officer of the 427th, managed to get himself and three agents across the Ligurian Sea and into Marseilles. While officially on only temporary duty there, they established the new CIC Headquarters at the Delta Base Section.

---

2390

CONFIDENTIAL

Additional personnel came from various sources. Both the 428th and the 42[illegible] CIC Detachments sent agents to Major Read's 427th. Included in this transfer, however, were one officer and six agents already earmarked for Port Security work, and four officers and eleven agents who, although attached to the 427th for administrative purposes, were ordered to operate in Southern France as the "Pyrenees Travel Control Detachment," under operational control of G-2, AFHQ. Nine additional agents of the 427th CIC Detachment were not present for duty. They had been attached to Basler units during the relatively calm days when the 427th was in Corsica, and, though scheduled to rejoin their basic unit, had not yet done so.

In all, nine officers and forty enlisted men were assigned the 427th CIC Detachment. By 1 November 1944, however, only eight officers and twenty-three enlisted men were in France. And of this number fifteen men were assigned to sub-Detachment "A" in the Pyrenees, three were with the Administrative Section, seven with the Port Security Section, and three with the Airport Travel Control Section. The section that was intended to perform the bulk of CIC work in Southern France, the Investigative Section, was left only four agents.

Investigative Section Faces Many Tasks

These four agents of the Investigative Section were faced with tasks impossible for a group of their limited size to accomplish. Some 1,200 Italian Prisoners of War were slated for repatriation, and CIC had been ordered to screen these men before their withdrawal. The prisoners, having been together but a few days, were yet unacquainted with each other, and it was therefore decided that for the time being a preliminary screening would be sufficient. A recommendation that the investigation be continued upon arrival of the prisoners in Italy was forwarded along with them.

Secondly, reports indicated an appreciable amount of espionage taking place in Lyon, Nice, and Cannes, and possibly in Grenoble. Many important investigations had to be classified "pending" until investigators destined for duty in these areas had arrived from North Africa and Corsica.

Thirdly, there were several cases of espionage in the area of Marseilles which were investigated, but at only half speed. During October, eleven espionage cases were opened and only one case was closed. French Securite Militaire had found a Strategic Service Section rubber stamp (German), United States gasoline, and Army clothing in a Marseilles hotel room. CIC investigation revealed the occupant of the room to have been a careless agent of the German Schutz Staffeln.

Among the pending espionage cases were several that indicate crucial work was being left undone because of the personnel shortages. For an example: "Case [illegible]: Subject volunteered information that he was assigned by a special office in the French Forces of the Interior headquarters to obtain information on the movement of the United States troops and equipment through the Port of Marseille, but that

he was not carrying out his assignment. An effort is being made to determine whether or not there is such an office in the French Forces of the Interior." Or, "A-1-9: British Consul, et al., Surveillance of--A surveillance, at the request of the Special Counter Intelligence, is being conducted upon three individuals suspected of espionage."

During October no sabotage or attempted sabotage was reported against installations being protected by the Investigative Section of the Delta Base Detachment. However, this Section was unable to make the security surveys which could well prevent future disturbances.

Port Control work was progressing at a better rate, since the Port Control Section was working with a full staff. During October, Marseilles, Toulon, and Port-du-Bouck were all open for shipping, with Marseilles gradually assuming the entire load of Allied shipping as the installations there were cleared and repaired. The Marseilles Port Security team kept up the system of regulations as left there by the departing Seventh Army team. In addition, they increased the scope of the pass system. Personnel security remained the stiffest problem for there were far from enough guards available. Secondly, virtually unwatched German Prisoners of War were used as stevedores. There was the additional problem of liaison bottlenecks between French and American officials. Agents of the 427th reported that accounts of potential cases often reached them much too slowly to have any worthwhile action taken.

Much Sabotage In Marseilles

Although there was no sabotage reported in either Toulon or Port-du-Bouck, there were many cases in Marseilles, CIC in Naples was informed that on a 12-ton truck loaded there, and unloaded in Marseilles, a detonating cap was found placed in the ammunition box, and wired into the ignition system. In another case, at Lenz Beach, Marseilles, three sticks of dynamite were found under a Command Post. There a French truck burst into flame in the SS Goodyear's hold, and, on the same day, pieces of steel were found to have been dropped into the winch gears of the ship. Pier N of Marseilles was thrown into darkness one October night; investigation disclosed sugar in the motor of the pier's generator. A twelve-inch bomb fuse was discovered under a car of an ammunition train in the Marseilles yards. It was assumed that the fuse had tumbled from a box broken open in transit. In the same yards was discovered the lethal gear intended for a British barrage ballon, instead attached to the coupling of a box car. No arrests were made in any of these cases.[105]

105 Headquarters, 427th CIC Detachment, Delta Base Section, Subject: CIC Information Summary for October 1944, To: AC of S, G2, Delta Base Section, [illegible] ber 1944, (Confidential), (Departmental Records Branch, AGO), Alexandria, Va.

Screen Incoming Sailors

In all three ports incoming sailors were closely checked. CIC advised the War Shipping Administration and all Ship Masters that only 25 percent of a ship's complement were to be allowed ashore each day.

During December, the Port Security Section at Marseilles issued 6,850 merchant seaman passes, interrogated 15 persons desirous of signing on Allied vessels and, in conjunction with French port authorities, cleared 1,501 civilian passengers for ships leaving Marseilles.

CIC's Duties Mostly Routine

For the remainder of CIC's operation with the Delta Base Section, investigative activities were mostly routine. The detachment, in conjunction with the State Department, was given the mission of screening 806 Allied civilians returning to their native countries from Germany in a repatriation program. In January, the apprehension of five enemy parachutists near Gignac resulted in a tightening of CIC's road block network. Aside from these two operations, much time was given to conferences with local French authorities in an effort to establish mutual security policies. 106

The Case Of The Mysterious Major

The 427th CIC Detachment did develop one investigation that served to break the routine of normal duties. In March, a Military Police incident report which was passed to CIC revealed that a French girl had claimed to recognize in a Marseilles cafe a former Gestapo officer in the uniform of a Major in the Russian Army. The girl had stated that while she had been imprisoned in Munich in February 1943, this officer had beaten her and forced her to undress in front of him. The Military Police had made a check of the papers of the Russian Major and verified his identity.

Realizing that papers were easily forged, CIC Agents called on the Russian Headquarters in Marseilles. Once again the Major seemed perfectly authentic. Records indicated that during most of the war he had been a German prisoner. The Nazis had freed him at the time of the Allied landings in Southern France

Two weeks afterward, the Major presented himself at the CIC offices in Marseilles, demanding to know why he had been investigated by the Americans. The major claimed that CIC had told his superiors that he had been seen in Marseilles riding in a car with

106 History of the Delta Base Section, Volume II, Part I (ADM 950 A) (Departmental Records Branch, AGO, Alexandria, Va.).

a German agent. The Russian requested an official letter exonerating him of such an action. This, he was told, would take some time, but could be accomplished. In the meantime, the Russian was invited by an officer from the G2 Section for a drink at a hotel cocktail lounge in Marseilles. The American officer had orders to socialize with the Russian until further notice.

Meanwhile, a CIC agent hunted up the girl who had made the original accusations and asked her to accompany him to the cocktail lounge. Again the girl, out of view of the Major, identified him as the man who had beaten her. Considering the extremely short stature and unusual facial characteristics of the Russian, it seemed improbable that the girl could be mistaken. Nevertheless, to be more certain, the agent asked her if she could remember any particular scars which might definitely establish the Major as the former Gestapo man. The girl thought for a minute and then recalled a circular scar on the left wrist which she had noticed when he rolled up his sleeves.

Later in the G2 office, the agents told the Russian that it would be impossible to give him the letter he desired unless there was not the slightest possibility that he was the man they sought. The Russian was asked to remove his shirt. On his left wrist was a circular scar.

For all their investigation, CIC had not, however, established the reliability of the French girl who had brought the matter up in the first place. There was still the possibility that the accused was a bonafide Russian Major who had somehow become a target of revenge. The Major was given an extremely non-committal letter and sent on his way.

Informants in Nimes, where the Major's unit was located, were contacted and asked to make discreet inquiries into his activities during the occupation. The reports from Nimes indicated that the Russian had indeed had some connection with the Gestapo although the exact nature of his activities could not be obtained without "blowing" the investigation. Meanwhile an informant in Marseilles, who was thoroughly acquainted with Russian affairs and had many contacts equally well-informed, was asked to learn the identity of Russian officers who might have worked with the Nazis during the occupation. No specific names were mentioned to the informant.

He returned the next day with the information that the Major and two other Russian officers who were still in Southern France had been nominal prisoners of war, granted by the Nazis free circulation, German uniforms, arms and plenty of money - all for purposes unknown. The Major had been in Marseilles since the Spring of 1944.

Since CIC had established that he was definitely a Russian citizen, any further investigation of the Major was the jurisdiction of Russian authorities. It was decided to take the information to the Colonel commanding the Major's unit. Before doing so, however, CIC checked into the background of the Colonel on the possibility that he too

CONFIDENTIAL

might have been a "Prisoner of War." When the Colonel checked out satisfactorily, CIC drew up a carefully worded report for his personal consideration. All information, except the names of CIC informants, was included.

The Colonel was greatly interested in the report. He stated that he was aware that three of his officers had collaborated with the Germans, but their excellent work for the Allies since the Southern France landings was considered to more than off-set their previous transgressions. However, it was evident that the report contained details which were new to the Colonel. Without authority to take action on his own, the Colonel transmitted the report to Russian Headquarters in Paris.

So there developed an unusual situation. The final action on the findings of a CIC investigation was left in the hands of Russian authorities. [107]

The Pyrenees Border: A Distressing Situation

Five weeks before the Pyrenees Border Control Detachment was to be established in France, Special Agent Victor de Guinzbourg of the 307th CIC Detachment was sent into this region to seek information on the situation there. Agent de Guinzbourg reported that there seemed to be no communication between local Pyrenees military and civil authorities and the policy making agencies in Marseilles and Paris. For example, the last instructions to local authorities consisting of orders that the border was to be closed, had arrived on 10 August, five days before the landings in Southern France. During the four week period since then no further instructions had been received. Now, though there had been no orders to open the border, a train-load of food was scheduled to come through from Spain.

Agent de Guinzbourg reported some serious situations along the mountains which merited future investigation. Captain Riviere, of Securite Militaire, told Agent de Guinzbourg that there were three parachutists, French, British, and American Captains, who were gathering information for "Allied General Headquarters." Though this trip was accepted at face value by the local French, no one knew anything of the past of the three. Agent de Guinzbourg presented this as an instance which demonstrated how simply power and authority could be assumed in this area where one regime was crumbling, but no other had yet been built to replace it.

2395

CONFIDENTIAL

Agent de Guinzbourg also noted that numerous Spanish Republican troops were hiding in France, posing as loyal members of the French Forces of the Interior or, more commonly, the Communist Franc-Tireurs et Partisans Francais. They awaited only the German withdrawal before they were to return to fight against Franco. Their compatriots within Spain, often Communists or Anarchists, had great strength near the border. Several armed clashes had occurred already between these Spaniards and soldiers sent up by Franco to dislodge them from their border positions. The Royalists often retreated to shelter in France, and, until the French government would send troops south to dislodge them, it was assumed that they would continue their raids from France into Spain.

As for the border itself, it was all but unguarded. Colonel Baggio, Chief of the local Gendarmerie, was in a position to assume leadership of the border patrol work, but seemed unwilling to undertake the responsibility. At each end of the border there was a small French Naval Detachment standing by, able to take whatever action was ordered them, but they had as yet been given neither permission nor instructions to operate.[108]

Agents "Liberate" Toulouse

At 0845 hours, on 23 September 1944, Major Ralph Tucker led a convoy of six Class-B[109] jeeps and three civilian cars out of Marseilles toward Toulouse, France, 200 miles away. Major Tucker later wrote back that the trip went smoothly "except that it was found that all bridges leading westward across the Rhone were destroyed." Fifty miles upstream was discovered a ferry, which was to be put to frequent use by CIC during the next few months, although it could handle no vehicle larger than two and one half tons.

Once in Toulouse, "our reception was overwhelming." The few Americans (Office of Strategic Service operators, grounded aviators, etc.) who had previously been in the area seemed to have made a good impression, and, except for the handful of super-patriots who seemed to think that French Forces of the Interior had won the war single-handedly, the Frenchmen concentrated all of their goodwill toward the American liberators upon this eleven-man crew. These people had been kept in all but total ignorance throughout the sway of the Petain regime. Even Resistance leaders were ignorant of the fact that Anglo-Americans had to fight their way through French North Africa in 1942.

Rather optimistically, Major Tucker mailed back his intended address and telephone number. The Communist Franc-Tireur et Partisans Francais refused to vacate this house, though ordered to do so by the French government, and CIC was forced to look

108 307th CIC Detachment, Headquarters, Seventh Army, Summary of Information, 8 September 1944, /s/ Victor S. de Guinzbourg, Special Agent, (Confidential), (Kansas City Records Center, Box 25102).

109 Presumably reconditioned.

elsewhere. As for telephone service, no contact could be made with Spain more than a few kilometers from Toulouse. Realizing that he would have to depend upon his own resources for communication, Major Tucker established an elaborate courier system between the four points on the border where CIC Agents would be located and Toulouse Headquarters, and between Toulouse and Marseille. He reported that, jeeps willing, the problem was solved.

During these first few days, the Pyrenees Border Control Detachment was still part of Mediterranean Base Section (MBS) CIC -- still Sub-Detachment "A" of the 428th CIC Detachment; the 427th was not to be formed until 17 October. In the meantime, this 15-man crew was hard at work.[110]

Who's Our Boss?

The Counterintelligence Corps Operational History of Theaters records that the Pyrenees Border Control Detachment (sub-Detachment "A" of the 427th CIC Detachment) "had been preparing over a period of nearly two years for this particular assignment."[111] It was unfortunate that the administrative details of this operation were not similarly well prepared. Members were unsure of their position. The Commander wrote: "The exact status of this Detachment is extremely doubtful at present . . . . Although the Detachment is by verbal order attached to G2 (CI) SHAEF for duty, no written orders have been received, and even our exact title is unknown." Nor, apparently, was more immediate control yet determined. "No order has been received attaching us to Delta Base Section for supply and administration only."

Such problems might have been overcome had the Detachment been well manned and equipped at the outset of its operations. Lieutenant Colonel Stepanovich, G2 (CI), AFHQ, apparently had promised a minimum of five officers and fifteen enlisted men. Inventory revealed, however, a strength of four and eleven. Although the enlisted men were allowed maintenance on a per diem status, the officers were refused such an arrangement. Their expenses, for the time being, were being covered through confidential funds. Understandably, more such funds were requested: "Good use can be made of an allotment of $500 to $1000 per month for hire of confidential informants in particular. This figure is not excessive considering previous lavish payments by the Office of Strategic Services."

Supply was equally a problem. 427th Headquarters at Marseille was 300-odd miles away, and then reached only after entrusting one's fate to the "ricketty ferry" over the Rhone at Arles. This distance made hospitalization and even routine medical attention out of the question. It also made obtaining food, gasoline, PX supplies, and pay a dubious matter.

110 428th CIC Det, AFHQ, Sub-Detachment "A"; Progress Report dated 1 Oct 1944, (Secret), (Staff and Faculty Library.).

111 CIC Operational History of Theaters, Chapter titled "Southern France." p.234, (Unclassified), (Staff and Faculty Library.).

Had the vehicles of Detachment "A" been up to par, the supply problem would have been eased, but to operate in the mountainous area Major Tucker reported that he had only "six once-reconditioned and superannuated jeeps and three civilian cars, model '36, '37, and '38." He hoped to obtain other vehicles through the French Forces of the Interior.

Relations with the French posed a problem: "Our authority (or even our right to exist in this region) has never been formally established with the French. On higher levels, this has resulted in some difficulty in dealing with French officials, but at the lower echelons cooperation is still excellent." Cooperation might have yet been improved further had the Americans been able to explain why they were stationed in the area. Major Tucker reported, however, "No definite directive has been received as to our duties from either AFHQ or SHAEF. Meanwhile we are attempting to do a job varying from border 'control' to border surveillance, to general counterintelligence in the border region. More specific orders from G2 (CI) SHAEF would be helpful."[112]

More Than Border Watching

Though charged, in theory, with few of the usual Counterintelligence missions--such work was to be left to the French Securite Militaire--the Pyrenees Border Control Detachment almost immediately undertook numerous investigations over and above routine border watching.

On 1 October 1944, Major Tucker wrote back that the Communist dominated Franc Tireur et Partisans Francais was the best armed and disciplined of the various pressure groups grappling for political control, and accordingly had assumed undue power. As previously stated, the Franc-Tireur et Partisans Francais in Toulouse was sufficiently powerful and obstinate to hang on to a house requisitioned by the French for CIC. Local residents were unwilling to admit to Major Tucker that the Franc-Tireur et Partisans Francais and even the French Forces of the Interior were composed of men whose ambition was to overthrow Franco. Local newspapers, however, often discussed this prospect openly.

Relative to the area, CIC reported:

"The spirit of the population in this area is excellent"; and, "Apparently all German forces have been wiped out or captured or left the area (from the Pyrenees to Bordeaux)."

---

112 427th CIC Detachment (Pyrenees Border Control), Allied Forces Headquarters, Subject: monthly CIC Situation Summary for October 1944, To: AC of S G2 (CI) AFHQ; Chief, CIC, AFHQ; AC of S, G2 (CI), SHAEF, 1 Nov 1944, (Secret), (Departmental Records Branch, AGO, Alexandria, Va.).

Major Tucker reported that the communication problem was unsolved. There was neither telephone contact between Toulouse and Marseilles, nor indication of any for the near future. Because it was impossible for Major Tucker in his Toulouse Headquarters to contact his men directly, he asked for six radio sets.

Major Tucker asked also that a directive be issued jointly by French and American authorities outlining the powers of his American group, which, placed as it was in an area of French jurisdiction, had at the time no official authority. Lastly, he suggested that a battalion of American or British troops would give authority and backing to his future pronouncements. [113]

CIC Reports Nazi "Pocket"

On 6 October 1944 Major Tucker sent back to Marseilles a Top Secret, Immediate Action report on the status of German troops in the Bordeaux area. There seemed to be more German activity there than he had at first realized.

Reports had been received that an estimated 50,000 German troops were distributed in three pockets in the Bordeaux region. Specifically, there were 30,000 at La Rochelle, about 13,000 at Royal, and 7,000 at Le Verdon. Though these soldiers had come from many units, and had lost their original organization, they seemed to be united now by a proud "come and get me" spirit. They considered themselves the best of soldiers, and were eagerly awaiting any chance to further demonstrate this ability. They had artillery enough to give them some offensive potential and sufficient supplies to withstand at least a six months' siege. Occupying large agricultural areas, they held over 11,000 head of cattle.

Resistance to this group was hardly effective. The Franc-Tireur et Partisans Francais, apparently, was the best organized and armed group, but it was contenting itself with staying in the rear and waging vigorous propaganda appeals for its particular causes--all quite openly Communistic. The French Forces of the Interior, less well armed and organized, was left to carry on what little fighting there was.

Colonel Durand, commander of the local French troops, suggested that a group of Senegalese and Moroccan troops, already serving under him, be armed and marched into the combat. There were many French renegades among the Germans, and the Colonel thought it to be in bad taste to have Frenchmen fighting Frenchmen.

113 Detachment "A", 428th CIC Detachment, AFHQ, Subject: General Conditions in Southern France and Pyrenees Border Area, To: AC of S, G2 (CI), AFHQ; CO, Forward Counterintelligence (Marseille); Chief, CIC, AFHQ; 1 Oct 1944, /s/ R. W. Tucker, Major, Commanding, (Confidential), (Kansas City Records Center, Box 25102.).

For his part, Major Tucker supported Colonel Durand's suggestion. He asked, in addition, permission to dispatch an agent to Bordeaux.

As a final suggestion, Major Tucker asked that "since people in Southern France, where Allied troops never reached, are still in a daze, still suffering from an overdose of distorted truth. . . . they are very receptive to any form of news and information regardless of its veracity." The Franc-Tireur et Partisans Francais was fast exploiting just this situation by spreading the rumor that it had been the chief force in the liberation of France. Major Tucker asked that the Psychological Warfare Branch rush representatives armed with magazines, movies, and radio scripts into Southern France.[114]

Liaison Developed With U.S. Embassy in Madrid

Late in September one of the agents of the Detachment by chance met a representative of the U.S. Embassy in Madrid who was greatly impressed by the work being done. When La Verne Baldwin, the Third Secretary of the U.S. Embassy in Madrid, who was in charge of counter espionage work, was informed of the presence of CIC on the Pyrenees border, he came north to Toulouse for a brief visit on 4-5 October.

Baldwin told Major Tucker of 120 trucks which the Spanish government had placed at the disposal of the Belgian Red Cross to transport food and clothing to the Belgian needy. Senora Franco, herself, had given 50,000 pesetas to this cause. The head of the Belgian Red Cross was an odd individual, a hotel owner whose political sentiments had been variously reported as anti-Nazi to arch-Collaborationist. Accompanying this convoy there were to be 210 "minor Spanish Army officials." Baldwin stated that the Embassy could not classify this convoy as "safe" from an Allied point of view.

He told also of a convoy of trucks from Switzerland, which had come into Spain loaded with manufactured goods destined for the United States. Accompanying the convoy were four or five "minor diplomats."

Mr. Baldwin offered the service of the American Embassy at Madrid to the Pyrenees Border Control Detachment. He had a substantial file on Spanish personalities against which pass applicants could be checked. His offer was accepted with enthusiasm.[115]

OSS Located

In early October Office of Strategic Services agents were located, and found to be most cooperative. Agreements were reached, and from that time there was a generous exchange of information between the two agencies.

Office of Strategic Services profited greatly from this arrangement. Special Counterintelligence, branch of OSS, sent agents into Southwest France in late October to observe and report the situation there. They relied heavily upon information given them by members of the 427th Sub-Detachment. Their report, distributed throughout the Sixth Army Group area, sounded much like a condensation of previous reports of the Pyrenees Border Control Group.[116]

Border Offices Established

The progress report for the Pyrenees Border Control Group dated 7 October 1944 was generally encouraging. Offices were being opened in areas where the Corps of Intelligence Police (CIP) had operated in 1918. By this date both the Hendaye and St Hean Pied de Port Sections had been established for a week, and the Cerbere Section had begun operations. The Bourg Madame Section, though immobilized at Perpignan because of motor trouble, was expected to commence activity shortly. There was telephone contact between Toulouse Headquarters and St. Jean Pied de Port, but the courier system remained the only certain means of reaching the other Sections.

Although the Americans had been received with almost universal enthusiasm, much trouble was expected at Hendaye. There the officer in charge of Securite Militaire was, according to Major Tucker, "well and unfavorably known to us. His anti-American, if not anti-Allied, attitude was conclusively demonstrated." The officer apparently had written that he hoped never again to see American intelligence personnel--especially agents of CIC.

The sub-detachment had managed to close the border effectively. A few American and French diplomats were allowed to cross, and some international trains carrying only merchandise and food crossed at Cerbere. The trainmen were known and vouched for by trustworthy Resistance leaders.[117]

---

116 Sixth Army Group, Fortnightly CI Rept No. 3, Dated 4 Nov 1944 and covering the period 15 Oct-1 Nov 1944. (L-375), (Confidential), (Departmental Records Branch, AGO, Alexandria, Va.).

117 Detachment "A", 428th CIC Det, AFHQ, Subj: Progress Report, 7 Oct 44, To: AC of S, G2 (CI), AFHQ; CO, Forward Counterintelligence, (Marseille); Chief, CIC, AFHQ; /s/ R.W. Tucker, Major, Commanding, (CONFIDENTIAL), (Kansas City Records Center, Bx 25102).

On 18 October, Major Tucker reported a conversation with two high-ranking American Army Officers who had just come up from Andorra, the tiny democracy near the eastern tip of the Franco-Spanish border. While in Andorra, these two officers had met General Fernandez, of the Spanish Maquis, a man who told them that 25,000 members of his organization had recently come to Spain from France, and that another 25,000 were expected shortly. At the moment, these men were presumably with the French Forces of the Interior or the Franc-Tiereur et Partisans Francais. Fernandez stated that arms were regularly smuggled from France to his organization, and, further, that undercover agents placed by him in Franco's Army had disaffected large numbers of the latter's soldiers.

Major Tucker suggested that the General's figures be reduced fifty to 90 percent, but said that there was definitely some movement into Spain of Royalist troops.[118]

On 19 October 1944, Sub- Detachment "A" of the 428th CIC Detachment officially became Sub-Detachment "A" of the 427th CIC Detachment--to be known as "The Pyrenees Border Control Detachment." There was some confusion as to whether Major Tucker was authorized to initial such a change on the pay records of his personnel.[119] There was further confusion as to whether or not this change meant that the group was now working for SHAEF, rather than AFHQ. The change to SHAEF had been expected, but apparently it was delayed until 1 November 1944 when the entire Delta Base Section CIC Detachment, as well as all detachments within the Sixth Army Group, were transferred from NATOUSA to ETOUSA.[120]

From the start of operations, the Pyrennes Border Control Group had sent most of its information directly to SHAEF. There had been a special SHAEF Radio Detachment assigned to the Headquarters at Toulouse to facilitate such direct communication.[121]

By mid November, with at least some of their administrative problems now under control, the Pyrenees Border Detachment was ready to settle into the pattern of work which they were to follow for the next six months.

Official Duties

On 21 December 1944, 2d Lt James Bradfield wrote to Major Tucker to ask for advice pertinent to his new assignment of forming a small Counterintelligence Detachment on the Swiss-Italian border. "Do you have any suggestions you care to pass on that might facilitate development of a control on the . . . frontier?" he asked.[12]

Major Tucker's reply covers a multitude of problems met in such a situation:

Lt James T O Bradfield
Headquarters CIC, AFHQ
APO 512, US Army

14 January 1945

Dear Jim:

Your secret letter of 21 December 1944 did not arrive until yesterday. We had considerable mail trouble because the title "CIC Pyrenees Travel Control Detachment" is no longer valid under ETOUSA. . . .

As to the problems we have had--they have been terrific and still are to a considerable extent unsolved --most of them have been caused by the shift from NATOUSA to ETOUSA with the resultant change in chiefs, policies, etc. This could not have been foreseen, but there are problems which our experience will help you solve. At the outset let me emphasize, insist on certain minimum terms with your G2 before you move out on your assignment. After you get on the ground in an isolated region it is infinitely more difficult to obtain action on supply and administration than before you set out. Suppose we dispose the problems under logical headings.

12. Headquarters, CIC, AFHQ, Ltr to Major Robert W. Tucker, CIC Pyrenees Travel Control Detachment, 21 December 1944, /s/ James T.O. Bradfield, (Confidential), (Kansas City Records Center, Box 20161.).

VEHICLES

Demand the maximum number of jeeps and trailers (the latter are invaluable for hauling food and supplies to outlying sections) authorized by your T/O&E, and if possible insist on new equipment . . . . Try to get additional civilian cars to the extent of 50% of your total jeeps. This will serve two purposes: first, it will allow you to keep operating when other vehicles are out of action . . . , and second, in certain cases such as hauling agents, informants, or suspects, it will reduce the amount of attention, which will be plenty, directed at your activities by the local civilian population.

PER DIEM

Your agents must have a reasonable per diem, and, if obtainable, the officers also. There will be no Army messes, and you will have to do plenty of foraging. . .

COMMUNICATIONS AND SUPPLY

When we first arrived in Toulouse in September last, we were substantially cut off from the rest of the Army and practically the rest of the world. Telephone and telegraph lines were out, railroads were not running, and our only route to Marseilles, our supply base 300 miles away, was by crossing the Rhone River by a rickety ferry (and once that was washed away by high water leaving us stranded for two weeks). I at once requested a Signal Corps Detachment to put us in touch with the outside world. This request was granted, and we have had for about three months a Signal Corps outfit (one 2d Lt and 5 non-coms) attached to us for duty using a SCR-399 radio unit. This has proved invaluable for sending and receiving "hot" reports to and from SHAEF (at Versailles) and SHAEF Southern G2 (Cp) (. . . at Marseille). However, no long[illegible] our own couriers could be used, that is to, for landing clandestine [illegible], [illegible], and off, etc., from Marseille, to Toulouse (Detachment HQ), to the border sections and vice-versa. As a practical matter, this is how we work it. First, I have insisted that each border section must have a minimum of two agents, so that

when one is serving as courier, the other will always be present at the border. . . . You can see that the timing and arrangement of this schedule is such that the minimum number of personnel and vehicles are employed in courier work at any one time. You can also visualize the nightmarish problems we have had with our six Class-B jeeps and three antiquated civilian cars. "A word to the wise is sufficient."

I trust the foregoing will be of some real help to you, and stand ready to do anything further in my power to furnish you with anything from advice up to -- but not including -- cigarettes. The latter are too hard to get. Best regards from all the old "MTCD" gang.

Sincerely,

R. W. Tucker (S)
R. W. TUCKER (T)
Major, MI. [123]

CIC continued to report on conditions along the French-Spanish border until March 1945 when Major Tucker's detachment was shifted to the French-Swiss border for several weeks. In April, the unit joined the CIC detachment at Sixth Army Group Headquarters in Heidelberg, Germany. [124]

APPENDIX 1

"Counter-Intelligence Screening By Interrogation Teams In The Aachen Area"

CONFIDENTIAL

HEADQUARTERS
MILITARY INTELLIGENCE SERVICE
EUROPEAN THEATER OF OPERATIONS
UNITED STATES ARMY

APO 887
10 March 1945

COUNTER-INTELLIGENCE SCREENING BY INTERROGATION

TEAMS IN THE AACHEN AREA

INTRODUCTION

This report was made by members of interrogation teams detailed to work with the Counter Intelligence Corps in the screening of civilians in Aachen. The suggestions made in this report are based on the activities of this personnel between the period of 1 November to 31 December 1944, during which time they "screened" approximately 11,000 people in Aachen area. Although the IPW personnel was at first handicapped by inexperience and the lack of sufficient training in counter-intelligence work, their familiarity with the German Army, people and language and their knowledge of SHAEF directives was in their favor. In view of the lack of precedent and the incompleteness of directives available for orientation on the problems to be encountered in Germany, most of the experiences were challenging to the Counter Intelligence Corps as to the interrogators.

1. In the eight week period the IPW personnel worked with the 1st Inf Div which was relieved by the VII Corps, which was in turn relieved by the XIX Corps, which was in turn relieved by the Ninth Army. Due to this constant reshuffling of CIC personnel, the experience and knowledge gained by these representatives who had had the opportunity to observe the "big picture" in Aachen from shortly after its capture up to the end of December, was of great value in orienting the relieving CIC teams.

2. It is apparent that the previous experience of Counter Intelligence Corps teams in the field have been of such a nature, that record-keeping was found to be of secondary importance. There was a carry-over of this tendency in the operations in Aachen despite the fact that Counter Intelligence Corps activities in Germany must be planned on a semi-permanent basis. The deficiency of records has in some cases acted as a limitation to the early effectiveness of a relieving CIC team.

2407

CONFIDENTIAL

3. In evaluating the suggestions included in this report, it must be remembered that the experience is not based upon a true sampling of the German population and, therefore, procedure which may have been perfectly valid and suitable for Aachen may not apply to other areas. There are at least three factors which make the Aachen experience typical.

a. The population of this area is predominatly Catholic and was therefore never wholeheartedly in favor of the Nazi Regime.

b. The individuals who remained in Aachen despite the exhortations and threats of the SS troops cannot be described as typical German citizens. High-ranking Nazis and persons holding positions in the Government fled the City fearing capture and punishment by the Allies. Concerning the individuals who did remain in Aachen, the following overlapping categories may be devised.

(1) Those who remained due to war-weariness, i.e. they remained as a consequence of inertia and a fear of leaving their homes - a fear so deep-rooted as to exceed their dread of the occupation forces. (Approximately 40-50% of the population.)

(2) Those who refused to leave fearing that to move deeper into Germany would be to risk a repetition of the horrors of our bombings and shelling. (Approximately 20-30%)

(3) Those who wished to leave but missed the bus or were unable to leave due to ill health, personal or in the family. (Approximately 15-20%)

(4) Those who remained because they are genuine anti-Nazis, and therefore anxious for an Allied victory. (About 2%)

(5) Deserters from the German army. (About 1/2-1 %)

(6) Agents and line-crossers placed here by the Gestapo, SD, or other German security agencies. (? %)

c. The fall of Aachen took place before the plan to organize the Volkssturm could get underway. The Volkssturm may play a more significant role in future operations in Germany.

SECTION I: INTRODUCTION

1. Definition of Terms

It has been found that the significance of the terms "screening" and "cleared" are misinterpreted by non-CIC personnel (MG, MP). For purposes of clarity it became, therefore, necessary to adopt the following working definitions.

A. Screening

Screening is a term applied to those procedures and techniques which are intended to aid in determing whether the individuals studied present a threat potential or active, to the security of the Allied troops. This process, by its very nature, is necessarily a continuous one. The mere fact that the individual has once been "cleared" does not place him above further investigation.

B. Cleared

The statement that an individual has been "cleared" indicates merely that he was examined by CIC and that the evidence at hand at the time failed to indicate that the subject was a security menace.

2. Purposes of Screening

Based upon our experience the following five purposes are suggested as goals of each screening attempt.

A. The detection of individuals who may be enemy agents.

B. The detection of individuals who are covered by the detention policy of SHAEF.

C. The detection of soldiers and deserters from the German army.

D. Determination of the fitness of civilian applicants (solely from the security point of view) for positions with the civil administration and MG.

E. The detection of individuals who are in possession of tactical or strategic information which may be of CIC or OI value.

Persons falling into the first three categories are arrested. All others are eligible to receive an MG "Temporary Registration" certificate which permits them to take up or continue residence in the town. (See exhibit A.) Information on persons in category D and recommendations for employment or non-employment are forwarded to MG for disposition. The names of persons in category E are forwarded to the headquarters of the local CIC detachment or to Military Intelligence Interpreter teams, as the case may be.

SECTION II: PROCEDURE

1. Physical Set-up

An ample waiting-room with reasonable seating facilities should be provided. Even under the best practicable operating conditions long periods of waiting are unavoidable, as the flow of pass-applicants is subject to unpredictable variations. A sign should be prominently displayed in the waiting-room informing undischarged German soldiers of their obligation to report themselves as such, failure to do so rendering them liable to treatment as spies. Slips bearing consecutive numbers should be handed out to the persons in the order in which they enter the waiting-room to avoid unnecessary confusion and disputes. As the German public is not accustomed to American office-procedure, notices should be posted directing them step by step. To keep order and discourage communication between waiting people and those already processed, a guard is needed whose function is also the distribution of the numbers and the calling-up of the candidates by number for interrogation. The MG pass-issuing unit should be located in an adjoining room.

2. Interrogation Conditions

Arrangements should be such as to give the interrogator the appearance of absolute authority in the eyes of the civilians. All consultations with the officer in charge should be made unobserved. Privacy for interrogation is also essential. This is best provided by individual rooms for each interrogator. If, however, several interrogations must be conducted simultaneously in a single room, then at least the desks should be sufficiently spaced so that conversations cannot be overheard.

3. Limitations of Functions

One of the functions of CIC screening is to clear individuals prior to the issuance of the MG pass. All questions relative to pass procedure should, however be handled by MG personnel and not be the interrogators. After screening, the pass-applicant is sent to the MG section with an O.K. slip indicating clearance. Such slips should identify individuals by name and age and bear the date and the interrogator's initials.

4. Interrogation Proper

A. Prior to the interrogation the German civilian expects the following:

(1) That he will have to show identification papers and military papers.

(2) That he will be treated arbitrarily and discourteously. He expects to be shoved around and consequently his responses are inhibited.

(3) That the interrogator will have only have a superficial knowledge of German institutions.

(4) That he will be questioned mainly as to his political reliability.

(5) That he will be asked certain questions about which he had been briefed by his neighbors. The result --ready-made answers.

B. The preliminary aim of interrogation is to throw the subject off balance so that answers will be genuine.

(1) The sequence of questions must be varied, not always beginning with the examination of documents.

(2) The interrogator must be very firm, always dominating, and never permitting the subject to tell his story in the manner in which he had prepared it.

(3) It is an advantage for the interrogator to show on small details his knowledge of German official procedure, etc.

(4) A good point is sometimes to disclaim any interest in political beliefs of the subject. (This helps to avoid hard-luck stories). It is not denied that the political approach, including lectures, had validity in certain cases, but generally speaking indoctrination should not be attempted, as it prompts false answers. Although questions concerning a civilian's ideological and political beliefs will seldom meet with a candid reply, questions regarding the individual's activities in the past years (organizational membership, occupation, education, etc.) will more often than not be answered truthfully. Skillful interpretation of such answers will give much insight into the problem of the individual's reliability.

(5) Subject should be kept in the dark as to what the interrogator is really after so that briefing is useless to him.

(6) People may be divided mentally into those worth only minimum questioning, and those worth perhaps 10-15 minutes.

C. Tools of Interrogation.

(1) Personal documents carried by the individual provide the most important leads (see appendix III), as they provide a good part of his history, perhaps disproving his story or at least pointing the interrogation in a definite direction. Discovery of most individuals found to constitute a threat to security has been aided by the lack of condition of their documents:

(a) Complete absence of important documents, usually explained as the result of bombing or fire.

(b) Irregularities in documents, as for example the presence of unusual entries and stamps, or the absence of usual entries and stamps.

(c) False papers, either prepared by the person himself or by the German authorities. No cases of the latter have been discovered by us thus far, but they may well be expected in future operations.

(d) By the use of leading questions an interrogator can trick the subject into statements which are patently false, thus establishing that the latter has lied. For example, an undischarged soldier in civilian clothes (after glibly explaining the loss of his identification papers) may claim that he has been "ausgemustert" (i.e. "4F"), whereupon the interrogator asks: "Was your Ausmusterungscheinsschein blue or yellow?" In case the man's answer is either "Blue" or "Yellow" it proves him a liar, as the document in question, if issued recently, is always pink.

(e) Frequently persons carry incriminating papers which they do not intend to show. These papers might be discovered by an unexpected search of their wallets or even a complete search of their persons.

(2) The registration card includes certain questions which are put to all persons. The value of the card lies in the fact that Germans are far more reluctant to sign an untrue statement in writing than to give false facts orally. Reactions to these questions are also likely to give valuable hints to the interrogator. The profession or job of the individual allows pretty accurate conclusions, as to his likely party-affiliations, and interrogation in this direction is suggested. Inherent dangers to be watched are these: (a) that by constantly asking the same questions one encourages the above mentioned "canned" answers, and (b) that the interrogator might consider as a measure of his work the volume of cards produced, rather than more objective results.

(3) The blacklist can be used as a psychological tool. In only two cases have persons actually included on this list been discovered by us, however, interrogators have frequently obtained admissions of Party affiliation by pretending to find a person on the list, and then asking abruptly. "How long have you been in the Party?" or, "What was your function in the Party?" Often the individual, assuming his association with the organization in question to be a known fact, confirms what was previously but a suspicion.

(4) A member of the suspect's family may be exploited in interrogation. In some cases where interrogation of a subject fails to gain an admission, voluntary or involuntary aid may be obtained from members of his family. One familiar technique is to make them believe that the person has admitted the fact and that only added details are needed. In cases of suspected soldiers in civilian clothes, family members have been used to great advantage. They must be told, for example, that their father, brother, or husband (as the case may be) had admitted to being a soldier and that his life depends on his ability to prove himself a deserter and not a spy. As proof the Soldbuch or uniform is usually asked for and is sometime hurriedly produced, thus making the man a PW.

(5) The Police Director's Certificate can be used if necessary. In cases where claimed loss of all documents appears reasonable and has to be accepted at face value, the subject is ordered to appear with two witnesses before the civilian Police Director to obtain an affidavit, sworn to by himself and the confirming witnesses (eidesstattliche Erklarung). This certificate attests to (a) identity, (b) military status. It is usually rather reliable as the witnesses are liable to punishment in case of false testimony. Should it be false, however, the subject's persistence in his lie will be stiffened and he will be harder to "break".

(6) The City Directory and Telephone Book are useful in checking claimed residence and address.

(7) The OB book may be used in cases of suspected enemy agents. Agents might try to escape detection, when apprehended, by posing as deserted soldiers. The actual knowledge of the units in which they claim to have served can be checked by use of the OB book.

(8) Posters have been found to facilitate interrogation. A prominent sign in German, "False statements will be severely punished" (with reference to the applicable MG law), has been found effective.

D. Use of Stamp.

(1) The stamping of documents as a sign of clearance has been tried, however the practice has been discontinued. It was found that further investigation by MP's or MG may be neglected on the strength of this O.K. in the first screening. Also it is possible that other army agencies may assume persons so screened to be reliable for all types of employment, whereas for this purpose a more thorough investigation is necessary. It has been found useful, however, to enter Party affiliations with accompanying stamp on the person's main identification document, thereby helping rather than confusing the next interrogator.

(2) Stamping the MG "Temporary Registration" document was adopted merely to indicate that the individual was duly registered by CIC. The CIC portion of the stamp was omitted lest other agencies misconstrue it as a sign of approval.

SECTION III: USE OF INFORMANTS

1. One of the greatest surprises in the interrogation of German civilians, has been the quantity if not the quality of information volunteered to the conqueror by the conquered. Such information, however, seldom results from a geninue desire to help us, and it is essential for the interrogator to determine the interrogator's motives, as the informant's reliability is never above question.

2. Often the explanation lies merely in the fact that Germans are accustomed to answering all questions asked by anyone in authority. This convenient German habit of submission enables the interrogator to pick up many small items of interest, such as husband's Party membership, names and descriptions of former Party bosses, or admission that subject has information of operational intelligence value.

3. More often Germans give information in order to distract from certain delicate points in their own history, and frequently they go so far as to prepare this information in advance against such possible misadventures as, for example, being picked up for violation of MP orders. As the main interest of the suspect is to ingratiate himself, his stories are usually designed to please: he has been called before the Gestapo, he has helped certain Jews (who, of course, are never available, in case the matter of confirmation arises), or he knows that so-and-so was a Party member.

4. Other informants are hoping to obtain special privileges or advantages, although most of them hesitate to use such subterfuges, in fear of the consequences should they be discovered. One man, for example, twice requested permission to enter some empty houses, explaining that he might find three SS men whom he had recognized in the street. The real quest was obviously loot.

5. Another case, which turned out more profitably, was that of a whom MG had hired as an auxiliary policeman. He felt himself slighted in this inferior position and proceeded forthwith to denounce all former Party members and unreliable characters in the police force. So accurate was the information that

6. Germans, however, usually inform because of hatred. They try to hide the personal motive in such cases, commonly playing the part of the long-suffering anti-Nazi. A good share of the false and worthless information comes from this type of informant. Hundreds of Germans do have excellent reasons to hate the Party and its authorities, but chiefly on grounds other than ideological--such as loss of the family-business, or having run afoul of the Gestapo, or similar personal reasons. In the case of Aachen the population became especially enraged at the Party and SS because the evacuation was crudely handled and the people were mistreated as a result, almost any Aachener will give information pertaining to the Party.

7. Informants who desire to help the Allies, or as they usually put it, help the "true" Germany are extremely rare, although they do exist. Many Germans in the occupied areas are so eager to see the war ended quickly that they are willing to aid the Allies. Informants of this type commonly preface their statements with the careful rationalization that they are giving information as "good" Germans because they want to shorten the war. Occasionally true idealists can be found among informants, however, and they should be cultivated carefully.

8. The main difficulty with informants is not that they hesitate to give information, but that they do not know what the interrogator is seeking. It may be necessary to brief the informant and then send him home to think it over. Steady contact with some of the more promising informants pays well. In general an informant should be handled only by the interrogator who first contacted him.

SECTION IV: PRISONERS OF WAR

1. German soldiers dressed in civilian clothes who deny their military status fall into the following categories: A. soldiers who deserted while on furlough, B. deserters from fighting units, and C. stragglers, i.e. soldiers cut off from their units who intend to cross the line into German-held territory.

2. Soldiers on furlough have great difficulty in explaining the fact that they have none of the papers which a German civilian of draft age must carry. They will either declare that the papers in question have been burned or have been handed in, in order to obtain deferment for essential war work. They know the city well and have friends who are often willing to cover them. Frequently, however, they have not experienced certain recent events in the city's life (bombings, evacuations, etc.) and it can easily be determined by men as of such details that the suspects have not been at home continuously.

3. As it is usually difficult to establish the subject's intentions, soldiers falling into categories B and C cannot be distinguished from each other. In addition to the embarrassing lack of papers, they have to explain their presence in an area of which they are usually not natives or previous residents. They invariably tell an exact tale of their wanderings, but they can rarely explain why they undertook a trip into the front lines. They may claim they wanted to join the Americans because they knew the war was lost, or, perhaps, they came to rescue a sick uncle from the ruins of some bombed house, etc. Many claim to have been sent from far away for "Schanzarbeit" (compulsory digging of defenses); in no case, however, has it been determined that the Germans impressed other than local people for this work. Often the soldier commits the mistake of telling that he had arrived by train. Rarely does he know that a special permission is needed for civilian travel of more than 100 km. In general, he knows very little of the current civilian restrictions. Moreover, he is equally ignorant as to when and how it was still possible to enter the area as he claims. It appears that the German control of railroads, roads, and cities was so efficient that practically no civilian of military age could have gotten through to us without proper papers. Thus far it has been found that virtually all persons telling such travel stories are soldiers.

4. Experience has tended to show that under existing conditions undischarged soldiers of the first category (i.e. those who deserted while on furlough) will, more often than not, be broken without much difficulty as their neighbors and acquaintances will confirm their status. Most of them have no intent to sacrifice their comfort or endanger their lives any further.

5. Soldiers in groups B and C, however, present a more complex problem. As strangers in the area and without the restraining influence of home, they represent a greater security menace, even though actual deserters would be no less reluctant to return to the vigors of a soldier's life.

6. Measures to detect and intern German soldiers in civilian clothes have been vigorously pursued. It has been pointed out that this policy would operate to discourage desertion. Nevertheless, this consideration has to be ignored if weighed against the necessity for military security.

7. At times the screening teams have been confronted by borderline cases for which no provision was made in arrest directives. They fall into the following categories.

A. Persons who were furloughed out of the army during 1943 under the so-called "Ru-Funk" program. Under its provisions soldiers with certain technical qualifications were returned to armament industries. They would live at home, wear civilian clothes, and would receive their pay solely from their civilian employers. Yet they have retained their Soldbuch and were not issued their Wehrpass.

B. Soldiers who deserted from the German army a long time before our forces arrived, and lived in hiding until then.

C. Soldiers who are obviously physically unfit. They were released by the army recently, returned home, but did not receive their discharge papers because of the great confusion caused by the evaucation.

D. OT-workers, especially those who used to carry arms.

E. Railroad-workers who wore the "Deutsche Wehrmacht" armband in occupied areas and carried arms.

F. Full-time NSKK men who performed duties for the German army which are carried out by ordinary soldiers on our side. They would carry arms if stationed in occupied areas. Usually their status as good Nazis enabled them to get into the NSKK instead of the army.

SECTION V: POLITICS

1. Political Questioning. The reaction of the people of Aachen to questions pertaining to their political views and activities proved to be so stereotyped that it was not at all difficult to draw up some generalizations in this field.

2. The "Un-political". Questioned on their political beliefs as evidenced by their pro-1933 voting habits, a majority of the people replied with blank stares. The word "vote" ("gewahlt") would frequently have to be repeated a number of times before it was comprehended; as it had apparently become foreign to them. The registrant often had to be reminded of the fact that there had been free elections at one time in which the

voter could case his ballot for a party. As soon as the word "party" ("Partei") was heard, the majority of the registrants would immediately disclaim all party affiliations and insist that they were "non-political" ("unpolitisch")! Upon further prodding they would seemingly concentrate their thoughts upon that forgotten democratic era and, in most cases, finally declare that they voted "Zentrum", adding that they were born as Catholics and would always stand by the church.

3. The Centrists. About 60% of the population of Aachen labeled their political inclinations "Centrist", but more than half of this group seems to belong to the non-political section described above, the remainder is made up of individuals who were able to give cogent reasons for their dislike of the Nazis, basing their attitude chiefly on the anti-clerical teachings of the NSDAP, but in some cases also on the restrictions on individual liberty.

4. The Social Democrats. Followers of the Sozial-demokratische Partei Deutschlands (SPD) seemed to constitute the largest politically conscious group in Aachen. They formed about 20% of the people questioned. Quite a number of them, when interrogated on their political affiliations, would proudly produce their SPD membership booklets which they had preserved since 1933. Others would refer to their many years of membership in the "Freie Gewerkschaften", the Socialist labor unions. A few, however, would furtively look around them before stating their political preference, apparently still afraid of the possible consequences of this admission. On the whole, Social Democrats seem to recruit their adherents from the class of skilled laborers and, to some extent, the small shopkeepers.

5. The Communists. About 10% of the population of Aachen claim to be Communists. Their reactions to political questioning varied from one man who solemnly proclaimed that he always had been and always would be a Marxist workingman, to the little woman who timidly whispered that she used to vote for Thalmann. When told that there was no need for whispering, the latter replied that the Gestapo may have left, but the attitudes of fear harbored during twelve long years linger on. This evidence of a feeling of insecurity could be noticed in many who would prefer to call themselves "Anti-Fascists". A number of Communists were able to present proof of having been imprisoned for anti-Nazi activities.

6. The Conservatives. Less than 5% of the people interrogated claimed to support the conservative parties (Deutsche Volkspartei, Deutschnationale Volkspartei, Wirtschaftspartei). Those who consider themselves in this group are usually well-to-do, merchants, manufacturers, higher civil servants, noblemen, etc. On the whole they had been willing to go along with the Nazi but are quite disappointed that Hitler has not fulfilled his promises to them. Typical answers to the question "Why wouldn't you join the Nazi party?" are those of a Countess von Spee who declared that members of her family would not

mingle with the common people. Another woman, who claimed to be "Deutschnational", exclaimed when asked why she wasn't in the Nazi party, "Oh, we would never have anything to do with Socialistic things!" One man who had switched from the Wirtschaftspartei to the NSDAP explained that Hitler had promised to abolish the property taxes to which he objected. People in this group expressed their eagerness to renew their American business connections, but are frequently unwilling to act as full-fledged collaborators, protesting that they do not wish to become traitors.

7. The Nazis. Only one man among the more than 10,000 interrogated admitted that he still considered himself a National Socialist. A former major in the German army, member of the NSDAP and SA since 1934, he declared that his honor as a German officer prevented him from "changing his shirt that quickly". The Nazis constitute about 5% of the population and most of them protest that they were forced into the Party, and had always been opposed to Nazi ideology. Economic necessity was even claimed by the few "Alte Kampfer", members of the NSDAP before 1933, who have chosen to remain in Aachen. The fact that some of these people were lying was evidenced by informants' reports according to which Aachen Nazis become more cocky as the news of German counter-attacks spread.

8. "Forced Membership". Questioning revealed the following facts about the so-called "forced members": Membership in the Nazi party was never compulsory, at best it could be considered economically advantageous. A number of non-Nazi civil servants had to sacrifice their jobs or found that their names were skipped when they were scheduled for promotions. Businessmen found that government and Party contracts went to the members of the NSDAP. In spite of this fact these people were able to continue to exist without associating themselves with the Hitler movement.

9. "Subversive" Activities. No evidence was found in Aachen of the existence of an active anti-Nazi movement. Communists say that their organization, which was the last to cease operations, was smashed in 1935. Some Germans claim that they intentionally engaged in slow-down strikes against war production, yet such statements could not be authenticated. Foreign workers employed at the Veltrup armament plant, however, seemed to have been actively engaged in sabotage. Two Germans, aged 67 and 77 respectively, both former Social Democrats and trade unionists, claimed to have been imprisoned in 1941 for distributing leaflets dropped by British planes. They said they were the only survivors of a group of twelve which had begun this activity spontaneously.

10. "Underground" Movements. The interest of American interrogators in underground activities has not been slow to reach the attention of certain imaginative Germans--particularly teen-aged boys and girls, as well as the usual "cranks" -- and fantastic claims and stories of all kinds have been obligingly forthcoming. It may be mentioned quite aside, that a considerable precentage of such claimants were previously internees to refugee centers (notably Hombourg), where the American thirst for underground-stories must have been a daily topic of conversation. As far as has been determined, the following represent the Aachen "Underground":

A. The nearest approach to an organized underground thus far identified is the small, rather mysterious youth movement bearing the name of "Edelweiss Piraten". While stories and rumors about the "Piraten" are widely current in Germany, only two bona-fide members have been identified in Aachen. They seem to have been formed in small secret gangs (ages about 14-17), including some girls, which engaged in the hazardous sport of beating up Hitler Jugend members and occasional older Nazis. Beyond this pre-occupation they appear to have had no clear objectives of any sort. Most of the children were from lower-class homes, some of formerly Communist families; however, not the faintest trace of political or even idealistic motives behind their acts has been brought to light thus far. Moreover, although like-minded gangs apparently exist under the same name in other German cities, no evidence of central organization and direction, or of more than chance contact between them, has been found.

B. Although organized opposition to the Nazis by the Communist Party ceased in 1935, one informant reports that two Communist organizations had continued existence: the "Bund der Sowjetfreunde" (Friends of the Soviet Union), and "Kommittee fur ein freies Deutachland" (Committee for a free Germany.)

C. Catholic organizations as such have been nearly dissolved but many have continued to exist as closed social gatherings and are frequently anti-Nazi. The old student-fraternities have been re-constituted in reduced form with an active anti-Nazi tendency. The leader of a former Catholic girls' organization in Aachen, now a woman of about 45, has kept in contact and held meetings with many members of her age group. Although youth movements other than the Hitler Jugend are forbidden in Germany, several organizations of that character have existed in Aachen and nearby cities under the name of "Deutscher Alpenverein" (German Alpine Club). The founder of the club, a priest named Karl Lowen, was arrested in September 1944 by the Gestapo. Although the organization engaged in no political activity or discussions, its leader was a known anti-Nazi.

11. Attitudes under the Occupation.

A. The "Liberators." There is little doubt that the SS evacuation terror in mind, and after suffering under heavy Allied bombardment, a majority of the population of Aachen welcomed the arrival of our troops. The courteous behavior of the Americans quickly dispelled the doubts of those who had believed some of the Nazi horror stories. Many people have asserted that the Party was generally blamed for the destruction wrought in Aachen, especially for not surrendering the city when the situation became hopeless.

B. "Non-fraternization". After the transition weeks had passed and the new community began to take shape, the Germans were rather shocked to notice that their new rulers still treated them as enemies. Not having been asked by their leaders to take a hand in guiding their country, they do not consider themselves responsible for the actions of their government. Furthermore, they thought, the positive act of defying the

evacuation order put them unequivocally on the Allied side. They therefore refer to the Allied policy as a "psychological mistake". Their specific grievances are (1) the soldiers' unfriendliness, (2) lack of material aid, (3) indiscriminate eviction of civilians to make room for soldiers. On the other hand a large number of people believe that the American authorities are too soft in their dealings with Nazis. The statement, "You are much too humane!" was heard frequently.

C. The Counter-Offensive. The German counter-offensive caused great consternation among the civilians. Many expected that the Nazis, upon re-entering the town, would shoot everyone. A good number of people packed their belongings and prepared to flee if the Americans abandoned Aachen. Hardly anyone, however, doubted an ultimate Allied victory.

D. The Newly-gained Freedoms. Most people agreed that now, for the first time in twelve years, they felt the absence of governmental force and complusion. Germans in responsible positions observed, however, that the people lack sufficient self-discipline and independence to take their fate into their own hands. When it was necessary to do certain types of work for the benefit of the community, many people drafted for the jobs didn't appear because they did not really have to. The need for a prolonged American occupation is assumed by the Germans because they do not consider themselves mature and strong enough to prevent a return of the Nazis.

SECTION VI: LIAISON

1. General. As in any military operation, liaison with adjacent as well as higher and lower echelons and other interested agencies is of cardinal importance. While the relative importance of the operations insofar as those agencies are concerned may vary, it may be assumed that screening of the nature performed in the Aachen operation will concern at the minimum CIC, Military Government, Military Police, and other operational intelligence agencies.

2. Other CIC Agencies. CIC operations in the city will normally be carried on simultaneously from at least three bases, namely, the local prison or detention center, a centrally located headquarters, and an interrogation center where screening and detailed interrogation can be performed. Information is gathered and disseminated through the central office. All the information obtained by either the screening teams or other operational detachments can thus be assembled at this headquarters, assuring co-ordination of efforts as well as easy access to information. This necessarily calls for close liaison and co-ordination between the screening personnel and any other CIC unit that may be established. Periodic reports from each of the sub-units to the central headquarters are an excellent medium by which all agencies can be kept posted on the activities of other units operating in that area. Moreover, telephone communications over private lines should be established as quickly as possible.

3. Military Government. Inasmuch as Military Government may be expected to remain in the area under its jurisdiction, all MG branches should be kept posted on CIC screening policy, and close liaison should be established on pass control. Moreover, MG should be informed as to persons who, because of their past records, constitute a real or potential threat to the security of the military or civil governments, or that of the armed forces. These persons should be excluded from positions of importance, particularly those which may be considered policy-forming. If possible, all civilians, including those employed by the reconstituted civil government should be screened thoroughly before hiring. Military Government must, however, understand that clearing the individual screened does not constitute an irrevocable endorsement of that person, and is not to be interpreted as a carte blanche. Should evidence against such persons later be unearthed, the original opinion of CIC as to that person's reliability will be changed unhesitatingly. Screening does not end with the close of the interview, but is a continual never-ending process.

4. Civilian Clearing Centers. Civilian clearing establishments and evacuation centers, which, under MG, control the flow of civilians prior to their re-entry into the city and their subsequent screening, must be informed as to screening policy. All individuals must be screened by CIC prior to their release from such evacuation points. If possible, a reliable informant should be found among the clearing center personnel, to furnish advance information on persons who may constitute a security threat or possess information of CI value.

5. Military Government versus CIC. The need for constant close co-operation between MG and CIC cannot be too strongly emphasized. It is necessary for both organizations to understand each other's objectives and to aid in their achievement. MG is charged with the task of setting up and supervising local governments in as short a time as possible. CIC is ordered to provide for the security of the troops. These aims must be co-ordinated and reconciled. As is the case in most aspects of human experience, the basic problem resolves itself into one of personalities.

6. Military Police. Being primarily a security agency, Military Police is interested in information concerning persons who constitute potential threats to security, and who would be most likely to participate in uprising, sabotage, or underground activity. Generally, all men of military age, and all men, regardless of age, who were at any time members of the Nazi Party (NSDAP), the Sturmabteilungen (SA), the Schutzstaffeln (SS), or the National Social Motor Corps (NSKK) are to be kept under close observation. List of such persons should be furnished the Military Police, who will assist in checking passes and bringing in delinquents and suspects. To perform this task efficiently, they must be kept posted as to current pass and screening policy, arrest policy, and informed as to what types of passes and identity papers are valid. As a general rule, they should be requested to bring in for questioning all males of military age not possessing adequate identification papers, inasmuch as it is in this group that all German soldiers and deserters are found.

7. Military Intelligence Information. During any large-scale screening operation, persons possessing information of OI value will be encountered by the screeners. The value of their information will generally vary inversely with the length of time between occupation of the area by our forces and the interrogation. For this reason, liaison should be quickly established with MII teams within the zone of operations and maintained throughout the screening period. All persons believed to possess information of interest to MII should be earmarked as such and immediately forwarded to MII interrogators. This activity does not burden the CIC interrogators but actually relieves him of the time-consuming task of taking the information himself. In no G-2 agency is information ever refused. In the Aachen operation it was found of value to have MII interrogators adjacent to the screening section.

8. Publicity and Psychological Warfare. While it is admittedly difficult to determine what the population of enemy areas occupied by us feels and thinks, co-operation between PPW and CIC, which has the opportunity to speak not merely to a cross-section, but rather to all the inhabitants, will pay large dividends to both agencies. Persons with apparently sound views on the trends of thought in the occupied areas, and other intelligent persons of firm convictions should be forwarded to PPW, in order that personnel of that agency keep a sensitive finger on the pulse of public opinion. Moreover, PPW, by means of newspapers, posters, loudspeakers, and other means of dissemination can play a large part in the molding of public opinion in such a manner as to be beneficial to all agencies interested in security. A concrete case worthy of note is the manner in which rumors concerning the enemy counter-attack 16 December 1944 swept the city of Aachen, causing considerable unrest and anxiety on the part of the civil population. Such rumors as "Aachen will be German again by Christmas" died a sudden death upon issue of PPW newspapers which quite frankly but assuringly gave the details of the enemy counter-attack.

9. Dissemination of Documents. Regardless of how thorough the enemy may have been prior to his evacuation of the area occupied by us, and despite all the conscientious efforts of building target teams, documents of intelligence value will turn up weeks and even months after occupation. Documents of value to CIC should be turned into the central headquarters, and all others forwarded through G-2 channels to higher headquarters.

APPENDIX I

OPERATIONS AT BRAND REFUGEE CAMP

Screening operations at Brand Refugee Camp were unique in that the camp offered nearly ideal facilities for detailed interrogation. The camp, formerly a Wehrmacht post, was self-contained and consisted of several large barracks with a housing capacity of over 4,000 persons, messing facilities, a hospital and a jail, in which detailed interrogations could be carried on in absolute privacy. All persons entering the camp were assigned to a specific "block" and their whereabouts known at all times. When

ready for screening they were brought into the waiting-room on the second floor of the building which housed the jail, and then interrogated in detail in one of the small rooms on this floor. Interrogation in privacy, a real boon toward obtaining the desired results, was thus assured, and informants could be easily cultivated, inasmuch as they showed little or no reluctance in giving their information while out of sight and hearing of the others. Guards posted at the fence and gates of the camp insured that no person who once entered the camp could leave without being screened. The MP's handled all persons to be screened, in addition to operating the jail. Persons needing repeated screenings could be easily recalled, and informants played one against the other, actively assisting in the screening by denouncing any potentially dangerous persons. In this manner large-scale screening was carried on in the minimum of time with a maximum of effectiveness. It must be emphasized, however, that the existence and availability of these ideal screening facilities was most unique and is hardly to be anticipated in forthcoming operations.

APPENDIX II

SOP ON THE USE OF CIVILIAN REGISTRATION CARD 94

Exhibit A

TEMPORARY REGISTRATION — ZEITWEILIGE REGISTRIERUNGSKARTE

(Name) Age Sex

_____

I. The Registration Card is to be considered merely as one of the tools available to the interrogator in accomplishing the objectives in screening. It contains the minimum of information which CIC should have available on every resident of the occupied area; therefore it is to serve as an outline for questioning, but should not act to limit the interrogation. It is recommended that in the interrogation the items entered on the card by the typist be studied first, but that the card be set aside during the questioning and completed only when all the information has been gathered.

The interrogation must not be stereotyped, but should be a free and spontaneous conversation directed by the interrogator and adapted by him to the individual case.

II. Prior to the interrogation, it is necessary to press for the presentation of satisfactory identification papers. In the case of women or of men below or above the military age bracket, semi-official papers may be accepted if the registrant is not in possession of any official ones. If the papers were left at home, a penciled mark to that effect should be entered on the card and the registrant should be told that he has to return with his papers.

For the purposes of interrogation, cases may be divided into two categories, 1) men between the ages of 17 and 60, 2) all others.

Persons in category 1 must present proof that they are not soldiers. They can do that by showing us 1) a Wehrpass, 2) an Ausmusterungsschein, 3) an Entlassungsschein issued between the dates of 1 March 1944 and 1 September 1944 (If the man was discharged before 1 March 1944, there has been enough time for his Wehrpass to be returned to him. If the man was discharged after 1 September 1944; it may have been one of the doubtful last-minute discharges.), 4)an Ausschliessungsschein, issued after 1 January 1943, (The bearer of an Ausschliessungsschein, dated 1938 admitted to us to have served in the army subsequently.) 5) OT Dienstbuch, indicating service up to the time of desertion. If they cannot prove that they are not soldiers by presenting any of these documents, they warrant a more careful examination. If the interrogator is satisfied by their explanations, he can permit them to clear through the Police Director. (See Appendix III.) Otherwise they are to be arrested.

Persons in category 2 should present official documents like the Kennkarte, Fuehrerschein, Postausweiskarte, a passport, Grenzausweis, Dienstausweis, RAD Ausweis, and various other identity papers issued by the German authorities. In the absence of any of these the Familien-Stamabuch, or, as a last resort, the Haushalts-Pass can be accepted. Persons who have no papers whatsoever should be sent to the Police Director (See Appendix III.).

III. When the card reaches the interrogator, items 1-8 will have been filled out by the typists. He will proceed as follows, information in black letters:

(1) The name as entered on the card is to be checked against the identification paper as it should be spelled the same way throughout. Unofficial abbreviations of the first name are not to be permitted. In the case of married women the first name of the husband is added in parentheses. The maiden name of married women is added in the space provided for it.

(2) The present address is to be entered as stated by the registrant. Changes of address have to be reported to the Police Director who is to notify CIC. At a future date the Police Director can be required to check on all addresses.

(3) The registrant's work is to be accepted for previous legal address. After the completion of registration it can be checked against the address-book or a pre-occupation police file. If the person's actual residence as of 31 August 1944 differed from the legal address, it is to be entered also. The names of persons who arrived recently from German-occupied areas should be noted down and submitted to MII.

(4) Date of birth should be entered as it appears in the document. No protestations of "errors" should be accepted.

(5) Enter the community in which the person is born, adding the county or state ("Land") in the case of smaller places. Also enter the country of birth if it is not Germany. This should be done on the basis of the boundary lines as of 31 December 1937.

(6) Enter marital status as claimed by individual.

(7) Occupation should be entered in German as an English translation can only be considered an approximation and would not serve as an item of identification. If the present occupation differs from the main one, enter the latter.

(8) Up to this point all entries will have been made by the typist. Item 8 will also be filled out by the typist if the registrant considers himself a German citizen. No proof of German citizenship will be required. The admission suffices.

Adequate proof of their nationality must be presented by non-Germans. Thus far we have found such proof only in valid passports such as Italian passports, and Dutch ones which were extended by the Swedish Embassy in Berlin to a date after 10 September 1944. In all other cases, including persons who present a

Fremdenpass indicating non-German nationality, enter this nationality preceded by the word "claimed". In the case of persons from the Eupen-Malmedy sector who claim Belgian citizenship enter "claimed New-Belgian". This is necessary as men in this area were drafted into the German army.

(9) Enter title of identity document in German. Add number or, in its absence, the date of issue. In the case of persons presenting only military papers enter "see 10a)."

(10) In the case of women write "none" next to Military history. In the case of boys under 17 enter "under age". In the case of men over 60 write "over age". In all these cases leave the space under 10 blank except for filling in 10 d) in the case of men over 60 who have previously served in the army, but fill in all items if these men are Reserve Officers.

Write OT next to Military History if the man belonged to the Organization Todt, RAD if he was in the Labor Service but not in the army. Treat the other items just as you do in army service.

NOTE: Whether women or boys under 17 have a military history is a debatable point it is believed that any information on membership on the various paramilitary and political organizations should be of special interest and proper notations made on the registration card.

In the case of men who served in an army other than the German, write "Dutch army, Belgian army, etc." next to Military history and fill in 10 d) and, in the case of Reserve Officers, 10 e). In case of non-Germans without military service, enter a brief explanation of the situation next to Military history.

(a) Enter the military document (s) presented. Add the Wehrnummer which is found on top of p. 1 in the Wehrpass or on top of one of the other certificates.

(b) Check p. 5 in the Wehrpass of any addition for the last classification, adding the date of the latest physical examination in parentheses.

The following are the abbreviations and terms used in respect to classifications. Only these marked with an asterisk are being used at the present time. The others can be found as results of examinations of previous years. (The abbreviations for "ausgemustert" and "ausgeschlossen" are our inventions.)

*k.v.	kriegsverwendungsfaehig)	
tgl.	tauglich)	"1A"
*bed.k.v.	bedingt k.v.)	
beschr. tgl.	beschraenkt tauglich)	limited service

In the case of the classification bed. k.v. one of the following terms is sometimes added:

frontbrauchbar	fit for combat service
nicht frontbrauchbar	unfit for combat service

g.v.F.	garnisonsverwendungsfaehig Feld	fit for rear echelon duty in the field
g.v.H.	garnisonsverwendungsfaehig Heimat	fit for rear echelon duty at home

*zeitl.untgl. zeitlich untauglich — temporarily unfit

The classification zeitlich untauglich is used in conjunction with a definite time limit.

*a.v.	arbeitsverwendungsfahig	fit for labor draft
*d.u.	dienstuntauglich	unfit for active duty with the armed forces
*w.u.	wehruntauglich	unfit for service with the armed forces

The classifications d.u. and w.u. are used only in the cases of soldiers discharged from the army.

*am.	ausgemustert	completely unfit
*as.	ausgeschlossen	excluded from service with the armed forces.

"Excluded" from the army are persons with prison records for criminal or anti-Nazi activities.

*n.z.v.	nicht zu verwenden	not to be used

The classification n.z.v. is applied to half-Jews.

(c) In the case of persons deferred for physical reasons, enter the specific ailment (heart-disease, stomach ulcers, one glass-eye, skull-fracture, etc.). In the case of persons who were "reklamiert" (occupationally deferred), enter occup followed by the qualifications which kept the man out of the army or caused him to be discharged. (e.g. miner, aircraft-engineer, skilled mechanic, Nazi Gauleiter, etc.). If the man was "UK" (unabkoemmlich, indispensable) for any other reason, enter it as stated (e.g. last surviving son, father of ten children, etc.).

It is to be remembered that persons who are classified k.v., tgl., bed. k.v., beschr. tgl., or g.v.F. could not be deferred because of a physical or mental ailment. In receiving an occupational deferment a man classified k.v. would be required to bring better proof of his indispensability than a man classified g.v.F.

(d) Enter years of service if prior to 1939, months and years since then (e.g. 1914-18, Sept 1939 - Aug 1942).

(e) Enter in German highest rank attained.

(f) Enter date of last discharge.

(g) Enter reason for discharge. If same as 10 c), write "see 10c)".

(11) Remember that the Political History should give a picture of the man's political affiliations, not the clubs and organizations to which he belonged, perhaps after actually being forced into them. Note membership in the NSDAP and its formation regardless of whether membership was active or passive.

(a) If the registrant did not belong to the NSDAP write "no" in the "Entered" column. If he belonged to the Party write the year in which he joined under "Entered", and the year in which he withdrew under "Left". If he was a member until the occupation write "1944" under "Left". If he was a functionary of the Party, enter his rank and position under "Rank". If he left the NSDAP prior to the occupation, enter the reason under "Remarks". If the registrant was "Parteianwaerter" (Party candidate), give him credit for his intentions and enter "candidate" next to NSDAP, treating the other columns as if he had been a member.

(b) The following organizations are classified as formations of the Nazi party.

SA	Sturmabteilungen	Stormtroopers
SS	Schutzstaffeln	Elite Guards
NSKK	NS Kraftfahrkorps	NS Motor Corps
NSFK	NS Fliegerkorps	NS Flying Corps
HJ	Hitler Jugend	Hitler Youth

NSF	NS Frauenschaft	NS Women's Organization
NSD Doz	NSD Dozentenbund	NS German University Teachers' Organization
NSD Stud	NSD Studentenbund	NS German University Students' Organization

In this respect it should be noted that the NS Frauenschaft which was designed primarily to create a female leaders' corps for the Nazi party, is not to be confused with the NS Frauenwerk, which though Nazi-inspired, was chiefly concerned with educating housewives. Furthermore the NSD Studentenbund, a Nazi organization, must not be confused with the Deutsche Studentenschaft, to which every university student had to belong. It is well to remember that the HJ, in its broader sense, includes the Bund deutscher Maedchen, (BdM), Jungmaedel (JM), and the Deutsches Jungvolk (DJV).

Under "Organization" circle the formation in which the registrant held membership or enter the appropriate abbreviation. Treat the other columns as in "11a)". In the case of ordinary members of the HJ write "no" under "Entered", except if the registrant belonged to the HJ prior to 1937 or to the Stamm-HJ since then, in which case you register them as usual. (The Stamm-HJ was organized as the NAZI-ELITE of the Hitler Youth since the introduction of compulsory service in the HJ for all German children.) Register all leaders of the HJ, from Rottenfuehrer, Hordenfuehrer, or its BdM-equivalent up to Reichsjugendfuehrer.

(c) Under "Associated Organizations" write "no" under "Entered", if the person was an ordinary paying member, just as if he hadn't been in any organization at all. However, all persons who held any kind of position in these organizations are to be listed as prescribed under section "11 a)" on the Registration Card.

The following Nazi organizations are classified as "Assoc Org":

DAF, KdF	Deutsche Arbeitsfront Kraft durch Freude	German Labor Front Strength through Joy
NSV	NS Volkswohlfahrt	NS Welfare Org.
NSKOV	NS Kriegsopferversorgung	NS War Victims' Org.
NSD A	NSD Aerztebund	NS Physicians' Org.
NSL	NS Lehrerbund	NS Teachers' Org.
NSR	NS Rechtswahrerbund	NS Lawyers' and Judges' Org.
RDB	Reichsbund deutscher Beamten	Org. of Government Officials
NSBDT	NS Bund Deutscher Technik	NS Engineers' Org.

Although officially not a Nazi party organization, the Reichsnaehrstand or Reich Food Estate, to which all farmers must belong, is to be included under this classification.

(d) In order to complete the picture, the individual's political activity and inclinations should be touched upon in the interrogation. This question is of special significance in the screening of individuals who wish to act as informants, for their political convictions may help give us some bases for evaluating their reliability and to determine not only the fact that the man is anti-Nazi, but the degree to which he may be pro-Allied.

If the registrant claims political inclination without actual affiliation enter the following under "Organization":

K	for	Kommunistische Partei Deutschlands
S	for	Sozialdemokratische Partei Deutschlands
DS	for	Deutsche Staatspartei
Z	for	Zentrum
DV	for	Deutsche Volkspartei
W	for	Wirtschaftspartei
DN	for	Deutschnationale Volkspartei

Add years of membership only if actual affiliation is claimed.

The importance of the registrant's party affiliation prior to the Nazis is not to be overestimated, for it is his behavior since then which is of greater significance. Recognizing this fact, it may not be necessary to determine the individuals' political background in every case.

(12) Make certain that the registrant signs his first and last name in the proper space. The signature is to correspond to the name appearing under (1)(e.g. not Frau Schmitz, or Frau Johann Schmitz, or Kathi Schmitz, but Katharina Schmitz). Nuns are to use their secular names ("Weltname").

Persons over 65 years of age may be registered by others if they are infirm and cannot appear themselves. Proper papers must, however, be presented. The signature appearing under (12) must be that of the person appearing at the Registration Office. The word fur and the registrant's name are to be added to it.

(13) Further entries can be made under (13). It is to be remembered that this space should also serve for additional entries to be made whenever the registrant comes into contact with American authorities (arrest, MG employment, etc.).

APPENDIX III

GERMAN IDENTIFICATION DOCUMENTS

Having lived under a rigid system of police supervision, every German is accustomed to carrying some kind of identification paper with him at all times. Even a major catastrope like the destruction of Aachen will not bring about a substantial change in his habit.

Male Germans between the ages of 16 and 60 are subject to military service. If men are not actually in the armed forces, they will possess some papers indicating their relation to the military. It should be noted, however, that among the extremes of this group, boys of 16 and men close to 60, there will be some who have not as yet reported for the draft.

The documents discussed in detail below are those commonly found on German civilians. Brief mention is made of other identifications papers found less frequently.

(1) The Wehrpass.

The most common document carried by Germans of draft age is the Wehrpass, which corresponds to our service record. It is issued to them at the time of their registration for service in the armed forces, taken from them if and when they are discharged. (There is some administrative lag in respect to the returning of the Wehrpass to a discharged soldier.) The Wehrpass is bound in grey cardboard. It contains the following information: p. 1: name; p.2: photograph and signature; p. 3: name, date and place of birth, nationality, religion, marital status, occupation, and names of parents; p. 4: education, knowledge of foreign languages, other special qualifications (such as ability to drive a motor vehicle); p. 5-7: record of physical examinations and classification; p. 8-10: service in the RAD; p. 11-19: record of service on active duty; p. 20-21: notes on type of military training received; p. 22-23: promotions and decorations; p. 24-25: records of discharge; pp. 26, 27, 35: further additions; p. 28-31: temporary recall while on inactive status; p. 32-33: combat experience; p. 34: injuries and illnesses; p. 36-45: relationship to armed forces while on inactive status (class of reserves to which the individual belongs). On p. 47 we of CIC Aachen have recorded the years of membership in the NSDAP if the bearer of the Wehrpass belonged to the Nazi Party.

Among men close to 60 one will find a Behelfs-Musterungsausweis. It consists of one sheet of white paper with a green over-print. It is issued at the time the prospective draftee undergoes his physical examination. It is a temporary document to be replaced by the Wehrpass as soon as the latter is prepared. On the Behelfs-Musterungsausweis one can find the person's name, date and place of birth, citizenship, religion, marital status, occupation, and military classification.

Reserve officers possess Wehrpaesse regardless of their age. Soldiers of the last war may carry a Militaerpass.

Any man carrying a Soldbuch is a soldier.

(2) The Ausmusterungsschein.

The Ausmusterungsschein or Certificate of Rejection is issued to men who are exempted from military service because of severe physical defects. They are printed on pink paper although some, dated up to 1938, are white. The document consists of one page, giving the man's name, date and place of birth, and declares that the man is completely incapable of service in the armed forces. Attached to it is a photograph of the bearer.

(3) The Ausschliessungsschein.

The Ausschliessungsschein or Certificate of Exclusion is issued to men who are rejected from military service because they have served a prison sentence for ordinary crimes or for anti-Nazi activity. The document itself does not indicate the reason for which the man had been imprisoned. Consequently every petty thief will describe himself as a victim of Nazi persecution. The truth, however, can usually be determined after a brief examination.

The document is printed on blue paper, consists of one page which gives the man's name, his date and place of birth, and states that the man has been excluded from service in the armed forces in peacetime. It also has a photograph attached to it. In spite of its text this paper has also been issued since 1939, sometimes with the words "in peacetime" ("im Frieden") crossed out. The Nazis have, however, been inducting ordinary criminals and as we have had a bearer of the Ausschliessungsschein admit that he served in the army at a later date, we only accept an Ausschliessungsschein if it was issued after 1 January 1943. All others have to clear through the Police Director (see below).

(4) The Entlassungsschein.

The Entlassungsschein or Certificate of Discharge is issued at the time the man leaves the service. If of recent date, it can be accepted as proof of the person's civilian status. However, the possibility exists that the man was re-inducted at a later date. We have therefore arrived at the following conclusion. If the man was discharged before 1 March 1944, there has been enough time for his Wehrpass to be returned to him. If the man was discharged after 1 Sep 1944, it may have been one of the doubtful last-minute discharges. Consequently we only accept discharge papers issued between 1 March 1944 and 1 Sept 1944. All others have to clear through the Police Director. The document is printed on white paper and contains the man's name, rank, date and place of birth, and his time of services in the Wehrmacht.

(5) The OT-Dienstbuch.

Deserters from the Organization Todt will carry an OT-Dienstbuch, indicating membership in that force. Current membership in the OT can be considered satisfactory proof that a man is not in the armed forces. The recent method of indicating discharges has been to perforate the whole booklet with the word "ausgeschieden" (dropped out).

Thus far we have found two types of these documents, differing slightly in the information they cover. One is apparently issued to uniformed, direct employees of OT while the other is given to men employed by firms engaged in OT work. Both booklets have a purplish cardboard cover. The major items of interest contained in the first type are: p. 1: name, photograph; p. 2: date and place of birth, nationality, marital status, home address, p. 3: duty in combat area, p. 4: decorations, p. 5: record of physical examinations, p. 6: inoculations, p. 7: military training, p. 8-9: record of hospitalization, p. 10-13: places of work, p. 14-18: record of equipment issued, p. 26: record of membership in the Nazi party or the DAF, p. 33-35: furloughs. The following information is contained in the second type: p. 1: name, p. 2: personal description, p. 3: date and place of birth, nationality, marital status, address, name of nearest relative, p. 12-15: places of work, p. 24: record of arms issued.

Pending the clarification of their status, OT workers are liable to arrest.

(6) Police Director's Affidavit.

A large number of men of military age in Aachen claim to have lost their papers through bombings, during their temporary evacuation, or by turning them in to have their deferment renewed. In many cases this is true. As it would not be practicable to evacuate all these people through PW channels, the following system was devised: the individual testifies to his civilian status before the Police Director and has his statement corroborated by two witnesses. The affidavit is type-written in the German as well as the English language and signed by the Police Director.

(7) The Kennkarte and Similar Documents.

The Kennkarte is the standard identification paper issued to Germans who did not have any other papers. It is a four-page document on a grey, cloth-like material. On page 2 it contains the person's name, date and place of birth, occupation, and distinguishing marks, on page 3 there are the person's photograph, signature, and fingerprints.

In so-called New Belgium a Vorlaeufiger Ausweis or Temporary Identification Paper was issued instead of the Kennkarte. It is printed on white manila paper but resembles the Kennkarte otherwise.

(8) Passports and Similar Documents

German nationals travelling or intending to travel in foreign countries were issued a passport. This document contains the following: p. 1: name, p. 2: photograph and signature, p. 3: occupation, date and place of birth, place of residence, personal description, p. 4: areas in which and times during which passport is valid, issuing authority, p. 5: extensions of passport, p. 6-32: miscellaneous entries on travels in foreign countries including visas. The document has a brown manila-paper cover and is entitled Reisepass.

Most non-Germans living in the Reich seem to have had their passports taken from them. In Aachen we have only found Dutch and a few Italian passports. The Dutch passport, bound in a blue, cloth-like cover and printed on blue paper is entitled Paspoort. It contains the following: p. 3: name, occupation, nationality (Nederland), signature, p. 6: area in which and time during which passport is valid. Visas and other notes are entered in the remaining pages. A Dutch passport can be considered valid proof of Dutch citizenship if it was extended by the Swedish Embassy in Berlin to a date after 10 Sept 1944.

Persons who are stateless or who are non-German and could not obtain a passport from their own national authorities were issued a Fremdenpass. The document is bound in grey cloth and contains the following: p. 1: name, p. 2: nationality, occupation, date and place of birth, residence, personal description, p. 3: photograph, signature, visas and other notations. As a Fremdenpass is issued by the German police authorities, it cannot be considered proof of non-German nationality.

Persons living in the Dutch or Belgian border regions of Germany who were required to cross the frontier almost daily carried a Grenzausweis or Frontier Identity Paper. The identity paper issued for the Netherlands is printed on blue manila paper and has four pages. Its title is Deutsch-Niederlaendischer Grenzverkehr, Grenzausweis. The Belgian paper is printed on green manila paper and has four pages. Its title is Deutsch-Niederlaendischer Grenzverkehr, Grenzausweis. These documents contain a picture of the bearer and cover about the same information as the Kennkarte.

(9) The Fuehrerschein.

A Fuehrerschein or Drivers' License is accepted in Germany as an official identification paper. Its owners do not need a Kennkarte. It has a purplish color and is printed on the same material as the Kennkarte. It contains the bearer's name, date and place of birth, and Photograph.

(10) The Arbeitsbuch

As all Germans were subject to the labor draft, it was necessary for these not exempted from work to have documentary evidence that they were holding their jobs with the approval of the governmental employment office. They were therefore issued the Arbeitsbuch or workbook. It contains the following: p. 1: name and signature, p. 2: date and place of birth, nationality, marital status, number of children, address, p. 2a: changes of address, p. 2b: labor and military service, p. 3: occupational training, p. 6-29: firm by which bearer is employed. The booklet is bound in a grey and brown cardboard cover. The print is brown. The booklet is usually kept by the employer.

(11) Other Official Documents.

In addition to the documents listed under 1-10, we can accept other identity cards issued by German authorities. They usually contain the bearer's photograph and have the stamp of the issuing office. In this category belong the Postauswelskarte, a small purplish card issued by the post offices, originally to enable people to identify themselves when claiming registered letters, cashing money orders etc., various Dienstauswerse, issued by governmental institutions (including the Reichsbahn, reichspost etc.) to its employees, and the Reichsarbeitsdienstausweis, issued to persons who have been in the labor service.

(12) Semi-official Identity Papers.

In the case of persons who cannot ordinarily be considered security threats (old men and women, children under 16), semi-official documents can be accepted. The most important of these is the Familien-Stammbuch. It is issued by the governmental marriage bureau or by the priest who performs the ceremony. The first entries into this booklet constitute the marriage certificate. Further entries register the birth of children and the death of any person covered by the document (parents and children). The Stammbuch contains the person's name and the date and place of birth. There are no photographs in it.

Another document falling into this category is the blue Haushalts-Pass. Certain rationed items were issued only upon the presentation of this card. It contains the names and year of birth of persons living in a given household.

(13) Police Directory's Certificate of Identity.

Any person unable to present any identification paper or who presents papers which cannot be considered satisfactory are to be sent to the Police Director of the city. There they will be issued an identity certificate provided that two witnesses have identified the subject. The certificate shows the bearer's fingerprint, the testimony of the witnesses, and the signature of the Police Director.

DISTRIBUTION: SPECIAL

APPENDIX 2

"Strength of Sixth Army Group CIC Units as of 31 October 1944"

	Officers	Agents	SM
Sixth Army Group CIC Detachment	2	0	1
307th CIC Det (Seventh Army)	12	29	4

MISSION OF THE COUNTER INTELLIGENCE CORPS

"The mission of the Counter Intelligence Corps is to contribute to the operations of the Army Establishment through the detection of treason, sedition, subversive activity, and disaffection, and the detection, prevention, or neutralization of espionage and sabotage within or directed against the Army Establishment and the areas of its jurisdiction."

Auth: AR 381-100

FORT HOLABIRD, BALTIMORE 19, MARYLAND

ACSIH-GC 250/58/M 8 April 1959

SUBJECT: CIC History

TO: All Personnel Reading this Document

1. This volume is a portion of the History of the Counter Intelligence Corps which has been compiled in draft form by this headquarters.

2. Distribution of the History is being made as the volumes become available so that addressees may profit by the problems and accomplishments of the Counter Intelligence Corps in previous years.

3. When completed, the History will cover in as complete and accurate detail as possible, significant incidents and events leading to the organization of the Corps of Intelligence Police during World War I and the Counter Intelligence Corps in World War II. Events, accomplishments, changes, and problems encountered up until 1950 will be included in the thirty volumes planned.

4. In spite of the diligence of researchers and writers, there may be inaccuracies and omissions, since no records are available for some of the more than two hundred CIC detachments which were operational during World War II. Even some of the major campaigns were poorly documented.

5. Any comments should be forwarded to the Commanding General, United States Army Intelligence Center, Fort Holabird, Baltimore 19, Maryland, ATTN: G-3.

Ardennes Breakthrough

Chapter 1

THE GERMAN ATTACK

As the Kaiser's Army, in 1914, had sped through the Ardennes en route to Paris;[1] as Hitler's Army, in 1940, had attacked through the same forest on its way to the conquest of France;[2] so, on 16 December 1944, four German Armies, two of them Panzers, attacked U.S. VIII Corps, in a desperate push toward Antwerp and the North Sea. Inclement weather had permitted von Runstedt to assemble this huge force and to surprise the Allies.[3]

German Intelligence Service Plan Uncovered

In planning for the surprise attack through the Ardennes, the Nazis had counted heavily upon a brigade, designated as the 150th Panzer Brigade, organized by the German Intelligence Service (GIS), dressed in U.S. uniforms and equipped with captured U.S. weapons and jeeps. One segment, named the Einheit Stielau after the Lieutenant who commanded it, was to be the espionage, sabotage and "confusion" arm. This whole plan was authored by Otto Skorzeny, who had attained a reputation of omniscience among the German High Command by his rescue of Mussolini in November 1943.[4] However, a series of events robbed this maneuver of much of its surprise value.

For several months, U.S. troops had been made increasingly aware of the danger posed by German soldiers in U.S. uniform. From about the middle of August, individual German soldiers had dressed themselves in parts of U.S. uniforms taken from the dead or captured, and had stolen jeeps to add mobility to their ruse. These practices were largely the products of individual initiative and, as such, were carried out on a small scale. Since the incidents were scattered and were few in number (although both the Sixth Army Group and the Twelfth Army Group did experience similar occurrences), not much importance had been attached to them.[5]

4 An account of the organization and work of the 150th Panzer Brigade is attached as Appendix 1, entitled, "Agents in the Ardennes."

5 7th U.S. Army Staff Section Daily Rpts (DR), 1-15 Oct 44, in L-1136 (14) Annex 20, G2 CIC Staff Section Rpts, 15 Aug 59 31 Dec 44, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.), and, ADSEC COM Z, CIC Information Bulletin #7, dtd 20 Oct 44, (SECRET), (Staff and Faculty Library).

About twice a week, during November, the Intelligence Officer of the 37th Panzer Grenadier Regiment had sent English-speaking Germans on long-range reconnaissance patrols to gain U.S. order of battle information. Late in November, a four-man German patrol, captured by troops of the 83d Infantry Division, stated their mission was to remain behind Allied lines for four days, tapping telephone wires. Components of the First, Third and Ninth U.S. Armies suspected they had been the victims of German wire-tapping efforts. On two occasions, investigation revealed, the Germans had tried unsuccessfully to secure specific information by identifying themselves as "the switchboard chief from 'Conquer'," and "a Staff Sergeant from 'Justice'."[6]

In mid-November, a prisoner of war had stated, under interrogation, that he had seen a secret order for all English-speaking personnel and all captured U.S. uniforms to be sent to Osnabrueck, Germany. According to the order, these personnel would be trained in reconnaissance, sabotage, and espionage.

Two German military documents captured at about the same time substantiated the prisoner's revelations. They indicated that a call for volunteers had been issued early in November which outlined the necessary qualifications. In addition to the knowledge of English, "including the American dialect," volunteers were to be physically fit, mentally alert, competent in close combat fighting, and suitable for special assignments. They were to have a knowledge of military terminology. Significantly, they could not be retained by their units for military reasons. From these volunteers, the documents revealed, a special unit would be formed, about two battalions in strength, for deployment on the Western Front.

Prior to acceptance by this new unit, each volunteer would be tested "for suitability at Friedenthal, near Orianienburg (Headquarters Skorzeny)...." This information was disclosed in a letter from the Headquarters of the LXXXVI Corps to their Paratroop Regiment Hubner. The letter stated further that "Captured clothing, equipment, weapons, and vehicles will be utilized for the equipment of these special troops."

The only discrepancy between the prisoner's statement and the documents was in the destination of the volunteers and articles. Clearly, the destination was not Osnabrueck, but "...Headquarters Skorzeny."[7]

Finally, early on the day of the attack, 16 December 1944, secret orders outlining the plans for Operation Greif (English translation: Grab) were found by

---

6. NOTE:- Conquer was a code name for Ninth U.S. Army; Justice is believed to have been the code name for XIII Corps.
7. Annex 4 to History of the CI Activity of the U.S. Army in Europe, pp. 7-8, (Unclassified), (Manuscript in Staff and Faculty Library).

troops of the 106th Infantry Division on the body of a German officer of the 116th Panzer Division, who had carried them into the front lines, despite a directive that, below division level, they were to be transmitted only verbally. These orders were dated the previous day.

Now all doubts as to the German plans for deception were erased. Before the end of the first day of the attack, the word could be flashed to all subordinate units that the Germans planned to operate, in the strength of two battalions, an organization of English-speaking German soldiers, dressed and equipped as U.S. troops. Even the roads they would take and their means of identifying their comrades were known. The following partial translation of the order was carried in First Army's widely distributed Periodic Report:

"Undertaking Greif will be made by our forces with American equipment, American weapons, American vehicles, American insignias -- especially the five-pointed white or yellow star may be painted on the vehicles.

"To avoid confusion with enemy troops, the forces employed in the Undertaking Greif will identify themselves to our troops:

During the day -- by taking off their helmets
By night -- by red-blue light signals with flashlights.

"Forces of the Undertaking Greif will also identify themselves to friendly troops by painting white dots on houses, trees and roads used by them."[8]

Increased Security Measures

Although higher echelons of U.S. Intelligence had been skeptical of the enemy's capability to summon a force of the size and scope indicated by the prisoner and documents captured in mid-November, First Army's G2 Estimate had warned: "...Their potential threat as infiltration units needs no stressing,"[9] and CIC had used this potential threat as a basis for improving the security of installations and towns in the forward areas.

CIC had given widespread publicity to each uncovered case of enemy troops in U.S. Army uniforms and civilian disguises through counterintelligence publications

8 1st U.S. Army G2 Periodical Rpt #190, dtd 17 Dec 44 in 12th Army Group G2 Periodical Rpts, L-320.0 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.); and History of the CI Activity of the U.S. Army in Europe, Annex 4, (Unclassified), (Staff and Faculty Library).

9 G2 Estimates and Periodic Rpts, FUSA, for Dec 44 in L-496 (1A), (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

and during security lectures, providing a background of knowledge for U.S. troops which ultimately proved its worth.

Informal phases of security education were being exploited also. Ninth Army CIC, for example, conducted a poster campaign in the XIX Corps rest area. This proved a valuable method for alerting troops to their security responsibilities.

Much CIC effort had been expended on various types of security checks. Front line divisions, growing increasingly wary of the authenticity that a U.S. uniform loaned its wearer, initiated spot checks of all vehicles forward of regimental command posts and of personnel in the mess-lines.[10]

Some divisions had anticipated the problem of the counterfeit uniform. Particularly prudent was the counterintelligence alert negotiated by the 29th Infantry Division on 5 December in which the 29th CIC cooperated.

Created expressly to guard against an invasion by U.S. - uniformed enemy troops, this alert lasted long enough for recurrent checks to be made. As a result, troops of the Division became highly security conscious and, even after the alert was over, a uniformed straggler, finding himself in 29th Division area, would be detained and turned over to the authorities.[11]

Travel and Frontier Control

By early December, travel and frontier control systems had improved throughout the 12th Army Group area. A complicated network of roadblocks, check points and control points, supplemented with roving patrols between the stationary posts "...seriously affected...the German Intelligence Service line-crossing operations."[12]

The mainstays of the frontier control line were the ADSEC CIC Sections assigned to First Army and employed on the Counter Intelligence Control Line which functioned along the German frontier.

Behind this line and assisting it were the other CIC teams which had been assigned definite territories to the rear of the Armies. These teams, too, were under ADSEC supervision. Shortly before the enemy offensive began, these teams were directed to establish, in conjunction with Belgian and French authorities, an

"Identity control line" in the ADSEC territory. Frequent checks of identification at crossroads, bridges, cafes, and hotels tightened security.[13]

In the Ninth Army area, 364 indigenous guards from several pre-war Netherland's governmental agencies and from resistance groups formed during the German occupation were used to man posts and patrols.

In the Third Army area, frontier control was relatively porous, for the situation had been less stable than in other sectors. Three captured Abwehr agents had told their Seventh Army captors that long-term agents going to the interior of France were being instructed to advance via Nancy and Toul, rather than risk apprehension in places where traffic was controlled more severely.

Reinforcement of the security produced by the Counter Intelligence Control Line was effected through the strict regulation of travel for the civilian population. In most territories, local civilians were permitted limited travel during specific hours. Farmers could harvest their crops by daylight. Special passes were provided by Military Government and Civil Affairs officials. Persons caught moving about after curfew or wandering along unauthorized routes were held suspect of subversive activity and detained until investigation proved their innocence. Initial violators of travel restrictions were punished harshly so that their cases might serve "...as a deterrent to others." CIC aided Military Government in the prosecution of these cases.

This web of restriction and interlacing checks often entangled German soldiers who wore civilian clothing behind the lines. These German soldiers in civilian clothes could have been sentenced as spies, but policy dictated otherwise. To encourage the desertion of German soldiers, Twelfth Army Group had established a procedure by which German soldiers in civilian clothes were to be treated individually, the disposition of each suspect depending on his behavior during interrogation and on his distance behind the lines at the time of his arrest.

Thirty-one German soldiers in civilian clothes who had been arrested in the first fifteen days of December by CIC units of the Ninth Army were handled in accordance with this policy, and all were evacuated through prisoner of war channels.[14]

CIC Agents Fight for Their Lives

Although the gradual discovery of the German Intelligence Service plan of deception, climaxed by the capture of the plans for Operation Greif on the first day of the German offensive, destroyed the effectiveness of this maneuver, the actual offensive which came to be known as the Battle of the Bulge, did catch the Allies by surprise.

In the resultant situation, many CIC Agents bearing the double burden of counterintelligence duties and combat, fought shoulder-to-shoulder with other U. S. soldiers. For example, half of Tractical Reserve Team No. 3 (TRT #3) of the 418th CIC Detachment, under command of 2d Lt. Kenneth Hardin, fought an invading force of German parachutists that descended on Bardenburg, in the Ninth U.S. Army area, on the first night of the German offensive, and by daylight, began attacking installations in the town itself and firing on traffic on the road. Lieutenant Hardin and Agents Edward E. McCarthy, Charles N. Short, Vincent Cleary, James H. Ratliff and Ferdinand Goetz directed and participated in skirmishing that resulted in rounding up twenty-four enemy paratroops. One paratrooper was captured by a TRT #3 Agent. Thirty-one German soldiers in civilian clothes also were rounded up.[15]

Some Detachments Overrun

Other CIC Detachments were less fortunate, for the swift German advance caused some to be overrun. In these instances, counterintelligence was of lesser importance than self-preservation.

Among the less fortunate units was the 99th CIC Detachment. Eight Agents of this Detachment were awakened on the morning of 17 December by the sound of fire from "burp" guns. Lt. Howard V. Stephens, in charge, issued an order for everyone to obtain weapons and to prepare to defend the house in which they were quartered. A seemingly endless line of German tanks appeared on the road, and an interpreter, who had been a scout for one of the regiments before joining CIC, volunteered to seek a way out for the group. By the time he returned with the news that the rear was open, German tanks were in front of the house, and CIC Agents held their breaths when one of the tank leaders poked the muzzle of his "88" into a window. The Agents, with the scout in the lead, scampered out the back way, dodging from shell hole to gun emplacement hole. In the dash toward freedom, the group split, and four went ahead with the scout while four others were pinned down in one hole by small arms fire. In the latter group, Lieutenant

15 Unit History of CIC Det #418, Tactical Reserve Team #3, p. 4, (Unclassified), (Staff and Faculty Library); and 12th Army Group Rpt of Operations, Vol. IV, p. 114, (Restricted), (Staff and Faculty Library).

Stephens and Agents Charles Sloan, Francis Cody, and Vic Gardin each took a corner of the gun emplacement hole.

Sloan cried out as mortar fire shattered tree branches over-hanging the ditch. Gardin crawled over to him, while Cody checked Lt. Stephens, who had not made a sound for some time. Stephens appeared to be dead. Cody, also wounded, then crawled over to Gardin and Sloan, whose back and one leg had been hit.

Cody and Gardin decided to leave Lieutenant Stephens and Sloan, who could not be moved, and try to get help from headquarters. They made Sloan as comfortable as possible, and left. Not far from the spot, they noticed a group of soldiers coming toward them. Convinced they were caught, Gardin waved part of his clothing on a twig in a gesture of surrender.

The group turned out to be U.S. soldiers from the 1st Infantry Division which was moving up. Medics with them gave Cody first aid and sent him to the First Aid Tent. Gardin and the medics returned to Lieutenant Stephens and Sloan, but found them dead.[16]

16 Interview with Francis J. Cody, NCICA Convention, Chicago, Ill., 8 Aug 54.

Chapter 2

CI CONTROL LINE THWARTS GERMAN INTELLIGENCE SERVICE

After the discovery, on the first day of the German offensive, that the Nazis planned to send large numbers of agents in U.S. uniform through the line as a part of this same maneuver, increased security consciousness and intensified counterintelligence efforts were experienced all along the American front. Before the German attack, military security had been uniformly satisfactory, but the German push made it better than ever.[17]

Immediately, Third Army After-Action Report noted "...the Counter Intelligence Control Line assumed an even more important role, for it represented the only existing cohesive means of preventing mass infiltration by enemy agents."

Third Army's travel control had been less effective than that of the other Armies on the line, but now tighter restrictions were enforced. "By the end of December, a well-organized and coordinated Counter Intelligence Control Line was functioning in all four Corps..."[18]

The ADSEC Counter Intelligence Control Line in the First Army area at Division straggler level was severed in the initial stages of the German thrust, but smaller, supporting networks of counterintelligence checkpoints and control posts remained fairly effective.

The aggressive intelligence and sabotage activities of the enemy called for the quick mobilizing of all available counterintelligence resources to meet the situation. Intensive checking of identity documents at bridges and defiles; reinforced guards for vital installations; the posting of a Counter Intelligence Control Line along all roads on the east side of the Meuse River which led to bridges; screening of refugees and displaced persons before allowing them to proceed--these were among the immediate counterintelligence measures that were instituted.[19]

ADSEC CIC Sections, even in areas not effected by the German advance, were recalled from frontier control positions to aid in the patrolling of the Meuse from Givet, France to Vise, Belgium.[20] They discovered that, even

as the German Army was pouring into the Ardennes, 250 Liege Communists held a meeting at Cinema Carrefour, Boulevard de la Sauveniere. Speakers indicated they would make another attempt to overthrow the provisional Pierlot Government and soon would begin a propaganda campaign by means of printed literature. ADSEC CIC made note of this continuance of Communist subversion.[21]

The Second Day: CIC Work Increases

By the afternoon of 17 December, the enemy had committed fourteen divisions into battle, half of them Panzers. U.S. units from reserve areas and the Third Army maneuvered to stem the drive and to bolster weakened forces. The main thrust of the German drive, on the northern flank, was blocked by the First Army. The attack on the center of the line was more successful, and the enemy had inflicted heavy losses on the 28th Infantry Division and the 106th Infantry Division by the end of the second day.

The tempo of counterintelligence work increased. For the first time in the European conflict, CIC was carrying out its mission in a withdrawal situation.

The 82d CIC summed up its counterintelligence tasks as follows in its Monthly Intelligence Report:

"The detachment resumed work in the combat area.... The enemy push.... created again a major civilian problem.... CIC Agents were attached to regiments and established at strategic road control points.... Initially, the organized evacuation of civilians could not be undertaken because of the fluid front....

"Enemy use of American uniforms, vehicles and other equipment resulted in redoubled security efforts, including the interrogation of....all men in American uniforms who could not produce positive identification.

"The questioning of civilians fleeing the front lines resulted in the collection of positive intelligence which was passed on to G2...."[22]

The Third Day: First Einheit Stielau Men Captured

The third day, 18 December, was highlighted for CIC by the first capture of members of Skorzeny's U.S. - uniformed and equipped Einheit Stielau. Three

21 12th Army Group Semi-Monthly CI Rpt #12, for period 16-31 Jan 45, L-381, dtd 31 Jan 45, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

22 Hqs, 82d Airborne Division, Monthly Intelligence Rpt, AC of S, G2, dtd 31 Dec 44, (CONFIDENTIAL), (Staff and Faculty Library).

men in an American jeep, detained by a Military Policeman at Aywaille when they were unable to give the password, turned out to be Officer Candidate Gunther Billing, Unteroffizier Manfred Pernass, and Obergefreiter Wilhelm Schmidt. Interrogation revealed that they had been operating in the First Army area for just thirty minutes, having crossed the front lines at Stumont.

They were dressed in the costume of the 150th Panzer Brigade: U.S. Army uniforms. They were without field jackets and leggings, and only one wore the regulation belt. Their military-type identification papers were fairly complete; yet they had no personal documents. They carried German soldbuchs. Each had a U. S. .45-calibre pistol, and their jeep's equipment included two portable radios, two machine pistols of the British "Stenn" type, a German Walter pistol, and six German egg-shaped hand grenades, in addition to U.S. rations and ammunition.

Further querying at the First Army Interrogation Center, to which the group was rushed by Agents of the 301st CIC Detachment, produced information concerning the strength of the German Intelligence Service in uniform. The prisoners estimated the strength of the brigade to be 700 to 1,000. Subsequent reports, however, indicate that 3,000 to 3,300 men, with a combat strength of 2,400 would be a more accurate estimate of the brigade's strength. The captives said that there were 150 linguists in the brigade, whose specific mission was to spearhead the German armored attack and cause confusion among retreating American troops.

The Einheit Stielau, as they described it, was not a closely knit group. It consisted of jeep teams of three or four Germans disguised as American officers and enlisted men. In addition to those who worked in conjunction with the armored units, other teams were specialists in demolitions and in communications sabotage. Still other teams had long range reconnaissance and sabotage missions.

While SS Lt. Col. Hardieck was the nominal leader of the Brigade, the prisoners named SS Lt. Col. Otto Skorzeny as the true leader of the operation. Later reports indicate that Hardieck was killed on the first day of the battle and Skorzeny assumed nominal as well as actual leadership of the brigade.

Their account of their training and outfitting showed they had undergone intensive preparation for their task, one which the German Intelligence Service evidently considered of the utmost importance to the success of the entire counteroffensive.

Of the three, Officer Candidate Billing was the most disaffected. He said, "I did not have any other choice. I had to obey orders or they would have shot me."

Unteroffizier Pernass, the driver and the poorest linguist, claimed, "I could have avoided our capture by the MP's but I wanted to sabotage our sabotage mission because I want the Americans to conquer."

Most laconic and most honest was Obergefreiter Schmidt's statement: "I admit that what I did was unfair."

The three were tried by a Military Court and found guilty. They were executed on 23 December 1944.[23]

The news of the capture of the first team from the Einheit Stielau was publicized widely. Any slight irregularity became reason for suspicion. The 301st CIC, which officially had arrested Billing's team, rounded up three Belgians who were in possession of articles of U.S. military clothing and a German soldier who claimed to be a deserter. All four were considered "potential enemy agents" until later investigations proved that none were of counterintelligence interest.[24]

CIC, of course, could not be concerned if four or, as happened at CIC Frontier Control Station No. 5 near Wintringen, forty-eight persons were inconvenienced by detention until they were cleared ultimately of counterintelligence suspicions.[25]

The Fourth Day: Assassination Plot Revealed

At 2310 on 19 December, an American jeep was stopped at a control point near a large bridge over the Meuse River. A Military Policeman from the 769th MP Battalion, in the presence of Agents from the 301st CIC Detachment, challenged the occupants and asked for the pass word. "Stamp," replied the officer seated to the right of the driver.

Although the correct answer had been supplied, the MP continued to investigate the authenticity of the passengers. He asked for the vehicle's trip ticket. Several were offered, all blank. Warily, he watched the passengers while he and the CIC Agents searched the vehicle. Their curiosity reaped dividends. German

Dutton & Co., Inc., N.Y., 1950, p.227. NOTE: Details of the 150th Panzer Brigade and the Einheit Stielau are contained in "Agents in the Ardennes," attached as Appendix 1.

24 1st U.S. Army Interrogation Center Bulletin #2, dtd 1 Jan 45 (CONFIDENTIAL), (Staff and Faculty Library).

25 4th CIC Det Daily Rpt, dtd 17 Dec 44, in 4th Inf Div G2 Journal, dtd 16 - 19 Dec 44, 304-23 (28588), (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

weapons and explosives were discovered, and the CIC Agents arrested the four occupants, all members of the Einheit Stielau. They were searched immediately. Beneath their jackets, they wore swastika armbands -- their method of identifying themselves to their German cohorts. The vehicle's markings, although correct, were freshly painted and roughly done. The name of the leader was Lt. Gunther Schulz. His co-riders included Lt. Karl Heinz Weisenfeld, Stabsgefreiter Hans Reich, and Feldwebel Manfred Browny.

The four were taken to the First Army Interrogation Center where CIC Agents and other interrogation specialists, questioned them further.[26]

Schulz proved a talkative fellow. He declared that the main effort of the German drive was toward the Meuse between Namur and Liege, and that U.S. troops could expect the dropping of a paratroop regiment at a critical time, in Leige, when SS[27] columns were advancing on that city. He named bridges to be reconnoitered by his team and later seized. Approximately seventy tanks, some captured American models as well as German tanks camouflaged to resemble U. S. armor, had the mission, according to Schulz, of exploiting a break-through, moving at night, going into the woods during the day while English-speaking soldiers reconnoitered American positions for an attack the following afternoon.

While outlining the objectives and tactics of the Einheit Stielau, Schulz made a startling statement. The prisoner said he had learned from the late SS Lt. Col. Hardieck that at an officer meeting in early December, Skorzeny had been given the mission of entering SHAEF headquarters in Paris to assassinate the Supreme Allied Commander, General Dwight D. Eisenhower, and other high ranking officials. Schulz said Skorzeny was to pass through France with fifty to sixty men, most of them attired in U.S. uniforms. Some, however, would be in German uniforms, pretending to be captured high-ranking German officers. Schulz named those who would be in the party and said that the group would rendezvous at the Cafe de la Paix or at the Cafe de L'Epee in Paris, where collaborators would join them and supply pertinent information.[28]

Skorzeny: A synopsis

To those who had heard the name Skorzeny before -- and, by December 1944, everyone in counterintelligence must have -- this fantastically bold plan seemed wholly believable.

For every war plant destroyed by the resistance groups in France and Denmark, Skorzeny's saboteurs had destroyed one factory devoted to the production of civilian commodities in those countries. He had engineered the rescue of Mussolini and the kidnapping of Admiral Horthy of Hungary. His successes (of which there were few) and his blunderings (of which there were many) were all spectacular. The tall scar-faced Austrian had risen quickly among Nazi leaders until, by December 1944, he could by-pass Schellenberger and report only to Himmler and Kaltenbrunner, head of the Reich Office of State Security (RHSA). Skorzeny was believed capable of any action, no matter how unethical, and counterintelligence experts looked upon the allegations of Lt. Gunther Schulz as highly credible.[29]

Schulz' information was passed on immediately, with the warning that the assassination party "...may carry concealed capsules of acid to facilitate escape..." and that they "...may be in staff cars, civilian cars, Command and Reconnaissance cars, as well as jeeps."[30]

29 12th Army Group Semi-Monthly CI Rpt #10 for period 16-31 Dec 44, dtd 31 Dec 44, L-320, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.); and Skorzeny's Secret Missions, by Otto Skorzeny, translated by Jacques Le Clerq, E.P.Dutton & Co., Inc., N.Y., 1950, pp. 238-250. NOTE: Although this was the "first substantial report of the Skorzeny assassination plan, an earlier hint may have been given by one of the captives of the day before (Billing's team) since Omar N. Bradley reports in A Soldier's Story that Eisenhower "...drove into the chilly caserne from Versailles in a heavy bulletproof car. CIC had insisted on the precaution after reports reached SHAEF that Skorzeny had dispatched a squad of assassins to hunt down the Supreme Allied Commander." Bradley, Patton, and Eisenhower -- in their books -- verify that this meeting occurred on the morning of 19 Dec 44, some 13 hours before Schulz's capture at Liege. However, Eisenhower, in Crusade in Europe, states: 'The story of the assassination attempt was brought to me on December 20 by a very agitated American Colonel who was certain that he had complete and positive proof..." The reports available and used by this history indicate the 20th as the date SHAEF was notified.

30 Record of telephone call from 1st Army to SHAEF, dtd 20 Dec 44, in FUSA G2 Journal, L-555, 19-20 Feb 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

Paris Dons the CI Cloak

Reports from the front lines to SHAEF Headquarters in Paris travelled fast; probably few reports produced such instantaneous repercussions as the news of an impending attempt on the lives of high Allied military commanders. Forty-three roadblocks were set up to obstruct mobile traffic. Innumerable checkpoints and identity check raids made the civilian population wary and limited their movement to necessities. The alleged meeting-places of the assassins, the Cafe de la Paix and the Cafe de l'Epee, were placed under continuous surveillance by CIC Agents.

For some time Lt. Col. Baldwin B. Smith, who bore a remarkable resemblance to the Supreme Allied Commander, impersonated General Eisenhower, riding from the General's residence in St. Germaine to SHAEF Headquarters in Paris each morning and returning each evening.

From this time on until after the reduction of the Bulge, one of CIC's major worries was that an assassination attempt would be made. There was never any reason to believe that the plan was not "...an enemy capability,"[31] and CIC continued to gather additional information on the plot from captured agents.

Hitler Jugend: Problem Children

With the arrest of line crossers Albrecht Heck and Karl Limburg by 2d CIC Detachment, also on the fourth day, the problem of the Hitler Jugend (Hitler Youth), previously only suspected, became a real one. These youths related much about this fanatical para-military organization of adolescents and pre-adolescents.

Both boys were from Butenbach, members of the Hitler Youth movement for several years. Through one Walter Dennis, a Stammfuehrer[32] of Malmedy for several years, they said they had received instructions: to throw nails upon the highways to harrass Allied motor traffic; to save small arms and ammunition and keep the supplies in hiding until they could attack American soldiers; and to gather and forward information about American troops and equipment.

Stammfuehrer Dennis, the boys said, gave his orders to the Scharfuehrer[33] in Butenbach to pass on to certain trusted members of his Schar. Information was to be returned through the same persons, if possible.

32 Stammfuehrer: Leader of a specific geographical area of the Hitler Jugend movement.

33 Scharfuehrer: Leader of a smaller geographical area, a neighborhood or district.

2462

Counterintelligence investigators wondered "...whether Dennis received orders from a higher authority...? Further, whether he had any system of communication with the Germans...and...how widespread would be the use of the Hitler Jugend organization?"

The 2d CIC Detachment had trapped in its travel control net two youths, and had uncovered "the first positive indication that subversive activities are encouraged by the Hitler Youth, and that the former organizational structure is being employed in part to give leadership to these activities."[34]

The First Army still held the northern flank of the salient, but the German drive through the center of the forest persisted. Civilians from the forward areas were on the roads and in the woods, evacuating the battle zones. As they moved rearward, civilians in that area became apprehensive about the German advance. In Sourbrodt, Belgium, members of the 1st CIC Detachment were on 24-hour duty checking identifications of all persons entering the region. Agents attended a conference with Civil Affairs and Military Government representatives, at which Gendarmerie Chief Eugene Bourton reported that a number of civilians, fearing an advance by the enemy into their locale, were preparing to evacuate. Bourton was instructed by CIC to calm the people and order them to remain.[35]

The fears of the civilians were based on the belief "that the Germans, remembering the activities of the resistance groups during their retreat in August and September, would impose drastic measures of revenge..." on the territories they re-conquered.[36]

All CIC units remained alert to the various types of security threats, turning over petty violators to local authorities.[37]

The Fifth Day: Einheit Stielau Increases Activity

Little changed in the tactical situation on the fifth day except that VII Corps of First Army had been regrouped and was capable of counterattacking. At noon on 20 December, however, the First and Ninth Armies came under control of the British 21st Group, headed by Montgomery, and offensive plans were postponed.[38]

38 A Soldier's Story, General Omar N. Bradley (Henry Holt & Co., 1951) Chapter 21.

ADSEC Com Z CIC personnel, whose control line had been disrupted in the first day of the German counteroffensive, had been regrouped, stationed at control points, and assigned to roving patrols. As of noon, 20 December, the ADSEC teams in First Army area had become part of the British 21st Army Group. This did not hamper CIC operations in progress. It worked well for ADSEC for, in addition to forty-five Military Intelligence Interpreter personnel from 12th Army Group, these Agents were permitted control of seven British Field Security Sections.

The main tasks of the Meuse River Control Line included: screening refugees and permitting none but frontaliers to cross the river; halting all civilian traffic crossing the river, with a few vital exceptions; complete checking of identifications of all civilians and military personnel; suspension of ferry and boat service; maintenance of 24-hour security posts by CIC, Military Police, and tactical troops; and questioning suspects and persons of questionable identity at small interrogation centers at each bridge post. [39]

Twelfth Army Group had received numerous reports by this time of suspicious telephone calls which possibly were made over tapped lines by enemy personnel.[40] As a result, all communication at Liege and Namur was suspended at the request of ADSEC, the Allied Censorship Group, and the SHAEF mission to Belgium. Reports of paratroop invasions were investigated with negative results. Guards were doubled at vital installations as a sabotage precaution.[41]

Security control of civilians after the beginning of the German push was difficult due to the increasing droves of refugees who had come westward from Luxembourg and eastern Belgium. These refugees were held along the Meuse River Line until screened, then sent southward out of the tactical zone to avoid jamming military roads. CIC, together with Military Police and Civil Affairs personnel, handled the situation as it developed.[42]

Many persons foreign to the tactical area who were found in these refugee streams, required special interrogation. For example, according to an ADSEC report, "Displaced Polish nationals arriving at the Civil Affairs Displaced Persons'

Camps in the Namur.../ were /...screened by the Namur CIC Detachment. During the screening, three German soldiers and one German national were discovered, arrested and sent to a prisoner of war enclosure."[43]

In addition to their security control and screening duties at the Meuse River Control Line, ADSEC CIC personnel later operated a travel control line which extended from Huy, on the eastern bank of the river, to Tienen (or Thienen), which guarded the approach to Brussels, the Belgian capital, and Antwerp, the seaport. This travel control line was approximately perpendicular to the Meuse River at the middle of the Namur-Liege base line.

CIC supervised Belgian police and Military Police who were making identity spot checks on highways, in cafes and in hotels. This travel control line added several miles to the depth of the Meuse River Control Line.[44]

Einheit Stielau Increases Activity

Another sign of the increased activity of the Einheit Stielau appeared at the end of the fifth day. Two German jeep teams, spotted on the enemy side of the line by troops of the 99th Infantry Battalion near Stavelot, were destroyed by fire from 75mm guns. One of the bodies was recovered by U.S. troops for verification.[45]

Further indications that the 150th Panzer Brigade was in the forward areas were added when three other Germans from the 5th Company, Special Parchute Regiment of the 2d Combat Group, were captured in the Heppenbach area. Wounded when taken prisoner, they were sent to the Field Hospital and later to a General Hospital.

Only one, Alfred Franz, alias American Corporal Ted Darland, was wearing a U.S. uniform. Ralph Jesch and Henry Pepetz, captured with him, however, wore German uniforms, and after being cared for medically, were tried by a U.S. Military Commission, acquitted, and evacuated as prisoners of war.

Franz was also tried, and found guilty.[46]

A Scharfuehrer Netted

The campaign against the Belgian Hitler Youth went on, Josef Sonnet, a Hitler Jugend Scharfuehrer from Butgenbach, was arrested by 2d CIC Detachment and charged with espionage and sabotage. Sonnet had informed Stammfuehrer Walter Dennis[47] of artillery positions and numbers of American troops and trucks in the area. Dennis, the leader of the whole Hitler Jugend organization in Butgenbach, was safe from the 2d CIC's vigilance because he was in German-held territory.[48]

Reports of German Intelligence Service Activity Circulated

As one countermeasure to the German Intelligence Service deception, a constant flow of information, aimed at uncloaking the disguised enemy, was fully circulated throughout the American sector. Some of the information, like the following excerpt from an Army Group report, discussed mannerisms:

"Prisoners have stated that the enemy has established certain methods of identifying German troops in American uniform. Germans will wear pink or blue scarfs and the top button of the blouse or overcoat will be left unbuttoned. To identify themselves...they...will knock twice on their helmets, and their vehicles will have the letter "C" or "D" on the left side of the hood. ...Enemy troops have been found to carry a small vial of sulphuric acid. These containers might well be overlooked in a cursory search, thus leaving the enemy with a valuable weapon for throwing in the face of his captor to facilitate escape or to commit further sabotage on the way to the PW Cages."[49]

Advice was given to those who would have contact with the invading force. Types of questions to ask suspected persons were suggested. Some of the suggestions included: "What is the password and the reply?" "What staging area did you pass through in the States?" "What is the price of an air mail stamp? Of a V-mail stamp?" "What is Sinatra's first name?"[50]

The Sixth Day: 150 Panzer Brigade Makes Try

The enemy continued to push westward in the Ardennes forest, but on the sixth day, 21 December, Patton's Third Army arrived to attack the bulging salient, toward Bastogne.[51] On this day also, the 150th Panzer Brigade made its first and last attack as an entity. CIC could justifiably claim a vital role in the defeat of this brigade, through wide-apread publicity given to the probabilities of such a plan and to the security education of troops which they had carried out.

Elaborate plans had been made for the mission of the 150 Panzer Brigade, which was to strike in the Malmedy area with jeep teams at their head. Only the Second and Third Combat Groups were designated to take part, as the First Combat Group was in another area to the rear.

The Second Combat Group was to attack from the southeast; the Third, from the southwest. Jeep teams of the Second were assigned to approach a roadblock at a bridge leading to the town, simulating part of a U.S. unit which had been cut off. These teams were to neutralize the roadblock and thereby permit the rest of the group to take the objective.

They had proceeded only about three miles from Lignueville when they crossed into a mine field. The column halted, and American small arms fire and artillery zeroed in on them. The fire was devastating, and most of their highly prized, captured U.S. vehicles were destroyed. A few succeeded in withdrawing.

The Third Combat Group in the southwest, three miles from Malmedy, was forced into combat by alert American forces. Finding themselves savagely opposed, unable to practice their deception, this enemy group also suffered heavy losses in personnel and equipment, including all their tanks. The commander, Captain von Foelkersam, was wounded.

Captured in the aftermath of the Second Combat Group's action was Gefreiter Otto Struller, one of the Einheit Stielau of the jeep lead teams. Struller, posing as Capt. Cecil Dryer or Pvt. Richard Bumgardner -- his AGO card had the first name and his "dog tags," the other -- was captured by troops of the 30th Infantry Division. He was immediately relinquished to 30th CIC.

A former ballet dancer, Struller chose to discuss his successes on the New York stage, but his interrogators were more interested in his failure in the Ardennes. He denied membership in Einheit Stielau or any organized band of English-speaking German soldiers, reiterating several times that he did not know with

51 A Soldier's Story, General Omar N. Bradley (Henry Holt and Co., 1951) Chapter 21.

which unit he had served prior to his capture and disclaiming knowledge that there was any organized deception practiced by Germans masquerading as American soldiers with U.S. equipment. He explained that his mission was merely one of reconnaissance, not sabotage or espionage. He said he had heard of Skorzeny's assassination mission, adding that it was already under way. He was tried, convicted and executed.

Einheit Stielau member Josef Kania was captured, along with two soldiers of the Third Combat Group. These men also said they had knowledge of the Skorzeny assassination plan.

While most of these reports placed Skorzeny enroute to his objective, a later report established his presence in front of the Hotel du Moulin in Lingueville on 21 December. He had been wounded slightly by shrapnel near the right eye.[52]

1st CIC's First Hitler Jugend Arrest

While 2d CIC Detachment had learned, two days before, that Hitler Jugend members had been directed to collect arms and ammunition, it remained for the 1st CIC Detachment to establish that some, at least, had carried out the order. Members of the Battery with the 32d Field Artillery had questioned a small boy in the vicinity when a carbine which had been leaning against a barn suddenly disappeared. When he reacted suspiciously, they searched his home and found a small cache of miscellaneous military equipment; a search of the barn revealed the missing carbine and ammunition for it.

When they turned the boy, Klemmens Esser, over to CIC, he implicated his brother, Peter, and a friend, Kornell Cuepper. At about this time, Peter Esser had been wounded by German artillery fire and was in a U.S. Army Field Hospital. Eventually, the story developed that the three boys had been instructed by a German non-commissioned officer to aid Germany by stealing American supplies and equipment to give the Germans on their return.

An informant later accused Klemmens Esser of cutting American telephone wires, and the youth admitted it, saying, "I did it for Germany."

Before CIC turned the trio over to the Belgian authorities for re-education, Klemmens Esser led them to the main cache of ammunition. The young lad had

52 Periodic CI Rpt, Hq 30th Inf Div, dtd 27 Dec 44, in 218th CIC Detachment Periodic Rpts, (CONFIDENTIAL), (Kansas City Records Center, Box 25098); and 12th Army Group Semi-Monthly CI Rpt #10, 16-31 Dec 44, dtd 31 Dec 44, L-320, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia), pp. 17, 25; and Annex 4 to History of the CI Activity of the U.S. Army in Europe, (Unclassified), (Manuscript in Staff and Faculty Library), pp. 66-68; and Skorzeny, op. cit. p. 247.

collected bayonets, .30 calibre ammunition, sixty-five hand grenades, and an assortment of other equipment.[53]

Civil Affairs and CIC

In Sarreguemines on 21 December, the sixth day of the attack, the combined efforts of Civil Affairs and the 303d CIC Detachment led to the capture of ninety-six deserters and the arrest of forty-six local Nazis and collaborators. A sound truck was sent about the city, broadcasting an appeal to the citizens to turn in deserters and to report mine locations.[54]

Some other CIC Detachments were not as fortunate in their relations with Civil Affairs. The problem of Civil Affairs lagging behind CIC units, which had begun in Sicily and by this time had become the rule rather than the exception, particularly plagued the 87th CIC Detachment. A recent arrival on the continent, the 87th CIC Detachment included in their first Counter Intelligence Report this statement:

"Despite the absence of Civil Affairs personnel in the area in which the detachment has operated, the civilian populace has remained under control.... Many of the functions that would have been performed by Civil Affairs officials have of necessity been performed by CIC Detachment personnel."

Each moment spent in the execution of Civil Affair's mission by CIC meant a proportionate decrease in the accomplishment of CIC's own task.[55]

The Seventh Day: Deceivers Are Deceived

Just as the announced plan of deception, widely publicized by CIC, had U.S. troops gazing warily at everything in olive drab, the same caution was exercised by German units who did not want to fire on their own men. The 1st Battalion of the 183d German Regiment, marching toward St. Vith on 22 December, shared this indecisive feeling. At a point where American forces ordinarily would have fired, five Sherman tanks in position along the side of the road remained silent. Breathing more easily in the belief that the tanks were manned by members of the 105th Panzer Brigade, the German Battalion resumed marching. When the column was

53 1st Inf Div CIC Rpt, dtd 24-25 Dec 44, in 1st Inf Div G2 Journal, 301-2.2 (22892) 30-31 Dec 44 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

54 Civil Affairs Weekly Bulletin, #28, dtd 21 Dec 44, Hq Third Army (CONFIDENTIAL), in 103d CIC Det History, Jun 43-Jan 45, (Kansas City Records Center, Box 25096).

55 Counter Intelligence Rpt #1, 87th CIC Det, 13-20 Dec 44, in 95th CIC Det Rpts File, Sep 44-Jun 45 (Kansas City Records Center, Box 25095).

fully abreast of the tanks, the road suddenly rocked under the impact of the fire from the American armor. Fully half the battalion was killed or wounded; the remainder scattered in panic. The deceivers had become the deceived.[56]

Not all of CIC's work, even during the Battle of the Bulge, was in catching spies; routine duties also had to be taken care of. Among these were exaggerated rumors of the German advance. As a result of backtracking one such rumor, the 205th CIC Detachment captured and arrested Thomas Kuck and Louis Marechal who, having been released from prison in Malmedy during the German advance to seek asylum in the rear areas, had become self-appointed commentators. CIC turned them over to the Belgian authorities for further investigation and disposition.[57]

In Huy, Belgium, CIC neatly side-stepped a request by Front de l'Independence (FI) to be re-armed by advising them that it had no authority to grant such a request.[58] Elsewhere 301st CIC arrested a German soldier in civilian clothes and sent him through regular Prisoner of War channels.[59]

The Eighth Day: More Information Regarding Assassination Plot

The weather which had frozen Allied air power to the ground -- the cloudy skies, snow-filled and cold -- cleared suddenly, on 23 December, and new forms were seen in the sky as wave after wave of Allied aircraft added their weight to the battle.[60]

Frustrated in its tactical and long-range sabotage and espionage missions, the 150th Panzer Brigade sent seven of its members in U.S. uniform, on foot, behind American lines with the mission of locating a U.S. artillery battery near Geromont. Through conversations with the gun crew, the seven were to secure information concerning positions and intentions of the battery. The American artillerymen proved poor hosts and poorer quiz contestants, and the seven spies were detained and taken to the 30th CIC Detachment. This detachment rushed the group to the 301st CIC with the same speed with which the alert soldiers of the 117th U.S. Regiment had delivered the captives to them.

60 A Soldier's Story, General Omar N. Bradley, (Henry Holt and Co., 1951), Chapter 21.

More information was gained concerning the Eisenhower assassination plot. Naval Sergeant Horst Goerlich said that he had heard Hardieck discussing the plan, which included the dropping of parachutists near Paris to aid the expedition. This statement added impetus to the threat since unconfirmed reports of parachutist droppings near Paris had been received on 20 December, three days before.

Acting Corporal Rolf Benjamin Meyer, alias Lt. Sammy Rosner, also substantiated previous versions of the plot, adding that the alleged assassins would have Nipolit, a plastic explosive, and specially manufactured poisoned ammunition.

Goerlich, Meyer and their five associates were executed on 30 December, four days after their sentence by a U.S. Military Commission. All seven had been members of the Einheit Stielau.[61]

Also, on 23 December, an Axis subject outside of the 150th Panzer Brigade revealed some knowledge of an "Eisenhower mission." An Italian prisoner of war from the Penal Colony of the 1st SS Division said that two German soldiers had told him of the plan. Except for the additional information that six trucks and British uniformed operatives would be used, his report was substantially the same as the others.[62]

Other intelligence agencies assisted in the development of information which would increase the probability of apprehending subsequent teams of these infiltration agents. Ordnance Intelligence, for example, determined that the money found on the captives was not counterfeit or else it was "...the best...ever seen." They also added to the fund of information about the jeeps used by the Einheit Stielau, by checking the vehicles. Among other equipment, the jeeps had especially built-in gasoline tanks.[63]

63 Record of telephone conversation, 23 Dec 44, between Ordnance Intelligence and G2 1st Army in L-555, 1st U.S. Army G2 Journal and File, 23-29 Dec 44, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

The Ninth Day: Action Slows Perceptibly

Patton's Army drove a wedge toward Bastogne. The German advance continued in the center. All over the front, action slowed down perceptibly.

The ninth day, ending on Christmas Eve, yielded little of counterintelligence importance. The 301st CIC arrested two aliens in U.S. uniform, Russians who had been laboring for the U.S. Army. They were evacuated as displaced persons.[64]

The Tenth Day: Assassination Fears Wane

On Christmas Day, Patton's units steadily closed the breach between themselves and the 101st Airborne Division, stubbornly defending Bastogne.

Most counterintelligence specialists were growing increasingly skeptical of the rear area threat of assassination, but counterintelligence measures designed to protect key Allied leaders remained in force. Even the Commanding General of the Twelfth Army Group was affected. As General Bradley described it:

"Fearful that a detachment of Skorzeny's assassins might have penetrated the city of Luxembourg, Sibert had tucked me under an elaborate security wrap... Sibert evacuated my C-47 from the Luxembourg Airport...to a night fighter base... at Etain. I instructed Major Alvin E. Robinson to fly the plane from Etain and pick me up at Luxembourg, only two minutes' flying time from the German line... But, when Sibert got wind of these plans, he protested so strenuously that I abandoned the idea and...we took off from Etain..."

The Eleventh Day: "High Water Mark"

The "high water" mark was reached on 26 December when Harmon's 2d Armored Division defeated its German counterpart, the 2d Panzer Division, and the German advance was halted. The enemy had reached a point seventeen miles from Dinant. Now Patton's column had reached Bastogne and the enemy, facing possible disaster, slowly withdrew.[65]

By this time also the real threat of assassination had ended. To many, CIC's sensitivity to the possibility of such action had seemed overly zealous. Eisenhower, in his Crusade in Europe, was critical of the "Extraordinary fears" of the "Security Corps."

64 1st U.S. Army Interrogation Center Bulletin #2, dtd 1 Jan 45 (CONFIDENTIAL), (Staff and Faculty Library).

65 A Soldier's Story, General Omar N. Bradley (Henry Holt and Co., 1951) Chapter 21.

"I was irritated," he wrote, "at the insistence of the Security Corps that I definitely circumscribe my freedom of movement, but I found that unless I conformed reasonably to their desires they merely used more men for protective measures."[66]

His naval aide, Commander Harry C. Butcher, titled the entry in his journal Saturday, December 23, 1944, "Prisoner of Security Police," and wrote as follows:

"There are all sorts of guards, some with machine guns, around the house, and he (Eisenhower) has to travel to and from the office led and at times followed by an armed guard in a jeep. He got some satisfaction yesterday in stepping out for a walk around the yard in deep snow, in the eyes of the security officers quite the most dangerous thing for him to do."[67]

Skorzeny Denies the Plan

Otto Skorzeny, perhaps the only man who would know whether he had ever planned an attack on the Supreme Allied Commander, has never admitted to it. In his megalomaniacal account of his victories and defeats, Skorzeny's Secret Missions, Skorzeny protested greatly against any claim of his participation in any assassination plot. He suggested that such an attempt, if successful, would have been a "frightful crime." Perhaps he protested too much.

Exit German Intelligence Service

The 150th Panzer Brigade and the Einheit Stielau had attempted small commando-type infiltration, deceptive reconnaissance, and full-scale tactical warfare. At each turn, they had been beaten.

Skorzeny, upon his capture, claimed only two successful missions for his Einheit Stielau, but amended the number to four in his book. The four, he stated, "...offered such clear and precise reports that their veracity could not be suspect."

66 Crusade in Europe, Dwight D. Eisenhower, (Doubleday and Co., N.Y., 1948), pp. 359-360.

67 My Three Years with Eisenhower, Captain Harry C. Butcher, USNR, (Simon and Schuster, New York, 1946), p. 728.

He added that two or four more teams may have crossed the lines, two being captured. Skorzeny gives no account of the other two teams.[68]

Reasons for Failure

The German deception had failed largely because roadblock personnel and roving guards had used the information collected by CIC interrogators and disseminated it rapidly to aid in the identification of the infiltrating units. The following activities became almost routine:

1. With vehicles, attention was directed to the rear, especially for radios and sabotage equipment.

2. Helmets were checked for the presence of markings which, among Allied forces, designated officers and non-officer personnel. The Germans had overlooked this design element.

---

68 Annex 4 to History of the CI Activity of the U.S. Army in Europe (Unclassified), p. 71, (Manuscript in Staff and Faculty Library); Skorzeny's Secret Missions, by Otto Skorzeny, translated by Jacques Le Clerq, E. P. Dutton & Co., Inc., N.Y., 1950, pgs. 243-246: The number of successful missions is open to controversy. Records indicate that one Lt. Stodick's team infiltrated and returned, and Skorzeny's revelations of the activities of an early group (probably Stodick's) are rather complete and almost wholly believable, in view of the turmoil created by the first one or two days of the German counteroffensive. His stories of the other three "commandos" are vague, and Skorzeny confuses the issue further by an earlier reference in the same chapter about three "groups" which were to look for a possibility of infiltrating the U. S. lines "so as to carry out their various missions to the best of their abilities." He mentions only one of these had returned with information, not about the American situation, but that the Germans had taken the town despite heavy opposition. The other three cases of accomplishments cited by Skorzeny are so commonplace among propaganda stories as to be of doubtful veracity. Furthermore, U.S. records indicate the capture of six different groups, four of which were linked through personnel to the Einheit Stielau, and report the destruction of two jeep teams, traditionally Einheit Stielau -- aside from the defeat of the brigade at Malmedy and a later mention of the killing of 17 OD-clad Germans by Third U.S. Army soldiers. It is difficult, if we accept Skorzeny's own figure of eight attempted penetrations by Einheit Stielau teams, to credit him with more than two successes, the second being highly hypothetical. That number -- two -- is interesting because it corresponds to the number Skorzeny originally cited.

3. Passwords were demanded and those who did not know the word currently in effect were scrutinized quite carefully to make sure they were genuine American personnel.

4. Since the driver usually was the poorest linguist among the members of the Einheit Stielau teams, drivers of vehicles were questioned throughly. No one could answer for him.

5. Vehicle trip tickets were examined in rear areas.

6. Any soldier possessing U.S. or British currency was suspect.

7. Identity documents were checked carefully. CIC had warned that: the Germans would use their pay-books to identify themselves; all Germans in the Einheit Stielau carried AGO #65-4 identity cards although few authentic ones were in the theater; and few Germans had "dog tags" (since they were not issued and it required personal initiative to confiscate them from U.S. prisoners of war).[69]

Other Einheit Stielau Men Captured

Throughout records of the Ardennes Campaign there were scattered references to other captures of teams of the Einheit Stielau. One report, for instance, mentioned the capture of a team when "they took a vehicle to an Ordnance Maintenance Unit for repair."[70] Other reports indicated heroism and alertness on the part of an individual soldier, who finding himself caught by two of the imposters, berated them in German for "interfering with his mission," and walked away, only to return later with reinforcements that captured one German and killed the other.

Though some of these reports were widespread, no unit or individual identification, no location, and no reports of interrogations are available which would serve to verify them.[71]

Typical Day-by Day CIC

A picture of representative CIC activities during this period of German advance was provided by the report of the 106th CIC. Prefaced by the statement, "A brief

69 Annex 4 to History of the Counterintelligence Activity of the U.S. Army in Europe, pp. 56-59, (Unclassified), (Manuscript in Staff and Faculty Library).

70 G2 Periodic Report #199, 1st Inf, Div., dtd 26 Dec 44, in L-555, First U. S. Army G2 Journal (Unclassified) (Departmental Records Branch, AGO, Alexandria, Virginia).

71 Annex 4 to History of the Counterintelligence Activity of the U.S. Army in Europe, p. 72, (Unclassified), (Manuscript in Staff and Faculty Library).

outline of activities of the 106th Counter Intelligence Corps Detachment from Saturday, 16 December 1944 through Tuesday, 26 December 1944 follows...," the document covered the 11-day period in diary fashion. Captain Jensen, Commanding Officer, admitted, in a postscript, that this report was not in accordance with the SOP dated 12 December which his detachment did not receive until after he had prepared his version. "Due to the fact of continued movement and emergency measures confronting this detachment," he commented, "it is deemed advisable to submit the report of activity in the above form." As such the report gave an accurate picture of one CIC Detachment's total effort during the period of German advance and revealed, in part, the following activities;

"Saturday, 16 December 1944: The 106th CIC Detachment was located in the town of St. Vith, Belgium....Shelling....began on the previous day and various units...left the town for...Decatur Rear...

"This Detachment continued its work of interviewing the many civilians...apprehended by guards... Passes for travel from St. Vith had been cancelled and no new ones were issued.

"...Lt. Jordan and Special Agent Underwood left St. Vith with CIC equipment for Vielsalm at 1600. Capt. Jensen and Agents St. Germain, Sullavan, Moore, and Jordan remained in the town to carry on with CIC work.

"Sunday, 17 December 1944; Members of the 7th Armored Division were contacted...in Vielsalm and an office was established...

"In the meantime (1700, 16 December 1944) members of the CCB Team of the 7th Armored Division CIC...in St. Vith...worked with Capt. Jensen and the 106th Detachment Agents.

"CIC Headquarters were set up in Vielsalm...St. Vith was cut off from communication.

"The 106th CIC Agents...interviewed civilians who were apprehended by guards. All credentials were inspected and those persons who were not from Vielsalm were forbidden to travel. Vielsalm civilians were instructed not to leave the town proper.

"Monday, 18 December 1944: Communication with St. Vith remained closed.

"Civilians in Vielsalm continued to jam the office seeking travel permits. These were denied.

"Capt. Jensen and Agents Sullavan, Moore, and Jordan left St. Vith at 1700 for Vielsalm when shelling of that town made it untenable. Theirs was the last tactical unit to leave. Agent St. Germain left at 1600 with three informers for Corps.

Tuesday, 19 December 1944:

"Records of the Nazi Party in St. Vith and adjoining towns, which had been collated by the 106th CIC Detachment, were turned over to the 7th CIC Detachment for their use in the Krombach section.

"The 106th CIC Detachment immediately mobilized Belgian Army members and members of the...Belgian Gendarmerie and then screened all members... These men were...placed on all roads, paths, and other vantage points as guards...to apprehend...civilians traveling on the roads or through the woods.

"Vielsalm is now closed to all travel from within and from without.

"It was announced by the 106th CIC Detachment that all residents of Vielsalm must obtain a "pass" or means of identification which would be issued by the 106th CIC if they were to travel on the streets of Vielsalm.

"Those persons whose loyalty was questionable were searched and then cleared; quartered in Vielsalm; or detained in the guardhouse of the Belgian Barracks, occupied by the Decatur Headquarters, and the Prisoner of War cage operated by the 7th Armored Division.

"A screening section was set up in the school house of Vielsalm and members of the Military Government section aided agents of the 106th CIC Detachment in screening all civilian residents of the town. Some 2,000 persons came to the school for identification cards.

"Credentials of all were certified and vouched for by the banker in Vielsalm who had recently been appointed head of the town bank by the Belgian government. Identification cards were printed by the 106th CIC Detachment on United States government water-marked paper. These cards were not good for travel, but were used merely as a means of identifying civilians of Vielsalm

and as an aid in apprehending. . .strangers who might and did come to town.

"Wednesday, 20 December 1944: Part of the 106th CIC Detachment was occupied the entire day continuing interviewing and issuing clearance identification to civilians of Vielsalm.

"For the record -- all Belgian guards ...remained at their posts and were at the appointed places when a detail was dispatched to pick them up at evening.

"In the evening and throughout the night, guards... continued to bring in civilians...

"Thursday, 21 December 1944: 106th CIC Detachment Agents continued clearance...of civilians...

"Some 30 civilians...(from) St. Vith arrived in Vielsalm... were...quartered...in the schoolhouse.

"Friday, 22 December 1944: Notification of the moving of Decatur Headquarters to Vaux Chavanne was received. Instructions were given 106th Military Police regarding civilians they were holding on orders from the 106th CIC Detachment. The 106th CIC Detachment, along with the Military Government team, left for Vaux Chavanne and then proceeded to Werbomont where CIC Headquarters were set up.

"Agent St. Germain arrived back from delivering the three informants...

"Saturday, 23 December 1944: Early on this date the 106th CIC Detachment left Werbomont for Ernoheid, Belgium, where Forward Decatur was located. Headquarters were established in a farmhouse and Decatur Headquarters, Military Police and other units notified. The day was occupied in making out Arrest Forms for persons turned over to the Military Police by the 106th CIC Detachment for return to Corps, and with security trips around the vicinity and with interviews with residents.

"Sunday, 24 December 1944: The 106th CIC Detachment remained in Eronheid and continued security trips and conversations with residents....

"Monday, 25 December 1944: Word was received that Decatur was moving to Aywaille. The 106th CIC Detachment moved.....

to Awan and set up headquarters. Headquarters, Military Police and Message Center were notified of the Detachment's location.

"Tuesday, 26 December 1944: Two teams of two agents each were dispatched to the following towns: Harze, Ernoheid, Werbomont, Harre, Aywaille, Spirment, Oneux, Hoyemont, and Comblain La Tour, to contact S-2s or their representatives and inform them of this Detachment's Headquarters and to establish screening areas.

"Contact was made again with the 7th Armored Division CIC."[72]

Chapter 3

CIC DIVISIONAL DETACHMENTS IN THE ADVANCE

Their whole Ardennes offensive a failure, the Nazis painfully withdrew along the roads back to Germany. By 16 January, a month after the break-through had begun, the "Bulge" was virtually non-existant and the front line was approximately at its 16 December location. In some places deeper Allied penetrations into Germany had resulted. A general cleaning up of the area continued until the end of January, and then, once again, Allied forces for the most part waited for the final offensive that would carry them deep into Germany.[73]

With the U.S. Armies regaining territory they had liberated once before, CIC detachments joined in the advance, a role to which they had become accustomed prior to the Bulge.

One of the surest signs of the renewed forward motion was the transfer of territories from Divisional CIC level to Corps CIC level. On 26 December, when the situation had turned in favor of the allies, 4th CIC relinquished the files on eighteen towns, the subversive files, all dossiers on outstanding cases, and a list of people on house arrest to Agent Harold B. Proudfoot of XII Corps CIC.

Among the outstanding cases turned over were those of
had been a prewar informant for the Germans, furnishing them with information about fortifications in Lorraine, troop movements, and civilian morale. a former member of the Deuxieme Bureau of France, had been arrested by Gestapo agents and later released. He was noticed afterwards to be a frequent associate of suspected Gestapo agents. traveled widely, operated in the Black Market under the German occupation, and was believed to be an informant responsible for the execution of a Luxembourg Customs official. The 212th CIC suspended the investigation on 27 December. Not enough evidence for conviction could be found, but the three were sent to Third Army Interrogation Center with a recommendation for internment for the duration. By 28 December, XII Corps CIC had relieved the 4th CIC in the area.[74]

For the remainder of the Ardennes battle, Agents of the 4th CIC Detachment screened natives of each town in their area, investigated wire-cutting reports, apprehended deserters from the Wehrmacht, placed under house arrest people

73 Bradley, Omar N., A Soldier's Story, Chapter 21.

74 4th CIC Det Rpt in 4th Inf Div G2 Journal and File, 304-2.3, (Unclassified), (28588), (Departmental Records Branch, AGO, Alexandria, Virginia).

who were suspect but against whom there was not enough evidence for more severe action, manned control posts and roving patrols, enforced curfew regulations and travel restrictions, a: l established liaison with other agencies and town officials.[75]

Travel restrictions and control line operations that had been coordinated with curfew arrangements required liaison with other CIC Detachments in the bordering areas. The 4th CIC worked closely most of this time with 5th CIC in organizing a joint control line. A number of people were apprehended, including one Office of Strategic Services operative, returning from Germany.

One instance of omission, however, resulted in a two-day investigation which could have been prevented by a two-minute liaison stop. Two men in a jeep marked "CIC Det 11-2" were seen in the 4th Division sector, where they asked about deserters. A sheet of carbon paper, which the alleged agents dropped, bore the barely discernible name, "Capt Wiggard." Since CIC Detachment 11-2 was nonexistant and no Capt. Wiggard was known, an investigation was started; after two days, Agents of the 4th Detachment learned that both the Captain and the jeep were from the 5th Division CIC Detachment.[76]

Lack of proper liaison between two Civil Affairs Detachments caused 4th CIC some additional confusion. The Inter-Allied Mission's Civil Affairs Detachment in the city of Luxembourg had been issuing passes to permit entry into 4th Division territory, without the Division's own Civil Affairs being aware of it until CIC began rounding up numerous persons holding these passes. When CIC informed the local Civil Affairs of the situation some hasty post-arrangements were devised which solved the problem.[77]

At the end of January 1945, the 4th CIC Detachment, commanded by Capt. Oliver D. Appleton, was operating with its Division along the Luxembourg border. Here, they encountered a problem which they were to experience many times in Germany. The difficulty was created by the procedure of requisitioning a few rooms in a dwelling for use as a division CP and allowing the family to occupy the rest of the dwelling upon the promise that they would not enter the military portion.

The S2 of Division Artillery reported the case of one who lived in the house in which Divarty Headquarters had been established. The woman's husband, it was learned, was in the SS and he visited her quite often.

77 Ibid.

Further investigation revealed that a sealed document of instruction about the severing of communication lines was in her possession. CIC apprehended the woman and her two brothers and turned them over to VIII Corps CIC in Bastogne.[78]

Other Divisional CIC Activity

By the end of 1944, certain counterintelligence problems and techniques had become repetitious and their handling nearly automatic. But new problems arose and required new techniques as shown by the activities of the following divisional detachments.

One of these pressing problems was the handling of civilian suspects when there were no detention camps within a reasonable distance. The 1st CIC Detachment, under 1st Lt. C. G. Steinway, was baffled by this problem and sent Agents to three different Civil Affairs units to seek a solution. When they could offer no help, 1st CIC was forced to transfer persons suspected of subversive activity to collection centers for displaced persons.[79]

This improvised procedure resulted from failure to follow Twelfth Army Group's SOP which specified that Civilian Annexes would be provided at Prisoner of War enclosures for interning civilian suspects.[80] This lack of facilities made it necessary for CIC agents to taxi the suspects to the Displaced Persons Centers personally because Civil Affairs trucks were overburdened with bona fide displaced persons.[81]

Fortunately, immobilization by placing a suspect in a Displaced Persons Center made it easier to retrieve the person if CIC later uncovered proof of subversive activity. a for example, had been sent to a Displaced persons Center in Verviers as a security threat. He became more than a "security threat" when a line crosser known as named as his contact. captured at regimental level, readily admitted that he was an enemy agent. CIC recommended that be arrested at the Displaced Persons Center.[82]

2482

GI Plus Girl Equals Possible Security Breach

Among the many problems encountered by CIC agents in the ETO was one that CIP Agents in World War I had battled, i.e.: Some soldiers talk too much. One who called himself "Hans" for example, obtained from his friend, Katie Wei, a housemaid at the Germania Hotel in Robertville, the name of a girl in Weywertz with whom he might become acquainted. "Hans" explained that he would be in Weywertz on 15 December and that the rest of his outfit would arrive on the following day. Katie must have repeated the information for it eventually came to the ears of Maj. Lauten, 16th Infantry Regiment S2. CIC started a full investigation. Finally, the Assistant S2 of the Regiment, furnished with the results of the CIC probe, had enough information to locate the talkative soldier.[83]

The 1st CIC detachment performed an odd, but valuable service for Division G2. On 8 January, Agents Henri Diron and Adrian J. Pinsince, Jr., were dispatched to the l'Inprimerie Desoer, rue Ste-Veronique, 21, Liege to insure the security of intelligence documents, classified SECRET, which were to be bound at the shop. The agents explained the necessary security measures to the Administrateur-delegue, M. Henri Desoer, and two assistants. A list of workers in the shop was obtained and submitted to CIC Headquarters where a police check revealed no subversive records. A CIC survey of the firm's activities revealed no subversive connections. When the material was delivered to the bindery, the agents went on 24-hour duty. Irregular spot counts of bindings were made. At night, the agents slept in a locked shelter next to the material which was collected at the end of the day and nailed into boxes. The binding was carried out smoothly, aided by Civil Affairs personnel who quickly approved the employer's request for travel privileges for a special craftsman who lived outside the area limits. The resourceful CIC agents on this assignment undertook an extra-curricular survey of the 123 employees of the plant, learning that 93 had been robot-bombed out of their homes. This information they added to their own visual observation, concluding that 75 percent of the homes in Liege had been damaged or destroyed by the German robot bombs.[84]

The Wire Cases

Capt. Lyndon B. Allen's 5th CIC Detachment operated in two different areas during the mopping-up campaign in the Ardennes. In each, the Detachment was plagued by trouble with wires.

83 1st CIC Det Dr, 15-17 Jan 45 (22292), (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

84 1st Inf Div G2 Journal, 13-14 Jan 45 Entry Jan 13, 1400 No. 51 from CIC "Report on the binding of 'Selected Intelligence Reports'...." (Unclassified).

In the first case, an enlisted man of the 705th Ordnance Company discovered a wire strung across the Boulevard L'Alcette, Luxembourg City, near the Cafe de Boulevard. From a telephone pole, the wire ran to a lamppost and then across the street, where it was tied loosely to an iron fence. The wire sagged to within four feet of the boulevard. An interview with a hardware store owner revealed the wire was similar to wire he sold which was made in Cologne, Germany. The investigation was inconclusive, and agents on the case consoled themselves in the belief it was the work of an inexpert saboteur.

Equally frustrating to members of the 5th CIC Detachment was a severed wire which was reported on 20 January 1945. This wire, the forward communication line of the 46th FA Battalion, had been cut in an open field by pliers. No road ran through the field, and the wire was paralleled by two others which were undamaged. At the same time, another battalion communication line had been shorted, the line repairman asserted, by someone with a knowledge of communications. At neither place did soldiers on duty remember seeing anyone in the vicinity around the time of the incident; they were about 100 yards away when the tampering supposedly occurred.[85]

During this period 155 individual suspects were handled by the Detachment. Of these, 109 cases had been turned over to 5th CIC by the 83d CIC which had preceded them into the area. An additional 262 civilians, mostly from front-line towns, were screened, and thirty-three deserters from the Wehrmacht were investigated and permitted to remain at home. Twelve civilians, apprehended while traveling without proper authorization, were investigated for Civil Affairs and turned over to them. Security surveys were conducted in seventeen towns in Division area. CIC agents of the 5th CIC arrested eleven persons, evacuating them to Luxembourg City. Of these, four were Luxembourg citizens who had deserted from the German Army, three were German citizens who were apprehended as deserters in civilian clothes and placed in Prisoner of War channels, and the remaining four were Luxembourg citizens who were considered security threats in the area.[86]

Women Suspects

During this period, agents of the 509th CIC Detachment of the 9th Armored Division were having their problems, predominantly with pro-Nazi women.

An in the village of owned a drug store. Persons of German nationality in the town, it was reported, had not registered as required

by French law because they said would expose them if the German Army returned. They said had been the favorite of German officers, Nazi officials and SS members during the occupation. Her relatives were said to be prominent in the German Army and in the Gestapo. On 7 January she attempted to obtain the password from an American soldier. All persons interviewed concurred in the opinion that she could be dangerous. CIC kept her under observation.

Agents operating in Ay-sur-Moselle had similar reports on a German national, known only as As a leader of German women's groups including the Deutschemaedel, was said to have coerced young girls into Nazi organizations. She was reported to have maintained a close relationship with civilian Nazi leaders in the town before the Americans arrived. CIC Agents arrested her and placed her in the custody of French authorities at Thionville.

was reported to 509th Detachment by a confidential informant who said the woman had been in the vicinity for only two weeks. Of unknown nationality and residence, allegedly had escaped from Berlin to France in the underground, aided by Edelweiss, an anti-Nazi organization. Since information on these activities was much desired, an intensive search was made but she could not be found.[87]

A Stay-Behind Is Uncovered

When the 17th Airborne Division's CIC Detachment arrested He confessed that he was a stay-behind agent for Germany. was sent to US Third Army Interrogation Center with his signed confession. He seemed to have been the only bona-fide agent reported during this period.[88]

A reminder that CIC agents were still performing combat intelligence missions was carried in the "War Diary" of the 17th Airborne's CIC Detachment. The entry for 6 January states, "Prendergast worked with various Regiments in Normandy movement to secure positive intelligence.[89]

Efficiency vs. Security

As U.S. forces moved from countries they had liberated into countries they would occupy, Civil Affairs changed its name to Military Government.[90] The change of name, from Civil Affairs to Military Government, however, did not alter the tendency of some officials to minimize security in favor of efficiency of government. A theory that governmental efficiency could be secured most easily by retaining the status quo as much as possible often led officials to give suspected Nazis the benefit of any doubts raised by CIC which had not been fully substantiated.

Undesirables at times received provisional clearances on the basis of sketchy investigations. As expressed by Capt. Noah Pennewell, 26th CIC Detachment Co, "It must be remembered that a detachment working with an infantry division has very little time to devote to any particular case, due to the fact that it is required to keep pace with the forward movement of the division. Therefore, it has been, of necessity, a general practice with this detachment to make quick decisions upon all matters coming to our attention."[91]

Although later CIC detachments might discover additional or substantiating derogatory information, Military Government officials sometimes referred to the initial clearance as authority to preserve the functioning government. This practice caused difficulties in liberated areas; in occupied areas it became extremely detrimental to security.

Particularly difficult was a situation that arose between the 29th CIC Detachment and the Military Government authorities in the area, which finally was settled by the Commanding General of Ninth Army in mid-January after more than a month of squabbling between the two organizations. Although the final argument in which the Ninth Army Commanding General intervened had to do with Military Government's retention of Nazis in office, it had been preceded by Military Government's release of three law-breakers arrested and investigated by the CIC Detachment. 1st Lt. Ellis O. Mayfield, 29th CIC Detachment Commander, had protested this action in special report to the 219th CIC Detachment and to the 29th Division Commanding General. Pointing out that these incidents had "caused this unit considerable embarrassment and...will result in the U.S. Military Government being held in ridicule," Lieutenant Mayfield concluded:

"It is believed that the failure of Military Government to take a firm stand in regard to violations of proclamations is highly detrimental to American standing

90 The Army Almanac, p. 757.

91 Monthly Information Report, 26th CIC Det, Hq 26 Inf Div, dtd 14 Feb 45, (CONFIDENTIAL), (Staff and Faculty Library).

in this community and is not in accordance with the policy outlined by higher headquarters which has stressed the importance of firm orders, fairly given but strictly enforced against a militant people who understand nothing else." 92

The difficulty was finally resolved by a letter which Lieutenant General Simpson, Commanding General of Ninth Army, ordered sent to the Commanding Officer of the Military Government Detachment FIH2, directing Military Government to replace all Nazi officials, collaborators, and sympathizers with non-Nazis. "No exception will be made on grounds of administrative convenience or expediency," the letter specified. The letter quoted the following statement from the office of Strategic Services European Political Report of 8 December and directed that a report be made as to its correctness:

"In general Military Government appears to be cooperating closely with counterintelligence experts in selecting reliable Germans as collaborators. One independent report, however, states that in installed by Military Government had been Mayor of the town since 1934 and a member of the Nazi Party since May 1933. This man, according to the report, had 90 percent of his old staff working with him under the Allied authorities." 93

In answer, the Commanding Officer of the Military Government Detachment wrote, on 3 January, "There is absolutely no truth in the statement, or inference, that Military Government at has failed to cooperate with CIC," adding that every official, "prior to employment," had been cleared by CIC. The city officials, he explained, were "originally checked" by 30th CIC and then came under investigation by 29th CIC and XIX Corps CIC. "As a result of such latter investigations some City officials have been dismissed," he stated. After praising Burgermeister and explaining that all of his staff had been cleared by CIC, the Military Government officer concluded: "From all evidence available at this time, I am of the opinion that Burgermeister was merely a nominal Nazi." 94

(FOUO)

92 CIC Det 29, H2 29th Inf Div, Rpt on: "Military Government Situation in Germany," dtd 14 Dec 44, to Commanding General 29th Inf Div, and Rpt, same as above to XIX Corps CIC, dtd 13 Dec 44, in 29th CIC Det Correspondence file (CONFIDENTIAL), (Kansas City Records Center, Box 25094).

93 Ltr from Office of CG, Hq, Ninth U.S. Army, dtd 30 Dec 44, to CO, Det FIH2 through CG, XIII Corps, by command of Lt.Gen. Simpson, in 29th CIC Det Correspondence file (CONFIDENTIAL), (Kansas City Records Center, Box 25094).

94 Rpt, Det FIH2 to CG, 29th Inf Div, s/Lt.Col.Clarence Richmond, dtd 3 Jan 45, in 29th CIC Det correspondence file (CONFIDENTIAL), (Kansas City Records Center, Box 25094).

In a complete report filed on 2 January by Lieutenant Mayfield, 29th CIC Detachment Commander, as a result of the Commanding General's letter to Military Government, it was explained that the 30th CIC Detachment's clearance of the Burgermeister has been "specifically stated to be 'preliminary' only," since there had been insufficient time to do more than establish that the officials were "not fanatical Nazis." The 30th CIC Detachment had no more than begun a more thorough investigation when they were moved, and the 29th CIC entered the area. A group of XIX Corps agents arrived in the town at about the same time and assumed the responsibility of investigating officials with the intent of setting up permanent civil government while the 29th CIC took over routine civilian screening and providing for the security of the area. However, before Corps agents could complete their investigations, they too were moved, and, for the first time, the 29th CIC Detachment assumed the responsibility of complete investigations of town officials. A memorandum from Agent Van Otten to Military Government on 18 December indicated that CIC had heard rumblings of discontent over retention and that a thorough investigation was being undertaken.

In this investigation, the 29th CIC Detachment learned that Burgermeister had evidenced Nazi sympathy in numerous ways. He had ordered all the town's important records transported to German-held territory immediately preceding the arrival of U.S. troops; he had evacuated his own family to central Germany; and, according to one informant, he had made the statement, "It is our desire to make every resident of a member of the Nazi Party." This information was included in the 2 January letter, with the recommendation that thoroughly cleared by CIC, be appointed as Burgermeister. Of ten other important officials, CIC had found five to be undesirable and had recommended dismissal of sixteen of the twenty members of the police department. CIC also had denied clearance to five top officials of the the scene of mistreatment of workers, and had recommended that two inspectors stand trial for their activities.

Pointing out that he was not offering an "excuse" for the lag in completion of investigations since "...it is not thought that the record requires one," Lt. Mayfield summarized a problem which was encountered throughout the European campaign and has been cited as one of CIC's greatest weaknesses:

> "Aside from the obvious difficulties of a speedy and effective clearance of German Civil Officials in an occupied area, the problems have been greatly increased by the transitory nature of CIC Detachments. No less than three detachments have operated in this town to date and it is still a division sector. In each case, when a turnover has been effected, CI coverage has decreased during the period while contacts are re-cultivated and their confidence restored and while

CONFIDENTIAL

loose ends of pending cases are picked up. In some cases, it has been necessary to start investigations anew."[95]

Results of the CIC investigation were reported in the 29th CIC Detachment Intelligence Report for the period 4 January 1945 to 19 January 1945 as follows:

> "With the ousting of the Mayors of Germany, and their replacement by more suitable officials, cooperation has been excellent. In all towns where registration has been undertaken, town officials have been extremely cooperative."[96]

After the setting up of civilian travel restrictions to keep the population fixed in these German Municipalities, CIC agents concentrated on developing informant networks and on registering all civilians over twelve years of age. The registration produced four civilians who were sent to higher echelon interrogation facilities under considerable suspicion as possible enemy agents. Fourteen deserters from the German army were apprehended and dispatched via Prisoner of War channels. In communities where CIC had found no lists of Nazi party members, complete party lists were compiled simply by asking the registering person if he had been a member. The presence of pro-Allied informants and the heavy sentences imposed on the first few who falsely denied membership decreased the chances of untruthfulness. Denunciations were numerous, and eight persons were arrested on various charges. Information not of Counterintelligence interest was forwarded to appropriate organizations. Counterintelligence data was obtained which suggested the course for future investigations of activities.

The 29th CIC Detachment also was making efforts to stimulate troop security consciousness. "Burma Shave signs," stressing security in clever jingles were posted along the roads. Even while showering, U.S. troops were warned against saying anything which might be of value to the enemy. CIC agents, ordered to take showers with the troops, were ready to reprimand any soldier who became too talkative.

30th CIC Detachment: Atrocities

Captain Melvin Handville's 30th CIC Detachment was again on the advance after its effective countering of the Einheit Stielau. One of the Detachment's first reports for the new phase carried the news of atrocities. Between fifteen and thirty American Prisoners of War had been led into an open field and machine-gunned by the Germans on 17 December. In a nearby location, 127 men, women, and children from Malmedy and neighboring towns had been killed at short range by small arms fire two days later.[97]

78th CIC Detachment Informants

Agents of the 78th CIC Detachment worked in and around the German city of Roetgen, previously the jurisdiction of the 503d and 9th CIC Detachments. Through skillful handling of informants, cultivated by linguists assigned to CIC, agents of the Detachment were directed to two homes which had been searched previously but that still contained valuable information and evidence.

In one case, after the suspect's home had been searched four times by Military Police, CIC agents uncovered a hidden tear gas pistol and ten cartridges. In the second instance, informants supplied CIC with leads to the location of a hidden room in another suspect's basement. Behind a pile of coal, CIC agents tore down a recently constructed brick wall. In the secret room, among other stores, were Nazi party records. The home of the latter suspect had been searched five times; only the sixth attempt produced results.[98]

80th CIC Detachment: The Hitchhiker

Apparently, no sooner had the Germans retreated than some of the troops took a relaxed attitude toward security. The events preceding the arrest of Theodore Laubach of Gilsdorf, in the Grand Duchy of Luxembourg, revealed this security let-down.

Laubach was favored by the driver of a U.S. military vehicle with a ride to the forward area, although regulations forbade all civilian travel in that sector. Military guards along the route either overlooked him or passed him as the driver's responsibility, and civilian guards posted by CIC were not authorized to search military vehicles. Fortunately, the 80th CIC Detachment, under the command of

97 30th CIC Det Periodic Rpt for period dtd 7 Jan 45 No. 23 in 218th CIC Det Periodic Rpts Jan - May 45, (CONFIDIENTIAL), (Kansas City Records Center, Box 25098).

98 Monthly Intelligence Rpt, 78th CIC Det, for period ending 31 Jan 45, dtd 12 Feb 45, (CONFIDENTIAL), (Staff and Faculty Library).

Capt. Thomas R. McMillen, had established an active guard and informant system in the area, maintained by civilians who were instructed to bring in all strangers and undesirables to CIC. The guards were sworn in by the local mayor in the presence of CIC personnel, were given specific duties by CIC, and wore distinctive armbands when on duty.

Fifteen minutes after Laubach reached his home, informants reported him to CIC. He was wanted by the 5th CIC Detachment as a suspected agent and Gestapo informant, and was turned over, with a report by 80th CIC.

87th CIC Detachment

Additional notice that troops had become less security-minded with the removal of the mass threat of Germans in U.S. uniform was revealed when Agents Robert Gunderson and Interpreter Werner Bamberger of 87th CIC checked the Command Post of the 364th Regiment. They found, among other things, carbon paper which had been used to type duplicates of secret documents. Classified manuals, photographs, overlays, addresses of several officers and enlisted men of the Regiment, the Division's stationery, and various forms, including an unused book of 48-hour pass forms, with listing of personnel at regimental headquarters on the back, had also been left behind.[99]

The laxity did not stop at Regimental level; it encompassed Division, too. In fact, when 87th Division Headquarters set up communications, they used the lines available at Libramont's telephone exchange without bothering to cut certain lines which ran to the homes of residents in the area. As set up, apparently on the party line system, the residents could listen-in on all types of communication. When the situation was discovered, CIC was called in. Investigation revealed that not one of the people who belonged to the "party line" understood English. At least, none of them admitted it. The lines finally were cut.[100]

Valuable information was provided the 87th CIC Detachment by two The first, informed CIC that the in Belgium was directly under the control of the French Forces of the Interior. He stated that recent uprisings against the existing government in Brussels were

99 87th CIC Det Memo, "Rpt of CP Search," dtd 14 Jan 45, s/ Robert W. Gunderson, attached as appendix to 87th CIC Det Daily Rpt dtd 14 Jan 45, in 95th CIC Det (sic) Rpt file, Sep 44 to Jun 45 (CONFIDENTIAL), (Kansas City Record Center, Box 25095).

attempts on the part of the [redacted] to overthrow it in favor of Communism. This information, the [redacted] said, was the result of an investigative mission which he had performed for his [redacted].[101]

The other [redacted], spoke of the anti-Nazi organization, Edelweiss, which he described as a Catholic Youth Resistance Organization, that was most active in large Rhineland cities. Franz Menke, a priest in Bedburn, Germany, was a leader in the organization, [redacted] stated. There were sound reasons for [redacted] anti-Nazi sentiments. Menke had been imprisoned for eight months; [redacted] brother, Peter, had been imprisoned in Dachau for four years.[102]

An investigation by the 87th CIC Detachment disclosed that eight Germans wearing U.S. uniforms had been billeted in a home at Wallerode from 25 December to 2 January. These men wore German uniforms in the house, and U.S. outfits when they went out. They left the town with the German Army.

On 19 January, the Detachment received another report of Germans in U.S. uniforms. Marie Armoldy of Vitebek told the 394th Infantry Regiment S2 that two had called on her the night before. CIC's investigation indicated the "Germans" were really American soldiers -- Military Police from the 4th Infantry Division who were on a personal mission to locate some fresh eggs.[104]

1st Lt. Sam E. Harwell replaced 1st Lt. Joseph A. Mondelli as Commanding Officer of the 87th CIC Detachment sometime during the last week of December.[105]

94th CIC: From Nine to Three

The 94th CIC Detachment moved up with their division which had been active in the rear areas for Ninth Army, to the front as part of XX Corps, Third Army.[106] On 7 January, Capt. Carl K. Goodson, Commanding the 94th, contacted Maj. Anthony S. Lobb, Commanding the 220th CIC Detachment of Corps, to be briefed on his Detachment's task in the new area.[107]

The Counter Intelligence Control Line in the Ardennes sector had been disrupted again, this time by the rapid advance of Allied units, and predictions indicated that the line there would not be firmly re-established until the front line was once more along the German border.[108] Capt. Goodson's report of his briefing to the Division G2 emphasized Third Army's interest in maintaining the high level of travel control which had been achieved. Exclusive of 94th CIC Detachment agents who would participate in the network, fifty-three agents -- from the 220th CIC Detachment; from Section "H" of the 420th CIC's Border Patrol, on detached service with XX Corps and III Corps CIC Detachments; and from Team 7 of the 418th CIC on detached service with Third Army and further detached to XX Corps -- manned and patrolled the Counter Intelligence Control Line in the northern area of the Saar-Moselle Triangle.[109]

Out of the Circle

The 101st Airborne Division claimed that the heaviest attack received by their lines at Bastogne was launched by the Germans in the first week of January, more than one week after the sea of German soldiers surrounding them had been bridged by elements of Third Army. . . .

By this time the 101st CIC Detachment had resumed its counterintelligence mission, and it was able to complete fifty suspect and incident investigations by the end of January, in addition to searching Command Posts, processing refugees and establishing roadblock controls.[110]

Of particular concern to the 101st CIC agents who had "good reason to know that the enemy used agents in civilian clothes and in OD's to spread reports about the presence of enemy in our rear areas," was the rumor mart. To combat this problem, the Division issued the following order:

> "(1) Any personnel in civilian clothes or American uniform passing on information intended to limit the movement or maneuverability of our troops by indicating presence of enemy in any particular area where they are not actually present will, if not recognized as a member of the Division or units attached to it, be apprehended and turned over to the Provost Marshal or CIC, whichever is most convenient, to be cleared by CIC.

(2) Any Division or attached personnel passing on rumors about the presence of the enmy in areas where they actually are not present will be physically turned over to his unit commander and severe disciplinary measures will be taken." 111

106th CIC Detachment: An Einheit Stielau Success Confirmed

FOUO One of the two successful missions of the Einheit Stielau was confirmed as a result of an investigation by 106th CIC. Four Germans in U.S. uniform had arrived in St. Jacques, Belgium, on 18 December and had been quartered by the family. The German soldiers were joined the following day by other German forces in front of the home. Two daughters of that family had directed the German troops to the rendezvous point. and his daughters rode with the Germans to show them the way to Petit Halleux. The were not in St. Jacques when the Americans re-entered, but the dossier of the case was kept open.[112] No record of the apprehension has been found.

Other Divisional Activity

A number of divisional detachments, newly arrived in the Theater, were thrown into front-line activity. Little is known concerning these units beyond the names of the Commanding Officers. Even in these there is a possibility of error since the names were found in correspondence dated during February and March 1945, and in some instances by selection of the highest ranking officer on a partial roster of the detachment. Such units and their commanding officers are: 508th CIC Detachment (8th Armored Division), 1st Lt. Arnold C. Huebner; 13th CIC Detachment (13th Airborne Division), 1st Lt. Frank Popisil; 17th CIC Detachment (17th Airborne Division), 1st Lt. Gerard G. Cameron; 66th CIC Detachment, 1st Lt. William J. J. Hoge; 69th CIC Detachment, Capt. Andrew H. Duvall; 75th CIC Detachment, 2d Lt. Henry A. Gassinger; 76th CIC Detachment, 1st Lt. William F. Barnaby; 511th CIC Detachment (11th Armored Division) Commanding Officer unknown.

In addition, several divisional detachments, mentioned in previous battles have been omitted, due in some cases to a paucity of reports from these units and in others to uneventful reports.[113]

111 G2 Periodic Rpt #203, First U.S.Army, 30 Dec 44, in G2 Estimates and Periodic Rpt L-496 (1A), (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

113 List of units participating in the Ardennes Battle, giving general locations covered is attached as Appendix 2.

Chapter 4

CORPS CIC DETACHMENTS IN THE ADVANCE

Operational with the First Army during the battle were V, VIII, and XVIII Airborne Corps, which was a component of First Army at the outbreak of the campaign, but was transferred to Third Army on 20 December, when First Army was placed under British control.[114]

V Corps CIC: The Young Ones

The Hitler Jugend became a V Corps CIC project, largely because these pro-Nazis youths were active in their area. Four members of this organization were arrested by the 205th CIC Detachment between 27 December and 29 December. The actual harm done by all members of the Hitler Jugend, apprehended by various CIC units, was negligible. Most of them were turned over to Belgian authorities for re-education. However one, Karl Arno Punzler, was tried and sentenced to life imprisonment for espionage.

Their rabid Naziism exposed a potentiality to counterintelligence experts, as a bulletin of the First Army Interrogation Center stated, "Which may develop into a major counterintelligence problem in the future."

Representative of the Nazification of these youths were the letters written by Maria Beirganz, a 17-year-old Bund Deutscher Madel (League of German Girls, the female Hitler Jugend) leader who associated with Hitler Jugend leaders Punzler and Willi Laufenberg. CIC collected the following samples:

> "7 October 1944: There is still nothing better than the German soldiers. The cowardice of the Americans is indescribable."
> "8 October 1944: I feel clearly that we, the hard-tried but iron-steeled youth, are destined to fight for the ideas of our irreplaceable Fuehrer."
> "19 October 1944: It appears almost useless to write to Cologne. Seven terror attacks in five days. Those Bastards. Please excuse the coarse phrase, but it comes from the heart..."
> "21 October 1944: On Sunday, the entire youth sits around drinking and smoking. The Americans aid them in doing this; only we three faithfuls carry on. Our work is gradually increasing to point towards new missions. I can't report more about our work because..."

114 The Army Almanac, pages 519 to 590.

"3 November 1944: Although everyone here is already talking about hopeless end for Germany, I still believe firmly in victory."
"9 November 1944: With much joy we heard of the committment of the V-2. A ray of hope, Peter. But a great disappointment awaited me. My tense expectations were for nothing. The voice of our Fuehrer was not heard over the Radio." 115

VII Corps CIC: Work Slackens

The 207th CIC Detachment, which had spent three months in Germany before the Ardennes counteroffensive, looked upon their assignment into the Belgian area as somewhat of a vacation. The Monthly Information Report for the period ending 31 January summed up the Detachment's activity as follows:

"For the entire period the VII Corps occupied a sector of Belgium during its participation in the battle of the Ardennes salient. This region had been strongly pro-Allied and after initial liberation had enjoyed several months of counterintelligence coverage by the Belgian Surete and by CIC. Hence normal CIC problems were substantially minimized, with all Black List information previously exploited and no local denunciations occurring--in sharp contrast to three previous months in Germany. No cases of sabotage or espionage arose."116

On New Year's Day 1945, a member of VII Corps Headquarters checked the travel control system by traveling across the Corps zone. He was stopped no less than six times. But on several occasions, sentries at posts approached the vehicle and some put their heads inside of it, which led the Corps G2 to publish instructions for sentries built around the theme, "The enemy deals ruthlessly with a careless sentry. 117

XVIII Corps CIC: Screening Measures

During the German counteroffensive, the 218th CIC Detachment moved into action with Corps headquarters. In the Monthly CIC Information Report, Capt. Albin P. Dearing, Commanding Officer, pointed to some of the difficulties

115 First U.S. Army Interrogation Center, Bulletin #3, (CONFIDENTIAL), (Staff and Faculty Library).
116. Monthly Intelligence Rpt, 207th CIC Det, Hq VII Corps, dtd 1 Feb 45 (SECRET), (Staff and Faculty Library).
117 G2 Periodic Rpt No. 1, Hq VII Corps, dtd 1 Jan 45, in First U.S. Army G2 Journal and File, dtd 2 Jan 45, L-556 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

encountered by the Detachment. Large numbers of civilians, streaming toward the rear areas, created a grave counterintelligence problem. Agents at road control posts and on mobile patrols checked all civilians, since enemy agents had parachuted behind Allied lines wearing civilian clothing. Close liaison was maintained between the 218th CIC Detachment and governmental and other investigative agencies. Questionable characters, when found, were placed in local jails until properly identified. The 218th CIC obtained valuable positive intelligence which was forwarded to G2, XVIII Corps.

One agent not only checked local security measures and screened civilian employees, but also handled criminal cases inasmuch as there was no CID in the area during the period.[118]

Special Agent K.O. Walker and Agent Dunbar of the 301st CIC Detachment investigated a security violation which had been allowed to exist for some time.

It was discovered that XVIII Airborne Corps Message Center persistently forwarded unenveloped classified documents to First Army Message Center in unsealed pouches.[119] The shortage of envelopes had been accepted as an excuse for discarding the two-envelope method of transmitting classified information, even though, where no envelopes were available, the authorized procedure was to staple the document so that it could not be read without removing the fasteners.

The investigation was turned over to the 218th CIC Detachment by the 301st. The officer in charge of the XVIII Corps Message Center was instructed not to accept improperly prepared material, and to see that all classified data passing through his center had been properly sealed.

Corps CIC Detachments Under Third Army: Control Lines

Reports from all of the Corps in Third-Army reiterate Army's preoccupation with Control Lines.

III Corps established their Control Line on 27 December, and coordinated it between corps and division boundaries. Between the coordinating points, American troops manned check points, along with gendarmes and auxiliary police. Motorized

118 Monthly CI Rpt, 218th CIC Det Hq XVIII Airborne Corps, 7 Mar 45 in 218th CIC Det Per Rpts, 1/45-5/45, (CONFIDENTIAL), (Kansas City Records Center, Box 25098).

119 Incl to Notification by 301st CIC Det to XVIII Corps CIC, dtd 30 Dec 44, subj, "Security Violation," and Reply by Indorsement to CO 301st CID Det from 218th CIC Det, in 218th CIC Det Situation Summaries in Weekly Summary Rpts File, (SECRET), (Kansas City Records Center, Box 25098).

patrols supplemented these efforts, and CIC screened apprehended persons "at the place of apprehension and/or PW Enclosures and/or established screening points on, or in the rear of, the CI line...."[120]

The 208th CIC Detachment, with VIII Corps, did not report any outstanding cases during the period, but echoed the suggestion of many other CIC Detachments when it advised detailed training and instruction in the enemy's intelligence and political organizations; geography and national characteristics; history and, of course, language.[121]

VIII Corps' accent on Control Line activity is obvious also, as each daily entry in the CIC Detachment's log mentioned some travel control procedure. The German drive reached Corps territory, but 208th CIC did not have too much trouble with the civilian population. Only a few sought safer areas to the rear. 1st Lt. L. Ermis, an Agent of the 208th CIC Detachment, reported, "Seeing American troops in or around their homes gives them great satisfaction."[122]

The Commanding Officer of the Detachment, Capt. Albert R. Bowen, Jr., had typewritten memorandums based on cases reported in other sectors distributed to each team in the 208th CIC. Usually the cases accentuated the need for thoroughness in counterintelligence work.[123]

He extended this practice to include teams of the 222d CIC Detachment when that unit was attached to the 208th CIC, for training and field experience.[124] The 222d remained attached to VIII Corps CIC from 4 January 1945 to 4 April 1945.[125]

On 19 January 1945, the 223d CIC Detachment was attached for the same reasons to the 203d CIC Detachment, and the 76th CIC Detachment joined the 220th CIC Detachment.[126]

XX Corps CIC

The 220th CIC Detachment, with XX Corps, investigated many cases during the period. One of the most widely reported involved a Frenchman who visited the Detachment on 27 January, requesting permission to travel. To make the CIC agents more sympathetic, he told them of the horrors he had suffered at the hands of les Boches. An alert CIC interrogator wondered why the man, who had claimed one town as his home, wished to live in another. Investigation proved that the man had grown wealthy as a collaborator with the Germans and, more precisely, a denouncer for the Gestapo. The 220th CIC warned other interrogators to be careful of people who come into the CIC office voluntarily to try to "...palm off a phoney story...."[127]

The 220th CIC's doggedness produced results in another incident, the case of was first arrested by Third Army as a suspected German agent and turned over to their Interrogation Center. The CIC interrogator there found no reason to suspect him and recommended repatriation.[128]

The 220th CIC Detachment was sent a copy of the interrogation report. Agents matched the statements made by during his initial interrogation against the current version of his past history, and investigated the case further. In twelve days, 220th CIC Agent Dennis H. Mahoney was able to submit a memorandum on the case which outlined the discrepancies in the findings of the Interrogation Center and the Corps CIC Detachment.

claimed to be a Separatist (a pre-Nazi movement not considered subversive by counterintelligence experts), but he had delivered the leader of the Separatist movement in Trier to the Nazi authorities, and he and his wife claimed he was arrested by the SS and Polizei Gericht (Police Court) as a criminal against the war economy. This was news to 220th CIC, and it could not be proven. moreover, had not mentioned it in his initial interrogation. His claim that he was an enemy of the Reich seemed odd in that he had suffered no loss of personal property or pension and that his son was later accepted as a volunteer in the Waffen SS.

contention that his son was forced into the organization was discredited by the son, who was a prisoner of war. ., had a Wehrpass (Army pass) in his possession which listed his father's profession as a member of SS Geheim Polizei (SS Secret Police). , relationship to some Nazi police organization was suggested further by his possession of identity documents from Gestapo headquarters which named him as an Aussenstellenleiter (Chief of a Gestapo sub-station). The suspect alleged that he had been imprisoned in the camp at Danzig-Matzkau where he had been given medical treatment by was located and he testified that avowal that the Germans did not accept his medical report was a falsehood. said his recommendations had permitted to stay at home for several months under the pretext of illness.

Agent Mahoney summarized the findings by stating that the suspect was "...at least one of their (the Gestapo's) informers."[129]

Major Anthony W. Lobb, commanding 220th CIC, sent the complete reports from the Interrogation Center and from the Detachment forward to the G2, with a recommendation for internment. The G2, XX Corps, forwarded the documents to G2, Third Army, who concurred with Major Lobb and was scheduled for detention "...until the tactical situation improves."[130]

The Migrating MG Detachment

The G2, XX Corps, called upon the 220th CIC the day following his transmittal of the Detachment's account of the case to investigate a delicate situation.

The Military Government Detachment in St. Avold had been celebrating New Year's Day with a few of the local officials, the official's wives, and civilian employees of the Detachment. At about 0100 hours, the party ended, and the civilians were taken home. An officer of a nearby Military Government Detachment informed the St. Avold Detachment that the tactical situation had changed adversely and that his outfit was withdrawing. A messenger was sent forward to seek the advice of a Ranger Battalion, the nearest tactical unit commander. In the absence

130 Indorsement Hq Third U.S. Army G2, to G2, XX Corps, dtd 30 Jan 45 in response to Memorandum from latter to former with 5 inclosures, dtd 8 Jan 45; inclosures include Memorandum re: s/Lobb, Memorandum re: . s/Mahoney dtd 28 Dec 45, and Memorandum re: ., dtd 16 Dec 44 s/Wirth, in 220th CIC Det Spot Rpts File, 1/45-4/45, (CONFIDENTIAL), (Kansas City Records Center, Box 25098).

of the commander, the S2 of this Ranger Battalion advised Military Government's withdrawal. At 0400 the Military Government Detachment was on the rearward road to Nancy taking with them the mayor and his wife and three interpreters, in keeping with the policy of protecting pro-Allied collaborators. Fifty inhabitants and all but seven policemen promptly evacuated the town.

A French Intelligence officer spotted the exodus, and wrote an obviously biased account of the event which in time appeared as an Office of Strategic Service (OSS)/ Special Counter Intelligence (SCI) report.

The CIC investigation by Agents Gerald Stafford and Harry T. Schaeffer certified that everyone had acted in good faith, if a bit too hastily, in the midst of a confused tactical situation. Less than two hours after Military Government's withdrawal, a reconnaissance platoon had returned with negative information concerning the enemy's presence in the area. At no time had the Germans advanced closer than eleven miles from St. Avold. The fiasco had been precipitated through rumors and lack of accurate information.[131]

As a result of the investigation, CIC arrested two of the three interpreters Military Government had carried with them in the evacuation: one, a student from Austria, and the other, his mistress. They were turned over to XV Corps CIC for additional investigation.[132]

Lying to gain the sympathy of CIC was frequent with residents of the Saar-Moselle triangle. One young Frenchman, Franz Madon, told agents of the 220th CIC Detachment that he had escaped from the Germans after arrest for traveling without a permit. Interviews with the boy's parents discounted his story, and eventually he admitted his untruthfulness, saying that he had been told by Eglaia Lovato, with whom he had traveled, to invent a "cover story." Lovato at first denied the story, but confessed when confronted by Madon. Both were jailed for their attempted deception of American authority. Lovato, because he was the elder and had misdirected Madon, received the more severe punishment.[133]

While some Detachments in Ninth Army areas enjoyed a period of routine counterintelligence activity, the 216th CIC Detachment did not. On 4 January the Detachment braved "An educational inspection..." by the Office of the Inspector General, XVI Corps.

A three-page listing of short-comings, primarily in administrative and preventive maintenance matters, resulted,[134] and the Corps Commander requested corrective action.[135] The Commanding Officer of the 216th CIC, Major William M. Frederick, replied, in a two-page endorsement three days later, indicating that corrective action had been taken where possible.[136]

The 216th CIC's counterintelligence operations were not hampered by the Inspector General's inspection. Acting in augmentation of XIII Corps CIC in[137] Holland from 23 December 1944, the Detachment turned in a high-quality performance.

Previously, 216th CIC had been responsible for the apprehension of one outstandingly pro-Nazi collaborationist and Gestapo informant, As a Gestapo informant she was responsible for the arrest of Belgian underground espionage agents during the occupation. Investigation also indicated her smuggling activities. At the request of 216th CIC Detachment the Belgian Gendarmerie terminated shady career.[138]

In Holland, most of the Detachment's work was performed in and around the town of Heerlen. A great number of loyalty clearance investigations were conducted on civilians for Civil Affairs: for curfew and travel passes, for installation of telephones, for employment by U.S. Army units, and for Army personnel who were to handle classified documents.[139]

CONFIDENTIAL

Among the tasks of the Detachment was a Security Survey of the railroad yard at Heerlen. Food unloaded at this point for use of units in the area was being stolen. While cases of theft were a Criminal Investigation Division (CID) responsibility, security was CIC's assignment, and Agents of the 216th CIC studied the installation with the railhead officer, and proposed a system of guards which would simultaneously provide security and prevent thievery.[140]

Agent Undercover

On 7 January a report was received that two civilians in in Heerlen were trying to elicit information from American troops. After checking the reliability of the owner, an undercover CIC agent in a complete field uniform entered the cafe. The suspects drew the agent into conversation, and proceeded to vilify the English and the Russians while praising the Germans as humanitarians who had been blasphemed by the Jews, a viewpoint closely related to the German propaganda chatter. After checking with a local Dutch agency and finding that these two civilians had been suspected of cooperation with the Germans during the occupation, both were arrested by CIC and turned over to Dutch officials for trial and internment.

Agents Clarence Huntington of the 213th CIC and Eric M. Gross of the 216th CIC worked together to locate a collaborator who was reported to be employed in a sensitive position by an American Army unit. CIC was about to circularize the information to all units in the area when two Dutch civilians, seeking employment as interpreters with a U.S. battalion, mentioned the suspect in their interview. The CIC agents were quick to learn his whereabouts. The suspect, was picked up and turned over to Dutch authorities who interned him indefinitely.

A fixed surveillance on the home of a suspect, by Agents Huntington, 213th CIC Detachment, and Herbert W. Clarke, 216th CIC Detachment, resulted in his arrest. Prior to the surveillance, could not be located by either the Opsporingsdienst (Dutch Intelligence) or the CIC. had represented the Nazi Party in legal proceedings during the occupation. A political prisoner, was turned over to the Dutch for further investigation and trial.

Still another investigative technique, interrogation, proved its value to the 216th CIC during this period. The detachment used the interrogative technique

140 Security Survey of Heerlen Railroad Station and Yards, dtd 14 Jan 45, in 216th CIC Det Operational Rpts, 10/44 - 9/45 (CONFIDENTIAL), (Kansas City Records Center, Box 25098).

known as "Mutt and Jeff" or "Sweet and Sour" with and a Prisoner of War Interrogator (IPW) as the "Sweet" team and Agent Dillard W. Howell as the "Sour" interrogator. While Agent Howell blustered and threatened, Agent Rafaeli and his team-mate were sympathetic to the suspect, . who had a passport similar to that carried by high Nazi officials during the occupation. The divergent approaches netted results. had been employed in a German war plant for six years, before the outbreak of hostilities. He had more than 50,000 Reichmarks in a bank in Dusseldorf, Germany, and the indications were that he was someone of importance at the war plant. The Dutch jailed him immediately as a security threat, pending trial.[141]

XIX Corps CIC: Investigating the Hitler Youth

The 219th CIC Detachment Monthly Information Report for the month ending 31 January 1945 revealed an investigation of the Hitler Jugend, instigated by the report of an agent of the Deuxieme Direction, Belgian Ministry of National Defense, who said a group of former members of the Hitler youth were holding clandestine meetings in Raeren.

The town of Raeren was located in the section of the Belgian frontier which had been part of Germany until 1919 when it was ceded to Belgium under the provisions of the Treaty of Versailles. In 1940, the Germans reclaimed the territory for the Reich. It was a natural breeding place for auxiliaries such as the Hitler Jugend because of the blood ties which transcended national boundaries.

219th CIC initiated a surveillance of seven individuals who had been singled out, by making use of local police and Gendarmes. The suspects, three boys and and four girls, were teen-agers. The surveillance continued for four weeks with no developments. On 29 January, the original Belgian agent informed CIC that at least one of the youths was aware that Allied authorities were interested in him because of his earlier Hitler Youth activities. This resulted in a decision to arrest the seven simultaneously. The boys were taken to XIX Corps CIC Interrogation Center at Aachen, Germany; the girls were interrogated by the local Belgian Counter Intelligence representatives. Despite their anti-Allied sentiments and the fact that the parents of three of the suspects had been arrested by Belgian authorities in September 1944 for their pro-Nazi activities before the liberation, the month of investigation had produced no evidence of subversion. However, their existence as a potentially dangerous force led Major Thomas A. Gagan, Commanding Officer of the 219th CIC Detachment, to comment:

141 Monthly Operational Rpt, 216th CIC Det, for month ending 31 Jan 45, dtd 13 Feb 45 in Operational Rpts, 216th CIC Det, 10/44 to 9/45 (CONFIDENTIAL), (Kansas City Records Center, Box 25098 and Staff and Faculty Library).

"This case is mentioned not as an example of brilliant research or investigative work on the part of CIC. It is believed, however, that it is of interest because it illustrates a situation that doubtless will be met by numerous CIC Detachments in Germany; that of groups of pro-Nazi youths who, if not actually formed into units for the purpose of subversive activities, are potentially a threat to security should they become organized. Their extreme youth and the fact that their education has been completely Nazi in character make them capable of the most fanatically stubborn resistance to the Allied occupation armies, should the proper directing and organizing force come into being. It appears that one of the problems of CIC will be to neutralize these groups even though evidence may be insufficient to warrant physical confinement."[142]

142 Monthly Intelligence Rpt, 219th CIC Det, Hq XIX Corps, dtd 24 Feb 45, for month ending 31 Jan 45 (CONFIDENTIAL), (Staff and Faculty Library).

Chapter 5

CIC AT ARMY LEVEL

First Army, which had borne the brunt of the German attack, had been greatly responsible for upsetting the German timetable and, eventually, for causing the failure of the counteroffensive.[143]

The 301st CIC Detachment, which operated over a wide area throughout the campaign, in addition to their escape route investigation,[144] was concerned primarily with security control measures. To ensure complete coverage of the areas entrusted to it, First Army CIC coordinated its activities with nearby ADSEC CIC teams.[145] On 21 December, Intelligence Personnel from "T" Force, with the exception of one CIC Detachment which was sent to assist in the protection of Twelfth Army Group with Headquarters in Luxembourg, were placed under direction of the Commander of the 301st CIC Detachment, Lt. Col. Horace Miner. The personnel, consisting of Prisoner of War Interrogators (IPW), Military Intelligence Interpreters (MII), and CIC were organized into security patrols.[146]

Members of the Einheit Stielau, operating on short range reconnaissance missions, were successful during this period in obtaining American passwords and countersigns. As a countermeasure, these signs were changed often, on theory that they had been compromised -- whether there was proof of this not.[147]

The Manpower Question

The flexibility of organization and the sources of additional personnel which the 301st CIC Detachment had developed were important administrative accomplishments. On 29 January, the Detachment forwarded a letter to the 305th CIC Detachment in Italy which explained the existing Tables of Organization and the methods of augmentation. The letter, signed by 1st Lt. Charles Conick for Colonel Miner, relayed the following information:

On 29 January, the Detachment forwarded a letter to the 305th CIC Detachment in Italy which explained the existing Tables of Organization and the methods of augmentation. The letter, signed by 1st Lt. Charles Conick for Colonel Miner, relayed the following information:

---

143 War As I Knew It, George S. Patton, Jr., (Houghton Mifflin Co., Boston, 1947), Chapter 21.

144 See Chapter entitled "Rhineland, Phase I, Northern Armies."

145 12th Army Group Semi-Monthly CI Rpt #11, 1-15 Jan 45, L-381, dtd 15 Jan 45, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

146 12th Army Group, Report of Operations, (Final After-Action Report), Vol. IV, Part V, page 13, (RESTRICTED).

147 12th Army Group Semi-Monthly CI Rpt #11, 1-15 Jan 45, L-381, dtd 31 Jan 45, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

"At present we are operating under the following tables of organization:

	0	EM	Headed By
Division	4	13	Captain
Corps	5	14	Major
Army	6	15	Lt. Colonel

In addition to the above, Twelfth Army Group has a pool of approximately 120 men and officers which, technically speaking, we can draw upon. In fact, this pool is split up into small teams of three officers and ten enlisted men and reattached to the Armies for their use. Thus, in addition to our usual complement, we have two pool teams constantly at our disposal working in the Army area. Any of the lower echelons in Corps and Divisions feel free to call on us at any time for additional personnel for a specific project, e.g. a large town, increased refugees, etc. In addition, we try to send to Corps teams three or four of our personnel to be placed on duty with them in larger towns that we intend to eventually take over. This serves two purposes:

a. It adds to their manpower.

b. It facilitates the take-over from Corps inasmuch as we already have a man who is familiar with the town problems and personalities.

Passing notice should be given to the Group T (rather than S)[148] Force. It is similar in construction to your S-Force and used in towns such as Paris, Luxembourg, etc., where a need for additional specialized personnel arises. This organization has been found useful at such times. While awaiting a town to fall, they are usually in Army area and, quite naturally, (as at present) their CIC personnel are available to us. It should be said, however, that due to the need for mobility in such a force, their service can never be considered definite and it is impossible to plan on the use of their personnel." [149]

148 In Italy, a force comparable to "T" Force was organized early in that campaign, known as "S" Force. See Chapters on Italy and Northern France for more information on the organization and use of these groups.

149 Letter, from Hq FUSA, 301st CIC Det to CO, Fifth U.S. Army CIC, Subj: Espionage Investigations, dtd 29 Jan 45 (CONFIDENTIAL), (Staff and Faculty Library).

In clearing out the Bulge area which had previously received careful counter-intelligence considerations, few enemy agents and security threats were uncovered. The 301st CIC Detachment found that the changed situation created a lull in enemy espionage activity. In the period between New Year's Day and 15 January 1945, only four cases worthy of lengthy interrogation at the Master Interrogation Center developed despite the 301st CIC's widespread spy-catching efforts. One-pro-Nazi was turned over to the Belgians for disposition, and one German wearing parts of the U.S. uniform was evacuated as a prisoner of war. The two other cases proved negative.[150]

The Liberation of M/Sgt Johannisberg

A case, which was recounted many times in counterintelligence publications under the title, "The Man Who Stayed for Dinner," was precipitated by the desertion of German M/Sgt Johannisberg, during the January phases of the Ardennes battle.

Johannisberg had been in charge of sanitary facilities at the Fuehrer's Headquarters. Overheard repeating an "unfortunate" political joke, he had been transferred with dictatorial dispatch to a line outfit, the 62d Volksgrenadier Division. Johannisberg returned the favor by making a separate peace with the Allies immediately.

Radio Luxembourg carried the news of Johannisberg's defection, and when Hitler heard of it, he was said to have entered a period of sporadic depression, demanding that no effort be spared to repatriate Johannisberg before he could "spill" his information. Johannisberg's information was in a vein that could have proved extremely embarrassing to the Fuehrer.

Characteristically, SS Lt. Col. Otto Skorzeny assumed supervision of the task. The man who had liberated Mussolini from the Allies set out to liberate M/Sgt Johannisberg from himself. In the presence of General Sepp Dietrich and Heinrich Himmler, Skorzeny briefed one Captain Franz Erich Von Frauenhofer on the mission.

Frauenhofer and his driver, Friederich Waldruch, dressed as a U.S. Army Major, GSC, and a Tech 5, respectively, were accompanied in their jeep by an almost incredible streak of luck in the early stages of their operation. Crossing the line into XVIII Airborne's sector on 15 January 1945, they were stopped by a sentry who looked them over and permitted them to pass. Boldly, Frauenhofer

150 First U.S. Army Interrogation Center Bulletin #3, dtd 15 Jan 45, (CONFIDENTIAL), (Staff and Faculty Library).

tried to secure the password and countersign. The sentry, hard-pressed, was forced to admit that he did not know them.

Frauenhofer had even more luck in learning the password from the next sentry, and thereafter traveled to Verviers with comparative freedom. After a restful night, the pair resumed their journey in the morning. Sighting a truckload of German soldiers, now American prisoners, Frauenhofer and his driver fell in behind. The truck led them to the First Army Prisoner of War enclosure, arriving there at 0912 hours.

Admittance to the Cage was easily attained. Upon the presentation of a blue SHAEF pass, Frauenhofer entered, instructing his driver to wait in the jeep. The masquerading Major, posing as the head of a newly-formed "Prisoner and Prisoner of War Personalities Data Section," produced "unquestionable" authorizations (later questioned and found to be forgeries) and was permitted to evacuate Johannisberg in his personal custody. He departed immediately, but his jeep and his driver were nowhere in sight. A military policeman on duty revealed that the driver had waited around for eight minutes, just enough time to find out about the local houses of ill fame, before departing.

Since it was nearing luncheon hour and since he had been invited to remain for that meal, Frauenhofer felt he was obliged to return to the Cage to eat. And drink.

The privilege of sharing the officer's mess liquor ration proved Frauenhofer's undoing. He had claimed previously to have been a member of Class #6, Military Intelligence Training Center, Camp Ritchie, Maryland. This seemed plausible when revealed with a slightly-Teutonic tone of tongue. After his third drink of liquor, Frauenhofer began speaking flawless English. Difficult words tripped from his tongue, without descent to malapropisms. Eyebrows were raised in suspicion at this fluency.[151] But the case was not cinched until Frauenhofer praised the meal--C-Rations and left-over Spam.

Though he attempted to bluff his way out of his situation, Frauenhofer was no match for First Army's seasoned interrogators. The description of driver Waldruch and pertinent directional information was forwarded to proper authorities.

---

151 The reports on this case fail to indicate how fluency in English could trip up a Nazi posing as a U.S. Army Major. It seems likely that membership in Military Intelligence Training Center, where persons of foreign extraction were taught English, was chosen as a cover for Frauenhofer to explain his lack of general knowledge about the United States. Thus the German, who actually spoke good English, had to pretend a Teutonic accent to make his story convincing.

Frauenhofer seemed penitent and crestfallen as he assured his captors that he could be of great help, administering parts of conquered Germany. Assured that he would not be needed in that capacity, Frauenhofer's last words to the departing interrogator were: "By the way, if you hear over the radio that my driver has been awarded the Eichenlaub /Oak leaf cluster/ to the Good Conduct Medal, please notify me."[152]

Third Army CIC

In Third Army area, CIC detachments were giving coverage to territories which had been given previous attention by other units. Personnel shortages continued to be a problem, but it was solved in part by the attachment of CIC personnel from XXII and XXIII Corps[153] and from the 69th and 78th Infantry Divisions, which were on the continent but were inoperative. In addition, the new Army Group Reserve Team, formed with Agents from Third Army CIC detachments and from the 12th Army Group CIC Reserve Team, became the nucleus of the new 12th Army Group Team. Additional personnel with linguistic ability were obtained from tactical units to fill all five teams to TOE strength. Pending formal transfer, such personnel were placed on temporary duty for training with CIC and used as interpreters until they became familiar with CIC modus operandi.[154]

By this time, Third Army's Travel Controls were being executed more conscientiously, and the level of troop security-consciousness seemed to remain constantly high. Office of Strategic Service (OSS) reported that every one of their operatives who tried to infiltrate into enemy territory through Third Army's sector was captured and escorted back for identification.[155]

CIC at this time was on guard against enemy agents posing as non-combatant American auxiliary personnel such as Red Cross, War Correspondents and Technical Observers. Several of these non-combatants had been captured by the enemy. A list of the missing persons was distributed.[156]

All civilian travel forward of the CIC Control Line in Third Army territory was prohibited. No civilian was permitted to enter or leave the area.[157] Pertinent regulations were posted everywhere. Gendarmes and local officials, at the request of CIC, imposed numerous fines on violators.[158]

Happy New Year

Agents of the 303d CIC Detachment started 1945 by penetrating the cover story of ... an uneducated man who was not overly intelligent, had entered a town and asked a soldier if it was the village of Habern. Since it was not, the soldier escorted to the CIC office. Despite the stubbornness with which he clung to his cover story, was broken because two sandwiches he carried were fresh, though he stated under interrogation that they were two days old. After his confession, was turned over to Luxembourg authorities for trial as an enemy agent.

303d CIC Agents in the city of Luxembourg also interrogated who had been arrested on 1 January by U.S. troops for intoxication and violation of curfew restrictions. An American citizen by birth, had been in Europe for 22 of his 25 years. He had encountered some difficulty because of his citizenship, eventually agreeing to be a Gestapo informant rather than be treated as an alien in Germany. He served the Gestapo for one year as an informer and as a "cut-out" between the Gestapo Headquarters and Gestapo agents.

On 5 September 1945, he was sent to contact a wireless-telegraph stay-behind agent in Diekirch, Luxembourg, to give tactical observations on the combat strength of the Americans in the area. He did. The following day, however, the Americans seized the town.

In an amazing and successful about face, joined pro-Allied militia, informing on several German collaborators and informers. Two weeks later, he attempted to enlist in the United States Army but was refused since he suffered from Tuberculosis. He wandered about from that time on, unhindered, until he had over-celebrated the coming of the New Year.[159]

Ninth Army CIC

Unmolested by the tactical situation, except by minor skirmishes along the line, components of the Ninth U.S. Army practised "business-as-usual." Their area of responsibility was extended to encompass the sector formerly covered by VII Corps. Line crossing activity, though anticipated, did not develop in the first two weeks of January because the static situation gave Military Government and CIC the opportunity to evacuate all civilians from the forward area and prepare a no-travel zone ten kilometers deep, west of the Roer River. Any civilian found in this restricted zone was arrested immediately and turned over to CIC for interrogation.

About 2,500 indigenous security guards were employed on road control points, and as guards for bridges and supply dumps. No sabotage incidents were reported in the month of January, but several cases of possible industrial sabotage were investigated. Some evidence of intentional "slowdown" efforts was accumulated, but the high priority placed on the mining and delivery of coal prompted SHAEF officials to retain the agitators rather than risk a greater slowdown through the inefficiency of inexperienced management of the mines.

Of the 33 cases pending at the time VII Corps Interrogation Center was taken over by 309th CIC, twenty-six were disposed of and nine new cases were handled between 1 January and 15 January 1945.

Several "blitz" searches in towns were made by Corps CIC teams, and forty-seven persons were arrested, thirty on violation of Military Government proclamations.[160]

Five linecrossers were caught in the last half of the month. Three of these were Hitler Jugend members, two of whom wore the uniform of that Nazi paramilitary auxiliary.

Following the arrest and interrogation of Guillaume Hendrix, age 15, who alleged he was left behind with nine other youths to commit sabotage, an investigation was undertaken which proved--as had the investigation of Hitler Jugend in other areas--that no formally organized group was yet in operation.[161]

160 After-Action Report CI Branch Ninth U.S. Army, 1-15 Jan 45, Incl 2 to G2 After-Action Report, dtd 19 Jan 45 in Ninth U.S. Army G2 Journal and File, Pt I, Jan 45, L-402 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Virginia).

161 Ibid., 16-31 Jan 45, Incl 2 to G2 After-Action Report, dtd 4 Feb 45.

A summary of the number of cases handled by the 309th CIC Detachment revealed 305 cases in January. The breakdown and disposition of the arrestees were as follows:

a.	German soldiers in civilian clothes evacuated as Prisoners of War:	37
b.	Arrestees turned over to indigenous authorities:	24
c.	Arrested for security reasons; to be held until lines move forward:	24
d.	Arrested and turned over to Military Government or Civilian Authorities as DPs or violators of Military Government proclamations:	137
e.	Released for insufficient evidence:	19
f.	Pending further interrogation at Army and Corps Interrogation Centers:	54[162]

Chapter 6

ADSEC COM Z CIC ACTIVITIES

The operation of most of the Advance Section Communications Zone CIC Detachments during the Ardennes Campaign could be summed up in two words: Control Line.

Section Y of the 424th CIC Detachment, commanded by Capt. Jesse F. Gordon, comprehensively summarized the organization of an effective Border Control arrangement in a report drafted while this section was supervising all civilian travel over the German, Dutch and Belgian borders in a wide area of the line. Included in the report were several difficulties experienced by the section.

The organization of an effective control system depended on the use of indigenous personnel. Without them, the three officers and ten Agents of Section Y could not have operated successfully.

Rather than draw up a plan and then order indigenous groups to follow it, Section Y called in the heads of the agencies concerned: the Dutch Douane,[163] the Bewakenstrooepen (O.D.),[164] and the Constabulary. They participated in the formulation of the control plan, discussed recommendations and stressed cooperation. The plan, as devised, served the border areas as well as the back country lying along part of the Belgian border. The latter region was covered to prevent circulation to and from Germany through Belgium. As this situation grew less urgent with the introduction of Belgian patrols, the number of posts was limited to one, and fewer patrols were utilized.

Section Y supervised eight posts in the extreme southwest corner of the Netherlands. The posts were manned by four men, two on duty at the post and two on roving patrol to the next post. Patrols at Post #1 and Post #8, at the intersection of the German - Netherlands - Belgian border and at Mamelis, Holland, respectively, contacted posts under the supervision of the adjoining ADSEC COM Z Sections.

The highway from Massricht, Holland, to Aachen, Germany, was under constant patrol by police from Vaals, Holland, and by a detachment of American

163 Dutch Douane; formerly the Dutch Customs Guard, in pre-invasion days a well-organized border guard, underground during occupation.

164 Bewakenstrooepen (O.D.) was a resistance group, the new name of the "Home Guard."

Military Policemen. Two Military Policemen were also on duty at the main gate to Vaals.

Four Counter Intelligence Control Posts, manned by three CIC Agents each, were positioned on the Dutch and Belgian side of the German border. Agents operating these posts passed on the identity of all strange civilians rounded up by the indigenous guards. They also checked the validity of documents. Constant contact was maintained with all posts and patrols by a party-line telephone system.

The difficulties inherent in Border Control included the fact that the indigenous personnel were largely civilians who were not as well equipped as military personnel for this type of duty. Neither local civilians nor soldiers were outfitted properly for winter-time service on isolated posts. Arms were scarce and motor transportation practically non-existent.

Border towns, where German, Dutch, and Belgian gardens adjoined presented an overwhelming problem at night. Persons were believed to be crossing both ways at these points, but there was little that could be done to stop the traffic. There was evidence that mail was being passed from one country to the other at night "over-the-back-fence" route.

Confusion resulted when farmers who lived on one side of the border were prohibited from working the land they owned on the other side. Priests were cut off from their parishes; and sick persons, were denied medical attention because the doctor lived on the other side of the border.[165]

Section Y's activity during this period was fairly representative of ADSEC COM Z CIC units. An interesting note to COM Z CIC procedure was added, however, by Section K's use, for a few days, of Lt. Guenther Schulz, captured agent of the Einheit Stielau. Schulz was assigned to roving patrols, with the task of locating other German masqueraders.[166]

165 Summary of Information, 424th CIC Det, Section Y, dtd 3 Jan 45 (CONFIDENTIAL),(Staff and Faculty Library).

166 Monthly Information Rpt, 421st CIC Det, Section K, dtd 20 Jan 45, for period ending 31 Dec 44 (SECRET), (Staff and Faculty Library) /NOTE: Execution of Schulz who was captured at Liege, Belgium on 19 Dec 44 and sentenced to death was delayed pending detailed interrogation. On 14 Jun 1945 he was executed by Ninth U.S.Army, having been "lost" because his different locations were not located properly. Reference: Annex 4 to History of the CI Activity of the U.S. Army in Europe, p. 65 (Unclassified), (Manuscript Staff and Faculty Library)/.

Headquarters Advance Section, in a Bi-Weekly Counter Intelligence Report, told of two unfortunate incidents. One concerned a person in a U.S. uniform who was reported speaking German in a Liege Cafe. Challenged by soldiers for identification, the person resisted. He was shot and killed. Only then could the identity of the linguist be revealed. He was a bona fide U.S. soldier. The case was turned over to the Criminal Investigation Division.

The other announcement was of the successful sabotage of an ammunition train, with investigation netting nothing.[167]

167 Bi-Weekly CI Rpt #11, Hq ADSEC, dtd 25 Dec 44 (SECRET), (Staff and Faculty Library).

Chapter 7

12TH ARMY GROUP CIC AND OPERATION GISBOMB

Any hopes the German Intelligence Service might have possessed for a recovery after the Ardennes were cultivated in ignorance of a newly-created American policy, implemented under the name, "Operation GISBOMB."

As its name implied, "GISBOMB" called for aerial attacks to be made on the German Intelligence Service installations, from headquarters of various units to training schools for dangerous agents. All counterintelligence and other interrogation personnel were requested to obtain all possible information concerning the German Intelligence Service installations - location, description, and air defenses- and to forward this material to Chief Counter Intelligence Branch. Files were culled for maps and other pertinent data.[168]

The credit for the conception and organization of the policy has been given a CIC Agent, Capt. Ernest Sidney Baker, who was at the time a member of the Civil Security Section of the Counter Intelligence Branch (CIB) of the G2 Section of Headquarters, Twelfth Army Group. Captain Baker had been the Commanding Officer of the 219th CIC Detachment. After his transfer to CIB, he obtained and assembled the information required to make up the necessary target data which was submitted to XIX Tactical Air Command of the Ninth U.S. Air Force, through the G2 (Air) Branch of the 12th Army Group at Luxembourg City.

The plan was devised to counter the increased enemy agent activity and to prevent more enemy agents, approaching a state of readiness, from being introduced into the battle. The advantages the U.S. Army first received by welcoming enemy agents and persuading them to talk, which had given an accurate picture of the potentialities and present capabilities of the enemy, were deemed insufficient now to allow the enemy to continue training agents without harassment. Further, the psychological benefits to be derived by bombing these "secret" training camps were many, not the least of which was the belief that less bold enemy agents would surrender immediately upon entering U.S. territory out of fear that the Americans knew all about them already.

Targets were selected and material collected from all sources. The first targets chosen for GISBOMB were: the radio school and station at Hundsbach,

168 Hq ADSEC COM Z CIC Information Memorandum No. 9, dtd 17 Jan 45, (SECRET), (Staff and Faculty Library).

where radio agents were trained and which served as communications center for some agents in Allied territory; Leitstelle II West, the headquarters for German sabotage units; Kloster Tiefenthal, the center from which deceptive operations usually were directed and which also served as the headquarters of Jagdverbe ande South West and its training school and as a sabotage training school for guerrillas with the Wehrwolf organization; and the Waldburg Radio School, where radio agents for long-term missions were trained.

Kloster Tiefenthal was attacked by 11 P-38's at 1300 hours, on 13 February 1945. Ten 1,000 pound general-purpose bombs and four incendiaries bombarded the five buildings in the area, and the returning pilots were able to report a formidable explosion, with smoke columns rising to 4,000 feet. Interpretation of aerial photographs of the damage revealed that three of the five buildings had been destroyed, including the largest. The others sustained noticeable damage. Much later, visual investigation of the grounds and interrogation of the caretaker revealed that the burning had lasted two weeks; that all weapons, plastic explosives, school equipment and clothing supplies, (including Allied uniforms) were destroyed; and that many casualties were inflicted.[169] The explosion which the pilots witnessed shattered windows in a town one-half mile away.

Less damage was caused by two attacks by twelve P-38's on Hundsbach on 14 February and on 16 February. Only one building was demolished, and the school and the radio station received only superficial damage. Hundsbach radio did go off the air, and it was presumed that a number of potentially high-grade agents lost their lives. Certainly, morale suffered considerably, and, even though physical damage had not been extensive, the missions against Hundsbach were labeled as successful.

Lietstelle II West was missed completely by 16 P-47's on 14 February and moved to a new location, which was overrun by troops of the Third Army before enough information could be obtained to warrant a new raid.

The mission against the Waldburg Radio School was accomplished by 25 P-47's from the XII Tactical Air Command, at the request of the G2, Seventh Army. The school was completely destroyed. Later, a reliable informant reported that the raid killed twenty-four Franciste agents, and that all the members of the German training cadre were casualties, and that the Franciste chief, Richard Martin, was critically wounded. In addition, Radio Centrale,

Dickson (Unclassified) attached to Annex 2, [Annex 2 to History of the CI Activity of the U.S.Army in Europe, (Unclassified) (Manuscript in Staff and Faculty Library)].

communication center for Agents parachuted into France, Belgium and the Netherlands, had been destroyed.

Operation GISBOMB was termed a success. In the official report of the completed operation, it was pointed out that it hit the enemy hard, where it hurt. Agent personnel, and those qualified to be trained as agents were scarce. Radio equipment was irreplaceable. Vehicle and gasoline shortages prevented effective recruitment of replacements, and substitute instructors were not readily available. The German Intelligence Service could not be sure that the agents they trained at the various centers would not surrender immediately, or, if caught, it knew the agents could be persuaded to reveal pertinent data about the schools. Clearly, the U.S. counterintelligence adoption of the policy of prevention was superior to pounds and pounds of cure at this phase of the war.[170]

Other Twelfth Army Group CIC Activity

Aside from the initiation of GISBOMB by Captain Baker, few reports are available of CIC activity at Army Group level during this period. The reports of Tactical Reserve Team No. 3 of the 418th CIC Detachment, and some suggestions in other reports, present the only picture of the maneuvers of the 418th CIC Detachment during the clean-up campaign in the Ardennes.

Tactical Reserve Team No. 3, attached as it was to Ninth Army, was not representative in its activities of the rest of the 418th CIC Detachment. This team, during early January, was at full strength after the rejoining of two sections, one under Lieutenant Stroud and one under Lieutenant Hardin. They operated in Bardenburg, Germany, the location of many Quartermaster depots. There were several air raids and low level strafing attacks in the daytime. During the counteroffensive, the team was alone in the area, except for a smaller divisional Military Government Detachment. Although the whole sector was empty of troops, CIC agents patrolled it day and night to give the impression that there were American reinforcements behind the two regiments holding the line.

Later, as the situation grew less tense, CIC agents registered and screened more than 10,000 of the town's inhabitants.[171]

It appears that those agents of the 418th CIC Detachment working at Army Group Level had, as their mission, the security of vital installations. In

170 Annex 2 to History of the CI Activity of the U.S. Army in Europe, (Unclassified) (Manuscript in Staff and Faculty Library).

171 Unit History of CIC Det #418, TRT #3, (Unclassified), (Staff and Faculty Library).

Semi-Monthly Counterintelligence Reports, dated 31 December 1944, 15 January 1945 and 31 January 1945, a breakdown of the distribution of CIC personnel for Twelfth Army Group indicated a consistent allotment of agents to five installations: Twelfth Army Group's Tactical Headquarters, Main Headquarters, Rear Headquarters, Interrogation Center and the T-Force Command Post. Fifty-three CIC agents were employed in these installations.[172] No records of their activity during this period are available, and records of the activities of CIC agents from Army Group operating with other CIC Detachments at lower echelons were incorporated into reports of the subordinate unit.

Chapter 8

EYES ON THE RHINE

By the end of January, the only signs of the Battle of the Bulge were the rusting monuments to German defeat. Remnants of precious vehicles and armaments were pushed to the roadsides. The dead were buried. And once again the Allied armies stood on the threshold of conquest and waited.

Germany had spent twenty-four divisions in the Ardennes; twenty-four divisions which could not man the Siegfried Line.

The Allies did not speed after the withdrawing foe. Instead they halted until all was in readiness.[173]

CIC continued about its business of security, counterespionage, countersabotage, and countersubversion. Its mission was to increase in importance in the months to come, but practically all the demands of combat counterintelligence in a withdrawal had been experienced in the Ardennes counteroffensive. The one lesson which should have been learned above all others was that a desperate enemy could be capable of many things, no matter how suicidal his attempts might seem to the advancing armies and their intelligence units.

173 A Soldier's Story, General Omar N. Bradley (Henry Holt & Co., 1951) Chapter 22.

Part II

Alsace Counteroffensive

Chapter I

Preparing the Defenses

By mid-December 1944, the combat troops of the 45th, 79th, 103rd Infantry and 14th Armored Divisions had driven across the defenses of the old Maginot Line, pushed over the border to Germany, and chased the withdrawing enemy back to its stronghold, the Siegfried Line. On 16 December, these Seventh Army Divisions dug in for the assault on Germany's line of fixed defenses.

The German boundary had been yielded with only token resistance, but the Wehrmacht was not collapsing before the Seventh Army thrust. As early as 7 December, reports from G2 indicated to the American commanders that intensive preparations were being made by the Germans to turn the Siegfried Line into an iron redoubt. These defenses were not planned as a trap for the Allied forces; they were the base from which German counterblows would be uncoiled.

Divisions serving under XV Corps found the breakthrough into the Rhineland more difficult than the four divisions of VI Corps that had reached the Siegfried Line. In the Northern sector of the Seventh Army advance, heavy resistance was met at the Maginot Line, and enemy fortifications at the "Ensemble de Bitche" repulsed the American attackers for over a week. The annihilation of the ring of fortresses around the town of Bitche provided XV Corps with new impetus for the push into Germany.

All units of the Seventh Army were now keyed for a northern drive that would hurtle against the German defenses with momentum gained from recent victories. But even as this drive mounted towards its peak, reports of the German counter-offensive in Belgium and Luxembourg reached Seventh Army Headquarters. On the night of 20-21 December, the thrust into the Saar was called off by orders from higher headquarters, and the Seventh Army divisions were directed to prepare a new line of defense. A fresh phase of operations began as the American units tightened their forward wall and waited for the enemy to counterattack.[174]

CIC in the New Operations

The sudden transition from highly accelerated to static operations was one of the exigencies of combat that CIC units with the Seventh Army had to meet. Problems such as the attempted infiltration of German soldiers dressed as Americans that CIC had rarely encountered during the periods of rapid advance now received careful attention. The stalling of the Seventh Army advance was a cause of bewilderment to the civilians in recently liberated regions. Wild rumors about a massive German

174 Report of Operations, The Seventh United States Army, in France and Germany: 1944-1945, Vol II, pp. 463-494.

[redacted]

drive to recapture Alsace circulated freely, and civilians fled in large numbers from front line areas. Friendly townspeople who regarded American troops as liberators feared that all would be lost if the Germans returned, and they made it clear that an American setback would show that the Seventh Army had "let them down." In the face of this situation, relations between counterintelligence staffs and local authorities were strained. CIC could not alleviate civilian uneasiness over the tactical situation, for this anxiety was shared by the American soldiers in the trenches and foxholes and their leaders at the command posts along the Alsatian front.

45th CIC and some Unfriendly Civilians

As the combat troops of the 45th Division forged across Eastern Alsace and the German border, the 45th CIC Detachment, under command of Captain Rupert W. Lenthner, doggedly kept pace with the forward elements. Agents reported increasing security dangers as they moved from a territory where the civilians were predominately friendly to one where the native populace looked upon the Americans as conquerors. The recent and complete domination of the Alsatians by the Germans had left telling marks; most of the NSDAP (Nazi Party) officials and members, including rank and file supporters, fled into Germany in the van of the Seventh Army advance, but a few fanatics remained as snipers to harass American troops from the rear.

Alsatian civilians offering information to the tactical commanders could not be trusted. Outside the town of Berenthal, voluntarily stated that a hundred Germans had left the town early in the morning; but an American reconnaissance unit returned an hour later to report that the enemy was still strongly positioned in Berenthal with no apparent intention of relinquishing the garrison. When the 45th Division entered the town two days later, was arrested by CIC and placed in a Civil prison.

At travel control roadblocks established in critical localities of the Division sector, CIC agents and the 15 Alsatian Gendarmes attached to the Division encountered numerous civilians with involved cover stories. told one of the best. A search of clothing had revealed a notebook containing several pages of cryptic words. After a brief questioning, he admitted that the scrambled writing constituted a code which he had received from a female acquaintance for his own protection. The purpose of this code, claimed, was to warn him of forthcoming German air activity. CIC agents lost no time in dispatching the man for confinement pending further interrogation.[175]

175 Rpt to ACofS, G-2 (CI), Hq VI Corps from Hq 45th Inf Div, G-2 Section, Subj: Semi-Monthly Counter Intelligence Rpt, dtd 21 Dec 44 in 45th CIC Det Correspondence File Aug 44 to Jul 45 (Confidential), (Kansas City Records Center, Box 45121).

CONFIDENTIAL

Mysterious Motorcyclists

The operation of civilian roadblocks was not always a routine matter. On 30 December, French Forces of the Interior (FFI) guards outside Obermodern noticed a motorcycle with two men astride heading toward their post. They signalled the vehicle to stop, but the driver ignored the order and sped past the roadblock. A fleeting glimpse of the riders indicated that they were both dressed in American uniforms, complete with combat jackets and rubber boots. Guards in the Obermodern area were alerted to watch for the motorcycle, and later in the day, a French Forces of the Interior soldier spotted the two men in the vicinity of the railroad station. The motorcyclists complied with his order to halt, presented their identity papers, and were waved on their way. There was only one thing wrong with this check. The identity papers were written in English and the French Forces of the Interior soldier could not understand a word of the language.

When questioned by CIC Agent Fausto Molinet, the French Forces of the Interior expressed some suspicion of the two men since their manner of speech had differed from the ordinary "GI," and they had scrupulously avoided contact with other American soldiers. Their clothing was also somewhat unusual. No unit or rank insignia was apparent, and both men wore overseas caps with a "U.S." mounted on a round shield. To add to the mystery, the motorcycle bore no license plates and seemed to answer the description of a vehicle previously reported stolen in a nearby town. Agent Molinet felt certain that the motorcyclists were part of an enemy agent team dropped behind Allied lines to participate in espionage and sabotage activities, and he recommended that all security agencies be notified to maintain a vigil for the men. But the bluff had apparently succeeded; the suspected agents either had mingled with the native citizenry or returned to Germany.[176]

Morale in the 45th Division

The order that brought the 45th Division to a standstill and started retrenchment operations was expected to have an adverse effect on the morale of the front line soldiers. CIC discovered a particularly heavy flood of leaflets dropped by the Germans in the Division area. Various themes disquieting to the tired, battle-weary troops were intertwined. The leaflets mentioned that the Division had a high casualty rate, that the soldiers did not know what they were fighting for, that they had a good chance of being killed or wounded "for the sake of warmongers and profiteers who once more contrived to stay at home," that "the draft dodgers at home expect every Joe to do his duty." Drawings of tuxedoed civilians surrounded by alluring women and bottles of champagne were placed next to sketches of soldiers discovering the body of a dead buddy. One of the leaflets was entitled "Your First Winter in Europe" and went on to read:

176 Rpt to ACofS, G-2, from Hq 45th CIC Det, Subj: "Two Unidentified Men in American Uniform," dtd 31 Dec 44 in 45th CIC Det Correspondence file, Nov 44 - Mar 45, (Confidential), (Kansas City Records Center, Box 45121).

"EASY GOING HAS STOPPED.
Perhaps you've already noticed it-----the nearer the German border, the heavier your losses.

Naturally. They're defending their own homes.

Winter is just around the corner----hence diminishing AF activity.

More burdens on the shoulders of the Infantry----therefore heavier casualties."[177]

CIC agents discovered that despite the onslaught of this propaganda and the sudden change in the tactical situation, the Infantrymen generally maintained the high level of morale that had been present during the Allied advances.

103rd CIC Concentrates its Activities

The 103rd CIC Detachment, led by Lieutenant Dugald W. Hudson, took advantage of the static situation in December 1944 to accomplish more intensive counterintelligence work through travel control and individual investigation of complaints. In cooperation with Civil Affairs officials and other intelligence officers, the CIC agents made thorough searches within the Division area of occupation for firearms, signalling devices, and other potential security menaces. Mixed feelings towards the American troops on the part of civilians in Alsace and Lorraine made stringent security measures within towns and villages essential. Seventeen roadblocks manned by "white list" civilians supplemented the usual Military Police posts at critical junctions. A premium was placed on the issuance of "laissez passers," and those individuals given passes were strictly enjoined to restrict their travels both in frequency and length.

Although the CIC agents noted that important Nazi party leaders, extreme collaborationists and numerous enemy agents had hastened across the German border before the 103rd Division occupied the Alsatian towns, tight security controls netted 600 persons for CIC screening during December. Interrogation uncovered two SD agents, one Gestapo agent, and two Waffen SS members while thirty-four civilians were deemed suspicious enough to be placed under house arrest.

Resistance activities against the American troops were rarely encountered. The departing Germans had warned the Alsatians to expect brutal treatment from the Americans, but the behavior of the troops dispelled the effects of this propaganda. Even petty pilfering by front-line soldiers was largely eradicated as a result of an anti-looting campaign in the Division.[178]

177 Pamphlets in 45th CIC Detachment Correspondence Files, Aug 44 to Jul 45 (Unclassified), (Kansas City Records Center, Box 45121).

178 103rd CIC Det, Semi-Monthly Counter Intelligence Rpt, dtd 7 Jan 45, in 103rd CIC Det Rpts File, (Confidential), (Kansas City Records Center, Box 25096).

44th CIC Establishes a Pattern of Town Control

During December, agents of the 44th CIC Detachment developed a system for the effective control of those towns in Alsace which showed marks or even traces of Nazi Party control.

The first step was to apprehend all the former Nazi leaders who had not fled the town, on the basis of information divulged by the captives and by voluntary informants. A proclamation forbidding any political organization within the town was posted. These measures usually put a hasty end to lingering Nazi hopes of rebellion.

To insure the security of American troops, CIC agents directed the collection of all weapons held by civilians or cached by the departed Germans. Civilians were advised that stringent hours of circulation would have to be adhered to without exception. Violators of curfew hours would be strictly punished. In towns that lay within battalion or company jurisdiction, the CIC agents took an additional step. A complete freeze was set on all civilian movement and lifted only when the American control of the town was no longer in doubt.[179]

514th Detachment Appraises CIC With an Armored Division

The 514th CIC Detachment, which was attached to the fast-striking 14th Armored Division, found the month of December 1944 relatively quiet. Accustomed to instituting security measures while moving at high speed, agents of the Detachment were able to reflect on their field experiences of the past months. Several factors that the agents considered essential in training CIC personnel for service with an armored division were mentioned by Captain Edward F. Biedron, the Detachment Commander, in his Monthly Information Report.

Governing all the operations of the CIC unit was the extreme mobility characteristic of the armored division in its tactical missions. In the course of a day or two, an armored column was likely to capture as many as ten or twelve villages and towns. The burden of establishing at least minimal security in these areas lay almost solely with the handful of CIC agents. Little thought could be given to proving the guilt of a person on whom suspicion was placed; the merest shred of evidence was considered reason enough to detain the individual as a security hazard. At all times, the security of the parent unit was the primary consideration.

Close cooperation with Civil Affairs/Military Government, the Military Police, and other Division agencies was considered essential. On civilian matters, CIC found that their operations could be neatly dove-tailed with Civil Affairs-Military Government, and tight tactical security could be built up by joint planning with the Military Police. When CIC assignments were particularly heavy, the Military Police were often able to lend important assistance.

179 44th CIC Det, Historical Report for Dec 44, undated, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

The relation between a CIC unit with an armored division and the next higher echelon CIC unit had to be especially well-knit. Never certain of the amount of time available for its operations in a village, the division detachment had to keep the corps detachment fully appraised of the condition in which the security of the village was left. Investigations suspended in mid-air had to be completed; individuals apprehended and placed in temporary confinement had to be given further disposition; preliminary security measures such as blackouts and curfews, interruption of civil communications, impounding of mail, and establishment of a provisional town council had to be reinforced. Without proper briefing from division detachment agents, the CIC personnel at corps level were faced with tracking down futile leads and covering a great deal of unnecessary ground.

The demands on the individual agent serving with an armored division CIC detachment were rigorous. Good judgment alone was not enough. Each agent was required to make on-the-spot decisions without pondering over circumstances and details. There was no room in an armored division CIC detachment for a latter-day Sherlock Holmes; careful planning always had to be governed by the factor of speed. In addition, an agent unacquainted with the tactical movement and administrative control of an armored division was severely handicapped. Captain Biedron urged thorough training of CIC agents in basic concepts of armored warfare before assignment to his detachment.[180]

The effectiveness of the 514th CIC operations was demonstrated in the capture and handling of Otto Voelkel. Working from a master list of suspects prepared at a higher echelon, the division agents found Voelkel in the town of Wissembourg, Bas-Rhin. Voelkel tried to pass himself off as a loyal French National by producing a French Army paybook. CIC agents quickly noted that there was a discrepancy in the birth date listed in the paybook and that Voelkel did not possess the vital statistics listed in the physical description.

Interrogation revealed Voelkel as a professional toiler in the vineyards of illegal activity. Espionage was simply a new chapter in the long, unsavory story on his life. From 1928 to 1939, he was engaged in "business" in Casablanca, French Morocco. For the most part, Voelkel's enterprises consisted of border smuggling and opium deals. French authorities had arrested him, but he was soon released through the German armistice commission. Voelkel seemed to have a penchant for getting in trouble and, in March 1942, the French Securite Militaire arrested him in Marseille on charges of espionage for the SD.[181] Again, the Germans came to his rescue and he was released to their control in Dijon by November 1942. CIC made sure that Voelkel would at last receive his due; they sent him, along with his condemnatory dossier, to the Bureau de Security Militaire Territoriale for trial.[182]

182 Sixth Army Group G-2, Fortnightly Counter Intelligence Rpt No. 7 dtd 7 Jan 44, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

3rd Division CIC Catches a Pair of Agents

On 21 December, the combat troops of the 3rd and 36th Divisions were rotated, and the 3rd Division, which had held defenses in and around Strasbourg, was moved on line while the 36th Division, "desperately in need of relief and rehabilitation," was withdrawn from its operations in the Colmar Pocket with the First French Army.[183] Before leaving Strasbourg, members of the 3rd CIC Detachment dealt with a number of espionage agents on short-range missions. All these agents were part of a concerted German effort to gain information on the disposition of Allied forces prior to the January offensive.

Rene Alexander Jacob arrived in Kilstett, after being escorted across the Rhine in a motorboat by two German officers, four soldiers and a German espionage leader, on 20 December. Equipped with 150 Reichmarks, 5600 francs, the alias of "Pierre Gravilliers," and a transparent cover story, Jacob presented himself at the local French Forces of the Interior office. He claimed that he was an escaped French worker and volunteered some tactical information about the disposition of the German forces as proof of his allegiance to the Allied cause. French Forces of the Interior became suspicious when Jacob requested a travel permit for the Strasbourg-Belfort vicinity, and they referred the too-obliging "M. Gravilliers" to the 7th Infantry Regiment Interrogation of Prisoners of War (IPW) team. Without interrogation, he was forwarded to 3rd Division CIC where agents quickly tore apart his flimsy cover.

Jacob soon disclosed that he was a member of the Nazi Party and that he had accepted a three-fold mission from the Frontaufklaerungstruppe 360 with his eyes on a 10,000 franc bonus and credentials in the espionage organization for successful completion of his work. Aware that all hope of reward was gone, Jacob spoke freely to the CIC agents. His mission was: to find out in Strasbourg why Frenchmen preferred to join the U.S. Army rather than volunteer for the French Forces of the Interior; to report on unit insignia, signs and vehicle markings observed between Strasbourg and Belfort; and to report on gun emplacements, types of tanks used, locations of airfields, troop barracks and camps, and any other military information concerning the U.S. Army. Jacob was scheduled to complete this mission within five days and return to the German lines near Colmar. His sojurn in Allied territory was to be marked by a visit to a stay-behind agent in Sigmaringen who would give Jacob another mission in the same area. But the embryo spy had been nipped just when his career was budding, and 3rd Division CIC turned him over to Special Counter Intelligence (SCI).

Joseph Litschgy was of a different background than Jacob, but his mission was similar. The Germans had recruited him from a concentration camp where he had developed a solid reputation as a malingerer and trouble maker. Litschgy was given

183 Seventh Army History, Vol II, p. 503, (Staff and Faculty Library).

a simple cover: he was to state that he had escaped from Germany by crossing the Rhine on a felled tree. Before sending him on his major mission, Litschgy's handling agent dispatched him on a trial mission of reconnoitering the west bank of the Rhine. After his successful return to Germany, Litschgy boarded a motorboat with three Infantry officers, four German soldiers and his ubiquitous handling agent. He was landed near a destroyed bridge where the Germans had established one prong of their attack. French Forces of the Interior seized Litschgy as he crossed into Allied territory and brought him directly to 3rd Division CIC.

After brief questioning, the CIC agents secured Litschgy's full confession. His primary mission was well-suited to his personality; Litschgy was to sound out lower-class opinion in Strasbourg regarding the end of the war, and to determine the attitude of these people toward the Allies. In addition, he was to note public proclamations, purchase newspapers, and discover tactical dispositions and identities of American units. The Germans had provided him with a circuitous route to follow that would bypass French Forces of the Interior posts near Gambsheim. They also had given him the name of a waitress-prostitute who could furnish him food and tobacco. But apparently, the German espionage unit had been poorly informed, for their carefully chosen route had led Litschgy right into the arms of the French Forces of the Interior.[184]

Counter Intelligence Effects of VI Corps Withdrawal

Agents of VI Corps CIC discovered that the American retrenchment operations during the latter half of December prompted a strong psychological reaction from the civilians in the Corps area. Confidence in an Allied victory, which had been growing with each advance of the Sixth Army Group, began to wane. The Alsatians no longer felt secure against the return of the Germans, and many civilians who had been openly cooperative with Allied Intelligence suddenly became reticent or left their communities for the safety of rear areas. Prompted more by fear of German reprisals than pro-Nazi feeling, the average civilian maintained almost utter silence when questioned by CIC agents. A pall of terror seemed to have descended upon the inhabitants that even friendly feeling towards the Allies and the Allied cause could not lift.

The denial of information to Allied intelligence was accompanied by considerable evidence of a rise of anti-American propaganda. Individuals who had been in hiding or who had remained in the background began to display overtly their distaste of the occupying forces. Their boldness rarely paid dividends. CIC kept a sensitive ear tuned to the mutterings of these malcontents and did not hesitate to apprehend the truly subversive elements among the population.

A serious security danger was added in the towns bordering on front line areas. Large numbers of French Forces of the Interior and civil officials entrusted by CIC

184 Hq Sixth Army Group G-2, Fortnightly Counter Intelligence Report No. 7.

2530
CONFIDENTIAL

with the maintenance of order, fled their posts and joined the throng of refugees clogging the highways to the rear. The sight of these civil leaders in flight was hardly expected to bolster the morale of the remainder of the civilians, and the counterintelligence situation became correspondingly grimmer.

VI Corps CIC Evolves a New System of Control

To meet the increased problem of controlling civilian circulation, VI Corps CIC enlarged the network of roadblocks manned by Gendarmes and French Forces of the Interior personnel and the number of Military Police check posts and roving patrols. These posts and patrols stopped all traffic, military and civilians, checked identity papers, and enforced the restriction forbidding travel by civilians in military vehicles.

Added to this extensive network was a new system of roving patrols conducted by the 117th Reconnaissance Squadron. Twenty-four hours a day, members of this unit went around in jeeps and armored cars checking all civilian and military traffic as well as security measures in force at bridges, ammunition dumps, railroad yards and other vital installations. All patrols were equipped with radio communications and maintained contact with Squadron headquarters. A section of the VI Corps CIC Detachment was on duty at all times at this headquarters, and one Gendarme accompanied each patrol to help cope with civilian matters. Problems that required CIC action were immediately radioed to the Headquarters, and the agents became used to answering these calls on a moment's notice.[185]

Seventh Army CIC Catches Short Range Agent

Seventh Army CIC with its headquarters in Saverne on the outskirts of Strasbourg found plenty of work to accomplish during the latter half of December. The static situation was an invitation to increased espionage, and CIC agents, directed by Detachment commander Lt Col Kenneth Crowell, utilized the merest scraps of information to break up enemy nets. Under CIC interrogation, ill-trained, inexperienced, short range German agents often spilled out modus operandi and names of personalities in the espionage units that had dispatched them. was among these unintentionally helpful individuals.

Apprehended by a patrol from the 7th Infantry Regiment after crossing the Rhine early on the morning of 17 December, was whisked back to 3rd Division CIC. Preliminary screening led division agents to believe that this former employee of the Vichy Labor Ministry at Sigmaringen was sticking to an improbable cover story, and he was turned over to 307th CIC. In final interrogation by Agents Woodrow W. French and Philippe G. Jacques, account was torn apart.

185 206th CIC Detachment, Counter Intelligence Report #12 for period 24 Dec 44 to 11 Jan 45, dtd 11 Jan 45 (SECRET), (Staff and Faculty Library).

CONFIDENTIAL

he admitted that he had been given the mission of contacting one in the Stockfield sector of Strasbourg. was directed to hand 10,000 francs and instruct him to obtain immediate information about troop movements in Strasbourg and the stockpiling of Engineer amphibious material for the crossing of the Rhine. was supposed to transmit the information he gathered to who would return to the point on the Western bank of the Rhine where he had been landed. A pre-arranged flashing of blue, white, and red light signals at about 2200 hours on 18 December would alert Germans on the other side of the Rhine to pick up their agent by motor launch. Having completed the interrogation, CIC allowed to keep his date on the bank of the Rhine at the appointed time, but there was one inconvenience. was chaperoned by an infantry patrol from the 3rd Division. The signal lights were flashed, and soon the muffled drone of a motor launch was heard by the watchful patrol. As the boat neared the bank, shouted out a warning to his compatriots. His scream was too late. Zeroed in by the weapons of the American soldiers, the motor launch and its occupants were destroyed. attempting to escape as the soldiers opened fire, was critically wounded, a victim of his own folly.

But the incident did not end on the banks of the Rhine. Seventh Army CIC staged a raid on the house of the Strasbourg contact and a former Nazi Blockleiter. Caught without means of dodging the accusation of collaborationism, admitted that he had accepted a gift of 500 marks from the Germans. But apparently was to have given him his first mission. had been captured before the act.

Enemy agents were often compelled to lead complicated lives. landestine activities caused him to venture on what might be called the "long way home." A French national affiliated with a German Abwehr espionage group, had left France before the Allied advance, established a false identity as a French Prisoner of War in Germany, and "escaped" to Allied held territory. The speed of the Allied gains in Alsace prevented from reaching Metz where he was to collect information concerning French public opinion and troop dispositions. As a stop-gap measure, enlisted as a private in the French Forces of the Interior in Alsace, saving his false "laissez passer" and 100 Reichmarks for later use. But dual career as a French Forces of the Interior soldier and German espionage agent was halted before it had fairly begun. On 22 December, Seventh Army CIC, acting on a tip from a confessed agent, entered the French Forces of the Interior barracks in Strasbourg and arrested the young soldier. In his confession, claimed that he had been recruited into the Abwehr organization under duress; German agents had threatened to expose his Black Market activities to civil authorities.

Espionage Agent Discovered in Prison

Seventh Army CIC used every ruse known to counterintelligence in its effort to eradicate German stay-behind agents in Strasbourg. CIC knew that the unseen

CONFIDENTIAL

enemy was in their midst; the problem was to get wide enough coverage of the city to prevent the Germans from maintaining an espionage foothold in this critical area. Realizing that some of the civilians placed in Strasbourg jails for minor delinquencies might actually harbor serious anti-Allied espionage plans, the 307th CIC placed an agent provocateur in the Prison Departmentale in the hope that this covert worker would be able to gather the German sympathizers around him.

On 28 December, the first reward of this plan was reaped. a sixteen-year-old French National who had been detained in the prison for failure to possess proper identity papers, confided in the agent provocateur that he was serving the Germans as a link in an important espionage chain. The youth was taken to CIC headquarters where 2nd Lieutenant George Perper obtained the complete story of activities on behalf of the German SD organization.

The and ardent Abwehr agent, had recruited the youthful with a lure of 10,000 francs, to remain in Alsace after the Allied conquest of Strasbourg. was entrusted with the mission of obtaining information on Allied armament and material, the activities of security police agencies and their methods of operation in regard to circulation of civilians (requirements for identity papers and "laissez passers"), and the extent of reprisals against German collaborators apprehended by the Allies. When he completed his mission, was supposed to cross the lines and report to in the town of Oberkirch. The agent provocateur had detected just in time; the Prison Departmentale was preparing to release the youth at the same moment that CIC arrived on the scene.[186]

handling agent, had been indicted by many other captured German espionage figures and the dossier of this fanatic Nazi increased considerably with confession. But it was not until 24 June 1945, two months after the German surrender, that CIC caught up with agents of the 307th CIC found him in the woods near Augsburg calmly picking flowers and berries.[187]

In sending a mass of poorly-trained agents into Allied occupied territory during December 1944, the German Intelligence Service was clearly taking a calculated risk. But this "saturation" method was bound to produce some results. Allied security agencies were alert but not omnipresent, and the Germans were willing to sacrifice any number of agents for the few that would manage to re-cross the lines with information.

Most of the agents apprehended were thoroughly interrogated by the time Army CIC had finished with them. Leads were developed, personalities exposed and confessions secured before the 307th CIC passed the erstwhile agents to the Bureau

186 307th CIC Detachment, Monthly Information Report, dtd 20 Jan 45, (SECRET), (Staff and Faculty Library).

CONFIDENTIAL

Securite Militaire Territoriale for trial and ultimate disposition. Occasionally an agent was encountered who seemed to possess better than average potentialities for use as a double agent. This type of individual was transferred to Special Counter Intelligence at Sixth Army Group, after the CIC interrogation had been completed. Officers at Special Counter Intelligence would then assess the chances of doubling the man.[188]

Seventh Army CIC Political Survey

Alsace, with its population of mixed German and French strains, presented a great conglomeration of national sympathies and allegiances. CIC agents had to get used to dealing with a people who, while not ardent supporters of the Third Reich, often possessed a lingering loyalty to the German "Fatherland." To obtain a sampling of public opinion, the 307th CIC Detachment instituted a survey of civilians attitudes in Strasbourg and outlying areas, during the period 24-28 December.

In Saverne and the district to the south of Strasbourg, the ratio of pro-French to pro-German civilians was gauged to be roughly four-to-one but, nearer the German border, the proportion was almost exactly reversed. Within Strasbourg, agents discovered that the Alsatian population had little interest in French domestic politics. The local political scene was markedly colored by the effects of German propaganda that had emphasized the close working arrangements between the Allied forces and the frequently Communist-dominated resistance groups. Civilians were confident that the Allies would be the eventual victors in the War. At the same time, they bitterly resented the aerial bombardment of the city and the destruction of surrounding areas by heavy artillery fire.

The Germans tried to bolster their supporters in the Allied-held city by booming broadcasts via loudspeakers set on the eastern bank of the Rhine. Regular reports proclaimed the imminence of the German counterattack that would return Strasbourg to German hands. To ward off the effects of these propaganda outbursts, Psychological Warfare sound trucks were dispatched through the streets of the city delivering reassurances of Allied military supremacy to the wavering confidence of the civilians.[189]

A Fifth Column Movement

Late in December, CIC agents attached to the First French Army arrested a team of enemy saboteurs that had penetrated deep into the rear sectors of the Allied forces. The saboteurs had failed to cause any damage to Allied material; their

188 307th CIC Detachment, Monthly Information Report, dtd 20 Jan 1945, (SECRET), (Staff and Faculty Library).

189 Hq Sixth Army Group G-2, Fortnightly Counter Intelligence Report No. 7 dtd 7 Jan 44, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

confession, however, proved quite revealing of the clandestine operations of the German Intelligence Service.

The team was composed of three Frenchmen, former members of the fascist Legion of French Volunteers and the "Milia" (Militia). Each saboteur armed with a pistol, that had been concealed near the groin, and three grenades hidden beneath an American combat jacket. CIC interrogation disclosed that the saboteurs had been entrusted with the mission of destroying Allied vehicles and fuel dumps, including automobile gas trailers and railway tank-cars. Their particular mission was only the advance part of a large-scale plan to harass Allied supply areas.

At an intelligence school in Germany, three detachments, consisting of twelve French nationals each, were undergoing instruction in the art and practice of sabotage. Each detachment was composed of four teams and assigned a specific sector of responsibility. The teams were then alloted sub-sectors in which they would perform their operations. The first move of a team would be to contact an outpost in the Allied occupied territory. Members of the team were to declare that they were German-requisitioned laborers who had escaped from Germany with considerable difficulty. Numerous papers certifying that they had been employed in a particular factory or work-gang were provided. To help get past Allied refugee control points, the saboteurs carried a can of rations which they could offer to soldiers and security officials as a token of their respect and as a means of avoiding a thorough body search. Once past the front lines, the teams were instructed to avoid main lines of communications and proceed as quickly as possible to the targets in their assigned sectors.

Each team was equipped with four ration cans that would be carefully concealed from security officials and other inquisitive individuals. These cans contained four bombs, wrapped in silk and composed of the following parts:

1. A magnetic demolition charge, containing about 400 grams of explosives and two magnets that would insure immediate attachment of the bomb to a metallic surface.

2. A flexible detonating cord, 2 1/2 meters long, that terminated in a percussion cap.

3. A delayed-action primer with the percussion cap attached to a safety pin.

4. An incendiary compound, tubular in shape, with an 8 cm slow fuze attached to a friction igniter on one side and a 6 cm slow fuze with a detonating cap on the other side.

CIC agents noted for future reference how these materials could be used.

With these simple elements, each saboteur would have at his disposal material that could be used for destruction by explosion or fire. Utilizing the charge and the

delayed-action primer, the saboteur would have a compact explosive bomb. If fire would more readily produce the desired destruction, the saboteur could ignite the incendiary compound by rubbing the friction igniter. Or, if the saboteur wanted to combine both fire and explosion, he would only have to set off the detonating cap on one side and the friction igniter on the other.

The description of this mechanism convinced the CIC agents that the ration can contained a grimly compact yet innocent-looking sabotage device. Fastened under vehicles, it could be detonated instantaneously; and, carried by a vehicle in motion, the primed charge could explode as a result of vibration. All Sixth Army Group forces were warned to keep on the alert for men who fitted the description, given by the captured agents, of the operatives of the sabotage detachments.[190]

44th AAA Brigade CIC Security Measures

For the latter half of December 1944, the CIC agents serving along the Southern coast of France with the 44th AAA Brigade made continual surveys of the "Zone Interdite" and the "Zone Reservee" with a view to ascertaining and removing from combat areas any suspicious persons frequenting or living in these critical zones. By the end of the month thirteen citizens who represented a potential security menace had been detained, three suspected enemy agents were under investigation, and two saboteurs had been arrested.

In addition to this personality control, the 44th AAA Brigade CIC agents developed an overall plan for civilian control that was quickly placed into effect. The combat zone was divided into three sub-zones. Closest to the actual line of battle was the "evacuated area" from which all civilians were excluded. Immediately behind this area, was the "restricted zone" where civilians were allowed to remain only if they could prove residence in the locale prior to August 1944. Entry to and exit from this zone could be obtained only by display of a pass properly signed by a Securite Militaire officer and countersigned by the chief of a local Gendarme brigade. To the rear of the zone was the "unrestricted zone" which, despite its designation, was not free of controls. Civilians residing in this area or desiring to enter or leave it were required to possess an identity card. Circulation measures were enforced by roadblocks jointly manned by French Gendarmes and American Military Police, and evasion of these roadblocks was made increasingly difficult by the establishment of roving patrols that combed the area in search of stray wanderers.

CIC tightened controls on busdrivers who previously had connived with civilians desiring to pass roadblocks without being checked. A warning was issued that made

190 Annex 3 to G-2 Periodic Report #204, Hq VIII Corps, dtd 7 Jan 45 "Source: First French Army G-2 Periodic Report No. 130, 25 Dec 44," (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

busdrivers personally responsible for ascertaining their passengers' right to travel within the zone. All transgressions were jointly charged to the offenders and the busdrivers.

Security Precautions Breed Rumors

The extensive controls established in the 44th AAA Brigade area were necessary for the security of the Allied forces; their operation was successful, but the stringent enforcement of these rulings tended to lower civilian morale. Civilians living near front line areas interpreted the sudden increase in security precautions as a sign of waning Allied power and rumors began to spread throughout the Brigade region. False reports of enemy parachutists landing at La Turbie, Nice, Antibes, and Cannes and of enemy glider activity over Allied territory had to be denied. Swelling accounts of a gun-fight between American Military Police and enemy soldiers dressed in British uniforms had to be punctured.

Not all the rumors originated among elements unfriendly to the Allies. A British Broadcasting Company (BBC) broadcast reported the establishment of an enemy bridgehead in the vicinity of Strasbourg when, in fact, only a patrol had landed on the island. This newsflash gave rise to a great deal of uneasiness until the allegation was shown to be false. A First French Army report stated that the Swiss radio also had a demoralizing effect at times, since it generally chose to magnify German successes and belittle Allied gains. These pessimistic accounts, which indicated serious lapses in Allied communication censorship, complicated the work of American security and psychological warfare agencies.

Military Security Problem

While CIC agents hastened about the Sixth Army Group area establishing rigid civilian controls, they also recommended measures for a tightening of military security as the moment of the German counterstroke was awaited. Travel restrictions on military personnel were carried out with "extreme vigilance." At roadblocks, personnel were required to produce trip-tickets, dog-tags, "ID" cards, and similar military identification. This system prevented unauthorized circulation within critical areas and also was a means of snaring German soldiers masquerading as Allied personnel.

Security of information was generally good, but there were some laxities. The report of one German Prisoner of War was particularly disturbing to American security officials. Monitoring of Allied radio communications had apparently provided German intelligence with most of its information and, the prisoner claimed, his Division G2 had gained possession of almost all codes used by the Allies.

From the 100th Division came reports of several violations of censorship regulations. Members of the Division had occasionally left letters with civilians to be

mailed, evidencing a blind trust in the Alsatians which was unwarranted by their uncertain attitude towards the Allied forces.

On 16 December, CIC agents investigated the apparently malicious hacking of four carrier cables without determining the individual responsible for the sabotage. Other investigations were more successful. A farmer was apprehended after he had chopped and cut telephone wires which Signal Corps personnel had strung across the side entrance to his home. Motivated by annoyance at the blocking of access to his house rather than any general grievance to the Allies, the farmer nevertheless had committed an act of sabotage and he was turned over to the Bureau de Securite Militaire Territoriale for trial. The tense days of December 1944 were not suitable occasions for venting anger at the hardships and frustrations imposed by the War.

Countersabotage Requires Manpower

CIC discovered that some installations and structures required extra guards to prevent sabotage attempts. A two-kilometer long railway tunnel near Arzwiller was almost destroyed on 26 December; three American 81 mm mortar shells were found fastened to the railroad track in the tunnel in such a position that contact with the flange of a passing train would have detonated them. The nearness of disaster in this instance caused the posting of more guards at the tunnel exits and a continuous patrol of the interior of the structure. Security of vital installations could not be overdone in this area of latent German allegiances, since the build-up of German forces across the line was a powerful cue to enemy-inspired action against the Allied forces in Alsace in December 1944.[191]

191 Hq Sixth Army Group G-2, Fortnightly Counter Intelligence Report No. 7, dtd 7 Jan 44, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

Chapter 2

The Germans Counterattack

Elements of the U.S. Seventh Army greeted the New Year of 1945 without joy. In the waning hours of 1944, General Patch had visited the Command Posts of XV Corps and VI Corps to warn the commanding generals that an enemy attack was to be expected during the early hours of New Year's Day. Official holiday celebrations were hastily cancelled and at thousands of foxholes strung out along the Seventh Army defensive line, soldiers peered into the dark night and waited.

German operation NORDWIND was unleashed upon the American lines with all the fury implied by its code name. At several points, the American forces reeled from the impact of the blow; some recovered to gain back the lost ground, others could not build enough strength for a counterattack. After the initial German thrust, SHAEF strategy dictated a limited withdrawal along the northern salients of the Sixth Army Group front. Strasbourg was to be defended, largely to maintain the morale of the French, and the French First Army was charged, along with elements of the Seventh Army, with sharing the defense of this city.

Towards the end of January, Seventh Army forces in Northern Alsace had stiffened to repulse the German attack, and, to the South, the French First Army, with attached American units, began to eliminate the troublesome pocket built up by the German Nineteenth Army in the Colmar region. By the early days of February, the Colmar pocket was empty; the tattered German forces had fled across the Rhine. Their flight marked the end of the last German offensive.[192]

The Watch for German "Jeep Parties"

The German effort to recover Alsace and pin a stunning defeat on Seventh Army forces was marked by a wide variety of desperation moves. One of the commonest of these desperation tactics was to send groups of three officers and a driver, clothed in American uniforms, across the front lines in a jeep painted OD and replete with U.S. unit markings, a maneuver that had been used with a marked lack of success during the Ardennes breakthrough further to the north during mid-December. The officers, selected for their ability to speak English, frequently managed to outwit American sentries and gain access to material which they hastily sabotaged. All members of these "jeep parties" were equipped with vials of acid that could be thrown in the faces of inquisitive sentries or other alert soldiers who tried to balk their movements. American intelligence repeatedly advised sentries to allow no vehicle to pass their posts until full identification of the vehicle and its occupants had been made. To cope with the "jeep party" situation Intelligence added the recommendation that the sentry question the driver (who frequently was unable to speak any English) of suspect vehicles and request a trip ticket from him.

192 Report of Operations, the Seventh United States Army in France and Germany 1944-1945, Vol II pp. 559 ff. (Staff and Faculty Library)

2539
CONFIDENTIAL

The recommendation was only as effective as the men who were told to exercise this extra control measure. Typical of the laxity of sentries was an incident reported by the 3rd Infantry Division.

On 2 January, an officer riding in a civilian car painted OD with U.S. markings was stopped at a roadblock. The sentry peered into the vehicle, glanced at the officer, who was wearing no helmet liner and had no visible unit insignia, and waved the car on without a single question. Before moving, the officer decided to hold a brief interrogation session with the sentry.

"Why did you stop this car?"

"This is a roadblock, sir."

"What are you looking for?"

"We're checking vehicles to see if there are any Germans in American uniforms in them."

"Well, how do you know that I am not a German?"

"I know that you are an officer because I saw the bar on your collar."

"Don't you ask for the password?"

"Yes, in cases when we're not sure of the men."

"What do you do if a passerby does not know the password?....I don't know it myself."

"That's all right, sir. The password is BUZZ BOMB. You'll need it at the next road block down the way."[193]

This almost incredible incident revealed to 3rd Division CIC agents that routine security indoctrination of troops was not enough. Easy-going sentries had to be clearly shown that their own lives were in danger unless they assumed that a man approaching their station was an enemy until he proved otherwise.

Security Control of the Civilian Population

Despite the withdrawals that Seventh Army units had to make early in January, the CIC detachments were able to maintain and enlarge their effectively-functioning

193 3rd CIC Det Rpt, 3d Inf Div G-2, Journal 2 Jan 45, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

controls on civilian traffic. The procedure followed in XV Corps illustrated how CIC adjusted to shifting conditions in the tactical situation. During the enemy attack in the area around the town of Bitche, refugees were permitted to evacuate the immediate area and the CIC agents were compelled to withdraw several control posts. Once the attack had subsided, refugees were screened in the rear areas with the cooperation of Civil Affairs. By 7 January, the American forces were again in control of the tactical situation, and the rearward movement of refugees halted abruptly. Small bands of Alsatians began to return to their homes, and XV Corps CIC kept this migration under control while preventing civilian traffic from clogging the main roads.[194]

Travel Control Directive is Published

The experiences reported by CIC agents working on civilian travel control during December and January were utilized as the basis for a revised Seventh Army policy directive published on 27 January. A resume of this directive indicated the controls to be instituted at various command levels:

"1. Division Sectors- All travel by civilians in division sectors is prohibited, except in cases of extreme emergency. Permits for civilian travel will be issued by Civil Affairs officers when proof of extreme emergency is considered adequate, and will be approved by a member of the CIC. Issuance of permits will not be delegated to local civil authorities. All civilians found traveling without permits will be arrested and turned over to the nearest CIC Detachment for interrogation as suspects. All civilians attempting to enter or leave forward positions will be arrested and turned over to the nearest CIC Detachment as espionage or sabotage suspects.

"2. Corps Sectors- All travel by civilians in Corps sectors is prohibited except when necessary to the success of the Seventh Army operations. Permits for civilian travel will be issued by the Civil Affairs officer or by local civilian authorities of proven reliability. Each permit, however, must be approved by CIC before becoming valid.

"3. Army Sector- Free civilian travel for a distance of six kilometers will be permitted. Permits for travel in excess of six kilometers will be issued only when necessary to the success of Seventh Army operations."[195]

In almost all authorizations for civilian travel, the ultimate responsibility was lodged with CIC units; the prior performance of these units gave ample proof that

194 Sixth Army Group G-2, Fortnightly Counter Intelligence Report No. 8, dtd 21 Jan 45, L-461. (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

195 Ibid., Report No. 9, dtd 7 Feb 45.

CIC could handle the assignment. During the final two weeks of January alone, Seventh Army CIC Detachments had supervised the evacuation of about 8,000 refugees from forward areas. A severe test of CIC travel control of civilians had been passed with honors.

Civilian Attitudes in Strasbourg

CIC travel control could help prevent civilians from interfering physically with Seventh Army operations; CIC had little control, however, over the civilian mind. The city of Strasbourg continued to present the major security hazard in the Seventh Army area until taken over by the First French Army. The SHAEF decision to defend Strasbourg, almost regardless of cost, indicated how much the Allies had staked on holding the city.

Ever since the Allied liberation of Strasbourg in December, the inhabitants had been worried about the reoccupation of the city by the Germans. Agents of the 307th and 206th CIC Detachments assigned to Strasbourg noted that this fear, although diminished in force once the Allied intention to defend the city was clear, remained latent in the Alsatian mind. The slightest appearance of withdrawal or movement of troops in any direction would generate a current of rumors and worries. Before the Seventh Army had strengthened its defenses, the people in Strasbourg who had worked with the Allies received the brunt of the scorn, fear and despair voiced by the unsettled population.

During this period, CIC recommended that French authorities arrest 45 persons deemed dangerous to security. This group consisted chiefly of active pro-Germans who emerged from under wraps as the Germans approached the city. By noon, 3 January, a Seventh Army order to evacuate Strasbourg had been received, and American vehicles began to leave the city. Almost every French flag in the city was hauled down, with the exception of the banners on government buildings such as the Mairie and the Palais du Rhin. Civilian reaction to the military order was immediate and intense. Excitement swelled to a feverish pitch. Some people smiled and rejoiced; others dismally gathered together their belongings and began to leave the city by bicycle, with pushcarts or on foot.

At 1530 hours, the evacuation order was rescinded. All available means were used to allay the public fears, and Psychological Warfare sound-trucks circulated about the city to assure the public that the Allies were staying. At the time of transfer of the city to the French, the population was approaching its normal routine, and Allied flags began to drape the Strasbourg dwellings again.[196]

196 206th CIC Detachment, Counter Intelligence Report No. 12, for period 24 Dec 44 to 11 Jan 45 (SECRET), dtd 11 Jan 45 (Staff and Faculty Library); and Sixth Army Group G2, Fortnightly CI Rpt No. 8, dtd 21 Jan 45, L-461 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

CIC Behind the Scenes

Behind the recission of the order to evacuate Strasbourg was some advice given by two CIC agents for which they could be justly proud. Colonel Bruskin, who had delivered the SHAEF order to retreat from Strasbourg, passed through Saverne on his return to SHAEF Headquarters and was met by two agents of the 307th CIC who had not joined the detachment's displacement back to Lunneville. The agents, well acquainted with the morale of the Alsatians, pictured for the Colonel the disastrous consequences of an American retreat. They stressed that the Germans who re-conquered Alsace would turn the region into a "blood bath," executing freely any and all who had cooperated with the Allies. So convincing was the argument of the well-informed agents that Colonel Bruskin was able to persuade SHAEF to hold American forces in Strasbourg.

After convincing Colonel Bruskin of the necessity of defending Alsace, the two agents still had some urgent work to do. They rushed out to the refugee-clogged highways where one of the agents, wearing the eagles of an American Colonel, stood at roadblocks and utilized his commanding presence to turn the mobs back. The presence of these agents and a small garrison of American troops was enough to halt the panic that had seized the Alsatians and prove that the Americans were not going to evacuate after all.[197]

510th CIC Gives an Assist

The fighting at the northernmost salient of the Seventh Army raged bitterly during January. To provide a counter reconnaissance screen for the forces in this sector, the 10th Armored Division was moved on line from a Third Army rest area near Metz. With the combat troops came the 510th CIC Detachment, which was quickly divided into five teams: team one operated with Combat Command "A"; team two, with Combat Command "B"; teams three and four with Division Headquarters at Dieuze; and team five, as liaison between Combat Commands and Division.

The teams with the Combat Commands performed a variety of investigations, including the usual "suspicious lights" flashing in the night and the pigeon lofts, and screened towns for security. On one occasion, CIC agents with Combat Command "B" learned from residents of a small village that three prominent Nazi Party members, seemingly unconcerned about the fact that the Americans had taken over their town, were waging an intensive German propaganda campaign. CIC staged raids on the homes of these ardent Nazis, arrested the men and thoroughly searched their rooms for incriminating evidence. The surprise raid was a complete success. The unrepentant Nazis were turned over, along with their pro-German literature, to the Securite Militaire for final interrogation and disposition.

197 Interview with former Agent Victor deGuinzbourg, Brooklyn, NY, at Room 706, Library Building, United Nations, 8 Aug 55.

By 10 February, the combat units of XXI Corps and XV Corps had the battle completely under control, and the 10th Armored Division returned to Third Army; 510th CIC Detachment's brief contribution to the counterintelligence efforts of the Seventh Army was completed.[198]

Hitler Youth Develops Espionage Agents

CIC Agents working with Seventh Army detachments in Alsace had captured many poorly-trained enemy espionage agents and saboteurs during December 1944. In the following month, CIC discovered that not only were the German spies ill-trained; they were often inexperienced adolescents, products of the Hitler Jugend.

On 5 January 1945, members of the 36th Engineer Combat Regiment spotted a young boy crossing the front lines into Allied-held territory near the town of Lembach. The youth was apprehended and brought to the 45th CIC Detachment offices in Ingwiller. Interrogation failed to draw out more from the boy than his name, his age (sixteen years) and the story that he was escaping from forced labor on German fortifications. CIC suspected that the youth was masking the true account of his activities, and was held for re-interrogation.

On 22 January, as another German boy entered the outer lines of the 157th Infantry Regiment, he stumbled over a trip-wire and set off a charge that alerted the American combat troops. He was immediately picked up by the soldiers and sent to the 45th CIC Detachment. The agents who interrogated the boy heard a familiar story; he was a sixteen-year-old boy who was trying to return to his home after having been drafted by the German Volkssturm to dig fortifications; only the name, was different from the account given by The interrogators refused to accept dodge and kept questioning the youth until he said that he was one of a large group of Hitler Jugend boys who had been trained for short-range espionage missions in Allied territory. His specific task, he said, was to observe the caliber and number of weapons, strength of tanks, and the nationality of troops grouped in the vicinity of Lembach and other border towns.

After confessed to being a spy, the CIC agents had enough leads to re-interrogate the stubborn The youth broke down under the added pressure and revealed information on other Hitler Jugend members whom the Germans were dispatching on similar, short-range missions. On the basis of the confessions of and Seventh Army CIC Detachments stationed all along the line were warned to expect an influx of young spies. Three days later, agents from the 307th CIC Detachment serving with a Task Force that had been established to

198 510th CIC Detachment, Rpt: CIC Activities during month of January 1945, dtd 31 Jan 45, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

defend the Rhine Flank, apprehended another sixteen-year-old espionage agent, at a travel control point near Schirrhofen. Descriptions circulated about this youth prior to his capture pointed out only one difference between and the other Hitler Jugend members that had been captured--"shaved."[199]

A Typical Case

was more loquacious than his predecessors. He revealed to Agent Joseph C. Hutchinson that his mission was to have extended for two days, and that he was to have gathered tactical information, paying particular attention to shoulder patch insignia. The brief history of his espionage career provided CIC with further insight into the recruiting, training and handling methods of these boys by the German Intelligence Service.

On 1 September 1942, fourteen-year-old like many other boys in his home town of Weissemburg, Alsace, had joined the Hitler Jugend. The uniform and the martial discipline of this para-military organization evidently had made a deep impression on his adolescent mind. Until 15 December 1944, the life of the young recruit was not changed markedly. But on that day, with the Allies pressing their attack towards the German border, all males in Weissemburg were assembled for the Volkssturm. spent a short period of service as a messenger boy between local offices. The Germans soon selected him and the twelve other Hitler Jugend members from the town to undergo a one-week "basic training" course directed by a German non-commissioned officer of a Frontaufklaerungstruppe unit. On about 29 December, this training was completed. and three other Hitler Youths deemed to be "most trustworthy" were selected by the Hitler Jugend Bannfuerher of Weissemburg to be sent to German Army Headquarters at Baden-Baden.

After several weeks in Germany, was interviewed by a German Army officer who asked him "casually" whether he would be interested in a trip to Alsace to "see his family." Of course, the officer added, the visit would not be purely social. German Intelligence needed boys to go through the lines and find out as much as they could about the enemy. The thought of a return home and the lure of intrigue were sufficient incentives for the youth. He accepted without hesitation.

The Germans provided first of all, with a cover story that he was required to learn thoroughly. If stopped, was to claim that he had been taken with the Volkssturm to dig trenches, that he had escaped and wanted to reach Hagenau to find his parents. With this account committed to memory, was

199 Ltr to Director of Intelligence, The Pentagon, Washington, D.C. from 45th CIC Detachment, Subj: Monthly Information Report, dtd 31 January 1945, (Confidential), (Staff and Faculty Library).

equipped with suitable clothes, food and forty marks. All of his papers were held by the Germans as insurance that would return after the successful completion of his mission. The German officer also promised the boy that he would receive additional financial remuneration for bringing back the desired information.

On 15 January, crossed the lines and mingled with a group of refugees. American soldiers escorted the entire group to the CIC travel control point where brief espionage career came to an abrupt end.

The Danger of the Hitler Jugend Spies

CIC had been successful in capturing several of the Hitler Jugend youths sent into Alsace, and the agents were prepared to apprehend others as they entered Allied territory. But the danger of these young spies could not be overestimated. Great numbers were available to the Germans who did not need or expect them all to complete their missions with success. The boys could be hurriedly recruited and hurriedly trained in a given sector. They could be inserted in refugee family groups. Allied counterintelligence would have to adopt different techniques in interrogating these youths from the methods used for experienced and mature agents, and the time spent with these relatively unimportant espionage workers might provide the required "break" that would permit high level agents to escape from CIC vigilance.[200] All these factors combined to make the Hitler Jugend spies a security threat of considerable proportions.

Women Agents

German Intelligence had not hesitated to use raw, untrained youths to perform men's roles in the espionage effort against the Allied forces. It seemed only logical that women would also be "requested" to gather intelligence that would pave the way for German tactical advances. CIC failed to round up any glamorous female spies in January; there were no "types" among the women agents that were caught. Instead, like their male counterparts, these women were ordinary human beings trying to make a living or, sometimes, to stay alive.

On 6 January, 79th CIC agents operating in the town of Bischwiller received a tip from a young women that a lodger in her house claimed to have been in Germany recently. The agents immediately went to the house where they discovered the lodger to be a thirty-eight year old woman. On-the-spot interrogation drew forth a number of inconsistencies in the woman's story, and the agents forwarded her to the 79th CIC Detachment headquarters in Hagenau. Once again, the woman, who identified herself as insisted on supporting an account of her actions

200 Ltr to Director of Intelligence, The Pentagon, Washington, D. C. from 307th CIC Detachment, Subj: Monthly Information Report, dtd 8 Feb 45, (SECRET), (Staff and Faculty Library).

CONFIDENTIAL

endeavoring to reach Strasbourg where she had considerable property. Detailed interrogation caused her to admit that she was a thief and trapped her in several lies. still refused to capitulate. Her apparent dishonesty was sufficient cause for putting her in solitary confinement overnight in the Hagenau Prison.

The next morning, CIC agents began the interrogation all over, asking to tell them what she was doing in Alsace. For a third time, the same basic cover story was delivered. The interrogators, losing patience with this patent liar, ventured on a new tack. They threatened with death as an enemy agent. Even this threat almost failed to faze the tough woman until an interrogator reminded that she had admitted leaving a young daughter behind in Karlsruhe. The interrogator asked what she thought would happen to her daughter if she was executed as a spy. This proved the thrust that pierced Honsel's armor; she broke down completely and confessed that she was a German espionage agent.

The account of mission, as given to 79th CIC agents and, subsequently, to VI Corps CIC, indicated that the Germans were looking for information from Strasbourg on American troop strength, insignia worn by American units, and truck and tank capabilities. If unable to remember what she observed, had been instructed to prick the letters of words in a book on different pages. When held to the light, the pages of this book would then have spelled a complete message to the Germans. Due to the suspicions of the CIC informant in Bischwiller and the skill of CIC interrogators, chapter in the art of espionage was never written.

In contrast to another female espionage agent, was a "soft touch" for the interrogators of the 79th CIC Detachment. Apprehended by a CIC outpost near the front line, was sent to Hagenau for routine refugee screening. Before the CIC agents fully realized that they had another female espionage agent on their hands, the twenty-year-old Russian girl freely admitted that she had been recruited by the Gestapo to act as an espionage operative in Alsace. Her mission was substantially the same as with one additional requirement: was to determine how the Americans were treating civilians.

The cause of this unexpected confession became apparent when the girl revealed her recent history. said she had been interned at the Schirmeck concentration camp early in 1944 for allegedly having made anti-Nazi remarks in her diary. Evacuated to another concentration camp after the Allied invasion of Alsace, said she refused to work as an informer for the Gestapo in this camp and chose, instead, to accept the espionage mission on the understanding that she would be freed on her return to Germany. The selection of an obviously disaffected,

[redacted]

untrained girl for an espionage mission pointed to the low state of the German Intelligence Service in January 1945.[201]

Espionage for Love and Money

The old adage that "war makes strange bed fellows" was given a literal interpretation in the affair of a cleaning woman and a Fascist leader, a case which CIC agents encountered in January 1945.

Agents of the 14th Armored Division CIC first came across the name of while combing the records of the local Police office in the town of Woerth. After receiving several denunciations of the woman from reliable citizens of the town, CIC agents apprehended and brought her to the Detachment headquarters for interrogation. The confession of combined with available records, revealed that the woman had a long and complex history of association with Nazis.

In 1937-1938, had been the mistress of a who was instrumental in helping Fascists escape from France to Germany via Strasbourg. The woman could have been charged with more than guilt by association. She had furnished with political and economic intelligence about Strasbourg and acted as an informer against anti-Fascists in the city, particularly singling out Francophile Jews and Communists. Her only motive for informing was, by her own admission, "love."

During this period of romance and espionage, had served as a charwoman for a local French Government official and managed to pilfer from his desk maps of Maginot Line fortifications and a defense plan for the adjacent areas. Hiding these documents in a baby carriage that also contained her illegitimate child, set out one day to transmit the papers to her lover. She had started to cross over the Rhine River on the Kehl-Strasbourg Bridge when French police, alerted about the theft of the defense papers, stopped the woman and searched the baby carriage. Out came the baby, out came the papers, and off went to the Strasbourg jail. In the course of the trial that followed, turned state's evidence against several prominent Nazis and Gestapo agents. She was in prison when the Germans occupied Strasbourg sixteen months later and was soon released.

Not one to duck when opportunity beckoned, accepted employment as a cook for the strasbourg SD Headquarters. She had held this position for only a few months when the Gestapo uncovered the details of her confession at the trial. Once

201 Ltr to Director of Intelligence, The Pentagon, Washington, D. C. from Hq 79th CIC Detachment, Subj: Information Report, dtd 1 Feb 45, (SECRET), (Staff and Faculty Library); and, Sixth Army Group G-2, Fortnightly Counter-Intelligence Rpt No 8, dtd 21 Jan 45, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

found herself before the "bar of justice." She managed to extricate herself from possible German vengeance with the assistance of a man named who was serving as interpreter for the Strasbourg SD after a career in espionage in North Africa.

Free once again, selected the path of least resistance. She became an "intimate associate" of so intimate in fact that she discovered that her erstwhile protector was in reality a double agent serving the anti-German, pro-Petain group that had effected the escape of the French General Giraud. was busy clandestinely warning French patriots and Catholic circles of impending Gestapo action against them. After managing to steal some of his papers, had no compunctions about blackmailing for 10,000 Reichmarks on threat of exposure to the Gestapo.

The entry of the Allies into Strasbourg brought an end to career. CIC agents found no certain evidence that had committed espionage activities against the Seventh Army. However, they did discover in her possession a small camera containing exposures of U.S. armored equipment. They turned her over to the Securite Militaire for trial.[202]

Espionage; the Better Alternative

was a woman who thrived on espionage. Agents of the 100th CIC discovered that was quite a different case. In the first place she was young (23 years old) and attractive. She was also unfortunate.

an Italian national, grew up in the French city of Lyon. Her father owned an Italian restaurant in the city, a restaurant that continued to flourish during the German occupation since it was freely patronized by Nazis and German soldiers. When the Allies began their triumphant drive through Southern France, and two of her girl friends, who worked as waitresses at the restaurant, fled to Pirmasens, Germany, fearing reprisals from angered partisians. labored in a shoe factory until 2 December 1944 when she and her friends left for the town of Bitche in Alsace.

In Bitche, made the acquaintance of a former French Forces of the Interior officer, who was trying to get in the good graces of the Gestapo by ascertaining Allied artillery positions, tank concentrations and other items significant for German tactical intelligence. This officer, was subsequently captured by the 100th CIC and confirmed account that she had been forced into espionage by the Gestapo who exploited the fact that she had no papers.

202 Sixth Army Group G-2, Fortnightly Counter Intelligence Report No. 9, dtd 7 Feb 45, L-461, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.); and, 514th CIC Det Monthly Information Rpt dtd 31 Jan 45, (Confidential), (Staff and Faculty Library).

NOT RELEASABLE

At first, the Gestapo had tried to convince and her friends to inform against French workers conscripted for construction work in Germany. When the girls refused, a captain offered a double-edged choice: accept an espionage mission or see her friends carted off to a concentration camp. Heeding the advice of a German 1st Sergeant named "Charlie," selected the first alternative.

On 17 January, the Gestapo captain, an artillery lieutenant unknown to and "Charlie" accompanied the girl to a forester's cabin near the front lines. The two officers stayed behind; "Charlie" and proceeded to a German bunker where a soldier joined them. The party of three continued towards the Allied lines. One kilometer past the last German minefield, "Charlie" and the other soldier left with instructions to proceed in a straight line to Lembach. Frightened and alone in the midst of a strange forest, became lost, and after several hours of aimless wandering, stumbled upon an American roadblock where she was apprehended.

was not defiant before the CIC agents who questioned her, although she relied heavily on her status as an attractive member of the opposite sex in an attempt to plead innocence of her intention to commit espionage."[203] She had been told by the Germans that she would have no trouble convincing the Americans that she was a refugee. But soon she confessed that the Gestapo had sent her across the lines to obtain and memorize information on troop and tank dispositions, artillery emplacements and the like. The only preparation for her mission had consisted of a quick demonstration of Allied shoulder patches, an order to complete her observations in three days, and a promise of ample remuneration on her return. story and mission had a familiar ring to the CIC agents; similar accounts could be gathered from many displaced persons to whom war was a matter of survival and not allegiance.[204]

Enemy Sabotage Prevented

Reports that filtered into Seventh Army CIC headquarters indicated that the weeding out of sabotage agents in stabilized areas, coupled with stringent measures for securing material, had completely eliminated major acts of sabotage in January. On one occasion, troops of the 44th Infantry Division caught a French boy of low mentality attempting to cut a communication wire. Questioning of the youth revealed

203 Ltr to Director of Intelligence, The Pentagon, Washington, D.C., from Hq 100th CIC Detachment, Subj: Monthly Information Report, dtd 3 Feb 45, (SECRET), (Staff and Faculty Library).

204 Ibid; and Sixth Army Group G-2, Fortnightly Counter Intelligence Report No. 9, dtd 7 Feb 45, L-461, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

that the German soldiers had given instructions to children to perform these minor acts of sabotage once the Allies occupied the Alsatian towns. CIC failed to find any widespread responses to these instructions.

On the afternoon of 5 January, a sentry guarding a Quartermaster gas dump in the VI Corps sector spotted several armed civilians approaching the restricted area. The sentry fired a couple of shots at the interlopers and managed to wound one of them. Subsequent investigation by agents of the 206th CIC revealed that the civilians had been hunting and were unaware of the existence of the American installation. The action of the sentry was considered justified under the circumstances, and the hunters were turned over to Civil Affairs for prosecution on the charge of bearing arms without permits.

Some displays of anti-Allied feeling were evident in such acts as the scattering of tacks along the main street of the town of Saverne and the switching of road signs to designate improper locations, but CIC was inclined to classify these deeds as harassment rather than enemy sabotage.[205]

The Reluctant Saboteur

had received one of the best educations in the art of clandestine destruction offered by the German Intelligence. A member of the Frontaufklaerungstruppe 251, studied for fourteen weeks at the Chateau de Maulny and La Montagnette sabotage schools. Completing this formal education in May 1944, was detailed to spend his next six months working in the feldgendarmarie (military police). In December 1944, the Commandant of the La Montagnette school decided to test his former pupil. was entrusted with the mission of going to the Allied-held town of Rohrwiller and placing explosive charges under American tanks in the vicinity. He was also given some routine espionage assignments: to ascertain the road conditions around Rohrwiller, to determine the exact number of tanks in the woods to the south of the town and the intentions of these armored units, and to pick up any rumors circulating in the town. The Commandant assured that the claim of being an escaped Todt worker attempting to make his way to Marseille would provide adequate cover in case he was questioned by American soldiers.

set out on his first mission early on the morning of 9 January, carrying a plastic charge and two British-made detonator pencils that somehow had fallen into German hands. Near the town of Herrlisheim, still in German territory, the novice's resolution faltered slightly, and he decided that the espionage aspects of his mission were more important than the matter of blowing up some American tanks. discarded his explosive equipment by the road-side, walked

205 Sixth Army Group G-2, Fortnightly Counter Intelligence Report No. 8, dtd 21 Jan 45, (SECRET), (Departmental Records Branch, AGO, Alexandria, Va.).

CONFIDENTIAL

on towards the German lines which he crossed using the German Army password, and entered Allied occupied territory on the road to Bischwiller. Three and one-half hours after leaving the safety of the Fatherland, Denjean-Massia, using the alias of Willy Dietrich, met the first test of his resourcefulness as an espionage agent, when members of the 12th Armored Division questioned him at a roadblock. Denjean-Massia failed utterly to convince the American soldiers that he was bound for Marseille. Escorted to the Command Post of the 512th CIC Detachment, he confessed to CIC agents that he was on a mission for the Frontaufklaerungstruppe and soon revealed the details of his brief career as a sabotage agent.[206]

The "Brandenburg Formation"

CIC agents had interrogated so many amateur enemy agents in December and January that reports of a professional sabotage unit being formed in Germany was news of the highest importance and created a considerable stir among Seventh Army detachments.

The sabotage unit was prefacing its operations with reconnaissance of strategic Allied supply centers. On 8 January, troops of the 79th Infantry Division captured two suspicious-looking individuals and brought them to the VI Corps CIC Detachment. Both men were dressed in the same-type uniform; a jacket with hood, resembling but not identical to the standard American issue, and a pair of coveralls similar in color and shape to the trousers worn by members of American armored units. Under this rather bizarre outer garment was worn the uniform of an SS trooper.

George Tostain and Jean Poignet proved to be implacable Nazis, but they revealed their mission under the pressure of interrogation. Their primary aim was to determine whether an airport in the vicinity of Hagenau was operative and to locate American gasoline dumps. As forerunners of a major sabotage effort, these two men were to establish routes for the raiding parties that would accomplish the destruction.

The 206th CIC agents were not content with this information alone. They pressed Poignet and Tostain for details about the organization that had dispatched them, and soon a coherent picture of the so-called "Brandenburg Formation" began to emerge from the interrogation.

In its original form, the Brandenburg Division was one of the crack Jaegar Divisions (light infantry or, translated verbatim, "hunters") of the Wehrmacht. Time and again, the Brandenburg troops had been committed to vital fronts; their combat experience included campaigns in Russia, Italy, Greece, and the Balkans. As the Germans were being hemmed into their own land from all sides, high ranking officers in the SD decided to cadre politically trustworthy officers and non-commissioned officers of the Brandenburg Division into a new SD-controlled Brandenburg

206 Sixth Army Group G-2, Fortnightly Counter Intelligence Report No. 9, dtd 7 Feb 45, L-461, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

formation. The control of this unit by Otto Skorzeny, master sabotage director and rescuer of Mussolini, confirmed its sabotage mission.

Absolute independence was given to the Brandenburg formation to assure freedom of action. Its members were issued the newest equipment and armament. Special identification cards and travel permits were available to them. Every effort was made to perpetuate the high elan of the original Brandenburg Division, and each training company was carefully isolated to develop a genuine esprit de corps among its members. The training company was further divided into independent groups that were held to gether by the unshakeable enthusiasm of a "chief."

Training consisted primarily of patrolling, use of compass and map, and field problems. A typical problem required the penetration of a "guarded village" by a reconnaissance patrol which was to spot sensitive points that would be sabotaged later by a team of explosives experts.

Consideration was given to the vital points that made prime sabotage targets. In addition to the more obvious structures such as bridges, railway lines, and supply dumps, trainees were advised that civilian and military post offices were high-priority targets. The main goal of the instructors was to develop each member of the team into an expert, whether he served as a rifleman on reconnaissance or an explosives charge planter.

The camouflage military garments worn by Tostain and Poignet were issued only to men on scouting missions. Soldiers effecting the actual sabotage were to wear civilian gear, consisting of dark overcoats or trench coats, ski trousers and jackets, and berets. Foreign pistols of either Belgian or Czech manufacture would provide basic armament. Plastic explosives would be carried in several places, including a pack strapped to the "civilian's" back. The sabotage groups were expected to utilize American-built vehicles; a depot in Germany containing thirty-five American automobiles (including Cadillacs, Buicks, Oldsmobiles, and Packards)-camouflaged with OD paint, was at the disposal of the saboteurs.

Although Tostain and Poignet were captured, their deception had been successful for several days. Poignet stated: "I believe that the idea of our Commanding Officer to have us put on camouflage clothes and carry weapons resembling American equipment was very good. Even the Germans fell for it (I was detained by the Volkssturm and Wehrmacht for two days), and the population took us for escaped Canadians. We could have carried out our mission or at least a great part of it with a good chance of success. Only one detail was overlooked; our German belts and buckle. The arms we had, particularly the new German sub-machine gun, PI44, extra flat, with short barrel and half-moon clip, did not look like a German weapon. In my opinion, and according to all German and Alsatian reactions I saw, the camouflage thought up by our Commanding Officer was excellent, aside from the belt and buckle."

The report of the captured Brandenburgers indicated to CIC that an adversary of no mean proportions was preparing to accomplish the work that women, children,

and poorly trained male agents had so completely bungled. Sixth Army Group counterintelligence officials initiated the first measure of defense against the Brandenburg formation: the preparation of a roster of known personalities of the unit together with physical descriptions of these men. By 21 January, a list of twenty-one individuals preparing to cross into Allied territory was compiled, published, and distributed to all Sixth Army units.[207]

Defense Against Parachutists

Throughout the month of January, various CIC headquarters buzzed with reports of airborne infiltration by German agents. In order to guard against parachutist attacks during periods of tension, a system for spot-location of airborne landings by radar was instituted at Seventh Army CIC. In the 307th Detachment Headquarters, a large map (scale 1:50,000) of the vulnerable area was kept with an azimuth circle and a yardage range arm centered on the coordinates of the nearest radar unit. Range and azimuth figures on the course of an enemy plane were interpreted by the radar unit and then relayed by direct telephone communication to CIC Headquarters. As the radar men followed the flight of the plane, they issued periodic reports to CIC.

When a parachute drop was suspected, CIC units in the appropriate area were promptly alerted. CIC directed to the danger spot squads of ten soldiers and military police, previously organized and equipped with cars and weapons and available on five-minute notice. These squads were given operational authority to enlist the aid of any unit in the area in the hunt for the parachutists. Gendarmes and other roadblock personnel were contacted by CIC at critical periods. During this entire anti-parachutist operations, CIC headquarters served as the nerve center for all operations. This arrangement was logical; CIC had more at stake in the capture of enemy agents arriving in Allied zones by parachute drop.[208]

The system was quite successful. While the 307th CIC was in Lunneville during the Alsace campaign, the agents learned from interrogation of several captured enemy agents that a group of parachutists were to be dropped in the area. One night in January, the radar screen picked up some activity in the sky, and the patrols rushed out to the indicated spot. Spread over the ground were pieces of material from a wireless transmitter kit; apparently the equipment had spilled from a sack after a parachute strip binding the package had torn. Realizing that the espionage material had not been dropped at random, the CIC agents combed the area and shortly discovered nine espionage agents. Two attempted to escape; one was killed, another wounded. The prisoners were garbed in regulation Wehrmacht jump suits and, back at the 307th Command Post, the CIC agents were somewhat at a loss whether to

208 Hq 307th CIC Det, to Director of Intelligence, The Pentagon, Wash., D.C. Monthly Information Rpt, dtd 8 Feb 45 (SECRET), (Staff and Faculty Library).

...day the prisoners as spies or as Prisoners of War. However, they soon determined that the parachutists were members of Skorzeny's Brandenburg Unit--forerunners of a major sabotage effort against the Allied Forces.

After the interrogation of the prisoners was completed, the agents had an opportunity to examine the recovered espionage equipment. They found that, besides radio receivers, the aluminum containers held bread and a trowel. The parachutists themselves had shovels with which to bury their jump suits, but the CIC agents had been too quick in their apprehension, and the men were caught still wearing their uniforms.

Although the parachutist detection system generally was effective, there was one occasion when the CIC agents probably wished they had never heard of radar. At about 0300 hours on a bitterly cold January morning, agents were awakened by members of the radar team who excitedly explained that enemy agents were dropping everywhere. The CIC men donned their warmest gear and headed into a blinding snowstorm, two to a jeep, fanning across the countryside. One of the jeep teams noted after a short while that along the road were shreds of aluminum foil, haphazardly scattered. When other teams began to find similar metal strips, the search was suspended. What the radar men had so hastily labeled airborne espionage agents were strips of aluminum foil thrown out by British bombers to disturb German radar, in the belief that they were still over German-held territory.[209]

A Serious Breach of Security

On 22 January, Agent Leonid Ruminoff of the 45th CIC Detachment and Sous Li...ant Charles Escudero of the Securite Militaire unit attached to the 45th Divisi...tered the apartment of in Phalsbourg, France. The agents intended to spend several days in the town and had heard that this apartment was ...vailable as a billet. As they glanced about their prospective quarters, Ruminoff ...nd Escudero noticed a grey typewriter case that appeared to be American-made. ...he agents opened the case. Inside they found numerous documents, classified and ...nclassified, and personal papers belonging to a lieutenant colonel who held a high ...sition in the Sixth Army Group Civil Affairs section. No time was lost in insti...ing an investigation.

The agents discovered that the owner of the apartment, had been ested on 27 December by the Territoriale Gendarmarie on orders from a CIC ...chment. She was sent to Sarrebourg for internment as a security threat to ...American forces. The following day, an American lieutenant colonel had called

---

...nterview with former Special Agents Robert R. Richards, Columbus, Ohio; ...Varren Bower, Swarthmore, Pennsylvania; Robert Brockmeier, Cincinnati, ...hio; and G. Kenneth Crowell, Chicago, Ill;, at the NCICA Convention, Hotel ...aldorf-Astoria, New York, 6 August 1955.

at the butcher shop owned by brother-in-law and requested the keys to the apartment. For three days, the lieutenant colonel and two other officers were billeted in the apartment. They hired a woman to serve them as maid and laundress, and this woman cleaned up the apartment upon the departure of the officers. She noted that some gloves, ties and a grey typewriter case had been left behind, but she made no effort to contact the officers; on leaving, they had stated that they would return. Several days later, an orderly came to collect the last bundles of laundry that the maid had prepared. No mention was made of the misplaced articles, and the orderly left with neither the garments nor the typewriter case.

A survey of the contents of the typewriter case revealed three documents classified "Secret," two "Confidential" papers, and several maps and documents that the agents believed to warrant a high classification. In addition, personal papers and photographs belonging to the lieutenant colonel were contained in the case.

The agents checked with confidential informants in the town and found no adverse information about relatives who were still in Phalsbourg. The maid was reported to be a woman of doubtful morals and low intellect, but she did not appear to be dangerous from a counterintelligence standpoint.

Ruminoff and Escudero realized that, while no apparent damage had been caused by the lieutenant colonel's carelessness, a serious breach of security had occurred. They forwarded the misplaced documents and a copy of their report to the G2 of the 45th Infantry Division for further action. This example of laxity stood out in severe contrast to the overall record of excellent security discipline among the units serving with the Seventh Army during the Alsace Campaign.[210]

Other CIC Detachments

During the battle for Alsace, several new CIC Detachments joined the Seventh Army units that had already been committed. Under command of Captain John F. Somerville, Jr, came the 221st CIC Detachment attached to XXI Corps;[211] while the 63d CIC, commanded by 1st Lieutenant Clinton R. Weidner,[212] the 70th CIC, led

210 Ltr to ACofS, G2, 45th Inf Div from Hq 45th CIC Det, subj: Violation of AR 380-5, dtd 24 Jan 45 in 45th CIC Det Correspondence File Nov 44 Mar 45, (CONFIDENTIAL), (Kansas City Records Center, Box 45121).

211 Information concerning these detachments is available on Historical Data Cards. The men designated as commanding officers of the 221st and 70th CIC detachments are presumed to have been in charge during this period, since available records list them as CO in the month of February.

212 Ltr, Monthly Information Report from 63d Det dtd, 31 January 1945, (CONFIDENTIAL), (Staff and Faculty Library).

by Captain George H. McDonald, and the 42d CIC, the CO of which is not listed in available records, accompanied their respective divisions.

Six Weeks in Retrospect

The six-week period of the last German offensive in Alsace had provided CIC agents with Seventh Army units an opportunity to display their ability in the security field. The ebb and flow of the battle had swept thousands of refugees to rear areas and then back to their homes. German Intelligence had filled Alsace with agents, using the theory that quantity rather than quality was the winning ticket in the espionage game at this level. A wet and cold winter played no favorites and made the lot of all soldiers, American and German, combat troops and intelligence agents, a miserable one. Despite all these difficulties, the CIC units lengthened the successful record that they had achieved since the landings at Marseille. The bastions guarding the German Fatherland had been battered; now, along with the tactical forces of the Seventh Army, the CIC units prepared for the final drive.

Appendix 1

ENEMY AGENTS IN THE ARDENNES

Volume XVIII

HISTORY OF THE COUNTER INTELLIGENCE CORPS

The story of the 150th Panzer Brigade (15 December 1944 - 31 January 1945): Recruiting, Formation, and Training, including the development of the Einheit Stielau. A study of German offensive intelligence preparation.[213]

213 "History of Counter Intelligence Activities of the U.S. Army in Europe, Annex 4." (Unclassified), (Staff and Faculty Library).

Hitler Tells Skorzeny

Late in October, 1944, Lt Col Otto Skorzeny, Chief of the German Sabotage Service and SS Jagdverbaende, was summoned to the Fuehrer's headquarters. Hitler, in the presence of General Oberst Jodl, Chief of the German Armed Forces Operations Staff, informed Skorzeny of the proposed offensive in the Ardennes. Obviously enthused over the plan, Skorzeny and Jodl quickly devised a program of deception, based primarily on the utilization of 2,000 German soldiers, dressed in United States Army uniforms. These soldiers would be assigned to a unit which was to be activated under the code name, the 150th Panzer Brigade.

An order signed by Keitel, Chief of the High Command of the German Armed Forces, was published subsequently and was distributed throughout the German Army, Navy, Air Force and SS. Volunteers were to possess the following qualifications (in addition to the ability to speak English, "including the American dialect"): physical fitness, suitability for special assignments, mental alertness, competency in close combat fighting, and a knowledge of military terminology. They were not to be retained by their units for military reasons. They were to be formed into a special unit, about two battalions in strength, for employment on the Western Front, "after being tested for suitability at Friedenthal, near Oranienburg... Captured clothing, equipment, weapons and vehicles would be utilized for the equipment (sic) of these special troops."

The Volunteers Arrive

From all corners of the diminishing German Empire, linguists--officer and enlisted man, those who had volunteered and those who had been volunteered--reported to Skorzeny's headquarters, Schloss Friedenthal. Most of the volunteers had responded believing they would be used as interpreters. A few had deciphered the connotative meaning of "special" in the order.

Upon arrival, the candidates were tested for fluency in English by a board of three officers from the SS and the Navy. Those suitable were selected for Operation Greif and were divided, according to their language proficiency, into four groups: Group I was rated excellent; Group II, satisfactory; Group III, poor; and Group IV, very poor.

The selected linguists were to form a segment of the 150th Panzer Brigade known as the Einheit Stielau, named after 1st Lt Stielau, Commander of the group. Considered good linguists, but poor soldiers, these men had come from all arms of the German services, and their backgrounds were as varied as their conceptions of what they would be expected to do for the Fuehrer.

The Curriculum

Members of the Einheit Stielau were given special training, while the other members of the brigade received only general field training. Group I personnel from the

linguist section were enrolled in the SS Interpreters' School at Oranienburg, a suburb of Berlin. Group II and Group III personnel, in subdivisions of ten men each, were assigned to prisoner of war camps, where they were to associate with the American prisoners, familiarizing themselves with documents and "GI" slang.

These members of the Einheit Stielau later reported to Grafenwoehr, where the 150th Panzer Brigade was trained as a unit, and where Group IV personnel were already in training for their role as replacements in the brigade.

The reunited members of the Einheit Stielau studied in small teams at Grafenwoehr, with members of Group I acting as supervisory personnel. Various officers and one alleged American, a Sergeant Sharper who wore civilian clothes, assisted. Singled out for detailed study was the manner in which Americans open a package of cigarettes; the way they manipulate knife and fork while dining; the position of the bath towel over the shoulder while washing; their idioms; and their general, all-purpose phrases, such as: "Shut up" and "Damm it."

All mannerisms and all spoken and written words were to be "Americanized". Men were taught not to respond to German.

American motion pictures, including "Coney Island," starring Betty Grable, and newsreels served as training aids for the members of Einheit Stielau. A manual on the U.S. Army was a requirement for study, and instruction was presented on U.S. military terminology, organization, identification, vehicle markings, and close order drill, with specialized aspects treated for each according to his potential mission.

Day and night marches, compass and orientation training, map reading, the estimation of various situations, hand signals, movement under combat conditions, camouflage and liaison and reconnaissance duties with tank units comprised the core of the 150th Panzer Brigade's field training. Supplementary instruction was given on explosives, especially Nipolit; the use of a hydro-cyanic acid capsule to overcome a prison guard, making escape possible; and deceptive techniques, such as raising the hands in pretense of surrender and throwing the headpiece toward the would-be captor, firing quickly with the free hand.

Training concentrated on street and forest fighting, and included the use of close combat anti-tank weapons and the firing of captured U.S. equipment. Night combat was especially stressed.

Training was interrupted occasionally for vehicle maintenance, for the drawing of supplies and equipment for other administrative details.

Security Skorzeny Style

Security procedures were lax at Schloss Friedenthal, but they became smotheringly stringent at Grafenwoehr. All personnel who entered the camp remained there,

brigade constantly reminded their soldiers of their duty to the Fatherland.

In the middle of November, when the members of the brigade learned of their mission, morale tumbled to a new low. A number of the students requested transfer immediately and were refused with the admonition that further notions of transfer would be viewed as treasonous. One officer is said to have persisted in his efforts to dissociate himself with the operation, gaining only a court martial trial and the death sentence.

Propaganda, with a view toward justifying to the brigade its future method of warfare, then cited the proposed tactic as an element of modern warfare, already being used by the Allies. This helped, but the wavering morale received a devastating blow when the hydocyanic ampules were issued, not only for escape purposes, but also as a suicidal device. Rumors were circulated toward the end of training that United States soldiers in German uniforms had been captured and would be dealt with [illegible] by their captors. Another favorite rumor concerned three German soldiers in U.S. uniforms who had returned to the German front lines safely after having spent three days in American-occupied Malmedy, Belgium. These rumors improved morale.

CONFIDENTIAL

Costumes for the Masquerade

Unwittingly, the American Red Cross became a contributor to the 150th Panzer Brigade. U.S. Army clothing, including new-issue field boots, sent under their auspices for distribution to American prisoners of war in German prison camps was confiscated and diverted to Grafenwoehr.

A supplementary source were American prisoners of war themselves. Prisoners of war at several camps were directed to turn in their uniforms at the request of authorized officials, armed with decrees from Skorzeny and, in some cases, from Hitler. This latter source proved frustrating to the German collectors as the uncooperative GIs preferred to burn, tear and cut their clothing rather than surrender useable equipment to their jailers. In one representative case, only a dozen pieces of clothing were serviceable out of 800 articles which had been collected.

The Germans were persistent, however, and eventually almost every member of the brigade was completely garbed in U.S. Army uniforms, from steel helmets to stolen boots. In addition, U.S. sub-machine guns and carbines were provided, and U.S. jeeps, trucks, weapons carriers and General Sherman tanks. The proud and pure-white star, so integral a part of U.S. Army vehicles, was a prominent feature on all the 150th Panzer Brigade's vehicles, and counterfeit identification markings were always in evidence.

Each vehicle was stocked with U.S. Army-type trip tickets.

All falsification and rectification of documents was accomplished by an assigned Faellscher Trupp, under the command of an SS Lieutenant Lochner. When required, watermarks were imitated by a wax stamp.

Documents, as issued, were in new condition, and individual members dirtied them and wrinkled them in an effort to age them.

Persons and units were equipped as dictated by necessity, with the members of Einheit Stielau receiving extensive consideration. Few members of the brigade who were not of the Einheit Stielau received personal documents, except by their own efforts.

Those of the Einheit Stielau were issued documents in accordance with their undercover rank. Germans who were to be enlisted men received a paybook and a typed permit to carry combat equipment in rear areas. Drivers received U.S. Army driving licenses. Those who were to act as officers were issued a pay-data card and an identity card with their photographs and fingerprints affixed.

Other, more resourceful individuals, acquired non-military personal documents and U.S. Army identification tags from prisoners of war or from dead U.S. soldiers.

In addition to uniforms, weapons, vehicles and documents, the linguists were issued $100.00 in various denominations of invasion currency and 100 counterfeit British one-pound notes. Each team was provided with ten "Pervitin" tablets (energy boosters), several pacifying devices (i.e. brass knuckles, blackjacks and truncheons), a copy of the New Testament of the Bible and American song books. Vials of hydrocyanic acid were freely proffered, and a few highly-honored members of the group were issued poison-bearing cartridges which could be fired.

These cartridges were manufactured at Skorzeny's request by the Technical Criminal Institute of Berlin. The poison was aconite compound, encased in the head of a 7.65mm pistol bullet. The missile had split sides through which the poison would escape into the victim's body, insuring death.

Organization: Einheit Stielau

The linguists of the 150th Panzer Brigade had already been classified according to their proficiency in the English language. Group IV personnel, the poorest in linguistic ability, were assigned to the replacement company of the brigade. Group I, II and III linguists, of which there were approximately 150, were assigned in three-man teams to the brigade's combat groups. Only a few teams were sent on individual missions.

In each team of the Einheit Stielau, Group I personnel were to be the speakers. They were instructed to wear the uniform of a U.S. commissioned officer and to sit in the front seat next to the driver. Category II personnel, being only satisfactory in their command of the English language, were to sit in the rear. Members of Group III were selected as drivers, since it was thought they would be required to speak few words, if any, in that position.

The missions of the Einheit Stielau teams varied, and each team had received specialized training to further its effectiveness on its assignment. There were reconnaissance teams, demolitions expert teams (called engineers), signal teams, and "special" teams, whose specialty was rumored to be assassination.

Organization: 150th Panzer Brigade

The Brigade was unquestionably dominated by the omnipresence of Otto Skorzeny, but it was officially under the command of SS Lt Col Hardieck. It had a unit strength of 3,000 officers and men, 2,400 of whom were combat personnel. Its Executive Officer was SS Lt Col Musculus; its Adjutant, 1st Lt Selle. In addition to the headquarters staff and the replacement company, the brigade was composed of three combat groups.

The First Kampfgruppe included two paratrooper companies, a tank section, a mortar section, and eight teams of the Einheit Stielau. Lt Col Wulf was its commander.

The Second Combat Group, commanded by Capt von Foelkersam, featured a battalion of paratroopers, an assault gun section, a tank section, an anti-tank and anti-aircraft section, a signal platoon, an engineer platoon, an armored reconnaissance troop, a supply column and elements of the Einheit Stielau.

Similar to the Second Combat Group, the Third varied only in its use of an armored infantry section in lieu of the assault gun section, an SS company in place of a signal platoon, and a mortar section instead of a supply column. SS Lt Col Hardieck, the Commanding Officer of the brigade, also chose to be the Commanding Officer of this combat organization.

The Plan

The overall mission of the 150th Panzer Brigade was to infiltrate the U.S.-occupied territory in the Ardennes sector of the battle line in order to create confusion in the path of the attacking German Armies and to secure bridges over the Mousel between Namur and Liege. Infiltration was to be accomplished under the cover of darkness. One combat group, dressed in U.S. uniforms and completely equipped, was to push between two arms of a pincers formed by German troops. They were then to attach themselves to the rear of a withdrawing American column, relying on the confused situation to escape detection. At a suitable point, the combat group would branch off from the American column and move to a pre-designated rendezvous point. From the assembly area, the sabotage, reconnaissance and demolitions teams of the Einheit Stielau were to depart for their assigned targets, as were the other reconnaissance and armored sections of the group.

Generally these targets included: the location and destruction of higher U.S. headquarters, all radio stations, and supply and ammunition dumps; the creation of confusion by occupying and obstructing roads and bridges, by altering and removing all road signs, and by using members masquerading as MPs to misdirect traffic; and the infiltration and ambushing of U.S. units.

The other combat groups were to infiltrate as their commanding officers chose, and their mission, aside from the general mission of provoking a confused atmosphere, was left to the commander's discretion also.

A few of the Einheit Stielau teams were to penetrate SHAEF headquarters in Paris and to kidnap or to assassinate the Supreme Allied Commander, Gen Dwight D. Eisenhower, and other high-ranking officers.

Parachutists were to be dropped to capture the bridges at Engis, Huy, Ombrerausa and Liege, but most of the paratrooper units were to fight as infantry.

The 150th Moves Out

The brigade moved from Grafenwoehr to Cologne by a special train which had been camouflaged to resemble a shipment of Christmas trees. All questions about the convoy were to be answered: "Wir transportieren Weihnachtsbaeume (Christmas trees) fuer die Westfront." The train moved only at night.

For the two nights of the journey from Grafenwoehr, the brigade was protected by the Gestapo. Detraining on the night of 14-15 December, the brigade was quartered at the troop training grounds at Wahn, near Cologne.

The following night, with blackout restrictions in effect, most of the brigade convoy drove to Scheuern, near Munstereifel, Germany. The Second Combat Group moved to a bivouac area in the woods at Stadtkyll.

The Night Before "Greif"

The 150th Panzer Brigade was about to be put to the test for which they had been kept a well-guarded, a well-fed, and, they hoped, a well-trained secret. How many of them slept well that evening before "Operation Greif" was to begin, we will never know. They may have gained some reassurance when, due to faulty camouflage of their U.S. uniforms and the white stars on their vehicles, German soldiers attempted to arrest them. Later, at Schauern, however, a marauding U.S. P-38 strafed one of their radio cars, perhaps as an omen of things to come.

MISSION OF THE COUNTER INTELLIGENCE CORPS

"The mission of the Counter Intelligence Corps is to contribute to the operations of the Army Establishment through the detection of treason, sedition, subversive activity, and disaffection, and the detection, prevention, or neutralization of espionage and sabotage within or directed against the Army Establishment and the areas of its jurisdiction."

Auth: AR 381-100

HEADQUARTERS
U. S. ARMY INTELLIGENCE CENTER
FORT HOLABIRD, BALTIMORE 19, MARYLAND

ACSIH-GC 250/58/M 8 April 1959

SUBJECT: CIC History

TO: All Personnel Reading this Document

1. This volume is a portion of the History of the Counter Intelligence Corps which has been compiled in draft form by this headquarters.

2. Distribution of the History is being made as the volumes become available so that addressees may profit by the problems and accomplishments of the Counter Intelligence Corps in previous years.

3. When completed, the History will cover in as complete and accurate detail as possible, significant incidents and events leading to the organization of the Corps of Intelligence Police during World War I and the Counter Intelligence Corps in World War II. Events, accomplishments, changes, and problems encountered up until 1950 will be included in the thirty volumes planned.

4. In spite of the diligence of researchers and writers, there may be inaccuracies and omissions, since no records are available for some of the more than two hundred CIC detachments which were operational during World War II. Even some of the major campaigns were poorly documented.

5. Any comments should be forwarded to the Commanding General, United States Army Intelligence Center, Fort Holabird, Baltimore 19, Maryland, ATTN: G-3.

Chapter 1

Preparation for Attack

On 4 February, SHAEF's Weekly Intelligence Summary noted that inroads were being made continually into German lines, and that the German panzer divisions were being deployed erratically. German resistance in the Colmar pocket was waning.

The Russian Army's offensive on the East front, which had been initiated in mid-January, had succeeded at a rapid rate, taking a great deal of pressure off the Allied Western Forces.[1]

Some German Intelligence Service Agents Drop In

CIC's main efforts were directed toward the neutralization and defeat of the plans of the German Intelligence Services (GIS), who at this time began a concentrated effort to extend their operations by parachuting agents behind the Allied lines.

On the night of 3-4 February, a German-operated B-17 departed from Stuttgart with nine agents on whom, it was later revealed, GIS had spent much time and effort. Each agent had an individual objective as well as a general mission, but none escaped detection. They were dropped far distant from their objectives and eight were captured almost immediately. Of the three who came to earth near Maubeuge, France, south of Mons, one, using the name of Robert DuBois, alias Cavrol, managed to reach Paris, but was captured there.[2]

Detailed information is lacking concerning the capture of the other enemy agents, but a Monthly Information Report from the 307th CIC Detachment states that one was captured at a road block in Dalhain, Alsace. He was interrogated by Special Agents Origene J. Paquette, Jr., and Marion E. Porter of the 307th CIC Detachment. The agent was a wireless-telegraph operator who had waited eight days in Stuttgart for good flying weather. A French member of the pro-Nazi Francist movement, he had every intention of fulfilling his assignment. The Seventh Army CIC Detachment turned him over to Special Counter Intelligence.[3]

3 307th CIC Det Monthly Information Rpt for Feb 45, dtd 16 Mar 45, in 307th CIC Det Monthly Information Rpts file Apr 44-Jan 46 (CONFIDENTIAL), (Kansas City Records Center, Bx 25099).

Planning For Future Is Stressed

Instructions from SHAEF and Twelfth Army Group during February directed that emphasis be placed upon the planning and necessary coordination of all counter-intelligence activity, since future operations in Germany would involve dealing with a population known or assumed to be fundamentally hostile.[4]

Sixth Army Group CIC, too, spent considerable effort in planning. Based on a "higher headquarters" declaration that complete control of individuals crossing the German border would have to be maintained in order to catch enemy agents, war criminals, or other unauthorized persons and also to prevent illegal shipments of communications and funds, Major James F. Foothorap of Sixth Army Group drew up a comprehensive plan for the establishment of controls along the Franco-German border in that Group's area.

Major Foothorap noted that the Franco-German border in Group area divided itself into three well-defined sections. In one, the Rhine River provided a natural frontier from Basle, Switzerland, to Neuberg, near the juncture of the Rhine and Lauter Rivers, about 125 miles to the north. From Neuberg to Wissembourg, France, the Lauter River served as a natural obstacle, but the third leg, from Wissembourg to Volklingen, France -- the point of contact with the Twelfth Army Group boundary.-- was merely an artifical dividing line.

An area along the border which no personnel, civilian or military, would be permitted to enter except by authorized routes was the first restriction delineated. This was to be generally five kilometers wide, but its design would be influenced by such natural barriers as existed in the area. Where no natural boundary existed, Major Foothorap suggested construction of barbed wire entanglements.

Through this prohibited area, based upon tactical and logistical requirements, a minimum number of routes across the border were to be opened; all other roads were to be closed to traffic. Refugee traffic across the Rhine was to be limited to two bridges which were to be constructed approximately forty miles apart. At those points, in addition to guards, CIC and French authorities would establish travel control posts and would perform the necessary screening. At all other river crossings and at road junctions in the other sections reserved for military traffic, guards would be stationed, and CIC would check the posts daily.

Civilians in those areas unpartitioned by rivers would be controlled and directed to two travel control posts at road junctions not vital to military traffic.

Internal and external patrols were to operate in the prohibited zone. Foot patrols were to comb the entire prohibited area. Motorized patrols were scheduled

4 Third U.S. Army After-Action Rpt, G2 (Unclassified), (Staff and Faculty Library).

to perform liaison activity between foot patrols and headquarters, in addition to their mobile scouting. Air patrols, manned by flight personnel in liaison aircraft with air-to-ground communications, were to observe any and all activity within the prohibited zone.

Plans called for a CIC "B-3" team, of three officers and eleven enlisted agents for each travel control post. In the event the French should decide to perform their own border control, CIC agents would be released for other duties.[5]

The Case of the Unsafe Safes

For importance and from the standpoint of the overall security of the United States, few cases in the History of the Counter Intelligence Corps can match the one which began in early February in Sixth Army Group area.

One GMC 6X6 truck, belonging to a signal unit, had been stolen after being left unguarded. An intensive investigation was quickly launched; for the truck contained a United States top diplomatic code and decoding devices. It was CIC's task to find the thief, the stolen truck, and, most important, the combination chests and one field safe which had been on the truck and which contained the supremely vital material. Those responsible for the negligence which allowed the thief to make his move allegedly were later court-martialed, but the words "court martial" alone do not indicate the gravity of the situation.

The strictest secrecy was placed on the investigation. The enemy might have stolen the vehicle, or it could have been in the hands of the Allies. CIC had no way of knowing.

Colonel David G. Erskine, recalling the event after nine and one-half years[6] said he learned later that code clerks in Washington, D. C. were called out to set up a new code at 11 P.M. on the night the news of the missing safes reached the Capitol.

Colonel Erskine, as Counter Intelligence Chief of Sixth Army Group at the time of the incident, supervised the search. Fifteen agents from Sixth Army Group CIC Detachments were detailed to the mission. G2's of all units in ETO were alerted. Colonel Erskine made discreet inquiries with high French officials to determine whether they knew what was missing. They did not.

---

5 CIC Det, Hq, Sixth AG, Memo to Col Erskine, dtd 6 Feb 45, Subj: Recommendations Relative to Control of Franco-German Border, 6th Army Group Area, (CONFIDENTIAL), (Staff and Faculty Library).

6 At the time of this interview, Colonel Erskine was Deputy Chief of the Counter Intelligence Corps at Fort Holabird.

But a Frenchman did have the safes in his possession -- a Frenchman who, because his own truck had been stolen, had made up his mind to steal the first truck he saw.

After being halted at a roadblock and allowed to pass unmolested, the Frenchman decided to ditch his cargo. He stopped the truck in the middle of a bridge over the Geissen River and tumbled all three of the containers into the water. This was quite a feat, for each of the containers weighed 550 pounds empty.

CIC knew nothing of this. Their only source of information was rumor. One rumor placed the truck on a Rhine bridge as it had blown up. CIC agents, with the enemy sniping at them from the east bank, walked along the Rhine looking for some sign of their quarry. Agents in Piper Cubs flew all over the canals and rivers around Colmar, hoping that the safes would cast a shadow on the river bed which would be noticeable from the air. Intense rainfall which caused a flash flood had made the task more difficult.

A French warrant officer finally located the thief. He obtained a confession and information concerning the disposition of the safes. The truck was recovered easily. But the safes were still missing.

Deep sea divers from Cherbourg scoured the river bottom unsuccessfully in the area around the bridge. On 9 March 1945 the river subsided slightly and the two chests were located 100 yards down stream. The field safe could not be found.

Colonel Erskine had plans drawn up to divert the river. CIC agents searched along the banks of the Geissen with such frequency that unknowing travelers might have surmised that the whole U.S. Army was lonesome for the Mississippi.

On 20 March 1945, just before the Colonel's plan for diverting the river was to be implemented, an unnamed CIC agent, taking one last look, was attracted by a gleaming reflection in one spot on the river. The glimmer had come from the third safe, its paint having been scraped away as the rushing river waters tumbled it over and over in the river bed, carrying it 600 yards from where it had been dropped. It was quickly retrieved, loaded on a truck and taken rearward over the Vosges Mountains, with Colonel Erskine riding in escort.

In Paris, experts examined the three containers and determined that none had been tampered with, except by the Geissen River.

As a result of this theft, diplomatic codes no longer permitted to be taken forward of Army.[7] Colonel Erskine was awarded a Bronze Star for his part in the

7 Interviews with Col David G. Erskine, 23 Aug 54, at Ft Holabird; Frank G. Gorgie, NCICA Convention, Chicago, Ill., 7 Aug 54; and Book Message from G2 First U.S. Army to G2 3d Armd Div, 11 Feb 45, in 503d CIC Det Situation Rpts Oct 44-Jun 45, (CONFIDENTIAL), (Kansas City Records Center, Box 25104).

forty-two day search. To be sure, the citation for his Bronze Star did not mention that a most secret code of the United States had been lost. It merely mentioned "highly classified documents and material."[8]

Other U.S. Armies Prepare for Offensive

By mid-February, First and Third Armies were getting ready for their part in the offensive. On 18 February, an instructional letter from Twelfth Army Group Commander, General Omar Bradley, was distributed to the Commanding Generals of First, Third and Fifteenth Armies; to Special Troops from Twelfth Army Group; and to the 66th Infantry Division which was operating against the German-held pockets in Brittany. The purpose of the letter was to outline operational security control measures, their applications, and the manner of implementation.

No effort was made to limit security control measures to those presented in the document; it was understood that special cases would call for special security tactics.

Prior to all troop movements, directives were to be issued by Armies which would "insure that personnel do not discuss military instructions, plans, operations, composition or location of troops in the presence of civilians or other unknown persons." Security lectures were to emphasize instructions for individual behavior in case of capture, stressing the need for absolute silence under questioning, except for "name, rank and serial number." Punishment for violation of military security discipline was to be "stringently imposed and adequately publicized."

Camouflage, including smoke, was to be employed, and strict censorship and telephone security precautions were to be observed, and newly-evacuated areas were to be searched thoroughly to prevent anything of intelligence value from falling into the hands of the enemy.

In keeping with the general secrecy of operations, all movement was to be made under cover of darkness or in inclement weather or by infiltration, with the barest minimum of daylight vehicular travel. Radio communication nets and links were to be continued either by leaving radio personnel and equipment behind to continue operations in an area being vacated, or by infiltrating the personnel and equipment of the relieving unit before the unit had moved out. In areas without previous radio communication, radio silence was to be maintained until commitment or release by higher headquarters.

Commanders of divisions and lower units were encouraged to use ruses, feints, dummy positions and fake concentrations for short-term tactical deceptive measures, with the help, if desired, of specialist personnel and special troops and equipment furnished by Twelfth Army Group. Air and ground reconnaissance was to be

8 201 File, Colonel David G. Erskine.

employed deceptively, "in such a manner as to avoid indicating the location of the main effort or supporting operations."

Suitable prohibitions were to be placed on news gatherers and other visitors, and military personnel were to be restricted to their respective areas except when command or administrative duties made traveling necessary beyond that area.

Every practicable measure to prevent contact between briefed and unbriefed persons, civilian or military, was to be taken, and, prior to departure, a thorough check of personnel was to be made to ensure that individuals possessed only those documents or papers which were essential for the execution of their missions.

Civilian control, "at the appropriate time," was to include the following measures:

(1) Travel restrictions were to be made more binding and enforcement of travel control was to be improved by the addition of travel control stations at vital points.

(2) No travel permits were to be issued by Military Government or Civil Affairs to civilians except in cases of absolute necessity, and then "only to those persons who have received security clearance from counterintelligence personnel."

(3) Civilians crossing lines in either direction and those considered threats to security were to be interned immediately in this phase and held until their presence no longer would constitute a security hazard. Known or suspected enemy agents were to be processed through counterintelligence channels.

(4) Efforts were to be undertaken to prevent British and American penetration agents traveling through the concentration area on their way across the lines from learning anything about the intentions and dispositions of troops throughout the area.

Among the special security measures were the removal of unit insignias, the disguising of unit markings on vehicles, and the prohibition of the use of any unit identifications, including telephone code names, on road signs for traffic control or similar purposes.[9]

9 Ltr from Hq 12th Army Group, dtd 18 Feb 45 to CGs of First U.S. Army, Fifteenth U.S. Army, 66th Inf Div, and Special Troops, 12th Army Group, subj: "Operational Security Control Measures," in 87th CIC Det Correspondence File, Jun 44-May 45 (CONFIDENTIAL), (Kansas City Records Center, Box 25095).

Suspect Categories Clarified

For the guidance of CIC in Germany, The First Army G2, on 12 February 1945, distributed a document containing a series of representative case histories, placing particular emphasis on the proper disposition of each type of arrestee.

The cases fell into three categories: those referred to and tried by Military Government courts; those interned as threats to military security; and Germans or enemy Displaced Persons evacuated to refugee camps or Allied nationals evacuated to United Nations Displaced Persons Centers after investigation at First Army Interrogation Center.

In examples of the cases tried by Military Government, the report stressed the importance of the defendants' confessions. In all cases where a confession had been obtained the suspects were found guilty, and sentences varied from small fines to death. Leniency was shown only in the reduction of two women's sentences from six years to two years imprisonment, based in one instance on the advanced age of the convicted and in the other on ill health.

Cases involving less than one year's imprisonment or less than a $1,000 fine were not subject to review, unless petitioned by the defendant within ten days after sentencing. All others were reviewed by higher authority. In one case, the higher authority commuted a sixteen-year-old boy's death sentence to life imprisonment, "by reason of the youth of the accused."

The case histories dealing with security threats reveal that factors to be considered in disposition included: intelligence, military skill, degree of indoctrination with Naziism, rank within the Nazi Party or government. The suspicion placed on an individual was liable to variation with these factors. Some persons were cited as short-range counterintelligence problems for whom immediate internment was necessary but could be terminated when the tactical situation improved or the lines advanced or a static situation resulted. Other individuals had to be jailed until long-range policies were established.

Cases involving those who were deemed to be Displaced Persons fell, for the most part, into two classes: "Controlled Displaced Persons" and "Displaced Persons." Persons with some element of Naziism in their past, but who were not automatic arrestees or threats to security, were considered Controlled Displaced Persons. Others, for whom no pro-Naziism could be proved, were considered Displaced Persons and were permitted relative freedom. Some, who had weathered the Nazi storm and had remained anti-Nazi by reputation, were referred to Military Government as potential employees.[10]

10 Intelligence Notes No. 3, First U.S. Army, dtd 12 Feb 45, in First Army File (CONFIDENTIAL), (Kansas City Records Center, Box 25097).

Protecting the Build-Up

In the Ninth Army area, the build-up for the forthcoming offensive was underway. The initial premise -- that evidence of a build-up could not be concealed -- was accepted, and security was directed toward deceiving the enemy about the number and types of troops in concentration.

Approximately 600 "security suspects," including 121 line crossers, were interned, to be released after the attack had been launched. Security instructions, issued to all Corps and Divisions, stressed these points: movement into Ninth Army area was to be accomplished under cover of darkness or, when practicable, by infiltration; unit and vehicle indentifications were to be removed; all personnel were to be restricted to unit areas; nearby cities were to be cited as "Off Limits"; radio silence was to be maintained; camouflage was to be used; and security lectures were to be given.

Civilian control included: the internment of all line crossers (found moving in either direction) and all security threats; rigid restriction of all civilian travel, especially in the occupied sections of Germany; and continuation of travel controls along the Meuse River in Ninth Army area.

For the first fifteen days of February, no cases of espionage or sabotage were reported in Ninth Army area, but fifteen German soldiers in civilian clothes were evacuated as Prisoners of War; twenty-four arrestees were turned over to indigenous authorities; thirty-six were arrested as Displaced Persons or violators of Military Government proclamations; and forty-seven were being held, pending further investigation -- in addition to the 600 previously mentioned.[11]

Later, counterintelligence briefs and target information were distributed "to all Corps and Division units...." Thirty-one line crossers were added to the previous total interned for security reasons, along with fifty-one other security threats. Of the 109 other cases handled in Ninth Army area, two proved outstanding. In one, a Military Government Intermediate Court sentenced a former Nazi ten years imprisonment for giving false information to CIC and fined him 10,000 marks. CIC agents reported that this type of positive action by the Allies against former Nazi officials greatly encouraged the inhabitants to divulge information on other Nazis in the community.

The second case involved two Hitler Jugend members who crossed the Roer on the night of 21 February with the mission of securing tactical information. After

11 Ninth U.S. Army After-Action Report for Period 1-15 Feb 45, from G2 Counter Intelligence Branch, Incl #32 to G2 After-Action Report, 1-15 Feb 45, dtd 19 Feb 45 in NUSA G2 Rpts, L-490 (4), (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

their capture in the 35th Infantry Division area at the town of Birgden, the unsuccessful spies informed on other agents who had been recruited and could be expected in the area.[12]

VI Corps Clarifies Evacuation Channels

Major Harry G. Costello, Jr., commanding VI Corps CIC, circularized a letter on 18 February outlining the procedure to be followed in the use of Prisoner of War Channels, throughout the Seventh Army area as a result of a telephone conversation with the G2, Seventh Army. These instructions ordered that only bona fide prisoners of war be sent through Prisoner of War channels. French Nationals who were regarded as security hazards were to be turned over to local French authorities, while enemy agents or suspected agents were to be "forwarded through CIC channels for disposition," regardless of nationality.[13]

Civilian Travel Control: Plans Made

Plans for civilian traffic control in Seventh Army Areas were worked out in several conferences attended by Sixth Corps Civil Affairs and CIC officials.

The City of Strasbourg was the focal point of civilian travel control difficulties. The French officials in that city issued travel permits indiscriminately--in a spirit in keeping with their recent liberation, according to a 206th CIC Detachment report. Ten different types of permits were in circulation from that one locale, and civilians, moving out of the city, flocked into the Sixth Corps area. Despite the relocation of Gendarme posts to control the traffic, some civilians filtered into forward unit areas. To add to the problem, no adequate means of fixing fines or detentions had been put into effect to discourage routine travel violations.

As a result of the conferences, the requirements for issuance of passes in Strasbourg were revised and a central circulation bureau was established in the city, which was advised of the new travel control regulations. One pass form (a yellow laissez-passer) was supplied to the bureau, and passes were to be granted

12 Ninth U.S. Army After-Action Report for Period 15-28 February 1945, from G2 Counter Intelligence Branch, Incl #32 to G2 After-Action Report 16-28 February 1945, dtd 4 March 1945, in NUSA G2 Rpts, L-490 (4), (Unclassified), (Kansas City Records Center, Box 25095).

13 Ltr from 206th CIC Det to G2s of VI Corps and Seventh Army and to CIC Dets of 36th, 45th, and 103d Inf Divs and 101st Abn Div and 14th Armd Div, dtd 18 Feb 45, subj, "The Use of Prisoner of War Channels" in 45th CIC Det Correspondence File, Aug 43-May 44 (CONFIDENTIAL), (Kansas City Records Center, Box 45121).

only for necessary travel in the Corps Area to the rear of the Division Security Line. Residents were informed of the regulations by all available means.[14]

The area covered by VI Corps and its subordinate units in this period approximated 500 square miles. The goal was to set up a travel control system which would make the area impenetrable to enemy agents and in which travel restriction violations would be swiftly detected and dealt with. Many indigenous persons worked with VI Corps CIC and detachments at division level to create a fine network of roadblocks.

In VI Corps CIC Detachment's Zone, thirteen roadblocks were manned by teams consisting of one National Gendarme and one member of French Forces of the Interior (FFI) or the auxiliary police. Motorized territorial Gendarmes patrolled eight areas. In addition, four Gendarmes manned roadblocks of four main highways leading into Saverne. Nine FFI-manned roadblocks encircled Saverne. In Brumath, on the French side of the Franco-German border, where the 36th CIC Detachment was located, several roadblocks were established. Roadblocks in neighboring towns and villages consisted of five in Bischwiller, four in Weyersheim, and one each in six other towns. All posts were manned by FFI.

The 101st Airborne CIC Detachment, operating out of Hochfelden, placed one roadblock in that town and one in each of five nearby villages, using FFI personnel also.

The 514th CIC Detachment, with headquarters in Dotwiller, used Military Police at ten roadblocks in their territory, and FFI personnel at eight others.

In Bouxwiller and in surrounding villages, the 103rd CIC Detachment stationed FFI members at thirteen roadblocks.

The situation was slightly different in the area served by the 45th CIC Detachment. In and around the town of Phalsbourg, seventeen posts were manned by Military Police. Two of these were in Graufthal; one in the town and one at the

14 Ltr from 206th CIC Det to G2s VI Corps and Seventh Army; 307th CIC Dets of 36th, 45th, and all CIC Dets under VI Corps; Civil Affairs, VI Corps; office of Provost Marshal; VI Corps; S/A Moseley, S/A Mills and Lt Teague, subj, "Civilian Traffic Control," dtd 18 Feb 45, in 45th Div CIC Det Corres file; Aug 43-May 44 (sic) (CONFIDENTIAL), Kansas City Records Center, Box 45121; Memo for the OIC 206th CIC Det, subj, "Civilian Travel Control for the Period 1 Feb to 10 Feb 45," dtd 10 Feb 45, in 45th CIC Det corres file, Aug 43-May 44 (sic) (CONFIDENTIAL), Kansas City Records Center, Box 45121.

railroad junction. Only four roadblocks were in FFI hands, all to the rear of the Division's Command Post.[15]

The 45th CIC Detachment was wary of the French Forces of the Interior because of an unfortunate incident in which two American soldiers were shot and killed by a group of men in civilian clothes. Although it was not proved that these men were members of the French Forces of the Interior, the Division G2 instructed CIC that no FFI personnel were to man posts forward of the Division Command Post. This gave to the Military Police the dual responsibility of screening civilian, as well as military personnel. No civilian travel, other than in cases of extreme emergency, was permitted in the area forward of the Command Post, which made the Military Police task a little easier.[16]

French Forces of the Interior Dissolved

Actually, the decision of the G2, 45th Infantry Division to limit the use of French Forces of the Interior personnel enabled that CIC Detachment to reorganize travel control plans efficiently. As it turned out, such reorganization would have been inevitable, for ten days later the French Forces of the Interior was dissolved officially by the Commandant at Strasbourg. Other Detachments in the area were therefore thrown into a potentially dangerous situation, security-wise, as there was no alternate plan and no legal way to force the former French Forces of the Interior personnel to remain at their stations. As one of the detachments affected by the disbandment of the French Forces of the Interior, the 36th CIC Detachment, reported; "The road block system began to slip. French Forces of the Interior members stated that they could continue but not as regularly as before because they must earn enough to live." CIC agents, "arguing on the grounds of patriotism and the necessity of roadblocks for American military security," convinced members to continue serving temporarily.

CIC agents made a special trip to Strasbourg to interview Colonel Carre, Secretariat General of the Police. He advised that communities had the right to employ additional police--to preserve security--and that the Prefecture would extend credit to the towns upon submission of a list of auxiliary police to be employed, if communal finances were overburdened by such a move. Armed with this information, CIC called a meeting of all officials from towns in their area and aided in the

16 Ltr, 45th CIC Det, to ACofS, G2, 45th Inf Div, dated 31 Jan 45, Subj: Civilian Travel Control, s/Ernest T. Gearheart, Jr., S/A, approved by Rupert W. Guenther, Capt, Cmdg (SOURCE: KCD CIC-C 000.4 45th CIC Det Correspondence File Folder 1, Aug 43-May 44 (sic) (SECRET), (Kansas City Records Center, Box 45121).

establishment of a "working Committee of Liberation with concrete responsibilities." The roadblock system was saved, and the Detachment Commander, Lt. William R. Mark, commented as follows: "Though civilian roadblocks never provide as perfect a security as military roadblocks, the present situation is deemed as close to perfect as possible."[17]

In all areas, there were some towns in which roadblocks of two different Divisions were in operation at the same time. Presumably the size of the town was a determining factor.[18]

"Take-over" Troubles--Again

The 45th CIC Detachment, on 3 February, encountered a difficulty many detachments in Europe had experienced due to weaknesses in the take-over procedure. They were confronted with a problem concerning six persons who had been arrested and interned by "an undetermined authority," and were subsequently released by the French for unknown reasons. A complete investigation was requested of VI Corps CIC Detachment, and 45th CIC Detachment pointed out that they had "no information concerning the reasons for the original arrest...." Neither did they know the reason for release of the arrestees, but they felt that the 100th CIC Detachment must have made the arrests or have had knowledge of them.[19]

VII Corps Establishes a Buffer Zone

As Allied units moved eastward, there was a gradual relaxation of restriction on civilian traffic in the rear of liberated areas. As of 9 February 1945, control of civilian traffic across the Meuse River was being handled by ADSEC CIC Sections. The Counterintelligence Control line had moved forward, however, and was established in First Army Area in a belt-like fashion, the forward boundary located along the German frontier from Holland south to within a few miles of the Luxembourg border. The depth varied from five to ten miles in the forty-mile belt. Forward of this line, along the Roer River, civilians had been evacuated to the rear, leaving the area virtually void of non-military personnel. No travel was permitted, and VII Corps, in its area, established a Corps Control line which was stretched along

NOTE: No further records of this case have been found.

the rear of this no-travel zone in an effort to catch anyone disobeying the restrictions or unaware of them.[20]

As VII Corps advanced, the 207th CIC Detachment planned to use the prominent terrain feature of bisecting rivers as an aid to their control line. The area lying between two such rivers, approximately seven kilometers wide, was to be evacuated by all civilians and established as a CIC Buffer Zone. Troops in the area were to arrest any civilians found in the buffer zone and turn them over to CIC. When the plans were implemented later in the month, Belgian Fusilier troops manned the check points. The scheme proved practicable and plans for using it in other areas were developed.[21]

VII Corps CIC Talks About "Take-Over Records"

Other arrangements for more efficient CIC operations received consideration within the 207th CIC Detachment. One memorandum, entitled "Take-Over Records," cited the fact that "Lax and haphazard records can completely defeat efficient CIC coverage and frustrate any intelligence take-over." An attempt toward standardizing record procedures was suggested by Major James K. Dorsett, Commander, who outlined the documents to be included in future take-over records.

Teams of CIC agents working in towns were to complete a Town Check List within the first three days of occupancy to provide a spot evaluation of take-over needs. They were to make out screening cards on all civilians interviewed and case sheets on every case investigated, cross-referenced to entries in other related files. Card files on informers, suspects, and civilian officials were "desirable," and alphabetical listings of these people were mandatory. All Arrest Reports were to be made out in duplicate, and an analysis of the general counterintelligence situation in the area was to be written. Black list information on suspects who had fled was to be entered on suspect cards and also sent to higher headquarters.

In summary, Major Dorsett wrote: "Remember you are only as good as your files--especially in the eyes of those who take over from you."

VIII Corps has a Take-Over Problem

During the first three weeks of February, VIII Corps CIC operated first in the Bastogne-Neufchateau area of Belgium, and later in the Ulfingen-Bissen region of

20 Counterintelligence Report No. 17, First U.S. Army, dtd 9 Feb 45, in G2 Jnl, 1st Inf Div, 10-11 Feb 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

21 Monthly Information Report 207th CIC Det, dtd 1 Mar 45 (SECRET), (Staff and Faculty Library).
NOTE: Samples of the forms mentioned above are attached as appendix 2 to this chapter.

Luxembourg. Since this area had received CIC coverage before and after the German counteroffensive, few problems outside of routine security considerations were encountered.

Both the 69th and the 222d CIC Detachments, which had been temporarily attached to the 208th CIC Detachment, received orders to report to a new station in early February, before VIII Corps CIC was moved to new positions.[22]

On taking over the new territory, the 208th CIC Detachment was immediately confronted with a charge that one resident who had been placed under house arrest by the 203d, the preceding CIC organization, had violated his restriction. It took two days for the 208th CIC agents to ascertain why the man had been arrested in the first place. One agent left behind by the 203d CIC Detachment or one sent ahead by the 208th CIC Detachment could have saved this time and more, since either man would be fairly familiar with the territory and would have had records available for the use of the succeeding Detachment when it arrived.[23]

Generally, the remainder of the Detachment's work centered around blackout and security checks, ferreting out pro-Nazis among the Belgians and Luxembourgers, and enforcing the restrictions on the civilian population.[24]

Control Line activity in VIII Corps area was largely in the hands of Section "B" of 419th CIC Detachment, an ADSEC COM Z team, commanded by 1st Lt Meredith R. Wilson. Twelve to fifteen CIC agents and two interpreters, plus twenty-eight indigenous guards, maintained the control line operation. The guards manned stationary posts from 0730 to 1730 hours. CIC personnel patrolled the route from dawn to dusk, and at least one agent remained in the office every hour of the day.[25]

A Delinquency Report -- for Working

One trivial incident experienced by an officer of the 208th CIC Detachment illustrated a situation where CIC could not logically conform to regulations. A Delinquency Report reached the Detachment concerning one of the lieutenants in the organization. The charge: Driving a vehicle. A Corps policy prohibited any

officer from driving a vehicle, and the provost marshal notified the offender's Detachment of the delinquency. Captain Bowen, in his reply to the G2, took the blame for not advising the officer of the prohibition, adding, "It is a frequent situation that unless an Officer drives a vehicle, an urgent request for a counterintelligence investigation cannot be complied with."[26]

The Dutch Develop a Plan

The 216th CIC Detachment, attached to the XVI Corps of the Ninth Army, which was still under British control, operated in the peninsula-like extension of the Netherlands which separted fifty-odd miles of the Belgian border from the German border by distances of from ten to twenty-five miles.

Security measures in the division and corps areas were enforced, according to the counterintelligence Semi-Monthly Report for the period, and security appeared to be "good."

Information in the counterintelligence files of the British 12th Corps Field Security Section which had been turned over to the 216th CIC Detachment had been carded and all investigations completed by 24 February 1945.

All towns in Corps area were given security surveys, and liaison was established with appropriate officials and agencies. Personality sketches of the leading officials and brief histories of the towns were prepared Background investigations were conducted on all important individuals. Curfew regulations were rigidly enforced, and violators were quickly turned over to the CIC. Spot checks were made "from time to time."

In the course of the security surveying of towns in the area, agents noted that all houses of families under suspicion by the Dutch, for any reason, had signs upon them reading, "Under Suspicion," warning Allied soldiers to beware of those homes and the individuals within them. The notices bore the signature of the Commandant of the Mine District. The Detachment Commander, Major William W. Frederick, reported that the postings were a good security measures and that the whole idea was Dutch in origin. The Americans did not have to assume any responsibility for the measure.

CIC made a survey of the telephone exchange at Sittard, Holland, and, with the help of the Signal Corps, tried to institute Security measures. All lines running to

26 Office of PM, Hq VIII Corps, dtd 18 Feb 45, subj: "Report of Delinquency re 1st Lt Leo L. Ermis, to CO 208th CIC Det Jnl of Rpts 1/45-6/45 (RESTRICTED), (Kansas City Records Center, Box 25097), 1st Ind, 208th CIC Det, subj: "Traffic Violation," dtd 11 Mar 45, in 98th CIC Det Correspondence File Feb 45-Sep 45 (Unclassified), (Kansas City Records Center, Box 25097).

other areas were taken over by the U.S. Army. All personnel working at the exchanges were cleared by CIC, and Signal Corps personnel were on hand at all times.[27]

The 270th British Field Security Section, apparently under XVI Corps, investigated local labor necessary to repair a road and kept the local laborers under guard to ensure that unauthorized persons did not join the group.

This British unit, attached to the British 7th Armored Division, patrolled the Maas River on the Division's left flank to prevent crossings. They captured three members of the old Dutch Customs Guard attempting to go by rowboat into Belgium for undisclosed reasons. The rowboat was destroyed and they were instructed not to make a similar attempt.

The 35th U.S. Division, also under XVI Corps, conducted road checks and security inspections of towns in their area to pick up any unregistered civilians and to implement restrictions.

Line-crossers, suspected collaborators, and members of the Dutch Nazi organization were discovered still in the area. In German border towns, the 216th CIC Detachment handled two important cases in which two Burgomeisters had been cleared by British Field Security Service and retained by British Civil Affairs and the succeeding American Military Guard organization. One Burgomeister readily admitted that he had been a Nazi of long standing; the other, on his Fragebogen,[28] declared he had never been a Nazi. The self-admitted Nazi was removed from office immediately. The other stood an interrogation by CIC agents and finally revealed his Nazi affiliation. The investigation was then expanded to gain corroboration of the man's Nazi background with an eye to trying him for falsifying information on an official form.[29]

Border Control In XVI Corps' Area

Section "Q" of the 424th CIC Detachment (normally a Normandy Base Section organization) which was comprised of one officer, Lt Herman G. Goldbeck, and

27 Semi-Monthly Counterintelligence Rpt for period 8-24 Feb 45, in 216th CIC Det Operational Rpts-Belgium, Holland, Germany (CONFIDENTIAL), (Kansas City Records Center, Box 25098), Oct 44- Sep 45.

28 The Fragebogen was a "Personnel Questionnaire" which was required of each arrestee, city official, job applicant, etc.

29 Semi-Monthly Counterintelligence Rpt for period 8-24 Feb 45, in 216th CIC Det Operational Rpts- Belgium, Holland, Germany - Oct 44 - Sep 45, (CONFIDENTIAL), (Kansas City Records Center, Box 25098).

five agents, worked on border control in XVI Corps area at the Netherlands-Germany frontier, patrolling between posts manned by indigenous personnel and collecting all line crossers.

Two-hundred-five line crossers were apprehended in February by units under XVI Corps CIC and were interrogated at Corps level. CIC also called in Military Intelligence Interpreter personnel so that the intelligence unit could find out as much tactical information as possible from the line crossers. All counterintelligence information collected from every source was transmitted to higher headquarters by Corps CIC.

The 216th CIC Detachment split itself into two teams, each with a definite geographical area of operations, with strength allocated apparently on a basis of population, since no physical targets remained to be reduced. The team operating in the northern part of the Corps area, out of Sittard, Holland, was comprised of two officers, five special agents, three agents, one clerk and one interpreter. The team operating in the south of Corps area had one officer, four special agents and two interpreters. The assignment of the only clerk indicated that administration duties were handled largely by the northern team.[30]

The 218th CIC Detachment: Pure Security

Complete responsibility for the security of Headquarters, XVIII Corps (Airborne) was delegated to the 218th CIC Detachment, under the command of Captain Albin P. Dearing.

To make the Headquarters more secure, CIC agents placed locks on all doors leading into "TOP SECRET rooms." Personnel whose duties required them to enter these rooms were issued "TOP SECRET passes." A record of each pass was kept and all personnel were familiarized with the instructions governing its use.

Daily burning of classified trash, proper use of passwords and countersigns, and increased use of guards were other security measures carried out at the insistence of the Corps CIC Detachment.

The Command Posts of the 13th and 17th Airborne Divisions were checked also, and some investigations were made -- mostly dealing with possible security violations.

In one case, on 21 February, copies of messages classified "SECRET" were discovered in an open box in a room occupied by armanent repair personnel. Research proved, however, that the messages were so outdated that their loss

30 216th CIC Det, CIC Annex to After-Action Rpt, 1 Feb 45 - 1 Mar 45, in 216th CIC Det Operational Rpts-Belgium, Holland, Germany, Oct 44 - Sep 45, (CONFIDENTIAL), (Kansas City Records Center, Box 25098).

would not have caused the compromise of classified information. The Section Chief was approached and instructed that obsolete, formerly classified information was to be destroyed or reclassified and handled in a manner consistent with the revised classification.

-- "Sick Old Man?"

When Captain Albin Dearing, the Commander of the 218th CIC Detachment, read in the 18 February edition of Stars and Stripes that had invested in the Monte Carlo bank to keep the enemy "from carrying off her husband -- 67 years old and a sick man," he forwarded to the G2, ETOUSA, some inside information concerning the millionaire. The captain had spoken with on two occasions in December 1944, in St. Paul, Monaco. was living there with a young woman at the time, and claimed he had not "crossed a frontier in fourteen years," the reason he gave for being left unmolested by the Nazis. Others alleged that his wife's friendship with high-ranking German officers was the real reason. "Whatever the facts of this may be," Captain Dearing wrote, "it can be unquestionably stated that was far from being an ailing, sick, old man as recently as three months ago."[31]

An Informant Lies to CIC

An "American intelligence agency" lost one of its informants in the vicinity of Aachen when 219th CIC Detachment agents turned him over to the local Military Government Public Safety Officer to be charged and tried for violating a Military Government proclamation. The agents had been investigating a lead from a tactical unit which had discovered certain prohibited articles on the informants farm. Quantities of U.S. gasoline, shotgun ammunition and rifle grenades were found by the CIC agents. Without being told that CIC had already located the illegal cache, the man was questioned about his possession of the articles. He denied that he had any prohibited materials.

Division CIC Activity: Mostly Routine

The 1st CIC Detachment, commanded by 1st Lt Charles G. Steinway, reported no outstanding cases during February. Activity of the Detachment consisted mostly of routine investigation of German deserters in civilian clothes, atrocities, pro-German Belgians and former Nazi Party members; security checking of CP's and communications; screening displaced persons and civilians; and lecturing on security.

31 Sum of Act, 218th CIC Det, 13 Feb - 25 Feb 45, to G2 1st Allied Abn Army, Attn: 351st CIC Det, in 218th CIC Det Weekly Summary Rpts Feb-May 45, (CONFIDENTIAL), (Kansas City Records Center, Box 25098)

[redacted]

The greater portion of the time was spent on the German side of the Belgian-German border, giving counterintelligence coverage to a number of small towns. The Detachment entered Germany about 11 February, after turning Weywertz, Belgium, over to the 99th CIC Detachment. The new headquarters of the Detachment was in Vicht, Germany, where the Division Command Post was located.[32]

For all of February, the 4th CIC Detachment operated in areas the Germans had occupied during the Ardennes campaign. Fewer than 250 people resided in the Division's forward area, minimizing any real threat to security. These individuals were severely restricted in their movement, and, while a number of displaced persons were directed into proper channels, little counterintelligence investigation was necessary.[33]

A similar situation existed in 5th Division area, and the 5th CIC Detachment, operating in Luxembourg, had only eighteen individual suspects to investigate and arrested none of them. CIC agents manned check points and roving patrols in Division area, but the evacuation of civilians was nearly complete here, as in 4th Division area, and security was easily maintained.[34]

Reports of limited activity were received from 44th CIC Detachment, commanded by Captain Peter M. Cummins, Jr., which operated in Wittring, Lorraine;[35] from 69th CIC, under Captain Andrew R. Duvall, Jr.,[36] which had spent two weeks on the front lines for training and orientation purposes since their Division was newly-activated;[37] from the 82d CIC Detachment which spent the twenty-one days of this period along the Roer River near Hurtgen where, according to the Detachment CO, Captain John C. Pearce, "there were no cases of unusual significance;"[38] and from

the 83d CIC Detachment, which operated in Belgium and Germany under Captain Oliver A. Victor's command, enforcing travel restrictions. The 83d CIC Detachment, however, apprehended six possible security threats in Dalhem, Belgium, before moving with the Division into a non-operational zone.[39]

29th CIC Detachment: Return to D-Day Security Level

"These people speak ----- good English to ----- so zip the lip ----- till the fighting's thru ----- don't talk." This is a sample of the "Burma-Shave" security signs which were posted along main roads in the 29th Infantry Division sector in the 29th CIC Detachment's effort to bring security-consciousness up to "the 'D' day level." In addition, three articles were written and published in 29 Let's Go, the Division newspaper, on 8-10 February.

The subject of the articles was "Security," and the main theme was "Don't talk." Two of the messages were targeted to specific groups: One to "Headquarters and Service Troops Only," who, by virtue of their positions, had indirect and sometimes direct access to military information of impending operations; the other, to reinforcements, notoriously lax in security matters.

The message to the Headquarters group warned about the tendency to play "big-shot" by "shooting off" vocally about things before they happened. This article ended: "Did you remember what you told your buddy the other day when you were taking a shower--wasn't there a German civilian there? Oh, he doesn't speak or understand English? Just ask the Infantry.....CIC"

The article written to reinforcements explained how strict security was maintained prior to D-day, stressing the fact that American soldiers knew but none would talk about the invasion. Briefly, the article pointed out a deterioration of that spirit which culminated in the enemy's strike at the Allies' weakest point in the Ardennes, allegedly based on information given by captured American soldiers. "The book says," it concluded, "NAME, RANK and ASN, maybe there's a reason for it.....CIC"

The third article was directed to all troops, explaining that their entry into Germany created a situation where they were literally surrounded by the enemy. Its main message was that "WE HAVE SIGNED NO SEPARATE PEACE WITH THESE CIVILIANS; they are our enemy and you should no more talk in front of them than you would in front of an enemy soldier."

Since the major towns in the Division area had been taken over by Corps CIC detachments and since other towns in the Division sector had been evacuated, 1st

39 83d CIC Det, After-Action Rpts, dtd 1 Mar 45, In Opns Rpts 207.03, 383-CIC-0.3 (11786) Jan - May 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

Lt Ellis O. Mayfield, commanding the Detachment, reported that activities had been limited purely to routine matters brought to the office by Military Government Detachments and units of the Division, with a few arrests for security reasons.[40]

The 35th CIC Detachment, under Captain John S. Foster, was limited in its activity during this period since the agents were operating in an evacuated area whose few remaining civilians had already been screened by other CIC and British FSS units under Ninth Army.

To increase Security, military personnel who wished to pass through Division Command Post area without knowledge of the current passwood were screened by CIC. In one twenty-four hour period, from 17 to 18 February, 150 persons were processed by CIC. Five percent of these were in charge of groups. The reasons cited by CIC for such widespread ignorance of the password were: faulty dissemination; use of a password not common to all organizations; and failure of military personnel to acquaint themselves with the password.[41]

CIC Aids Supply Economy

During security searches of premises and bivouac areas vacated by military personnel, agents of the 78th CIC Detachment learned that troops were abandoning supplies and equipment, including weapons. Upon recommendation of the Detachment, commanded by Captain Neil M. Ruge, the Division's Daily Bulletin of 2 February 1945 brought the matter to the attention of all unit commanders, recommending destruction of unusable material and explaining to the troops that such action aided enemy line-crossers and prolonged operations.[42]

87th CIC Detachment Has Family Problems

Thbugh operating in an area which also had undergone previous CIC coverage, 87th CIC Detachment found a few out-of-the-ordinary cases to investigate in early February.

1st Lt Sam E. Harwell's Detachment operated in the Belgian-German border area between the 82d Airborne CIC Detachment and the 4th CIC Detachment zones of responsibility, and Control Line activities of the three division detachments were coordinated by a Lt Long of ADSEC CIC, VIII Corps. Heavy snows made the use of mobile patrols impractical during this period, and the only Control Line activity

involved the manning of posts at five road junctions on the outskirts of towns and at two places in towns: one in Lanzerath, Belgium; the other in Andler, Belgium. Since the Detachment's area had received prior counterintelligence coverage, little of specific interest developed, but agents were used to investigate a claim of looting by U.S. troops against Belgian nationals -- which was substantiated -- and to inquire into the circumstances which led a German soldier to leave a letter with a Belgian family for transmittal to the United States. The soldier actually was an American citizen who had married a German woman before the war and had been forced into service for the Fuehrer. His love for his wife and children kept him in bondage, according to his statements to the Belgian woman with whom he had left the letter. CIC agents felt that the letter was no propaganda ruse, giving tacit approval to its transmission to the United States citizens who were this "enemy" Soldier's mother, father and brother.[43]

Another case involving family relationships confronted 87th CIC Detachment agents, due in part to inadequate take-over records. A father and daughter under investigation claimed to have been cleared by a preceding CIC Detachment, but there were no records immediately available to verify this statement. Inquiries through channels, however, definitely established that CIC had investigated and cleared the pair. In fact, both had given information of tactical value to an American Tank Destroyer Battalion on its entry into the area. The girl had married a man who, she'd discovered later, was a Gestapo agent. She turned her spouse over to soldiers of the 4th U.S. Infantry Division upon their arrival in Schonberg, Belgium.[44]

On the German side of the border it was discovered that only a few civilians had not been evacuated further into Germany. Those remaining had been left to care for the livestock. CIC was particularly wary in screening them since the possibility existed that these people were stay-behind agents. Among the three families left behind in Neuendorf, Germany, a German soldier wearing civilian clothes was apprehended. The prisoner contended that he had been discharged on 3 January 1945 and had lost his papers when a vehicle in which he was riding had burst into flame after being strafed by American planes. CIC considered the account implausible and assumed that this person was "either a deserter or was left behind by the enemy for some purpose." The soldier was arrested and sent back through Prisoner of War channels.

For the most part, however, the Detachment discovered that "civilians in the towns near the border do not appear to be as fanatical Nazis as those expected to be found further in the interior."[45]

Early Bird Gets Caught

At 0500 hours on 17 February, a civilian was stopped at a 94th Infantry Division outpost after crossing into the Division area from German positions in the vicinity of Borg, Germany. He was dressed in work clothes and wore a cap with a visor bearing the inscription "Foreign Laborer." He carried German lineman's equipment and had a pair of binoculars concealed in his shirt. The Germans were known to be using short-term line crossers with the cover of forced laborers. This knowledge and the appearance of the civilian immediately categorized him as a potential enemy agent. Anthony Geber, a member of the 94th CIC Detachment who was accumulating information concerning CIC personality and physical targets in the area facing the division, interrogated him and obtained information which was later proved accurate. A French Office of Strategic Services officer, attached to the Division, then interrogated the man for tactical information. A Military Intelligence Investigations team also questioned the line-crosser. After all the interrogators had learned as much as they could from the captive, he was taken to Third Army Interrogation Center.[46]

The "Town Commanders" Plan

A division-level project known as the "Town Commander Plan" was believed by the 100th CIC Detachment to "strengthen the security mindedness of the individual troops." The backbone of the plan was the placement of responsibility for the security of the troops and installations in the town upon the shoulders of the commander (or his designated assistant) of the organization stationed in the area. This undoubtedly contributed to greater cooperation with CIC and, in the 100th Infantry Division area, the Detachment was able to work with forty military-manned roadblocks and checkpoints, thirty-eight civilian-manned roadblocks and five Military Police roving patrols, established upon CIC recommendation. The patrols operated twelve hours daily.[47]

No reports have been found for many of the Divisional CIC Detachments, particularly those with Armored Divisions.

Rear Area CIC Activity

Though most minds were filled with thoughts of the new Allied offensive into Germany, the German strongholds at Lorient and St. Nazaire in France remained tactical and counterintelligence problems. Refugees from those pockets needed thorough screening in addition to shelter and food.

On 21 February 1945, 2100 refugees from the St. Nazaire area were screened in Nantes by 66th CIC Detachment and CIC Detachment 424, Section Q, with the assistance of the French Bureau de Documentation, Deuxieme Bureau, French Forces of the Interior (FFI), and the Police Speciale. Guards for the refugee train as it passed the Allied front lines were provided by FFI, and guards for the building where the screening occured were from the Gendarmerie Nationale. As the refugees filed through, their documentation was checked by the French and an initial interview was held. CIC agents performed the second interview and suspects were held for further interrogation. Military Intelligence Investigative personnel were on hand to secure tactical information. The entire area surrounding the building in which the screening took place was evacuated of civilians, and all personnel working in the area carried passes authenticated by both the French and American security agencies.

The screening was accomplished in a single day with no mishaps. Twenty-three refugees were detained by the French because their papers were not in order.[48]

CIC and the Repatriates

On the French Riviera, CIC personnel with the Delta Base section assisted in the repatriation proceedings which were taking place between Germany and the Allies. A total of 5,379 Germans and 3,239 Allies were exchanged. CIC and MI I, in conjunction with the State Department, screened the 806 Allied civilians who were returned. Seventy-five American "protected" persons were repatriated. In addition, 525 American and British airmen were brought out of Switzerland. Security was largely in the hands of the CIC.[49]

Moscow's Other War

By this time it had become apparent to CIC, as it had to all branches of U. S. Intelligence, that the Communists were conducting two wars simultaneously, the

second being a comparatively noiseless subversion of the newly-reinstated governments of liberated countries. Belgium appeared to be the prime Communist target.

CIC maintained a close watch on the attempted subversion of the Pierlot government of Belgium. Twelfth Army Group's CIC Detachment, in a Weekly Counterintelligence Report for the period 3 February to 10 February 1945, told of a meeting between members of the Belgian Communist Party and the Soviet Delegate, M. Ivan Aleksijiev, in Paris. The Soviet Delegate allegedly asked whether secret orders from Moscow were being followed, why the November attempt to seize the government of Belgium was unsuccessful, and how he could be of help to the party in Belgium in the future. The Belgian Communists present requested propaganda assistance and arms for an uprising, "as stones were useless against the rifles of the Gendarmerie."

According to the report, the four aims of the Belgian Communist Party appeared to be:

(1) The immediate overthrow of the Pierlot Government.

(2) Remobilization of the Resistance Groups.

(3) Establishment of "Workers' Committees" in factories.

(4) Recognition of their Comite de Lutte Syndicate, a labor organization generally believed to be responsible for a number of coal strikes in Belgium which greatly inconvenienced the people during the cold winter months of 1944-1945.

No Direct Action Allowed

Since there was no policy which permitted CIC to intervene against Communistic subversion of free governments, the policy of disarmament of all resistance groups was applied rigidly. This undoubtedly lessened the opportunities for violent overthrow of governments for, as the Communists had said, "Stones were useless..." Beyond insuring that these groups had no weapons of importance, CIC could only report to interested authorities the facts that had been collected by them.

Keeping Track of "Home Grown" Communists

Communists serving in the U.S. Army were tracked by CIC through the media of summaries of background investigations which followed them from station to station. They were categorized as "Military Personnel Suspected of Disloyalty or Subversive Activity," and they were restricted from sensitive duties. Other than the practice of keeping unit commanders aware of the Communists within the ranks and advising discreet observation "to determine whether Subject is in any way attempting to

influence his comrades toward Communism" -- and open act of subversion -- no course of action was authorized.[50]

Reports on Communists came to the attention of CIC personnel, who made recommendations to the Division G2 on the basis of established policy. The 503d CIC Detachment received such a report in February 1945, concerning a person serving with a Company in the 33d Armored Regiment. Well-known by the party name of , the suspect was evidently a person highly-esteemed in Communist Party circles.

Private ' before entering the Army in 1943, had been and had a record of Young Communist League affiliation dating back to 1928. He also had a police record which showed two arrests for in the early thirties. He had also been the Communist Party candidate for [51] He was a private who needed watching, and 503d CIC Detachment included a reference to this case in its weekly reports for the remainder of the tactical campaign in Germany, but nothing new developed.[52]

Chapter 2

Eastward Ho!

By the third week in February, the Roer River had subsided enough for Ninth U.S. Army to attack and to establish a bridgehead on the eastern bank. This action followed the 8 February offensive of the Canadian Army in the north by fifteen days. Though the Roer Dams had been in American control since 10 February, the Germans had opened them before they were captured, flooding the Roer and causing the delay in Ninth Army's advance.

The First and the Third U.S. Armies of Twelfth Army Group leaped to the offensive in the center of the line. The vigor of these drives forced the Germans to withdraw forces opposing the Sixth Army Group in the South.

On the eastern front, the Russian offensive had been slowed decisively by German reinforcements from the west.[5β]

Sixth Army Group Plans For ECLIPSE

While First and Third Armies were launching their attack which was to carry American forces to just west of the Rhine, Sixth Army Group to the south was planning its full offensive, code named ECLIPSE, which was scheduled to begin on 15 March.[54]

In preparation for CIC's part in this offensive, Major Robert N. Denniston of the Office of AC of S, G2, Headquarters, Sixth Army Group, drew up two memorandums which were sent to Colonel David G. Erskine, CI Officer of Sixth Army Group. The memorandums concerned the need for linguists and more CIC Agents by installations and CIC units within Sixth Army Group, and supplementary personnel who would have to be added upon entry into Germany.

Major Denniston anticipated the need for 104 interrogators and 178 interpreters to assist CIC at eight Frontier Security Control Posts, six Internment Camps and in cities of over 100,000 population. To bring all the CIC Detachments under Sixth Army Group to T/O strength by ETOUSA standards (some of the Detachments in this Group were working with the smaller NATOUSA allotments of CIC personnel), seven officers and seventy-seven non-officer agents were called for. For Germany,

5β Eisenhower, op. cit., pp 375-377; and Weekly Intelligence Summary #49, dtd 25 Feb 45, SHAEF, Office of AC of S, G2, Part I (SECRET), (Staff and Faculty Library).

54 G2 History, Seventh Army Operations in Europe, 15 Aug 44-8 May 45, Part VIII, 1-31 Mar 45, RESTRICTED, Staff and Faculty Library.

Major Denniston noted, a total of 126 officer and 412 non-officer CIC agents were required to provide coverage of the Military District Headquarters, Army Headquarters Interrogation Center, six Internment Camps, nine cities of over 100,000 population, eight Frontier Security Control Posts, and a number of Concentration Camps and Displaced Person Centers. The agents were to be broken down into Detachments with solely installation and geographical jurisdiction.

A twenty-seven man Detachment was planned for Military District Headquarters; a fifteen-man Detachment for the Interrogation Center; an eighteen-man Detachment for each internment Camp; and eighteen or nineteen-man organizations for each city over 100,000 in population; and eighteen-man Detachment for each Frontier Security Control Post; one agent for each overrun Concentration Camp; and forty agents to cover Displaced Persons Centers. The number of Displaced Persons Center operating personnel would have to be enlarged as more such centers developed, according to the estimate.

Seventh Army had already begun recruitment of a number of agents, and others from Divisional Detachments in static situations were to be redeployed to the new detachments. The actual shortage of CIC personnel to fill the proposed and existing vacancies still numbered 97 officers and 344 enlisted agents -- which ETOUSA was requested to provide.[55]

Corps CIC Activity

Few records have been preserved from Army CIC Detachments for the early days of the offensive, but records from Corps CIC units under these armies indicate that their activities were not altered significantly by the advance and that they still had time for innovation and planning.

A small detachment of Military Government team members, Military Police, and one or two CIC agents toured all the outlying villages in V Corps area to prevent the terrorizing of local German civilians by individuals and groups of German soldiers in civilian clothes and other non-residents. Local officials and law enforcement agencies were given the responsibility of "cleaning up their community."

The visits served two purposes: suspects and civilian-clothed German soldiers were collected, thereby stopping all hostile activity, and the local population became aware that it was being watched by the occupying forces.[56]

Seventh Corps CIC Experiments in Population Control

In Eschweiler, a German town about ten miles from the Netherlands' border, VII Corps CIC Detachment experimented with security control, isolating all residents in one section of the town. The Detachment found that this procedure "greatly simplified the problem of securing military installations within the city, since troops and military police arbitrarily arrested any civilians detected outside their designated section of town."[57]

VII Corps CIC Detachment also checked carefully with Military Government to make sure that all prohibitions upon the civilian population were included in posted proclamations. Prior to this, persons apprehended in possession of instruments such as cameras and binoculars often were freed when they claimed ignorance of any prohibition against such possession.[58]

VIII Corps CIC: Innovation and Feud

VIII Corps CIC Detachment, commanded by Captain Albert R. Bowen Jr., operated in the area between Trois Verges, and Vianden, Luxembourg, and into Germany for this two-week period. One team of CIC agents from this Detachment gave Counterintelligence coverage to the Sixth Cavalry Group area, while the remainder served Corps.

Few unusual cases developed, either in Luxembourg or in enemy territory. Five Russians who had claimed to be forced laborers later admitted to the CIC interrogators that they were actually regular members of the Wehrmacht. In another instance, a Maj Zellenlieter, picked up as a "suspicious civilian" attemped escape and was shot to death by a guard.

This Detachment, where practical, also carried out a policy of isolating the civilian population for security purposes. VIII Corps CIC Detachment not only restricted them to one area in town, but also placed them in as few buildings as possible and instituted a guard on the buildings, requiring them to remain indoors until CIC completed its screening.

The more usual practice, however, was to have Military Government proclamations read and posted warning civilians to remain in their homes for forty-eight hours after the American entry into the area. After that they were permitted to circulate during 0800 to 1730 hours. No travel outside of towns was allowed without a Military Government pass.[59]

58 12th Army Gp Semi-Monthly CI Rpt #14, 16-18 Feb 45, (SECRET), (Staff and Faculty Library).

59 CI Rpt #5, 208th CIC Det, period 21 Feb to 5 Mar 45, udtd 208th CIC Det Journal of Rpts, 1/45-6/45, (CONFIDENTIAL), (Kansas City Records Center, Bx 25097).

Although security and administrative efficiency were not inimical, the means necessary to produce each in a conquered territory produced friction between the agencies concerned. Correspondence between Captain Albert R. Bowen of the 208th CIC Detachment and Colonel Azol F. Hatch of G5, VIII Corps, illustrated the difference in viewpoint between the two agencies.

Writing to Colonel A. R. Reeves, G2, of travel control and civilian registration in Germany, Captain Bowen referred to counterintelligence instructions for Germany, Third U.S. Army, 2 February 1945.

He outlined the basic need for travel control as a means of interrupting enemy espionage efforts and made several recommendations, including: restriction of travel by civilians within the Corps zone to a one kilometer radius from their homes; issuance of Travel Permits by Military Government only to those who needed them, after screening by CIC; posting of standard Travel Notices in every German town by Military Government; notification of troops of existing travel restrictions with instructions that civilian violators be brought to Military Government or CIC; supplying Identity Documents for each resident; establishment of a definite procedure for the procurement of travel passes by the citizens; and readying of Military Government Courts to prosecute violators swiftly.

Captain Bowen suggested a procedure to be used in the issuance of Travel Permits:

"(1) The Burgomeister of each town will be given a standard set of written instructions.

"(2) Applications for passes will be made to the local Burgomeister.

"(3) If the applicant's reason for travel comes within the categories listed in the instructions given to the Burgomeister, then the Burgomeister will have the applicant fill out a Fragebogen. The Burgomeister will then certify that the reason for travel as stated is true and then send the Fragebogen and Certificate to the nearest MG Detachment.

"(4) The MG Detachment will have CIC screen the individual and issue the pass, if approved.

"(5) MG Detachments will keep a strict account of all passes issued and require that the pass be returned when the period of authorized travel has expired."

The G5 replied to Captain Bowen's proposals with counter-proposals. The main points of his reply were that tight restrictions would increase administrative

problems until they became unmanageable; that these restrictions would provide less security since Military Government and CIC would both be preoccupied with paper work; and that the lack of circulation would prohibit areas from functioning as economic entities.

Aside from generalities (i.e. "Restriction unless accompanied by a tight checking system provides no security," and "Restrictions that cannot be enforced merely breed contempt for the law."), Colonel Hatch described what he said would be several specific results of such strict regulation of civilian movement.

One flaw in Captain Bowen's plan, said Colonel Hatch, was that a civilian applying for a travel pass would violate the one-kilometer rule to get to the point of application. The Colonel also said an immense amount of paper work and investigative activity would be required to handle the pass requests. He noted that eighty applications a day were received from the 1,500 to 2,000 citizens of Wiltz, Luxembourg, and, projecting that proportion to a theoretical Corps area in a Rhine province in which 25,000 to 30,000 civilians might be encountered, he claimed that 6,000 to 7,000 applications might be received weekly to travel beyond the existing six-kilometer rule. Restriction to one-kilometer would multiply those figures, he stated, suggesting that Military Government functions would be interfered with by this workload, "even if CIC could handle promptly such a volume of screening."

In lieu of Captain Bowen's proposal, Colonel Hatch offered his own, which permitted unrestricted travel within the person's home Gemeinde (Commune averaging about 1,000 civilians in thirteen square miles); which allowed the Burgomeister to grant passes for travel from Gemeinde to Gemeinde within the Amter (average of 12,500 persons within 170 square miles) provided that he vouch for the pass holders and keep a roster of outstanding passes for Military Government inspection at any time. This would require application to Military Government with the accompanying CIC screening only after application to the Burgomeister for a bi-weekly or monthly travel pass from Amter to Amter by essential workers (i.e. doctors, nurses, officials).

He suggested further that registration of civilians be accomplished immediately after the Gemeinde came under Corps jurisdiction, using the Identity Document in triplicate for registering purposes.

Captain Bowen, in a second letter to the G2, restated his arguments, and in some cases amplified his original program. "By Order of the Army Commander, 'Security of the Army' will take precedence over the welfare and convenience of the civilian population," Captain Bowen wrote, alluding once more to Third Army's counterintelligence instructions for Germany. He pointed out that Exemption Certificates were prescribed by SHAEF for issuance to doctors, nurses, and other essential workers. The mass of the population, if Military Government organized

its area carefully, would have no reason for travel passes, he explained, except for infrequent emergencies. He doubted whether the Wiltz ratio would be repeated since he believed the high percentage of travel pass requests there to have been due to the lenient attitude adopted in a liberated Allied country. He also stated that local police, supervised by Military Government Police and supplemented by Corps troops (presumably with the power of detention) could effect an efficient enforcement of the restrictions.

Captain Bowen maintained that restrictions by linear measurement were more effective than those based on geopolitical boundaries since "Military Government Police or troops will hardly know these boundaries, particularly in a moving situation. Final enforcement will therefore be left almost completely up to German citizens." He indicated that no Burgomeister would have the authority, under Third Army's instructions, to issue a pass for a distance over six-kilometers. Travel from Gemeinde to Gemeinde would be greater than that in many instances, and only a Military Government Officer could authorize such a journey.

Captain Bowen asked for a conference between "G5, G2, G5 Police Safety Officer, and CIC in order to discuss a method of travel control agreeable to all concerned." He indicated some willingness to compromise when he dropped his insistence for a one-kilometer restriction, indicating that a two kilometer radius might be acceptable.

This open-minded approach drew the two camps closer together. Apparently the G2, and the G5 conferred on the matter, and a satisfactory compromise was reached, with the result that the following regulations were adopted by VIII Corps:

"1. Effective this date the following travel restrictions will be enforced in VIII Corps Zone between Division rear and Corps rear boundaries.

"2. No civilian will be allowed to travel beyond the boundary of the Gemeinde where he resides without a written Travel Permit issued by a Military Government Officer. MG will issue travel permits only in cases of individual emergency. Applications for travel permits will be made to the local mayor. MG travel notices to this effect will be posted in all towns.

"3. a. A Gemeinde in Germany is a small geographical area roughly equivalent to a Township in the United States.

"b. The MG travel permit is a standard printed form on which is stated, in English, the time and place the travel is authorized.

"c. Each Civilian in Corps zone will be issued a temporary Registration Certificate by MG (as soon as registration can be completed); this certificate, or the regular identity cards carried by the German individual, will show his place of residence.

"4. No civilian will be allowed to travel from VIII Corps zone forward into a Division zone without prior permission from the Division MG officer.

"5. Any civilian, without an MG travel permit, found traveling beyond the Gemeinde where he resides, at it is shown in his Registration Certificate or Identity Card, will be taken to the nearest MG or CIC Det for further action."

Actually the decision to keep the Gemeinde as the travel control unit did not extend the previously established six-kilometer rule. It was pointed out that persons within the Gemeinde would not travel more than three to five kilometers before crossing into another Gemeinde.[60]

Corps Detention Camp...

On 3 March 1945, VIII Corps headquarters circularized instructions for the establishment of a VIII Corps Detention Camp, apparently based on Third Army's letter dated 2 February 1945, Subject: "CI Instructions for Germany."

The VIII Corps Detention Camp was to provide temporary detention and interrogation facilities to accomodate counterintelligence arrestees from Corps and Division areas. Four categories of persons were to be transferred to this Camp: known and suspected enemy agents; security threats (presumably in the automatic arrest category or against whom there was sufficient evidence of illegal activity

60 Ltr from 208th CIC Det to G2 VIII Corps, 27 Feb 45, subj, "Travel Control and Civilian Registration in Germany; Ltr from G5 to G2 VIII Corps, 28 Feb 45, subj, "Comment on Travel Control and Civilian Registration,"; Ltr from 208th CIC Det to G2 VIII Corps, 2 Mar 45, subj, "Comments on Travel Control,"; Ltr G2 VIII Corps to C/S VIII Corps, 9 Mar 45, subj, "Civilian Travel Policy"; and Notice, Hq VIII Corps, to all units, 13 Mar 45, subj, "Restriction of Civilian Travel," (all in 208th CIC Det Correspondence File Feb-Sep 45 (UNCLASSIFIED), (Kansas City Records Center, Box 25097).
NOTE: Standard Travel Notices in use by CIC in Germany early in 1945 are attached as Appendix 4, Exhibit F. Standard set written instructions given to each Burgomeister early in 1945 attached as Appendix 4, Exhibit G.

to permit trial); those alleged security threats against whom there was sufficient evidence for internment but not for trial; and war criminals.

Further instructions forbade the retention of persons at the Detention Camp for more than thirty days, and made the Counterintelligence Arrest Form (SHAEF AGO Form No. 7) a necessary accompaniment to each individual processed at the camp.

The Arrest Form was made out in quintuplicate, the original and three copies being forwarded with the individual, and the fifth copy remaining in the arresting CIC Detachment's permanent town file. In addition to the four copies of the form, all personal effects of the arrestee were to be sent to the Corps Detention Center with him, and the Arrest Form was to contain a statement "as to the status of the case as it pertained to the arresting unit: "Case closed", "Pending", "Investigation Continuing", or "Additional reports will be submitted." [61]

XVIII Corps CIC: Airfield Security

Security continued to be the main task of the 218th Airborne CIC Detachment. In the period between 26 February and 4 March, daily and nightly checks of the security of installations of Corps were continued, and some activity was undertaken within the areas served by the subordinate units.

Two agents from the 218th CIC Detachment studied the security aspects of the bivouac areas then in use and those proposed for future operations. Captain Dearing made a personal inspection of the 17th Airborne Division Headquarters installations and another agent of the Detachment checked the 13th Airborne Division Headquarters installations. A register of Top Secret documents was installed for documents leaving the Top Secret file room, and the Daily Bulletin carried a notice of instruction about the innovation. Counterintelligence was discussed at several conferences during the period, and security checks of personnel, procedures and places were abundant. Other investigations were carried out also, one involving a hot-tempered Frenchman who threw a grenade during a personal argument in late February. This incident was not significant to security, but the investigation had been requested by a subordinate unit.

In another case liaison with the French Chief of the Bureau Securite Territoire enabled CIC to initiate an investigation of a young blonde girl who had worked as a waitress in a local hotel, but who fled when the Gendarmerie Nationale began

61 Ltr, Hq, VIII Corps, dtd 3 Mar 45, subj: "VIII Corps Detention Camp," in 208th CIC Det Correspondence File, Feb - Sep 45, (CONFIDENTIAL), (Kansas City Records Center, Box 25097).

investigations of collaborationists and suspicious persons. She had fled to Marseille, but, with information furnished by CIC, the French were able to locate her.

There was more to a CIC agent's life than just work -- or just CIC work. There was maintenance to perform on vehicles and equipment. There was Physical Training, five days per week. Some members of the Detachment were taking Glider rides, and others interviewed prospective CIC agents. Four agents traveled to Homilly, France, to attend a two-weeks course in Military Government. Others were on detached service or temporary duty with the 13th Airborne CIC Detachment and the 351st Airborne CIC Detachment of the First Allied Airborne Army.[62]

The 223d CIC Detachment: Rear Areas

The XXIII Corps CIC Detachment in February and March operated far to the rear of a tactical action and were largely unaffected by it. In the two-month period the agents were concerned with the area, roughly, between Arlon, Belgium, through Echternach, Luxembourg, to Bitburg, Germany, and the surrounding territories. Since the Belgian sector of the area had been under counterintelligence control for quite a long time, and since the whole area was scarcely more than twenty-five or thirty miles wide, little new counterintelligence investigating was necessary.

The Detachment, under the command of Major William E. Keefe, was apparently divided into three teams -- two operational teams and one administrative team located at Headquarters. Correspondence of the detachment indicated that the headquarters section covered widely diverse activities ranging from the procurement of interpreters and an unsuccessful attempt to gain a detachment subscription to Stars and Stripes; from screening civilians for employment to borrowing furniture for billets; from security surveys to securing adequate liquor rations.[63]

Except for ten days in March, few reports were filed by Team No. 1, under the supervision of Captain Loran L. Elliott. On 12 March, the team took over in Echternach, facing an immediate problem of what to do with four hundred displaced persons who had eaten extremely little in three days. Over the next few days, liaison was established with various indigenous and U.S. military agencies, control points were checked, the displaced persons moved rearward, civilians were screened, and one Nazi who had denounced Luxembourgers to the Germans was arrested and turned over to Third Army.

---

62 218th CIC Det, Summary of Activities, 26 Feb - 4 Mar 45, dtd 9 Mar 45, in 218th CIC Det Weekly Summary Rpts, Feb - May 45 (CONFIDENTIAL), (Kansas City Records Center, Box 25098).

63 223d CIC Correspondence, Feb - Mar 45 in 223d CIC Det Correspondence File Nov 44 - Oct 45, (CONFIDENTIAL), (Kansas City Records Center, Box 25099).

On 19 March, the team moved into Germany, to Bitburg. Nazi membership information in the vicinity was carded from captured documents and a self-confessed Nazi was interrogated.[64]

Team No. 2, which maintained records from 3 March in this period, began operations in an office formerly occupied by ADSEC CIC Detachment 418-6. One Agent and an interpreter had remained to protect the area and the good will which had been established by the ADSEC CIC Detachment until the Corps team arrived. The take-over was effected by 1st Lt. Jerry P. Frary supervising Team No. 2, and Agents (fnu) Powers and John Neri. The team moved to Esch, Luxembourg, on 5 March. Several deserters from the German Army were picked up and either placed in Prisoner of War channels or, because they were natives to the area and had been vouched for by leading officials in these liberated towns, allowed to remain in their homes. Later the Detachment team moved to Ettlebruck, again taking over from CIC Detachment 418-6 Agents. Four days after that, on 18 March, Team No. 2 relieved Team No. 1 in Echternach.

The team had many false alarms during this time but effected no permanent arrests of counterintelligence interest. They screened 583 persons.[65]

Division CIC Detachments Busy

Although Corps units were not at first affected by the new offensive, CIC units at Division level, which during the previous phase had operated largely under static conditions, again felt the brunt of counterintelligence activities during a fast moving situation.

Two Agents and a Task Force

One of the units which spearheaded Ninth Army's breach of the Roer River was Task Force Byrnes, a highly mobile unit composed of one infantry regiment and one tank battalion. Two CIC agents, Fendall G. Lyons and Sam M. Unger, of 35th CIC, moved with the Task Force, attached to the 320th Infantry Regiment. The accomplishments of these two agents in a fast moving situation are worthy of study.

64 Team No. 1 File, Memorandums for the Officer in Charge, dtd 12 Mar-20 Mar Subj: Daily Report of Activities, s/Loran L. Elliott, Capt, (CONFIDENTIAL), (Kansas City Records Center, CICC 000.4 223d CIC Det Tm #1, Mar 45, Bx 25099).

65 Team II File, Memorandums for the OIC, 3 Mar-21 Mar 45, Subj: Daily Activities Rpts, 223d CIC Det Team II, Mar 45, Box 25099, (CONFIDENTIAL), (Kansas City Records Center). NOTE: There is some confusion about CIC Det No. 418 since it is sometimes indicated that these units were assigned at Theater, and sometimes at Army Group. Calling it, as above, an ADSEC Unit, indicates a Theater assignment.

Task Force Byrnes crossed the Roer at Hilfarth, Germany, on the afternoon of 28 February. Lyon and Unger knew from past regimental experience that the logical place for them was with the regimental command group, close to Colonel Bernard A. Byrnes, task force commander, and the regimental S2, in case the officers had need for CIC effort. The CIC agents also worked closely with the Regimental Military Government Officer.

On To Arsbeck

On the following morning, 1 March, the force attacked northward. During the first halt, a one hour stop at Arsbeck, the CIC agents cleared and secured a house for the regimental staff to use during the interim, placed the few remaining civilians under guarded house arrests for later units to deal with, and confined twenty Dutch civilians, forced laborers, to a single location until a larger Military Government organization could assist them.

The second halt was called at Neiderkruchten. A second Command Post was prepared by the CIC agents, and they assisted Military Government in assembling the remaining 280 townspeople in the church. Military Government read its proclamations to the assemblage and warned of severe penalties for harboring German soldiers and for German soldiers who attempted to escape detection by changing into civilian clothes. One man confessed to being a soldier in civilian clothes and was given the opportunity of presenting his uniform and being evacuated as a Prisoner of War, which he did. The local priest was placed in charge of posting proclamations and collecting arms from the inhabitants. All regular officials had evacuated, and all Nazi records had been withdrawn before the American entry into the area. Papers of all male civilians were checked, and CIC left, on the heels of the task force, for Bruggen.

When Lyon and Unger arrived, Colonel Byrnes already had placed the Bruggen town hall under guard to preserve a considerable store of records. The CIC agents checked the records, and informed Colonel Byrnes that there were none of counter-intelligence interest. One civilian suspect, a teacher who had been deported by the Nazis from Luxembourg because of allegedly anti-Nazi sympathies but who had been permitted, oddly enough, to teach in Germany, was sent back through Prisoner of War channels to Division Headquarters for further interrogation. The remainder of the population was permitted to stay in their homes, and a restaurant owner was ordered to post proclamations and to go from house to house warning the inhabitants to remain at home and not to circulate.

In An Unsafe Area

A young Russian forced laborer in Bruggen, who was proved to have been the sole survivor of an anti-Nazi partisan band that had been led by an Allied pilot, was

of great assistance to CIC. Although the area was not yet cleared of enemy troops, he took CIC agents to the former Gestapo Headquarters outside of Bruggen. The building had been stripped of all records, but about thirty German field packs were found nearby. The agents returned to Bruggen in time to move out with the task force.

The momentum of the drive had increased, and the village of Bracht was by-passed. The next stop for the task force was Kaldenkirchen. No Germans were left in this town, but the streets were lined with Dutch civilians who had crossed the border to view the American advance. Word reached the Command Post that Venlo, a Dutch city north of Kaldenkirchen, had fallen and the task force was ordered to advance to it immediately.

Street-fighting was still in progress when Task Force BYRNES rolled into the city. The CIC agents met a Dutch resistance member on the streets and took him into a nearby house to secure the names of the former Mayor and of the underground resistance leaders. Somehow word had spread of CIC's location, and the three key men arrived at the house within fifteen minutes: Ex-Mayor Bernhard Berger, who had resigned his office in 1942 in protest to German pressures; Captain Peter Kuppers, the underground representative of the free Dutch Military authorities; and Maurice Russell, underground representative of the Dutch civil government headquarters in Maastricht, liberated seat of the province of Limberg. All three had maintained continuous contact with the Dutch Government, had information on the situation in Venlo, and had readied constructive plans for the restoration of order.

The Military Government Officer, Captain McCormick, began collecting the information necessary for his function, and Lyon and Unger informed the Dutch that they would be expected to deal with local traitors and collaborators. With approval of the CIC agents, the Military Government Commander made Berger the new Mayor of Venlo, and then initiated plans for a police force, requesting that names be submitted for approval the following day. Curfew and travel restrictions were set up, and the two CIC agents filed a complete report via radio to Captain John S. Foster, Commanding the 35th CIC Detachment, before retiring for the night. They requested that a CIC Team be sent to the city early in the morning. The total Task Force Byrnes' advance for that day had been more than 35 kilometers, with security at every stop.

The total Task Force Byrnes rolled eastward on the next day, 2 March, and Lyon and Unger left Venlo with the regimental command group. Captain Foster and Colonel Schneider, the Division Military Government Officer, arrived in Venlo early the next morning and attended a conference with the three local leaders, Captain McCormick and the two CIC agents. A list of physical targets was turned over to Captain Foster, and tactical intelligence found at one of the targets by Lyon and Unger was turned over to Division for study.

The Drive Is Stalled

The next objective was Straelen, over the German border and about ten kilometers away. The advance was held up for several hours by German resistance. When the Germans gave way, the Task Force charged on their heels so swiftly that Straelen was ignored for a further objective: Neiukerk.

It was after dark when the regimental command group arrived in Nieukerk, and the CIC agents, the Military Government Officer, and one other officer went to work clearing a group of farm buildings which were to serve as Command Post for the Task Force. In one building, the group burst through the door, weapons ready for action. A rustling noise indicated that the building was inhabited; and one of the group shouted for all civilians to surrender. One came from a darkened room. The noise persisted and the order was repeated, where upon nineteen German soldiers filed out of other rooms, their hands high in the air. The German weapons were found; the other buildings were cleared. The Prisoners of War were herded into an enclosed front yard and guarded until troops arrived to take them away.

Heavy fighting in the path of the advance forced the retention of the Command Post at Nieukerk longer than had been anticipated. The CIC agents sent for the mayor, a former Nazi Party official, the following morning. Since two thousand civilians had remained and someone familiar with the local situation was needed, the agents decided to make the Mayor temporarily responsible for the collection of arms, for the enforcement of travel restrictions, and for the inhabitants' compliance with all security regulations. He was kept under military escort at all times, and was not issued a pass. The CIC agents turned in a report on the mayor which led to his later arrest by a succeeding CIC Detachment.

Despite all the precautions they had taken, Lyon and Unger, exercising hindsight in their report, believed that the retention of the mayor had been a mistake, and that he should have been arrested immediately.

In Nieukirk also, the CIC agents discovered that Signal troops had failed to sever all telephone communications. Immediately, the agents procured a signal officer and some troops and cut every wire that could possibly be used. One person had already called the mayor's house to ask about troop dispositions in the area, but the soldier on duty was security-conscious enough not to divulge the information.

Public buildings, including the mayor's home and the post office, were searched for records, but none of significance were found. The agents gathered 250 displaced persons of many nationalities in one place for screening, and Military Government provided billets to keep them off the streets until they could be shipped to the rear.

On 4 March, the agents moved on to Sevelen, which had finally been cleared of opposing tactical forces. The mayor and the police chief were known to have

anti-Nazi sentiments, and each had held office for more than a quarter of a century. Although these functionaries were party members, both CIC agents and Military Government felt that their reputations appeared to justify their retention in office. They were given full authority for the enforcement of the usual rules and procedures.

In response to a division order for the evacuation of all German males between the ages of seventeen and thirty through Prisoner of War channels, over-zealous troops brought in Germans and also Displaced Persons between the ages of fourteen and seventy. The "weeding out" burden fell on Lyon and Unger. They arranged with the S-2 and with the Prisoner of War Interrogation team at the overflowing Prisoner of War Cage for all persons to be held for CIC-checking at three times during the day. The agents had to make out arrest reports on all those sent rearward, and the inclusion of Displaced Persons into Prisoner of War channels caused the two agents and Military Government some anxiety. Until the order was revoked subsequently, the agents considered themselves severely hampered in the performance of their mission by the writing of arrest reports on persons whom they could not decide fairly to be real security threats.

From 6 March until 10 March, when Task Force BYRNES had completed its operation with the capture of Alspray, a small town near the Rhine River, most of the agents' time was spent at the Prisoner of War Cage. Since most of the operations after Nieukirk involved rural areas, this handicap was not too serious. The two CIC agents went with the regiment into reserve on 10 March, after a hectic, and successful, eleven days on the move.[66]

The Rest of the Detachment

The other agents of the 35th CIC Detachment had their moments, too. On 23 February, two sixteen-year-old Hitler Jugend members were picked up after they had crossed the line into Division area. After extensive interrogation, the two youths signed confessions that they had been sent to spy on troop movements along the Gangelt-Geilenkirchen road. They were sent to Army Interrogation Center.

The Detachment performed routine security duties in a number of German towns, following in the wake of Task Force BYRNES most of the time.[67]

66 418th CIC Det, 12th Army Group, CIC Monthly Bulletin #4, Annex 2, from report submitted by 35th CIC Det, Jun 44 (SECRET), (Staff and Faculty Library).

67 35th CIC Det, Daily Briefs for G2, 23 Feb - 3 Mar 45, in 103d(sic) CIC Det. History Jun 44 - Jan 45(sic), (UNCLASSIFIED), (Kansas City Records Center Box 25096).

1st, 4th, and 5th CIC Detachments

The 1st CIC Detachment continued its routine activities, gradually assuming counterintelligence control of additional towns in their sector. Aside from assisting a First Army officer in infiltrating an agent across into German territory[68] and clipping the wings of thirty-two pigeons, agents of the Detachment reported no extraordinary activity for this two-week period.[69]

The 4th CIC Detachment also continued in its static area[70], but 5th CIC Detachment, in the period from 23 February to 7 March, moved from a static situation to the offensive with its Division. Early in the period, the Control Line was transplanted to four bridges over the Sauer River. Twenty civilians were placed under house arrest for violating circulation restrictions. Two ex-German soldiers were sent through Prisoner of War channels, and two others were sent rearward as security threats. Three hundred seventy-five persons were screened, including ten civilian employees of the Army. Security surveys were completed in nine villages and one case of suspected sabotage was investigated with no evidence of enemy saboteur activity apparent. Toward the end of the period, the Division began its advance and, once again, the Detachment, under Captain Lyncon B. Allen, was hard put to provide security for the military in a swiftly changing situation.[71]

9th CIC Detachment

Agents of the 9th CIC Detachment arrested the
and transferred her to Army Interrogation Center as a security menace. The female , who spoke several languages, including English, had served as a teletypist with the Luftwaffe Signal Corps and had never been discharged. She knew a great deal about Signal equipment but, when questioned about her activities, refused to give even general information, saying it would be espionage against the German government.[72]

The 13th Airborne CIC Arrives

The 13th Airborne CIC Detachment, under 1st Lieutenant Frank Popisil, had just arrived in its area of jurisdiction, north of Paris, France. Agents spent much of their time familiarizing themselves with the territory. They scanned local periodicals for information of counterintelligence interest and performed routine security missions.[73]

The 14th Armored CIC Detachment and Evidence

Horace L. Hahn, 2d Lieutenant, Commander of the 514th CIC Detachment, launched a campaign during this period to educate combat officers in correct procedures for preservation of evidence.

Recognizing that many of the combat personnel who would be the first to discover acts of a subversive nature and many of the S2's and unit commanders who would be called to the scene were not familiar with methods of observing, protecting, preserving, and collecting evidence, Lieutenant Hahn arranged a series of conferences, in which members of the Detachment attempted to acquaint various personnel of all echelons in the Division with correct procedures. Forms for the recording of information about such incidents were prepared and supplied in liberal quantities to the units in the Division. Unit commanders were also shown the necessity for prevention of souvenir-hunting which often caused the compromise of evidence and important tactical data. The agents found a marked spirit of cooperation among the individual receiving the instruction.[74]

29th CIC Detachment: Fortuitous Fortnight

During the first two weeks of the offensive, the 29th CIC Detachment performed a variety of tasks. In a log which refers to their activities during this period as "Operation Grenade 1," is a summary which shows the agents screened approximately 305 civilians, arrested five wireless-telegraph agents (aided in two cases by the 175th Regiment), arrested one SHAEF black list personality, apprehended two others in the automatic arrest category, and arrested two security threats and five suspects. In addition to these arrestees, thirty-five other investigations were run, and fifty-seven target searches were completed. Ten informants were developed and two security checks of Command Posts were made. Seventeen agents from the Detachment worked in German towns.[75]

How Five Wireless Transmitter Agents Were Captured

The most important investigation conducted by the 29th Detachment involved five female wireless transmitter agents. The first break came in Muenchen-Gladbach, when one of the agents turned herself in to American authorities on 3 March 1945, stating she was a trained radio operator who had been given a tactical reporting mission in a stay-behind capacity. The girl named four other women as agents and gave the localities in which each was scheduled to operate after the area had been overrun by American forces. The girl arrested claimed she had not sent any messages, having been instructed by the Germans to begin transmitting on 6 March.

She led Detachment Commander, 1st Lt Ellis O. Mayfield, to a second agent the same day. This agent said she had burned her codes and buried her radio set, and, while admitting her training, declared that she had not transmitted any tactical information.[76]

The following day, Lieutenant Mayfield arrested a third agent at Suchteln. She had reported in to the Germans on 20 February and still held her codes. Her radio, too, had been buried in the backyard of her home, and she claimed not to have given the Germans any information.

A fourth agent was arrested on 5 March by Lieutenant Mayfield in St. Hubert by Krefield (presumably at least one kilometer forward of the advance elements of the American forces). She claimed she destroyed both her codes and her radio, and had not transmitted any information.

The fifth agent was not located so easily, for CIC had only her name for identification.[77] CIC agent Gordon M. Anderson was assigned to locate this girl, who had the very common German name, Anneliese Schmitz.

On 5 March, Special Agent Anderson and Interpreter Pfc Serene J. Hepner, with the first female German agent for identification, proceeded to Krefeld, where

2624

CONFIDENTIAL

Anneliese Schmitz was believed to be. The Schmitz home had been bombed out two weeks previously, it was discovered, and inquiries in the neighborhood and in a nearby air raid shelter failed to produce a lead. At a second shelter, a bunker, a person who knew Anneliese Schmitz directed the searchers to a third bunker. This lead produced a girl with the same name, but who was not the wireless-transmitter operator agent. However, this girl had heard of another Anneliese Schmitz who was staying in a different bunker. Again, the agent and his assistants located a girl with the name who also was not the agent. This girl, too, had heard of a girl with the same name, and she promptly led the trio back to the first Anneliese Schmitz they had found.

Anneliese Schmitz #2 then suggested that the wanted agent might be located through the records of the Deutsches Arbeitsfront (German Labor Front) (DAF) if they could be found. After making a number of inquiries, the DAF office was located. It was badly damaged, but the records were intact and, after searching several sources, a card file was found and a card with the photograph of Anneliese Schmitz-the-agent was discovered. The only other information was background data, excluding address.

Anneliese Schmitz #2 was recontacted and shown the card but could give no further help. The searchers then went to the agent's birthplace, and in one bunker found several people who claimed to have seen her a few days before. The first lead brought the searchers to a house located on the Rhine River. Here Anneliese Schmitz #3, who bore a marked resemblance to the person sought after, had lived before she evacuated across the Rhine. Conversations with this girl's brother established the fact that she was not the one agent Anderson was looking for, and they retraced their steps. This time they found a girl who had gone to school with the agent-at-large. The last time the agent had been seen was two days previously, when she had left the bunker. Checking the area, the searchers located a home where the girl and her mother had stayed one day before. The chase was getting closer. A man staying there had helped Anneliese Schmitz and her mother move to Weierhofstrasse 101 in Krefeld. The man did not know her name; he identified her from the photograph on her DAF card. The group went back to Krefeld and found Anneliese Schmitz #4, the Anneliese Schmitz. The radio operator identified her. Her radio set was hidden in the basement and it was taken by the CIC agent, as was the fifth agent, back to the Detachment.[78]

Anneliese Schmitz was sent to Armor (XIX Corps) Interrogation Center, accompanied by her radio transmitter and receiver, in the same manner as the four agents arrested before her.[79]

2625

Because Lieutenant Mayfield, with the cooperation of Major Gagan of XIX Corps CIC Detachment, had preserved the secrecy of the investigation by high classification,[80] not only was the immediate investigation successful, but two of the women agents were later used by SCI to transmit misleading information to the Germans.[81]

Plaudits and Post-Developments

Special Counter Intelligence made some very favorable comments about CIC ability after this episode. They were extremely pleased when they were handed a complete case, "with none of the component parts missing," and praised the "invaluable" help given by CIC during the transition of the cases to Special Counter Intelligence hands. Perhaps this comment summarized best how excellently CIC had operated:

"Our British associates at this (21st Army Group) Headquarters were greatly impressed by this display of efficiency, and unanimously acclaimed this work as a model job.[82]

But Special Counter Intelligence and the British were not alone in their praise of the efforts of Pfc Hepner, S/A Anderson and the newly-promoted Captain Mayfield. The Commanding General of XIX Corps forwarded a joint commendation for the three men to the Commanding General, 29th Infantry Division, Major General C. H. Gerhardt. General Gerhardt noted the commendation "with pleasure" and placed it into channels to the G2.[83]

Gordon M. Anderson was awarded a Bronze Star for his part of the investigation,[84] and, as an interesting sidelight, a Special Counter Intelligence representative later told Captain Mayfield that the two girl agents exploited by Special

Counter Intelligence to send erroneous messages were awarded the Iron Cross, Second Class, by the Germans "for their work in furnishing much valuable information to the German Army and for their bravery in operations behind the American lines."

These awards were the second and third Iron Crosses which Captain Mayfield said had been awarded to former enemy agents operating under control of American Intelligence.[85]

Who Said "Welcome Home?"

During this period the 45th Division G2 called in the 45th CIC Detachment to investigate the extent of the distribution of an official pamphlet entitled "Welcome Home," and the reaction of the men in the Division to it.

A package of the documents had arrived at the Division's APO in pouches which received first class mail handling. The Technician in charge did not remember where the documents had come from, but he remembered that batches were separated and tied and marked for various units within the Division. From past experience, he judged that the documents would have come from Seventh Army or APO 790 in Italy, a publications organization.

In the units which had received the pamphlets, each of the S2s had held up distribution. Some sent them back to the rear of Division, one copy to be given each man returning to the United States on temporary duty or for other reasons. Others merely held them at Regiment indefinitely. No general distribution had been made. Word-of-mouth "advertising" had made some soldiers aware that the pamphlets existed, but none had been handed out to substantiate the rumor.

CIC recommended that the policy of keeping them at Division rear should be followed and that the pamphlets should be disseminated only to those few who were soon to be welcomed home to the United States. They reassured the G2 that nothing serious had developed but suggested that further issuance of documents should be under control of the Division staff.[86]

85 29th CIC Det Informational Memo to G2, dtd 16 Apr 45, in 29th CI Det Corres. Files, Jun 44-Sep 45 (Unclassified), (Kansas City Record Center, Box 23094). NOTE: It is presumed that the information of the awarding of the Iron Crosses was broadcast to the recipients, since they were located behind American lines.

86 Ltr, 45th CIC Det, dtd 27 Feb 45, Subj: Investigation on Receipt and Distribution of WD pamphlet entitled, "Welcome Home," in 45th CIC Det Corres. File Folder, 2 Nov 44-Mar 45, (CONFIDENTIAL), (Kansas City Record Center, Box 45121).

The 63d CIC Detachment: GI Troubles

The 63d CIC Detachment under the command of 1st Lt. Clinton R. Weidner, operating in the province of Lorraine, France, initiated a number of cases involving Nazi collaborators, informers, and other pro-Nazis, but left the area before many could be concluded. Two cases concerning U.S. soldiers arose: one involving a deserter and the other, a conscientious soldier with an inquisitive pen-pal.

The deserter, a private belonging to the 44th Infantry Division, who had roamed undetected from 7 December 1944 until 4 March 1945, was apprehended when he attempted to pose as a CIC agent. He had written a note authorizing himself to investigate CIC and Civil Affairs activities, intending to use it to prevent his arrest by MP's. CIC turned him over to the Provost Marshal.

In the other case, a soldier turned over a letter to the Detachment, through channels, in which a correspondent from the U.S. had asked "a list of questions of a suspicious nature." The letter and a report of interview with the Pfc was forwarded to MIS, Washington, D.C. and the recipient was told to act as if he had never received the letter.[87]

69th CIC Detachment: Routine Work

The 69th Infantry Division's G2 After-Action Report summarized the activity of the 69th CIC Detachment during the "attack phase" of 1 March to 8 March rather simply, noting, "Our CIC Detachments operated in a normal manner of checking and screening civilians. Many deserters were screened from civilians and valuable information of enemy agents secured.[88]

The 87th CIC Detachment: Close Call

The 87th CIC Detachment had little excitement to report--with one exception. A German shell scored a direct hit on the billet of Agent Richard H. Beatty, who managed to escape unscathed.[89]

One investigation which could not be terminated conclusively dealt with a German girl found in a Bunder-Aid Station with four German soldiers. She had a letter requesting information about the status of her espionage courses at a

Bund Deutscher Madel school. Under interrogation she claimed that she had never taken any such courses, and that she was acting as nurse, housemaid, and cook for the four soldiers -- one of whom was her fiance. The Prisoners of War verified the latter statement, and investigation by the Detachment revealed that her father had been in trouble with the German authorities for expressing anti-Nazi sentiments. She was evacuated to Army Interrogation Center.[90]

This Detachment found that the policy of grouping civilians in a few houses, under guard, and segregating them from the troops brought good results. Experience also taught them that "if the town leaders are properly instructed and adequately warned that they will be held personally responsible for any acts on the part of civilians that might menace the safety of our troops, the town leaders will report any suspicious or strange persons in their midst.[91]

503d CIC Detachment on the Move

Third Armored Division, under VII Corps, was a part of the offensive force surging into the Rhineland. The 503d CIC Detachment moved with it.

On 27 February in a church in Berrendorf, ninety-two members of the Volkssturm were arrested as Prisoners of War. The two top leaders had fled, and the organization was left under the command of the Number Three man, an elderly gentleman. These members of the Volkssturm had done no fighting against the Allies, and their arms remained stored. Because of the swiftness of the advance, members of the Detachment merely listed the names of the arrestees, noting on the Arrest Report, "a recheck of names against lists is suggested as screening was done under fire, and under unfavorable conditions.[92]

The taking of other towns from the time of the Third Armored attack across the Roer River through 2 March created little or no problems. Birkesdorf, first entered by elements if the 104th Infantry Division, had been completely evacuated. Documents found there were sent to the Commanding Officer of the 207th CIC Detachment. Arnoldsweiler was also evacuated, and Military Government decided to use it as a collecting point for Displaced Persons.

---

90 87th CIC Det Daily Activities Rpts, 1-31 Mar 45, in 87th Inf Div G2 Journals for Mar 45 (Unclassified), (DRB etc.).

91 87th CIC Det Counterintelligence Report #5, 21 Feb - 5 Mar, s/Sam E. Harwell, 1st Lt, CIC, Comdg, 95th (sic) CIC Det Reports, Folder of Bi-Weekly Reports, Sep 44 - Jun 45, (Unclassified), (Kansas City Records Center, Box 25095).

92 503d CIC Det Arrest Report, dtd 27 Feb 45, in 503d CIC Det Situation Reports, Oct 44 - Jun 45 (Unclassified), (Kansas City Records Center, Box 25104).

The 200 civilians and Displaced Persons in Morschenich were placed under the guard of Military Government Police. There was no Military Government Detachment in town, but CIC Agent Collins and a Military Government Lieutenant screened civilians there, and arranged the posting of proclamations.

In Glesch, CIC Agents Porter Travis and Bruno Stramel screened civilians while dashing from cellar to cellar under enemy fire, and in Bergheim, the county capital, Capt. John Heminway of the 207th CIC Detachment and Lt. Philip Udoff and Detachment Commander Theodore M. Black, of the 503d CIC Detachment searched Kreise Headquarters in that locale, turning up some records. Some were forwarded to the 99th CIC Detachment, obviously slated for the take-over assignment, while those records of "bigger-picture interest" were taken by Capt. Heminway to Corps Headquarters, CIC. Captain Black pointed out that, "Such organized work as has been done along these lines (Civilian Security Control) is of a transitory nature, and probably will continue until the lines pass farther forward and static or semi-static Military Government supervision is provided.[93]

Between 2 March and 7 March, seven more towns fell under Third Armored CIC control, but in each instance the reports indicate that only minimal security could be provided. Volkssturm members and other security threats were gathered together and placed under guard; key offices were checked, mostly with negative results; officials were screened sketchily; and warnings were posted.[94]

Incomplete Reports

Arrest Reports on individuals made their way rearward, sometimes directly from Division to Army. Many of these reports were found lacking in sufficient evidence on which to conduct an interrogation. Four reports from one agent of the Third Armored CIC Detachment were poor enough to cause Colonel B.A. Dickson, G2 of First U.S. Army, to return the reports to the G2, VII Corps, explaining that "on the basis of these Arrest Reports, which represent the only information contained on these cases, it is impossible for CIC personnel at Army to do anything other than treat these individuals as displaced persons. Reference in two of these reports to 'SOP for further screening' is not clear and gives no information whatsoon which to conduct an interrogation at this level." Colonel Dickson requested that

93 503d CIC Det, Consolidated Situation Report, dtd 2 Mar 45, to CO 207th CIC Det, (CONFIDENTIAL), (Kansas City Records Center, Box 25104).

94 Ibid., dtd 7 Mar 45, to CO 207th CIC Det in 503d CIC Det Situation Rpts, Mar 45.

arrestees of the type described be held at Division or Corps level until "screening or investigation produces evidence on which some action can be taken by Army."[95]

Communications Zone CIC: Not Much Ado About Anything

CIC personnel with Advance Section (ADSEC) and Base Section (BASEC), Communications Zone (COMZ), Detachments experienced, generally, an uneventful February. Monthly Information Reports from Section "B" of the 419th CIC Detachment, commanded by 1st Lt. Meredith R. Wilson[96] Section "H" of the 420th, under Capt. Donald M. Graham[97]; Section "K" of the 421st with Capt. Jesse F. Gordon as commander[98]; Section "G" of the same Detachment led by 1st Lt. Elbert M. Ryan[99]; Section "P", "R", and "Y" of the 424th with 1st Lt. Gordon C. Abrams[100], Capt. Earl S. Browning, Jr.[101], and Capt. Julian P. Prescott[102], commanding respectively; and Maj. John C. Schwarzwalder's 429th CIC Detachment[103] all of which were ADSEC CIC units--revealed a dearth of investigative activity. Since most of the ADSEC CIC Detachments were engaged in Travel Control on the German border or near to it, activity in the main was limited to patrolling the Counterintelligence Control Line and adjacent roads, checking posts manned by indigenous guards, and screening of arrestees. This screening was rather superficial for, as Section "G" reported, "No investigations or cases, as such, are handled by this section, the individuals being turned over to the proper military authorities." In most cases, suspect enemy agents were turned over to the nearest Army or Corps CIC Detachment.[104]

Occasionally, as happened on 10 February during screening being conducted by Section "L" personnel from the 422d CIC Detachment, a case developed at this level. In this specific instance, 2d Lt. Kjartan L. Christopher of Section "L" recognized one Russian in a group of five civilians who had been brought to the Verdun, France, CIC Office by Civil Affairs, Etain, for screening. In January, Lt. Christopher had considered the Russian to be a Displaced Person and had turned him over to Civil Affairs in Verdun for disposition.

Lieutenant Christopher not only recognized the Russian, but he also noticed a variance between the man's January story and the new one. When the report of the original interrogation and the "wanted" files were consulted, it was noted that the five Russians fitted the descriptions of Russian Prisoners of War who had escaped from a neighboring enclosure. The Lieutenant's alertness and his accurate files enabled five escapees to be returned to the Prisoner of War Enclosure.[105]

BASEC CIC Detachments on Routine Duties

Eleven reports on Normandy, Oise and Seine BASEC CIC Detachments indicated a similar uneventfulness in their areas during February. These CIC units were not concerned with Counterintelligence Control Lines, but were generally performing more investigative-type activity. They screened indigenous personnel for employment by U.S. Army agencies, conducting background investigations before sanctioning the employment of anyone. They also made security surveys and inspections of port installations and pipelines, and maintained liaison with local civilian and military agencies.[106]

Civilian Travel Restrictions Lifted

On 25 February, after the army offensive was under way, civilian travel restrictions were discontinued along the Meuse River. Freedom of movement was permitted from the rear of existing Corps areas in the First Army area to the seacoast, greatly relieving the pressure upon the Belgian population all along the front.

As the offensive continued, Twelfth Army Group warned subordinate units that the most effective means available to enemy intelligence would be that of employing well-prepared stay-behind agents in the larger Rhenish cities with the mission of supplying tactical information at first, and subsequently providing strategical data.[107]

CONFIDENTIAL

Chapter 3

The Rhine is Reached and Breached

The Rhineland was being finally lost by the enemy, and with it, the greater part of three German Armies. On 7 March, an American column thrust down the natural corridor leading southeast from Euskirchen, battered its way through a German Corps, and seized the Rhine-spanning railroad bridge at Remagen virtually intact. In two days, the first American bridgehead east of the Rhine had been expanded to a depth of three miles. In Rhineland battles up to 11 March, the enemy had lost nearly 120,000 prisoners to Allied Armies in the area.

On 15 March, in the Saar, the Sixth Army Group began an offensive which was to crumble all enemy resistance west of the Rhine.[108]

Twelfth Army Group: Frontier Travel

As the Armies of the Twelfth Army Group pierced further into German territory, increased attention was directed toward the establishment of the CIC Frontier Security Control system. Twenty-three posts were fixed inside Germany within five kilometers of the border and at strategically effective points. These posts were under seven CIC Frontier Security Control teams, each team being responsible for the operation of three or four posts.

Two battalions of French troops, 200 Luxembourg policemen, a battalion of Belgian Fusiliers (complemented by a U.S. Army field artillery battery) and approximately 500 Dutch policemen and custom guards manned posts and patrols along the sections of the German border which faced their respective countries. Unfortunately, these were not enough, and Twelfth Army Group reported, "The rigid frontier control contemplated has not as yet fully materialized since the total manpower necessary ...has not been made available.[109]

A Vital Function of Group Headquarters

One of the most important tasks performed by the Office of the AC of S, G2, Headquarters, Twelfth Army Group, was the preparation of personality indexes. This material was gathered from the Twelfth Army Group file of the SHAEF Personality Card Index for Germany and from all cards prepared at Group Headquarters.

---

108 Op cit, Eisenhower, pgs. 378-380; and Weekly Intelligence Summary, SHAEF, Off/ACofS, G2, No. 51 dtd 11 Mar 45, Part I, (SECRET) (Staff and Faculty Library)

109 CI Periodic Rpt No. 15, for March 1945, Office of AC of S, G2, s/Edwin C. Lee, Lt. Col., Open Reports L-502 (3) Mar 45, (Unclass) (Departmental Records Branch, AGO, Alexandria, Va.).

The listed personality's "Name, Town, Organization or Rank, Rank or Position, and SHAEF classification . . . ."was given, and groups of personalities were divided into one type of list by Wehrkreis, [110] and in another by nationality. The latter list involved only non-Germans.[111]

Distribution was made to all Headquarters of Army level or higher. Army Headquarters whose subordinate units would be directly concerned with any territory within the Wehrkreis would receive fifteen copies of that personality index list, enough at least for one copy to go to each CIC Detachment. Other headquarters, not concerned with the area, would be sent one or two copies of the list. Eighteen copies were forwarded to Sixth Army Group and two to the British Twenty-first Army Group. It is not known whether these Groups prepared lists of their own or depended exclusively upon the SHAEF offering. Copies of the Twelfth Army Group listing were also sent to the G5 of Twelfth Army Group, apparently for use by subordinate Military Government Headquarters.[112]

Without modern tabulation machinery, this task would have been insurmountable. Thousands of names and pertinent data on each was collected by units in the field and transmitted, through channels, to the various research agencies. The information was punched in code on cards. From these, mimeograph stencils were made, bearing the coded information on a single line. The desired number of copies were produced from these stencils, and then collated and stapled before being distributed.[113]

First Army CIC Detachment

Between 7 and 25 March, agents of the 301st CIC Detachment turned twenty-one suspects of one type or another over to the First Army Interrogation Center, most of whom they had received from subordinate CIC Detachments, in the thick of the offensive.

113 See Appendix II with exhibits "A" and "B" for Twelfth Army Groups established procedure for coding for Machine Records, and for samples of the finished product by territory "A" and by nationality "B", 207th CIC Det 1944-1945, (Confidential), (Kansas City Records Center, BX 25097); and, Circular 20, Hq, 12th AG, dtd 7 Dec 44, Subj: Machine Recording of SHAEF Personality Index Cards for Germany, for more information.

Six proved to be legitimate Prisoners of War, although some of them had been members of the Schutz Staffeln (SS or Protective Echelon), the Sicherheitsdienst (SD, or Security Service) and the Kripo (Criminal Police) before being committed to purely military activity against the advancing Allies. Two, who were guards in Rheinbach Prison had mistreated prisoners, were referred to the Inspector General. Eight were Gestapo and Kripo men from Cologne and were interned subsequently by the Provost Marshal, First U.S. Army. Three were captured "Gamma"[114] swimmers, who were sent rearward to Twelfth Army Group Interrogation Center. One, who was found to be a French national who informed for the Gestapo in Cologne, was turned over to French authorities, and one, suspected of complicity with an SD informer, was still under investigation as the period ended.

Exactly how much investigation was performed by agents of the 301st CIC Detachment was not apparent in the reports. Indications are that the Army Detachment personnel were used as augmentation teams in areas where counterintelligence problems were too large for the responsible Detachment, or concentrated or follow-up investigations of suspects developed at lower levels.[115]

The German Paracontraption

At this time First Army reported the German development of a parachute-dropped shell-shape container which could carry three agents safely down to earth. The German Intelligence Service had already used the device to float nine agents into the British Twenty-First Army Group area successfully.

While the device was difficult to camouflage or conceal, its invention made it possible for agents untrained in parachuting to be dropped in the rear of Allied areas.[116]

An Important Development: Security Troops

Indications of the establishment during this period of an organization of Security Guards to augment CIC Detachments was reported from two different sources. Based on the belief that enforcement of security controls would become more difficult as the

114 German Frogmen saboteurs.

115 First U.S. Army Interrogation Center, Bulletin No. 8, dtd 1 Apr 1945, (SOURCE: Kansas City Records Center CICC-C .000.4 207th CIC Det First Army File Mar 44 - Apr 45. Box 25097), (Confidential).

116 1st U.S. Army, G2 Estimate #74, dated 14 Mar 45 in Opns Rpts (L-595, (17) 15 Mar 45, No. A7 611099) (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.); Incl 10 to G2 Periodic Report #73, VII Corps dtd 15 Mar 45 in Opns Rpts, L-557, FUSA (13) 15 Mar 45 No. A7 611115) (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.).

battle area advanced and life in German towns to the rear resumed a more normal pattern, additional troops were detailed for use as Security guards in the First Army area.

In Third Army area, a command directive was published which provided for "the creation of Security Detachments of two officers and ten enlisted men for each Counter Intelligence Corps team within the Third Army Area," with the objective of relieving CIC detachments of considerable administrative and housekeeping duties, so that agents could concentrate on their primary mission of apprehending enemy agents and personalities of CIC interest."

What specific functions these troops performed or, for that matter, whether they ever were readied in time to be of value is not revealed by available records. But it is significant that high level commanders recognized the necessity for relieving CIC agents of tedious and time-consuming duties which interfered with the efficient performance of their mission.[117]

Third Army Counter Intelligence Corps Detachment

The 303d CIC Detachment, in its April 1945 Information Report, revealed the change in CIC operations in conquered, as opposed to liberated, areas.

Where CIC operations had been conducted openly in France, Belgium, and Luxembourg, with the aid of local inhabitants and security forces, they became nearly covert in Germany. All identification of CIC was removed from vehicles, personnel, and offices. The "hostile populace" did not cooperate as willingly as the liberated peoples had, and it became necessary to "establish confidences, create an informant system, and to rely upon our previously created black and white lists; plus captured party, military and government records as a basis upon which to establish counter-intelligence records."

The swift movement of Third Army through the Rhineland made it "practically impossible to effect a complete and long-range counterintelligence coverage. Documents of counterintelligence value were uncovered in such quantities that there was no time for local evaluation, and it was deemed impracticable to remove them from the locale to which the records belonged. Consequently, records were sealed at the place of discovery and a record made of the location.

117 First U.S. Army Counterintelligence Periodical Rpt #19, dtd 24 Mar 45, in 207th CIC Det First Army File (Confidential), (Kansas City Records Center, Box 25097); and Third U.S. Army After-Action Report, G2, (Unclassified), (Staff and Faculty Library.).

Third Army CIC Detachment reported military security was its primary function during the period of advance. Agents concentrated on jailing black list personnel, and on investigations of both denouncers and informants since the guilt of the one was largely dependent upon the integrity of the other.

Displaced persons, civilians judged to be security threats and sent to the Prisoner of War Enclosures, and suspected enemy agents were plentiful during the period--too plentiful. To add to the problem, agents were still careless about filling out arrest reports and memorandums in spite of numerous reminders; in fact the Third Army Provost Marshal estimated that fifty percent of the civilian security-threat suspects were arriving at the enclosure with incomplete reports, thereby forcing him to issue orders that such persons would no longer be accepted. The vast numbers of persons in each of the three categories made it necessary that field screening procedures be curtailed. Only suspect enemy agents, who were sent to Third Army CIC Interrogation Center, received careful interrogation, first by MII personnel assigned to aid the CIC interrogator because of the heavy load (as many as sixty-five suspects per week), and then by the CIC specialist.

With the increase in importance of counterintelligence operations in this phase of operation, the Interrogation Center passed to the direct control of G2 Security (CIB) and CIC personnel resumed combat CIC operations.[118]

Research Opened to All

The vast amount of data which had been collected at the Army Counterintelligence Research Center - a central collection agency, peculiar to Third U.S. Army- included much information of a technical nature, and the facilities of the Center were, at this time, made available to any authorized officer or enlisted man from the Engineers, Post Maintenance, Military Government, Signal or Ordnance. Signal and Ordnance Corps took full advantage of the opportunity by stationing a representative at the Center.[119]

Seventh Army CIC Detachment

No enemy agents were arrested in the Sixth Army Group area during the semi-static first fifteen days of March. The Seventh Army attack which began on 15 March quickly changed this situation, however, and in the last part of the month, nine enemy agents were arrested, seven for espionage and two for sabotage. One of the espionage agents, holder of a German Iron Cross First Class for his exploits behind Allied lines, was not really worthy of the honor. A German deserter had reported

118 303d CIC Det Monthly Info Rpt, for Mar 45, dtd 9 Apr 45 (Conf), (Staff and Faculty Library.).

119 Third U.S. Army After-Action Report, G2 (Unclassified) (Staff and Faculty Library.).

2637

this "hero" as having accomplished many successful line-crossing missions. CIC arrested the agent and discovered that he had deceived only his employers. He had hidden in a relative's home, near the line, and called upon his imagination for his tactical espionage reports.

There were many signs which pointed to a befuddlement of the German Intelligence Service regarding the tactical situation. High-ranking Prisoners of War complained about the poor quality of intelligence information that was being submitted to tactical commanders. Captured maps and reports showed a lack of knowledge of the Allied units facing the German forces. This lack of German Intelligence Service activity was not judged by Seventh Army CIC as a sign of indifference but rather as an indication that interest was being concentrated upon long-range plans. Parachute agents and stay-behinds were the center of attention, and training for such missions had been accelerated. It was becoming apparent that Nazi Propaganda Minister Goebbel's "Wehrwolf" talk was not much more than talk. Plans had been devised, but the Germans had run out of time before they could be put into effect in the Rhineland.

The Doubled and Redirected Agent

A German radio-operator-agent arrested during the period claimed to be a Communist of long standing who had deserted the German Army only to be imprisoned by the Russians. The Russians had released him and had sent him on a parachute espionage mission into Berlin where he was arrested by the Gestapo and forced to continue contact with the Russians. Finally he was given a stay-behind mission in Seventh Army area. He was captured by the Americans before he could transmit any information of interest.

Espionage Agents, Junior-Style

Two youths, the older age 16, were arrested initially as vagrants for travelling without papers of any kind. They said that a Wehrmacht officer had ordered them to cross into Allied territory and to ask civilians questions about the strength and types of American troops and vehicles. They were given no training and had no cover story.

Military Government Almost Appoints a Saboteur

Sabotage agents were generally of a higher type. Of the two arrested during this period, one was picked up as he made his way, in civilian clothes, back to his camouflaged cave. The other, a Polish national, was a Military Government assistant who had been considered for the post of mayor of the town by that agency. He confessed to CIC that he was to sabotage U.S. equipment and kill U.S. soldiers at night.

Arrests Mushroom

On 22 March 1945, the 307th CIC Detachment received a letter requesting an interview with an intelligence officer and stating that the writer possessed information of importance for the High Command of the Armed Forces. Adhering to the writer's desire for a discreet approach, contact was made under cover of a search for billets. The form and style of the letter indicated that the writer had an intelligence background, but it was considered inadvisable to arrest him outright since he might have been a decoy for another wireless transmitter network operating in the area. Until this factor of doubt was removed, the writer, a German national forty-nine years old, was located covertly at his residence first and later was requested to contact an undercover CIC officer on the street during regular civilian circulation hours.

A high-ranking civilian official in the Abwehr, this German had organized a network of three wireless transmitter stay-behind agents several months before Allied entry into Germany. Test broadcasts from the agents had been completed in February at which time they were instructed to camouflage their radio equipment until an opportune time.

The organizer, under interrogation, named the three stay-behinds and gave the code of the operator at Kaiserslautern. He did not know the codes of the agents at Oberweiler and Einoed-Zweibruecken. The three stay-behinds were picked up before the end of March.[120]

Ninth Army CIC Detachment

While Ninth Army was preparing to lead the attack of American Forces against the enemy, the 309th CIC Detachment had as its main concern the security of the build up. After the push from Holland to the Rhine River started, the agents were occupied by a variety of investigative activities. Some of these were outside the CIC mission, but as often happened, the task fell to CIC mainly due to the absence of another investigative agency. One investigation in this category concerned an attempted fraud.

Civil Affairs in Maastricht, Holland, received a claim for 897,398.48 Belgian francs from a contractor, for materials he stated American forces had obtained from his depot in Belgium. In the course of the investigation Agent Lawrence J. Tess of the 309th CIC Detachment discovered a verified copy of a contract between the German government through the Organization

120 307th CIC Det Monthly Information Rpt for Mar 45, dtd 22 Apr 45, in 307th CIC Det Monthly Information Rpts File, Apr 44-Jan 46 (CONF) (Kansas City Records Branch Box 25099); and G2 History, Eleventh Army Operations in Europe, 15 Aug 44- 8 May 45. Part VIII, 1-31 Mar 45 (RESTRICTED) (Staff and Faculty Library)

construction company and evidence of payments. This information enabled Civil Affairs to disapprove the claimant's request for reimbursement.[121]

The 309th CIC Detachment's most productive case, however, concerned several stay-behind agents, captured as the result of a lead turned up during a special overall security mission in XVI Corps area.

On 13 March, the first day of the Corps-wide security mission, agents of the 508th CIC Detachment arrested a suspect and sent him to Ninth Army Interrogation Center. After three days of questioning, the arrestee revealed information about a carefully concealed hideout in dense woods near Hinsbeck, Germany.

The following day, 1st Lt Richard C. Guinan and five agents of the 309th CIC Detachment, guided by the arrestee, went to the location, but had to probe the earth with bayonets before they could find the trap-door entrance which had been sodded over for concealment purposes. Two stay-behind agents were captured, and a twenty day store of food and liquor and substantial amounts of sabotage equipment were found in the bunker. The bunker, completely underground, was ventilated by means of a pipe which was surfaced in an old hollow tree. The suspect had been the contact for the group, and the owner of a farm in the vicinity was arrested for providing the team with water, though he claimed to be unaware of their mission.

Later the same day, members of an Ordnance Battalion of the 8th Armored Division had arrested two men in Waffen SS uniforms who immediately revealed their connection with the stay-behind teams and said they had been sent out to secure whatever supplies were available in the area.

The 508th CIC Detachment had, in the meantime, received from the 84th CIC Detachment a German cook who was a former employee of a construction crew which had built some of these camouflaged hideouts (the Germans called them "Stuetzpunkte" or " Strongpoints") for sabotuers or local political exiles to operate from or to hide in when the Allies overran the territory. The ex-cook led agents from the 509th CIC Detachment and MII personnel to a hideout he remembered. Three more German agents were captured here, and, in addition to findings similar to those produced by the 309th CIC agents' raid, a map was discovered which showed the location of five more bunkers.

---

121 309th CIC Detachment, Ninth U.S. Army, Monthly Information Report for March 45, dated 1 May 45 (RESTRICTED)(STAFF AND FACULTY LIBRARY)

Agents of the 508th CIC Detachment were able to follow through on the investigation because the "strongpoints" were in the neighborhood. Two of the hideouts were found flooded, and a third was unprovisioned. The installation in Goch, Germany, was provisioned, but had been evaucated of Personnel. The fifth could not be located during a three day search.[122]

The Gift, Not the Giver

Although the Corps-wide security mission had precipitated the first of these arrests, the commander of the 508th CIC Detachment, 1st Lt Arnold J. Huebner, did not feel that such an enterprise was practical. In the Detachment's March 1945 Information Report, Lieutenant Huebner gave a detailed account of the operation. XVI Corps area had been divided into three sections, and more than 400 officers and enlisted men were assigned the task of combing out security hazards and suspects. Sixty persons from CIC, and Prisoners of War, Order of Battle and Military Intelligence Interpreter teams screened civilians while the remaining members of the search party checked structures. Six combat men and one intelligence specialist operated as a team in this endeavor. The mission lasted six days.

From the ten towns in Corps area, ten suspects were arrested; 141 other suspects were released; and 210 displaced persons and eight prisoners of war were found. Only the first two stay-behind agents, their contact and the farmer, were included in the ten mentioned above.

Lieutenant Huebner's conclusions, based on this experience, were as follows:

(1) The best way to detect enemy agents is by use of informants and by thorough interrogation of suspects.
(2) The results obtained from a mass-screening of this type do not warrant the number of man-hours involved.
(3) Relations . . . were satisfactory.
Reconnaissance platoons are best suited for this type of work. The platoon organization and the type of transportation make for speedy efficient operation in urban as well as rural areas.[123]

122 418th CIC Detachment, 12th Army Group. CIC Monthly Bulletin #3, dated 6 May 45 (CONF) (Staff and Faculty Library). 309th CIC Detachment, Ninth US Army Monthly Information Report for March 45, dated 1 May 45 (RESTRICTED) (Staff and Faculty Library). 508th CIC Detachment Monthly Information Report for March 45, dated 31 March 45 (CONFIDENTIAL) (Staff and Faculty)

123 508th CIC Det Monthly Information Report for Mar 45, dated 31 Mar 45 (CONFIDENTIAL) (Staff and Faculty Library)

XVI Corps CIC Point of View

The Corps CIC report stated only that the mission was accomplished by the 508th CIC Detachment aided by personnel from the 30th and 35th CIC Detachments, and sixty-four members of other intelligence agencies. It made no reference to the use of tactical troops and summed up the results of the operation in this manner: "A few firearms and several PW's were picked up. Nothing of a CI interest has been developed as of this date (21 March 1945); however, the search is still in progress and further reports will be forthcoming.[124]

The "forthcoming" reports never developed for the simple reason that the mission had ended on 19 March 1945.[125] No other mention of this Corps-wide action was made in available documents from XVI Corps CIC Detachment.

XVI Corps Activity During Period

Corps area during this period approximated the entire area covered by Task Force BYRNES in their breakthrough in early March. This vast area - from Brussum and vicinity in Holland to Nieukerk and vicinity in Germany - required a reorganization of the 216th CIC Detachment's system of teams. Three teams were organized: Team I remained at Corps Command Post with Major Frederick, the Detachment Commander, in charge; Team II covered Brussum, Holland, and Kempen, Lohberg, and Gladbach, Germany; Team III operated in Venlo, Holland, and Wachtendonk and Nieukerk, Germany.

In addition to maintaining liaison with the officers-in-charge, Major Frederick kept in touch with division CIC commanders and division G2s, gaining cooperation when necessary and disseminating information as it became available to him.[126]

The Detachment adopted the Dutch practice of posting notices on the homes of suspected persons, with the difference that CIC posted only those homes of people who were under house arrest for oounterintelligence reasons.

126 216th CIC Det, CIC Annex to After Action Report, 1 Mar 45 - 1 Apr 45, page 91, in 216th CIC Det Opn Rpts - Belgium, Holland, Germany, Oct 44 - Sep 45 (SECRET) (Kansas City Record Center Box 25098)

In addition to routine security arrests in the course of security surveys and rches of "suspicious" homes, agents investigated two mine officials in Lintfort, Germany, the location of Corps Command Post, and found them to be radical Nazis. ouster was recommended ". . . if their removal would not seriously hamper nes production" - a curious reversion to a policy Military Government preferred, but which had been battled by almost every other CIC Detachment in the heater.[127]

The Buergermeister of a former Nazi official, was removed from ffice, however, and two former leaders of Nazi farmer organizations were arrested y agents of the Detachment.

A female agent of FAT 303 and two contacts on the Allied side of the Rhine River - hich she had crossed to get tactical information about U.S. troops and equipment - ere arrested in Nieukerk, Germany, on 16 March. The agent and one contact, a were sent to army for further investigation. The other accomplice, merchant, was placed under house arrest.

An Avenger of German Honor

A young German, apprehended while cutting Army Signal wires, confessed to wo other sabotage successes of the same type. The youth claimed membership in n organization known as the "Avengers of German Honor" and implicated fifteen t youths as fellow-members. Investigation by the 216th CIC Detachment failed o produce evidence of such an organization, and it was dismissed as a "product of fanciful and fanatical imagination."[128]

Corps CIC Helps Out Division

In mid-March, in answer to a hurried call from the 509th CIC Detachment, hree CIC agents from the 203d CIC Detachment and one Military Intelligence Interreter team were sent to prison, but not as inmates. The CIC agents with 9th U.S.

27 Note: Military Government, which constantly desired to make each area as economically self-sufficient as possible, often preferred to keep Nazis in key positions rather than replace them with less informed or inefficient personnel. Usually, CIC's attitude was that the security of the military establishment took precedence over the convenience of the population, and it was standard policy for Nazis to be removed immediately upon discovery of their affiliations with the party. It was usual also for Army and Group commanders to side with CIC on this question if a dispute with Military Government had developed.

28 216th CIC Det, CIC Annex to After Action Report, 1 Mar 45 - 1 Apr 45, in 216th CIC Det Opn Rpts - Belgium, Holland, Germany, Oct 44 - Sep 45 (CONFIDENTIAL) (Kansas City Record Center Box 25098).

Armored Division, the first unit to enter the town of Rheinbach, Germany, obviously realized that Rheinbach Prison posed a problem no free-wheeling CIC outfit could hope to solve before it moved on. At first impression, the CIC trio from the Corps Detachment must have wished that they, too, could pass the task on.

The trouble with Rheinbach Prison was its popularity. The prison contained 117 regular inmates which the Germans had not been able to evacuate; 80 German nationals, including political and non-political prisoners; 33 foreign nationals convicted for political crimes; and 4 foreign nationals imprisoned for non-political crimes. But posing a greater problem for the agents were 500 liberated prisoners of war who had been sent or brought back by tactical U.S. troops and more than one thousand civilians of various nationalities who had been confined within its walls.

To furrow the brows of the CIC agents even more, eighty sets of cell keys were in the hands of the prisoners and the soldiers billeted in part of the prison. Daily the number of internees continued to increase until - at the time the 203d CIC Detachment commander, Major H. P. Wardell, wrote to the G2, III Corps, explaining the situation - there were 2,100 people of both sexes inhabiting the institution.

The first problem faced by the agents was to ferret out persons who constituted a threat to military security. An informant network was established keyed around one man whose prison record showed that he had been interned for aiding downed American flyers escaping across Holland.

Secondly, eighteen remaining prison officials, guards and attendants of the former staff of thirty-four were interrogated and investigated. Twelve survived this process and were retained in various capacities. Five, who had been closely affiliated with the Nazi Party, were placed in cells to be turned over to Military Government for ultimate disposition, and one was scheduled to be sent to First Army Interrogation Center for further investigation.

Twenty deserters from the Wehrmacht, in and out of uniform, were sent through prisoner of war channels; three suspects were sent to First Army Interrogation Center as security threats; three others were being held for Military Government prosecution on charges of destroying records; and forty-six suspects were to be released by Military Government when the tactical situation permitted. These seventy-two persons had been sent to the prison by tactical units as "suspicious" during the CIC team's operation there.[129]

129 Ltr from 203d CIC Det, Hq, III Corps, to G2, dated 13 March 45 in Open Rpts L-595, 13 Mar 45. (Departmental Records Branch, AGO, Alexandria, Va.).

The agents also uncovered a war criminal of "the lowest type" among the foreign nationals interned by the Germans. Although thirty-five inmates of various nationalities had come to believe that [redacted] was a former [redacted] who had been interned for insulting German soldiers and for helping Jews, German prison records showed that this crime was blackmailing persons trying to escape from the Nazis. He was turned over to Military Government as a "war criminal." 130

Gamma Swimmers Attempt to Destroy Bridges at Remagen

The rest of the 203d CIC Detachment experienced a similarly eventful period. Having been warned of the attempts of German saboteur-swimmers to sabotage bridges in 21st Army Group area, Army Engineers and Agents of the 203d CIC Detachment cooperated to prevent the success of like attempts against the pontoon bridges at Remagen. 131

Among the measures used at Remagen to ensure their failure were: the placement of searchlights at strategic points; the arrangement of under water nets, booms and barbed wire entanglements; the utilization of self-propelled guns; and the instruction to all river guards to fire on all floating objects. 132

Effective security was obtained by adherence to all counterintelligence proposals. Corps and Division CIC units assisted further by cooperating with Military Government in the evacuation of all civilians from the area by thoroughly screening civilians hired for administrative and military duties, and by making all communications secure. 133

On the night of 16-17 March, seven German frogmen - called Flusskaempfer (river fighters) by the Germans, but Gamma Swimmers by the Allies - plunged into the murky Rhine to make the try. The U.S. Army was ready for them. When the battle was over, one of the saboteurs had been wounded fatally and three were captives. A fourth was captured later. The sixth, had taken eight "pep" tablets, instead of the prescribed two, it was learned, and his heart reacted so violently that he was unable to continue. He returned to his own lines. The seventh swimmer was never accounted for, but the pontoon bridges at Remagen were unmolested. 134

134 12th Army Group Rpt of Operations (Final After-Action Report) Vol IV pg 333, (Restricted) (Staff and Faculty Library)

The special security regulations established by Major Wardell's CIC Detachment were recognized in Twelfth Army Group's 418th CIC Detachment's Monthly Bulletin as being partially responsible for the failure of the saboteurs.[135]

To agents of the 203d CIC fell the task of interrogating the three members of the group who were captured on the night of the action. The fourth prisoner, who stroked to the American side of the Rhine after a bullet punctured the float bearing his explosives, hid in the bushes along the river for two-and-one-half days before being spotted and captured by tactical troops. A Corps Prisoner of War Interrogator Team interrogated him.

From the interrogations much was learned about the training and equipment of the "Gamma Swimmers" and about the efficiency of the barriers the U.S. Army had placed in their path. Only one of the group, an officer, claimed that he could have succeeded. He had, with an enlisted man teammate, approached one of the bridges, but his companion received a fatal wound and the officer deserted his mission to aid the soldier. The other two captives had quit after losing their explosives as the result of diving to avoid fire from the shore. Their search for the charges left them exhausted and they swam to the shore and surrendered.

There was a great deal of interest shown in the fourth prisoner's ability to remain undetected for almost sixty hours, despite his frogman attire, but questions along that line led the interrogators nowhere. The river fighter incoherently expressed only bewilderment at German's continuance of the fight.[136]

One Bad Try Deserves Another

The complete rout of the Remagen group did not postpone plans the Germans had for the bridges crossing the Rhine in the vicinity of Oppenheim. On 24 March, five members of the first group's sister team dived into the Rhine. Two of this group were captured and three were unaccounted for, but no harm came to the bridges. One of the prisoners had actually reached the pontoon bridges, but his explosives had previously become so entangled in one of the nets that he had punctured the float, sinking his chances of doing real damage to American efforts. When shells started exploding around him, he wisely surrendered.

135 418th CIC Det, 12th Army Group, CIC Monthly Bulletin "3, 6 May 45 (Confidential) (Staff and Faculty Library)

136 III Corps G2 Periodical Rpt #98, dtd 19 Mar 45 in FUSA G2 Jnl, L-558, 3-4 Apr 45 (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.); and III Corps Daily IPW Rpt #80, in III Corps G2 Jnl, L-595, 21 Mar 45 (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.).
Note: Detailed information concerning the training and equipment of the Gamma Swimmers attached as Appendix 1.

All six captives were transferred to Twelfth Army Group's Counterintelligence Interrogation Center where it was learned that the officer who claimed he might have succeeded had been the commander of all German Flusskaempfer units. His boss was none other than Lt Col Otto Skorzeny. Skorzeny had again come out the loser in his running battle with the U.S. Army and CIC.

The next stop for the six swimming saboteurs was a piece of dry land known as Prisoner of War Continental Central Enclosure Number Seventeen.[137]

Ah, Spring!

The Rhine River was full of surprises. No sooner had the threat of swimming saboteurs at Remagen been removed when a harbinger of spring emerged from those waters: a maiden in search of a mate. The young German girl told agents of the 203d CIC Detachment about the frightful man shortage at her Luftwaffe ground observer post, where she served as a German WAC. According to the report, "Ten-to-one is a bad state of affairs," said the girl to her interrogators. There were 200 girls in her camp and only twenty middle-aged men, mostly married...'They' told her that she should fight to the last man but the girl had come home to fight for the last man...For the time being, however, the report concluded, "she will take her pick at a Prisoner of War Enclosure somewhere in Europe, where on good authority we know that men (prisoners of war) are plentiful."[138]

A Stay-Behind Team Gets Caught

The airplane spotter described above was a rather harmless variety of "watcher," but other Germans were assigned the task of watching--and reporting--the movements of U.S. troops, their numbers and their equipment.

On 6 March, Freiderich Gustave Rohlfing and his campanion, Klaus Emil Arthur Lubold, a Hitler Jugend member, passed the screening at Antweiler, Germany, without detection. They proceeded to the vicinity of Satzvey to search for a hidden bunker to which they had been assigned. On the morning of 7 March, they found it. In the bunker were enough stores and equipment to keep the radio agent Rohlfing and his Hitler Jugend "feeder' operative for some time, In fact, everything had gone as promised by the German Intelligence Service except for one oversight.

---

137 12th AG, Counterintelligence Interrogation Center, Rpt, titles "Rhine Bridge Sabotage Missions," dated 9 Apr 45, 207th CIC Det, Rpt on the Case of the Rhine Bridge Sabotage Missions Fldr, (Kansas City Record Center, Box 25097) (CONFIDENTIAL)

138 G2 Periodical Rpt #282, FUSA, dtd 19 Mar 45, extract from III Corps Opns Rpts, L-557 (16), 18 Mar 45 (Unclassified)(Departmental Records Branch, AGO, Alexandria, Va.).

The manual containing call signs and frequency schedules was missing. Once a day on 9, 10, and 11 March, Rohlfing sent messages requesting this information. There was no answer. At noon on 11 March, an officer and a non-commissioned officer of a U.S. artillery group were led to the bunker by a German forester who had noticed the two German agents. Rohlfing and his "feeder" were captured and turned over to V Corps CIC where interrogation revealed much about their training and background.[139]

VI Corps CIC: Some Special Cases

Among the special activities reported by the 206th CIC Detachment in March were the arrests of a German national who varied his story often but failed to incriminate himself into a counterintelligence category; of an ex-Gestapo chauffeur who gave valuable information on Gestapo personalities; of two Hitler Jugend agents at a roadblock in Wissembourg who subsequently confessed to espionage; and of a colonel in the Sturmabteilungen (SA, or Nazi Party Storm Troops). With the exception of the Sturmabteilungen colonel who was interned immediately in accordance with policy, all other arrestees were sent to other authorities for further investigation and disposition.[140]

VIII Corps CIC: Too Busy

Teams One, Two, and Three and the Administration Section of the 208th CIC Detachment, during this time, moved about seventy miles - from Luxembourg to the Rhine.

One of the Detachment's constant counterintelligence measures was the blackout check. During the night, agents would check to see if any light was escaping from the Command Post or from homes in neighboring towns. Reports stated the blackout usually was executed satisfactorily.[141]

Most arrestees were minor party leaders and long term party members, the leading Nazis having fled before the American advance. Some Gestapo informers and "probable" spies were reported by the Detachment during the period, but no case of exceptional counterintelligence interest developed.

---

139 First U.S. Army Annex 4 to G2 Periodical Rpt #290, 25 Mar 45 in Opn Rpts L-557 FUSA (23) (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.)and 12th AG Rpt of Opns (FAAR) Vol IV, pg 328-9

141 Reports of Blackout Checks, 208th CIC Det, 14-15 Mar 45, to G2 VIII Corps, in 208th CIC Det Correspondence Files 2/45-9/45 (CONFIDENTIAL) (Kansas City Record Center Box 25097)

The "Team" concept, initiated at Corps level by the 208th CIC Detachment, called for the utilization of four teams of four men each and one of three men, the latter assigned to Corps Detention Camp. The Administration team was established at Corps Command Post and was headed by the Detachment Commander. The other three teams were operating in the field and, at the end of this period, were responsible for three areas, one around Andernach, one around Adenau, and one at Kottenheim. This was an area of responsibility more than twenty miles deep that was constantly changing and that would continue to change since it was directly behind the Remagen bridgehead.[142]

Teams of the 208th CIC Detachment appeared to have had little time for investigation and, with the exception of routine security checks, could concern themselves only with German nationals who were in or near the automatic arrest category, with liaison with divisional CIC detachments under their jurisdiction working on both sides of the Rhine, and on liaison missions to neighboring corps CIC detachments and to T-Force CIC in Koblenz.[143]

The 212th CIC Detachment: Perseverance Pays Off

Five days of investigation led to the arrest of an enemy agent by members of the 212th CIC Detachment. 2d Lt. Carlos D. Smith and Special Agents John J. Adams, William J. Syring, and Joseph B. Shire, acting upon a report from 2d Cavalry Group that a Prisoner of War had helped an enemy line-crosser recently, began the investigation, guided only by a description of the agent and the prisoner of war's belief that the man had once lived in Dickweiler, Luxembourg. Descriptions of all residents of that town and surrounding towns who had fled with the Germans were acquired and compared, and various leads were followed up, with no positive results. When re-interviewed, the mayor of Dickweiler recalled seeing a former resident of Osweiler on the streets of Luxembourg City a few hours before. The man had left Osweiler in 1943, but the mayor's fine memory had placed him on sight. This lead proved a good one, and the man was arrested.

Twenty minutes of interrogation established him as the agent CIC was seeking. One day preceeding his identification by the mayor, he had completed a two-week sentence as a violator of travel restrictions, imposed after being picked up at a Division Counterintelligence Control Line.

142 208th CIC Det CI Rpt #8, for period 6 Mar - 20 Mar 45, in 208th CIC Det Jnl of Repts (CONFIDENTIAL) (Kansas City Record Center Box 25097)

143 208th CIC Det Teams Daily Reports, 7-25 March, in 208th CIC Det Jnl of Rpts 1/45 - 6/45 (CONFIDENTIAL) (Kansas City Record Center Box 25097)

In his two days of freedom, the agent had changed his address three times. With his apprehension by 212th CIC Detachment agents, his moving days were over.

This detachment had two other significant cases during this period. One involved a curfew violator, who when arrested by the Military Police had produced a New York City birth certificate, claiming to be a citizen of the United States. Special Agents Harold B. Proudfoot, Joseph B. Shire, and Military Intelligence Interpreter M/Sgt Howard Menke interrogated the man, and, after catching him in one lie after another, discovered that he had been in the Wehrmacht and had been discharged to serve with the Gestapo. He was on a mission as a stay-behind agent when arrested.

Equally interesting was the interrogation of a civilian who had been arrested by the Security Patrol of 2d Cavalry Group for being in an evacuated zone. He said he was a forced laborer who had spent four days on the road trying to return to France. Yet he was clean-shaven and there was no mud on his shoes, despite the fact that he would have crossed four rivers, each with few bridges, if his story were true.

At first he stated that there were no rivers between his starting point and his point of arrest, but altered this story and said he had crossed one "in a rubber boat." The CIC interrogators, 2d Lt. Donald G. Avery and Special Agent Burton E. Fulmer, with the aid of a civilian interpreter, kept at him until he admitted being a German agent who had been parachuted into the area during the night.[144]

219th CIC Exposes Two Gestapo Informants

Dissemination of information again proved its value on 20 March 1945, when two Belgians who had crossed the Rhine from German-held Dusseldorf to American-occupied Oberkassel and identified themselves as "forced laborers" were apprehended by the Oberkassel Team of the 219th CIC Detachment. The espionage agents were first placed in the spptlight of counterintelligence suspicion when displaced persons told U.S. troops at a Displaced Persons Camp that the two Belgians were not "good Belgians." The Oberkassel CIC Team was called in to verify or dispel these suspicions. Because the names of the two men appeared on a list of all Gestapo informants, compiled by XIX Corps CIC at Rheydt after interrogation of a former secretary in the Dusseldorf Gestapo Headquarters, CIC was able to give a ready answer to the inquiry.

144 XII Corps CIC Monthly Information Report for March 1945, dated 8 Apr 45, (CONFIDENTIAL) (Staff and Faculty)

After CIC in Oberkassel arrested them, the Belgians admitted readily that they were espionage agents with a political and tactical mission for the Gestapo.[145]

XX Corps CIC: With Third Army in Germany

In Ehrang, Germany, a German national presented himself to Military Government Detachment F2 G2 as an anti-Nazi who was eager to cooperate with the Allies. Interrogated by agents of the 220th CIC Detachment, he told a story of intrigue, the high point of which featured his cooperation with a British agent who drove a large Mercedes car. He and the British agent, he said, lighted lanterns on railroad tunnels during air raids, sabotaged machinery in large factories, destroyed ammunition, and transmitted information to the Allies. Unfortunately, he did not know the British agent's last name or his whereabouts, although allegedly they had labored together for two years. Nor did he know the birthdate, occupation, or father's name of Karl Engelhardt, his own alias, information which was available on the Wehrpass he claimed to have used for two years as identification.

Giving the man the benefit of the doubt, CIC sent him to a higher echelon where he might try to verify his own identity or the existence of the British agent.

The Polite Civilian

Amid the confusion in the town of Worms, 220th CIC Detachment agents noticed an extremely courteous act and became suspicious. A man in civilian clothes had taken a woman's satchel and seemed to be carrying it for her. When the agents approached the couple, the woman readily admitted that the man had accosted her a few minutes before, insisting that she let him carry the bag. Initially, the suspect claimed that he was a forced laborer who had returned to "liberated Worms." However, firm interrogation led him to admit that he was a German non-commissioned officer, one of about 200 soldiers in civilian clothes trying to make their way to the German side of the Rhine.

In Kirscheim-Bolanden, Germany, the CIC interrogator of a Schutz Staffeln officer who had also been an informer for the Sicherheitsdienst was so successful at breaking down the suspect's story that the German officer gave information which led to the arrest of a Schutz Staffeln Lieutenant Colonel who was the inspector of work camps on the West Wall and "the most prominent Nazi in the region."[146]

Divisional CIC Detachments: The 2d CIC Detachment

A site of horror and Nazi terrorism was uncovered by agents of the 2d CIC Detachment, commanded by Capt. Thomas D. McLaughlin, in March 1945. The Heilanstalt (insane asylum) at Hadamar, Germany, one of six such institutions authorized by law in Germany, had been the scene of Nazi "mercy" killings. In the basement of the asylum, 15,000 human beings had been gassed. Some feeble-minded, some incurables had been killed. Others had been slaughtered for political reasons or for having Jewish blood in their veins.

Thirty-five hundred other persons had been starved and then innoculated. These, unlike the 15,000 whose bodies had been cremated, were buried - twenty to the grave.

The Detachment turned its findings, including information on some of the "doctors" and "nurses," to the Army Military Government Officer. Military Government continued the investigation.[147]

For the rest of the month, things were comparatively calm for the 2d CIC Detachment. On 18 March the agents arrested three persons who had crossed the Rhine in a boat. Investigation at First Army Interrogation Center established one as a genuine deserter and the other two as displaced persons.[148]

Armored Detachments: Few Reports

Few reports of activities of armored division CIC detachments are available. That they performed counterintelligence tasks at all is often indicated only by Group, Army, or Corps summaries or through Interrogation Center bulletins.

A First Army Interrogation Center Bulletin revealed that the 503d CIC Detachment arrested one Gestapo informer, and that 507th CIC Detachment arrested ten Hitler Jugend agents in March. The informer, a French national, was sent to French authorities. The ten youthful agents were turned over to Military Government for final disposition. The following story was representative of this group's unsuccessful attempts at espionage. Kurt Broda, a twenty-one year old German youth with a crippled arm, was possed with the desire to aid his country. He was unfit for regular military service, but he had been allowed to serve as clerk in a reserve trench-digging unit. On 20 February 1945, he was offered a "suicide mission" and accepted, although warned that he had only one chance in five of not being captured and shot. After a radio refresher course, Broda was sent across the lines as a "feeder" (an observer and runner), but he could not find the German

147 2d CIC Det Monthly Intelligence Report for March 1945, dtd 2 Apr 45, (CONFIDENTIAL) (Staff and Faculty)

148 Op Cit, First Army Interrogation Center, Bulletin #8, (CONFIDENTIAL)

Intelligence Service sergeant with whom he was to work. Broda then followed his alternate mission: to remain behind the lines for two or three weeks and then cross back to German lines by swimming the Rhine. On March 8, in Sollar, Germany, Broda and a seventeen year old Hitler Jugend companion were stopped at a roadblock when the guard became suspicious of a black box Broda was carrying. When it was found to contain a radio generator, the pair were arrested by agents of the 7th Armored CIC Detachment. Under interrogation at First Army Interrogation Center, Broda and his companion confessed to the espionage mission.[149]

506th CIC Develops an Effective "Modus Operandi"

The 506th CIC Detachment added a new technique in communications counter-intelligence. Given the responsibility of cooperating with the Signal Corps in the neutralization of telephonic facilities, agents of the Detachment turned the "chore" to good advantage. They would stand guard over the local Burgermeister and make him call ahead to the next town to find out what the tactical situation was there. Several times it was learned that "white flags" were flying, and 6th Armored Division could roll into the area without long reconnaissance delays.

In another case not specifically within the CIC mission, agents of the Detachment experimented, together with Military Government, in a precursory audit of German banks in Mulhausen. Six banks were investigated and, in all of them, half of the funds were found to have been assigned to "The Peoples Health and Protection Bureau" of the Party. Persons with access to these funds were local Nazi officials and Nazi officials from Berlin. Among the procedures the Detachment, commanded by Capt. Judson B. De Loach, considered routine for its agent personnel were: to check civilians at random when engaged in a fast moving situation (at least one agent was kept free from other duties just for this purpose, and invariably this technique produced results); and to check hotels in all towns, since "wanted" personalities were often discovered in these establishments and information on others on the blacklist often could be located in hotel records.[150]

5th CIC Detachment: Quick Coverage

Sixty towns in five Kreise (districts) fell to the Red Diamond Division in twenty days, and the 5th CIC Detachment had the responsibility for initial counter-intelligence coverage in each of them. Agents of the Detachment barely had time

149 12th Army Group Report of Operations (Final After-Action Report) Vol IV (Restricted) (Staff and Faculty Library) and 1st U.S. Army Interrogation Center Bulletin #8, dtd 1 Apr 45, in 207th CIC Det First Army File, Mar 44-Apr 45 (CONFIDENTIAL) (Kansas City Record Center Box 25097)

150 506th CIC Det Monthly Intelligence Report for Mar 45, dtd 8 Apr 45, (SECRET) (Staff and Faculty Library)

to compile target sheets on each town and turn them over to XII Corps CIC. Thorough coverage of every town was impossible at division level. Eleven counterintelligence suspects, 199 German deserters, five Volkssturm members and five members of Organization Todt were placed in prisoner of war channels during the period, and 152 displaced persons, forced laborers and escaped prisoners of war were screened and referred to Military Government. Eighty-six other individual suspects were transferred to XII Corps CIC during the period.

The 5th CIC Detachment also developed new information which showed that the underground organization known as Raecher Deutscher Ehre (Avengers of German Honor) was functional. The 216th CIC Detachment had dismissed this enemy group as a "product of . . . imagination." The mission of the organization was, oddly enough, to prevent Germans from fraternizing with Americans. Not much else was known about the group, but it was not considered a major threat.[151]

The 8th CIC Detachment: A Confusing Report

If its Monthly Information Report for March was written accurately, the 8th CIC Detachment, commanded by 1st Lt. Arthur J. Newtown, was remiss in its counterintelligence efforts. The brief resume, placed under the Special Cases topic, noted:

> "Nothing in the way of unusual cases in which a knowledge of methods used will be beneficial to other CIC Detachments in training or in the field. All saboteurs and espionage agents apprehended during this period by this Detachment were apprehended through informants or through detailed interrogation of suspects who were "broken" and furnished leads to other agents. All total (sic), 26 established agents were apprehended during the period, along with seven complete demolition/sabotage kits."[152]

The First Army's Interrogation Center's Bulletin for the period indicated that only twenty suspects from the 8th CIC Detachment were given intensive interrogation at that level - where most enemy agents captured in that Army area were sent before final disposition was made. Five of these were of no Counterintelligence interest and evacuated as displaced persons. One was interned as a security threat. Eight investigations had not been completed by the end of the month (though two had progressed sufficiently to indicate possible guilt) and six, not

152 8th CIC Det Monthly Intelligence Report for Mar 45, dtd 1 Apr 45, (CONFIDENTIAL) (Staff and Faculty Library)

twenty-six, were established as enemy agents. Five of these were of the Hitler Jugend variety.[153]

9th CIC Detachment Across the Rhine

The CIC Detachment with the 9th Infantry Division, one of the first organizations to cross the Rhine, was active removing security threats within the bridgehead.

Agents arrested a German civilian on the basis of an informant's report that the suspect had told him of firing at American troops across the Rhine. The civilian, though at first protesting that he had only asked to feel a German soldier's weapon, admitted to the statement, "We shot across." On 14 March, the arrestee was sent to Army Interrogation Center as a war criminal.

A Russian worker, who had been in Germany since 1942, told 9th CIC Detachment Agents an intricate story of his sabotage on the Allies' behalf, of his subsequent escape from the death sentence by falling out of a truck, of his aid to a British agent in a German general's uniform, of another arrest and escape from a concentration camp, and of a third arrest and sentence to a concentration camp near Bonn. Doubting his story, the agent arrested the Russian on 19 March and sent him rearward to the First Army Interrogation Center as a possible enemy agent.[154]

At the Interrogation Center, apparently, the Russian faced further doubt. Finally, the suspect named a man who would verify his story. When found and questioned about the Russian, this man turned out to be the Gestapo agent who had chased the Russian all over Germany and finally arranged his imprisonment. As the Interrogation Center's bulletin said, "Case closed: One innocent released, one Gestapo agent locked up."

The 9th CIC Detachment also sent two suspected enemy agents back to First Army Interrogation Center, but investigators there established that the two were merely escapees from a German penal camp. They were evacuated as prisoners of war.[155]

514th CIC Detachment Reaps Dividends

The efforts made by the 514th CIC Detachment to ensure complete reporting of incidents occuring in their area proved their worth in the case of Johann Fels. Lengthy interrogation failed to disrupt Fels' prepared story until he used a preposition which differed from that on the arrest report. Suspect claimed he was on his way "to" Wissembourg; the arrest report indicated he was coming "from" Wissembourg. The inconsistency caused Fels to vary his story, creating new areas of inconsistency, until his story finally burst like a pin-pricked balloon.

Through cooperation with unit commanders, a list had been prepared of various soldiers who could translate documents of different languages. A piece of paper which Fels claimed he had found on the street, written in Yiddish in a peculiar script, was translated by a group of these linguists, increasing CIC's suspicion of the arrestee by linking him with a land swindler.[156]

A Slowdown for 29th CIC Detachment

The 29th CIC Detachment, after its auspicious activity earlier in March, remained in the Muenchen-Gladbach area with the mission of "Rear Area Security and Military Government" until 19 April. Displaced persons proved the biggest problem, with Prisoners of War the next most vexing. In general, 29th CIC Detachment's activities for the remainder of March could be summed up in the words, "routine security."[157]

One case illustrated the need for CIC to halt assemblies of persons in occupied countries. A meeting of fifteen persons in Muenchen-Gladbach was raided by a team of four agents and an interpreter, led by 1st Lt. Andrew Van Otten, at 0950 hours on 25 March. All participants were arrested, several of whom admitted Nazi party membership. While ostensibly a meeting for the revitalization of local commerce, the possibility existed that it had been called with subversive intentions. Regardless of the reason, the gathering was obviously in violation of the Military Government decree that no assemblages of more than five persons were permissible. In this report to Military Government, Lieutenant Van Otten recommended "that these men be tried and given a good stiff sentence and that the entire

town of Muenchen-Gladbach be made aware of this sentence so as to prevent a recurrence of any similar meetings and also to impress on all Germans the fact that we are the ones who will designate when and where and if any meetings are to be held."[158]

29th CIC Sets Up SOP

Captain Mayfield, Detachment Commander and Division Counterintelligence Officer, developed a SOP for 29th Division CIC operations, dated 21 March, which outlined duties which were specifically applicable to divisional CIC organizations.

Under the topic, Primary Duties of CIC, Captain Mayfield stated that one or more CIC agents would accompany the advance party of Military Government personnel into newly-captured areas for the purpose of outlining to officials the security restrictions to be placed on the population and of informing them that the responsibility for unqualified compliance with the regulations rested with them, as appointed representatives. Depending upon the size of the community and the priority of other CIC missions, the accompanying CIC personnel could undertake a brief preliminary interrogation and investigation to determine the major officials' suitability, in light of existing regulations. Valuable CIC targets of opportunity were to take precedence over these investigations, but, where possible, the CIC Agents were to advise Military Government in advance of entry whether a preliminary screening was to be attempted.

The remainder of the procedure involved practices which had become standard throughout the theater and which were not restricted to division CIC detachments.[159]

The 63d CIC Detachment: Ask Questions Later

The 63d CIC Detachment, during the offensive, barely had time to screen civilians for police duty before moving on. Occasionally, agents discovered that some of the persons being screened for these positions had definite Nazi Party affiliations. All suspects were cast into jail pending further investigation by succeeding CIC organizations. While this was not the handling prescribed, it took less time than any other.

Three agents of this Detachment accompanied Task Force Harris which captured the cities of Neunkirchen, St. Ingbert, and Homberg, Germany. The CIC Team closely cooperated with Military Government and selected and appointed a mayor and a new police force in Neunkirchen, the task force's primary target.[160]

65th CIC Detachments on the Move

The 65th CIC Detachment, under the command of Capt. S.B. Tynes, one of the first CIC detachments assigned to a division of the Fifteenth Army to see action in Germany, reported that this was a period of constant movement for them. In the "few hours to 48 hours" that they remained in each community the agents attempted to fulfill their mission, seizing post offices, police and party headquarters, banks and black list personalities, but they explained in their March 1945 Information Report that the time element caused investigations to be "expedient and haphazard" and they urged "that scrutiny of officials should continue."[161]

The Fighting 69th's CIC Detachment Gets Help

To aid the 69th CIC Detachment to "speed up the screening of the area of responsibility" which included "many square miles of enemy territory" during the Division's advance, German-speaking personnel of the Prisoner of War Interpreter, Military Intelligence Interpreter, Positive Intelligence and Order of Battle Teams were made available to the Detachment.[162]

Three suspected line crossers arrested by the Detachment were cleared of counterintelligence charges by First Army Interrogation Center. Apparently no other cases from 69th CIC Detachment reached Army level.[163]

70th CIC Detachment: One of the Most Outstanding Cases

In addition to retrieving a French female agent employed by Seventh Army's Office of Strategic Services who had been stopped on a bridge in Saarbrucken by Military Government officials and returning her to that headquarters, agents of

160 63d CIC Det Monthly Information Rpt for Mar 45, dtd 31 Mar 45 (CONFIDENTIAL) (Staff and Faculty Library)

the 70th CIC Detachment handled a number of cases in this period, the most important of which took two of their agents underground.

This case began when the Chief of Police of Dudweiler, Germany, whom CIC had previously determined to be reliable, brought to CIC Agents Henry Hoebel and James Olsen a local man who told that he was to meet a German officer named Wahlster who would take him to an assembly of Schutz Staffeln men in a secret hideout. The Agents told the man to proceed to his meeting with Wahlster.

The CIC agents tailed the informant and seized Wahlster, and then forced him to lead them and a contingent of combat troops to the rendezvous point, an elaborate underground cave, formerly a civilian air raid shelter. The main entrance had been demolished but two others, carefully camouflaged, had been constructed. There were several rooms, well provisioned with food, medical supplies, weapons, and munitions. The shelter was to serve as headquarters for a Wehrwolf cell, Wahlster later admitted under interrogation, while also telling of the general organization of the Wehrwolf system in the Rhineland.

Unfortunately, the Schutz Staffeln men never showed up at the meeting: apparently they had learned about the squad of American riflemen waiting for them to arrive and decided against it.[164]

Olsen and Hoebel were awarded Bronze Star Medals for their "courageous efficiency. . . in the pursuit of (their) mission . . ."[165]

The Detachment, in the same period, neutralized two other enemy agents and arrested a high-ranking automatic arrestee. Their work was recognized as superior by Col. William W. Quinn, Seventh Army G2, who complimented the 70th CIC Detachment for their work on these cases, as follows:

> "1. The apprehension by the 70th CIC Detachment of German Lieutenant Edouard WAHLSTER, and the discovery of a cache containing numerous weapons and demolitions material has developed into one of the most important counterintelligence finds in Seventh Army. Members of the 70th assured a higher degree of security for Seventh Army by its alertness in eliminating a unit of the German underground resistance movement.

164 Extract from 70th Inf Div, Reported in G2 Info Bull #56, Hqs, 7th U.S.Army dtd 4 Apr 45; G2 Jnl & File, FUSA, 8 Apr 45 (Unclassified) Departmental Records Branch, AGO, Alexandria, Va., and interview with James Olsen, NCICA Convention, Chicago, Ill., 6-8 Aug 54.

"2. The detection and neutralization of Louis FONTAINE, agent of Abwehr III, the apprehension of Grenadier Werner Ehrhardt, who was sought for espionage, and the security arrest of Allegemeine SS Hauptsturmfuehrer, acting Mayor of Saarbrucken, are gratifying indications of the professional attainments of your CIC personnel.

"3. I wish to express my appreciation for the superior work done by the 70th CIC Detachment." [166]

71st CIC Detachment Activities

1st Lt. Frank C. Zabaldano, 71st CIC Detachment Commander, partially solved his linguistic problems by obtaining permission from the Division Commanding General to recruit from the Division three men who possessed not only linguistic fluency but also "the common sense necessary to carry on an interrogation." The Commanding General stipulated that they could be chosen from any organization except infantry.

Tactical information obtained from civilians during routine counterintelligence screening was recognized as quite accurate by the Intelligence and Reconnaissance Platoon leader to whom it was submitted. In Schwegenheim, Germany, Agents of the Detachment arrested a Nazi Ortsgruppenleiter who had destroyed his party credentials, and in Speyer a man named Heinrich Thiery who was wanted by XXI Corps. Wholesale lots of party and government records were found in Pirmasens, Germany. [167]

The 80th CIC Detachment Lands a Big One

A personal friend of the Fuehrer's - among the first captured - was apprehended during the screening of Volksturm members in Bad Durkheim, Germany, on 22 March by agents of 80th CIC Detachment. Capt. Thomas R. McMillen's Detachment had indeed captured a key Nazi figure, the holder of membership card #325, but Ludwig Liebel, unlike others who were attempting to destroy

166 Ltr, Hq, Seventh Army, G2, Subject: 70th CIC Det, to G2, 70th Inf Div, dtd 31 Mar 45, Inclosure to 70th CIC Det Monthly Intelligence Report for Mar 45, dtd 7 Apr 45, (SECRET) (Staff and Faculty Library)

their association with the party, maintained his staunch admiration of Hitler, the man he had represented on "peace missions" to most of the countries of Europe which later felt the heel of the German boot. He was interned. [168]

83d CIC Detachment: Static on the Rhine

The 83d Infantry Division, like many others in this period, roared across Germany to the west bank of the Rhine and, finding the bridges blown, halted. The 83d CIC Detachment, at this point, found itself once more in a static situation, and set about its business of screening the 70,000 Germans in civilian clothes in the Oberkassel and Neuss areas. High ranking Nazis had fled and many of their party records had been disposed of, but agents of the 83d CIC Detachment, by interviews and by piecing together information which had been left behind, were able to delineate a complete picture of the Gestapo unit in Neuss and of the Nazi Party luminaries in Oberkassel. All Germans found crossing the Rhine were placed under controlled house arrest and 210 prisoners of war were discovered. The police force and civil administration appointed by Military Government were screened by CIC. [169]

One of the major activities in the Oberkassel-Neuss area for the 83d CIC Detachment was the prevention of enemy communication across the Rhine river. Cables in post offices in both cities were cut, but it was discovered that the Neuss cable had been spliced by the Germans within forty-eight hours of the American occupation on the assumption that the Americans would fail to discover them. Reports were received that several factories in these cities had direct telephonic communication with German-held Dusseldorf and, where these reports were substantiated, CIC and Signal personnel cut the lines. Reports of alleged wire tapping activity were investigated, all with negative results.

Military Government issued a proclamation ordering all radio transmitters, carrier pigeons, and other means of communication to be turned in by the inhabitants of the areas. Four baskets of pigeons were presented to CIC which passed them on to a non-commissioned officer from a Signal Corps pigeon company.

An informant outlined to CIC agents an interesting sabotage plan which the Germans had devised to prevent the allies from using German production plants without actually destroying the facilities. The idea was to hide vital components

168 Hq 80th Inf Div, 80th CIC Det MIR (Monthly Intelligence Report) of Mar 45 dated 2 Apr 45, s/Thomas R. McMillen, Capt, CO (SECRET) (Staff and Faculty Library #010838)

169 83d CIC Det, Narrative, undated, unsigned, Opns Rpt 207.03, 383-CIC-0.3 (11786) Jan-May 45 (Unclassified) (Departmental Records Branch), AGO, Alexandria, Va.

of the machinery which the Allies could not replace. In this way the Germans, at some later date, could take these components out of hiding, put them back in the machines, and go into production without much effort. However, no incidents of this or any other type of sabotage were reported by 83d CIC Detachment. In order to provide coverage for this well-populated area, the 83d CIC Detachment was supplemented by three men on Detached Service from Division, four prisoner of war interpreter personnel, four Field Security Police agents, and four CIC agents from Corps. With the sixteen CIC agents from the Detachment active at this time, the total strength of the organization was thirty-one.

CIC posters addressed to German Prisoners of War in civilian clothes accounted for seventy-seven of 210 persons in this category found during the screening of 13,741 male civilians of military age. The seventy-seven had turned themselves in.

Twenty-one persons in Neuss were placed under house arrest. Eleven of these were Rhine crossers who had been cleared of suspicion by CIC. Two who later broke house arrest restrictions were awaiting trial by Military Government and faced jail sentences. Radical Nazis were also placed under house arrest, to prevent them from inciting less radical followers to non-cooperation with Military Government, and to serve as a non-deterrent to others who might wish to take up the cry of "non-collaboration."

All Nazis were recommended for dismissal from office, as were all others on whom "reliable" derogatory information had been collected.[170]

89th Has Busy First Month

The 89th CIC Detachment, which entered the combat area during this period under command of 1st Lt. Robert H. Gelineau, found themselves in a fast moving situation. Moving up to the Sauer River on 11 March, they began an offensive that took them across the Sauer on the 12th, the Moselle on the 17th, and the Rhine on the 26th. Between 11 and 31 March they arrested 296 persons; screened, 2,498 Displaced Persons; established as Prisoners of War 236 persons found in civilian clothes; and interrogated concerning their military status 1,267 civilians of military age. A total of sixty-one towns were covered by the detachment.[171]

171 89th CIC Det Monthly Information Rpt, 12 Feb 45 (CONFIDENTIAL) (Staff and Faculty Library) 89th Inf Div After Action Rpts, 389-2 (12635) Master, (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va., and Army Almanac.)

99th CIC Detachment: Screening with a New Approach

The 99th CIC Detachment, during March, under the command of Capt. George D. Young, sent ten persons to First Army Interrogation Center. Five, in the automatic arrest category, were interned; four others were cleared of counterintelligence charges; and the fifth, a suspected line crosser, was held at the interrogation center for further investigation.[172]

As the result of a two day search of Division area, eighty-six Prisoners of War were uncovered, along with eighty other alleged former members of the Wehrmacht who were unable to produce satisfactory identification, 800 displaced were grouped, several potential informants revealed, and a considerable amount of military equipment was confiscated.

The mechanics of this screening brought to light a previously unreported technique. In the procedure followed by the 99th CIC Detachment, each Regiment was assigned an area of responsibility, with teams composed of a CIC representative, a Military Government representative, and two or more squads of infantry, depending upon the size of towns within the area.

Before the screening was begun, guards were placed on all roads leading out of each zone, and patrols were assigned routes, sealing the area against travel. In each town, as the screening team entered, the Burgermeister was contacted and told to gather the townspeople in a central place with all weapons and ammunition. When the assembly was complete, a Military Government proclamation was read, outlining the laws concerning retention of military equipment and those dealing with German soldiers in civilian clothes who failed to surrender themselves. While the townspeople were in one group, a patrol travelled the area looking for stragglers. Captain Young, in the Detachment's Monthly Information Report, stated that "the populace as a whole seemed most anxious to obey all commands issued by the screening parties."[173]

The 100th CIC Detachment

As part of the Seventh Army offensive force which sprang into action on 15 March, the 100th Infantry Division moved rapidly toward the Rhine, limiting the activities of the 100th CIC Detachment. As the Detachment moved with the Division, there was little chance for completion of investigations. Two suspected enemy agents and one definite security threat were discovered by agents of the Detachment, commanded by Capt. Anthony R. Mattos, and turned over to higher authority.

172 1st U.S. Army Interrogation Center Bulletin #8, dtd 1 Apr 45, in 207th CIC Det First Army File, Mar 44-Apr 45 (CONFIDENTIAL) (Kansas City Record Center Box 25097)

173 99th CIC Det Monthly Information Rpt for Mar 45, dtd 8 Apr 45 (CONFIDENTIAL) (Staff and Faculty Library)

2663

One suspected agent was arrested on the basis of informant reports which pictured him as a contact for the Gestapo. The suspect claimed that he used a leg injury to dissuade Gestapo Chief Mehl at Bitche from giving him an espionage mission behind American lines, but admitted that he finally turned informer, denouncing "unreliable" persons to the Gestapo. The Detachment turned the suspect over to the XV Corps Detachment for further investigation.

The second suspected agent, a well-travelled Danish newspaper correspondent in Germany, was evacuated to VI Corps CIC Detachment. The man had been a member of the Nazi party since 1929, and at the time of his arrest was Schulrat (School Administrator) for the Gau (Province) of West Mark. In this position, he controlled all secondary schools in the Gau. Because of this position of influence, the man was forwarded through Prisoner of War channels for internment at a higher level. [174]

The 102d CIC Detachment: A Saboteur, A Fire, A War Criminal

Capt. Horace A. Sutton's 102d CIC Detachment was with the Ninth Army's 102d Infantry Division in Germany. On 5 March, in the town of Krefeld, based on a tip from an International News Service correspondent who had acquired the information in an interview with a German civilian, a Nazi known as the "Blutrichter" (Blood Judge) for his merciless court decisions was located and arrested by Special Agents David J. Reisner and Edward W. Hoffer in a hospital where he was recovering from shrapnel wounds. The "Blood judge's" name was placed on the list of war criminals, and the information concerning him was forwarded to Ninth Army, "for war criminal prosecution."

Special Agent Hoffer, four days later, investigated a fire that had destroyed all construction sketches, formulas and intricate machine parts which comprised "the functional heart" of the Siempelkamp Machine Works. Here the processed armor plate for Panther and Tiger tanks, tools for plywood propellors, and machinery used in the production of synthetic gasoline and benzine had been manufactured. Immediately all executives of the plant were interrogated, one emerging as the prime suspect. The man was a fanatical Nazi who had urged the destruction of the factory before Krefeld had fallen, although the owner had protested strongly. Later examination of the wrecked building showed that the doors to fireproofed cabinets which had contained the valuable information had been left ajar prior to the fire.

174 100th CIC Det Monthly Intelligence Report for Mar 45, dtd 5 Apr 45, (SECRET) (Staff and Faculty Library)

Although not enough evidence could be collected to convict the suspect of sabotage or of being an "undercover Nazi labor spy," he was evacuated as a threat to Allied security.

A bona fide "labor spy," an agent of the Abwehr Economic and Industrial Sabotage Section, surrendered himself to American forces as a member of the Wehrmacht on 14 March, three days after the registration of members of the German Armed Forces in Krefeld. After questioning by Prisoner of War Interrogators, he was referred to CIC as a "possible agent." Intensive interrogation by Special Agent Fred Ronis established him as a "labor spy."

CIC's civilian clothes - long a controversial subject - were considered necessary and their use was successful, by this Detachment, with one alteration. The clothing brought from the United States was replaced by German-manufactured cast-offs. 175

103d CIC Detachment: A Kriminal-Assistant

As in most CIC Detachments assigned to subordinate units of Seventh Army, the 103d CIC Detachment, under the command of 1st Lt. Dugald W. Hudson, accomplished little of dramatic interest during the static phase preceeding the offensive of 15 March. Once the offensive was underway, however, and new territories were liberated or conquered, it was inevitable that persons of counterintelligence interest would appear.

On 23 March, an Oberscharfuehrer was taken first as a Prisoner of War, wearing a Waffen Schutz Staffeln uniform and with a Soldbuch in his possession. Interrogation revealed him to be a Kriminal-Assistant in the Sicherheitspolizei who had been sought for employment as a Gestapo agent, but who had refused the offer. As Kriminal-Assistant, he had been active in the apprehension of anti-Nazis and, in 1943-1944, as an investigator of Greek resistance movements. He held the Nazi Party's Bronze Medal. The Division Detachment forwarded their captive to VI Corps CIC for further investigation, recommending internment. 176

The 104th CIC Detachment Arrests Eight

Eight suspects were sent to First Army by 104th CIC Detachment during the period. Two were established as Hitler Jugend agents with a mission, and investigation of them continued. Out of six "Rhine crossers," apprehended by the Detachment,

175 102d CIC Det Monthly Information Rpt for Mar 45, dtd 1 Apr 45 (CONFIDENTIAL) (Staff and Faculty Library)

176 103d CIC Det for Mar 45 dtd 1 Apr 45, (CONFIDENTIAL) (Staff and Faculty Library)

two proved to be Displaced Persons; three Prisoners of War, and the other was still under investigation at the end of the month.[177]

The 13th Airborne CIC Detachment: Security in Rear Areas

In an area north of Paris, the 13th Airborne CIC Detachment concentrated on checking civilians and security. Of 382 prospective employees of the U.S. Army, the Detachment discovered forty-four to be of doubtful morality and thirty-four undesirable from a security standpoint because of subversive or disloyal activities.

The Detachment made 108 security checks of Division installations and reported, ". . . at present the Division maintains an excellent physical security set-up."

The investigation of one suspicious person, later discovered to have been using fraudulent Office of Strategic Services identification, resulted in his arrest as a deserter from the Canadian Army and as a black marketeer. Three persons in Belgium were jailed and three American officers in Paris were held under suspicion of conspiring with the Canadian. The investigation initiated by CIC was followed up by Criminal Investigations Division (CID).

Airfield security,[178] especially at bases operated by the Troop Carrier Command, was surveyed by agents of this Detachment " for the purpose of providing the Division, G2, with a general picture of what the security responsibility of airborne troops will cover and what security measures are being taken by the Air Corps to safeguard any impending operation".

The 13th Airborne CIC Detachment claimed close cooperation from the G2 of Division and from the local Oise (France) Base Section CIC, as well as with Military Government. CIC and Military Government even shared quarters in the 13th Airborne Division, and both units planned "on continuing the practice whenever possible."[179]

Airborne Attack Against Wesel: "The Most Successful"

On the night of 23-24 March, a river-breaching bridgehead was established in the British 21st Army Group domain east of the Rhine at Wesel, Germany. Units of the Ninth U.S. Army, under British control, which participated were the 30th and the 79th Infantry Divisions of XVI Corps. These Divisions assaulted the far shore in landing crafts.

This bridgehead secured, airborne troops landed ahead of it, in Operation Varsity, joining up forces in what General Eisenhower called "the most successful airborne operation we carried out during the war."[180]

For the 17th Airborne CIC Detachment, however, the victory was not unmarred. The scrawled, inked daily entries in the War Diary of the 17th Airborne Division's CIC Detachment carried no hint of the tragedy which was imminent. It told of CIC Agents preparing for a mission, systematically, efficiently checking and re-checking security of the area to make sure that the enemy would not learn of the strike. Some of these entries gave a clear picture of Airborne CIC agents before an action getting ready to shoulder the dual responsibility of counterintelligence and combat.

The entry of 22 February 1945 stated: "Cleaning of weapons and servicing of jeeps were begun." Three days later new supplies were received, and "Lt. Whalen of the 18th AB Corps CIC visited this Detachment and G-2."

On 26 February the Detachment "requested and received from Division QM six glider badges for qualified glidermen." In the few days that followed, fingerprints were taken, the Articles of War were read, a film on "Germany" was shown and the repair of the jeeps was completed.

On 2 March, "Lt. (Eldon B) Allen,[181] T/Sgt (Kevin) Burk, T/3 (Ernest M.) Bouchard, T/3 (fnu) Resnick, Sgt (fnu) Lagemann, Pfc (Louis) Fischoff, Pvt. (Gunther) Antler took glider rides today. New weapons were received, stripped and cleaned on the 3d. "The next day the detachment" received a letter from Army Hq (First Allied Airborne Army) ordering glider rides on Feb 8th for T3s Bouchard and Resnick, Pfc Fischoff and Pvt (Anthony J.) Tornetta. Lt Allen and Pvt Tornetta inspected the War Rooms."

180 Op cit, Eisenhower 388-391

181 Lt. Eldon B. Allen, the CIC officer in whose honor Fort Holabird's Allen Hall has been named.

More fingerprinting, receipting of equipment, and glider rides for T/Sgt Erny W. Briggs and the newly-promoted Cpl. Anthony J. Tornetta filled a few more days, and on 9 March, "Lt Allen, T/Sgt Briggs and Cpl Fischoff visited airfields to check security."

Increased Prominence of Airfield Security

From this point on, airfield security assumed paramount importance. Briefing quarters of regiments were also thoroughly checked, and summaries of all security surveys were forwarded to Corps CIC, with the exception of the reports made as a result of a two-day confidential inspection of security at airfields in France, which were carried to the G2 by Lieutenant Allen.

New Men arrived from other units. Lt. Gerard G. Cameron of XVIII Airborne Corps (218th) CIC Detachment was attached to the Division Detachment on 18 March. Two agents arrived from 13th Airborne CIC to discuss security for airborne operations, and remained with 17th Airborne CIC for three days. Sgt. Kenneth W. Dobson of the 218th CIC Detachment was placed on temporary duty with the 17th CIC on or about 17 March.

Final briefings were held for agents "travelling with regiment . . ." On 19 March, Agents Burke and Kurt Gabel - on detached service with the 17th Airborne CIC - "left this morning to join the 507th Prcht (Parachute) Inf. Regt.

"T/Sgt Briggs and Cpl Antler left for 194th Glider Inf Regt. . . . Sgt Lagemann and Pvt John E. Gardner left for 513th Prcht Inf Regt . . . .CIC credentials left behind by agents who left today."

The entries for 20 March stated that preparation for movement continued and that Lieutenant Cameron was reported as attached to the Detachment to the Morning Report Section.

On 21 March: "Lt. Allen, Cpl Tornetta, and Pvt Rauner left at 9:30 A.M. in jeep for airfield. . . .Adj. Courivaud, T/3 Bouchard, Cpl Fischoff left at 11 A.M. by overland route."

Administrative details occupied the diary notes for the next week, but on 29 March, one sentence led off the entries.

"Learned of Lt. Allen's death in operations being continued in Germany." On 30 March, the rest of the tragedy was unveiled: "Learned that Lt. Cameron, Cpl Tornetta, and Pvt. Rauner had been killed together with Lt Allen in glider crash." The story had been completed for the three CIC Agents. Private Rauner, apparently, was not a CIC Agent. He may have been a jeep driver or an interpreter from one of

the Regiments in the 17th Airborne Division. He was only mentioned twice in the War Diary of the Detachment - when he left for the airfield, and when his death was announced.[182]

The glider which carried the four men into enemy territory was hit by anti-aircraft fire while landing. The four managed to get out safely, but were struck down by small arms fire from the enemy.[183]

Upon learning of the casualties, Captain Dearing wrote into the 218th CIC Detachment's records:

"It will be difficult indeed to fill their places in our ranks. It will be impossible to fill the places they hold in the affection and esteem of all their fellow members of these detachments.[184]

218th CIC Detachment: The Airborne Corps

The 218th CIC Detachment, with XVIII Airborne Corps, carried much responsibility for security of Operation VARSITY both in the planning and in the operational phases. Agents located one woman, accused by French National Police Inspector Lobet of informing on eleven members of the Maquis working in a Corps Artillery installation. She had been hired without request for CIC clearance. Two agents of the Detachment arrested her and turned her over to the French authorities for disposition.

Agents of the detachment recommended the dismissal of three other women, one employed at the Junior Officers' Mess and the other two by Corps Artillery, after investigation established them as German collaborators.

In another investigation, a Private, masquerading as a Major, was arrested when another enlisted man told CIC of their chance meeting in the park and the suspicious nature of the "Major's" questions. The alert enlisted man had made plans to meet the pseudo-officer again, and two CIC agents accompanied him.

182 War Diary of the 17th Airborne CIC Det, 15 Mar 43-29 May 45 (22763) Master-17th Abn Div - No. A8275472 (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.).

183 Copy of Ltr, 218th CIC Det to Mr. A.G. Cameron, Princeton, N.J., dated 9 May 1945, s/Albin P. Dearing, Capt, Det Cmdr (Kansas City Record Center Box 25098)

184 218th CIC Detachment, Rpt of Activities, 19-25 Mar 45, dtd 28 Mar 45, in 218th CIC Det Weekly Summary Rpts, Feb-May 45 (CONFIDENTIAL) (Kansas City Record Center Box 25098)

When the man admitted he was a deserter, CIC turned him over to a Military Police battalion. He was declared of no interest to counterintelligence.[185]

CIC Agent Checks Scrambler

Upon the request of the G2, XVIII Airborne Corps, the 218th CIC Detachment conducted an investigation to check the security of a "scrambler," a device which scrambled outgoing messages and unscrambled incoming information. It was located in the closet in the Chief of Staff's clerk's office at Corps Headquarters.

One CIC agent, dressed as an officer, walked without interference into the closet, locked the door and remained fifteen minutes checking the possibility of tapping the device. The scrambler was not sealed, and the cover came off easily with the removal of a single wire. The agent left the room and proceeded to the courtyard of the Command Post. He located a ladder and climbed up to the ledge of a window in the clerk's office. With the telephone hand set that he carried, he simulated tapping the wires, remaining ten minutes on the ladder. He then climbed down, returned the ladder to its proper place, and left the Command Post, still carrying the telephone hand set. At no time was he questioned about his activities. The incident was reported to Corps Headquarters.[186]

Garrison and Field

With the committment of elements of XVIII Airborne Corps into action between 19 and 25 March, two phases of counterintelligence were performed simultaneously: The "Garrison" phase, or counterintelligence with the accent on area security, and "Field" counterintelligence, under combat conditions.

In Garrison, at Corps Base, advance details were organized for the move to forward areas assigned for the Corps "Land-Tail,"[187] which would participate in the airborne bridgehead across the Rhine.

185 218th CIC Det, Summary of Activities, 5 Mar-11 Mar 45, dated 12 Mar 45 in 218th CIC Det Weekly Summary Rpts Feb 45-May 45 (CONFIDENTIAL) (Kansas City Record Center Box 25098)

186 218th CIC Det, Summary of Activities, 12 Mar - 18 Mar 45, dtd 19 Mar 45 in 218th CIC Det Weekly Summary Reports Feb - May 45 (CONFIDENTIAL) (Kansas City Record Center Box 25098)

187 Land-Tail: Apparently a code name for the landing craft assault against Wesel.

One thousand displaced persons whom CIC believed to be a threat to the security of operations were removed from Corps area. Special passes for admittance to airborne assembly areas were prepared and flown under the supervision of a CIC agent to each of the subordinate airborne divisions.

Completed reports on security checks conducted on fifteen airborne assembly areas were forwarded to Army with the suggestion that they be filed for future reference. They were supplemented with overlays, notes on guard systems, and diagrams of temporary structures designed for the protection of the areas in accordance with security directives.

Last minute additions and changes in the Counterintelligence Annex to the Corps Intelligence document was forwarded to divisions participating in Operation VARSITY.

D-plus 1-at-Wesel

Armed with target lists prepared by the First Allied Airborne Army, Captain Dearing and Special Agent Marwick crossed the Rhine with Corps Tactical Command Post-probably as part of the "Land-Tail" operation - one day after the airborne bridgehead had been established. They soon discovered, however, that tactical unit commanders had ordered all civilians to be picked up and put away with the Prisoners of War. About four hundred civilians were interned by 25 March at several regimental Prisoners of War cages.

At one of the cages, Captain Dearing learned that other Special Agents of the 218th CIC Detachment had screened 137 Germans, Russians, Ukrainians, Poles, Belgians, Dutch, Roumanians, and Italians. Those properly considered as displaced persons were sent to Displaced Persons Centers. The Germans were screened carefully, and suspects separated from those allowed to return to their homes under the aegis of Military Government.

In the Anglo- American air-water-land strike, the British Field Security Detachment under XIII Corps had responsibility for the town of Wesel. A search of Sturm Abteilungen Headquarters revealed some pertinent documents, but most addresses were wrong or the building had been bombed out. One-sixth of the town's population of 12,000 remained.[188]

188 218th CIC Det, Rept of Activities, 19-25 Mar 45, dtd 28 Mar 45, in 218th CIC Det Weekly Summary Reports Feb-May 45 (CONFIDENTIAL) (Kansas City Record Center Box 25098).

Chapter 4

CIC in German Cities

As a result of the Rhineland offensives in February and March, CIC operated for the first time in German cities which had not been almost wholly evacuated by the civilian inhabitants.

Three of these cities - Cologne, Bonn, and Coblenz - were considered of enough importance for exploitation by "T" Forces, in addition to exploitation by those units under whose jurisdiction the cities would fall as a result of tactical maneuvers.

The Plan is Formulated

Planning for the capture of the key Rhenish cities of Cologne and Bonn had been progressing since early in the European campaign. On 3 March, with tactical elements approaching the suburbs of Cologne, a letter from General Collins, VII Corps Commander, placed the responsibility for counterintelligence in Cologne jointly on the 207th CIC Detachment and T-Force CIC. To ensure adequate coverage of this German city, the largest west of the Rhine, General Collins requested that each Divisional CIC Detachment contribute to the Corps CIC Detachment a CIC team of one officer and four agents.

The naming of the 207th CIC Detachment as the responsible counterintelligence organization in Cologne, the letter noted, was "primarily designed to avoid the inevitable confusion and loss arising from changing jurisdiction and multiple 'take-over.'"[189]

The 503d CIC Detachment: Comments on CIC Organization

The 503d CIC Detachment, operating in and around Cologne during most of March, collected some individuals who fell within automatic arrest categories and arrested one woman in Liblar who was harboring a German soldier who had not been discharged. She was eventually turned over to Military Government for prosecution, after first being sent by mistake to First Army Interrogation Center with the captured soldier.

Some Suggestions Worthy of Note

The investigative experiences of VII Corps provided Detachment Commander Theodore Black of the 503d CIC with facts for some recommendations. The

189 Ltr, Hq, VII Corps, Subj: Counterintelligence Coverage of Koln, to CGs, 3d Armd, 8th, 99th, and 104th Inf Divs, dtd 3 Mar 45, in 503d CIC Det Sit Rpts 10/44-6/45 (CONFIDENTIAL), (Kansas City Record Center, Box 25104).

Detachment's present situation in reserve status for the Division, he said, had placed a large area along the east bank of the Erft Canal under its jurisdiction. Records had been received from 8th and 104th CIC Detachments, which had prior jurisdiction over the area. The permanent Military Government Detachment at Frechen had indicated that there was much Military Government - CIC work of a "more-or-less longer-term nature to be done," but the indecision concerning their duration in the area presented several problems to the 503d CIC Detachment.

Immediate problems included rest and rehabilitation for Detachment personnel and maintenance of its equipment. Although Division personnel could use this period for rest and maintenance, members of the CIC Detachment worked constantly, handling the many counterintelligence tasks confronting them. They had no time to organize the piles of records they had accumulated; no chance to repair and overhaul their equipment; and no opportunity to relax, to shed some of their personal fatigue. They could make the time, but only at the expense of the area's security.

Another problem, "the inevitable confusion and loss arising from changing jurisdiction and multiple 'take-over,'" had been pointed out in General Collins' letter pertaining to counterintelligence jurisdiction in Cologne. Captain Black called it a "practical provision" which attempted to reduce the number of take-overs to a minimum, and asked recognition for the fact that the same loss of efficiency applied with "equal strength to large areas as well as thickly populated cities."

"As long as the jurisdiction over an area is shifted from one tactical commander to another, there will continue to be some flux in civil matters, as the tactical commanders are the Military Governors of their areas," Black continued. He cited Military Government's anticipation of the problem "to the extent of organizing Military Government Detachments, pin-pointed to handle civil matters within areas which correspond to German political subdivisions. Thus, Division Military Government entered the area to assume supervision of the activities of a permanent Military Government Detachment" which would have jurisdiction of an area until "US jurisdiction is eventually relinquished to the British." The Military Government Detachment remained stable, although different Divisions moved into and out of the area, with only the supervising authority being changed.

"On the other hand, CIC, while recognizing the problem in theory," commented the Detachment Commander, "has no practical method of maintaining the necessary continuity; until an area becomes ADSEC territory, CI problems must be handled on a transitory basis by transient CIC personnel attached to tactical units - an unsatisfactory system at best."

As a solution to the problems, Captain Black suggested "the attachment of CIC agents directly to Military Government Detachments, with the specific mission of covering such assignments as registration-screening, investigation of local officials and applicants for Military Government passes, building up of local informant

systems (a man-to-man job of great importance which cannot be handled on a transitory basis), and similar longer-range jobs." A solution to the problems, according to Captain Black, would be dearly appreciated by Detachments "such as this one, upon which the whole weight of the matter is thrown."

Captain Black also suggested the establishment of a Detention cage "set up close behind Division areas, possibly under Corps supervision, with MIC staffs..." which would preclude the necessity of sending suspects directly to First Army Interrogation Center, which, in Captain Black's opinion, "involves too great a displacement of the subject from the locale in which he would be of greatest value in CI investigations."[190] This had already been developed by Third Army, and VIII Corps, at least, had set up their Detention Camp by this time.

T-Force Gets Ready

On 1 March 1945, the Target Section of Headquarters "T" Force had been moved to Headquarters Twelfth Army Group Main and established there as a branch of G2 Section under Col. John H F. Hackett, with Lt Col B. Edwin Sackett as his Executive. The change was effected after the realization in February that the preparation and dissemination of target data to armies for the pending offensive would be an impractical task for the Target Section if it remained at Headquarters "T" Force.

On 2 March, "T" Force left Vieux Waleffe, Belgium, where the Command Post had been since 23 December and where components had reassembled after temporarily serving with First Army during the Battle of the Bulge. It moved to Eschweiler, Germany, to prepare for entry into Cologne. Because Bonn was expected to fall to American forces at about the same time, a sub-force under the command of Lt Col Dale M. Garvey was formed, called Sub-"T" Force "A".[191]

By 4 March, "T" Force was operating in the suburbs of Cologne, but the part of the city west of the Rhine was not opened completely until 8 March. An organization of 973 persons and 175 motor driven vehicles plus 215 investigators from 24 different intelligence agencies reduced the targets in Cologne by 25 March. Close liaison was maintained with VII Corps CIC and other intelligence units during the reduction process and complete files of "T" Force action on targets were delivered to VII Corps CIC at the end of the operation.

Eighteen CIC agents and special agents participated in the Cologne operation, attached to "T" Force. This group cooperated with VII Corps CIC, Tactical

190 503d CIC Det, CIC Situation Summary, 12-18 Mar 45, dtd 19 Mar 45, to ACofS G2, FUSA, thru VII Corps G2, in 503d CIC Det Situation Reports (CONFIDENTIAL), (Kansas City Records Center, Box 25104).

191 12th Army Group Report of Operations (Final After-Action Report) Vol IV (RESTRICTED), (Staff and Faculty Library).

Reserve Teams of the 418th CIC Detachment, and military intelligence interpreter personnel. The size of the total force of intelligence and counterintelligence specialists made it possible for each place of civilian registration to be manned by experienced personnel. During the screening, several arrests of persons of counterintelligence interest were made on the spot. When "T" Force left Cologne, this was no longer possible. Instead, cards were filed and checked against black lists when the registration was completed. The Cologne area gradually came under the jurisdiction of the new Fifteenth U.S. Army.[192]

Another CIC Unit: Tactical Reserve Team No. 9

While Cologne was still under VII Corps jurisdiction, however, a number of exciting incidents afforded a break from the usual routine. Agent Henry Beissinger was apparently the first CIC agent to sample Cologne's strange brand of hospitality.

Agent Beissinger and another CIC agent, both from Tactical Reserve Team Number 9 of the 418th CIC Detachment, were trying to locate a German in whom SHAEF was interested. They dashed along the water front in Cologne, which was still under fire. Locating the house they had been looking for, the pair went inside. Beissinger walked down a long gloomy hall to a darkened living room. He assumed the footsteps he heard behind him were those of his partner. After surveying the room and finding no one, Beissinger said aloud, "Well, doesn't seem to be anybody here. What do you think?"

"Was?"

Beissinger whirled. A huge German soldier, fully equipped, faced him, his hands raised in surrender. The CIC agent then bellowed in German for everyone in the house to come to the living room. Four other German soldiers joined the group, and Beissinger's partner, who had gone into another room, returned to find the agent with five candidates for the Prisoner of War cage. Anticlimactically, the Germans claimed that it had been their intention to desert to the Americans anyway.[193]

VII Corps CIC Detachment: Counterintelligence at its Best

Agents of VII Corps CIC Detachment were kept busy in Cologne. The detachment jailed sixteen Gestapo espionage and sabotage agents, one Abwehr officer, four

192 15th US Army Counterintelligence Bulletin #3, dtd 24 Apr 45, pg. 3, from Memo, 418th CIC Det, TRT #14, 2 Apr 45 in L-633 (11) 15th Army Monthly CIC Reports and Counterintelligence Bulletin, Apr 45, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

193 418th CIC Det, 12th Army Group, CIC Monthly Bulletin #3, dtd 6 May 45, (CONFIDENTIAL), (Staff and Faculty Library).

Gestapo employees, and several line crossers. The normal carload lots of arrestees continued to roll in. In one afternoon, with the aid of ten linguists, 200 prisoners of war were arrested and evacuated.

Aided by Tactical Reserve Team Number 14, VII Corps agents matched wits with a Gestapo officer on the enemy side of the Rhine for two weeks.

The Gestapo officer was charged with infiltrating agents into American territory, and he must have wondered how his hirelings were doing. One of his agents, arrested early in the contest, provided information on future river crossings. CIC compiled a timetable and alerted the river guards. As soon as an enemy appeared, he was caught and placed in the local jail. In a matter of days, six of the Gestapo's agents had crossed the Rhine into captivity.

Some of the German agents had been told by German Intelligence Service to volunteer to be "doubled" after they had been captured. The Americans, it was believed, would send each agent back to his homing place, but the German Intelligence Service had been ill-informed. None of the volunteers were handled so charitably by CIC.

Female agents, too, had instructions from German Intelligence Service. They were to use every means at their disposal to capture an American officer's attentions and learn through him the intentions of the tactical forces. According to the 418th CIC Detachment's Third Monthly CIC Report, "the seduction rate of American officers (was), from the German Intelligence Service's point of view, still at an alarmingly low state".[194]

This morality or security-consciousness was not an assured commodity, however, and First Army, in an annex to a G2 Periodic Report, treated the topic with less flippancy. Under the title, "Displaced Women," First Army cited the "thousands of women behind our lines and throughout Germany" as "a security menace that calls for more than passing consideration. . ." The report reassured the soldiers that not every woman there was a "Mata Hari," adding, "this is especially true since she was reputed to be a rather striking beauty. . ." But it did warn the soldier against trading military information for feminine companionship, and it reminded him that the policy of non-fraternization included everyone in Germany.[195]

Along Came Greta, An Extraordinary Girl

Oddly enough, it was a female German espionage-assassination agent who proved the most valuable "catch" for VII Corps CIC agents operating in Cologne.

194 418th CIC Det, 12th Army Group, CIC Monthly Bulletin #3, 6 May 45 (CONFIDENTIAL), (Staff and Faculty Library).

195 First US Army, Annex 5 to G2 Periodic Rpt #290, 25 Mar 45, in Opn Rpts L557, FUSA, (23) (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

Described as a "better-looking than average Belgian girl, in her twenties, medium height, blonde hair, and an interesting figure," the agent had been sent across the Rhine in a boat, which capsized. Her companions allegedly went down with the ship, but "Greta" -- as she was re-named by CIC -- made it ashore where she was captured by tactical troops and taken to VII Corps CIC Detachment.

From the time of her arrest on 12 March until she was turned over to Special Counter Intelligence for further exploitation, "Greta" provoked reactions of wonderment and suspicion from CIC Agents Fenton Moran, Daniel B. Badger and Henry Kent, who worked on her case and with her on subsequent cases.

"Greta's" missions for the Germans included the establishment of operational sites for radio agents who were to follow; the freeing of Cologne Gestapo personnel who had been collected as Prisoners of War by American troops (they had changed into ordinary police uniforms); and the assassination of a former interpreter and chief of foreign V-Maenner (petty informers) at the Cologne Gestapo, who was known to have stayed behind and who, the Germans believed, might reveal valuable information to the Americans.

With four years of Gestapo experience behind her, the girl agent was considered by the CIC agents who knew her capable of completing all of these assignments single-handedly. Her complacency during her employment as an informant by CIC under combat conditions and her steadfastness as she faced persons who would have killed her immediately if they had known she was working for the Americans caused CIC to relate that, beyond her physical attributes, no resemblance to "ordinary womanhood" existed.

"Greta" was fluent in French, German, Flemish and Dutch, and the agents suspected her of being adept linguistically in English, too, though she never faltered in her denials of this accomplishment.

Based on information from "Greta," CIC alerted the 415th Infantry Regiment's S2 to have outposts along the river ready to apprehend the anticipated radio agents. "Greta" stood on the shore at the designated point and flashed the prescribed light signals Rhine-ward, but the infiltration was not attempted.

The CIC agents discarded this effort after two nights, but, in the meantime, one agent put on civilian clothes and escorted "Greta" to an address she had been given by the Gestapo. At the house, "Greta" and the agent, who spoke fluent German, feigned a desire to make contact with Gestapo personnel. They learned that Gestapo Kommissar Klemmens had resided in the house before he had evacuated Cologne, and that the residents were quite eager to serve as a letter-drop for the Gestapo.

Other CIC agents arrested the residents after the undercover visit, and, after interrogation by VII Corps personnel, the would-be Gestapo aids were sent to First Army Interrogation Center.

"Greta" and other CIC informants aided in locating the Gestapo interpreter she had been sent to liquidate. Much information on the organization and personnel of the Cologne Gestapo was given by this lead. While in custody of CIC, he slashed his wrists, but the suicide attempt was unsuccessful. After recovery, he was sent to First Army's Interrogation Center.

In another case, "Greta" was placed in a room with a man awaiting interrogation after apprehension for trespassing in a restricted area. Preliminary interrogation had failed to develop any information except the plausible story that he was a former river boat captain and had violated the restriction because he wanted to repair his craft. "Greta," posing as a "cut-out" for a Gestapo operative (A Special Counterintelligence Agent in an undercover role), sounded out the seafarer on the prospect of getting her back to the Gestapo. The man agreed, after several contacts, but suddenly changed his mind on the basis that any act to help Germany at that time was futile. CIC Agent Henry Kent arrested him and sent him back to the Army Interrogation Center.

Before her final disposition to Special Counter Intelligence, "Greta" went through processing as a displaced person in order to "finger" any Gestapo agents she might encounter using the Displaced Persons stream as an artery of infiltration, and she aided other CIC agents in Cologne in their searches for stay-behinds.

Though her value to CIC was undeniable, "Greta" received none of the plaudits which would have been awarded "ordinary womanhood" for similar exploits. Instead, VII Corps Periodic Report No. 77, perhaps to reiterate the dangers of the feminine enemy, said, of this girl with "a rather appealing face, a pleasant and quiet manner," that "A gangster's moll is a haloed angel in comparison."[196]

The level of counterintelligence activity in Cologne by the 207th CIC remained high. A Dutch citizen, initially apprehended by CIC on denunciation as a Gestapo agent, admitted having assisted the Gestapo in several non-political arrests, but this was, he stated, a necessary cover for his true activity of organizing and operating the Free Netherlanders - a group of anti-Nazis of several nationalities who were forced laborers under the Germans. He gave 207th CIC agents valuable tactical and counterintelligence information. Nothing he did, however, was performed without CIC's knowledge, as agents were assigned to maintain a close, continuing surveillance of their informant.

A Belgian whom the 301st CIC Detachment had sent on a mission in October 1944 was arrested on 21 March 1945, after crossing the Rhine at night in a boat with

196 A compilation of material from: Hq, VII Corps, 207th CIC Det, Monthly Information Report for March 1945, dtd 1 Apr 45, (SECRET), (Staff and Faculty Library); and VII Corps G2 Periodical Rpt #77 in Opn Rpts L557 FUSA (17), 17 Mar 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

several others. His story that he had engineered the boatride with Gestapo agents who were admittedly on espionage missions did not impress agents of the 207th CIC Detachment who interrogated him. They thought he should have returned sooner, and so did 301st CIC, which had placed his name on the First Army "Wanted List." The Belgian was forwarded to the Army Interrogation Center where he would also have to answer some adverse charges which had developed after his commitment as an Allied agent.

In another instance, CIC agents of the 207th CIC Detachment recognized a Frenchman who had been doubled by Special Counter Intelligence after his capture while on an espionage mission for the Germans during the Battle of the Bulge. led the agents to a cellar where his mistress and three others were arrested simultaneously. indicated that with his mistress he had infiltrated a sabotage cell. While his concubine was kept in custody, was permitted to roam the streets in the hope that he would lead CIC to some other Gestapo personnel. He failed to produce, and all of the arrestees, except one who was found innocent, were sent to the Army Interrogation Center. The innocent one was kept under surveillance and a fixed surveillance was placed on the building in which the group had been arrested. This was unproductive, however, and on 10 March the remaining residents were arrested. Investigation revealed no Gestapo contact and they were released.

Other cases were handled by 207th CIC Detachment during March 1945. One concerned a recruiter for German stay-behind operators who was arrested through information supplied by a suspicious neighbor.

Another led to the capture of an espionage agent who had been entrusted with the mission of re-opening a restaurant in Cologne to serve as a rendezvous for German agents. Showing a strong lack of originality, the agent claimed upon interrogation by Special Agent Fenton Moran that he accepted the mission to be in a position to help the Americans. A test of his willingness to cooperate - in the form of a mission assigned by VII Corps command - shattered his facade of friendship, and he was sent rearward to the First Army Interrogation Center.

Six low level espionage agents from the Hitler Jugend organization were captured crossing the Rhine, and interrogation by 207th CIC Detachment revealed that more of these agents could be expected in the future.[197]

Relations with Military Government in Cologne

Certainly as important as 207th CIC Detachment's method of operation on these cases was that organization's relationship with Military Government in Cologne. A

197 207th CIC Det Monthly Information Rpt for Mar, dtd 1 Apr 45, (SECRET), (Staff and Faculty Library).

team, Special Agent John H. Reber and Agent Nobert G. Barr, was appointed to work with Military Government. According to one of their reports, the team's office at Military Government was "almost an undercover position from which CIC can investigate and keep in touch with what each category is doing, for persons of importance must come through this office, and they can be interviewed or called in under cover of Military Government screening, so that each category does not see itself as obviously under investigation."

The CIC agents reported that Military Government in Cologne generally kept to the policy of using no Nazi members in civil government. CIC pressure was needed in only a few cases, but these few cases were regarded as important "for if once an exception had been made, the flood would have begun." Military Government adherence to the policy and the careful selection of officials with CIC aid had resulted in a "clean official government," and since Military Government had not deviated from policy, the CIC agents noted, "Military Government is in complete command so far, a break from Aachen tradition."

The CIC team cited two missions for itself: screening of Military Government employees and civil government officials, and interviewing interesting personalities in Cologne politics, industry, trades, professions, "who naturally call at Military Government sooner or later."

Apparently, the Military Government Office CIC Team left footwork to the other agents from the Detachments operating in Cologne, and concentrated only on those persons who came to Military Government. Still, two CIC agents could not handle all the potential suspects who wandered in, and "only leading persons of the civil government. . ." were investigated. For minor positions, Military Government accepted persons stating by Fragebogen that they were never in the Nazi Party, the Sturm Abteilungen, or the Schutz Staffeln.

This team of agents cleared ninety-two persons for responsible positions with Military Government or the civil government in the week ending 26 March 1945. Of these, one was cleared purely on the basis of the agents' interrogation and one was cleared on this basis plus the recommendation of an informant. The other ninety were interrogated by the agents and were vouched for by three to twelve informants. In addition, seventy-seven persons were cleared for lesser positions.

Seventeen persons were rejected for positions, but were not considered suspects. Among these were pre-war members of dangerous Nazi organizations, German Military Government representatives in conquered areas, a Hitler Jugend member and one fellow who had spent "10 years in U.S. without effort to become a citizen."

Another seventeen were unveiled as suspects, though only two were interned by Military Government on the spot. The CIC team let some of the suspects go

back to their homes without suspicion that an investigation of them was imminent. One former Abwehr officer was sent to the Interrogation Center by the agents.

Key personnel at Cologne's Ford plant, on the newspaper Kolnische Zeitung (the only large newspaper in the city the Nazis had left in private hands), and of the legal profession in the city were carded, and some preliminary investigations of them were undertaken. Local intellectual leaders were referred to Military Government.

Agents Reber and Barr, at the time of their report, were cooperating with two CIC agents of the succeeding CIC Detachment, orienting them on the card files they had prepared.[198]

The Gestapo in Cologne

The Cologne operations uncovered enough positive information about the Gestapo organization in that city that it was possible for two lieutenants, 1st Lt Peter J. Lert and 2d Lt Bernie G. Hecht, on duty at the Interrogation Center to prepare a complete resume of the organization by 18 March 1945. The Cologne operation was one more indication that the German High Security Office was now in complete control, and the Gestapo in Cologne had been reorganized to follow the plan of the ruling body.

One of the first statements of a captured Gestapo member was that he never used "Gestapo methods." Members were extremely fatalistic about their futures and convinced they would die. They indicated they would consider Americans weaklings if they were not punished severely.[199]

The CIC in Bonn

Sub-"T" Force "A," with 274 persons assigned, entered Bonn on 9 March. All the targets, including twelve of opportunity, were reduced by 18 March, and the sub-force rejoined the main "T" Force unit at Cologne. A total of fifty-eight buildings and forty persons were processed. The Bonn Military Government Detachment was given the target files at the end of the operation.[200] Of "T" Force CIC personnel, fourteen were attached to this sub-force for the Bonn action.[201]

The 1st CIC Detachment: Advance Information Uninformative

More than sixty German towns, in addition to the city of Bonn, fell under 1st Division control from 7 March until 25 March and the 1st CIC Detachment was, at various times, responsible for the security of each of them. Bonn, where the Detachment cooperated with "T" Forces CIC, was the major target.

It was inevitable, when a Detachment had to provide counterintelligence for an area far greater than its capabilities would permit, that some towns would be ignored. Reports from 1st CIC Detachment indicated that the Detachment received help from Regimental S2s in the selection of towns most urgently requiring counter-intelligence coverage. CIC found that higher headquarters had failed to provide them necessary target information in advance. So poor was the advance information 1st CIC Detachment was given about Bonn, that the Commanding Officer, Lieutenant Steinway, commented in a weekly report: "In retrospect, it is apparent that information supplied to this detachment by higher headquarters on the city of Bonn was very inadequate. Investigation of suggested white names revealed that several of those named were no longer in the town, and others were located but found to be unreliable. Information on building targets and black names was extremely meager. Practically no plans could be made in advance. . ."

Fortunately for this Detachment, the cooperating "T" Force CIC organization had accurate and detailed target information which, after 1st CIC Detachment learned of it, was requested and subsequently received. This was of some aid to 1st CIC. According to Lieutenant Steinway, if the information had been in the hands of 1st CIC's agents prior to the entry into Bonn the probability of destruction of records and the escapes of several black list personalities would have been lessened. He recommended that the information not only be provided in advance, but also that "in the future such information. . . be made available to all CIC Detachments on all towns and cities in their respective areas."

Removal of Nazi officials was given high priority in Bonn and surrounding towns under 1st CIC Detachment jurisdiction. Ardent Nazis were sent to the "T" Force Detention camp for further interrogation.

In Bonn, the 1st CIC Detachment cooperated with the 301st CIC Detachment also, in investigating appointees to local government posts. This Detachment was relieved by 8th CIC Detachment of their responsibilities in the Division area on 16 March 1945, and continued to concentrate on Bonn for a few more days until the 301st CIC Detachment was ready to assume full counterintelligence control of the city.[202]

---

202. 1st CIC Detachment, Weekly Report, 12 Mar - 19 Mar 45, in 301-2.2 (22292) G2 Jnl, 1st Inf Div, 10-28 Mar 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

One outstanding discovery of 1st CIC Detachment during this period was a store of Nazi Party records "too great to permit removal in a single vehicle." The information was given G2 for transmission to higher headquarters.

On 23 March, 104th CIC Detachment relieved the 1st CIC Detachment in the towns of Hovel, Aegidienberg, Himberg, Rottbitze, Brungsberg, and Siefenhoven, but, at the end of the period, 1st CIC still had more than twenty towns in its area of counterintelligence responsibility, in the vicinity surrounding Bruckhausen.[203]

Six German Agents Go from Bonn to Belgium

When Gert Reemsa, Flemish leader of a six-man stay-behind team of German agents of Belgian nationality from Frontaufklaerungstruppen (FAT) 363, realized that displaced persons in Bonn were being sent rearward, he released all eight pigeons in his care with messages of tactical importance. One pigeon carried the message: "Everything under control. Are forced to evacuate to Brussels. Abandoning material. Will get in contact through Switzerland. Troops with soldier patch "Rangers" in the village."

Entering the displaced persons stream in Bonn, four members of the team traveled in it to the end - which, for them, was the Verviers, Belgium, Displaced Persons Center, a journey of about fifty-five miles. There, First Army Interrogation Center personnel, aware of the use made of this avenue of infiltration by German agents, screened out the four and arrested them. The fifth was arrested the same day, 18 March, by an ADSEC CIC team, the 429th CIC Detachment, at Chevremont.

Their arrest prevented them from performing an assigned mission which included: contacting pro-Nazi Belgians in Brussels and establishing espionage and sabotage networks; the transmittal of military information to FAT 363 headquarters; reporting damage caused by the use of a new V-weapon, allegedly about to be used against Brussels; and the penetration of Allied intelligence agencies.[204]

The sixth agent, as of 24 March 1945, was still at large, though it was believed that he and his wife would go to Tongres, Belgium.[205]

The Approach to Coblenz

In a village in the suburbs of Coblenz, on 9 March, CIC agents John B. Corcoran and Joseph H. Kadlec of the 4th CIC Detachment received, from a small girl and her uncle, the village priest, information about some buried boxes. The informants did not know what was in the boxes, but they did know that men in German uniforms had buried them in haste and had attempted to keep the interment secret by posting guards and prohibiting entrance into the area. The girl had watched from a second story window in the rectory.

With the aid of a mine detector, three boxes were located, each containing supplies of sabotage materials. One was sent to 7th Army CIC Detachment for their scrutiny, and Captain Oliver D. Appleton, commanding the Detachment, expressed his belief that the experience was "indicative of the trend of enemy operations along sabotage and espionage lines and would tend to point to an organized program leading to future activity behind our lines.[206]

CIC in Coblenz

On 8 March, in Cologne, Sub-Force "C" had been organized for Coblenz. The sub-force entered the city on 18 March and, in four days, reduced all targets. They handled seventy-three buildings and fifty-eight personalities. The force of 301 persons and 43 vehicles then withdrew, relinquishing its target files to the Coblenz Military Government Detachment.[207]

Thirteen CIC personnel participated in the "T" Force operations at Coblenz, traveling over the same ground that Corps of Intelligence Police Agents of World War I had worked 27 years before.

Assistance from the 87th CIC Detachment

While covering Coblenz, Sub-Force "C" received cooperation from the 87th CIC Detachment which had worked in more than seventy German towns, including Coblenz in the first twenty-five days in March. The only item of counterintelligence importance which was found in Coblenz were some Sicherheitsdienst records which had once been in Luxembourg City. These were sent to Army level with the understanding that information of use to tactical CIC units would be re-disseminated up front.

206 4th Inf Div, 4th CIC Det, Monthly Intelligence Report for Mar 45, dtd 31 Mar 45, (SECRET), (Staff and Faculty Library)

207 12th Army Group Report of Operations (Final After-Action Report) Vol IV (Staff and Faculty Library)

Agents of the 87th CIC Detachment, working in two-man teams (the usual custom of this Detachment: one team per regiment and four at Division CIC Headquarters), encountered the usual screening and police problems, with one unusual twist. In order to screen the inhabitants of Coblenz, it was necessary for the two teams of agents to enter the city's twelve air raid shelters, in which most of the people in Coblenz were living.

The 87th CIC Detachment had anticipated becoming heir to Sub-"T" Force "C's" counterintelligence records when the sub-force retired from the city, but the 87th moved the same day to Gonderhausen and then to Buchholz.[208]

Writing of this period, First Lieutenant Harwell noted that the Nazi Party had exploited the people in the interior more than they had those along the border, but, even in the industrialized towns, Catholicism still played a vital role in the lives of the people and had not been seriously affected by Nazi ideologies. Some priests admitted that they had been curtailed in their activities and a few of them had been imprisoned.

Every town, Lieutenant Harwell indicated, had its Hitler Jugend, Bund Deutscher Madel, and Volksturm. Despite orders from the Wehrmacht for the Volksturm to take up arms against the invading Allies, no evidence of compliance was found. In some cases, road blocks constructed by the fleeing Wehrmacht were removed by Volksturm members While they claimed this was done to aid the Americans in the pursuit of the German Armies, it was believed that the roadblocks were eliminated so that the advancing forces would not fire into the villages.

Desertion, according to Lieutenant Harwell, had become a serious problem within the Wehrmacht. As evidence of this, he cited the fact that documents found in Fort Konstantin, Coblenz, stated that any soldier or civilian attempting to induce a soldier to discard his uniform and desert would be shot. Deserters also said there would have been mass desertion if the soldiers were not fearful of being shot by Schutz Staffeln men.[209]

Variety of Investigative Activity

From the Detachment's Daily Reports, the wide scope of the Detachment's activities during this period was apparent.

---

208 87th CIC Det Daily Activities Rpts, 1-31 Mar 45, in 87th Inf Div G2 Jnls for Mar 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

209 87th CIC Det Counterintelligence Rpt #6, 6 Mar - 20 Mar 45, in 95th (sic) Counterintelligence Det Rpts, Folder of Bi-Weekly Rpts, Sep 44 - Jun 45 (CONFIDENTIAL), (Kansas City Records Center, Box 25095).

On 8 March, for example, Special Agent Herman Schnepel, accompanied by a First Lieutenant from the S2's office, and a priest, went to search for a hunting lodge which had been used extensively as a German command post. Finding the doors locked, Schnepel broke a window. Hearing noises from the upper floor, he had the priest call out for any soldiers in the place to come down unarmed. Four Germans came down the stairs and were taken into custody.[210]

The following day, a Volksturm leader from Ripsdorf was arrested by CIC. He admitted that his organization had twelve Danish rifles and five boxes of Panzerfaust 30, but said that they were all stored in the firehouse and that no one had manned the anti-tank barricades even though they were ordered to do so by the Regimental Commander. The weapons were confiscated.[211]

On 10 March, the offices of the Landrat (Governing official of a Landkreise or Rural County) for the rural county of Schleiden were searched. This building was the focal point of state and local governments within the Nazi organization. The ten rooms which housed the offices were filled with voluminous well-kept records, including economic affairs and communal affairs documents, police records of towns within the county, identification records for policemen in the villages, and complete files dealing with food supply. These records were preserved for Military Government by CIC.[212] Upon orders, the Landrat had burned some records of men serving in the armed forces.

A rumor of atrocity involving an alleged lynching of a lone survivor of the double crash of two American bombers was investigated on 13 March. The report could not be substantiated, and it was believed that the survivor had been taken rearward by autocar into Germany.[213]

In Bassenheim the next day, while monitoring telephone connections with Signal Company personnel, CIC agents learned that conversations on military lines could be picked up through civilian phones. A Signal Officer explained that this sometimes happened when wires were parallel - messages could jump from one line to another. A list of telephones in the town was obtained and the phones were disconnected. The Signal Officer went to Ochtendung, where all lines from Bassenheim reached a central switchboard and where a trunk line to Coblenz existed, to ascertain if 4th Armored Division CIC had discovered all cables and cut them. They had.[214]

210 87th CIC Det Daily Activity Rpts 7 Mar - 25 Mar 45, in 95th (sic) CIC Det Rpts, Folder of Bi-Weekly Rpts, Sep 44 - Jun 45 (Unclassified), (Kansas City Records Center, Box 25095).

211 Ibid., 9 Mar.

212 Ibid., 10 Mar.

213 Ibid., 13 Mar.

214 Ibid., 14 Mar.

On 15 March, a Headquarters CIC team worked Guls, a village under enemy observation and fire. Nineteen German deserters were arrested and marched back to the Prisoner of War Enclosure in Rudenach. One who had been shot in the leg trying to reach the Americans was abandoned. Three others were left behind under guard because enemy fire made it impossible to get them out. A Burgomeister was screened, approved and appointed by Military Government on the spot.[215] The CIC agents returned on 16 March and rounded up the four remaining deserters. Snipers fired five or six rounds at the agents of which "one came very close to the target."[216]

A sergeant of a Signal Pigeon Company requested CIC assistance on 17 December in finding out about some homing pigeons he had spotted. Twelve of them belonged to one German civilian, who claimed he had not used them. A soldier from the Signal Pigeon Company was moved into the house with the loft owner, with orders to watch the loft, and to seize any birds which flew in. The owner was prohibited from entering the loft.[217]

A Headquarters team, on 18 March, investigated a hunting lodge at Rehmstecken, where a collection of art treasures stolen from the Luxembourg Museum were reported to have been stored by the Germans. The CIC agents found the paintings and statues, each one bearing a plaque stating the piece belonged to the Coblenz Museum of Art. The original informant insisted that they were the property of Luxembourg. CIC placed "Off Limits" signs on the two doors leading into the storeroom and advised a Captain of a Field Artillery battery of the situation. He had decided to use the lodge as a command post.[218]

A week later, CIC received from the Division Chief of Staff a report that U.S. soldiers were leaving behind their captured rifles and bayonets, when they left Gonderhausen. Upon investigation, CIC discovered that the weapons being left had been taken from civilians and that these weapons were under the custody of a Captain of a Medical Battalion. CIC took the arms back to Buchholz and turned them in to an appropriate officer.[219]

Chapter 5

Summaries and Anticipations

A statistical breakdown by percentages of counterintelligence arrests by categories for the month of March revealed that forty-five per cent of the arrestees were "security threats," who were interrogated and eventually cleared and transferred to Military Government as displaced persons or refugees; thirty per cent were deserters in civilian clothes; fifteen per cent were officials of the Nazi Party and strongly indoctrinated Germans who were also subject to internment; and ten per cent were Gestapo informers and petty V-Maenner (German internal security informers). As a result of interrogations, more than ten different German Intelligence Service dispatching units had been identified as operating against Twelfth Army Group.[220]

First Army Reports the Same Statistics

These percentages coincided exactly with those reported by the G2 of Headquarters, First Army, Colonel B. A. Dickson, five days before. Colonel Dickson's figures were for the area covered by First Army units only. It was conceivable that First Army's findings, on the supposition that they were representative, were published as Twelfth Army Group's statistics.

Special consideration was given in Colonel Dickson's report to the problem of fraternization. He indicated that compliance (with the non-fraternization policy) had been generally satisfactory, but that need for enforcement heightened when troops first entered a German city, such as Cologne, and were greeted as liberators. He also wrote that long static periods, which forced the occupation troops to be constantly exposed to the temptations of fraternization in a town, made strict enforcement necessary too.

The German civilians, in rear areas, seemed aware of the policy, and they viewed it with great interest. They recognize it as "merely a security measure" and they did not believe it would last. It was strongly suspected that some civilians, especially of the feminine sex, delighted in inducing soldiers to break the regulation, but it was not felt that there was any organized effort behind the attempts. The potentiality existed, of course, that a crafty Nazi underground might make use of such tactics, and CIC was alerted for that possibility.[221]

---

220 12th Army Group CI Periodical Rpt #15, for Mar 45, in Opns Rpt L-502 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.)

221 1st U.S. Army CI Rpt #19, for 26 Feb - 25 Mar, dtd 24 Mar 45, in 207th CIC Det First Army File (CONFIDENTIAL), (Kansas City Records Center, Box 25097)

The German View: A Temporary Defeat

Throughout this period there were indications that the Germans considered the tactical fight lost. Nowhere was this more apparent than in the indications of long-range underground preparations the Nazis were making, not only for Germany proper, but for formerly conquered areas as well.

First Army Interrogation Center brought this to light in their Bulletin covering March 1945. In addition to their interim and complete reports on nearly 100 counter-intelligence suspects, interrogation center personnel carefully pointed to the types of activities which could be expected from the Nazis in the immediate and far-distant future.

SS Jagdverbaende, which CIC had encountered first in Alsace and referred to as a "Brandenburg" formation, was another organization the interrogation center exposed. It was pointed out that members of this group, though initially captured in German uniforms, had also been issued civilian clothing and had been given stay-behind missions of a long-range nature. Of one group, composed of twenty-five French turncoats, sixteen had been accounted for by Allied counterintelligence agencies. The captives interrogated at First Army Interrogation Center revealed that shipments of American uniforms had recently been received at headquarters for the SS Jagdverbaende, for use by French-speaking agents who were to identify themselves as members of the French Army fighting with Americans. SS Lt Col Otto Skorzeny was in charge of SS Jagdverbaende.

Another organization of French pro-Nazis, the Maquis Blanc, was explained by the Interrogation Center Bulletin. Members of this group were given double missions which included short-range tactical espionage and long-range subversion. After completion of the short-range mission, the agents were to avail themselves of the free transportation provided by the Americans for displaced persons and be carried deep into France. Once free in France, these persons were to infiltrate French government and political parties, gaining positions of trust and responsibility.

At the right time, they were to overthrow the existing French government and create a neo-Nazi government in France. Similar plans were fashioned for members who would attempt to infiltrate Allied intelligence agencies. A Maquis Blanc organization was scheduled for development in Belgium also, and while all this pointed to a feeling of immediate setback, it indicated that long-range thinking on the part of the Germans advocated the formation of a new Fifth Column which---to the rabid Nazi---would mean eventual victory.

The third group of present and future importance to counterintelligence analysts was the Hitler Jugend. While their potential mission had been discussed often since the first members were captured, the Interrogation Center Bulletin described some of the elaborate bunker preparations which had been created for stay-behind spys and saboteurs. During March, twenty-two youthful agents were arrested by units

with the First Army and turned over to the interrogation center. Eleven were apprehended by 8th CIC Detachment; ten by 7th Armored CIC; and one by the 205th CIC Detachment. Those on whom the investigation had been completed and the charges substantiated were turned over to Military Government for disposition. Others were held until further investigation could be conducted.[222]

Beyond the Rhine

The Remagen bridgehead had been widened to the Sieg River in the North and to three miles below Neuweid in the south, approaching, in most places, a depth of about ten miles.

Two other bridgeheads were established: one, near Rees; the other, into the town of Wesel. With the exception of two small German bridgeheads in the Ludwigshafen-Lauter River tributary area of the Rhine, the river had been closed completely by Allied forces by 23 March. The two persistent bridgeheads were mopped up by 25 March, greatly increasing German losses for the battles.

During the Saar-Rhineland encounter, ending on 25 March, 230,000 German soldiers became Allied prisoners of war. With the dead and wounded added, the Weekly Intelligence Summary concluded that German losses totaled twenty divisions.[223]

222 1st U.S. Army Interrogation Center Bulletin #8, dtd 1 Apr 45, in 207th CIC Det First Army File, Mar 44 - Apr 45 (CONFIDENTIAL), (Kansas City Records Center, Box 25097)

223 Weekly Intelligence Summary, SHAEF, Office of the AC of S, G2, No. 53, dtd 25 Mar 45, Part I (SECRET), (Staff and Faculty Library); Op cit, Eisenhower, p. 384.

Appendix 1

Training and equipment of the "Gamma Swimmers" or "Kampfschwimmers" or "Flusskaempfer," Dienststelle 45817-K, taken from 12th Army Group CI Interrogation Center Report entitled "Rhine Bridge Sabotage Missions," dated 9 April 1945, in 207th CIC Detachment Report on the Case of the Rhine Bridge Sabotage Missions Folder (CONFIDENTIAL), (Kansas City Records Center, Box 25097).

The swimming saboteurs referred to themselves as either "Kampfschwimmer" (combat swimmers) or as "Flusskaempfer" or FK (river fighters). The first term is a general one for any swimming saboteur; the second, which had been coined in September 1944 to replace "Gamma Schwimmer" (Rubber swimmer), indicates one who acts only in inland waters. A "Meereskaempfer" or MK (sea fighter) theoretically operated along seacoasts. "Gamma schwimmer" was dropped because it was of Italian origin, "Gamma" being Italian for "rubber."

All combat swimmers who belonged to the SS were at the time under the jurisdiction of the "Sondereinsatzabteilung der Waffen SS," directed by SS Lt Col Otto Skorzeny. Before November of 1944, since the SS had no facilities or instructors for this type of operation, the SS swimmers were placed under Naval jurisdiction with the "Kommando der Kleinkampfverbaende" or KdK (warfare by small units) commanded by Admiral Heye. The captured river fighters knew little about other operations of KdK, but they did know that one man torpedos, one man submarines, radio-controlled explosive-laden motorboats and similar boats which were not controlled were included in KdK's offensive machinery.

Six schools were used to train German and Italian combat swimmers. The curriculum at the Valdagno, Italy, school included: instruction in the nomenclature and use of swimming and diving apparatus; singing (to develop lungs); lectures on the effects of deep sea diving on the human body, precautionary measures, etc.; surface and underwater swimming with and without weights; brief instruction in the use of timing devices; and practise in swimming under a ship and attaching charges to the hull, practise in walking on sea bottom with diving suits and lead shoes and in the recovery of practise torpedoes used in nearby naval maneuvers, classes in elementary navigation, lectures and demonstrations in passing under water obstacles such as booms and nets, and a refresher course in the use of timing devices.

One school in Vienna trained similarly to Valdagno, and another at Klosterneuberg, north of Vienna, was a specialist school for river fighters. Details of training at Bad Toelz, near Munich, and Sylt Island, off the west coast of Schleswig-Holstein, were unknown to the captives.

Equipment

The first layer of clothing worn by these swimmers included two one-piece suits of heavy white woolen underwear covering the feet (presumably like baby pajamas); a padded cotton cap which covered the top and back of the head, fastening under the chin; and woolen gloves. The second layer was a rubber suit which included a high-necked, long-sleeved shirt with tight-fitting bands of thin rubber for the collar and wrist cuffs; trousers and shoes in one piece; a waistband, worn like a cummerbund over the juncture of the trousers and shirt; a rubber hood with built in sponge rings to protect the ears from the pressure of the hood; and long rubber gloves reaching almost to the elbow.

A protective suit of cotton, with laces on sleeves, legs and waist for a snug fit, covered the rubber suit.

In cold water, a standard Luftwaffe jacket chemically treated to generate warmth for a period of three hours was worn. The jacket's bouyancy forced divers to carry lead weights when they used the jacket.

Fins, carrying straps and hooks and the breathing apparatus completed the ensemble, however, a dark green wool knit cap with a face-covering of dark net was worn on some operations when the swimmer was at work on the target.

Rubber cement was used to seal all separations in the rubber suit. The suit could be worn for forty-eight consecutive hours, in or out of water. The German swatzstika was worn on the left breast of the outermost jacket with the German eagle hovering over it.

See the illustration attached to this Appendix as Exhibit "A."

Appendix 2

Development of Code for Machine Recording of SHAEF Personality Card Index for Germany, and two exhibits: A-Personality list sample in alphabetical order in one Wehrkreise in Germany (Incomplete) as it appeared in mimeograph form; B-Personality list sample, excluding Germans, by nationality (incomplete).

HEADQUARTERS 12TH ARMY GROUP
APO 655

310 (G-2) 28 March 1945

SUBJECT: Machine Recording of SHAEF Personality Card Index for Germany.

TO: Commanders concerned.

1. Annex A to Circular Number 20, Headquarters 12th Army Group, dated 7 December 1944, Subject, Machine Recording of SHAEF Personality Card Index for Germany, is hereby recinded.

2. The attached Annex A is supplied as a replacement for the rescinded Annex.

By Command of Lieutenant General BRADLEY:

/s/ J. H. BLOSS
Lt Col, AGC
Asst Adj Gen

1 Incl - Annex 4

ANNEX 4 - PART I: Spacing Assignment on the Machine Records Unit Cards.

SPACES	INFORMATION
1 - 20	Individual's name
21 - 34	Town
35	Sex of subject
36 - 37	Wehrkreis
38	Classification of subject
39 - 43	Organization or rank
44	Organizational level
45 - 46	Rank or position
47 - 48	Year position held at last report
49 - 50	Year of subject's birth
51 - 52	Nationality of subject
53 - 54	Source of information
55	Status of case
56 - 58	Place of detention
59 - 60	Disposition of case
61 - 65	Case number
66 - 67	Arresting agency
70 - 75	Arbitrary number assigned MRU card for accurate sorting
80	Duplicate cards

PART II: Code used on the Machine Records Unit Cards.

1 - 20 INDIVIDUAL'S NAME

Name spelled out, in order, last name
first name
middle initial
title

Each alias to be entered on a separate card in spaces 1 - 20, the normal space for names, and "C - (proper name under which filed)" entered in the space normally reserved for the name of the town, i.e., spaces 21 - 34 (C- being a one column homonym for see). In this way each alias will have an alternate MRU card for cross reference purposes.

21 - 34 TOWN

Town in which individual is most apt to be found (spelled out).

If individual has had an important post in one town and a residence in another, or if he has had any recent connection with more than one town which might suggest his continued presence in one of several towns, separate cards will be created.

35 SEX OF SUBJECT - one letter code.

Male M. Female F.

36 - 37 WEHRKREIS

The Wehrkreis are indicated by arabic numerals substituted for the usual Roman numerals except for the three indicated by the following two letter code:

GG General Government

PR Protectorate

AU Ausland

38 CLASSIFICATION OF SUBJECT

The SHAEF classification of individuals is used where applicable. The exceptions are three noted below under "S", "U" and "W". The augmented SHAEF classification is as follows:

A - denotes a person known or strongly suspected to be an officer, employee or member (but not an agent) of the Abwehr, Sipo & SD or GFP.

B - denotes a person known or strongly suspected to be an agent employed by the Abwehr or the Sipo & SD.

C - denotes a person who is known, or strongly suspected, to be an agent, but whose activities cannot be definitely related to either of the above organizations.

D - denotes a person who is under suspicion of being an agent or member of a hostile intelligence service because he has been reported as such, but on evidence which is felt to be inconclusive.

F - denotes a person who is anti-Nazi and believed willing to aid the Allies.

M - denotes a person who is suspect for any one of a number of miscellaneous reasons which are not categorized elsewhere.

N - denotes a member of the NSDAP or of other National Socialist or paramilitary organizations other than the SS.

O - denotes an official of the general civil administration.

P - denotes a member of the police, excluding the Gestapo and the Kripo but including the Feldgendarmerie.

R - denotes a renegade, any individual who owes allegiance to a power other than Germany but pays homage to Nazidom.

S - denotes a member of the SS other than an SS member who is also a member of Sipo & SD or the police and is therefore classified in one of the other categories even if primarily SS. (The normal SHAEF classification is SS).

U - denotes an individual who is the leader or a member of an organization plotting resistance against any Allied occupying force in Germany or an individual who has announced his intention of forming or joining such a group. (This is not a SHAEF classification).

W - denotes a War Criminal. (This is not a SHAEF classification).

39 - 43 ORGANIZATION OR RANK 5 letter and numeral code.

The code employed in spaces 39 - 43 is to be read in conjunction with the classification noted in space 38.

When space 38 shows classification "A", "B", "C" or "D", if the individual is a member of the Abwehr, the branch, and if possible the level, of the office for which he worked will be shown by a code built up in the following manner:

ABT1A - denotes a member of Abteilung I A - personnel

AB1WI - denotes a member of Abteilung I Wirtschaft - economic information

ABT2S - denotes a member of Abteilung II S - sabotage

AB3KG - denotes a member of Abteilung III Kgf - prevention of espionage in PW camps

ABTZK - denotes a member of Abteilung Zentral-kartei - central registry

ALS1H - denotes a member of Abt I H in an Abwehrleitstelle or Alst

AS1MT - denotes a member of Abt I MT in an Abwehrstelle or Ast

NES2S - denotes a member of Abt II S in a Nebenstelle or Nest

AU1TL - denotes a member of Abt 1 TL in an Aussenstells or Aust

MEK3H - denotes a member of Abt III H in a Meldekopf or MK

If the individual is identified merely as associated with the Abwehr with no indication of branch, the code will be ABT. If only partial association is noted as "Member of Amt II", as much information as is noted is entered, in the example given, ABT2.

When space 38 shows classification "A", "B", "C" or "D", if the individual is a member of the Sicherheitspolizei und Sicherheitsdienst, the code to be used will be SIPO if no indication is given of Aemter or other subdivision. If an Amt of the RSHA or SD is indicated, the code used will be SD followed by the number of the Amt, e.g., SD6. However, if Amt IV of the RSHA or the SD is mentioned, the code will be GESTA, as it will be when the only mention is Gestapo. If the individual holds a rank in the SS, the code for SS ranks noted below will be used in preference to the more general SIPO or SD inasmuch as the type of activity has already been indicated in column 38.

If the individual is a member of the Geheimefeldpolizei, the code used will be GFP.

If the individual is a member of the Nachrichten Dolmetscher Ersatz Abteilung, the code used will be NDEA.

If the individual is a member of the SS Jadgverbaende or any subordinate group including the Streifkorps, Jaegarbataillon 502, a Feldjaegerkommando, Lehrregiment Kurfuerst, or the 150 Panzer Brigade, the code used will be JAGDV.

If the individual is a member of the Brandenburg Division, the code used will be BRAND.

If the individual is a member of the Kriminalpolizei, the code used will be KRIPO.

It will be noted, in recapitulation, that wherever possible standard abbreviations as listed in the SHAEF CI HANDBOOK GERMANY are used in coding the Personality Card Index for MRU. Other than standard abbreviations so listed, the following codes may be found in spaces 39 - 43, if space shows classification "A", "B", "C" or "D":

ABT - the Abwehr, if followed by further identification, a specific branch of the Abwehr.

AL or ALS followed by numeral and letter - an Alst of the Abwehr.

NE or NES followed by numeral and letter - Nest of the Abwehr.

AU or AUS followed by numeral and letter - an Aust of the Abwehr.

ME or MEK followed by numeral and letter - a Meldekopf of the Abwehr.

BRAND - a member of the Brandenburg Division.

JAGDV - a member of a Jagdverband.

NDEA - a member of the Nachrichten Doimetscher Ersatz Abteilung.

When space 38 shows classification "N", the standard abbreviations as listed in the SHAEF CI HANDBOOK GERMANY for the National Socialist Party and its affiliated organizations furnish the code. Chief among these are the following:

NSDAP - Nationalsozialistische Deutsche Arbeiter Partei - National Socialist German Workers Party - the Nazi party.

NSF - NS Frauenschaft - Nazi party women's organization.

HJ - Hitler Jugend - Hitler Youth.

STANF - Standartenfuehrer	7
OSTBF - Obersturmbannfuehrer	8
STUBF - Sturmbannfuehrer	9
HSTUF - Hauptsturmfuehrer	10
OSTUF - Obersturmfuehrer	11
USTUF - Untersturmfuehrer	12
STASF - Stabasscharfuehrer	13
STSCF - Sturmscharfuehrer	14
STOBJ - Standartenoberjunker	15
HSCHF - Hauptscharfuehrer	16
OSCHF - Oberscharfuehrer	17
SCHAF - Scharfuehrer	19
USCHF - Unterscharfuehrer	21
ROTTF - Rottenfuehrer	24
STURM - Sturmmann	25
S-MAN - SS Mann	26

When space 38 shows classification "F", "M", "R", "U" or "W", customarily there will be no further identification in spaces 39 - 43. Exception will occur when the individual has an SS rank or NSDAP affiliation.

When, after arrest, a man is interned for no further reason than the fact that he is considered a threat to the security of Allied military authorities, the code used will be SECTH.

44 ORGANIZATIONAL LEVEL - one digit code.

Space 44 is only filled when space 38 shows the classification "N" or "O", to indicate at what level of the regional organization the subject individual is employed.

BDM - Bund Deutscher Maedels - League of German Girls.

RAD - Reichserbeitsdienst - Compulsory national labor service.

NSAB - NS Aertsbund - National Socialist Physicians League.

NSDSB - NS Deutscher Studentenbund - Nazi University Students League.

SA - Stumabteilung - Organization of the storm troopers.

When space 38 shows classification "O", no indication of position will show in spaces 39 - 43 unless the title, i.e., MAYOR, can be spelled out or a reasonable abbreviation, e.g., LDRAT for Landrat, can be used.

When space 38 shows classification "P", the customary short-name of the organization or the first five letters of such short-name will be found in spaces 39 - 43 as follows:

ORPO - Ordnungspolizei - the regular uniformed German police.

SCHUP - Schutzpolizei - city police, branch of Orpo.

GEND - Gendarmerie - rural police, branch of Orpo.

FGEND - Feldgendarmerie - military police.

SELBS - Selbstschutzpolizei - civilian auxiliary police.

However, SS ranks where shown on the original card are entered in spaces 39 - 43 according to the code in the next paragraph, in preference to any of these police organizations.

When space 38 shows classification "S", spaces 39 - 43 will show the rank within the SS held by the subject as follows:

RCHFR - Reichsfuehrer	1
OBTGF - Oberstgruppenfuehrer	2
OBGRF - Obergruppenfuehrer	3
GRUPF - Gruppenfuehrer	4
BRIGF - Brigadefuehrer	5
OBERF - Oberfuehrer	6

1 - Reich, Reichsministerium

2 - Gau, Land, Provinz, Regierungsbezirk

3 - Kreis, Landkreis

4 - Ort, City (Gemeinde)

5 - Zelle

6 - Block

45 - 46 RANK OR POSITION - two digit code.

The rank within the organization which is held by the subject individual will be shown in spaces 45 - 46 by a number descending from the highest position to the lowest according to a two digit code. In police and paramilitary formations, this code is based on relative ranks so that all numbers are not represented within every formation. The numerical code for SS ranks, employed whenever a position for a member of the SS is used in spaces 39 - 43, is found after the ranks of the SS coded above.

If space 38 shows "N" and space 44 is filled, the following code is used to indicate the relative party position at any level:

1 - Leiter

2 - Hauptamtsleiter or Amtsleiter

3 - Hauptstellenleiter

4 - Stellenleiter

If space 38 shows "N" and spaces 39 - 43 show "HJ" or "BDM", the following code is employed in spaces 45 - 46:

1 - Reichsjugendfuehrer

2 - Stabsfuehrer der Reichsjugendfuehrung

3 - Obergebeitsfuehrer

4 - Gebeitsfuehrer, Gebeitsfuehrerin

5 - Hauptbannfuehrer, Hauptmaedelfuehrerin

6 - Oberbannfuehrer

7 - Bannfuehrer, Bannmaedelfuehrerin

8 - Oberstammfuehrer

9 - Stammfuehrerin, Maefelringfuehrerin

10 - Hauptgefolgschaftsfuehrer

11 - Obergefolgschaftsfuehrer

12 - Gefolgschaftsfuehrer, Maedelgruppenfuehrerin

19 - Oberscharfuehrer

21 - Scharfuehrer, Maedelscharfuehrerin

22 - Oberkameradschaftsfuehrer

23 - Kamaradschaftsfuehrer, Maedelschaftsfuehrerin

24 - Rottenfuehrer

26 - Hitlerjunge, BDM Maedel

If spaces 39 - 43 show "SA", "NSKK", or "NSFK", the following code is employed spaces 45 - 46:

1 - Stabschef

3 - Obergruppenfuehrer

4 - Gruppenfuehrer

5 - Brigadefuehrer

6 - Oberfuehrer

7 - Standartenfuehrer

8 - Obersturmbannfuehrer, Oberstaffelfuehrer

9 - Sturmbannfuehrer, Staffelfuehrer

10 - Hauptsturmfuehrer

11 - Obersturmfuehrer

12 - Sturmfuehrer

14 - Haupttruppfuehrer

16 - Obertruppfuehrer

17 - Truppfuehrer

19 - Oberscharfuehrer

21 - Scharfuehrer

24 - Rottenfuehrer

25 - Obersturmmann

26 - Sturmmann

When spaces 39 - 43 show the classification "RAD", the following code will be employed in columns 45 - 46:

3 - Reichsarbetisfuehrer

4 - Obergeneralarbeitsfuehrer

5 - Generalarbeitsfuehrer

7 - Oberstarbeitsfuehrer, Stabshauptfuehrerin

8 - Oberarbeitsfuehrer, Stabsoberfuehrerin

9 - Arbeitsfuehrer, Stabsfuehrerin

10 - Oberstfeldmeister, Maidenhauptfuehrerin

11 - Oberfeldmeister, Maidenoberfuehrerin

12 - Feldmeister, Maidenfuehrerin

13 - Unterfeldmeister, Maidenunterfuehrerin

17 - Obertruppfuehrer, Jungfuehrerin

21 - Truppfuehrer, Kameradschaftsaelteste

23 - Obervormann

24 - Vormann

26 - Arbeitsmann, Arbeitsmaid

When space 38 shows "P" or when the subject individual is a member of the Abwehr so that he holds Wehrmacht rank the following code is used:

1 - Generalfeldmarschall

2 - General Oberst

3 - General der Infanterie, General der Polizei

4 - Generalleutnant

5 - Generalmajor

7 - Oberst

8 - Oberstleutnant

9 - Major

10 - Hauptmann

11 - Oberleutnant, Schupo Inspektor

12 - Leutnant, Polizei Obermeister or Meister

If space 38 shows "F", "M", "O", "R", "S", "U" or "W", spaces 45 - 46 will customarily be left blank.

47 - 48 YEAR POSITION HELD AT LAST REPORT - two digit code.

All dates used will be shown by the last two digits of the year omitting the century, e.g., 1939 becomes 39.

49 - 50 YEAR OF BIRTH - two digit code.

Age of subject will be shown by use of the last two digits of the year of birth. When approximate ages are given, the mean of the approximation will be used, e.g., "born 1907 - 1909" becomes "08", "aged 55 - 60" becomes "88".

51 - 52 NATIONALITY OF SUBJECT - two digit code.

Nationality will be shown by the following two digit code:

1 - American	18 - Hebrew
2 - Alsatian (French)	19 - Swiss
3 - Belgian	20 - Austrian
4 - British	21 - Polish
5 - Canadian	22 - Arab
6 - Danish	23 - Jap
7 - French	24 - Finn
8 - German	25 - Dutch
9 - Hungarian	26 - Czech
10 - Italian	27 - Yugoslav
11 - Russian	28 - Greek
12 - Scottish	29 - Egyptian
13 - Spanish	30 - Moroccan
14 - Swedish	31 - Alsatian (German)
15 - Bulgarian	32 - Turk
16 - Chinese	33 - Welsh
17 - Irish	34 - Persian

35 - Portuguese

36 - Armenian

37 - Australian

38 - Haitian

39 - Algerian

40 - Norwegian

41 - Asiatic

42 - Estonian

43 - Syrian

44 - Luxembourgeois

45 - Indian

46 - Breton (French)

47 - Lithuanian

53 - 54 SOURCE OF INFORMATION - two digit code.

The following two digit code will be used to indicate the office originating the card:

6 - MI 6

9 - MI 9

10 - Office of Strategic Services

11 - Political Warfare Executive

12 - 12th Army Group

14 - MI 14

15 - M (Miscellaneous)

16 - 6th Army Group

17 - D (Document)

18 - F (Field)

20 - Federal Bureau of Investigation

21 - 21 Army Group

55 STATUS OF CASE - one digit code.

The following single digit code will be used to indicate the status of the carded individual:

1 - Subject not yet apprehended.

2 - Case pending. Subject apprehended and awaiting final disposition.

3 - Case closed. Final disposition of the individual made.

56 - 58 PLACE OF DETENTION - three digit code.

It is envisaged that all detention and interment camps will be numbered; the number of the camp in which the subject may be found will be entered in spaces 56 - 58.

59 - 60 DISPOSITION OF CASE - two digit code.

As pending cases ("2" in space 55) are closed, "3" will be entered in space 55 and the disposition will be shown in spaces 59 - 60 according to the following code:

1 - Evacuated as a prisoner of war.

31 - Transferred to French authorities.

32 - Transferred to Belgian authorities.

33 - Transferred to Luxembourg authorities.

34 - Transferred to Dutch authorities.

49 - Interned by military authorities.

50 - Released by military authorities without trial.

60 - Tried, acquitted, and released by military authorities.

61 - Tried, acquitted, and released by French authorities.

62 - Tried, acquitted, and released by Belgian authorities.

63 - Tried, acquitted, and released by Luxembourg authorities.

64 - Tried, acquitted, and released by Dutch authorities.

70 - Tried, convicted, and imprisoned by military authorities.

71 - Tried, convicted, and imprisoned by French authorities.

72 - Tried, convicted, and imprisoned by Beligan authorities.

73 - Tried, convicted, and imprisoned by Luxembourg authorities.

74 - Tried, convicted, and imprisoned by Dutch authorities.

79 - Died during imprisonment.

89 - Reliably reported dead before capture.

91 - Tried, convicted, and executed by French authorities.

92 - Tried, convicted, and executed by Belgian authorities.

93 - Tried, convicted, and executed by Luxembourg authorities.

94 - Tried, convicted, and executed by Dutch authorities.

99 - Tried, convicted, and executed by military authorities.

61 - 65 CASE NUMBERS

It is envisaged that each card, as its subject changes from status "1" to status "2" on being apprehended, will become the primary document in a dossier. This dossier will be assigned a number which will be the number of the case. This number will at that time be entered on the MRU card.

66 - 67 ARRESTING AGENCY - two digit code.

The following code has been established to indicate the agency which arrests the subject individual:

1 - First Army

3 - Third Army

7 - Seventh Army

9 - Ninth Army

11 - First French Army

12 - 12th Army Group

15 - Fifteenth Army

22 - Communications Zone

25 - 15th Army Group

29 - Russian Armies

31 - French authorities

32 - Belgian authorities

33 - Luxembourg authorities

34 - Dutch authorities

70 - 76 MRU CARD NUMBER

To facilitate the handling of MRU cards, each personality card has been assigned an arbitrary number which is likewise carried by its MRU counterpart. This is a filing aid and has no significance for any office except the MRU office.

80 DUPLICATE CARDS

Whenever a duplicate MRU card is created for a single personality, because an individual has an alias or is associated with more than one town, the existence of the second card is noted by an asterisk in column 80.

Appendix 3

Informal Checklist for CIC and other intelligence personnel; titled Security Measures for Mounting an Airborne Operation.

HEADQUARTERS 13TH AIRBORNE DIVISION APO 333
13th CIC Detachment U.S. Army

The following is an informal check list for CIC and other intelligence personnel. It does not pretend to be all inclusive but it does raise critical security questions.

CHECK LIST
SECURITY MEASURES FOR MOUNTING AN AIRBORNE OPERATION

I. PREPARATORY TO OPERATION.

a. Division, Regimental, Battalion and other Separate Unit Headquarters Areas:

1. Is care being exercised for enforcing security measures unobtrusively?
2. Has civilian employment been restricted to absolute minimum?
3. Have civilian employees been carefully investigated?
4. Are casual visitors kept out?
5. What is the status of Red Cross civilian personnel?
6. Are armed guards posted on all routes leading into it?
7. Have guards been adequately indoctrinated?
8. Is use of password and countersign rigidly enforced?
9. Are guards regularly checked as to physical fitness, mental alertness, and knowledge of Special Orders?
10. Do guards have flashlights?
11. Have roving patrols been added to supplement fixed sentries' posts?
12. Has the Provost Marshal designated routes for these patrols?
13. Have rendezvous points been established for them?
14. Are they required to pass these at specified times?
15. Have any alarm sounding facilities been provided for emergencies?
16. What particular care is being exercised to assure that parachute packing sheds are properly protected against marauders, fire and other sabotage?
17. Is utmost caution and secrecy observed in the moving and delivery of parachutes?
18. Is adequate fire apparatus available in marshalling areas?

b. "Top Secret" Rooms

1. Is entry restricted to one door only?
2. Are windows adequately covered and securely barred or nailed closed?
3. Are unused entrances permanently sealed or barred?
4. Are the used doors locked from the inside?
5. Can doors, not being used, be easily forced open?
6. What other rooms, corridors, hallways are adjoining?
7. Are there other means of ingress or egress to this room?
8. Does voice carry to adjoining rooms, corridors, hallways--at early morning hours?

Check List (cont'd)

9. If so, what improvised sound-proof arrangements have been provided?
10. What is available for instant destruction of classified material?
11. Is there fire extinguishing equipment in room?
12. When was it last tested?
13. Are there emergency lights in room?
14. How are documents stored there?
15. How are they displayed?
16. Is a safe available in room; what kind?
17. Has an armed 24-hour guard been posted at entrance to room?
18. What are his weapons; are they loaded?
19. How long is guard's tour of duty?
20. Does he get temporary relief every hour?
21. Is he carrying a flashlight?
22. Is he properly instructed?
23. Are guards ever required to leave their posts?
24. Has he quick access to telephone?
25. Can he readily call for aid or relief?
26. Is trash and waste burned daily under competent supervision?

c. "Top Secret" Room Passes:

1. Has a controlled pass system been initiated?
2. Are visitors admitted on pass only?
3. Who is entitled to such pass?
4. Is applicant required to familiarize himself with instructions pertaining to issuance of such passes?
5. Is he required to sign statement to that effect?
6. Who supervises actual issuance of such passes?
7. Who passes an applicant's application for pass?
8. Are passes limited for any specific period?
9. Are they identified with reference to locale or operation?
10. Are passes numbered?
11. What items of information do they contain?
12. What record is kept of passes issued?
13. How are passes insured against forgeries?
14. How, to whom, and how soon must losses be notified?
15. How are losses noted and searches instituted?
16. How are visitors from other headquarters admitted?
17. Are visitors accompanied to particular destination?
18. Are they directed, guided, and watched?

d. Personnel:

1. Have "security officers" been appointed (below divisions) and briefed?
2. Have pathfinder units been sufficiently instructed in security?

Check List (cont'd)

3. Have new security precautions been stressed to troops?
4. Have they been warned of risks?
5. Are public places such as military clubs, bars, etc., being checked for security violations among bigotted personnel?
6. Are public places being checked for rumors and loose talk?
7. Have censorship regulations been reviewed by unit censors?
8. Is sufficient care being exercised in censoring of mail?
9. Are breaches of security reported without delay?
10. Has personnel been warned against requesting rush job favors from civilians?
11. Have provisions been made for handling troops' unfinished personal business after departure?
12. Have troops been advised of such arrangements?
13. Is care being exercised to keep movement secret from: (a) civilian personnel at officers' mess halls, (b) civilian employees at day rooms, (c) owners of troops or officers billets, (d) Red Cross workers?
14. Have insignia and devices been removed from uniform?
15. Have troops been instructed in road discipline?
16. Have identifying unit markings been obliterated: (a) troops, (b) vehicles?
17. Are skeleton forces maintained at headquarters to conceal permanent movement?
18. Are such forces instructed as to correct explanations to callers?
19. Has deadline been announced for termination of leaves, furloughs?

e. Communications:

1. Have censorship arrangements been reviewed and inspected?
2. Is all personal mail impounded?
3. Are telegrams censored by unit censor?
4. Have troops been warned of mail censorship aspects?
5. How are civilian telephones monitored?
6. How are official telephones monitored?
7. Is cryptographic security maintained?
8. Is message center personnel instructed in accordance with AR 380-5?
9. Are documents receipted for, recorded, and filed in accordance with regulations?
10. Is trash and waste burned daily under competent supervision?
11. Are qualified couriers used?
12. Are couriers adequately instructed?
13. Are they armed with loaded weapons?
14. How are other Allied couriers identified?
15. Are code names used when required?

Check List (cont'd)

II. MOVEMENT TO AIRBORNE ASSEMBLY AREAS

1. Have troops been instructed to maintain march discipline throughout movement?
2. Have routes been chosen to avoid large centers of population?
3. Has some form of motor patrol been arranged along route of march?
4. Has time of movement been planned for hours of darkness?

III. IN AIRBORNE ASSEMBLY AREAS

1. Is airfield perimeter adequately guarded (senior air force officer's responsibility)?
2. Are areas away from main roads?
3. Has liaison been established with other security agencies in area?
4. Has prisoner of war labor been removed from airfields, assembly areas, and adjacent installations?
5. Is liaison maintained with base CIC/FS units?
6. Are areas inaccessible to view from passers by, farmers, etc.?
7. Have airborne unit areas 24-hour interior guards?
8. Have troop carrier and other air corps personnel been placed under same restrictions as tactical troops?
9. Have areas been closed off by barbed wire?
10. Is black-out and camouflage discipline strictly adhered to?
11. Is SOS personnel sealed in separately from airborne troops?
12. Are rolls called at least twice daily?
13. Is CIC notified of medical cases requiring hospitalization?
14. Are such cases placed under CIC surveillance?
15. Are they isolated from other patients in hospital?
16. Has all mail been collected prior to emplaning?
17. Has it all been censored?
18. Have all orders or marked maps been left behind?
19. Have ground crews been restricted to their fields?
20. Has a strict pass system for each area been instituted?
21. Is all pre H-hour briefing conducted in sealed areas?
22. Have troops been cautioned that in event of their failure to reach target after take-off they will rejoin their unit without disclosure of mission to other friendly units. (Making a practice jump, etc)
23. Are troops sealed in once briefing has begun?
24. Are troops in assembly areas segregated from other troops?
25. Are briefing buildings guarded?
26. Is briefing conducted in accordance with security directives?
27. Has personnel been spot-checked for diaries, documents, souvenirs, etc.?
28. Are maps and other documents used in briefing kept away from permanent personnel and troops unauthorized to see them?

Check List (cont'd)

29. Have all maps, terrain models, identifying documents, etc., been collected before H-hour?
30. Are only official telephone calls and telegrams permitted after briefing?
31. Has all Troop Carrier Air Force personnel been restricted to fields?
32. In event of prolonged delay in assembly area is guard adequate to maintain security during extended period?
33. In case of delays, is static provision maintained to secure any new incoming personnel?

IV. POST AIRBORNE DEPARTURE

1. Have all troops left behind been sealed until official announcement of the operation?
2. Have returning pilots and airborne personnel been sealed until official announcement?
3. Is guard continued without change?
4. Have all documents, maps, etc., either been destroyed (or security preserved for shipment under guard to CP)?
5. Have all other security provisions, (mail, emergency hospitalization, communications), been maintained until official announcement?

V. MOVEMENT OF "SEA-TAILS," "LAND-TAILS," ETC.

1. Are unit designations obliterated from vehicles?
2. Have parachute jump suits, insignia, jump boots, airborne patches been packed up or left behind?
3. Have appropriate code names been adopted?
4. Have civilians been evacuated from all adjacent areas, roads and villages?
5. Are troops sealed in to prevent contact with civilians and other friendly units?

FRANK POSPISIL
1st Lt., Inf.
Commanding

Appendix 4

Some forms in use by CIC in Germany in 1945.

A. The Case Investigation Sheet
B. Town Team Check List (two pages)
C. The Fragebogen, bi-lingual personal identification form (four pages)
D. MG Temporary Registration Card
E. Screening Card (also known as VII Corps' "Brown Card" because of its light umber color)
F. Notice, Movement of Persons
G. Instructions to Burgomeisters form

TOWN TEAM CHECK LIST

(To be completed after initial two days.)

I CIVILIAN COMMUNICATIONS (Specify present condition and security action taken.)

1. Telephone Exchange.

2. Post Office.

3. Telegraph Office.

4. Radio Station.

5. Newspaper and Printing Offices.

II CIVILIAN SECURITY CONTROLS (State whether covered by MG proclamations and what enforcement action taken.)

1. Collection of arms, ammunition, and explosives.

2. Collection of radio transmitters.

3. Separate registration of all NSDAP members and officers of the SA, SS, and Hitler Jugend.

4. Separate registration of members of Wehrmacht since 1. January 33.

5. No use of cameras or binoculars.

2726

6. Registration pass to every civilian.

7. Curfew (was 1800 to 0700 on 10. February 45).

8. Pigeons (wings clipped or killed.)

9. No letter-carrying or other mode of communication.

10. No meetings of any sort.

III SEARCHES (Give exact location and what found)

1. NSDAP, SS, etc., offices.

2. SD, SIPO, and Gestapo offices.

3. Police offices.

4. Residences of leading Nazis and SS members.

5. Residences of SD and Gestapo members.

IV MISCELLANEOUS

1. Estimate of civilian population.

2. Jail facilities.

MILITARY GOVERNMENT OF GERMANY

FRAGEBOGEN

PERSONNEL QUESTIONNAIRE

WARNUNG. Im Interesse von Klarheit ist dieser Fragebogen in Deutsch und englisch verfasst. In Zweifelsfaellen ist der englische Text massgeblich. Jede Frage muss so beantwortet werden, wie sie gestellt ist. Unterlassung der Beantwortung, unrichtige oder unvollstaendige Angaben werden wegen Zuwiderhandlung gegen militarische Verordnungen gerichtlich verfolgt. Falls mehr Raum benotigt ist, sind weitere Bogen anzuheften.

WARNING. In the interests of clarity this questionnaire has been written in both German and English. If discrepancies exist, the English will prevail. Every question must be answered as indicated. Omissions or false or incomplete statements will result in prosecution as violations of military ordinances. Add supplementary sheets if there is not enough space in the questionnaire.

A. PERSONAL
PERSONNEL

Name..... Ausweiskarte Nr.....
Name Zuname / *Surname* — Vornamen / *Middle name* / *Christian Name* — *Identity Card No.*

Geburtsdatum..... Geburtsort.....
Date of birth — *Place of birth*

Staatsangehorigkeit..... Gegenwartige Anschrift.....
Citizenship — *Present address*

Standiger Wohnsitz..... Beruf.....
Permanent residence — *Occupation*

Gegenwartige Stellung..... Stellung, fur die Bewerkung ingereicht.....
Present position — *Position applied for*

Stellung vor dem Jahre 1933.....
Position before 1933

B. MITGLIEDSCHAFT IN DER NSDAP

1. Waren Sie jemals ein Mitglied der NSDAP?

   Ja.....Nein.....

2. Daten.....

3. Haben Sie jemals eine der folgenden Stellungen in der NSDAP Bekleidet?

(a) REICHSLEITER, oder Beamter in einer Stelle, die einem Reichsleiter unterstand? Ja.....Nein.....
Titel der Stellung.....Daten.....

(b) GAULEITER, oder Parteibeamter innerhalb eines Gaues? Ja.....Nein.....
Daten.....Amtsort.....

(c) KREISLEITER, oder Parteibeamter innerhalb eines Kreises? Ja.....Nein.....
Titel der Stellung.....Daten.....Amtsort.....

(d) ORTSGRUPPENLEITER, oder Parteibeamter innerhalb einer Ortsgruppe?
Titel der Stellung.....Ja.....Nein.....
Daten.....Amtsort.....

B. NAZI PARTY AFFILIATIONS

Have you ever been a member of the NSDAP? yes, no. Dates.

Have you ever held any of the following positions in the NSDAP?

REICHSLEITER or an official in an office headed by any Reichsleiter? yes, no; title of position; dates.

GAULEITER or a Party official within the jurisdiction of any Gau? yes, no; dates; location of office.

KREISLEITER or a Party official within the jurisdiction of any Kreis? yes, no; title of position; dates; location of office.

ORTSGRUPPENLEITER or a Party official within the jurisdiction of an Ortsgruppe? yes, no; title of position; dates; location of office.

(e) Ein Beamter in der Parteikanzlei? Ja.....Nein.....
Titel der
Daten.....Stellung.....

An official in the Party Chancellery? yes, no; dates; title of position.

(f) Ein Beamter in der REICHSLEITUNG der NSDAP?
Ja.....Nein.....
Titel der
Daten.....Stellung.....

An official within the Central NSDAP headquarters? yes, no; dates; title of positions.

(g) Ein Beamter im Hauptamte für Erzieher? Im Amte des Beauftragtens des Führers für Ueberwachung der gesamten geistigen und weltanschaulichen Schulung und Erziehung der NSDAP? Ein Direktor oder Lehrer in irgend einer Parteiausbildungschule? Ja.....Nein.....
Titel der
Daten.....Stellung.....
Name der Einheit oder Schule.....

An official within the NSDAP's Chief Education Office? In the office of the Führer's Representative for the Supervision of the Entire Intellectual and Politico-philosophical Education of the NSDAP? Or a director or instructor in any Party training school? yes, no; dates; title of position; name of unit or school.

(h) Waren Sie Mitglied des KORPS DER POLITISCHEN LEITER?
Daten der
Ja.....Nein.....Mitgliedschaft.....

Were you a member of the CORPS OF POLITISCHE LEITER? yes, no; dates of membership.

(i) Waren Sie ein Leiter oder Funktionär in irgend einem anderen Amte, Einheit oder Stelle (ausgenommen sind die unter C unten angeführten Gliederungen, angeschlossenen Verbände und betreuten Organisationen der NSDAP?
Ja.....Nein.....
Daten.....Stellung.....

Were you a leader or functionary of any other NSDAP offices or units or agencies (except Formations, Affiliated Organizations and Supervised Organizations which are covered by questions under C below)? yes, no; dates; title of position.

(j) Haben sie irgenwelche nahe Verwandte, die irgend eine der oben angeführten Stellungen bekleidet haben?
Ja.....Nein.....
Wenn ja, geben Sie deren Namen und Anschriften und eine Bezeichnung deren Stellung.....
.....

Have you any close relatives who have occupied any of the positions named above? yes, no, if yes, give the name and address and a description of the position.

C. TÄTIGKEITEN IN NSDAP HILFSORGANISATIONEN

Geben Sie hier an, ob Sie ein Mitglied waren und in welchem Ausmasse Sie an den Tätigkeiten der folgenden Gliederungen, angeschlossenen Verbände und betreuten Organisationen teilgenommen haben.

C. NAZI 'AUXILIARY' ORGANIZATION ACTIVITIES

Indicate whether you were a member and the extent to which you participated in the activities of the following Formations, Affiliated Organizations or Supervised Organizations:

	Mitglied *Member*		Dauer des Mitgliedschaft *Period of Membership*	Aemter bekleidet *Offices Held*	Dauer *Period*
	Ja *Yes*	Nein *No*			
1. Gliederungen *Formations*					
(a) SS					
(b) SA					
(c) HJ					
(d) NSDStB					
(e) NSD					
(f) NSF					
(g) NSKK					
(h) NSFK					
2. Angeschlossene Verbande *Affiliated Organizations*					
(a) Reichsbund d. deut. Beamten					
(b) DAF einschl					
KdF					
(c) NSV					
(d) NSKOV					
(e) NS Bund deut. Technik					
(f) NSD Aertztebund					
(g) NS Lehrerbund					
(h) NS Rechtswahrerbund					
3. Betreute Organisationen *Supervised Organizations*					
(a) VDA					
(b) Deutsches Frauenwerk					
(c) Reichskolonialbund					
(d) Reichsbund deut. Familie					
(e) NS Reichsbund fur Leibesubungen					
(f) NS Reichsbund deutscher Schwestern					
(g) NS Altherrenbund					
4. Andere Organisationen *Other Organizations*					
(a) RAD					
(b) Deutscher Gemeindetag					
(c) NS Reichskriegerbund					
(d) Deutsche Studentenschaft					
(e) Reichsdozentenschaft					
(f) DRK					
(g) Deutsche Christen Bewegung					
(h) Deutsche Glaubensbewegung			2730		

5. Waren Sie jemals Mitglied irgend einer nationalsozialistischen Organisation die vorstehend nicht angefuhrt ist?
Ja.....Nein.....
Name der
Organisation.....Daten.....
Titel
Stellung.....Ort.....

Were you ever a member of any NS organization not listed above? yes, no; name of organization; dates; title of position; location.

6. Haben Sie jemals das Amt von Jugendwalter in einer Schule bekleidet? Ja.....Nein.....

Did you ever hold the position of Jugendwalter in a school? yes, no

7. Wurden Ihnen jemals irgendwelche Titel, Rang, Auszeichnungen oder Urkunden von einer der oben genannten Organisationen ehrenhalber verliehen oder seitens dieser andere Ehren zuteil....
Ja.....Nein.....
Falls ja, geben Sie an, was Ihnen verliehen wurde (Titel usw), das Datum, den Grund und Anlass fur die Verleihung.....

Have you ever been the recipient of any titles, ranks, medals testimonials or other honors from any of the above organizations? yes, no. If so, state the nature of the honor, the date conferred, and the reason and occasion for its bestowal.

D. SCHRIFTWERKT UND REDEN

Verzeichnen Sie auf einem anderen Bogen alle Veroffentlichungen von 1923 bis zum heutigen Tage, die ganz oder teilweise von Ihnen geschrieben, gesammelt oder herausgegeben wurden und alle Ansprachen und Vorlesungen, die Sie gehalten haben; der Titel, das Datum und die Verbreitung oder Zuhorerschaft sind anzugeben. Ausgenommen sind diejenigen die ausschliesslich technische, kunstlerische oder unpolitische Themen zum Inhalte hatten. Wenn Sie dies in Zusammenarbeit mit einer Organisation unternommen haben, so ist deren Name anzugeben. Falls keine, schreiben Sie 'Keine Reden oder Veroffentlichungen'.

D. WRITINGS AND SPEECHES

List on a separate sheet all publications from 1923 to the present which were written in whole or in part, or compiled, or edited by you, and all addresses or lectures made by you, except those of a strictly technical or artistic and non-political character, giving title, date and circulation or audience. If they were sponsored by any organization, give its name. If none, write 'No speeches or publications'.

E. DIENSTVERHALTNIS

Alle Ihre Dienstverhaltnisse seit 1. Januar 1930 bis zum heutigen Tage sind anzugeben. Alle Ihre Stellungen, die Art Ihrer Tatigkeit, der Name und die Anschrift Ihrer offentlichen und privaten Arbeitgeber sind zu verzeichnen. Ferner sind anzufuhren: Dauer der Dienstverhaltnisse, Grund deren Beendigung, Dauer etwaiger Arbeitslosigkeit, einschliesslich der durch Schulausbildung oder Militardienst verursachten Postenlosigkeit.

E. EMPLOYMENT

Give a history of your employment beginning with January 1, 1930 and continuing to date listing all positions held by you, your duties and the name and address of your employer or the governmental department or agency in which you were employed, the period of service, and the reasons for cessation of service, accounting for all periods of unemployment, including attendance at educational institutions and military service.

Von *From*	Bis *To*	Anstellung *Position*	Art der Tatigkeit *Duties*	Arbeitgeber *Employer*	Grund fur die Beendigung des Dienstverhaltnisses *Reasons for Cessation of Service*

F. EINKOMMEN

Verzeichnen Sie hier die Quellen und die Höhe Ihres Einkommens seit dem 1. Januar 1933.

F. INCOME

Show the sources and amount of your annual income since January 1, 1933.

Jahr *Year*	Einkommensquellen *Sources of Income*	Betrag *Amount*
1933		
1934		
1935		
1936		
1937		
1938		
1939		
1940		
1941		
1942		
1943		
1944		

G. MILITÄRDIENST

Haben Sie seit 1919 Militärdienst geleistet? Ja.....Nein.....
In welcher Waffengattung?.....Daten.....
Wo haben Sie gedient? .....Dienstrang.....
Haben Sie in militärähnlichen Organisationen Dienst geleistet? Ja.....Nein.....
In welchen? .....Wo? .....Daten.....
Sind Sie vom Militärdienste zurückgestellt worden? Ja.....Nein.....
Wann? .....Warum? .....

Haben Sie an der Militärregierung in irgend einem von Deutschland besetzten Lande einschliesslich Oesterreich und Sudetenland teilgenommen? Ja.....Nein.....
Wenn ja, geben Sie Einzelheiten über bekleidete Aemter Art Ihrer Tätigkeit, Gebiet und Dauer des Dienstes an ....
.....

G. MILITARY SERVICE

Have you rendered military service since 1919? yes, no. In which arm? Dates. Where did you serve? Grade or rank. Have you rendered service in paramilitary organizations? yes, no. In which ones? Where? Dates. Were you deferred from military service? yes, no. When? Why?

Did you serve as a part of the Military Government in any country occupied by Germany including Austria and the Sudeten land? yes, no. If so, give particulars of offices held, duties performed, territory and period of service.

H. AUSLANDSREISEN

Verzeichnen Sie hier alle Reisen, die Sie ausserhalb Deutschlands seit 1933 unternommen haben.

H. TRAVEL ABROAD

List all journeys outside of Germany since 1933:

Besuchte Länder *Countries visited*	Daten *Dates*	Zweck der Reise *Purpose of Journey*

Haben Sie die Reise auf eigene Kosten unternommen? Ja.....Nein.....
Falls nicht, unter wessen Beistand wurde die Reise unternommen? .....
.....

Was journey made on your own account? yes, no. If not, under whose auspices was the journey made? Persons or organizations visited.

Besuchte Personen oder Organisationen.....

Haben Sie in irgendeiner Eigenschaft an der Zivilverwaltung eines von Deutschland besetzten oder angeschlossenen Gebietes teilgenommen? Ja.....Nein.....
Falls ja, geben Sie Einzelheiten über bekleidete Aemter, Art Ihrer Tätigkeit, Gebiet und Dauer des Dienstes an
.....
.....

Did you ever serve in any capacity as part of the civil administration of any territory annexed to or occupied by the Reich? yes, no. If so, give particulars of offices held, duties performed, territory and period of service.

I. POLITISCHE MITGLIEDSCHAFT

(a) Welcher politischen Partei haben Sie als Mitglied vor 1933 angehört?.....

(b) Waren Sie Mitglied irgend einer verbotenen Oppositionspartei oder gruppe seit 1933? Ja.....Nein.....
Welcher?.....Seit wann?.....

(c) Waren Sie jemals ein Mitglied einer Gewerkschaft, Berufs-, Gewerblichen- oder Handelsorganisation, die nach dem Jahre 1933 aufgelöst und verboten wurde? Ja.....Nein.....

(d) Wurden Sie jemals aus dem öffentlichen Dienste, einer Lehrtätigkeit oder einem Kirchlichen Amte entlassen, weil Sie in irgend einer Form den Nationalsozialisten Widerstand leisteten oder gegen Lehren und Theorien auftraten? Ja.....Nein.....

(e) Wurden Sie jemals aus rassischen oder religiosen Gründen, der weil Sie aktiv oder passiv den Nationalsozialisten Widerstand leisteten, in Haft genommen oder in Ihrer Freizugigkeit, Niederlassungsfreiheit oder sonst wie in Ihrer gewerblichen oder beruflichen Freiheit beschränkt? Ja.....Nein..... Falls ja, dann geben Sie Einzelheiten sowie die Namen und Anschriften zweier Personen an, die die Wahrheit Ihrer Angaben bestätigen können .....
.....
.....

I. POLITICAL AFFILIATIONS

Of what political party were you a member before 1933?

Have you ever been a member of any anti-Nazi underground party or groups since 1933? yes, no. Which one? Since when?

Have you ever been a member of any trade union or professional or business organization suppressed by the Nazis? yes, no.

Have you ever been imprisoned, or have restrictions of profession or ecclesiastical positions for active or passive resistance to the Nazis or their ideology? yes, no.

Have you ever been imprisoned, or have restrictions of movement, residence or freedom to practice your trade or profession been imposed on you for racial or religious reasons or because of active or passive resistance to the Nazis, yes, no. If the answer to any of the above questions is yes, give particulars and the names and addresses of two persons who can attest to the truth of your statement.

MILITARY GOVERNMENT - GERMANY
SUPREME COMMANDER'S AREA OF CONTROL

NOTICE

MOVEMENT OF PERSONS

Article I
Travel Restrictions

No person shall travel more than one Kilometer from the place of his residence without a permit from the Military Government Officer. Applications for permits will be made to your local Burgermeister. Travel permits will be issued for no reasons other than an emergency.

Article II

Penalties

Violation of this notice is punishable by a Military Government Court.

BY ORDER OF MILITARY GOVERNMENT.

(EXHIBIT I)

CONFIDENTIAL

INSTRUCTIONS TO BURGOMEISTERS ON MILITARY GOVERNMENT TRAVEL RESTRICTIONS

TO BURGOMEISTER OF _____.

1. By authority of Military Government, all Burgomeisters are bound to and will follow the procedure described herein regarding travel by all persons other than the Allied Forces.

2. No person shall travel more than one kilometer from the place of his residence without a permit from the Military Government Officer. All applications for permits will be submitted to the local Burgomeister.

3. The Burgomeister will refuse all applications for travel permits except those persons who must travel, (a) to secure emergency medical attention, (b) (G-5 will include all other necessary exemptions).

4. In the case of persons coming within the categories listed in Par 3 above, the Burgomeister will accept the application and have the applicant complete the MG Fragebogen form. The Burgomeister will conduct such inquiry into the applicant as will enable him to make the following certificate:

"I, _____, Burgomeister of _____ Germany, certify that _____ of _____ must travel from _____ to _____ on _____ (date) to _____ (date) by reason of _____

_____

_____

"I further certify that to my knowledge the statements made by the applicant in the MG Fragebogen are true.

_____"
(signed)

5. The Burgomeister will then forward the above certificate and completed Fragebogen to the MG Officer located at _____.

6. Violation of these instructions, or a false certificate by any Burgomeister is punishable by MG Court.

BY ORDER OF MILITARY GOVERNMENT

HEADQUARTERS
U. S. ARMY INTELLIGENCE CENTER
FORT HOLABIRD, BALTIMORE 19, MARYLAND

ACSIH-GC 250/58/M 8 April 1959

SUBJECT: CIC History

TO: All Personnel Reading this Document

1. This volume is a portion of the History of the Counter Intelligence Corps which has been compiled in draft form by this headquarters.

2. Distribution of the History is being made as the volumes become available so that addressees may profit by the problems and accomplishments of the Counter Intelligence Corps in previous years.

3. When completed, the History will cover in as complete and accurate detail as possible, significant incidents and events leading to the organization of the Corps of Intelligence Police during World War I and the Counter Intelligence Corps in World War II. Events, accomplishments, changes, and problems encountered up until 1950 will be included in the thirty volumes planned.

4. In spite of the diligence of researchers and writers, there may be inaccuracies and omissions, since no records are available for some of the more than two hundred CIC detachments which were operational during World War II. Even some of the major campaigns were poorly documented.

5. Any comments should be forwarded to the Commanding General, United States Army Intelligence Center, Fort Holabird, Baltimore 19, Maryland, ATTN: G-3.

CHRONOLOGICAL GUIDE FOR CIC HISTORICAL PROJECT
(Reference DAP 20-200, Aug 1951, Page 52, Para 5)

SIGNIFICANT DATES IN THE EVOLUTION OF ARMY INTELLIGENCE, COUNTERINTELLIGENCE, AND ALLIED AGENCIES

1775-1827

28 July 1775	General George Washington issued instructions for recruiting intelligence agents for the American Army.
1775-1783	Revolutionary War: Army intelligence agents and nets. No record of any counterintelligence service.
2 June 1784	American Army reduced to eighty men with no intelligence or counterintelligence service.
1784-1811	Ten official army wars, insurrections and expeditions with no record of intelligence or counterintelligence.
1789	United States Customs Service was established.
1804	Terrain intelligence by Capt Lewis and 2nd Lt Clark who surveyed and mapped Northwest under secret War Department orders.
1805	First Lieutenant Zebulon Pike ordered by Army to chart upper Mississippi River. Pike was arrested by the Spaniards while charting Arkansas.
1812-1815	War of 1812: Coast raided; Washington burned. No record of any intelligence or counterintelligence.
20 April 1815	Major William McRee and Capt Sylvanus Thayer sent to Europe on two year tour for "professional improvement." First foreign observers.
1819	Major Stephen Long of the Army's Topographical Engineers mapped the Denver, Colorado region.
Dec 1827	First Lieutenant Daniel Tyler sent as a military observer to France for two years, where he attended French artillery school at Metz as a student observer.

CONFIDENTIAL

1 May 1832	Captain Benjamin L. E. Bonneville left Independence, Mo on a three year mapping trip of the Oregon trail area.
May 1839	Permission obtained from France to have Lt Philip Kearney attend the French Cavalry School at Saumur.
1841	Second Lieutenant John C. Fremont started on the first of a series of surveying and mapping projects of Western United States.
15 May 1847	Mexican War: General Winfield Scott organized at Pueblo, Mexico, the "Mexican Spy Company" for army intelligence.
1 Nov 1848	Colonel Manuel Dominguez and his 100-man Mexican Spy Company who fled for safety to New Orleans at end of Mexican War made an unsuccessful appeal to Congress for financial aid.
1846-1861	Thirty-five official army campaigns. No record of intelligence or any counterintelligence services, except scouting.
2 Apr 1855	Secretary of War Jefferson Davis had a three-officer military commission sent to Europe for one year to study changes in tactics resulting from the Crimean War.
1855	British army established a Topographical and Statistical Department as the start of its intelligence service.
30 June 1860	Secret Service Division of the United States Treasury was organized.
26 Jul 1861	General George McClellan organized a Union Army Intelligence system, headed by Allen Pinkerton.
1861-1865	Civil War: Union Army intelligence service included some counterintelligence. Superintendent John Kennedy, of the New York Police, operated one service for the War Department.
1862	Professor T.S.C. Lowe organized the Army Balloon Corps to secure combat intelligence during the war.

0170

1862-1878

15 Feb 1862	War Department took over Detective Police from State Department. Brigadier General L.C. Baker named Chief and special Provost Marshal.
1863	Union Army Signal Corps had 30 telegraph wagons in use in combat zone which could transmit messages 20 miles each.
30 Mar 1863	Army Bureau of Military Information activated with Col G.H. Sharpe as Deputy Provost Marshal in Charge.
1864	Major H.B. Smith, Chief of Union Army Secret Service, Middle Department with headquarters at Baltimore, Maryland, set up deserter and refugee screening program to catch Confederate spies.
1866-1885	Twelve official Army campaigns against the Indians. No record of intelligence or counterintelligence services, except scouting.
Apr 1869	Captain C. P. Raymond of the Army Engineers started a six months survey trip of Alaska.
1870	General Philip H. Sheridan accompanied the German army as a military observer from battle of Gravellotte to siege of Paris.
Nov 1871	General William Tecumseh Sherman, Commanding General of the United States Army started a tour of Europe.
1 Apr 1873	British Army activated its Intelligence Branch assigned to the Adjutant General's Department.
23 Jun 1875	Major General Emory Upton, accompanied by two other officers, started 19 months foreign military tour which included Japan, China, India, Persia, Italy, Russia, Austria, Germany, France, and England. Wrote: Armies of Asia & Europe.
29 Dec 1878	First Lieutenant F.V. Green, Engineers, returned from one and a half years observations on the front with Russia during Russo-Turkish war.

0177

25 Aug 1880 — First step in securing regular flow or military intelligence taken when Gen Sherman ordered all officers travelling in foreign countries to avail themselves of "all opportunities within their reach" of obtaining information of value to the military service and to report it in writing to the AG.

15 Mar 1881 — Major General Emory Upton died at age of 41 with his famous book The Military Policy of the United States completed only to the middle of the Civil War.

23 Mar 1882 — Office of Naval Intelligence (ONI) established by the United States Navy Bureau of Navigation.

2 Jun 1883 — First Lieutenant Frederick Schwatka and party of six started half year charting project in Alaska.

1885 — Major General R.D. Drum, Adjutant General, on his own initiative formed a division of Military Information to operate within the Military Reservations Division of the Miscellaneous Branch of the AG. Maj William J. Volkmar, who had just returned from a tour as an official observer in France, named chief.

1885 — Captain D.M. Taylor made first of a series of Canadian-American Frontier reconnaissances and charting trips.

10 Oct 1885 — So many intelligence reports received by War Department from officers travelling abroad that Army and Navy Journal reported additional personnel "imbued with certain special qualifications" would have to be employed.

1886 — Chiefs of all War Department bureaus, departments and all division commanders ordered to forward without delay any military information that might be considered useful. Also AG's of the several states and territories asked to send data.

1887 — British Admiralty created a permanent intelligence department.

22 Sep 1888 — Military Attache system organized after Congress authorized extra payments to army officers detailed to collect military information from abroad. Attache system never authorized as such.

0178

1889-1899

27 Feb 1889	"Security" regulation of Secretary of War limited dissemination of military information division data to Commanding General of the Army and Bureau Chiefs.
Mar 1889	First Military Attache posts established in Europe with offices at London, Paris, and Vienna. Later in year Berlin and St. Petersburg added.
12 Apr 1889	Secretary of War Redfield Proctor authorized the establishment of a Military Information Division of the Adjutant General's Office under direct supervision of the AG, himself . Capt Daniel M. Taylor, Chief, with W.N. Peck, Civilian Chief.
25 Feb 1890	Allowances established for Military Attaches included an office or unfurnished room; one desk or table; six chairs; one book or file case; fuel for one office fire; forage for a horse or costs of horse hire.
15 Mar 1892	Chief of Signal Corps overruled by Secretary of War S.B. Elkins in his effort to take over Information Division from the AG.
7 May 1892	Military Information Division anticipated Cuban problems and started compilation of data on that area.
1896	Military Information Division ordered to start work on a 905 section military map of the United States.
1898	Spanish American War: Army Military Information Service sent out first penetration agents including Lt "Message to Garcia" Rowan.
1898	Officer shortage caused by War with Spain resulted in a reduction of the Military Information Division from 11 to 2 officers and of attaches from 16 to 5.
1899	Insurgent Records Office created at Expeditionary Headquarters in Manila, Philippines.
11 Oct 1899	Boer War started and the United States Army had official observers with both the British and the Boers until the war ended 31 May 1902.

1899-1902

31 Dec 1899 — Eight inventions of the Nineteenth Century that modernized intelligence communications and transportation included: steamship, 1807; railroad, 1830; telegraph, 1844; trans-Atlantic cable, 1857; telephone exchanges, 1878; automobiles, 1887; celluloid film, 1888; and radio, 1895.

31 Dec 1899 — Six inventions of the Nineteenth Century that modernized intelligence collecting and recording included: cameras, 1839; typewriters, 1869; microphones, 1877; color photography, 1891; motion pictures, 1893; and disc recorders, 1896.

1900 — Presidential Commission investigating conduct of War Department in War with Spain revealed wide gap between acquisition of military information and its subsequent effective application in the field.

Oct 1900 — Brigadier General William Ludow recommended that the Military Information Division of the AG be transferred to the War College to be a "bureau of record."

23 Dec 1900 — Insurgent Record Office redesignated at Military Information Division of AG, Hq Division of the Philippines with Lt Col Joseph T. Dickman in charge.

Feb 1901 — Military Information Division of the United States Army of the Philippine Islands organized from Bureau of Insurgent Records.

1902 — Arrangements made with the Office of Naval Intelligence whereby data received either by ONI or MID of interest to the other agency would be sent to it.

21 Feb 1902 — Report to Secretary of War showed at the outbreak of the War with Spain the MID, AG had a staff of 11 officers, 10 civilian clerks and 2 messengers. It was jammed into four rooms and trying to work on an annual expense account of $3,640. Regular reports were being received from 16 attaches and 40 National Guard Intelligence officers.

18 Jun 1902 — Military Information Division of the Philippines became an integral branch of the Division in Washington, D.C.

10 Oct 1902 — State Department agreed to furnish army military information to MID from all legations where army officers were not accredited.

1903 Major Arthur L. Wagner, last chief of MID under AG, had published The Service of Security and Information which became an official text.

1903 Military Information Division removed from State, War and Navy building to second floor of nearby Lemon Building on New York Avenue.

Mar 1903 Captain C.B. Humphrey and 2nd Lt G.M.P. Murphy, just out of West Point selected at request of President Roosevelt to make a secret information gathering trip to areas of interest in case of hostilities in the Gulf of Mexico or the Caribbean Sea. Reported back 16 Oct 1903, three weeks before Panamanian revolution. They had spent three months in Panama.

1903 Military Information Division of Adjutant General's Office transferred to United States Army General Staff, Second (MI) Division.

1903 British intelligence adopted the Military Attache system following United States lead.

14 Aug 1903 Military Information Division became the 2nd Division of the General Staff.

19 Aug 1903 Lieutenant General S.B.M. Young, first Chief of Staff when only five days in office issued memorandum requesting qualified officers to volunteer to assist the Military Information Division in the translation of Russian, German, French, Italian, Spanish, Portugese and Japanese military publications and documents.

4 Sep 1903 Military Information Division of the General Staff assigned the responsibility for handling liaison with foreign military attaches in the United States.

1904-1908 British War Office Intelligence Department organized its "Special Branch" (CIC equivalent).

1904 Major W.D. Beach allotted only six general staff officers including those on attache duty; thus only four of six sections of MID had full time OICs.

1904-1908

3 Feb 1904	Chief of Staff assigned Second (MI) Division function of handling military attaches and "the collection, arrangement, and publication of historical, statistical and geographical information including order of battle data and critical and analytical histories of important campaigns. Handling of the war library and war maps also included.
6 Feb 1904	Army had 8 military observers with the Russians and seven with the Japanese during Russo-Jap war which ended 5 Sep 1905.
12 Jan 1905	Secretary of the Interior agreed to furnish MID with special confidential military maps derived from its Geodetic mapping program.
1906	Two army officers sent from Manila Branch to China to secure topographical data covering rail and road routes to the sea from Peking and Tientsin.
6 Oct 1906	Army started 2 year 6 month occupation of Cuba "Cuban Pacification." MID had furnished information that enabled War Department to be ready with a plan when Cuba asked for help.
1907	Four army officers detailed for duty in Tokyo under Military Attache to learn the Japanese language.
Oct 1907	War Department GO #215, required that all official correspondence addressed to officers of the army, regardless of station or status, must pass through the AG office, and ended direct intelligence channels for the next decade. MID protested but exceptions were not permitted.
24 June 1908	War Department General Staff reorganized and Second and Third Division (War College) combined into a Second Section with the latter section divided into two main committees -- Military Information and War College.
1 Jul 1908	Special Secret Service Bureau of the Department of Justice (FBI) was established. Became Bureau of Investigation on 16 March 1909.

Jan 1909	One of first MI command jurisdictional incidents occurred when the Chief of MI, 2nd Division General Staff, ordered all attaches to send reports only to him. London attache did and Assistant Chief of Staff held he violated regulations.
27 Jan 1909	Chief of Second Division told that all his instruction on collection of intelligence sent to field commanders would have to go through the Adjutant General.
1 Apr 1909	Military Information Division closed its Havan branch where two officers and six clerks had been functioning. Office has been open 2 1/2 years.
2 Aug 1909	Army activated the Unites States Air Corps with acceptance of its first airplane. Air Corps remained with the Army for 38 years.
Apr 1910	Military Information Division files, clerical personnel merged with War College. No longer responsible for its own correspondence. Mission narrowed to support of college planners. Ceased to function as an intelligence service, when Maj Gen J. Franklin Bell retired as Chief of Staff.
Sep 1910	Chief of Staff, Maj Gen Leonard Wood, reorganized General Staff from two sections into four division but the MI committee remained part of the War College Division.
1911-1916	Mexican Border Disturbances: Military Intelligence Service inactive under War College "committee" management.
Nov 1911	Military Information Division not consulted or represented when War Department ordered a study to determine strategic value of various localities in the vicinity of the Panama Canal. Brig Gen John Biddle, chief of War College Division, sent.
Dec 1912	A four-officer cavalry board headed by Brig Gen E.J. McClernard refused permission to be military observers with the Bulgarian Army.
20 Jan 1913	Chief of Staff complained that the military information service of the War College had no training system for officer replacements; its reports were not evaluated; new military attaches were not informed of briefing data available to them; official monographs were incomplete; there was a lack of coordination of military information matters between the War College and other departments.

0183

[redacted]

1914-1917	Victor Voska formed a Czechoslovakian counterintelligence organization, at New York, to keep British intelligence informed on German intelligence activities in the United States.
1914	Federal Bureau of Investigation agents broke up a German passport forging ring assisting 800 German reserve officers in the United States to return to their homes.
1914	For fiscal year 1914-15 the Military Information committee received its first increase in budget since 1903 (from $10,000 to $11,000 a year) 11 years.
Feb 1914	Chief of the War College stated that military attaches in Spain, Italy, Austria and Belgium were unnecessary; Switzerland warranted a retired officer; Russian was doubtful and the Balkan states and Turkey of temporary importance.
3 Mar 1914	All Army units on the Mexican border ordered to detail officers, in addition to other duties, as intelligence officers and to collect information from refugees and other sources but not to cross the border.
Apr 1914	Chief of the Army War College stated that in event of extensive operations in the field five military attaches (four from Europe) and all 9 officer students in France and Germany should be recalled.
18 Jul 1914	Congress officially authorized an aviation section as part of the Army Signal Corps and ended the 6 year era of experimentation.
28 Jul 1914	World War I started with declaration of war on Serbia by Austria-Hungary.
3 Aug 1914	American Military Attaches in Paris and Vienna asked to go into the field, but told to stay at their posts, and War Department ordered that officers physically qualified for field duty be sent.
Nov 1914	Twenty special military observers were on duty as follows: With French, 6; Germany, 6; Austria, 3; Japan, 5. In addition, 13 military attaches were reporting. Military observers in France designated a military mission to increase prestige.

CONFIDENTIAL

3 Apr 1915	Captain Franz Von Rintelin, German saboteur, arrived in the United States and sank thirty-six ships with $10 million in cargo before detection.
3 May 1915	Primary function of the Military Information Section of the War College according to the division chief was to "document staff work."
24 Jul 1915	Secret Service surveillance of German industrial saboteur. Dr. Heinrich Albert provided chance for briefcase "switch" and the obtaining of incriminating documents.
1916	General Pershing given tactical use of First Squadron Aviation Section to furnish intelligence, but because of the low engine power of its eight planes the squadron was largely ineffective.
1916	War College arranged with the Command and General Staff School to publish intelligence reports for army dissemination. First report published violated agreement with the British not to publish, and arrangement ended.
21 Jan 1916	Brigadier General M.M. Macomb, chief of the War College Division forwarded to the chief of staff, Maj. R.H. Van Deman's staff study urging a separate intelligence division of the general staff. General Macomb strongly backed it.
Mar 1916	General J.J. Pershing appointed Maj James A. Ryan, 13th Cavalry, as his intelligence officer for the Punitive Expeditionary Force. Mexican informants were hired.
25 Apr 1916	All department commanders ordered to establish intelligence officers at their headquarters to operate under the immediate supervision of the Chief of Staff of the department and at the same time specified that these offices would be branches of the War Department General Staff. Question of final command raised.
3 Mar 1917	State Adjutant Generals ordered to detail officers in their various units to military intelligence duties which set up the first nation-wide intelligence coverage with offices in practically all large cities.

1917 - WORLD WAR I

6 Apr — First World War: When war was declared, there was no Army military intelligence or counterintelligence service and no naval counterintelligence service.

3 May — By direction of the Secretary of War, the Intelligence Branch of the United States Army War college was activated.

Colonel Ralph H. Van Deman became Assistant Chief of Staff, G2, War Department General Staff.

United States Army added provisions for combat intelligence personnel in all units down to battalion size scheduled for overseas service.

United States Office of Naval Intelligence established its Domestic Branch (CIC equivalent).

United States Army Intelligence was given security responsibilities including plant protection; civil service passes; counter subversion detection; and codes and ciphers.

Congress passed the act authorizing increases in the United States Army, which made possible the Corps of Intelligence Police.

26 Jun — General John J. Pershing arrived in France and saw the necessity for an American Army counterintelligence service.

7 Jul — A Plan was formulated to select 160 lieutenants for duty as intelligence officers with overseas units.

11 Jul — General Pershing's Intelligence Chief sent a request to the Chief of Staff for 50 men and 54 officers for counterintelligence.

11 Aug — Chief of Army War College recommended supplying the 50 enlisted men for overseas duty.

13 Aug — Chief of Staff, United States Army, authorized the establishment of a Corps of Intelligence Police.

1 Sep — Course of instruction of intelligence officers opened at the Army War College for specially selected lieutenants.

1917

25 Nov — First 50 agents of the Corps of Intelligence Police landed at St. Nazaire, France.

28 Nov — Army Chief of Staff approved a request by the Acting Chairman of the Army War College to provide 250 men for CIP in the Zone of Interior.

December — Chief, Military Intelligence Bureau, was informed that few of the CIP agents sent to Europe were acceptable as they were either Belgians or had Belgian connections and could not be trusted until "examined."

Corps of Intelligence Police agents in France were trained at LeHavre by British and French intelligence.

United States Army purchased 153 acres of land at Colgate, Maryland, for its first Motor Transport Depot and Camp Holabird, Maryland, was activated.

Corps of Intelligence Police agents were stationed at Langres, Chaumont, Bourbon-les-Bain, and Evian-les-Bain in France.

Corps of Intelligence Police agents at Chaumont were used to dig latrines at General Headquarters. Military Intelligence personnel in France totaled 15 men prior to arrival of CIP.

0187

[redacted]

American Protective League of 65,000 members sponsored by Army Intelligence for intelligence informants.

Jan — Army CIP Paris office activated. Fifty thousands names of potential and actual subversives carded.

29 Jan — Army approved an increase from 50 to 750 agents for CIP duty overseas.

7 Feb — Military Intelligence Section transferred from Army War College to Executive Branch of the General Staff.

February — Provisional Counter Espionage instructions issued by MI.3, War Department General Staff (WDGS).

May — Principles of Counter Espionage Organization and Control within the Military Establishment. published by MI. 3.

5 Jun — Brigadier General Marlborough Churchill became Assistant Chief of Staff, G2, War Department General Staff.

June — Corps of Intelligence Police was set up like a business concern. Sixty men were at Bordeaux and three or four each at Calais, Hendaye, Cerbere and Tours, in France.

Army Intelligence Service provided personnel for a Graft and Fraud Investigative section of the Quartermaster General Department.

Paris Headquarters, CIP, under Maj Cabot Ward (Air Corps) and Capt Arthur Campbell Turner established at Hotel St. Anne, Rue St. Anne, with eight officers and 15 enlisted men.

Four agents sent to open CIP office at Nantes, near St. Nazaire, France, base of AEF.

8 Jul — Army Director of Military Intelligence Division designated as Chief Military Censor of the Army.

7 Aug — War Department authorized CIP officers to wear civilian clothing when on duty.

0188

CONFIDENTIAL

1918

17 Aug	Instructions for Commanding Officers of CIP Detachments, issued by the Assistant Chief of Staff, G2, WDGS.
20 Aug	Intelligence Instructions for Civilian Personnel under Military Control, issued by MI. 3 of MIB, Executive Division General Staff.
31 Aug	Instructions for the Organization and Maintenance of the Counter Espionage Service within Military Units, published.
August	Army Military Intelligence Service reestablished as Second Division of the War Department General Staff, G2.
4 Sep	Army approved an increase of agents for CIP, Zone of Interior, from 250 to 500 men.
23 Sep	Military Intelligence Division, G2, activated a Passport Control Section and a Port Control Section.
24 Sep	Military Intelligence Division, G2, organized a Graft and Fraud Section and handled 1128 cases in first 10 months.
11 Nov	Corps of Intelligence Police had about 75 officers and 350 enlisted men on duty.
5 Dec	Colonel R.H. Van Deman placed in charge counterespionage measures at Paris Peace Conference.
December	Critique of CIP overseas revealed identities compromised by having to stand in pay lines and travel between stations in uniform.
	Commanding Officer of CIP office at Brest urged recruitment of men from professional civilian positions.
	Corps of Intelligence Police agent disguised as Spanish workman trapped three spies at Beaune, France.
	Corps of Intelligence Police agents had been told not to take any civilian clothing with them to Europe. It took weeks to get permission to buy civilian clothing and then Quartermaster did not provide enough money. Men looked like tramps.

0189

Dec 1918	Sixty-man CIP office was established at Bordeaux, France, and smaller field offices were opened in other cities.
	Corps of Intelligence Police agents reported difficulties in a non-commissioned officer agent trying to get confidential information from an officer.
1 Jan 1919	Corps of Intelligence Police had 405 agents on duty with the AEF in France.
18 Jan	Corps of Intelligence Police agents assigned to provide security for American Peace Delegation at Paris, France.
1 Feb	Corps of Intelligence Police agents on duty in the United States totaled 128 men.
28 Jun	Treaty of Versailles signed and American troops were ordered withdrawn from Germany.
1 Jul	All CIP agents on duty (at twelve departments, stations, and cities) totaled 41 men.
1 Sep	All CIP agents on duty (at three departments and at Washington, D.C., and New York) totaled 28 men.
	Intelligence Unit of United States Treasury Department was organized.
	State Department motor pool operated out of Camp Holabird, Maryland.

0190

[redacted]

[redacted]

1920

6 Jan	Corps of Intelligence Police decentralized with local procurement of personnel by Corps Area Commanders.
January	Roster reflected the CIP as having 18 men on duty with the Army.
6 Feb	Authority given to "detail" from line organizations 24 Sergeants for special duty as Intelligence Police.
23 Jun	Graft and Fraud Investigations Section of CIP terminated.
20 Aug	Only six CIP agents on duty. Permanent Corps of 50 requested as Army discovered International Workers of the World (IWW) armed services sedition plot.
1 Sep	Brigadier General Dennis E. Nolan became Assistant Chief of Staff, G2, War Department General Staff.
8 Oct	Military Intelligence Division directed the grades and assignments of CIP agents for all Corps areas and departments.
20 Oct	Permanent CIP authorized by Section 4b-4c-25, National Defense Act, by War Department General Order #54.
22 Oct	Army survey by G2 showed that areas and departments had a need for 105 CIP agents.
23 Oct	By WDGS General Order #64, the CIP was authorized 45 sergeants. Military Intelligence Division requested $132,500.00 for CIP for 1921.
October	Military Intelligence Division regulations published defining duties and responsibilities.
14 Dec	Foreign language proficiency made mandatory requirement for CIP agents but subject to waiver.
16 Dec	Wearing of civilian clothing authorized by War Department for CIP agents on duty during peace time.
	First transcontinental motor convoy organized at Camp Holabird , Maryland.

0191

[redacted]

1921

Domestic Branch (CIC equivalent) of Office of Naval Intelligence deactivated.

15 Jan — Army "line" enlisted men, detailed to the Corps of Intelligence Police, were returned to their various branches.

3 Mar — Panama Canal Department urgently requested assignment of two CIP agents who could speak Spanish.

7 Mar — Corps G2's told to collect information on radical activities, labor unrest, anti-American Racial Groups, foreign espionage, and subversive activities. (CIP mission).

7 Mar — Duties outlined for the 30 CIP agents. Scope broadened from negative intelligence to assistance for local G2's.

7 May — Army Director of Military Intelligence said there is no assigned mission for the Corps of Intelligence Police.

12 Aug — Director of Military Intelligence stated that use of CIP agents should be left to the discretion of the Corps area G2.

29 Aug — Section 2, War Department General Order #44, revoked requirement of Military Intelligence Division approval of CIP agents procured by the Corps areas and departments.

8 Sep — Brigadier General Stuart Heintzelman became Assistant Chief of Staff, G2, War Department General Staff.

1922

7 Feb — Assistant Chief of Staff, G2, WDGS, informed G3, WDGS, that the Corps of Intelligence Police could be reduced from 45 to 30 men as only 27 were actually on duty as of this date.

9 Jun — AG letter restricted CIP agents from attending radical meetings. Must get data from press and civil authorities.

12 Jul — G2 stated that because of the restrictions imposed on CIP agents in the Zone of Interior, it was redistributing allotments to increase men in overseas departments.

28 Jul — War Department General Order #33 cut authorized strength of the Corps of Intelligence Police from 45 to 30 men. No vacancies filled.

8 Sep — Redistribution of CIP agents, on basis of 30 men, ordered by the Army.

27 Nov — Colonel William K. Naylor became Assistant Chief of Staff, G2, WDGS.

CONFIDENTIAL

1923

1 Jan	War Department General Staff removed restrictions on filling vacancies in CIP allotments.
27 Jan	Occupation of Germany officially ended.
23 Feb	Major General J.H. McRea, Commanding General, Fifth Corps Area quoted AG letter of 9 June 1922 as basis for recommending withdrawal of his CIP agent allotment.
16 Mar	Fifth Corps told it must keep its CIP agent and use him for G2 office work.
26 Jun	Military Information Division informed Philippine Islands Department that there were no Japanese speaking CIP agents available for its requirement.
14 Aug	Area and Department G2's ordered to report current personnel status and all changes as they occur.
7 Sep	Of the 28 CIC agents remaining on duty, none had any foreign language qualifications.
3 Nov	Corps of Intelligence Police duties defined by G2, WDGS, as of Special investigative nature to detect and forestall espionage and to investigate treason and disloyalty. Not police duties.

CONFIDENTIAL

1924

2 Jan	Corps of Intelligence Police at Eighth Corps Area given special liaison missions as the Immigration Service established the Mexican Border Patrol.
21 Feb	Army Industrial College founded at Washington, D.C., to train senior officers in domestic strategic mobilization factors.
25 Feb	Military Information Division concurs on proposal to organize a Military Police Corps.
1 Jul	Colonel James H. Reeves became Assistant Chief of Staff, G2, WDGS.
18 Jul	War Department authorized a civilian clothing allowance for the new permanent Corps of Intelligence Police.
22 Sep	Military Information Division requested authorization for three technical sergeants and sixteen staff sergeant grades for CIP; request was rejected.
2 Oct	G2, Eighth Corps Area wrote, "To have one grade for CIP with no system of reward for efficient service is believed to be fundamentally wrong."
2 Oct	G2, Eighth Corps Area wrote, "Men have been able to add little or nothing to their pay by camouflage employment in civil pursuits. Only one man has been able to make any extra money and his business was buying and shipping bones (at Laredo, Tex.). All other CIP men in this area are financially embarassed."
17 Oct	Corps of Intelligence Police agents frozen in grade of sergeant despite efforts to promote them.
17 Oct	G2, First Corps Area wrote MID, "There has been, recently, promotions in every branch of the DEML on duty here, except the Corps of Intelligence Police, some with comparatively short service having been promoted ..."
7 Nov	Military Information Division resubmitted its request of 22 September 1924 for an increase in authorized CIP grades.

0195

14 Nov 1924	Brigadier General H.A. Drum, G3, WDGS, stated that the duty required and performed by CIP agents did not warrant the grade of Master Sergeant.
22 Nov	G4, WDGS, opposed increase in CIP agent grades because the expense was equivalent of 20 recruits.
5 Dec	Brigadier General Dennis E. Nolan, Deputy Chief of Staff, who fathered the Corps of Intelligence Police in 1917, approved increase in ratings without Master Sergeant grade.
5 Dec	Corps of Intelligence Police was authorized promotion of three agents to Technical Sergeant and sixteen to Staff Sergeant.
19 Dec	Administration of Corps of Intelligence Police agent assigned to G2 duty at Washington, D.C., transferred to the Army War College.
	Communist Party came out from underground -- now legal.
5 Feb 1925	Philippine Islands Department requested two CIP sergeant replacements with "no special qualifications."
26 Mar	War Department directed that CIP agents who fail to volunteer for overseas extensions be reduced to the grade of private.
	First Army fire truck built and tested at Quartermaster Depot, Camp Holabird, Maryland.

8 Jan — First CIP Mobilization Plan published. CIP to expand as secret service subsection of G2 with 250 men, 60 percent non-commissioned.

13 Jan — Ohio congressman wrote he had never heard of CIP and what was it? Wanted to get a constituent a job in CIP.

2 Apr — War Department General Order #7 reduced the Corps of Intelligence Police from 30 to 28 men by eliminating one agent in the Philippine Islands and one in the Eighth Corps Area. (Mexican Border).

23 Aug — Panama Canal Department vainly urged increase of allotment from two to three agents as it warned of "sudden emergency."

1 May 1927 — Colonel Stanley H. Ford became Assistant Chief of Staff, G2, WDGS.

27 May — Analysis of 21 percent of CIP agents on duty showed: One had "TB"; one had "six kids and retires in six months"; one was unsuited for foreign duty; one "just a good old NCO"; one was "nothing extra... a good gumshoe man"; one "OK" and had one and one half years to serve.

28 May — Corps of Intelligence Police agent furnished for special duty with the Military Attache in Peking, China.

20 Sep — Corps of Intelligence Police agent at Tientsin, China, promoted from Private First Class to Staff Sergeant by taking rating away from the Eighth Corps Area.

4 Nov — Military Attache Section at Washington, D.C., informed China Attache that CIP had no regulations but civilian clothing allowance was $140.00 and maintenance $83.51.

Corps of Intelligence Police asked for an annual budget of $4,284.00 to provide an average of $153.00 clothing allowance for each of its 28 men.

24 May — Seventh Corps at Omaha, Nebraska, reported to War Department that it had no use for the CIP agent assigned.

14 Jul — Seventh Corps objected when G2, WDGS, requested release of the CIP agent to Eighth Corps, which needed CIP agent on the Mexican Border.

21 Sep — War Department revoked periodic report requirement of duties and status of CIP agents; only number and changes subsequently required.

11 Feb 1929 — Chief of War Department Plans and Training Branch stated that the Corps of Intelligence Police should be kept as a nucleus in case of war; that 28 agents were needed; and that civilian clothing be authorized only where official duties required them.

12 Feb — Assistant Chief of Staff, G2, WDGS, stated, "I do not want to do away with CIP nor their clothing allowance but I do not propose to be placed in a weak defensive position." Survey ordered.

18 Apr — Survey showed two areas and one department could each eliminate a CIP agent and two areas wanted an additional agent.

2 May — Unsuccessful personal pleas were made by Maj Gen William Lassiter of Eighth Corps to get Master Sergeant rating for his CIP agent in charge.

31 Dec — Six inventions of the first 30 years of the Twentieth Century, of importance to intelligence, included: radio phone, 1906; helicopter, 1909; and telephoto, 1925; sound movies, 1926; television, 1928; and teletypewriter, 1928.

[redacted]

[redacted]

1930

14 Jun — Narcotics Bureau of the United States Treasury Department organized.

14 Jul — War Department authorized CIP grade of Master Sergeant and put all CIP agents on a single promotion list.

22 Jul — Major Thomas T. Handy, GSC, was Assistant Chief of Staff, G2, Panama Canal Department.

15 Aug — "Is CIP necessary?" Survey similar to 1929 ordered from Corps and Departments.

15 Aug — Brigadier General Halstead Dorey, Commanding General, Eighth Corps Area, wrote: "It would be impracticable and would be inimical to the public service to replace Corps of Intelligence Police in this Corps Area by competent clerks."

16 Aug — Major General D.E. Nolan, Commanding General, Fifth Corps Area, who fathered CIP in 1917, wrote that under his restrictive instructions of 6 December 1922 (AG letter of 9 June 1922), ". . . no need is seen for assignment of members of the Corps of Intelligence Police to this headquarters. . . ."

18 Aug — Major General Johnson Hagood, Commanding General, Seventh Corps Area, wrote: ". . . that there was a place for CIP overseas in time of war but not in the United States in time of peace. CIP agents could be replaced by clerks."

20 Aug — Major General Frank Parker, Commanding General, Sixth Corps Area, wrote: "...the present number (CIP agents) is not considered adequate...."

26 Aug — Major General G. LeRoy Irwin, Commanding General, Panama Canal Department, personally wrote: "...the organization be modified to allow increased grades to insure obtaining and retaining the type of man necessary for this work..."

0199

[redacted]

3 Jan	Brigadier General Alfred T. Smith became Assistant Chief of Staff, G2, War Department General Staff.
25 Feb	Chief, Operations Branch, MID, stated: "... G3 has been and is opposed to any CIP as such..."
25 Feb	Military Information Division, G2, WDGS, took over allocation of CIP agents from Corps and Departments; basis, one agent each corps and additional as needed.
3 Mar	G2, WDGS, relieved CIP agent with China Military Attache as such duty was inconsistent with regulations establishing CIP.
5 Oct	Eighth Corps Area reported that newspaper publicity on promotion of one of its agents on the Mexican Border revealed his undercover work and agent had to "run for it."
10 Oct	Eighth Corps Area informed there was no means on single promotion list for retirement promotion for CIP agents.
18 Feb 1932	Eighth Corps Area Commander unsuccessfully appealed total service seniority basis of promotion of CIP agents which resulted in passing over an agent with more CIP experience.
Jun-Jul	CIP agents penetrated Bonus Marchers at Washington, D.C., to keep Army informed of subversive dangers.

18 Sep	Survey of the linguistic, general clerical, and special qualifications of all CIP agents ordered.
9 Oct	Deputy Chief of Staff, Maj Gen H.A. Drum, asked Assistant Chief of Staff, G2, for views on proposal to reduce Corps of Intelligence Police to not more than 15 men.
12 Oct	Survey ordered of Corps and Departments asking if their CIP agents could be replaced or dispensed with.
14 Nov	Survey showed Areas and Departments wanted seven more CIP agents. G2, with G1 concurrence, recommended no reduction.
5 Dec	Brigadier General J.H. Hughes, G3, recommended reduction of Corps of Intelligence Police to 15 men. He stated that the work, except on the Mexican Border and in Foreign departments, was clerical and could be more economically done by civilians. He further stated that attendance at public radical meetings was a Department of Justice function.
9 Dec	Major General H.A. Drum, Deputy Chief of Staff, ordered the Corps of Intelligence Police be reduced to 15 men by 1 June 1934.
16 Dec	Military Information Division, G2, WDGS, scheduled all CIP agents in eight corps areas to be eliminated and half of the agents in the Eighth Corps Area to be eliminated.
20 Jan 1934	Ninth Corps Area at San Francisco, California, urged retention of its CIP agent stressing increased Japanese activities on West Coast.
21 Feb	Orders issued to eliminate 13 agents. One loss through illness was to be filled by transfer to Hawaii.

[redacted]

1 Feb — Brigadier General Harry E. Knight became Assistant Chief of Staff, G2, War Department General Staff.

22 Mar — G2, WDGS, stated marked increase in subversive activities since June 1934 and asked that the Corps of Intelligence Police be increased from 16 to 32 men. G1 and G4 concurred.

30 Mar — Brigadier General J.H. Hughes, G3, stated that he did not concur on CIP increase as grades "are needed for troops."

9 Apr — Survey of CIP needs in the Corps Areas and Departments ordered. Results showed total of 35 CIP agents desired.

13 May — Request for an increase of five men submitted to Chief of Staff, General Douglas MacArthur; request disapproved.

23 May — Panama Canal Department authorized to use supplementary roster from G2 to AG to conceal identity of its CIP agents.

10 Oct — One additional CIP agent authorized for duty in the Philippine Islands; the Army turned over internal affairs to native administrators.

27 Nov — Colonel Francis H. Lincoln became Assistant Chief of Staff, G2, War Department General Staff.

24 Dec — Lieutenant Colonel George S. Patton, Jr., Assistant Chief of Staff, G2, Hawaiian Department, made a personal attempt to get a CIP technical sergeant promoted to master sergeant before retirement.

Domestic Branch of Office of Naval Intelligence, deactivated in 1921, was reactivated.

16 Jan 1936 — Retirement promotions for CIP agents regardless of experience and time in grade were refused because of no vacancies, but approval was given to transfer the agent to some other branch.

30 Apr — Major General D.E. Nolan, who was responsible for the organization of the CIP in WW I and for its retention in the peacetime Army, retired from the service.

0202

[redacted]

[redacted]

1937

1 Jul — Colonel E. R. Warner McCabe became Assistant Chief of Staff, G2, War Department General Staff.

3 Jul — Congressional non-alien enlistment act deprived the Corps of Intelligence Police of three extremely valuable Filipino agents.

Transportation Corps Railway shops were activated at Camp Holabird, Maryland.

0203

[redacted]

17 Apr — Counterintelligence Branch established in G2 to handle censorship, counterespionage, domestic intelligence safeguarding of military information, and espionage functions for the agency.

23 Apr — G2 asked that, in view of urgent needs, the Corps of Intelligence Police be increased from 15 to 20 men.

5 May — G3 did not concur in request and stated that he was still of the opinion expressed on 5 December 1933, viz-CIP ranks greater than need; cost more than efficient clerks but do clerks work. Penciled note reference civilian clerks: "G2 has the money but doesn't want to spend."

5 May — G2, Philippine Islands, was given $700.00 from confidential funds to buy information after being ordered not to fill a CIP vacancy.

17 May — Operations Branch, G2, stated increases were earnestly needed because of troubled conditions in Mexico, Japanese West Coast activities, and German activities in the New York area.

20 Jun — Military Information Division formally assigned "Safeguarding Military Information."

2 Aug — Foreign Service Roster for CIP assignments established by the Assistant Chief of Staff, G2, War Department General Staff.

1 Sep — Corps of Intelligence Police authorized to carry one sergeant as surplus until a vacancy occurs, to prevent loss of China CIP agent.

30 Sep — Munich "Peace in Our Time"!

9 Nov — Corps of Intelligence Police replacements for Hawaiian Department to be sent, in the future, on a civilian status by first class passage to conceal identity.

21 Nov — Corps Area and Department G2s ordered to send in a report on the specific duties of their CIP agents.

23 Nov — A Department G2 wrote: "We have relied too much on gratuitous information and should now organize to go after it rather than to receive it...little of permanent and continuing value to the department is possible with the ever changing personnel..."

[redacted]

1939

31 Mar — Corps of Intelligence Police reverted to 15 men authorized when surplus Staff Sergeant was absorbed following retirement of another CIP Sergeant.

4 Apr — Corps of Intelligence Police authorized 16 men again when War Department authorized an additional man for the Panama Department.

26 Jun — Presidential Proclamation of Investigative Jurisdiction assigned responsibilities of Army, Navy, and Treasury Departments.

1 Sep — Nazi Germany invaded Poland and World War II followed.

6 Sep — Delimitations Directive promulgated as basis for working agreement. Committees still worked on details.

9 Nov — One CIP agent for Puerto Rican Department authorized by transfer of one allotment from Eighth Corps Area.

27 Nov — First CIP agent sent to newly activated Puerto Rican Department which was under the jurisdiction of Second Corps Area, New York.

0205

[redacted]

3 Jan — President Roosevelt asked wartime powers and higher taxes for defense.

30 Apr — Brigadier General Sherman Miles became Assistant Chief of Staff, G2, War Department General Staff.

16 May — G2, WDGS, informed Corps and Areas that funds were available for detailing enlisted men and reserve officers for CIP duty.

5 Jun — Memo of Definitions of Jurisdictions issued jointly by MID, ONI, and FBI, as a working delimitations agreement.

Jul — John J. McCloy called to Washington at Secretary of War Henry L. Stimson's personal request to advise the War Department in its counterintelligence work; after years of work as a lawyer investigating the Black Tom case he had a wide knowledge of prewar subversive methods.

3 Jul — G2, WDGS, requested that the Corps of Intelligence Police be increased from 16 to 42 men because of increased work load.

6 Jul — G1 concurred in above and stated that the necessary men and grades were now available from the War Department Reserve.

7 Jul — Secretary of War ordered the Corps of Intelligence Police be increased from 16 to 42 men.

15 Jul — Major Alexander R. Bolling, GSC, was named Assistant Chief of Staff, G2, of the First Corps Area at Boston, Massachusetts.

18 Jul — Corps Areas and Departments notified that sufficient grades were available for promotion of deserving CIP agents.

22 Jul — G2 informed that funds were available for the hiring of civilian clerical personnel for intelligence work.

3 Aug — Director of Intelligence informed Areas that there were no prescribed qualifications for CIP agents except highest integrity, minimum high school education, and ability to handle a given position.

CONFIDENTIAL

1940

10 Sep	Corps of Intelligence Police agent, on duty with Military Attache at Peking, China, since May 1927, transferred to Washington, D.C.
16 Sep	United States passed Selective Service Act.
October	Corps of Intelligence Police was authorized to employ civilian investigators. (Employment of civilian investigators on a $4.00 a day and expenses basis was terminated in 1917).
29 Oct	Military Information Division Credentials issued (blue and white) . The MI Badge of World War I was still in use (silver-black and oval in shape).
3 Nov	War Department ordered a roster of all CIP agents. Corps and Departments were ordered to furnish data.
9 Nov	G2 asked for increase of Corps of Intelligence Police to 188 men to provide agents at 26 arsenals and depots and at 51 Army camps, each with a scheduled population of 5,000 men or more.
21 Nov	The Adjutant General stated that the Corps of Intelligence Police had no insignia of a regimental character and "since it operated in a more or less confidential character, no publicity will be given it."
23 Nov	Increase of Corps of Intelligence Police from 42 men in July 1940 to 188 men authorized by the Chief of Staff.
2 Dec	Recommendation approved, that CIP agents be allotted by the War Department and suballotted to Corps; that the Office of Chief, Corps of Intelligence Police, be created; and that a CIP school be established.
26 Dec	Corps of Intelligence Police agent qualifications set at ages 22 to 33; minimum of a high school education; completion of basic training; and training in college law or accountancy and government investigative experience, were desirable.
December	Lieutenant Colonel Manton S. Eddy was Assistant Chief of Staff, G2, of Third Corps Area at Baltimore, Maryland.
	The Army's jeep was road tested on Camp Holabird's driving course.

1941

11 Jan	Panama Department authorized increase of twelve CIP agents.
15 Jan	Survey ordered of all army personnel in all Corps areas to find an American of German extraction and another of Italian extraction suitable for CIP duty.
16 Jan	Detailing of Military Intelligence Officers to the Corps of Intelligence Police authorized.
27 Jan	Major Garland H. Williams, Inf, reported as Chief of the Corps of Intelligence Police and Commandant of the CIP Training School.
30 Jan	Clothing allowance of $40,845.00 was authorized for the Corps of Intelligence Police for the remainder of Fiscal Year 1941.
January	Appointment was made of a Chief of the Corps of Intelligence Police subsection, Investigating Section Counter Intelligence Branch, Military Intelligence Division, Assistant Chief of Staff, G2, War Department General Staff.
February	Public Relations Branch of G2, WDGS, was terminated and a separate Bureau of Public Relations was organized.
3 Feb	Military Intelligence Division stated that it did not desire waivers of any CIP qualifications. Vacancies were to be filled by transfer of eligible personnel from other areas.
6 Feb	Selectees were of little use to the Corps of Intelligence Police since they had to spend three months in basic training, leaving only nine months service.
7 Feb	Military Intelligence Division submitted a staff study recommending establishment of a Military Intelligence Espionage School to supplement the CIP Training School.
17 Feb	Hawaiian Department authorized to recruit two American citizens of Japanese extraction for CIP duty.
24 Feb	Corps of Intelligence Police Investigators Training School opened for non-commissioned officers. School opened at Army War College with 50 agents.

0208

CONFIDENTIAL

1941

24 Feb	Third Corps Area reported it had been unable to find a suitable man who could speak high German fluently.
20 Mar	Use of colored personnel authorized for CIP duty.
22 Mar	First class of CIP Investigators Training School graduated 39 men; 11 men failed the course.
31 Mar	Instructions, for safeguarding identity of CIP agents in handling Army records, sent to the field.
March	Army Security Agency established its school at Fort Monmouth, Red Bank, New Jersey.
1 Apr	Lieutenant Colonel A. R. Bolling, G2, First Corps Area, wrote G2, WDGS, "...if they (CIP agents) were in a line organization at this time, they would have attained without any difficulty, whatever at least the grades I have recommended. . . ."
2 Apr	Technical Manual 30-315 (Tentative) published and distributed to the field; comments on it ordered.
2 Apr	Personal History Statement required of all personnel assigned to the Corps of Intelligence Police or being considered for assignment to the Corps of Intelligence Police.
5 Apr	Increase ordered of CIP agents in Hawaiian Department, where 15 agents were on duty.
7 Apr	First Counter Intelligence Officers' Investigative Training School, since 1918, was activated.
17 Apr	G2s, all Corps Areas, ordered to expand CIP recruiting and to include men with mechanical, architectural or electrical engineering education, or factory or industrial experience.
19 Apr	Corps of Intelligence Police authorized an increase of 100 men, to a total of 288 men.

1941

21 Apr	Chief, Corps of Intelligence Police, unable to furnish Panama Department with an experienced investigator because no Corps Area would release an agent.
22 Apr	Military Intelligence Division informed a Corps Area G2 that the CIP type of ability was "not necessarily connected with military experience or proficiency."
22 Apr	Ninth Corps Area told by G2 that no CIP agents should be quartered or rationed with military units and normally the Officer in Charge should meet them away from military reservations.
27 Apr	An additional week added to CIP Officers' Training Course to instruct on plant surveys and protection.
May	Second CIP Investigative Course for enlisted men began at War College 1 May 1941 and completed 31 May 1941.
3 May	First Officer Investigators Training Course ended with 37 graduates and 11 failures.
8 May	Corps of Intelligence Police authorized $25,000.00 for the purchase of technical and investigative equipment.
8 May	Troop Information and Education Branch of the Army established to handle counterpropaganda.
9 May	Corps of Intelligence Police agents required to submit a daily activities report. Forms sent to all Corps and Departments.
9 May	Recommendation of corrective not punitive action for disciplining CIP agents not approved. Area G2's allowed to "bust" men on first offenses.
9 May	A CIP agent in Fourth Service Command was reduced to the grade of private and separated from the Corps for unauthorized disclosure of his connection with Military Intelligence.

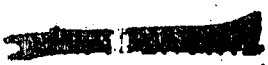
[redacted]

1941

10 May	Corps of Intelligence Police agents stationed in Washington, D.C. transferred to the Third Corps Area for administration in order to conceal identity.
20 May	G2 reported that CIP had 2,600 investigations pending in the various Corps Areas.
20 May	Chief, Corps of Intelligence Police, authorized to handle the centralized purchasing of all technical and investigative equipment.
27 May	Corps of Intelligence Police offices ordered to maintain closer cooperation with Ports of Embarkation in letter to G2, Ninth Corps Area, at San Francisco.
28 May	To avoid buying automobiles, the payment of 5¢ per mile to CIP agents using their own private vehicles was authorized.
28 May	Secretary of War directed that all men have 13 weeks basic training before being assigned to units.
31 May	Corps of Intelligence Police authorized an increase from 288 men to 513 enlisted men.
4 Jun	Over protests of the Chief, Corps of Intelligence Police, the assignment and promotion of CIP agents was decentralized to Corps Area and Department Commanders.
6 Jun	Corps of Intelligence Police efficiency reports were distributed to all Corps Areas and Department for semi-annual reporting.
7 Jun	Corps Areas and Department again admonished not to use CIP agents for other than investigative work.
12 Jun	G2, WDGS, disapproved additional training schools for CIP agents, in foreign departments, and for officers.
19 Jun	Chief, Corps of Intelligence Police, formulated policy that academic failure at CIP school is not cause for separation from the Corps of Intelligence Police as theory and practice are different.

1941

21 Jun	With the surrender of France, Germany had conquered western Europe.
30 Jun	Zone of Interior Army Headquarters were as follows: First, New York, New York; Second, Memphis, Tennessee; Third, San Antonio, Texas; Fourth, San Francisco, California.
30 Jun	Ten CIP agents of Sixth Corps Area completed 1,020 interviews during month of June.
3 Jul	Washington, D.C. Office allocated 25 agents as sudden growth of the Corps of Intelligence Police swamped administrative staff. Third Corps had 52 men.
7 Jul	G2's, all Corps Areas, ordered each to recruit one colored CIP agent.
7 Jul	US occupation of Iceland announced by President Franklin D. Roosevelt.
9 Jul	Centralized Corps of Intelligence Police requested by Chief Garland Williams since there are "...14 different policies, 14 different practices, 14 different methods of work and, in general, 14 separate and distinct units. . . ."
10 Jul	Corps of Intelligence Police ordered to provide qualified agents for a sensitive undercover assignment on the Army Transport West Point.
14 Jul	New CIP badge (shield) and credentials authorized as 167 old badges compromised by loss. Military Intelligence to have different identification.
16 Jul	Corps of Intelligence Police personnel ordered to Puerto Rico.
18 Jul	Corps Areas ordered to screen all tactical unit personnel for men speaking any one of eight different languages as screening at replacement centers did not fill vacancies.



[redacted]

1941

19 Jul	Chief, Corps of Intelligence Police, formulated policy that CIP enlisted men may marry provided their commanding officer approves.
22 Jul	Corps of Intelligence Police agents authorized to travel by commercial carriers to protect their identity.
22 Jul	First shipment of technical investigative equipment to CIP units in Corps Areas and Department included miniature cameras.
24 Jul	Sixth Corps Area G2 reported that, in four months of searching, he had been able to locate only one suitable colored agent.
25 Jul	Definition of "Investigator" given to the Adjutant General for use in Army classification of personnel.
27 Jul	New regulations on the procurement of civilian clothing issued to the field cover handling of unused allotments when CIP agents are transferred.
30 Jul	G2 informed Corps of Intelligence Police that five agents were to be secured for Iceland duty and other agents were to be alerted for duty in the Trinidad Sector.
31 Jul	Corps Areas informed that in the future it will be necessary to transfer trained CIP personnel to various base commands.
July	First two Corps of Intelligence Police agents arrived in Alaska.
July	Major David G. Erskine joined CIB, MIS, G2, also White House Aide.
August	Two new gilt badges were issued; one for CIP and one for MI.
2 Aug	Policy of War Department to send all men, including CIP agents, through 13 weeks basic training is reaffirmed.

1941

3 Aug	Captain Donald D. MacDonald replaced Maj Garland Williams as Chief, Corps of Intelligence Police, Military Intelligence Div.
5 Aug	Corps of Intelligence Police informed that no selectees or reserve officers could be ordered to duty outside the United States without their consent.
6 Aug	Corps of Intelligence Police agents authorized for duty at St. Lucia and British Guiana in the Caribbean.
12 Aug	Major David G. Erskine, Assistant Executive Officer, CIB, MID, G2, directed that all requests for investigations relating to CIP personnel be handled through the Investigative Section, G2.
12 Aug	Corps of Intelligence Police quota for Fourth Corps Area reduced from 59 to 41 because of inability of the Corps to fill its quota.
12 Aug	Two CIP agents to be alerted for Bermuda on an undercover assignment with a construction crew.
21 Aug	Iceland Base Command authorized an increase to 12 CIP agents.
25 Aug	Roster revealed that CIP had on duty only 338 of its authorized 513 men.
27 Aug	Fort Belvoir, Virginia, conducted a course for Intelligence Officers for task force assignments.
28 Aug	Study initiated on consolidation of CIP Headquarters Field Office and Third Corps Area CIP Office, both in Washington, D.C.
28 Aug	G2 informed Chief, Corps of Intelligence Police, that his office had been losing authority for a long time and to gradually expand his authority and start by taking regional control from the Corps Areas.

[redacted]

1941

31 Aug	Corps of Intelligence Police, Sixth Service Command, reported for month of August that its 17 agents completed 67 cases and had 25 pending of which 17 were backlog. Two thirds of its investigations were personnel. There were 879 interviews conducted during the month.
August	Provost Marshal General's Office and Corps of Military Police were recreated by Executive Order.
2 Sep	Hawaiian Department reported that its CIP in August completed 15 cases of which one was espionage.
3 Sep	G2 instructed Chief, Corps of Intelligence Police, to build up the Washington, D.C., CIP Detachment.
3 Sep	Major Erskine, at G2, instructed the Chief, CIP, to immediately secure two colored CIP agents for duty in Washington, D.C.
4 Sep	Control of Washington CIP Detachment "unsatisfactory" since three commands share responsibility for it: CCIP, ISCIBMID and CGIIICA.
6 Sep	Two CIP agents requested by G2 for assignment to Newfoundland Command.
6 Sep	Provost Marshal General's Police School proposed. Suggested that Military Police and Corps of Intelligence Police could be combined.
8 Sep	G2, Ninth Corps Area, recommended that Corps Area Commanders Control all CIP investigations in their areas with Post Intelligence Officers as their agents.
12 Sep	G2 Liaison Officer said: "...no assurance whatever CIP will merge with MPs," and "personally hopes we may be able to organize our own intelligence operating outfit...."

2 Sep — G2 instructed that Hawaiian and Philippine Islands Departments be notified that two instructors from the CIP school would be sent to them to establish accredited CIP schools of instruction there.

6 Sep — G2 requested that a CIP agent be alerted for assignment to Greenland Command.

7 Sep — G2 stated it was considering a reorganization of the CIP that would include authorization for appointment of warrant officers.

8 Sep — Office of the Chief, Corps of Intelligence Police, started work on a revision of the Report Writing Manual.

9 Sep — G2 alerted the Corps of Intelligence Police to possibilities of having other CIP Schools in various cities of the country and necessary instructor "cadre" should be available.

9 Sep — S2 Trinidad Base Command requested the assignment of a CIP agent possessing qualifications "as to meeting and impressing ladies...in other words he should be good looking and have it."

2 Sep — G2 not satisfied with technical instruction given at CIP School. Said it may have to establish a separate school. Men should be able to install and use equipment.

6 Sep — Procedure for purchasing civilian clothing on confidential vouchers to conceal identity was being worked out with General Staff.

8 Sep — Corps Areas and Departments asked to name CO's for detachments.

ber — Federal Bureau of Investigation gave a one month special training course for 50 selective Army officers, 50 Navy and 3 Marines in Washington, D.C. Of the officers, Sheen and Wise were the only CIP officers that went.

[redacted]

1941

1 Oct	New Credentials issued (red - white) with CIP and MI separated.
1 Oct	G2, over protests of Chief, Corps of Intelligence Police, ordered new CIP badges and credentials shipped out by blocks to Corps Areas and Departments.
4 Oct	G2, Third Corps Area said that its 52 CIP agents were being used to full capacity and additional agents were needed for Plant and Post surveys.
6 Oct	Corps of Intelligence Police men on investigative functions ordered to be called "Mr" and the title described as "Special Agent."
7 Oct	Captain Henry Gordon Sheen assumed command of Corps of Intelligence Police, vice Capt MacDonald who was relieved.
10 Oct	Corps of Intelligence Police Hq informed a Corps Area that it had no special methods for investigation of CIP applicants.
17 Oct	Corps of Intelligence Police Hq advised Third Corps Area that prerequisite of basic military training for CIP agents was not considered a very important military requirement.
22 Oct	G2, Eighth Corps, recommended keeping all CIP files in the field at a minimum.
24 Oct	Provost Marshal General suggested that the CIP School be held at Arlington Cantonment, Arlington, Va., at the same location proposed for the Military Police School. It was pointed out that construction of housing for this move would cost $250,000.
27 Oct	All CIP agents ordered to spend a minimum of three hours per week in physical fitness activities.
29 Oct	Provost Marshal General took over authority, from the Corps of Intelligence Police, for the investigation of all applicants for military connected employment to include scientists, applicants for reserve officer commissions, visitor credentials, operation of the Visa and Passport sections, and operation of the Counter Fifth Column Plan.

1941

30 Oct	Authorization for establishment of the CIP School at Chicago, Illinois, received and arrangements were made with the Quartermaster Real Estate Division.
30 Oct	Maximum age limit for prospective CIP agents increased from 28 to 34 years.
1 Nov	Army Language School activated as part of Fourth Army Intelligence School at Presidio of San Francisco, California, with sixty Nisei enlisted students.
6 Nov	Staff Study "Efficient Operation of the CIP" approved. (No record of what this study contained).
10 Nov	Corps of Intelligence Police Training School established at Town Tower Club, Chicago, Ill.
12 Nov	War Department informed Service Commands that CIP personnel will be shifted from one command to another on detached service as needs vary.
12 Nov	Corps Areas and Departments ordered to select an officer as Chief for the Corps Area CIP Detachment.
12 Nov	Corps of Intelligence Police Efficiency reports ordered submitted semi-annually and upon transfer instead of quarterly.
12 Nov	Corps Areas ordered to appoint a CIP Chief to actively supervise agents and to be stabilized in the position.
13 Nov	G2 advised Corps of Intelligence Police that 90 agents and appropriate grades were to be released to the Provost Marshal General for the purpose of conducting "applicant and similar investigations from which duties the CIP would be released."
15 Nov	Corps of Intelligence Police Hq asked that departments, bases, Alaskan Defense Command, and G2, Washington Detachment be exempted from furnishing CIP agents for transfer to the Provost Marshal.

1941

18 Nov — Corps of Intelligence Police received 300,000 rounds of .38 caliber ammunition from the Chief of Ordnance and distributed it to Corps Areas.

22 Nov — Major David G. Erskine of G2, WDGS, started preparation of staff study on the establishment of new districts and 22 new offices.

22 Nov — S2 Trinidad, stated CIP undercover agents should be assigned as grease monkeys in a power shovel gang where sabotage of expensive machinery was suspected.

26 Nov — Chief of Staff, WDGS, directed that the CIP Investigators Training School remain in Chicago, Illinois.

28 Nov — Corps of Intelligence Police advised to be ready to provide a sizeable CIP Detachment for duty at headquarters of any theater of operations overseas.

1 Dec — Chief of CIP after inspection in five corps areas stated: (U)

a. FBI preferred to deal with MID and was much confused by dealings with the army's several other investigative agencies.
b. Confidential Fund restrictions were too arbitrary and responsible for low morale and improperly connected investigations.
c. Many COs were attempting to administer CIP like peacetime enlisted men in garrison and looked on agents with suspicion and contempt.
d. Majority of Post Intelligence Officers were being assigned additional duties having no bearing on intelligence functions.
e. The CIP policy of one stenographer-typist to each three agents had not been achieved.
f. Corps of Intelligence Police agents should be informed of the results of their work if high morale is to be maintained.

1 Dec — Three additional CIP agents were rushed to the Puerto Rican Department

1941

1 Dec — Captain H. G. Sheen recommended to G2 after inspection of five corps areas that:(U)

a. Fifteen additional Metropolitan Intelligence offices should be established in various districts.
b. CIP should be brought out from undercover but its personnel should not be identified.
c. The name CIP should be changed to eliminate "police" and be called Counter Intelligence Unit, U.S.A.
d. All areas and departments should be told to use "common sense" in handling of Confidential Funds.
e. Necessary action should be taken to fill quotas for stenographer-typists.

2 Dec — G2 instructed Chief, Corps of Intelligence Police, to increase the number of agents in Alaska.

3 Dec — Secretary of War Directed the nine Corps Areas to transfer 90 CIP agents to the Provost Marshal General as of 15 Dec 41.

5 Dec — Corps of Intelligence Police agents of Third Corps Area provided Army with coverage during "captive" mine strike.

5 Dec — Corps Areas and Departments were urged to send qualified CIP agents to Officer Candidate Schools.

INTELLIGENCE AXIOM

"...Many (officers) are uniquely qualified for staff intelligence duties and indeed would prefer to devote their careers to those tasks..."

--General Omar Bradley

[redacted]

1941

7 Dec — World War II - Pearl Harbor: CIP agents "stand by at field offices." G2 informed CIP Headquarters "no action to be taken until Monday, December 8."

8 Dec — Corps of Intelligence Police submitted request to double its strength, recall all CIP enlisted reservists and revoke order to transfer 90 agents to Provost Marshal General.

9 Dec — Office of the Chief of Staff approved doubling Corps of Intelligence Police to 1026 men and recall of enlisted reservists; no action taken on transfer of 90 agents to PMG.

10 Dec — Second Corps Area reported 15 CIP agents were operating on detached service with the FBI on enemy alien cases in New York Area.

10 Dec — G2 authorized centralization of CIP personnel and administration, and the procurement of carefully selected officers for CIP duty; substandard officers to be eliminated; all backgrounds to be fully checked.

11 Dec — Corps of Intelligence Police furnished two agents in uniform to assist in the security of classified interceptor protection at Bolling Field, Washington, D. C.

12 Dec — Corps of Intelligence Police directed by G2 to make a security survey of the Munitions Building, Washington, D. C. Secret night office search scheduled for 17 December 1941.

13 Dec — Military Police units activated. Transfer included 90 CIP agents to Criminal Investigation Division (CID), as of 15 December.

15 Dec — Because of attitude of the new Panama Government, Canal Zone CIP agents were divided into two groups -- known or open and undercover.

18 Dec — G2, Fourth Corps Area requested instructions on handling the clothing allowance of CIP agents transferred to the PMG.

0222

[redacted]

1941

19 Dec — Major General E. S. Adams, the Adjutant General, called on the Assistant Chief of Staff, G2, to complain about the methods used by the CIP agents on the surprise search. General Adams was misled by his officers; oriented on true facts.

20 Dec — Corps of Intelligence Police Headquarters flooded with visitors and mail of volunteers who had an idea the work consisted of "nothing but glamour and excitement."

22 Dec — Assignment to and transfers within the Corps of Intelligence Police in Corps Areas required to be approved by the Adjutant General.

22 Dec — Roster revealed that out of a total of 1026 men authorized CIP, there were only 405 men on duty of which 23 were in the Philippines.

23 Dec — Anonymity of existence, history, activities and jurisdiction of Corps of Intelligence Police relaxed, but identity of personnel to be undisclosed except as required to accomplish the missions.

23 Dec — Corps of Intelligence Police formulated plans for coordination of counterintelligence activities with newly established defense command headquarters.

23 Dec — Corps of Intelligence Police agents "survey" rooms and organize security procedures for a meeting of the Supreme War Council at the Federal Reserve Building.

23 Dec — Chief, CIP requested funds be authorized for the purchase of recreational equipment to insure physical fitness of all agents.

24 Dec — Deputy Chief of Staff approved Corps of Intelligence Police plan for coming out from undercover and suggested Bureau of Public Relations prepare press releases.

24 Dec — Brigadier General F. E. Uhl, CG, Seventh Corps Area, wrote to the AG that the orders requiring AG approval for transfer of CIP agents was "....centralization to a degree that seriously interferes with proper performance of the responsibilities assigned to the Corps Area Commander...."

0223

1941

26 Dec	G2 informed Chief of Staff that "majority of officers assigned to CIP by local commanders unsuited and untrained" and "the counter-actions of the skillful professional enemy agents will not occur under inexperienced amateurs."
30 Dec	The Air Corps requested that a special allotment be made to provide at least one CIP agent be assigned to each air base.
31 Dec	G2 forwarded to the Corps of Intelligence Police an approved memorandum for the procurement of $46,000 worth of CIP equipment.

1 Jan — The Corps of Intelligence Police became the Counter Intelligence Corps recognizing change in mission from policing to intelligence.

1 Jan — Corps Areas and Department authorized to assign officers to duty with the Counter Intelligence Corps after clearance by G2, War Department General Staff.

1 Jan — Transfer of 12 CIP agents of the Western Defense Command to Provost Marshal which was accomplished "on paper" as of 15 December, rescinded and CIC kept the men.

2 Jan — G2 requested chief of Morale Branch allocate $2,052.00 per month (at the rate of $2 per agent) to rent recreational equipment necessary to maintain physical fitness.

6 Jan — Priorities ordered on all CIC investigations with incident cases rated as "1 a" and investigation of CIC applicants as "1 b."

6 Jan — Commanding General, Seventh Corps Area informed by AG that centralization was ordered only after decentralized procedure had introduced into the CIC "...a larger percentage of agents whose character, education, adaptability and experience in no way qualified them for the duties they would be required to perform...."

7 Jan — Fourth Service Command stated confusion and duplication would be avoided by using its CIC agents to investigate cases at local air bases instead of sending in agents of the CIC detachment of the A2 section of the (First) Troop Carrier Command at Stout Field, Indianapolis.

13 Jan — Chief, CIB, G2 asked all Corps Area G2s to report their need for CIC clerical assistance.

23 Jan — Chief, Counter Intelligence Corps, required a report of the progress of physical fitness programs in the Corps Areas and Departments.

23 Jan — G2 stated that CIC applicants must have completed eight weeks basic training before being considered for the Corps.

23 Jan — Two CIC spaces allocated V Corps at Camp Beauregard, Louisiana, from CIC general headquarters spaces.

[redacted]

1942

23 Jan	Two CIC agents arrived in Belfast, Ireland, with first U.S. troops in Europe. V Corps designated MAGNET force.
27 Jan	Corps informed many reports of investigations of prospective special areas have had to be returned as some showed no investigation at all and others were "so sketchy as to afford no security."
January	Headquarters, Caribbean Defense Command, Quarry Heights, Canal Zone, began intensive recruitment program in all installations for potential CIC Agents.
February	CIC Caribbean Defense Command placed agents in undercover capacity throughout Canal Zone and neighboring Republic of Panama Cities. They were given false names and false employment with strict instructions to avoid all military personnel and each other.
1 Feb	Brigadier General Raymond E. Lee became Assistant Chief of Staff, G2, WDGS, after serving as Assistant G2.
1 Feb	G2, WDGS, took over control of all investigations of prospective CIC personnel.
3 Feb	CIC personnel authorized 300 rounds of .38 caliber ammunition per year; 200 rounds for target practice, 100 in reserve.
10 Feb	G2 Caribben Defense Command requested $5,000 for CIC travel and informant expenses for remainder of fiscal year and also authority to get passports for agents.
16 Feb	Chief, CIC provided Personnel Procedures Section of AG with outline of qualifications required for CIC assignment. First, must have investigative experience. Second, should have legal experience.
18 Feb	G2 informed G2, Seventh Corps Area that it had never had a requirement that CIC agents be unmarried and asked for source of information, which claimed they should.
21 Feb	Chief, Counter Intelligence Corps, required all special agents to take an oath to conceal identity and classified information except "in the line of duty."

[redacted]

1942

22 Feb — Final revision of Delimitations Agreement was approved and distributed to all Corps Areas and Departments.

23 Feb — Survey revealed CIC had only 314 of its authorized 526 agents. All Corps Areas ordered to intensify recruiting.

25 Feb — G2, Eastern Theater of Operations at New York, asked S2s of his command to report on need for CIC agents, benefits derived and improvements required.

26 Feb — Chief, CIC explained filing system for CIC had been selected by R Sec the G2, WD, as the miscellaneous classification 322.999 with eleven alphabetical cut-off re: general, automobiles, clothing, enlisted school, equipment, identification, officer school, rations, rosters, school lectures, and travel.

28 Feb — Corps Areas ordered to each send a CIC agent to CIC Headquarters, Washington, D. C. for training in reviewing reports of investigation of prospective CIC personnel.

2 Mar — War Department Circular #59, designated the Counter Intelligence Corps, except for detachments with task forces, the operating branch of the Military Intelligence Service.

3 Mar — Corps G2s ordered by Secretary of War to arrange to "tab" names of all soldiers being investigated for CIC assignment and freeze them in their current assignments until released.

3 Mar — Survey of CIC agent needs ordered from all army commanders.

9 Mar — General Dwight D. Eisenhower became Chief of the Organization and Planning Division and later reported "...a shocking deficiency" in the field of intelligence.

10 Mar — S2, Newfoundland stated positive benefits derived from his CIC agents but recommended that undercover status be established prior to arrival and that all administrative details of undercover be worked out in advance.

16 Mar — Survey revealed that Corps Areas G2's wanted an additional 447 CIC agents.

[redacted]

1942

17 Mar — All requests for passports, for CIC agents on special assignments, ordered made through the Assistant Chief of Staff, G2, War Department General Staff.

20 Mar — Military Intelligence Service of the Military Intelligence Division formed over protests of General Strong, G2.

21 Mar — G2, First Corps Area reported his 38 CIC agents had a backlog of 558 cases.

23 Mar — G2 Third Service Command reported its 78 agents were handling 2,089 CIC cases.

27 Mar — Technical Manual 30-205, Countersubversive Instructions, was approved and the establishment of the military CS system started.

29 Mar — Eleven CIC agents, 29 assigned spaces and the unexpended portion of $20,000 CIC fund of the Caribbean Command outside the Republic of Panama and the Canal Zone ordered transferred to MIS, War Department.

30 Mar — CIC included with Provost Marshal investigators in authorization to issue blanket orders for local investigative travel.

31 Mar — Sixth Corps Area reported 725 cases under investigation by its 49 agents.

1 Apr — Chief, CIC, issues new badges and credentials.

2 Apr — First Military Intelligence Officer Candidate School opened in Chicago, Illinois.

3 Apr — Western Defense Command asked an increase of 179 agents to make a total of 150 and stated that when a potential espionage case developed in San Francisco, the CIC office there was so short handed that agents had to be withdrawn from a surveillance job to handle it.

4 Apr — G2 recommended a ratio of one CIC agent per 1000 troops in overseas operations.

[redacted]

1942

4 Apr — G2 recommended that CIC be increased to 7,395 with 445 officers and 6,950 enlisted men. Of these 2,600 would be for the Air Corps and 3,271 for overseas.

7 Apr — Inspection showed Provost Marshal General injuring morale of CIC personnel by offering commissions in higher grades to officers including those with Military Intelligence and also granting commissions to civilians.

7 Apr — Trinidad Sector asked that eight CIC agents be furnished as local procurement was impossible. Among the need was for agents to check on submarine oil sales in the area.

8 Apr — G2 Alaska reported he did not have enough CIC agents to place one at each military post of his area. He asked for an increase from 13 to 19 men.

9 Apr — First Counter Intelligence Corps agents landed in Australia. Headquarters set up at Melbourne.

9 Apr — CIC Caribbean Defense Command flew three agents from Panama to Chicago School.

13 Apr — Maximum age limit for prospective CIC agents increased from 34 to 45.

16 Apr — Inspection of CIC in six Corps Areas revealed lack of uniform organization; lack of promotions; manpower shortage with clerk shortage acute; neglect of plant security work; agents performing too many run-of-the-mill background cases.

18 Apr — Staff Sergeant Arthur S. Komori at Fort Mills, Philippines, was transferred to U.S. Forces, Far East, with the MacArthur party en route to Australia.

20 Apr — Advanced Course was organized at the CIC Chicago School for training of CIC Officer Candidates (Prep School).

20 Apr — G2 Second Corps Area asked advice on how to get back two CIC agents who did so well in OCS that their carrier branch retained them.

0229

1942

21 Apr — Chief, CIC recommended that CIC personnel be assigned tactically as follows:

Unit	Officers	Agents	Clerks	Total
Division	1	3	2	6
Corps	2	8	2	12
Field Army	4	10	3	17

22 Apr — Major Hugh D. Wise, Jr., Chief, CIC, wrote CO of CIC's 99th Infantry Division that "no written report or information is available as yet regarding the operation of a CIC detachment with a unit on maneuvers."

27 Apr — CIC authorized increase to 4,974 including officers for the first time, with 543 officers in the initial allotment.

27 Apr — Hawaii asked for an additional 66 agents with one CIC agent of Japanese extraction per 1,000 Japanese extraction residents.

27 Apr — CIC reorganization plan provided for CIC agents in all tactical units down to division level.

27 Apr — G3, WDGS, opposed an MI Officer Candidate School. Recommended using established schools.

April — Office of the Chief, Counter Intelligence Corps, moved to a separate building at 1430 K. Street, NW, Washington, D. C., from the Securities and Exchange Building where G2 remained.

1 May — Chief, MIS, stated that tactical forces had gone overseas either without CIC personnel or without sufficiently prepared personnel. He urged that tactical commanders be informed they had the right to request CIC units.

1 May — Request of G2, Second Corps Area, for transfer of two CIC agents from Signal Corps to G2 refused because the Signal Corps was already short 1,000 officers.

5 May — Major General George V. Strong named Assistant Chief of Staff, G2, WDGS. General Eisenhower said: "A senior officer possessed of a keen mind."

0230

1942

5 May — Panama Canal Department reported that American negro agents were not practical for duty in Panama.

6 May — First CIC agents captured as Japanese take Corregidor, P.I. Of 30 CIC officers and men captured, nine were known to have died as Prisoners of War.

6 May — Survey revealed 165 CIC agents on duty at stations outside the USA with 57 of them undercover.

11 May — School of Military Government opened at University of Virginia, Charlottesville, Virginia.

14 May — Spaces allotted for CIC agents at Officer Candidate Schools for several branches.

14 May — CIC agents in Corps Area and Department ordered to fill out overseas preference cards.

14 May — Women's Auxiliary Army Corps was activated when Public Law 554, 77th Congress, was approved.

15 May — Three CIC agents of G2 Unit sent on 72 hour secret mission with 23rd Ferrying Squadron from Morrison Field, Florida.

20 May — Services of civilian agents, authorized in October 1940, to be terminated within three months.

20 May — Military Intelligence Service under the MID, G2 activities was directed to operate and administer the service of collection, compilation and dissemination of military intelligence; with CIC personnel directly assigned to MIS of which Brigadier General Hayes Kroner was made Chief.

20 May — Chief of CIC outlined a plan for organization and operation of a Theater CIC Detachment.

28 May — Chief of MIS stated that Special Agents would be assigned only with approval of the War Department but Agents could be assigned by Corps Areas following investigations, but neither Special Agents nor Agents could be transferred without approval by the War Department.

0231

[redacted]

1942

May	Instructions to CIC applicants stated Corps did not solicit men; nine out of 10 men were rejected; outside influence, political or otherwise, would not further an applicant's interest.
1 Jun	Military Intelligence Service informed Corps Areas that CIC agents should be used to investigate commissioned officers, regardless of location on or off military reservations. "No restrictions be placed on performance of these agents."
1 Jun	CIC Training Section was activated at Headquarters of the Chief, Counter Intelligence Corps.
1 Jun	Chief, CIC, reported that 20,000 investigations would be required to secure an additional 4,200 officers and men.
3 Jun	Procurement of civilian type automobiles authorized. Cars to have no War Department markings visible to the public.
3 Jun	CIC agent was on duty at Dutch Harbor, Alaska, when Japanese planes bombed the port.
3 Jun	Twenty CIC agents rushed by special planes to G2 Western Defense Command to help handle an "emergency situation."
6 Jun	CIC Detachments ordered to issue $20 emergency money to each agent to be carried at all times and produced on demand.
6 Jun	Authorized purchase of 108 second hand two-door civilian type automobiles for use by CIC agents in Service Commands and in Washington, D. C.
10 Jun	G2, Canal Zone, reported that "unsatisfactory" CIC agent had proven satisfactory as a crew member of the CIC schooner and was serving as a mechanic, radio operator and signal man.
11 Jun	New regulations published regarding civilian clothing and revoking all previous regulations. Initial allowance $100 or less, given once only; $7.50 monthly maintenance. No allowance for agents assigned to tactical units. All procurement from confidential funds.
13 Jun	Military Intelligence Officer Candidate School, Chicago, Illinois, terminated. Thirty CIC agents graduated.

1942

13 Jun — Office of Strategic Service organized under General William Donovan to handle positive intelligence.

14 Jun — AG letter to all commanding generals stated: "All commanders are responsible for counterintelligence coverage within their commands." CIC personnel are assigned to "assist."

15 Jun — First Military Police School opened at Fort Myer, Virginia. Shortly afterward some of the 90 CIP men were returned to CIC from the Provost Marshal General.

June — Captain Ralph Sims named Commandant of Chicago CIC Investigators Training School.

June — Operations Section formed at the Office of the Chief, CIC, to organize detachments and prepare them for overseas shipment.

June — Major Lowell Bradford designated first CIC G2 Liaison Officer as a result of move of Office of the Chief, CIC, from G2 at the Munitions Building, Washington, D. C.

June — First CIC agents arrived in the Fiji Islands with 37th Infantry Division. Start of New Caledonia detachment and island commands.

June — CIC Caribbean Defense Command sent agents undercover to Islands of Aruba and Curacao and to the Republic of Columbia. The cover used was industrial firms and missions in the areas.

1 Jul — First CIC Detachment of five officers and 15 men sailed for the European Theater.

1 Jul — The 14 "key" CIC agents of the Sixth Corps Area, Chicago, included a telephone "tap" expert; a former newspaper labor editor; a photographer; case reviewer; an attorney; two negro undercover men; a champion revolver shooter; an engineer; an "old army" first sergeant; a former states attorney; a former police secretary and two plain investigators.

1 Jul — Protest of Provost Marshal General on non-transfer of 12 CIC agents of the Western Defense Command to PM (see 1 Jan 42) resulted in G2 refusing to transfer on grounds (1) that the PM of the Western

0233

[redacted]

Defense Command said he didn't need them; (2) CIC had a serious need for trained personnel.

2 Jul — Japanese landings on the northeast coast of Papua, New Guinea, marked the high point of Japanese conquest.

4 Jul — Roster of 3rd Corps Area CIC Detachment listed 93 enlisted men. W. A. Maybury, 1st Lt, MI, Commanding.

6 Jul — War Department authorized CIC to send agents to established Officer Candidate Schools for officer training and return to the Corps. It also authorized direct commissions.

6 Jul — Reorganization of CIC provided officers, corporals, and privates in addition to sergeants; totaling 4,974. Of 543 officers, 337 were by transfer from those already detailed and 206 were from OCS. The 1900 corporals were to be agents and the 352 privates to be clerks. For first time, CIC had complete complement assigned to it.

14 Jul — First CIC detachment to European Theater erroneously assigned to Cheltenham, England. Repeated the "snafu on arrival" of the first CIP unit in Europe in 1917, when its members were "mistakenly" arrested by MPs.

17 Jul — Headquarters, ETO, U.S. Army, published Staff Memo No. 8 on the Security of Documents and Information.

20 Jul — Chief, CIC, ordered check made of Army location of former investigators in civilian life.

22 Jul — Army Corps Areas are redesignated as Service Commands under Army Service Forces which was activated 12 March 1942.

25 Jul — MOS 301 "Investigator" defined and furnished to the Army Personnel Classification Division.

29 Jul — Supply Officer, CIC, WDGS, designated accountable officer. Command G2's to designate local responsible officers for CIC equipment.

31 Jul — Transportation Corps activated and CIC agents assigned to it for Port Security duties.

[redacted]

1942

July — Service Commands authorized to issue credentials but not badges, to corporal agents except when assigned overseas.

July — Major Theodore J. Walker designated Commandant of the CIC Investigators Training School.

July — Ordnance Corps took over automotive testing from Quartermaster Corps at Camp Holabird, Maryland. Army's famed "6 x 6" truck christened.

July — First CIC Training School of the Southwest Pacific opened at Melbourne, Australia.

1 Aug — CIC equipment to be furnished detachments direct from the Commanding General, SOS, and requisitions forwarded through OCCIC.

1 Aug — Major Hugh D. Wise designated Chief, CIC, as Lt Colonel Sheen was sent to Europe.

3 Aug — Brigadier General Hayes Kroner, Chief, MIS, stated in a letter to Service Commands that "...the primary function of the Counter Intelligence Corps must be considered as carrying forth appropriate Counter Intelligence Corps missions in Theaters of Operation..." Theaters were told that all CIC personnel except a listed 10% would be transferred as needed.

8 Aug — ETO advised by G2 that it was allocated six officers and 49 enlisted men with four officers and 15 enlisted men to be transferred from SOS, U.S. Forces British Isles. The Middle East Command was allotted the same number.

10 Aug — U.S. Army Forces Central Africa allotted 12 agents with one undercover agent being sent immediately.

17 Aug — Third Service Command, CIC, moved its headquarters to 100 W. 23d St., Baltimore, Maryland, and started its first Agent's Training Class, consisting of 29 enlisted men who graduated 12 September 1942. Robert B. Curtiss, Capt, Cav, Commanding.

18 Aug — CIC forces in Iceland increased to 47 special agents and 56 agents.

0235

[redacted]

1942

24 Aug — G2 informed Army Ground Forces that CIC personnel assigned to divisions are not part of "CS" system but do investigate any reports of possible subversive activity received through the system.

25 Aug — Service Commands ordered to designate not more than 10% of their personnel as "key" personnel; all others subject to transfer.

28 Aug — Military Intelligence Service informed G2, First Service Command, that the War Department planned to transfer to the First Service Command 26 CIC agents as the WD quota was filled and the Corps "...is in danger of losing a number of exceptionally well qualified soldiers unless they can be placed in Service Commands. MIS said these transferees could be substituted for others on the '10% keyman' lists."

28 Aug — Military Intelligence Service informed First Service Command that it had 139 agents tabbed for transfer at any time to tactical organizations.

August — CIC required to use regular Army channels for procurement of its supplies and equipment unless unavailable.

August — American CIC School Center activated at Shrivenham, England, in cooperation with British Intelligence. Also, British provided spaces for CIC agents at their Matlock Field Security School.

1 Sep — Captain Kirby M. Gillette designated as the first Chief, CIC, European Theater of Operations.

3 Sep — G2, Second Service Command, reported that his CIC agents had a backlog of 1,130 interviews waiting to be typed.

7 Sep — Chief, CIC, ordered to suggest the name of a "Major" to command a Special Operation (North Africa). Major C. A. Ellis of New York recommended.

8 Sep — Chief, MIS, turned down the request of the American Intelligence Command to have all 175 CIC agents in the Caribbean area transferred to AIC to attain "...smooth working coordination..."

1942

10 Sep — Caribbean Defense Command asked to advise G2 of the type of cover required and the localities for placement for sending in CIC agents

11 Sep — War Department Circular #308 authorized the transfer of men performing CIC duties to the CIC.

11 Sep — Four Service Commands tapped for 45 CIC agents who were sent to Field Army, A.P. Hill, Va., where Task Force "A" was staging for the North African invasion.

16 Sep — Colonel Townsend Heard, Chief of American Intelligence Command requested 12 CIC agents for use at Miami Beach, Florida, for use in CI work either outside the United States or as a result of CI activity outside the United States.

19 Sep — CIC policy promulgated not to accept "limited service" men unless the man had outstanding qualifications for a job.

21 Sep — CIC special agents reverted back to control of G2, MID, but CIC agents and clerks remain under control of the Service Commands.

21 Sep — Major C. A. Ellis reported to Chief of CIC for three day orientation at Washington en route to Camp A. P. Hill.

26 Sep — Second Lieutenant Heegaard-Jensen reported to the Chief of CIC from Hq, 2nd Armored Division at Fort Bragg, N.C., that his detachment was only authorized 45 caliber pistols but the division had only submachine guns; that no transportation was authorized; that lack of rank gave general impression of lack of importance of the unit; the detachment even had to borrow a typewriter from an officer. He said the unit had no instructions on mailing address or wearing of the insignia and that agents were "...unaccustomed to the rigors of field service..."

26 Sep — London cable signed by Eisenhower stated ETO needed 25 CIC officers and had six; needed 160 agents and had 19.

30 Sep — CIC ordered to have one agent on each of 15 boards of FBI, ONI and CIC to interview passengers arriving in Baltimore on 9 October 1942 on the S.S. Serpa Pinto.

September — Efforts to secure "housekeeping" personnel for administrative routine, and thereby free CIC personnel, were unsuccessful.

2 Oct — Chief, CIG, forwarded request of the American Intelligence Command (see 16 Sep 1942) to Chief of MIS and stated that CIC agents had not been trained and "...for the most part are not qualified to operate in foreign countries." He added further that "scope of their activities in foreign countries was limited by the military jurisdiction."

5 Oct — G2 at New York told Intelligence Conference that on overseas shipments, "...in 99 cases out of 100 the intelligence officers haven't the slightest idea of their jobs and don't even know what a subversive is."

5 Oct — G2, Fourth Service Command, reported to Intelligence Conference that Provost Marshal Generals in his area all outrank Post Intelligence Officers.

5 Oct — In answer to a request from Col D. G. Erskine, assistant executive officer of MIS, the Chief, CIC, stated, "No fixed policy has been established with respect to the numerical relationship of officers and enlisted men in Counter Intelligence Corps detachments."

6 Oct — G2, Second Service Command, told Intelligence Conference that half the time the intelligence officer is working on some other job.

6 Oct — Allotment of CIC enlisted personnel was 2,216 to Service Commands and 2,215 to Ground and Task and Theater forces.

6 Oct — Chief, CIC, told the Intelligence Conference that one of the supply problems was securing standard typewriters.

8 Oct — CIC refused a request to furnish personnel for a censorship unit scheduled for the North African invasion.

10 Oct — Third Service Command asked for eight additional agents for interrogation of passengers and crews of neutral ships (estimated at one every other day) entering Baltimore.

CONFIDENTIAL

1942

10 Oct — Experience for setting up detachments for North African invasion revealed:
a. Assemble detachment prior to reaching division staging area.
b. Have COs set up T/O and T/B/S at once in order to draw equipment because no authority exists.

15 Oct — Allotment of CIC enlisted personnel to Service Command for purposes of procurement and training for subsequent assignment to tactical units withdrawn. 619 CIC agents assigned to an MIS Reserve Pool and subdivided into various Service Commands.

16 Oct — Chief, CIC, advised Alaskan Section of Operations Division, WD, that no Russian speaking CIC agent would be available to fill an urgent need for three weeks.

17 Oct — First CIC agents arrived at Port Moresby, New Guinea. Ship panelling and port security became an important function.

21 Oct — Service Commands obtained operational control through policy that "Office of Origin" controls an investigative case, and authority granted to send and receive "lateral" leads.

26 Oct — G2 informed G1 that allotments of CIC personnel were available to tactical units on basis of: division, 6 men; corps, 13; field army, 50; air forces, 22; and theaters, 55. G2 also stated that apparently many tactical commanders were not cognizant of the fact that their units could request CIC personnel.

27 Oct — G2 stated that it was not believed advisable to select a large number of limited service men for duty with CIC but exceptions could be made in cases of outstanding qualifications.

29 Oct — Service Commands, Bases, and Depots ordered to establish basic CIC training schools. Chicago school to become an advanced school.

30 Oct — Arrangements made for reception centers to furnish Service Commands with data on men who have had investigative or stenographic experience.

October — Agents of 3rd Service Command seized munitions plant near Baltimore. Plant operated by pro-Nazi. FBI credited for this operation.

1942

1 Nov	Second special organization activated at Fort Meade, South Dakota, to which potential subversive military personnel would be assigned.
5 Nov	Arrangements made for agents to use their own cars and be reimbursed, and with CPA, to get gas ration books without disclosure of their identity.
6 Nov	Authority to issue badges and credentials again decentralized to Service Commands.
8 Nov	More than three score CIC agents landed with combat troops at the invasion of North Africa. First combat mission of CIC. CIC agents seized complete Italian Secret Service list of French Intelligence Service and list of French sympathizers working with the Axis.
9 Nov	Basic military training for eight weeks made mandatory for each accepted CIC candidate. Refresher courses urged.
11 Nov	Service Commands ordered by the War Department to organize their own CIC detachments.
11 Nov	Panama CIC Detachments acquired two schooners, one in the Atlantic and one in the Pacific, to make security checks at small ports.
12 Nov	Chief, MIS, urged passage of HR 7580 to confer power of arrest upon certain personnel of the Army (CIC). Opposed by the Attorney General. IG later investigated possible pressure. CIC didn't recommend.
12 Nov	First CIC agents landed in the Middle East and opened Headquarters at Cairo, Egypt.
12 Nov	Provisions of TM 30-225, relating to CIC efficiency reports, rescinded and reports ordered submitted only semi-annually. Special provisions to cover frequent transfers were provided.
12 Nov	MIS, G2, WDGS, informed Service Commands that CIC personnel would be placed on "detached service" from one command to another according to the most urgent need.

1942

12 Nov — Authority for the transfer of corporal agents and privates (clerks) with CIC in Service Commands to tactical units.

12 Nov — G2 stated it was no longer authorized to request changes in departmental allotments, and the only solution for deserving officers stuck by a T/O in a certain grade was reassignment.

13 Nov — CIC personnel alerted as follows: for Brazil, 23; Central Africa, 11; North Africa, 22; Europe, 45; South Pacific, 12; and Southern Defense Command, 12 (colored).

15 Nov — Service Commands again given authority to issue all CIC personnel badges and credentials without clearance from OCCIC.

17 Nov — Seventh Corps, G2, explained to the G2, WDGS that he rated eight CIC agents only "satisfactory" because they were only corporals or sergeants.

17 Nov — Major General G. V. Strong, G2, reported that G2 had only 97 of its 543 officers authorized 6 July and requested the CG, SOS, to furnish 80 officers who could be ordered to CIC duty upon graduation from CIC school since the Service Commands would not release officers they had sent to school.

17 Nov — Service Commands asked to rush completion of investigations of agents and clerks (CIC) who have been transferred to tactical organizations while their investigations were still pending.

20 Nov — Major General M. A. Reckord, CG, Third Service Command, wrote a personnel letter to General G. V. Strong, G2, citing that when he wanted to commission a sergeant and to use limited service men he found G2 had restrictions which he considered contrary to War Department directives.

21 Nov — CIC allotment to Second Service Command increase by 15 to provide personnel to cover New York Port of Embarkation.

22 Nov — Catalogue of equipment and supplies required through 31 December 1943 approved by Commanding General, SOS.

1942

26 Nov — Air Transport Command asked to be exempted from provisions of Para 9d of TM 30-215 which required all CIC in a theater of operations be assigned to the theater Hq stated that flexibility of Central Control was required so personnel could be shifted between Wings.

27 Nov — Plans were announced for CIC Detachments with all tactical units of division size or larger.

28 Nov — G2 informed CG of Third Service Command that because of the quality of CIC agents and their selection by investigation and training at a large consumption of time and expense, their transfers had to be controlled. He further added that it was desired CIC agents go to OCS rather than get direct commissions because services would raid CIC and commissioning from such a small group would create a "morale" problem.

1 Dec — G2, WDGS, directed that each command have an accountable, as well as a responsible, officer for CIC equipment.

2 Dec — G2 conference held at Army War College. Colonel Erskine spoke on availability of CIC complements when requested by commanders.

3 Dec — Officer grades assigned to MIS. Service Commands told to recommend officers for transfer and then assignment (temporary) back to them. Suggested: OIC, CIC, his assistants and CO's of field offices.

17 Dec — Chief, CIC, reported that Service Commands will not, if left without curb, maintain the standards of CIC.

19 Dec — G2, Sixth Service Command, reported that the ban of voluntary enlistments for CIC had deprived the Corps of many experienced men.

21 Dec — Summary of a G2 conference at Army Ground Forces headquarters:

a. CIC units in combat training in ZI should insist that Service Commands make all investigations except those in the unit itself.
b. CIC units should be above board like the FBI at home offices, and for undercover work request assistance of service command.
c. If CIC personnel are not satisfactory they can be returned and a replacement will be furnished.

0242

1942

24 Dec	Fourth Service Command asked authority to spend $100 to $125 a month to provide gym facilities for its officers and men at Daly's Health Club in Atlanta, Ga.
24 Dec	G2, 28th Division CIC, asked whether his detachment is under the division CG or under a separate "Corps" chain of command.
28 Dec	Colonel J. T. Bissell, Chief CIC Group stated that age reductions and abolishment of voluntary enlistments for CIC would be unfavorable to CIC but, he added, the loss would not "justify positive action" by MIS.
29 Dec	Organization plan for six sections authorized for Office of the Chief, CIC. Sections were: Personnel, Liaison, Operations, Training, Supply and Fiscal.
29 Dec	G2 asked the Chief of Staff to have duties of Commanding Generals of SOS installations amended to provide for counterintelligence responsibilities and authorization for CIC to conduct investigations.
31 Dec	Minimum age limit for prospective CIC agents remained at 22 but clerks were authorized down to age 20.
31 Dec	Colonel Percy G. Black, G2, Western Task Force, stated his CI subsection was organized on a territorial basis in French Morocco and needed 46 more officers and agents, a radio gonometric (illegal transmitter spotter), and an adequate T/O to provide promotions, and the latter is "extremely vital."
December	Second CIC Training Course of SWP established at Sydney, Australia, with 19 agent students.
	Survey of Intelligence Situation in the USA reported in MI 725/1, AGO, War Department, stated, "...insufficient facts...and no trained personnel for either strategic or combat intelligence."

1 Jan — Chief, CIC, stated that CIC should be separated from its staff position and established under a special staff officer as an operational division similar to the Signal Corps.

1 Jan — Chain of Command, G2 to CIC: Maj Gen George V. Strong, G2, Brig Gen Hayes A. Kroner, Chief, MIS, and Col John T. Bissell Chief, CIC.

1 Jan — Post Intelligence Officer at Fort Eustis, Va., reported his efforts to locate a qualified negro clerk for CIC duty had been unsuccessful.

1 Jan — Major General Henry Terrell, Jr., commanding the 90th Motorized Division at Camp Barkeley, Texas, requested that a CIC unit be furnished his division. This was first of scores of requests.

4 Jan — The Adjutant General of the 36th Infantry Division asked for instructions on how to account for its CIC detachment which arrived with men listed on Detached Enlisted Men's List (DEML).

4 Jan — South Pacific G2 informed CIG that CIC personnel arriving in the theater had been instilled with the belief that instant promotions and perhaps even a commission is waiting him across the sea.

5 Jan — G2, Caribbean Defense Command, reported War Department was going to furnish OCS graduates for CIC duty in ratio of one officer to each 10 enlisted agents or even higher ratio.

5 Jan — CIC at Trinidad Sector increased from 15 to 43 men because area coverage required FBI type investigations in addition to the normal CIC load.

6 Jan — Major Kirby M. Gillette, CO, CIC Detachment, Hq ETOUSA, wrote CIC Center that battle reports of CIC in North Africa revealed:

a. Linguists are invaluable and conversational language training is essential.
b. Field operations require civilian clothes for CIC agents in many instances.
c. CIC Detachments must orient their organization on the CIC mission.

7 Jan — CIC in Zone of Interior again ordered to keep physically fit by taking proper exercise.

0244

1943

9 Jan — Commanding Officer, CIC Detachment of 75th Division, reported the Division G2 had said he didn't care for CIC and he doesn't think they can be of any use in this country, but they will be of use overseas running the Counter Subversion System.

9 Jan — CIC's 1944 budget estimated at $10,476,910, based on an estimate of 7,500 men.

13 Jan — G2, North Africa, stated that T/O said T/BA be reused as "CIC personnel in a theater are valueless if some means of representation is not provided.

15 Jan — Chief, CIC, asked CO of CIC, Western Defense Command on how to address pay checks to agents in the DEML detachment and whether rank and serial number should be placed on the envelope. Told not to put it on outside envelope.

18 Jan — Master Sergeant John J. Maurer, CIP in charge of MID's investigation of Communist activities and subversive Army personnel, retired because of health had been in charge since 1929.

18 Jan — Lieutenant Colonel H. R. Kebler, acting director of Sixth Service Command wrote Hq Troop Carrier Command to take steps to correct the situation that permitted agents of its CIC detachment to operate in an investigative capacity within the boundaries of the Sixth Service Command.

19 Jan — Military Intelligence Service stated it was not the policy of G2 to indicate to EM that they may expect promotions on arrival at any theater.

20 Jan — Military Intelligence Service established SOP for divisional CIC as follows:

a. Set up as a separate detachment assigned to Hq Co. Service Hq.
b. Operate under the CG of the Division.
c. CO of detachment performs CIC duties assigned by AC of S, G2, of the division.
d. The detachment is an operational organization available to division G2.
e. Personnel should not be changed from DEML to the Arm of Service.
f. T/O is not amended as men are on an allotment of vacancies furnished to the division by the AG.

g. Detachment operates on an integral part of the division both in training and in combat.
h. Personnel of this detachment are openly assigned to CIC duties and not normally for any undercover duties.
i. CO of detachments is responsible to CO of the unit for operations and discipline.

26 Jan — G2, WD, informed 8th Service Command that CIC applicants should not be required to go to G2 office at Dallas at their own expense for an interview. Post Intelligence Officers or CIC agents can make the interviews.

26 Jan — CIC units ordered to request all .38 caliber special ammunition through Chief, CIC, as an economy measure. "Dry shooting" urged.

27 Jan — Arrangements made with Selective Service to provide draft cards for CIC agents to protect their identity.

28 Jan — Office of the Chief, CIC, moved from Washington, D.C., to 2327 North Charles St., Baltimore, Maryland, to avoid loss of officers under 35, who were prohibited from service in Washington, D.C.

January — Third Service Command Intelligence Division initiated a five weeks school for case reviewers to enable field officers to prepare final form reports and ease Hq typing backlog. Training consisted of writing reports of investigation under supervision of Hq personnel.

2 Feb — Chief, CIC, informed CG, ASF, that the five CIC men of a divisional unit was believed to be the minimum for efficient operations.

3 Feb — G2, Eighth Service Command asked that with few exceptions all civilian agents in his area be attached to his office and those with tactical units be assigned to him until overseas shipment was imminent as he could train them and protect their identity.

9 Feb — First two CIC officers -- Second Lieutenants Bernard W. Menke and James E. Southerland assigned to the Manhattan Engineering District at Oak Ridge, Tenn.

11 Feb — Hawaiian Department investigating two men of Japanese antecedents and five Hawaiians for service with CIC in the vicinity of New Caledonia, South Pacific.

0246

[redacted]

1943

11 Feb	Air Priority requested by the Chief of CIC to fly one officer and 18 specially selected agents to the Caribbean Defense Command.
12 Feb	G2's of Service Commands were ordered by Intelligence Division to eliminate all unnecessary CIC investigations.
14 Feb	General Eisenhower's comment on Faid, Tunisia, battle, "...although accurate reports were submitted," Army and AFHQ intelligence divisions "discounted" them. "The G2 error was serious."
15 Feb	Tentative Basic Field Manual for CIC duties with tactical organizations was published and sent to the field for comment.
15 Feb	Chief, USAFIME at Cairo, Egypt, reported ship carrying CIC equipment for five of his groups had been sunk.
17 Feb	Service Commands told to obtain personnel from the Air Corps for training and reassignment to Air Corps for CIC duty.
20 Feb	Chief, CIC advised Fourth Service Command which had over 100 vacancies in the grade of corporal to offset part of this by overstrength in grades of private and Pfc to provide sufficient clerks.
23 Feb	Survey revealed that CIC had 274 of its authorized 543 officers and 3,355 of its 4,431 EM. World-wide request accelerating.
23 Feb	Chief, CIC, presented a staff study asking a reorganization and expansion of the Corps, asking a strength of 1392 officers and 8360 EM; that 800 vacancies be authorized for CIC at OCS; that personnel can be assigned over and above existing T/Os and that CIC control procurement, training, assignment and relief of its personnel.
25 Feb	Chief, CIC, advised G2, AGF, that there was no T/O or T/B/A for CIC but AG was authorized to grant a CIC allotment over and above T/Os.
25 Feb	First Troop Carrier Command had asked for more men and its own CF fund, but Chief, CIC, said use Service Command agents and get CF from local Service Command.

1943

25 Feb	CIC personnel for Army Air Force furnished with three detachments of one officer and six agents assigned to the South Atlantic, African-Middle East, and Caribbean Wings, and plans made to assign teams to India-China, Pacific, North Atlantic, Alaskan and West Coast Wings.
26 Feb	Field survey of investigations of prospective CIC candidates revealed that investigative priorities were not being observed.
26 Feb	Military Intelligence Service told Director of Intelligence, Sixth Service Command, not to send undesirables to tactical units but to transfer them out of the Corps.
February	General Omar Bradley commented on Allied Intelligence in North Africa, "...we had overlooked the need for specialization in such activities as intelligence....misfits frequently found themselves assigned...the Army's long neglect of intelligence training was soon reflected by the ineptness of our initial undertakings."
1 Mar	G2, Southwest Pacific Theater asked that all CIC detachments be assigned to his Hq for reassignment to subordinate units.
4 Mar	CIC Advanced School at Chicago, Illinois, requested $1,000 to establish a photographic laboratory.
4 Mar	G2, WDGS, informed all major commands that officers and MIS, CIC men assigned to duty with CIC in their commands are not chargeable to them but charged to the CIC, MIS, WD allotment.
4 Mar	G2 ordered that Reports of Change of personnel status from outside continental USA be classified Secret and all others confidential.
9 Mar	CIC was informed that the Air Corps needed CIC Detachments assigned to its various bases.
10 Mar	Inspection of the CIC Detachment of the First Service Command revealed a backlog of 2,000 cases waiting to be typed.
11 Mar	Eight CIC agents at New York given special training for an undercover mission with training emphasizing pistol practice.

CONFIDENTIAL

1943

13 Mar — The Secretary of War directed that the practice of Service Commands meeting requests for personnel for assignment to tactical organizations with personnel most easily spared would be discontinued, and that qualified personnel who had completed eight weeks basic training would be furnished. He added that "a notable failure to obtain linguists had been apparent."

18 Mar — CIC Hq interviewed two students attending MIT Center at Camp Ritchie, who stated they did not fully understand the purpose for which they were being given this training and that the Post Intelligence Officer had a somewhat poor opinion of the CIC's EM caused by what he termed a lack of adequate training for duties with tactical units.

20 Mar — Service Commands ordered to end practice of assigning least desirable personnel to tactical units.

20 Mar — G2, Western Defense Command (eight states) recommended that assignment of CIC agents of Second Air Force to Washington, D.C., be revoked and no agents of units except tactical be allowed in the area. He added, if it was necessary to have them, then limit investigative jurisdiction to their own units.

21 Mar — A CIC lieutenant in ETO wrote to his friends at CIC Headquarters to have more security work in New York area and to have the Chicago course rougher with the physical training.

22 Mar — Director of Intelligence, Eighth Service Command, stated it hurt morale when a junior CIC agent was promoted merely because it took less time to complete his background investigation then it did for some other agent senior to him. The problem arose because completion of background investigations varied from six weeks to eight months.

23 Mar — CIC headquarters authorized additional expense money for six CIC agents waiting air transportation at Miami, Florida, en route to the Caribbean Defense Command.

25 Mar — Curriculum for Basic CIC Schools was revised and sent to Service Commands. Training adjusted to coordinate with changes in advanced School at Chicago, Illinois.

1943

26 Mar — Major General G. V. Strong, G2, WD, told the Air Force its CIC investigative field is local within the immediate vicinity of their organization and extends primarily to matters of local interest to that organization. Memo for Record stated, for efficient operation, all CIC activities including funds and reports must be handled through the same channels.

30 Mar — G2, Hq Second Armored Corps, wrote to Col D. G. Erskine, Executive Officer, CI Branch, G2, asking whether Corps Commander has the power to promote, demote or reclassify CIC personnel and what special rules there are for handling.

30 Mar — Colonel D. G. Erskine, asked G2, New York, if a CIC agent could appear before a British Courts Martial provided that it was a secret session, but he was accompanied by an officer. That it would be reported that his identity with CIC not be discussed and that his testimony and any questions be confined to what he heard the accused say without any mention of the agents activities.

31 Mar — CIC Depot activated at Office of the Chief, CIC, at Baltimore, Md.

31 Mar — Two officers and 10 enlisted men selected for Pacific undercover assignment.

Spring 1943 — Third Service Command, Intelligence Division, initiated one week motor course at Camp Holabird, teaching agents how to sabotage motor vehicles, as well as how to detect sabotage, theory of fuel and ignition system of the internal combustion engine. Students also received instruction and were qualified as operators of motorcycles, light and medium tanks, tractors, and trucks, received experience in night driving in convoy blackouts.

1 Apr — CIC Hq advised a prospective CIC officer not to try to attend Provost Marshal CCS because "in all probability he would not be made available to return to CIC."

3 Apr — The AG informed all major commands that the Report of Change required by AR 345-8 did not apply to personnel of CIC - MIS and that CIC - MIS personnel would be reported on Individual Reports of Change.

1943

3 Apr — CIC Section leader told Camp Ritchie instructor there was general confusion in the minds of all the men as to just why they were at Ritchie.

6 Apr — The Secretary of War directed that all CIC personnel be relieved from any non-CIC duties and in the future be assigned only appropriate CIC duties.

6 Apr — Colonel Erskine stated CIC furnished two tactical units are carried over and above T/O of units.

8 Apr — During month-long battle at El Guettar, Tunisia, CIC Detachment duties included directing the psychological warfare activities.

8 Apr — Officer of Dependency Benefits complained to G2, Second Service Command that classification of application by intelligence workers did more to call attention to them than as if they were unclassified.

9 Apr — Headquarters CIC advised G2 that it could use 90 men a month from the graduates of the Army Training Program starting in January 1944.

9 Apr — Colonel L. C. Forney had taken over as Chief, CIC, MIS from Colonel Bissell.

9 Apr — G2, Second Army, at Memphis queried G2, WD, stating "considerable confusion exists regarding current assignments of CIC personnel to tactical units, tentative manual being interpreted as contradictory -- are these detachments assigned attached or organic? Are unit G2s responsible for their training and functions or does G2 exercise supervisory functions only?"

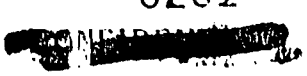
10 Apr — G2, Sixth Service Command, reported comments heard on CIC with tactical units as follows:

a. Men not used on CIC work because division G2's do not know capabilities, training or types of duty 20 men get either routine or combat.

b. CIC men feel they have not been trained for combat intelligence work.

c. Cooperation with CIC poor as other EM of the division regard CIC with distrust and suspicion and officers do not give any weight of authority to CIC duties.

0251



d. Agents are not allowed to use their credentials or investigate a commissioned officer.
e. If no promotions, agents want to go to OCS or some type of service and not considered as outcasts.
f. A CIC officer with a division stated, that if he put some of the CIC manual doctrine into practice both the divisional G2 and the camp CO would see "RED."

10 Apr — Algiers cabled G2 that graduates of the Field Security Course at Camp Ritchie were suggested for transfer to CIC for theater replacements.

12 Apr — Colonel J. K. Cockrell, G2, Panama Canal Department wrote the Chief, CIG, that "it is difficult to keep up the morale and efficiency of the officers when they do not see any future in Intelligence work."

14 Apr — G2, WD, stated, G2, Second Army that CIC detachments are special troops over and above regular T/O's and are attached but G2's are responsible for performance of security and investigative duties within the organization.

15 Apr — CIC requested that 1,080 Army Specialized Training Program (ASTP) students be assigned to the Corps during 1944 at the rate of 90 per month.

15 Apr — CIC Headquarters advised the G2 of the 75th Infantry that a divisional CIC detachment was under the command of the Division Commanding General but under the supervision and control of the division G2; that identity of the CIC personnel need not be concealed; that uniforms and insignia should be worn and that the men were not part of the Counter Subversion System.

16 Apr — Deputy Chief of Staff, WDGS, asked for roster of personnel, Washington Branch Office, CIC.

17 Apr — Chief, CICB, informed CO of the Trinidad Detachment, "you are of course under the command of the AC of S, G2, and therefore, what he says goes. However, it should be possible in a tactful way to bring to him a realization of the proper functions of CIC."

20 Apr — North African Theater of Operations (NATOUSA) CIC Detachment was established consolidating tactical CIC units; CIC became a general staff unit.

1943

21 Apr — South Pacific Provisional CIC Detachment, Island Command #3, at Spiritu Santos acquired a fifty foot fishing vessel for CIC island patrol work. Vessel was manned by two Ensigns and one Warrant Officer (Navy).

22 Apr — CIC suggested directive to all ground force units as follows:

a. Officers and EM of tactical CIC detachments are chargeable to ED overhead with enlisted men on DEML.
b. CO of detachment is advisor on CIC to G2.
c. CO to perform all CIC missions made, supervision of G2.
d. CIC mission is CI coverage over subversive enemy activity namely Treason, Espionage, Sabotage and Subversion (TESS), Disaffection and 380-5.
e. CIC not to perform routine duties or KP, table waiter, guard duty or non-CIC cleared duties.
f. CIC detachment to work as a team and not be separated for other duties.
g. Enlisted men are under CO of detachment and his chain of command and not subject to orders of other officers of the command.
h. CIC detachment will not replace their intelligence units but will be available to CO of the unit for CI enforcement and discipline.
i. The detachment CO or trained expert should afford the maximum of latitude and exercise of judgment in the initiation and conduct of investigations.
j. Since CIC personnel are carried as excess, transfer accomplished only through recommendations to MIS.
k. CO of the detachment originates recommendations for promotion of EM to Chief CIC.
l. When unit in combat or on maneuvers CIC detachment is part of rear echelon where intelligence activity may be expected to endanger security of the organization.
m. Detachment will be given office space where confidential information can be handled without compromise and preferable separate from G2 section.
n. CO of detachment may properly initiate correspondence through channels relating to specific needs or problems of the detachment.

23 Apr — Chief, CIC, informed G2, Fifth Service Command that cover will be desired in the future for certain CIC agents going overseas.

24 Apr — Service Command control of CIC personnel was withdrawn and all CIC personnel were assigned to the War Department and detailed out.

24 Apr — Headquarters, CIC anticipated a need within 60 days for 175 graduates of the air mechanics school, 75 men from the radio operators school and mechanics school, and 50 from other Air Force technical schools.

24 Apr — Army Ground Force replied to CIC suggested directive:

a. The CIC Field Manual should govern the instructions covered but be issued as a directive.
b. Policy matters must go through CO or G2 channels authorized by CO but CIC problems are policies since the detachments are something new.
c. CIC detachments will be diverted from purely investigative duties to do this part of the housekeeping and to be given the training and physical conditioning all men of divisions get.
d. Some commanders may want to keep the detachment together. Some may want to assign individually. They should be part of the G2 section and used as circumstances dictate.

26 Apr — Chief, CIC, completed a survey of utilization of CIC Detachments with tactical divisions and informed Army Ground Forces that G2's did not know how to use their CIC. CIC and AGF held a conference relative to problems arising between G2 and CIC detachments in tactical commands.

26 Apr — Army Exchange Service rejected a request of Chief, CIC, that post exchange and gasoline credit cards be issued to CIC agents showing their connection with MIS or the Army. The Exchange Service stated the AG should issue such a directive.

26 Apr — CIC Headquarters informed VIII Corps that CIC agents with tactical units desiring to attend OCS or other schools should be handled just as other enlisted men of the outfit were.

28 Apr — Chief, CIC, advised the CO of CIC Detachment, 98th Division, that "if undercover personnel are needed they will be transferred in from the CIC Detachment of the next higher echelon. The CIC Detachment will normally in its own unit operate entirely in the open, making investigations, unit and barracks checks, and

performing other duties necessary to accomplishing their mission. It is not contemplated nor is it practicable that the identities of CIC personnel be kept confidential."

26 Apr — Second Army at Memphis issued an SOP to CGs of its Corps and Divisions on use and training of attached personnel and stated, "They (CIC personnel) have been already schooled in one line of work and are now to be schooled in another." Any lack of current knowledge on their part on tactical subjects should not be taken as an index of their ability to learn. In their own field they are selected specialists.

29 Apr — The Intelligence Officer at Curacao, N.W.I. requested that a CIC agent be sent undercover as a clerk with the U.S.O.

29 Apr — The Infantry Replacement Training Center at Camp Roberts, California, reported that the CIC "tabbing" system had resulted in many enlisted men being held at their Center for from six months to a year.

30 Apr — Officers ordered to wear uniforms when reporting to CIC schools but were to bring some civilian clothing.

April — Panama Canal CIC Detachment received 10 new and identical sedans bearing consecutive license plates at a time when no new cars were available locally.

1 May — All CIC enlisted personnel were assigned to War Department overhead.

1 May — General MacArthur cabled MIS, Washington, D. C., that his theater had enough negro personnel.

1 May

3 May — Chief, CIC, stated a plan for furnishing CIC detachments with organic transportation and other equipment was being considered by the War Department.

3 May — Counterintelligence Conference held at CIC Headquarters, Baltimore, Md.

4 May — Headquarters Army Air Forces announced its policy to transfer qualified enlisted men to CIC duty.

5 May — Assistant Secretary of War asked for the CIC policy on having its enlisted men go to OCS.

5 May — CO of CIC detachment of XV Corps wrote Chief, CIC, that the G2 contemplated attaching his CIC to a newly activated division for twelve weeks basic training along with the recruits because G2 feels that their present basic training is insufficient to enable them to carry on with units in combat under adverse conditions.

6 May — Chief, CIC, reported need for a Casual Detachment to provide necessary refresher training for CIC agents assigned overseas.

6 May — Brigadier General Hayes Kroner, Chief of MID, commended CIC Headquarters, Baltimore, Md., for "a very excellent inspection."

1943

8 May — Administrative Section of the Office of the Chief, CIC, was activated at Baltimore, Md.

8 May — CIC Headquarters again explained to an Infantry Division (the 28th) the procedure for promotion of its CIC personnel, school attendance, use of confidential funds, and securing CIC specialized equipment.

8 May — CIC Chief informed XV Corps that tactical CIC detachments should:
a. Do all the CIC investigating within their own units.
b. Insure that the CS system was working since the efficiency of the CIC unit largely depended on it.
c. School and train their men thoroughly as field soldiers as well as investigators.
d. Stick to its CIC mission and not be diverted by other activities.

10 May — Colonel H. R. Kibler became Chief, CIC, replacing Lt Col Wise who became Deputy Chief.

10 May — CIC Headquarters had unfilled requisitions from 62 CIC units in the field for 525 enlisted men and 77 officers.

10 May — CIC Training School activated at Ain el Turk near Oran, North Africa. Nicknamed CIC-by-the-Sea.

12 May — Major General Strong reported that since MIS had no Officer Candidate School for its assigned personnel, highly qualified CIC enlisted personnel could not get on OCS quotas and that not only were there 100 vacancies for CIC officers but the situation was having "a deleterious effect upon morale" and "is not in the best interests of the service."

14 May — Secretary of War ordered arrangements made so that CIC agents would not have to show name, serial number, and military assignment to obtain military privileges at Post Exchange, etc.

14 May — Air Corps requested that 1,026 CIC agents be assigned to it with 680 to be at overseas air bases.

14 May — The CIC Center sent 500 copies of the Personnel Qualification Card to be filled out by each CIC prospect for use by the Investigations and Record Section CICB, CIG, MIS, G2, WDGS.

1943

14 May — Lieutenant Colonel H. G. Sheen reported to CIG on his 60 days in North Africa that:

a. British CI was highly efficient; USA in "very bad shape."
b. Fundamental reason, need competent US officer heading up CI Section.
c. Colonel Parsons did a "bang up job" on port and frontier security; other units "kicked" around.
d. T/O is needed whereby promotions can be made, as it is "causing us some difficulty" and "morale of many deserving officers is dragging."

14 May — Lieutenant Colonel Sheen recommended from North Africa:

a. Greater discretion in selection of G2's -- Low serial number, field grade and Leavenworth G2 course doesn't make a G2.
b. Reduce investigative training of tactical CIC and give more combat intelligence training.
c. Don't sell CIC agents on immediate promotions to get them overseas.
d. Here are at least 85% of CIC overseas personnel linguists.
e. Establish T/B/A since tactical CIC is useless without transportation, communications, and weapons.
f. CIC credentials should be in passport (booklet form) and in prevailing languages.

15 May — Assistant Chief of Staff, G2, established the policy that the Counter Intelligence Corps would have no CIC agents with close foreign background.

15 May — Chief, CIC, told XV Corps to report all its CIC agents taking basic training, and this would be returned to the Service Commands for replacement.

15 May — G2 reported that the Corps now losing men. Many men will transfer. Good prospects will avoid Corps.

15 May — G2 asked for an authorization (CIC) for 318 officers including 19 Colonels, 57 Lt Colonels, 160 Majors, 401 Captains, and 3787 enlisted men including 323 master sergeants. Asked also for officer training -- either have a G2 OCS or grant 2000 OCS vacancies to the Corps.

[redacted]

1943

15 May — Staff study of Joint CIC Board stated four factors determines size of Corps:

a. Total size of Army.
b. Number of Army civilians.
c. Size of Army forces overseas.
d. Extent of geographical areas of jurisdiction.

15 May — Survey revealed increase in ZI cases for previous six months from 8,510 to 11,627, but that Corps would be recruited up to authorized strength within two weeks.

15 May — G2 was reported to Chief of Staff that experience of the past year indicated that to accomplish its assigned mission, changes must be made in the grades allotted to CIC to provide a much higher ratio of commissioned personnel. The CIC "is finding that the accomplishment of its mission is jeopardized because of its enlisted status" and this situation is particularly true in all activities "involving cooperation with Naval Intelligence and the FBI." Yet CIC agents are doing work "on an exact level" of the investigations required of agents of the FBI and ONI, yet the standards of the Corps are higher than OCS.

15 May — G2 in staff study stated that all personnel were officer caliber, two-thirds of CIC men were college graduates, and more than half were attorneys or had similar professional education. That in addition to their three months basic training they were given two months basic and advanced specialized training and a complete background investigation. The inability of this quality personnel to get promotions and commissioned status had resulted in a serious morale question and there was a real danger of collapse of the CIC.

17 May — CIC Headquarters informed CO of 80th Infantry CIC Detachment that there was no T/B/A for CIC transportation, tentage, etc.

18 May — Counter Intelligence Branch officers at Baltimore ordered to take a half day off each week for physical exercise.

20 May — CO, CIC Detachment, 45th Division at Camp Pickett reported that the Division G2 felt CIC should supply its own truck drivers.

21 May — Chief, CICB, CIG, MIS G2, WDGS informed Army Ground Forces that the "shortcomings" of the present CIC "tabbings" were recognized and a new arrangement was under consideration.

1943

21 May — Requirement of attendance of CIC personnel at MIT, Camp Ritchie, was rescinded.

21 May — Conference between G2, ASF, and CCICB developed: G2, ASF felt that:

a. CIC should not be responsible for enforcement of SMI.
b. CIC should not be specialized in combat intelligence.
c. CIC should be with its unit a minimum of 30 days prior to overseas shipment.
d. He could not interfere with units. In spite of changes, CIC officers were not left in charge of detachments, and CIC agents were dispersed.

22 May — Chief, CIC, recommended that the Investigative Section of the Provost Marshal General's office take over loyalty checks and personnel investigations from CIC. This would reduce Service Command work loads by 50 percent.

22 May — In view of refusal to increase size of CIC from 4,797 to 7,593 officers and enlisted men, the Chief, CIC, recommended eliminating misfits and confining use of CIC personnel to CIC duties.

22 May — Chief, CIC, urged increase in grades and ratings for CIC personnel and stated, "...unless morale can be maintained it is doubtful that the Corps at its present strength can satisfactorily accomplish its mission..."

22 May — Chief, CIC, reported to Chicago School that the rumors that CIC agents in the Fifth Service Command got direct commissions was true, but that it was done without prior approval of CCIC and MIS had refused to permit their reassignment to CIC. Rumors had upset morale at the school.

25 May — G2, Southwest Pacific Area stated that the Australian Army had an excellent counterintelligence organization.

25 May — G2, AGF, stated that while CICB of EDGS desired that tactical CIC detachments function and train under command of the senior CIC officer it was realized that this was "not practicable in all cases." Reports prepared by the CIC officer should be signed by or for the G2 of each echelon.

1943

26 May — The Secretary of War wrote the Commanding General of the North African Theater that the transfer of William V. Tyng to an area where his Chinese background and language qualifications would be useful was contemplated in the near future. (In North Africa he had learned French, and he had learned Italian, and married an Italian girl before he was transferred from Italy).

27 May — Colonel L. R. Forney, Chief, CIG, MIS, wrote the Director of Intelligence, First Service Command, "Our greatest difficulty in this matter (sabotage investigations) is that we have to deal with inexperienced and uninformed intelligence personnel at posts, camps, and stations where often there is a rapid turnover of personnel."

28 May — G2, X Corps reported to Chief, CIC, that his CIC personnel had become demoralized because of lack of work, and "because they are required to live with and work in a section with men who do not have their abilities, yet outrank CIC enlisted personnel by two or three grades."

29 May — G2, Second Army stated that the Second Army had 15 CIC detachments and that there was some confusion as to the exact status and purpose of these detachments. They are said to be "assigned" when they are "attached" and the question is: "are they trained for use of the unit or using the unit to train and then go elsewhere?"

29 May — Colonel Forney informed all directors of intelligence of Service Commands, that:

a. The CIC had a strength of 4,300 with 1,200 overseas.
b. That there was no hope of an increase when CIC reached its authorized 4,900.
c. However, there are requisitions for 1900 agents overseas which have not been filled.
d. Service Commands will have to provide them without replacements.
e. G2 has been asked to relieve CIC of responsibility for loyalty checks and personnel investigations and for service and investigations of SMI -- G2 favors this as an emergency measure.

31 May — Captain G. Haig, Field Artillery, accused four CIC officers, including a Lt Col, of perjuring themselves and making false reports. He asked for an investigation.

1943

May — One hundred additional spaces procured at Officer Candidate Schools for training CIC officers.

May — Lack of promotions for agents working in ZI side-by-side with commissioned Navy agents and FBI agents receiving equivalent of officer pay, created morale problem -- "Corps of Indignant Corporals."

Summer 1943 — Third Service Command Intelligence Division initiated one week course at detachment headquarters with familiarization of various small arms and grenades, also instruction in field stripping .45 cal pistol and sub-machine gun while blindfolded.

1 Jun — Puerto Rican Department was changed to the Antilles Department to include a larger area.

2 Jun — Major General G. V. Strong, G2, informed Operating Division G3 that CIC detachments are operational and cannot be intrinsically a component of the Joint Intelligence Collection Agency (JICA) as desired for the CBI Theater.

2 Jun — G2, Western Defense Command, advised all his branches that 15 negro CIC agents were available for undercover assignments. They could be transferred into units but the company commander has to be taken in confidence in order to "divert" certain reports.

4 Jun — G2, Army Command Forces, told G2, Second Army at Memphis, that "the jurisdiction of these (tactical) CIC units has not really been clarified."

4 Jun — Inspection of CIC detachment and VIII Corps at Texas, under Lt Albert R. Brown, revealed intensive liaison had won goodwill for his unit.

4 Jun — The Director of Intelligence, Eighth Service Command at Dallas, Texas, wrote the Chief, CIG, that CIC detachments could not be justified in any economy program for CIC personnel because:

a. "Not sufficient work in such units." Proper CS system could handle work.

[redacted]

b. Much time and effort is spent on work "outside the jurisdiction of CIC particularly since G2's in most cases have no concept of proper use of such detachments."
c. Lack of work and wrong work hurts morale and spirit -- many are getting out of CIC.
d. The present concept from reports is, that CIC should be trained on the basis of use overseas in area or theater.
e. Identity of CIC personnel with tactical units is completely exposed to all other military personnel.

5 Jun — Commanding Officer of the CIC detachment at Accura, Gold Coast, British West Africa, informed overseas CIC agents will not be ordered back to the United States for CIC school. CIC Center recommended the use of school at Oran, North Africa.

7 Jun — Training Section activated in Office of the Chief, CIC, at Baltimore, Maryland.

8 Jun — Commanding Officer of CIC Detachment, 79th Infantry Division told he can promote a CIC agent provided that before he becomes a staff sergeant, the man must be a Special Agent and before he can be a Special Agent the War Department must approve.

8 Jun — CIC Headquarters stated its current policy was to reduce divisional CIC detachment from four to three enlisted men.

10 Jun — Total of 100 CIC Detachments were serving in the field.

10 Jun — Chief, CIC, stated that specific uses of tactical CIC units included:
a. Supervision of the Counter Subversion System.
b. Investigation of personnel of enemy alien background.
c. Surveys to educate on compliance with AR 380-5 rather than to apprehend violators.
d. Security Surveys of and sabotage protection of vital installations supplies, power, communications, motor pools, and Fire fighting equipment.
e. Conduct CIC courses at division intelligence schools.
f. Conduct complaint investigations.

10 Jun — Chief, CIC, stated tactical training given CIC should not be so extensive as to hinder their practical CIC training or to result in failure to accomplish their mission. For combat training the

CONFIDENTIAL

detachment CO should select the appropriate courses from the general training program of the unit to include physical and mental conditioning for performing their specialized tasks in combat.

10 Jun — World-wide survey ordered of CIC equipment and supply needs, based on actual experiences in the field.

11 Jun — CIC Detachment Commander at an African Air Base wrote, "The intelligence officers here have no conception or little knowledge of the CIC function and doctrines...the apparent universal dislike overseas for CIC...We utilize all intelligence agencies fully, and I have been extremely cautious in placing the proper type of agent to do the specific liaison work required to win full confidence and willingness to cooperate by opening their files to us."

15 Jun — Survey showed CIC units had serious lack of transportation. One jeep for every two agents in tactical units recommended.

15 Jun — Authority of Hawaiian Department and Caribbean Defense Command to select CIC Special Agents rescinded since they have selected men not sufficiently investigated nor who appear to be of the same caliber as those in the USA.

16 Jun — Chief of CIC reported that G2, AGF, did not favor attaching CIC units to divisions after formation and only a couple of months prior to overseas departure. G2, AGF, said it was easier to integrate a new unit during divisional formation periods and further there was more CIC work to be done then.

16 Jun — G2, Second Army, asked G2, Fifth Service Command, to tell him "informally and unofficially" the specific use of CIC detachments with tactical units and stated that some confusion existed in the minds of detachment commanders and G2 of units, G2, Fifth Service Command bucked request to Chief of CIC.

17 Jun — Air Transport Command issued air SOP for its Intelligence and Security Officers.

18 Jun — G2, Sixth Service Command, informed his CIC agents that the CIC was now in process of becoming one of the smallest and most select groups in the Army and that the qualifications and performance of all agents would be constantly checked with a view to new elimination of those not excellent to superior.

1943

19 Jun — Brigadier General R. L. Walsh, of the USAF, South Atlantic, protested a plan to have an Espionage Section in a CIC detachment assigned to the Transport Command, "Experience in the past has shown that there are very few agents who on attempting to operate are not discovered in short order by the Brazilian police network." It does not appear logical that when we are at war and have an ally who is helping us that we should spy on that ally.

21 Jun — Monthly roster of CIC personnel ordered from units, in place of old CIP report requirement.

22 Jun — Chief, CIC, recommended to G2, Southwest Pacific that the least capable members of the Corps be "screened out" since the corps was up to strength and that would be the only means of promotion of deserving men.

22 Jun — On this date, the first CIC Combat Detachment in SWPA began to undertake a mission against the enemy, landed with a Sixth Army Task Force on Kiriwina Island. This unit was led by Lt Thomas H. Applegate and six agents. At the same time Lt Thomas H. Major and six agents also landed with Task Force units on nearby Woodlark Island. Landings on both islands (which are located off the northeast coast of British New Guinea) were unopposed and little if any action followed.

23 Jun — Bermuda Base Command reported it required an undercover CIC replacement posing as a safety inspector with Post Engineers.

23 Jun — Commanding Officer of the CIC detachment, 38th Infantry Division, said that, in certain commands, legitimate requests for travel orders for CIC personnel have met with the issuing office's deliberate obstructionisms or the manner of cooperation has been consistent with straight interpretation of regulations or directives.

23 Jun — Director of Intelligence, Seventh Service Command, informed G2, Second Army, that it had heard that two factors had undermined the usefulness of CIC detachments in tactical units. "First, G2's have not known their use and have used detachments for other duties both ZI and overseas where some were used as combat replacements leaving vital CIC work undone. Secondly, CIC agents have lived as civilians in ZI so long it takes time for them to get back into military discipline. Further, they have had drilled into them so long

not to exceed their investigative jurisdiction that they sometimes appear Prima Donnas by hesitating to investigate such activities as the loaded dice in Company B."

24 Jun — G1, WDGS, stated it agreed that CIC should be reorganized and expanded but did not agree with G2 solution. G1 stated, that CIC activities are an essential element of command responsibilities and must operate within channels. CIC of the MID should confine itself to plans, policies, supervision, procurement of men and supplies and training and not retain administrative control.

24 Jun — G1 stated, the ratio of one officer to one enlisted man is excessive and the quota of 2000 OCS vacancies is approximately 10% of our capacity of the schools and subject to prior commitments. Additional officers should be obtained from those already commissioned.

24 Jun — G1, WDGS, recommended that CIC personnel after procurement and training by CIC be turned over to unit agencies and that using agencies requisition agents as they do other personnel.

25 Jun — The 18-man special detachment flown to Caribbean Defense Command in February 1943 returned to ZI disaffected, after the job they were selected for was taken over by another intelligence agency.

25 Jun — Chief of CIC stated, that the Basic Field Manual had been revised to read that CIC detachments were "attached" and not "assigned" to tactical units.

26 Jun — Colonel Forney informed Eighth Service Command that what the War Department had in mind was that, many CIC agents working in the metropolitan areas had come with the Corps direct from basic training and had been out of touch with the Army for many months. The attachment was "to learn how to do CIC work with the Military Establishment," and "to learn something about soldiering."

28 Jun — CIC allotments to theaters cancelled and all CIC personnel assigned to the War Department.

1943

30 Jun — CIC representative at Camp Ritchie was told by assistant adjutant that Col C. Y. Banfill was head of all intelligence training and that the G2, WDGS, had told Colonel Banfill he could move the Chicago CIC School to Ritchie if he saw fit.

30 Jun — CIC and AGF agree that efforts should be made to reduce divisional CIC detachments personnel to one officer and three enlisted men.

30 Jun — G2, 80th Division reported his CIC detachment had difficulty in obtaining necessary equipment for field duty.

30 Jun — Chief, CIC, informed Chief, MIS, that his group believed the Iceland Base Command had many more CIC personnel than needed and that much of this personnel was being used for non-CIC duties such as beach patrols, signal intelligence, PM investigations, etc. Further, that through local procurement, the caliber of men was below standard and much of this personnel should be eliminated. It was stated there were more CIC in Iceland than in remainder of ETO and more than in several other theaters combined.

June — Separate Liaison Office established between CIC and War Department at Washington, D. C., in the Pentagon. Major Lowell J. Bradford in charge.

2 Jul — Army Service Forces allocated $15,000 for language training for CIC agents.

2 Jul — Screening started of all CIC personnel of the Western Defense Command and Fourth Army Area, to eliminate undesirables.

3 Jul — Audit of Machine Unit Records of CIC revealed several deficiencies. It was ordered that both military specialty and main civilian occupation be shown.

4 Jul — Air mechanics training schools for CIC agents were established at Penn State, Middleton Depot and Chanute Field. Later at Ogden, Utah.

5 Jul — CIC Overseas Staging Area activated at Logan Field Air Base, Baltimore, Maryland, with Lt Col Neville K. Adkinson as Control Officer. During seven months existence, it processed 2,419 personnel.

0267

1943

5 Jul — G2, Third Service Command, published a course for tactical G2's to include use of Counter Intelligence Corps.

6 Jul — By seventh endorsement, Chief of CIC reported to G2 that his officers had confidentially discussed with Captain Haig, his complaint regarding four CIC officers (See 31 May 43) and that no further action was contemplated. Colonel Kibler added, however, that his decision was not intended in any way to impede the preference by Captain Haig of charges if he desired.

6 Jul — Deputy Chief of Staff, Air Force Tactical Command, wrote South Atlantic Wing (See 19 June 1943) that a CIC Espionage Section was not to spy on an ally but to investigate suspected espionage at various U.S. bases. If there were indications that persons off the base were involved to turn the information over to the Brazilian Police.

7 Jul — Deficiencies noted in the first group of CIC officers processed through Baltimore Staging area included:

a. Bringing their families and private autos.
b. Enlisted personnel bringing leather luggage.
c. Some personnel not equipped for full field duty.
d. Men should be troop age and physically fit for general service.

9 Jul — All CIC units were informed that efforts to increase size of CIC had been unavailing and the Corps had reached its personnel ceiling. New policy; exacting standards; weed out undesirables.

9 Jul — Manhattan Engineering District reported that it needed 174 CIC officers and 20 enlisted men for its special project.

10 Jul — First of 10 CIC detachments took part in the invasion of Sicily.

11 Jul — First tactical unit (CIC) in the Pacific joined the 1st Cavalry Division at Brisbane, Australia.

13 Jul — Chief, CIC, commended the Director of Intelligence, Eighth Service Command for sending a properly organized CIC detachment to the new CIC staging area.

13 Jul — Chief, CIC, reported to Army Service Forces that CIC was not in a position to use special coins for identification of its agents as suggested by a member of the National Inventors Counsel.

0268

1943

13 Jul — Survey revealed CIC had 69 negro CIC agents including four lieutenants.

15 Jul — "Tabbing" of soldier's classification cards in effect from late 1941 or early 42 for CIC consideration was discontinued as it prevented transfers. Cover letter will accompany all his records.

15 Jul — Chief, CIC, called attention to G2, AGF, that CIC agents were being transferred from their detachments without prior approval of CIC Headquarters and that AGF units should be informed that this was not authorized.

16 Jul — Deputy Chief of Staff of the Army, Brigadier General William Bryden, ordered the IG to investigate the activities of Directors of Intelligence of Service Commands including CIC.

16 Jul — Third Service Command sent out a guide: Manual of Instruction for Tactical S2's.

17 Jul — Eleven CIC agents alone for five hours in a Sicilian town after Germans retreated, ended hysterical riots, restored order, and seized valuable papers at former German Headquarters.

17 Jul — Basic CIC allowances: Chemical, three items; Engineer, five items; Medical, one item; Ordnance, 10 items; Transportation, eight items; Quartermaster, 39 items; Signal Corps, four items; CIC specialized equipment, 92 items. Special List of Equipment and Supplies (SLOES), authorized for CIC units, was issued. Tactical CIC to requisition through Technical Services.

19 Jul — Lieutenant Colonel W. B. Parsons replaced Major Theodore J. Walker as Commandant of the CIC School, Chicago, Illinois.

19 Jul — CIC detachments furnished AG Forces on basis of priority established on basis of training and urgency of need.

19 Jul — Chief, CIB, 5th Air Force recommended:

a. Organic transportation for CIC detachments with minimum of two jeeps to a unit in a forward area.
b. That replacement CIC be selected and trained in the theater of use.

21 Jul — Chief, CIC, explained that CIC detachment furnished to Air Transport Command in Brazil was strictly counterespionage with the undercover CIC mechanics furnishing leads for the open CIC. (See 6 July 1943).

22 Jul — Chief of the Intelligence and Security Division of the Air Transport Command told CIC it was the duty of CIG and MIS to educate Theater G2's and suggested traveling officers should be used to "sell" proper procedures to G2's.

24 Jul — Western Defense Command and Fourth Army inaugurated a four-week orientation tour for new CIC officers.

24 Jul — Thirty-two CIC detachments were to be furnished AGF between 31 July and 11 November 1943 for a total of 31 officers and 111 enlisted men.

25 Jul — Allied Forces Headquarters, North Africa, issued instructions for duties of CIC agents who become Prisoners of War. One important duty was to handle escape and evasion plans.

25 Jul — Service Commands told to maintain physical fitness of CIC personnel.

27 Jul — Third Service Command and MDW both disclaim investigative jurisdiction at Vint Hill Farm Station (Army Security Agency School), Warrenton, Va.

27 Jul — G2, Fourth Service Command, complained an agent who spoke Italian fluently and who was examined and found physically fit for overseas was returned three weeks after he left by the tactical CIC Commander as not being fit nor fluent.

27 Jul — Survey of permanent needs of CIC ordered of all commands.

29 Jul — G2, Second Service Command, recommended ratio of one officer agent to each three enlisted agents to attain ONI and FBI parity.

29 Jul — Investigation revealed that complete strength of CIC was not being reported to the AG, and Chief of CIC worked on plan for getting accurate reports to Machine Records Branch.

1943

30 Jul — Western Defense Command stated it had no CIC Italian linguists, no age in grade second lieutenants, no clerks available to transfer to CIC staging area.

July — CIC Advanced Training School at Chicago, Illinois, expanded to include lessons learned in European combat.

July — CIC agents captured overlays of major enemy mine fields in Sicily.

2 Aug — Commanding Officer, CIC Detachment, Caribbean Defense Command, wrote that they had been embarrassed in dealings with other intelligence agencies including Navy, FBI, British, French and Dutch, which all employed officer agents. He further added that Navy, Dutch, and British agencies in his area held ranks equal or above colonel.

5 Aug — Commanding Officer, CIC Staging Area, reported quality of officers being processed as "medium average."

5 Aug — The CIC was asked to furnish three other negro agents for undercover use at Camp Polk, Louisiana, Third Army manuevers.

5 Aug — Chief, CIB, stated that he did not see the objection of G2, ASF, to publishing instructions to CIC tactical units taken from the 10 June 1943 Military Reports of the United Nations as this document was direct from an active theater and included lessons learned. Colonel Kibler also stated that CIC had a definite coordinated training program for all its personnel except personnel attached to AGF units.

6 Aug — CIC ordered to provide information for removal of potential subversives, including close foreign backgrounds, from sensitive spots.

8 Aug — CIC Overseas Staging Area moved to Camp Holabird, Maryland, where 2,200 CIC personnel were processed up to deactivation, 5 February 1944.

8 Aug — AGF believes it is of value to have CIC units train with divisions and corps but did not feel it a sound procedure for CIC detachments with AGF units to have direct communication with War Department G2. AGF recommended that it establish a central CIC administration

office following command channels and that 93 officers and men be assigned to this AGF unit.

8 Aug — Army Ground Forces requested 93 officers and 478 enlisted men for CIC Detachments assigned to troops in training.

9 Aug — Enlisted men attending the CIC School at Chicago, Illinois, ordered into uniform as officers had been previously.

10 Aug — Survey showed that during July, commercial companies made 100,000 routine investigations for the Provost Marshal General's Office at $3 each.

11 Aug — Army Inspector General ordered to extend his investigation of Service Command Intelligence to include investigative activities of Provost Marshal General.

12 Aug — Lieutenant Colonel Sheen transferred to ETO.

12 Aug — Four CIC agents flown out of Miami, Florida, by commercial aviation to Quarry Heights Canal Zone on undercover mission. Two of these were from the group of 18 men previously recalled from the Zone.

14 Aug — Ordnance Depot activated at Camp Holabird, Maryland.

17 Aug — Survey of CIC operations revealed that more training was needed in the use of investigative equipment.

17 Aug — European Theater of Operations issued SOP for CIC, stating that CIC personnel used for investigative purposes will be quartered and messed away from Troops. CIC on field security will be with troops.

18 Aug — CIC agents undercover at Camp Ritchie compromised by having their mail addressed to them care of the Post Intelligence Officer.

19 Aug — Selective Service requested to furnish Selective Service registration card and a notice of classification to 15 CIC agents selected for an undercover mission.

20 Aug — During 39-day Sicilian Campaign, CIC agents captured 13 radio transmitters and four radar units.

[redacted]

1943

20 Aug — Chief, CIC, informed Chief, CIG, that port security had definite CIC aspects and CIC should have supervisory control and should recommend systems, but bulk of personnel should be furnished by Transportation Corps.

21 Aug — G2's of both IV and XIII Corps felt that field security should be part of the CIC mission, and that CIC should understand AMGOT.

24 Aug — Survey revealed that in 1943, to date, CIC had lost 565 men by transfer; and additional 261 men to special projects outside of T/O requirements. One hundred transfers were to OCS.

24 Aug — Office of Price Administration (OPS) agreement amended so that CIC agents could buy tires and tubes beyond ration limits.

27 Aug — The 18-man CIC detachment sent to the Caribbean Defense Command in March returned to CIC Center for interrogation.

31 Aug — More than 100 espionage agents were captured in North Africa by CIC between 8 November 1942 and August 1943.

31 Aug — Two weeks training ordered at Military Intelligence Training Center, Camp Ritchie, Maryland, for CIC agents going overseas.

31 Aug — Chief, CIC, submitted request for 1,331 CIC officers and 5,432 men based on world-wide survey. Of 6,763 total, 2,317 were for overseas; 1,182 for Air Force, and 3,264 for the Zone of Interior.

31 Aug — Major Edward L. Ray, Chief, CIC, AF Headquarters, wrote G2, ETOUSA, that the new T/B/A for CIC was considered ludicrous; that it was obviously drawn up by someone with no knowledge of the tactical operations of the Corps. Transportation allowed virtually demobilizes CIC who must be highly mobile in teams of two regardless of size of the detachment. Furthermore, very little of the mass of other equipment is needed or desired. It is absolutely no practical merit and if not revised will practically destroy the value of CIC with tactical units.

August — At Oran, North Africa, 135 officers were at CIC Field Training School.

August — Three CIC agents inspecting various airdromes in India to determine where CIC units should be sent.

0273

1943

August — Approximately 10 new agents undergoing training and schooling at the Provisional CIC Detachment, Iceland Base Command at headquarters in Reykjavik.

1 Sep — Seventh Army G2 survey revealed that CIC of II Corps, the Provisional Corps, 1st, 3rd and 45th Infantry Divisions, and Second Armored were rated "indispensable" in the Sicilian campaign.

1 Sep — Accomplishments of CIC in the Sicilian campaign included capturing 50 espionage agents; 30 clandestine radios; discovery of maps of principal mine fields; capture of all Fascist Party records; records of enemy OB in Sicily and the Balkans; records of Centro Contra Spanaggio; code of German radar; several radar sets; and sacks of mail.

2 Sep — Air Force stated that allotments of commissioned officers as Special Agents needed in connection with aircraft investigations. Requested 344 officers and 963 enlisted men.

2 Sep — Air Force asked Chief, MIS, WDGS, for an allotment of 344 officers and 963 enlisted men. Stated that in the best interest of efficient aircraft investigation which requires close association with and interrogation of high ranking officers, allotment of commissioned personnel in the capacity of Special Agents is advisable.

3 Sep — CIC Center told Service Command that letters on CIC prospects attached to service records are no longer classified.

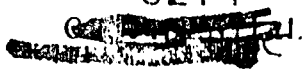
5 Sep — First CIC Course started at MITC, Camp Ritchie, Maryland.

6 Sep — Berlitz School courses for CIC agents established at Baltimore, New York, Chicago, and San Francisco.

6 Sep — AGF Colonel from South Pacific reported that his experience with CIC demonstrated that they worked very effectively in garrison but in a tactical situation their lack of military knowledge and poor physical condition was evident.

6 Sep — General G. V. Strong, G2, on an inspection tour in ETO, cabled MIS that CIC equipment in ETO "...is making CIC an ineffective laughing stock..."

0274



1943

8 Sep — CIC Detachments with tactical units took part in the invasion of Italy.

10 Sep — Field reports indicated that the 2" barrel revolver is best for CIC work. Plans made for conversion of 4" barrels.

10 Sep — Arrangements completed for obtaining photographic supplies through the Signal Corps on a quarterly requisition basis.

14 Sep — Following investigation of ETO CIC equipment, General Strong told Colonel L. R. Forney, Chief, CIG, that "'all is forgiven' if he keeps up the good record of CIC since 3 months ago..."

15 Sep — G1 concurred in publication of TM 30-215 which included field security as a CIC mission (published 22 Sep 43).

16 Sep — G2, War Department, informed Third Service Command at Baltimore, Maryland, that its CIC would be cut from 311 to 65 officers and enlisted men after 1 October 1943.

16 Sep — Colonel L. R. Forney, assistant Executive Officer of MIS, wrote G2's, Service Command that for past nine months efforts to have size of corps increased had been unsuccessful. He stated that now demands from theaters of operations had reached a place where it had become necessary to demand the Service Commands.

16 Sep — Army Air Forces Training Command stated that its CIC detachments should contain at least 50% mechanics and/or technicians.

17 Sep — Plan to implement decision of Chief, MIS, to transfer CIC to the using agencies, forwarded to MIS.

18 Sep — Chief, CIG, MIS, informed the Director of Intelligence, ASF, that the 59 officers and the 728 enlisted men who would remain in Service Commands as CIC personnel would be considered an allotment to ASF.

20 Sep — CIC TM 30-215 published with T/O's and first overseas instructions.

20 Sep — Chief, CICB, stated he did not approve proposal to use CIC personnel as classified mail couriers since CIC personnel were urgently needed for CIC missions.

0275

CONFIDENTIAL

22 Sep — Chief, CICB, stated he did not believe CIC officers could be put in an MIS promotion pool since the CIC officers allotment was fixed by the War Department.

22 Sep — Secretary of War ordered that 165 CIC officers and 1,894 enlisted men in the ZI be transferred overseas prior to 31 January 1944, leaving 59 CIC officers and 728 enlisted men in the United States, which would be considered an ASF allotment. Explained MDW detachment would be left disproportionately large because of its work directly for the War Department.

23 Sep — G2 forwarded request for authorization to have 1,331 officers and 5,432 enlisted men.

23 Sep — Army Service Forces "gladly" accepted suballotment of the ZI non-tactical CIC detachments as proposed by CIG, MIS, G2, WDGS, on 18 September 1943.

23 Sep — In a staff study, General Strong restated his claim that CIC had outgrown its 6 July 1942 authorization because its mission had been expanded to include Field Security. He asked specifically that CIC be authorized 1,513 officers and 5,909 enlisted men.

23 Sep — General Strong, G2, reported to the Chief of Staff that CIC needed an increase of officers because the low rank of its leaders hampered operations since CIC worked in small detachments. Further enlisted men of the Corps have basic officer qualifications much higher than found among the general run of students at officer candidate schools.

23 Sep — General Strong, G2, stated that the retention of highly qualified men in the CIC was essential to its efficiency and that they could be retained by affording them better opportunities for advancement than now exist.

24 Sep — Retention of limited service CIC personnel left to local commanders providing the total did not exceed 15%.

25 Sep — Leavenworth Command and General Staff School added a one-hour orientation course on CIC.

0276

[redacted]

1943

25 Sep — Major General M. A. Reckord, Third Service Command, protested cut in his quota of CIC agents and urged that a minimum of 236 enlisted men and officers be retained and that CS net work be retained. General Reckord stated that his command was prepared to take the maximum "calculated risk" but "to weaken our counter-intelligence coverage beyond that limit would be hazardous and a greater threat to the safety of our people abroad than if we sent them no CIC at all."

28 Sep — Promotions in CIC were frozen as Corps reached the ceiling of its authorized strength.

28 Sep — Second Service Command asked to provide undercover agent who has mental and physical ability to protect himself under adverse and emergency conditions; who will be furnished a fictitious "Section VIII" Dishonorable discharge from the army and introduced into a certain group as a malcontent and dishonorably discharged soldier. The assignment is to last for some months.

28 Sep — The Secretary of War temporarily withdrew authority of all commands except theaters of operation to promote CIC enlisted personnel in order for the War Department to accomplish mass transfers.

28 Sep — Chief, CIC, recommended to AGF that before a CIC detachment was openly assigned to the Second Cavalry Division (colored) that its personnel be given orientation talks on what CIC will do for them and that it guards them not "spies" on them.

30 Sep — Roster revealed that CIC had 4,901 of its authorized 4,974 with 1,720 or 35%, overseas.

30 Sep — CIC roster revealed 480 officers and 4,121 men on duty with 2,721 Service Commands, 898 in Theaters, 288 with Ground Forces, 92 with the Air Force, 153 with Base Commands, 412 at CIC Center School and Staging Area, and 37 on the Manhattan Project.

September — CIC agents provided security for Mrs. Eleanor Roosevelt during her visit to New Zealand.

September — First CIC agent, Major D. E. MacKenzie, arrived at New Delhi, India. (On 11 Nov the first detachment arrived).

1943

September	Colonel Harry F. Meyers, CAC, AGF, observer reported results of a G2 Questionnaire Specific problem of combat intelligence "Immediate clarification of combat counterintelligence or field security responsibilities and functions as distinguished from investigations and undercover mission prescribed for CIC."
1 Oct	Refusals of other tactical officers to recognize the attachment of CIC detachments to a unit led to the recommendation that such orders be issued, since in one case, the AG would not authorize requisitioning equipment, and in another CIC men were not allowed to fire on the range.
1 Oct	Title, Chief of CIC resumed. From 3 March 1943 to 30 September title was Chief of CIC Branch, CIG, MIS.
1-19 Oct	Inspection revealed that OSS had taken over the counterespionage mission in ETO and CIC relegated to field security work with tactical units and routine CE work with static units.
1-19 Oct	Consideration being given to having CIC units with airborne divisions; personnel to be obtained on a volunteer basis.
1-19 Oct	ETO experience led to recommendation of need for public relations training for CIC agents to aid in dealing with civilians.
1-19 Oct	ETO experience indicated that need for rotation of personnel would be reduced if thirty day stateside leaves were authorized periodically.
6 Oct	G1, Operations Division, recommended substantial reductions in strength of CIC recommended by G2 and, in February 43, recommended elimination of field security duties. (G2 stated field security was established as a function "in recognition of a condition already in existance.")
7 Oct	Colonel F. S. Doll, Director of Intelligence, Third Service Command, protested to AG the reduction of his CIC force from 323 to 75 persons -- letter sent in accordance with General Strong's desires.
8 Oct	Quota for the CIC Advanced Training School at Chicago, Illinois, increased to 270 men per class

0278

1943

9 Oct	Major Lowell J. Bradford, CIC Liaison Officer, urged the appointment of a CIC Public Relations Officer.
10 Oct	ETO activated a CIC Training Section in England.
10 Oct	Authority to promote CIC enlisted men was withdrawn from the various Service Commands.
11 Oct	Port Security course authorized in cooperation with the Coast Guard at Baltimore Port; 725 men graduated this course.
12 Oct	G3 recommended added officers for CIC be obtained out of officer surplus. G2 objected because of training it would require, whereas CIC agents could be given commissions and do the work.
13 Oct	CIC informed AGF that its summer survey revealed Service Commands wanted 2,344 CIC personnel of which 1,970 would be enlisted.
14 Oct	Classes at CIC Overseas Staging Area increased from 150 to 600 each.
14 Oct	Operation Section, CIC, advised Western Defense Command that a "Section VIII" discharge would provide better cover than a misconduct reputation which would arouse undue publicity.
15 Oct	Army Ground Forces Adjutant General informed CIC that it was believed that the experience level of some of the CIC detachment commanders was not sufficient to delegate to them complete authority for running their detachments.
15 Oct	Chief, CIG, stated that as a result of the drastic reduction of CIC personnel in Service Commands that investigative priorities would be established.
16 Oct	Request made for authorization of one jeep for each two CIC agents assigned to a tactical unit.
16 Oct	Actual strength of CIC: 4,598 with 476 officers, 1,433 Special Agents, 2,429 agents and 260 clerks.
17 Oct	Chief of CIC stated that CIC prospects could not be obtained from any single source.

0279

1943

17 Oct	Request for increase in CIC strength referred to Chief of Staff.
17 Oct	Field Security Course for CIC agents activated at Fort Belvoir, Virginia; 700 men graduated this course.
19 Oct	G2 forwarded a staff study to the Chief of Staff recommending increasing the Corps by 1,789 spaces from 4,974 to 6,763. Largest increase would be in officers from 543 to 1331. G1 and G3 recommended increases but felt they should be smaller. Both felt that officers should be procured from existing surplus and not by promotion of EM. Both felt field security duties should be eliminated.
20 Oct	Survey made of CIC by Overseas Section of SMI Branch, G2, to determine relationship. The SMI Branch reported that: CIC was essentially an administrative and training organization and does not establish policies on military information nor take any steps to determine the degree of adherence and the extent that more stringent security measures are required.
28 Oct	Inspector General's Department finished 15-week study of Intelligence Activities in Service Commands.
28 Oct	Request of the Caribbean Wing of the Air Transport Command for a unit detachment of one officer and six men refused because of CIC curtailment.
30 Oct	CIC completed arrangements for exchange lecturers with Military Government and Censorship.
30 Oct	CIC Center informed field offices that there has been no indication of a compromise of identity of undercover CIC agents by submission of confidential morning reports.
October	One week training (later changed to three days) was established for CIC agents at the Prisoner of War Branch at Fort Hunt, Va.
October	Survey showed there were 770 civilians working with CIC Detachments.
October	Inspector General report revealed that PMGO investigative personnel totaled approximately 900.
October	Signal Depot was activated at Camp Holabird, Maryland, and Ordnance Corps moved to Aberdeen Proving Ground, Maryland.

0280

[redacted]

1943

5 Nov	CIC personnel prohibited from operating in Washington, D.C., and vicinity by paragraph 2, Memo AG 320.2 PO-M-A, Subject: "Allotment to the Assistant Chief of Staff, G2, WDGS, for CIC Personnel."
6 Nov	Inspector General made his report on "Intelligence Activities in Service Commands" to the Deputy Chief of Staff.
8 Nov	Automotive course for CIC agents organized at the Aberdeen Proving Ground, Maryland.
9 Nov	CIC corporal sent from CIC Center to Western Defense Command on Special undercover mission "D" with a Section VIII discharge and a fictitious draft card classifying him a 1-C.
12 Nov	Chief CIC asked all Theater CIC commanders to inform the Center.
12 Nov	Commanding Officer's of Theater CIC detachments were as follows: North Africa, Maj E. L. Ray, Jr. FA; South Pacific, Maj Art Turner, Inf; Europe, Maj Howard Wilson, Inf; Middle East, Lt Col L. J. Query, Inf; CBI, Maj Donald E. McKenzie, MI; Southwest Pacific, Maj Albert Vreeland, MI.
13 Nov	Copies of Reports of Operation of CIC in North Africa and in Sicily and other extracts of CIC activities forwarded world-wide in Information Bulletins to various CIC detachments.
15 Nov	T/O&E for Allied Forces Headquarters, North Africa, published.
15 Nov	G2, asked MIS what steps could be taken to supply CIC personnel for theaters now that controls were being decentralized and service commands cannot be used as manpower pools.
15 Nov	G2 asked AG to allocate 81% OCS vacancies to various theaters of operation.
16 Nov	CIC Center working on rotation plans for CIC personnel overseas.
19 Nov	Bureau of Public Relations made a study of CIC publicity possibilities for increasing the efficiency of the Corps.

0281

CONFIDENTIAL

1943

22 Nov — AG requested to inform Army Air Forces that activation of CIC tactical units would be in accordance with TM 30-215 of 22 Sep 43 with grade allotments as prescribed in it.

22 Nov — G1 stated that non-combat officer appointments should be made overseas to qualified enlisted men of CIC who "because of importance of their work cannot be relieved for attendance at OCS."

22 Nov — Military Intelligence Service inspection of intelligence activities with five Corps revealed that the morale of CIC detachment commanders as well as agents is not good and the situation is all related to lack of understanding on the part of G2's. Inspecting captain recommended that a uniform training program based on the CIC overseas mission be developed. He concluded that CIC detachment commanders were doing a creditable job under rather severe conditions.

22 Nov — CIC agents assisted in providing security for President Roosevelt at the conference held at Cairo, Egypt, and Teheran.

22 Nov — CIC Agent Robert S. Whraugh "doubled" for President Roosevelt to provide additional security.

25 Nov — Deputy Chief of Staff, Lt Gen Joseph T. McNarney ordered recommendations of Inspector General carried out. This provided merger of Intelligence and Internal Security Divisions in Service and Defense Commands.

25 Nov — TM 30-205, Counter Subversive Instructions, was rescinded. A commanding officer "at his discretion," was given authority to organize and operate an adequate channel of communication for reports of disloyalty, disaffection and sabotage.

25 Nov — Roster showed CIC personnel totaled 4,620, with 492 officers and 4,128 men, of which 1,926 were still in Service Commands; 935 in Theaters; 224 with Air Forces; 150 with Base Commands; 378 with Ground Forces; 967 with CIC Center School and Staging Area; and 40 with Manhattan project.

25 Nov — Military Intelligence Training Center, Camp Ritchie, Maryland, designated as a specialized CIC Center.

CONFIDENTIAL

1943

28 Nov — Commanding Officer, South Pacific Area requested guidance on whether men with tropical diseases should be assigned back to the States or should stay until ordered back by the medics.

29 Nov — Revised list of special equipment and supplies for CIC was issued.

30 Nov — G2 recommendation for CIC increase in personnel returned by C/S to G3 for reconsideration with recommended increases to be on a troop basis.

2 Dec — Major General G. V. Strong recommended terminating CIC specialized training as follows:

- 8 Dec Berlitz School, New York
- 8 Jan Aviation Mechanics, Chanute Field
- 15 Jan CIC Advanced School, Chicago
- 5 Feb
  - a. Aviation Mechanic, Hill Field
  - b. Staging Area at Fort Holabird
  - c. Fort Hunt, E&E training
  - d. Fort Belvoir, Booby Trap & Demolitions
  - e. Port Security, Baltimore Coast Guard

3 Dec — G3, WDGS, reported to the Chief of Staff that work had started on a CIC T/O to be included on a troop basis.

3 Dec — AG Letter, Subject: "CS File SPX 300.7 TM 30-205," published abolishing CS system.

3 Dec — G3 asked G2, WD, to prepare a T/O for CIC on a troop basis using cellular type tables.

3 Dec — By AG Ltr, 300.7 TM 30-205 (2 Dec 43) OB-S-B-M Subject: "CS System," all letters, directive instructions or portions thereof issued by this or any other office pertaining to the operation of the CS System were rescinded. All copies of TM 30-205 to be destroyed by burning and certificates sent in. All station reports personnel records and instructions concerning the CS System will be thoroughly destroyed.

6 Dec — Chief CIC informed Air Force that CIC agents assigned to it would buy two suits of civilian clothing, but would not bring automobiles as men were not allowed to bring them to the staging area.

0283

1943

7 Dec — Air Materiel Command asked for nine CIC agents but it did not need men with mechanical training. CIC Colonel Adkinson stated that might be a good way to dispose of certain men with no particular qualifications.

11 Dec — Pittsburg (Calif) Replacement Depot reported that of 13 CIC EM who arrived, six major deficiencies involving 11 out of the 13 were found, including no furloughs, no pay books, glasses needed, shots lacking, and none had fired a rifle.

12 Dec — Deputy Chief approved request of G2 for CIC agents to be retained in the ZI with Air Force units for investigation of airplane crashes and specific incidents and for security duties in connection with flight safety; also that CIC agents be allowed to train with tactical units in the ZI prior to overseas shipment and also remain assigned to the Manhattan Engineering District.

13 Dec — Commanders authorized to issue blanket orders for all CIC local monthly travel.

13 Dec — Brigadier General L. R. Groves requested that Lt Col John Lansdale, Jr., of G2 be designated CO of the Special Detachment of 176 officers and men for the Manhattan Project. General Groves further recommended plans he made for commissioning qualified CIC agents since there are not enough CIC officers available.

13 Dec — Army Service Forces Letter, Subject, "Abolition of the CS System and Destruction of TM 30-205." Letter required submission of roster of disaffected or subversive personnel under investigation.

14 Dec — War Department Circular #324 officially transferred CIC ZI functions and activities to Army Service Forces effective 1 January 1944, and transferred all personnel out of CIC except those in advanced training or on duty overseas.

14 Dec — Army Service Forces Circular #149 made supervision of all CIC investigative functions and activities the responsibility of the PMG.

14 Dec — Chief, CIC, reported that analysis of above reports indicated that CIC, with few exceptions, was to be used overseas; that G2 would have no command function over CIC.

14 Dec — Chief, CICB, recommended Supply Depot be transferred from OCIC to the MITC at Camp Ritchie.

17 Dec — Major Edward L. Ray, Jr., F.A., Chief of CIC, North Africa, submitted to Chief of CIC the following suggestions relating to CIC in Europe in the post-hostilities period:

a. It is not too early to commence planning, otherwise "CIC will flounder around."
b. With the collapse of Germany, a vast field will open up overnight--that of political intelligence.
c. Comparable agencies such as OSS, AMG, JICA, and others will actively seek the recognition of being the US's chief counterintelligence organization.
d. CIC should get a "charter" defining it as the responsible US CI agency in post war Europe.
e. CIC in the occupation era should be one organization with headquarters with the supreme American or allied headquarters and account only to CG of this command.
f. CIC in its field should be as autonomous as AMG is.
g. CIC should revert to a status of specialized civilians and end the current unsatisfactory basis of operation which prevents promotions and handicaps agents dealing with higher ranks.

18 Dec — CIC Overseas Pool activated at Fort George G. Meade, Maryland, to replace Baltimore CIC Staging Area, which was being activated.

18 Dec — G2 gave G3 its proposed T/O&E and stated it was a modified cellular type since CIC did not break down into surveillance and technical specialists similar to Signal Corps.

20 Dec — Service Forces ordered consolidation of Intelligence and Internal Security Provision at all service commands and posts with all investigations under the supervision of the Provost Marshal General. Service commands were told every effort should be made, therefore, to reduce the number of investigative personnel now employed on loyalty investigations.

20 Dec — Office, Chief, CIC, informed that the CIC detachment at the Headquarters Air Materiel Command, has not been properly organized or administered and is injuring morale and efficiency of the men.

0285

[redacted]

24 Dec — Agreement reached that CIC would furnish special investigative equipment to PMG detachments when merger was made.

25 Dec — CIC agents in Italy arrested sixteen persons in Fascist plot.

28 Dec — AG asked to issue orders transferring 861 enlisted CIC effective 1 Jan 44 from CIC MIS WD to Service Commands.

29 Dec — CIC Middle East operations resulted in discovery and confiscation of $100,000 in gold which was being smuggled out of Egypt by airplane.

29 Dec — G2, WDGS requested that facilities be provided at the MP RTC at Fort Custer, Michigan as of 1 March 1944 for training CIC personnel for overseas shipment.

29 Dec — Chief, CIC, advised CO, CIC, South Pacific Area that conditions beyond the control of CIC made it impossible to effect the return to the US of men recuperating from tropical diseases.

29 Dec — Rumors concerning the future of CIC believed to have resulted in a large number of men receiving unsatisfactory grades at MITC at Camp Ritchie.

31 Dec — Allotments worked out for CIC agents in three departments and seven base commands.

31 Dec — G3 returned CIC T/O&E to G2 and stated that it did not feel the intent of the Deputy Chief of Staff letter had been complied with and reiterated its desire for a cellular type organization.

December — Army Ground Forces issued a training program for all CIC detachments attached to AGF preparatory to overseas shipment.

December — Fifty-man Italian CIC Unit, Sicurezza Informazione Militare (SIMCS), was placed under command of Fifth Army CIC.

December — Report revealed 26 CIC units in operation in the Southwest Pacific area.

December — CIC Detachment of XX Corps, at Camp Campbell, Kentucky, established a training record by marching 25 miles with full field packs and rifles at the rate of 4.06 miles per hour.

1944

1 Jan — CIC personnel were being transferred to four major commands--Army Service Forces, Army Ground Forces, Army Air Forces, and Theaters of Operations.

2 Jan — Headquarters Third Army stated its five man detachment was "inadequate" and asked that eleven more personnel be attached.

3 Jan — Headquarters Army Air Forces Materiel Command was operating nine nation-wide CIC offices with a force of 28 men and had 57 cases on hand. The commanding officer stated that he was in urgent need of more investigative equipment, more CF, and more vehicles. He also asked that CIC Headquarters stop sending mail with military rank shown.

4 Jan — Military Intelligence Training Center, Camp Ritchie, Maryland, was ordered to activate the 964th CIC Detachment as of 15 February 1944.

4 Jan — Chief, CIB, Alaska reported minimum of two years active duty required before rotation is permitted.

5 Jan — Roster revealed CIC had 437 of its authorized 483 officers.

8 Jan — A Second Lieutenant commanding an Air Force base CIC detachment wrote to ask about the "periodicity of submission of morning reports, i.e., daily or weekly." He was told to submit it daily.

8 Jan — One week preliminary CIC training school, stressing local law enforcement, was concluded at Trinidad Base.

9 Jan — First Air-Force-trained CIC arrived in Hawaii.

10 Jan — Service Commands ordered to consolidate CIC and PMG agents into a "Security Intelligence Corps."

11 Jan — Captain Edward P. Barry of CIC was awarded the Legion of Merit for CIC security work at Three-Party conference at Teheran, Iran, 26 Nov to 2 Dec 1943.

11 Jan — North African theater cabled for criminal investigators with a counterintelligence background. WD asked theater to be more explicit.

1944

13 Jan	Chief CIC asked Selective Service for thirteen draft cards (4F) for agents going on undercover work.
15 Jan	All CIC badges and credentials from men transferred to service commands and from all non-CIC personnel were ordered destroyed. All CIC badges and credentials issued will be called in for reissue to service commands.
15 Jan	CIC agent vehicle training concluded at Aberdeen Proving Ground, Maryland. 400 men were trained in 2 1/2 months.
17 Jan	Air Materiel Command told it must follow provisions of TM 30-215 (see 26 Nov 42) pending revision of TM.
18 Jan	G2 revised the T/O&E as requested by G3 to provide a flexible cellular basis with new classifications to be provided for officers, special agents, agents, and clerks.
19 Jan	AG Memo 320.2, 5 Nov 43, was published prohibiting CIC from operating in Military District of Washington.
24 Jan	Specifications for MOS 9302, 301, and 405 were defined as applicable to selection of CIC personnel.
24 Jan	T/O&E 30-500 was published providing for administrative and operational teams or "cells."
26 Jan	Chief, CIC Branch reported that ETO had requested 71 officers and 402 enlisted men and that excess men and spaces given AGF on 1 Jan 44 be returned.
26 Jan	Chief, CIC asked that twelve officers and forty enlisted men be allowed duty in Washington and vicinity.
27 Jan	Staff Sergeant Buster Cole of CIC, Iceland Base Command, was awarded the Soldier's Medal for saving lives when his ship was bombed on 16 June 1943.
1 Feb	Chief CIC estimated that on revised T/O&E CIC would have a total of 4,038 on duty as of 31 Dec 44 with 2,642 overseas.

0288

[redacted]

b Air Force CIC detachment operating in four-state area had no transportation of its own.

b The three Air Mechanics CIC schools were closed; in seven months, 365 Agents had been trained.

b CIC Advanced School, Chicago, Illinois, was closed; was scheduled to but did not reopen as Security and Intelligence School.

b CIC Staging Area at Camp Holabird, Maryland, was deactivated; in six months operations, 2,200 officers and men were processed.

b Major General Clayton Bissell became AC of S, G2, WDGS.

b Office of the Chief, CIC, was abolished.

b CIC Center at Baltimore, Maryland, was deactivated. European Theater had a request pending for 473 more agents at the time.

b CIC troop basis was established by G3 with 1,954 for Europe, 936 for Pacific, 208 for American Theater, and 908 reserve. Total: 4,006.

b CIC Overseas Pool was activated at Fort George G. Meade, Maryland, as an assembly point for CIC personnel.

b Aleutian Branch CIC office established at Adak, Alaska, and later sub-branches of this office were opened.

b Six officers and seven civilians, formerly with CIC Center at Baltimore, Maryland, were ordered to the Pentagon. Major G. L. Staudt became Chief of CIC Branch, CIG, MIS, G2, WDGS.

b Ten CIC officers and 101 enlisted men left Fort George G. Meade, Maryland, for China, Burma and India.

b Captain Marvin C. Goff, Jr., of CIC was awarded the Soldier's Medal for heroic action in the South Pacific on 1 November 1943.

b CIC agents working on sabotage investigations out of USAFSA at Recife, Brazil, undercover as "War Department Inspectors."

[redacted]

1944

29 Feb — CIC agents with 1st Cavalry Division at Los Negros in Admiralty Islands captured many documents of value.

February — CIC Equipment and Supply Depot moved from Baltimore to Camp Ritchie, Maryland.

February — Two German saboteurs were apprehended by CIC agents near Agnone, Italy, and hidden explosives were recovered.

1 Mar — Commanding Officer, AAF CIC units, reported serious jurisdictional problem in New York area where 2nd Service Command restricted its activities.

1 Mar — CIC in combat at Los Negros Island reported "Dig in if you want to live and be prepared in advance to label captured documents."

1 Mar — Ten-month summary of 441st CIC Detachment in Australia showed 10,897 cases handled, of which 67% were personnel.

4 Mar — CIC lessons learned in Italy included the necessity for continuous liaison with all intelligence agencies and the necessity to be an expert in booby traps and mines because frequently CIC agents are the first military personnel to enter an evacuated town.

7 Mar — Survey showed fifty CIC agents fluent in Japanese would be needed during 1944 to provide a minimum of two per division.

8 Mar — CIC agents in the 88th CIC Detachment, north of Naples, captured seventeen well-trained and -equipped Nazi espionage agents.

10 Mar — Commanding Officer, CIC Air Command, reported a lowering of morale because of lack of promotions.

12 Mar — Mediterranean Forces reported Capt John L. Rubsarn, O1284581, 34th Inf Div CIC Detachment, missing in action since 2 February and that previously Sgt Anthony G. Parrard, 36513660, had died of wounds received during attack by enemy planes.

13 Mar — "Delimitations" agreement in terms of jurisdictions of six major army commands.

0290

1944

14 Mar	Official transfer order (AG 322, 6 Mar 44) transferring all CIC personnel assigned to MIS, War Department, to AAF, AGF, SW Pacific, Theaters of Operation, Carribbean Defense Command, Alaskan Department, and Base Commands put into effect. ASF to ship all CIC at Camp Holabird and Fort Meade to theaters.
14 Mar	CIC detachments ordered to organize provisionally under T/O&E 30-500. All communications relating to CIC ordered sent to The Adjutant General.
15 Mar	British and Americans agree on a system for classification and handling matters to be safeguarded. Top Secret, which the United States had regarded as a separate division of Secret, became a separate classification.
15 Mar	Caribbean Command authorized to transfer thirteen CIC agents back to the United States as men were not needed due to the arrival of Air Force CIC.
17 Mar	European Theater was given the authority to make direct non-combat appointments of 2nd lieutenants who had special technical skill (CIC).
18 Mar	CIC detachments authorized to take overseas with them one complete outfit of civilian clothing per agent.
28 Mar	Letter, AG OM-F-201.11, stated that authority had not been given to activate CIC detachments under T/O&E 30-500 but "30-500 (will be) used as a guide in organizing these detachments..."
28 Mar	AG stated no classification placed on morning reports or files of records of CIC personnel maintained by War Department but, "...if so desired classification may be directed by local headquarters for local files of such records maintained..."
30 Mar	Accounting procedures were published regarding overseas confidential funds.
March	Central Pacific, CIC, opened a San Francisco Branch of its Trans-Pacific Travel Control Bureau with an officer from its Honolulu office in charge.

0291

1944

March — Air Force CIC command and training separated from the ASF.

March — One-hundred CIC officers and men were released from Third Army to assist in providing security for Overlord planning.

1 Apr — Commanding Officer, Fourth Air Force CIC Detachment, reported lack of transportation was handicapping his investigations.

1 Apr — CIC training plans provided for 17 weeks basic, tactical, and technical training at PMG RTC Fort Custer, Michigan, and four weeks at Security and Intelligence School, Chicago, Illinois.

7 Apr — Headquarters CIC ASC AAF at Dayton, Ohio, in its March 1944 report stated that difficulties disclosed during the month included use of CIC agents on non-CIC duties and non-jurisdictional investigations at various bases. Also a lack of official transportation and a lack of gas ration books to operate privately owned cars.

14 Apr — CIC procurement procedures with the need based on 94 officer vacancies and 334 enlisted vacancies recommended:

1. General qualifications: ages 24-38, physically fit, loyalty clearance, US citizen and five years US residence. Specific qualifications (officers): college graduate, language fluency and military experience may be required. Specific qualifications (enlisted men): AGCT of 110, high school graduate, completion of CIC training.

2. Forced quota system for three major commands based on proportion of their ZI enlisted men strength.

14 Apr — Deputy Chief of Staff disapproved request by Chief, CIC, to allow any CIC personnel to operate in and around Washington.

20 Apr — Second Lieutenant Oscar Stradinger of CIC was awarded a Bronze Star Medal for Meritorious Service in Combat, 17 March to 8 April 1943 in Tunisia.

22 Apr — CIC base established at Tanah Merah Bay, Hollandia, Dutch New Guinea, as site for transfer of Australian CIC base.

0292

1944

22 Apr — CIC enlisted personnel ordered not to be listed on records as "DEML" but under listings of arm or service, the word "no" would be written.

24 Apr — Commanding Officer, CIC Combat Detachment "C," 1st Cavalry Division, recommended having a boat made available for CIC use.

25 Apr — G2, WDGS, requested reconsideration of prohibition on CIC agents operating in MDW and stated that agents would not be MID men but Air Corps and Manhattan Project. Asked for twelve officers and forty enlisted men.

26 Apr — First two CIC agents qualified as parachutists with 101st Airborne Division.

April — ETO survey showed acute shortage of CIC linguists with an average of less than two per field detachment.

1 May — April report revealed 118 officers and 885 enlisted men in ETO with about 50% with tactical units.

1 May — CIC Branch, CIG, informed that War Department Office of Plans and Operations Division was not interested in the proportion of officers to enlisted men for troop basis.

9 May — Air Force CIC Headquarters reported that the comparatively low rank of CIC officers was handicapping operations because when other personnel found the agents were commanded by a 2nd Lt they knew the Agents were enlisted personnel. "This is having a disastrous effect on their mission."

9 May — I Corps, Hollandia, New Guinea, recommended CIC have an 18-foot inboard motor boat if an operation is amphibious.

9 May — G2 informed the Assistant Deputy Chief of Staff that CIC personnel figures shown at a General Council meeting were highly inaccurate.

10 May — AG 123 OB-S-B-M, "Use of Military Intelligence Funds," was published listing specifically authorized expenditures.

1944

11 May	Brigadier General O. L. Nelson, AC of S, approved CIC request for Air Force and Manhattan Project agents, but number was cut to six officers and twenty men allowed in MDW area.
13 May	Second Lieutenant Bertram R. Russell, 3rd Division CIC Detachment, was awarded a Purple Heart Medal for wounds received 20 Feb 44 at Nettuno, Italy.
15 May	Statistical Branch, WDGS, stated that because of closing of CIC office, latest authenticated roster was 31 Jan 44 and it was used "...rather than having this personnel omitted from the strength of the Army."
17 May	Military District of Washington authorized by Secretary of War to have four CIC officers and 14 CIC enlisted men detailed to the District.
20 May	AG letter 420 was published relative CIC clothing allowance.
23 May	CIC instructed by WD Circular 203 that requests for supplies by overseas units must be forwarded through command channels.
24 May	AG letter 312.3 (22 May 44) OB-S-B-M, "Channels of Communication with the FBI," and AG letter 250.1 (22 May 44) OB-S-M, "CI Investigation Activities," were published. Air Force CIC made responsible for cases in the District of Columbia, Maryland, and Virginia, formerly handled by MDW and Third Service Command.
26 May	War Department policy established so that CIC personnel returned to ZI will be sent to normal reassignment centers and assigned to other units.
27 May	CIC became a section instead of a branch of the MIS, G2.
30 May	Army Air Forces Headquarters report for April stated that the cost of living of CIC agents and officers in many localities was well above reimbursement for quarters and rations. Need for civilian-type government automobiles continued to exist and regulations for their use hampered operations.
30 May	CIC agents in Hollandia, New Guinea, arrested a Dutch school teacher who was working as a spy for the Japanese forces and controlling some 750 natives through six tribal chiefs.

0294

1944

May	Group of ten officers and 101 enlisted agents arrived in Bombay, India.
May	CIC personnel attended British Intelligence School in Karachi, India.
May	General Omar Bradley reported that 200 CIC agents were assigned to safeguard security of the "D-Day" invasion.
May	Two CIC agents in Iceland captured three German espionage agents and by interrogation got full data on German espionage and sabotage schools and codes used.
1 Jun	War Department Circular 216 established procurement and training program for CIC personnel and placed G2, WDGS, in charge of overseas training. This circular was rescinded before ever being acted upon.
5 Jun	Fifty CIC agents entered Rome, Italy, with the advance combat troops and represented half the security force.
6 Jun	Six CIC detachments landed at dawn on "D-Day" in Normandy, first of total of 87 units.
7 Jun	Army Air Forces Headquarters reported that during the month of May its Negro CIC agents were rushed to two air bases where Negro troops had rioted.
7 Jun	Rome CIC agents broke by interrogation members of a "stay-behind" German sabotage ring. Ten men identified, eight were in custody. Twenty hidden explosive dumps found.
7 Jun	Air Force CIC asked for the authority to have on duty in the MDW area one additional officer and eleven enlisted men as investigations had increased from eleven to 1,462 in four months.
11 Jun	G3, Southern Base Section, England, reported twenty-one CIC officers and 250 enlisted men had worked on the security of the European invasion plans.
12 Jun	CIC basic training to be held at PMG Center, Fort Custer, Michigan.

1944

17 Jun — Brigadier General R. A. Osmun, Chief, MIS, WDGS, stated procurement and training of CIC personnel had been held in abeyance, except for emergency requests, since 25 Nov 43.

20 Jun — Policy Chief, G2, requested a substitute for WD Circular 216, published 1 Jun 44.

23 Jun — Assistant Deputy Chief of Staff approved a request of ASF establishing a CIC Center including authorized training personnel as of 1 July 44.

24 Jun — NATOUSA consolidated three CIC detachments and reorganized theater units under provisions of T/O&E 30-500.

26 Jun — Army Air Forces CIC units reorganized under T/O&E 30-500. Squadron Order 57 stated, "...regardless of seniority status, officers of the section will exercise command jurisdiction only over their respective detachment or teams..." Fatigue and administrative details were prohibited.

29 Jun — G2 informed G1, WD, that there was an immediate need for ninety 2nd lieutenants for CIC and 398 vacancies for them in authorized strength. Of these, fifty-one should speak German; sixteen should speak French.

June — CIC agents in the Antilles Department, Caribbean Command, took over loyalty investigations formerly handled by PMG.

2 Jul — Observation of CIC in Italy reported--(1) Functions of CIC and AMGOT had been defined; (2) Sixty agents captured to date.

5 Jul — Urgent requests for CIC personnel overseas resulted in draft on Security Intelligence Corps personnel for the ZI to fill part of 675-officer and 390-enlisted CIC vacancies.

7 Jul — Increase of personnel for MDW given Air Force CIC by Assistant Deputy Chief of Staff who stated, "...need for great prudence in ordering investigations of enlisted personnel...Investigations should be held at a minimum, and those performed should be carried out with great thoroughness."

0296

1944

12 Jul	Reorganization ordered under T/O&E 30-500 of 150 CIC detachments in fourteen world-wide areas.
22 Jul	Largest shipment of its history made from the CIC Depot, with 113 crates sent, including 800 revolvers and 75,000 rounds of ammunition, and 138 cameras, all for ETO CIC detachments.
24 Jul	Security Branch, MIS, was dissolved and Security Branch, G2, was activated.
24 Jul	Air Force CIC units 1-12 redesignated 601-604 and 700-707 CIC Detachments.
25 Jul	The Adjutant General ordered all functions and personnel of CIC Section, Security Branch, MIS, transferred to DI, ASF, leaving only staff action on changes in allotment of CIC personnel to G2, WDGS.
26 Jul	Overseas requests for CIC personnel total 1,042 officers and 3,090 enlisted men, which would give CIC a strength of 7,446 by June 1945.
26 Jul	With the transfer of CIC Service Command personnel, CIC strength was 3,000 overseas, 485 in AGF, and 823 in AAF.
31 Jul	CIC personnel procurement ordered to be handled as required under the general Army overseas replacement system as outlined in WD Circular 317.
31 Jul	CIC Caribbean Defense Command was disbanded and five separate CIC detachments were formed.
July	CIC training school established at Brisbane, Australia, for orientation of CIC agents in the Philippine Islands.
1 Aug	All supervision and administration of CIC transferred from G2 to various using agencies; personnel of CIC Branch transferred to ASF.
2 Aug	CIC training school was activated at Camp Ritchie, Maryland.

0297

1944

8 Aug — Allied Forces, Caserta, Italy, radioed War Department that Negro agents were unsuitable and should not be sent.

10 Aug — Request of Mediterranean Theater that no colored CIC agents be sent into combat divisions and the detachment with the 92nd Infantry Division pulled.

12 Aug — AG 200.2 prescribed the current regulations for issuance of badges and credentials to CIC personnel. ASF designated office of record.

15 Aug — With invasion of Southern France, CIC Pyreness Border Control was established between France and Spain.

15 Aug — At Landerman, France, near Brest, CIC agents of the 6th Armored Division were the only troops present for three days.

15 Aug — WD Circular 333 stated that all CIC matters, both command and administrative, were under the Commanding General, Army Service Forces, Attn: Director of Intelligence.

19 Aug — Director of Intelligence, ASF, was responsible for all investigations except those specifically under the PMG which were supervised by the Deputy Chief of Staff, ASF, for Service Commands.

20 Aug — CIC at HQ USAF South Atlantic at Recife, Pernambuco, Brazil, reported that data on Lucia Montez, Argentine singer who associated only with American Army and Navy officers, had been forwarded.

21 Aug — Revised CIC training program included twelve weeks of language training--the largest single block of instruction.

22 Aug — First group of thirty CIC students reported to Camp Ritchie, Maryland, for eight weeks general intelligence course.

24 Aug — CIC agents entered Paris, France, with advance combat troops.

25 Aug — Major General Archer L. Lerch, PMG, informed the DCS that requests for CIC overseas had increased from 400 in December 1943 to 1100 in July 1944 and to 2300 in August 1944.

1944

29 Aug — Letter, AG 420-OB-S-BM, prescribed "Civilian Clothing for CIC Personnel" to be worn whenever necessary for their duties. Initial allowance authorized at $125 and maintenance at $144 per year.

August — Twelfth Army Group CIC became operational in Europe.

7 Sep — War Department Memo 350-44 prescribed CIC training procedures and designated the MITC, Camp Ritchie, Maryland, for CIC basic training.

7 Sep — Vital importance of an effective travel control system reported by 307th CIC Detachment, Seventh Army, in France.

9 Sep — Agents of the 441st CIC Detachment, searching Japanese caves and bunkers for papers, found use of white phosphorous grenades destroyed papers.

11 Sep — Allied troops crossed boundary into Germany.

15 Sep — First CIC agents crossed the border into Germany near Aachen.

19 Sep — War Department Circular 379 rescinded WD Circular 216 (21 Jun 44) and established a new CIC procurement system to overcome major deficiencies.

21 Sep — Chief, CIC Section, Domestic and CI Branch, Intelligence Division, ASF, ordered sixteen officers just starting at the Security Intelligence School at Chicago reassigned since they were not considered qualified for CIC assignment.

27 Sep — Overseas commands ordered to report any personnel with CIC experience not currently in CIC.

29 Sep — All ZI commands ordered to report to CIC all former CIC officers to assist CIC in filling emergency requisitions for overseas. Seventeen were secured.

29 Sep — Immediate action ordered of Air, Ground, and Service Forces to procure 110 officers and 333 enlisted men for CIC duty with languages as follows: French, 51; German, 33; Filipino, 33; Japanese, 21; Chinese, 12; Malayan, 9; and Dutch, 6.

0299

1944

30 Sep — CIC Monthly Situation Report discontinued and a monthly administrative and a monthly information report required.

30 Sep — Army Service Forces asked theater commanders for their approval of a plan whereby each selected his most qualified personnel and had them trained in the ZI in CIC work.

30 Sep — Fourth Air Force CIC Detachment reported that CI divisions would be eliminated and CIC would perform all types of investigations on bases.

September — CIC obtained information on Fritz Wiedeman, who was in Tiensien, China.

1 Oct — Survey showed that overseas theaters wanted 946 more CIC officers and 1,442 enlisted men, but only thirty-one officers and 133 enlisted men were currently being trained.

4 Oct — Commanding Officer, 100th CIC Detachment, reported that CIC agents should be given four to five months combat training before being sent overseas.

5 Oct — CIC Section, ASF, reported it had made provision for six CIC teams totaling forty-eight officers and 124 enlisted to fill an emergency request from the POA (Pacific Ocean Areas).

9 Oct — Commanding Officer of 603rd CIC Detachment reported no difficulties during the month of September 1944 except "...those normally encountered in connection with the reorganization of a major headquarters on the Three Director System."

9 Oct — Commanding Officer, First Air Force, Mitchell Field, New York, reported that "...the effectiveness of any intelligence or investigative section or agency is curtailed when it is responsible to any echelon other than the commander or head of the organization."

9 Oct — War Department 380-44 issued listing monthly reports required of CIC detachments, both administrative and operational.

10 Oct — Army Service Forces reported to G2 that commissioned and enlisted personnel were urgently needed to be assigned to CIC for overseas duty.

1944

12 Oct — Eighth Service Command reported it had twenty-five former CIC officer and five former CIC enlisted men in its area. Of these, four were considered "top key" personnel and unavailable for assignment.

13 Oct — CIC agents with Sixth Armored Division, Brest, France, in two months apprehended three enemy agents, thirty-three "black list" personnel, interned the security risks, and worked with OSS in obtaining CI information

13 Oct — CIC procurement quotas were assigned to the three major commands on a percentage based on their troop strength as follows: Service Forces, 27.8%; Ground Forces, 38.8%; and Air Forces, 33.4%.

14 Oct — Judge Advocate General reported he had sixty-nine former CIC officers working for him but because of the acute need for JA's they were not available for retransfer to CIC.

20 Oct — Seventy CIC agents landed at Leyte, Philippine Islands, on "A-Day."

20 Oct — SHAEF CIC report stated that agents had discovered thirteen German "sabotage" dumps hidden in sections of evacuated France.

22 Oct — CIC agents in Leyte invasion captured three high officials of the Japanese puppet government.

23 Oct — AG letter authorized reorganization and activation of additional CIC units to meet growing demand in ETO; 806 additional CIC authorized for ETO.

25 Oct — CIC responsibilities in Hawaii increased as martial law, imposed on 7 Dec 41, was terminated.

26 Oct — Commandant MITC, Camp Ritchie, Maryland, asked that immediate air travel and temporary duty be obtained for CIC officers as instructors for the various major commands. General Banfill stated that experience had confirmed the value of enhancing instruction, authenticity, and receptivity of students.

30 Oct — SOP for CIC operation in Germany was issued by V Corps.

0301

1944

31 Oct	CIC School at villa "Palmarosa" at Brisbane, Australia, was closed. Special CIC school was to orient twenty newly assigned WAC personnel.
October	CIC agents in 441st CIC Detachment had given security talks to nearly 100,000 troops in past five months.
3 Nov	Commanding Officer, 437th CIC Detachment on Espiritu Santo Island recommended more training in port security and security measures in newly occupied territory.
4 Nov	General Eisenhower informed War Department that CIC personnel were "...urgently needed in the ETO." ZI basic training believed sufficient as "...best training is actual experience in the field working with CIC teams now in operational units...gives needed assistance to overtaxed CIC personnel presently serving with tactical units."
4 Nov	First CIC training quotas asked under Circular 379--Air Force asked for 209, Ground Forces for 207, Service Forces for 49.
11 Nov	Special List of Equipment for CIC Southwest Pacific issued. Submachine guns abandoned for carbine and bayonet; 3/4 ton truck and two types of boats added.
12 Nov	War Department G2 stated he would like to know current strength of CIC and OCS vacancies available.
13 Nov	CIC TM 30-215 was rescinded and replaced by AG letter 322. G2, WDGS, established CIC policies, but CG, ASF (Director of Intelligence) supervised administration and operation of CIC. Overseas responsibilities and procedures were outlined.
13 Nov	AG stated that CIC weapons firing would be conducted under provisions of AR 775-10.
13 Nov	Secretary of War authorized the initial recruiting of CIC men into the Regular Army.
15 Nov	Deputy Director of Intelligence, ASF, reported to an overseas commander that the Security Intelligence School at Chicago had been moved to Fort Sam Houston, Texas, and was no longer utilized for CIC.

0302

1944

21 Nov — War Department asked all overseas commanders for their views on need for Negro CIC agents.

23 Nov — Major General W. G. Livesay commended the work of the 91st CIC Detachment as the division faced the Gothic Line in Italy.

24 Nov — VII Corps under Lt Gen J. Lawton Collins issued SOP for CIC units operating in occupied Germany. G2, VII Corps in Germany stated: "The role of CIC looms increasingly more significant and with intelligent readjustment its contribution to the occupying forces in Germany can exceed any past achievement.

25 Nov — Forty-four CIC officer students from MITC, Camp Ritchie, concluded a two-day orientation tour of Hampton Roads Port of Embarkation.

29 Nov — CIC Special List of Equipment and Supplies (SLOES) revised on basis of combat reports.

30 Nov — Army Service Forces intelligence chain of command: Director of Intelligence to Domestic and Counter Intelligence Branch to CIC Section.

November — First classes at CIC school established at Hollandia, Dutch New Guinea.

1 Dec — CIC changed from a section to a separate branch of Director of Intelligence, ASF.

1 Dec — Alaskan Department said it had no need for Negro CIC agents.

4 Dec — ETO Com Z informed WD it not only did not want Negro CIC agents but would trade six colored for six white agents.

4 Dec — Chief CIC Branch, ASF, reported that there were sufficient CIC officers in training to fill requirements from the theaters. On 6 December Staudt added, "It is not anticipated a quota for procurement of officers will be assigned AGF in December."

5 Dec — Field experience of the 100th CIC Detachment in France led to recommendation that all Agents be linguists and also given comprehensive area training.

0303

[redacted]

1944

5 Dec — USAF South America reported it had no need for Negro CIC agents.

6 Dec — Lieutenant General S. M. Patch, Seventh Army, commended five "Dragoon" CIC detachments as units advanced on the Rhine at Strasbourg.

7 Dec — ETO detailed several CIC officers to the United States to assist in training CIC replacements.

8 Dec — Headquarters Central Pacific Base Command reported that its two Negro agents were sufficient for its needs.

8 Dec — Twelfth Army Group circulated CIC SOP to all commands as general attack to the Rhine started.

9 Dec — Persian Gulf Command stated it had no need for Negro CIC agents.

9 Dec — CIC Caribbean Defense Command reported it had screened all its theater personnel and investigated CIC prospects. It stated that it had thus built up a reserve and was ready to start a rotation plan. Five agents would be sent back to the USA and replaced by local trainees.

9 Dec — South Pacific Base Area Command reported it did not need any Negro CIC agents and that it felt they were really needed as operational teams with a Negro tactical command.

9 Dec — Army Air Forces Pacific Ocean Areas reported that Negro CIC agents would not be desirable.

9 Dec — Plans made whereby CIC personnel returned from overseas would be exchanged for overseas qualified SIC personnel in Service Commands.

11 Dec — Headquarters Tenth Army stated it did not need Negro CIC agents unless they could read, speak, and write Japanese.

12 Dec — Headquarters MTOUSA reported use of Negro CIC agents not practical in North Africa and Italy particularly because of local race prejudice.

1944

13 Dec	Middle East Command stated it had no need for Negro CIC agents and that in several areas normal sources would not be open to colored agents.
13 Dec	Caribbean Defense Command reported that locally-procured Negro agents were invaluable.
13 Dec	Caribbean Defense Command stated that because of distinctive manners of speech it did not require any American Negro agents; it planned to procure two more locally to supplement the three highly successful Negro agents it now had.
15 Dec	Lieutenant General Mark W. Clark stated: "The CIC has done a great job--outstanding...It has been a great help to the Fifth Army."
16 Dec	American Magazine for January 1945 came out with the first national publicity on CIC, called "G-Men in Khaki."
23 Dec	Eastern Defense Command reported that its Iceland, Newfoundland, and Bermuda Bases had no need for Negro CIC agents. APO 100 (AF) felt that they might be used in the ZI.
23 Dec	Chief, CIC, in European Theater, stressed urgent need for German linguists in ETO.
31 Dec	Survey showed 4,621 ships checked by CIC panels during 1944 in the Far East Command.
31 Dec	Survey revealed that out of 7,800 aircraft accidents reported, 4,572 were of intelligence interest.

1945

1 Jan Director of Intelligence, ASF, stated that it was anticipated that quotas for CIC personnel to the ASF and Service Commands would decline to such an extent that an adjustment of (such) quotas will be impractical.

3 Jan G2, WDGS, recommended direct appointment of twelve EMs of CIC Detachment, Air Transport Command, AAF, because, while they had served much time overseas, their home was officially Washington, D.C., so its members were not eligible for direct appointments, combat or non-combat, as currently authorized.

4 Jan G1 recommended to G2 that G2 recommend non-combat appointments of CIC agents to officers.

4 Jan Chief, CICB, stated there were no special directives concerning CIC personnel who were returned from overseas.

7 Jan Military Intelligence Training Center, Camp Ritchie, Maryland, did not concur on CIC recommendation to include German language training for agents scheduled for ETO.

9 Jan Thirty CIC detachments took part in the invasion of Luzon in the Philippine Islands.

10 Jan Unit training to be given six CIC detachments activated at MITC, Camp Ritchie, Maryland.

12 Jan Special List of Equipment and Supplies was published for CIC units of the XVIII Corps Airborne.

15 Jan China Theater Hq, CIC Detachment authorized in addition to three regular CIC detachments, 411th, 412th and 413th.

16 Jan Lieutenant General Patch awarded the bronze star medal to Sgt W.F. Chamberlain for meritorious service 3 to 13 Oct 44; to 2nd Lt W.W.French for the same period and Major A.L.McDuff for the period August - November 1944.

23 Jan Specification Serial Nos. ordered entered on records of all CIC personnel.

[redacted]

1945

28 Jan — CIC German instruction terminated at University of Pennsylvania.

February — A "Special Agent South West Pacific CIC School" established in Queson City, Philippine Islands, under direction of Brig Gen E. R. Thorpe and Lt Col Galloway.

1 Feb — Caribbean Defense Command, Greenland, Estern, Newfoundland, Pacific Ocean Areas, ETO needed no personnel up to 30 June.

1 Feb — G2 recommended assignment of a CIC detachment to the Chief of Transportation for Port Security; approved for 40 officers and 117 enlisted men.

2 Feb — United States Armed Forces Middle East stated its 22 CIC personnel due for rotation. Iceland needed 6, Alaska 3 and Italy 47.

3 Feb — Director of Intelligence, ASF, approved a four week German course for ETO-bound CIC agents at the University of Pennsylvania at $80 each for instruction, housing, mess and medical service; 91 students sent.

3 Feb — CIC units entered Manila, P.I., with combat troops.

10 Feb — Army Air Forces stated it would not require any ASF CIC personnel in the period 1 Jan to 30 June 1945.

13 Feb — The 703rd CIC Det (AAF) reported that, acting on information from OSS Calcutta, Chinese Intelligence was concentrating on the XX Bomber Command. It had screened all 150 Chinese civilians employed at the base and closed all non-service connected restaurants of the area.

26 Feb — Chief, CIC Branch, ID, ASF, stated Intelligence Division did not have on hand any cases where CIC had investigated treason.

27 Feb — Staff study forwarded on post-war investigation of aircraft accidents. Stated no war-time evidence of organized enemy sabotage; CIC had the only trained and available personnel; CIC had handled approximately 1,250 separate investigations per month; safety cases had

[redacted]

totaled about 90% of AAF CIC work; sabotage was always possible until proven otherwise. Recommended the CIC set up be continued in post-war era.

1 Mar — Military Intelligence Training Center, Camp Ritchie, Maryland, instituted Japanese language course for CIC students.

3 Mar — War Department Memo 600-45 ordered agent credentials discontinued and authorized special agent credential issued to all CIC agents.

15 Mar — CIC was short 992 persons of its authorized 6,223 strength; of its authorized 1,481 officers it had only 923 or a deficit of 558.

15 Mar — CIC in Europe given 47 German speaking agents to be trained in the USA unless urgently needed.

21 Mar — The 91 CIC agents graduated from the German course at University of Pennsylvania and were flown to Germany by air transport.

24 Mar — Colonel Kibler, Executive Officer, ID, ASF, reported Military Intelligence Training Center, Camp Ritchie, Maryland, not complying with WD Memo 350-44 by not separating CIC training and by curtailment of investigative and security training.

27 Mar — Analysis in ETO of the newly arrived 91 agents revealed an inability to make quick judgments; lack of "low level" knowledge of the German way of life; and lack of investigative techniques.

29 Mar — Requisitions revealed 607 CIC officers and enlisted men needed for Pacific, of which 96 were needed for CBI.

29 Mar — Director of Intelligence established quotas for assignment of 50 men for AAF, AGF and ASF for CIC training.

March — CIC Pyrenees Border Control Group shifted from border of Spain to French-Swiss Border.

CONFIDENTIAL

1945

1 Apr	CIC units landed at Okinawa; last advance landing of World War II, three agents were killed.
2 Apr	AG-400 authorized special CIC equipment for the 405th and 416th CIC Detachments.
5 Apr	Army Service Forces outlined the procedure for CIC redeployment training slanted toward Pacific action.
12 Apr	President Franklin D. Roosevelt died at Warm Springs, Georgia.
16 Apr	Army Ground Forces told CIC detachments attached to units redeployed through the United States will revert to CIC control.
26 Apr	Transportation Corps CIC Detachment established with 157 men under a Lt Col.
April	CIC French-Swiss Border Control Group transferred to 6th Army Group, Heidelberg, and subsequently disbanded after VE Day.
April	Central-Pacific CIC established its second USA branch of Trans Pacific Travel Control Bureau at Seattle, Washington.
4 May	Agents of 36th Division in Germany arrested Dr. Hans Frank, notorious Nazi governor of Poland.
7 May	Major General C.H. Danielson, Seventh Service Command, requested that SIC and CIC agents be authorized to administer oaths.
7 May	Germany surrendered and CIC started preparation of its European occupation duties.
9 May	Agents of 103rd CIC Detachment at Innsbruck, Austria, discovered founder of the Austrian SS disguised as a major.
10 May	Survey revealed 1,281 CIC officers and enlisted men had graduated from classes held at MITC, Camp Ritchie, Maryland.
10 May	Army Service Forces-Army Ground Forces agreement reached, that CIC detachments will return to AGF after redeployment training.

[redacted]

1945

10 May — To consolidate CIC units for occupation duty, the 970th CIC Group was activated in Germany.

13 May — Agents of 206th CIC at Durlach, Allgau, Germany, arrested Douglas Chandler, German Radio's "Paul Revere". Chandler, a Chicago born journalist, who had instituted the German Lord Haw Haw broadcasts, was turned over to the FBI.

15 May — First Section of the 430th CIC Detachment arrived in Austria at Innsbruck via the Brenner Pass.

16 May — Survey showed 294 officers and 929 enlisted men trained for using agencies during previous seven months.

18 May — Redeployment staff study submitted stating CIC would need an additional 1,065 men, including a training group of 788 men. Asked that Office, Chief, CIC, and a Class IV Center be re-established.

18 May — Staff study defined four phases of CIC: I, Dec 40 to May 43, procurement and training for ZI; II, May 43 to Feb 44, 3,000 men to tactical units and T/Os; III, Feb 44 to May 45, training for using agencies; IV, redeployment.

19 May — Agents of 80th CIC at Alt Aussee, Germany, arrested British renegade, Norman Ballie Stewart.

21 May — Summary on staff study to G2 stated present setup "not adequate" and additional 60 officers and men will be needed to handle CIC training.

23 May — G2 comment on staff study sent to Chief of Staff, stated increase would make no change in CIC operations ZI and no language instruction would be given until Theater Commanders expressed their opinions on the necessity.

28 May — Army Service Forces sent Army Ground Forces a Pacific Preparation Training Program for CIC units at reassignment centers; included vehicle, weapon, physical and on-the-job training; and continued study of area, language, and investigative techniques.

May — CIC Detachments (461st, 462, 464th, 465th) in Iceland awarded Meritorious Service Unit Award.

May — Ritter von Greim, Hermann Goering's successor as Chief of the Luftwaffe, commits suicide in a Kitzbuhel, Austria, hospital, while a prisoner of 42nd CIC. 42nd CIC disappointed.

1 Jun — Conclusions of commander after four years with CIC in the Caribbean Defense Command included:

a. Strength based on area and installations; not troops.
b. Officers in a higher ratio to enlisted men.
c. Practical experience can surpass college education.
d. Foreign background ban injurious to procurement.
e. Technicians were always in short supply.
f. Typists should be in ratio of one to each four agents.
g. Potential subversives are more easily identified prior to outbreak of hostilities.

2 Jun — Ground Forces recommend that not less than 607 officers and men be procured and trained for CIC duty in the Pacific to take care of redeployment.

2 Jun — AG stated it took an average of 3½ months to complete the top priority investigation and only 15% of civilians going overseas are investigated prior to departure.

4 Jun — Army published procedures for "Discharge of Subversive Civil Service Personnel."

5 Jun — Director of Intelligence, ASF, specified as the controlling officer of all investigations concerning personnel being considered for the CIC.

5 Jun — 405th CIC Detachment, CBI, reported it staged a "Security Week" from 11 to 16 December 1944, at New Delhi, India, and that the week paid dividends.

11 Jun — G2 reported that the CG, SWPAC, had requested more than 1,000 Japanese-speaking personnel.

19 Jun — Intelligence Division, ASF, recommended a revision of T/O&E 30-500 to provide for commissioning of CIC agents as second lieutenants since all the war experiences indicated the necessity for commissioned status. Col.

0311

Frederich O. Sharp, Deputy Director of Intelligence, stated that the subterfuges employed by CIC investigators to accomplish their mission had caused administrative difficulties and embarrassment to the Army. He also stated CIC agent standards were officer standards and that ONI and FBI had officer standards.

23 Jun — Assistant Deputy Chief of Staff told by Intelligence Director, ASF, that the establishment of an administrative supply and training group was not a permanent thing and that it would, "...pass out of the picture, with minor exceptions, when the last increment for the Pacific is processed..."

23 Jun — Deputy Chief of Staff authorized a CIC Center at an installation now operating and outside the Washington, D.C., area. Also authorized training carried on outside of MITC, Camp Ritchie, Maryland.

25 Jun — By WD order Ag 322 (21 Jun 45) OB.I-GNGCT-M, the Commander-in-Chief of US Forces, Pacific, was ordered to disband 54 tactical CIC detachments and reorganize the 441st CIC Detachment with 193 officers and 672 men.

25 Jun — Selective Service asked CIC to review all its requests for certificates and classification cards and return any unneeded documents.

26 Jun — Army Service Forces asked space for CIC at Fort Belvoir, Va., for 1,000 officers and enlisted men, with a ratio of one officer for each three enlisted men.

27 Jun — Major Edwin Bennett was named Chief of the CIC Branch of the Director of Intelligence, ASF.

27 Jun — Army Service Forces personnel asked for allocation of grade on one colonel, five lieutenant colonels, eight majors, twenty-five company grade officers, and thirty-one non-commissioned officers to operate CIC Center.

30 Jun — Survey of CIC requirements revealed that shipment scheduled for the Pacific for July and August would total 87 officers and 319 men with the bulk of this requirement, 73 officers and 268 men, being redeployed from ETO.

1945

30 Jun	Survey showed CIC had 1,423 in its 970th CIC Detachment in Europe plus 16 officers and 40 EM's in eight division CIC detachments.
June	General von Oberg, "The Butcher of Paris," together with secretary (read-mistress) plucked from an Alpine peak at Kitzbuhel, Austria, by 42nd CIC Det. (Court martial trial of Oberg recently featured in Life Magazine).
June	Belma Imredy, former Prime Minister of Nazi-satellitized Hungary, apprehended near Leogang, Austria, by 42nd CIC Det. (Note: In 1946 he was photographed having his legs pulled in Hungary. This is a unique Hungarian method of severing the spine at the neck).
4 Jul	Eight AAF CIC detachments reorganized and personnel to be furnished as fillers for the 702d.
4 Jul	702d CIC Det (AAF) transferred without personnel and equipment to European Theater. Its authorized strength of 76 officers and 199 EMs to be filled by requisition on Commanding General, AAF.
9 Jul	Military Intelligence Training Center, Camp Ritchie, Maryland, completed preparations for a two-week redeployment course for CIC agents.
12 Jul	Army Service Forces Circular #268 authorized the establishment of a CIC Center at Fort George G. Meade, Maryland, as a Class IV activity.
12 Jul	Second CIC quota assissed AAF, AGE, and ASF calling for 52 officers and 357 enlisted men to be furnished for CIC training.
13 Jul	Colonel H. R. Kibler, GSC, resumed the position of Chief, Counter Intelligence Corps.
13 Jul	Emergency requisition of 52 officers for CIC duty was approved.
14 Jul	970th CIC in Germany moved to Frankfurt from Wiesbaden when US Forces European Theater (USFET) was activated.

CONFIDENTIAL

1945

15 Jul — CIC Training Group of 60 officers and men was activated at CIC Center with personnel obtained from existing detachment; personnel to be re-absorbed into future Pacific units.

15 Jul — From the crossing of the Rhine in mid-March, to date, CIC agents had arrested 35,000 of 54,000 on the automatic arrest list.

15 Jul — Army Service Forces CIC detachment under D/I. ASF established to function at Ft. G.G.Meade, Maryland, under command of the Chief CIC.

16 Jul — 441st increased by 18 officers and 56 men as 433rd CIC Detachment is disbanded.

17 Jul — CIC assisted in providing security for President Harry S. Truman at the Potsdam Conference in Germany.

18 Jul — First large shipment of enlisted CIC personnel to new CIC Center, Ft Meade, Maryland, per paragraph 20, SO 171, WD MITC, Camp Ritchie, Maryland, dated 18 Jul 45.

19 Jul — Director of Intelligence estimated that CIC Center could handle the 443 CIC personnel ready for Pacific shipment in October.

20 Jul — Provisions of letter of 8 Jun 1943, prohibiting the assignment of personnel with close foreign backgrounds to the Counter Intelligence Corps, were rescinded.

21 Jul — Director of Intelligence, ASF requested that two staff cars be assigned for use by the CIC Center at Fort Meade.

22 Jul — Allied Forces, Pacific, requested 110 CIC detachments totaling 1,379 officers and men.

28 Jul — Arrangements were completed for transfer of the CIC Depot from MITC, Camp Ritchie, to Fort George G. Meade, Maryland.

28 Jul — Camp Ritchie ordered to start necessary procedures to transfer CIC depot to Fort Meade.

28 Jul — Experience in the Pacific resulted in a request of G2 to have T/O&E 30-500 amended to eliminate requirement for an administrative as well as

an operational team in division detachments.

30 Jul — G2 requested G1 to procure 209 officers and 900 enlisted men between 15 Aug and 1 Sep for CIC training.

30 Jul — Director of Intelligence informed G1 that the increase in the Pacific troop basis called for an increase of 2,582 in CIC requirements of which 1,109 would have to be requisitioned from the three major commands during August and September.

31 Jul — CIC authorized a strength of 5,719 with 1,359 officers and 4,360 enlisted men.

31 Jul — Quartermaster General urged that Para 57 of ASF Cir 265 dated 11 Jul 45 which placed intelligence and counter intelligence of Class IV installations under Service Commands be deleted. Letter to G2 cited the technical services problems.

31 Jul — Chief, Chemical Warfare, requested the technical services retain control of its intelligence and CI activities.

July — CIC tactical missions in India and Burma were completed and personnel were returned to China.

July — Unit of the 430th CIC Detachment reached Vienna, Austria, and established office there.

1 Aug — Special class of eighty Nisei men for CIC duty was organized at MITC, Camp Ritchie, Maryland.

1 Aug — Chief, Signal Officer, asked for clarification of conflicting directives on responsibility.

3 Aug — Enemy Equipment Intelligence Service formed four detachments in CBI with base detachment at Calcutta.

3 Aug — Director of Intelligence, ASF asked that ASF Cir 265, Para 57, be deleted so that intelligence and counter intelligence responsibilities at Class IV installations remain in command channels of the technical services. D/I stated, since technical services took over under Cir 324 on 14 Dec 43, there has not been one instance of confusion, friction, or overlapping.

[redacted]

1945

4 Aug	Investigative equipment ordered included in direct shipment of fourteen, CIC teams from ETO to the Pacific reporting to the 441st at Manila.
7 Aug	Chief, CIC, asked that CIC personnel with the Transportation Corps detachment and at the CIC Center be exempted from overseas service requirements.
8 Aug	Chief, CIC Forces Far East (USAFFE), requested shipment of CIC agents be continued even if Japan surrendered.
9 Aug	Plans made for three day Engineer and three day POW training courses for group of 36 CIC students at Fort Belvoir, Virginia.
9 Aug	Army Air Force Letter published on "Organization, Administration, and Operations of CIC,AAF."
10 Aug	One hundred and ten CIC detachments were activated for training and deployment overseas as requests poured in for agents.
11 Aug	To meet emergency requisitions from the Pacific, CIC Center requested 30 officers and men from AAF CIC.
11 Aug	Colonel Forney, G2, stated that Japanese having dual citizenship were eligible for the Corps if otherwise qualified and suitable.
13 Aug	Approximately 56 personnel for four CIC detachments ordered supplied from Hawaii as CIC Center could not supply the required Japanese-speaking personnel.
14 Aug	Military Intelligence Training Center, Camp Ritchie, Maryland, ordered to convert to post-war training and to make analysis of World War II combat intelligence reports as a basis for future training.
14 Aug	CIC recommended curtailing its training program to eight weeks, fly back personnel from ETO, and procure additional personnel from Air Force and Service Commands.
14 Aug	Pacific reserve eliminated and 608 men and officers ordered from three major commands.

[redacted]

14 Aug — Mediterranean Theater of Operations disbanded twelve CIC units and reorganized the 428th CIC Detachment with 295 men and the 430th CIC Detachment with 62 men.

14 Aug — Maj. Gen. Leslie R. Groves commended CIC for its security work with the Manhattan Project. He stated: "...the manner in which they (CIC) carried out the task will survive to the lasting credit of that organization..."

15 Aug — CICB, G2, stated that the identity and mission of an individual would not be compromised to any appreciable degree by use of the symbol "CIC" and the designation of the word "Military" on transportation requests.

17 Aug — War Department stopped direct shipment of CIC detachments to the Pacific. No replacements available for those whose 74 points bar them for further overseas shipment.

18 Aug — Service Command Security Intelligence Corps was transferred from jurisdiction of PMG, ASF, to Director of Intelligence, ASF.

20 Aug — CIC Pacific radioed War Department that because of the occupation of Japan, CIC personnel were urgently needed.

20 Aug — Colonel E. W. Grutin, Chief, Special Investigative Sub-Section at Hq (USFET), office of AC of S, G2, wrote to D/I, ASF, that two of his officers had interrogated six prominent German generals including Heinz Guderian, tank expert, and Dr. Scheidt, Hitler"s private historian.

22 Aug — Major General Daniel Noce, Director, P&O, ASF, designated the CIC Center as an agency to issue movement orders for overseas detachments.

22 Aug — CIC Center informed that upon deactivation of a detachment, personnel become casuals and must be given a six months ZI assignment prior to further overseas duty.

23 Aug — CIC Center's request for authority to issue duty orders was disapproved. Post Commanders issued orders for installations and were responsible for all common administrative and service functions.

0317

23 Aug — Emergency requisitions were approved for 114 additional officers for CIC duty.

23 Aug — War Department OPD informed CIC Pacific that since the Jap's surrender, requirements for CIC personnel have increased and recruiting should be continued.

23 Aug — The Chief of Staff directed that fourteen CIC detachments returning from Europe be given ten days at home and then assembled at a West Coast POE.

26 Aug — CIC personnel logistically attached to elements of the 43rd Division landed in Yokohama and formed the 35th (?) Area CIC Detachment with Headquarters in Matsumoto, Nagano.

28 Aug — Twenty-three men studying Chinese at Yale made available for CIC consideration.

28 Aug — Strength of the 441st CIC increased to 241 officers and 795 EMs as 963d, 964th, and 965th Detachments are inactivated.

31 Aug — Occupation SOP for CIC administration in Italy was issued to the 428th CIC Detachment at Caserta, Italy.

1 Sep — Redeployment training at CIC Center included one hour orientation on Korea "...in case CIC should be sent there..."

2 Sep — 80th Metropolitan CIC Unit landed at Yokohama, Japan

2 Sep — Japanese surrendered and 441st CIC Detachment at Manila, P.I., prepared to move to Tokyo, Japan.

INTELLIGENCE AXIOM

"...Future attack upon the United States may well be without warning except what may be obtained from an active national intelligence agency..."

--General H.H. Arnold

[redacted]

POST WAR ERA

3 Sep Japanese occupation of Korea, since 1904, was ended and 971st CIC Detachment was established in Korea.

3 Sep CIC needs listed at 390 officers and 1,383 EMs.

4 Sep Air transportation to Tokyo for four CIC Russian linguists requested by 441st.

6 Sep Assistant Chief of Staff, G2, Caribbean Command, added his conclusions after 2½ years of working with CIC, that Corps should be on a permanent basis and for its officers:

a. Mastery of the English language required.
b. Two years of college not enough.
c. Training as "line" officers needed.
d. Leadership qualities vital.
e. Real language fluency necessary.
f. Investigative experience required.
g. Must know Army Administration and Finance.
h. Must have ability to instruct.

6 Sep CICB - G2 estimated that by 1 Jul 46, it could operate with three military and three civilian employees compared to current five each, a forty percent cut.

6 Sep Chief, CIC, stated that losses of personnel had resulted in a shortage of 1,000 CIC personnel requested for the Pacific. WD OPS Division inferred that standards cannot be waived nor training reduced below 13 weeks if effective personnel is desired. A new source needed.

7 Sep Director of Intelligence, ASF, had to write a letter to CG, Third Service Command, to get two trucks for the CIC Center.

7 Sep CIC detachments for redeployed units remaining in the ZI reduced to two officers and five men as point and age separation procedures deplete units.

8 Sep Chief, CIC, reported to D/I, ASF, that 33 out of the 65 officers operating the CIC Center were eligible for release under the point system.

10 Sep Firm requests received from the Pacific for 2,000 additional and replacement CIC agents. ASF, G2, estimated that in view of occupation requests, CIC procurement, and training would continue indefinitely.

10 Sep War Department, G1, told CIC it would be almost impossible to place CIC personnel on the Scarce Category list.

11 Sep Seventeen CIC detachments from ETO enroute to CIC Center.

11 Sep CIC agents of 441st CIC Detachment, Tokyo, Japan, arrested Hideki Tojo, Japanese War Minister.

12 Sep Immediate procurement asked of G1 for 657 officers and 1,844 EM for delivery to CIC Center 10 October, to meet emergency requisitions.

12 Sep Director of Intelligence, ASF, advised AF, Pacific, that all CIC training was now conducted at Meade and not MITC.

13 Sep Emergency procurement for CIC was authorized with age lowered to 22 and physical qualifications lowered. Theaters asked that CIC training be shortened or eliminated to hasten replacements.

13 Sep CIC reported that AGF had furnished only 121 EMs out of a previous quota of 608.

13 Sep Emergency requisitions for CIC personnel from theaters, for fourth quarter 1945 and for 1946, total 651 officers and 1,721 EM, of which 1,809 were for Europe.

15 Sep 80th Metropolitan CIC Unit moved to Tokyo, Japan.

17 Sep China Theater CIC Detachment forwarded copies of 215 CIC reports in compliance with WD Memo 850-45 subject "Disposition of Overseas CIC Investigative Reports dated 4 May 1945."

17 Sep CIC emergency procurement quotas assigned to major commands were 657 officers and 1,844 EM to report to CIC Center 10 October 1945.

19 Sep War Department authorized increases and replacements for CIC of 2,501 officers and EM as of 10 October 1945.

1945

24 Sep Emergency procurement orders for CIC personnel reached 5,000 and ASF, G1, asked to authorize an additional 606 men for CIC administration and housekeeping duties.

24 Sep Director of Intelligence, ASF, estimated that the CIC Center would have a population of 5,000 by 10 Oct. Asked increase of 156 officers and 571 EM's to operate the Center.

24 Sep ASF told to stop sending officers and men to CIC Center who do not meet the qualifications.

24 Sep AGF again requested not to send unqualified personnel to CIC Center in meeting its quota of 225 officers and 800 EM's.

25 Sep Commanding General, USAF, on TO radioed relative to CIC that "acute shortage exists in this theater. Have requested for USFET CIC personnel."

27 Sep Philippines informed WD that it wanted investigators to suppress black market activities in Philippine bases and that these investigators did not have to have CIC training.

28 Sep Russian typewriter (Remington) furnished on loan to CIC Center for training.

30 Sep CIC Center at Fort George G. Meade, Maryland, ordered transferred to Camp Holabird, Maryland.

September The town of Karuizawa, Gumma Prefecture, Japan, was raided in concentrated effort by approximately fifty CIC personnel, which resulted in the apprehension of numerous German Fifth Columnists and former SS troopers.

1 Oct Strategic Intelligence School opened at Washington, D.C., with a four week lecture course.

1 Oct Intelligence Director asked Distribution Division to authorize CIC to draw SHEETS for its 5,000 personnel when it moved from Meade to Holabird.

2 Oct Army Service Forces, Director of Personnel, approved the CIC request for an additional 606 personnel for CIC Center operation.

2 Oct CIC Center reported it had a total of 14 men available out of 58 requested by Mediterranean Theater.

[redacted]

1945

3 Oct The 432d CIC Detachment in Brazil ordered inactivated.

3 Oct Transfer of CIC Center from Fort Meade to Holabird Signal Depot between 1 and 15 Oct 1945, ordered by AG Ltr Order 37015 (28 Sep 45)

3 Oct Casual CIC shipment to Tokyo made of 96 Nisei EM and 29 White officers.

3 Oct Over 50 percent of CIC personnel previously procurred was no longer eligible for shipment. No trained personnel in Service Commands or redeployed units; critically short of officers; age requirement lowered to 22 years.

10 Oct CIC Center established at Camp Holabird; 130 CIC Units made the move.

10 Oct G2 refused to agree to destruction of loyalty clearance and accompanying identification photos of cyptographic personnel now filed. Stated that they should be preserved as are other service records, reports of investigation, and similar personnel records

10 Oct Final eight week CIC training class held at MITC, Camp Ritchie.

10 Oct Director of Intelligence, ASF, again asked that Chief, CIC, be authorized to issue temporary duty orders.

11 Oct CIC not authorized to issue orders; Commanding Officer, Camp Holabird (Signal Depot), as Post Commander, authorized to issue orders.

12 Oct Emergency procurement of an additional 105 officers for CIC duty was approved.

15 Oct CIC basis training classes transferred from Camp Ritchie, Maryland, to Camp Holabird, Maryland.

16 Oct CIC Tactical units in Japan placed under the operational control of the 441st CIC Detachment.

16 Oct Intelligence Agency (including TO CIC Det), Intelligence & Security Division, OCT, awarded Meritorious Service Unit Award

[redacted]

18 Oct Report of arrival of trainees at CIC Center revealed that OSS had furnished 28 officers and 151 EM.

19 Oct All major commands asked to submit their recommendations for revision of T/O&E 30-500 by 1 December 1945.

19 Oct Major Commands authorized to make direct appointments to 2nd Lt with qualified EM's to fill 2nd Lt vacancies in CIC and to appoint warrant officers provided EM recommended by CO of CIC detachment. Men must have been experienced.

20 Oct Warrant Officers authorized for CIC by change in T/O&E 30-500.

22 Oct CICB informed AGF that need for CIC officers was "immediate and urgent."

1 Nov Office of Naval Intelligence was given jurisdiction over all matters requiring investigation in the Naval establishment.

2 Nov Allied Forces Pacific stated it would need 300 officers and 1,200 enlisted men on a continuing basis and that it was currently short 240 CIC officers and men.

2 Nov 441st at Tokyo radioed that lowering of draft age and ASF (Intell) scores would create difficulties in securing investigators. Recommended steps be taken to secure civilian investigators.

6 Nov Director of Intelligence, G2, informed G1 to either fill the 460 officers procurement deficit of AAF and ASF or advise theaters their requisitions will not be filled.

6 Nov Second Service Command furnished five surplus CIC automobiles to CIC Center.

6 Nov Of assigned quotas of 928 CIC officers, only 360 had been secured, and Director of Intelligence, ASF, stated that Service Commands must either fill quotas quickly or ASF must advise AFPAC, ETO, and MO that their request could not be met.

7 Nov G1 told CICB, G2, that it would investigate possible sources of additional officers but was not hopeful of procuring any.

0324

[redacted]

1945

8 Nov — Surplus, trained CIC personnel at CIC Center not qualified for overseas ordered assigned to Service Commands on a promoted basis without regard to formal requisition.

10 Nov — ETO Intelligence School opened at Brieux, France, and later moved to Oberammergau, Germany.

14 Nov — 441st, 428th, and 970th CIC Detachments informed that CIC Center will not be able to secure desired number of officers stateside.

15 Nov — 400th CIC Detachment with Headquarters at Cairo, Egypt, was deactivated.

15 Nov — War Department Personnel Board rejected recommendation of promotion to major of a CIC captain at the CIC Center stating "responsibilities have not greatly increased since the termination of hostilities nor is the rank necessary for adequate performance of duty."

16 Nov — Third Service Command ordered to make confidential funds available in units of $500 or less to the CIC Center; Center designated an officer to handle funds.

24 Nov — General H.H. Arnold's report published in Army-Navy journal on 24 Nov 45 indicated that past concept of intelligence needs was insufficient to cover requirements of modern war; that detailed and moment-to-moment knowledge of all aspects of military and civilian activity within the territory of potential enemies is essential to sound planning in peace or war time; that a great need for a permanent national organization which not only deals with broad questions of policy but also collects, evaluates, and disseminates a continuous stream of intelligence data.

November — CIC training school moved from the Philippine Islands and was resumed by the 441st CIC Detachment, Tokyo, Japan.

1 Dec — Combat Intelligence School was activated at Fort Riley, Kansas and replaced MITC at Camp Ritchie.

1 Dec — G2, US Forces European Command, took over operational control of all former tactical CIC teams through 970th CIC Detachment.

[redacted]

4 Dec 405th CIC Detachment, New Delhi, India, closed its branch office at Bagalore, Five other branches remained open.

4 Dec Pacific stated it required 300 officers and 1,200 EM's for 1946, so plans for additional detachments were cancelled. Further efforts to have CIC personnel placed on the critical list abandoned.

4 Dec Investigations of prospective CIC personnel being reviewed so that those no longer eligible for overseas training are discontinued.

10 Dec ETO radioed for an additional 400 CIC officers and 1,200 EM's.

10 Dec Chief, CICB, recommended that former CIC agents be allowed to enlist in the regular Army directly into CIC if approved by appropriate Director of Intelligence.

10 Dec CIC reported start of separation of Intelligence and Security by General Order #162 for 1st Service Command.

10 Dec AG published orders to inactivate the 701st, 704th, 705th, 706th and 707th CIC Detachments (AAF).

11 Dec Information received that CIC personnel reenlisting are being given other than CIC assignments. The Director of Intelligence, WD, requested that separation centers be instructed to send all former CIC personnel to CIC Center for final assignment.

14 Dec Commanding Officer, Holabird Signal Depot, ordered not to answer CIC correspondence; he had answered inquiry of a Congressman.

20 Dec Emergency CIC needs curtailed to 1,500 men capacity of CIC Center. Center ordered to provide all possible personnel.

20 Dec Staff study prepared by Chief of CICB for merger of SIC and CIC showing examples of general Army policy of central control and tendency in history of intelligence to merge under a central department; present organization and deficiencies.

20 Dec G1, WDGS, concurred with G2 on the emergency procurement of 1,503 officers and EM's to fill CIC training center to its capacity.

0326

26 Dec Change three to T/O&E 30-500 was published. Change provided for CIC Warrant officers, more commissioned officers, and direct appointments to enlisted men who would serve for one year.

27 Dec Proposed reorganization of Service Command CIC detachments called for 844 compared to 924 in SIC as of 30 Nov.

31 Dec Survey revealed that during World War II, CIC employed the services of more than 13,000 persons.

31 Dec ASF statistics revealed that during hostilities of World War II 2,350,000 loyalty investigations were processed.

September - December Analysis revealed that theaters had requested 1,041 officers; that only 375 had been procured and only 230 qualified for training and shipment.

December 319th Military Intelligence Company was activated in Japan to train Japanese language specialists who worked with CIC.

December General Board of Officers (including 2d Lt John S.D. Eisenhower), prepared an analysis of the organization and operation of CIC in ETO. Recommended:

a. CIC remain under operational control of a theater of operations with several CIC detachments attached to G2 sections of divisions, corps, armies, and army groups at all times.

b. Centralized control of CIC in communication zone be retained by G2 of the zone, irrespective of advanced or base section territorial jurisdiction.

c. That greater emphasis be made on procurement of qualified linguists.

d. Proper training manuals be prepared setting forth mission and method of operation of the CIC.

e. High standards of procurement be maintained and no one be assigned until he has passed his basic military training.

f. That specialist training be toward developing investigative techniques and train only a limited number of men as technical experts.

0327

1945 There were CIC agents in Iran (Persia) from 1944-1945.

CONFIDE

1946

1 Jan CIC detachments in occupied countries, found a new mission materializing--reporting on political, economical, and labor factors. Noted specifically by 441st CIC Detachment, Japan.

1 Jan Chief, CIC, reported that theater requests for CIC personnel totaled 1,503 for the first quarter of 1946.

1 Jan Survey revealed that 9,000 former CIC personnel had been separated and returned to civilian life.

2 Jan G2 reported that the CIC Center in the past two and a half months had lost by separation fifty percent of its trainees or nearly 1,300 men.

11 Jan Lieutenant General Hoyt S. Vandenberg became AC of S, G2, replacing Major General Clayton Bissell.

15 Jan Colonel M. C. Noble replaced Colonel Kibler but was titled Commanding Officer, CIC Center, instead of Chief, CIC.

15 Jan CIC policy and operations were separated, with CO of CIC Center handling the new Center, and Chief, CIC Branch, ODI, handling policy.

15 Jan CIC three week Field Security Course at Fort Belvoir, Virginia, revised to incorporate World War II experience.

21 Jan Commands reminded they must not transfer CIC agents to non-CIC duties without prior approval of DI, WDGS, except deficiencies specifically listed "for cause."

22 Jan CIC Center Planning Division reported 296 civilians were needed at the CIC Center to replace military personnel before 30 Jun 46.

22 Jan National Intelligence Authority established by Presidential Directive.

23 Jan 1135th CIC Detachment activated at Manila, PI, and took over headquarters and nine branch offices of 441st CIC Detachment.

29 Jan CIC Center authorized to give four week course to Service Command SIC Agents on "the Communist party and communist front organizations and their connection with labor disturbances which affect the army or national security."

January CIC School course in Chinese for CBI replacements was being phased out.

11 Feb Director of Intelligence, WD asked that use of CIC agents for other duties such as CID, IG, and positive intelligence collection, be eliminated. Cited deterioration of CIC work since end of war.

13 Feb CIC Planning Division recommended a four week basic CIC course followed by four week advanced course covering language and area requirements of various theaters.

27 Feb Secretary of War directed CIC quotas be filled as quickly as possible because of "present critical need in overseas theaters."

27 Feb Director of Ordnance informed that CIC desired to continue its five day, motor vehicle course at Aberdeen Proving Ground.

27 Feb Director of Intelligence informed Chief of Engineers that CIC desired to continue its three day course at Fort Belvoir.

27 Feb Army Information School was activated at Carlisle Barracks, Pennsylvania.

28 Feb CIC Center made plans for physical consolidation of its activities at Camp Holabird into a center area and a school area.

28 Feb Personnel survey of CIC Center was made to implement necessity of reduction in housekeeping personnel. Recommended 150 officers and 409 EMs.

February CIC in Calcutta covered civil disturbances as part of political security reporting.

February CIC agents authorized to convert from military to civil service with CAF grades; few did.

February TWX from ASF to CO, CIC Center, recommending that active measures be taken to encourage all former intelligence personnel to apply for reserve commissions with MI, ORC.

0330

1946

1 Mar Control of Okinawa CIC personnel was transferred from 441st CIC Detachment, Japan, to 1135th CIC Detachment, PI.

5 Mar CIC Port Security course at New York reduced from five to three days.

11 Mar Director of Intelligence, WD, recommended SIC be merged with CIC; said 1944 directive gave Army two uneconomical investigative agencies. Total of 512 SIC personnel in Service Commands; 206 officers and 306 EM.

11 Mar Four week typing school inaugurated for CIC cadre of CIC Center.

12 Mar CIC Center study showed abuse of understudy system such as "understudys" for dining room orderlies, barracks orderlies, and firemen.

13 Mar CIC Planning Division conducted test of Speak-O-Phones to determine how they stood up under road travel. They stood up well.

14 Mar CIC agents of 970th CIC Detachment in Berlin, Germany, arrested Mildred Gillars (Axis Sally).

19 Mar CIC Planning Division submitted a minimum and optimum standard for CIC procurement of officers and EM.

19 Mar CIC personnel returning from overseas were ordered to CIC Center, Camp Holabird, Maryland, for disposition.

20 Mar CIC Planning Division recommended that Chief, CIC, be authorized to promote all EM who pass the CIC course including the appointment of master sergeants as warrant officers.

25 Mar Substitution of warrant officers for commissioned officers for CIC duty was authorized provided not over 5% of quotas.

31 Mar Survey showed 39.3 percent of officers and 65.3 percent of enlisted men of CIC Center staff had an anticipated service of at least one year. School had 826 students in training and reenlistments were increasing.

March CIC agents of Third Service Command provided security detail for guarding Honorable Winston Churchill and General Dwight D. Eisenhower on visit to Washington.

March CIC school discontinued Italian language and orientation courses.

CONFIDENTIAL

March CIC Center worked out plans for training ten percent of its students in the Russian language.

March CIC branch offices in Assam closed and personnel were transferred to Calcutta, India.

1 Apr CIC Center Planning and Liaison Division recommended a corps of 11,713, of which 5,843 would be officers. Troop basis 4.5 percent. Recommended further that rank of corporal be abolished for CIC; recommended General Officer be Chief, CIC, in overseas theaters; Chief, CIC, WD, should be major general.

1 Apr CIC agents in Germany broke up subversive group by arresting 200 suspects in a swoop coordinated with British CIC.

2 Apr Standard Operating Procedure published for handling transient and visiting officers at CIC center.

3 Apr War Department authorized recall of officers to active duty to fill vacancies for technical specialists - CIC allotted quota of 100.

4 Apr War Department Manpower Board surveyed CIC Center and recommended operating Center with a force of 408 for a 1,079 student load and 642 for an 1800 student load.

5 Apr AGF directive reminded AGF CIC Agents that their investigative jurisdiction was confined to their unit and its area.

5 Apr Army Service Forces published letter dealing with changes in qualification requirements for SIC applicants.

12 Apr War Department AGO letter was published furnishing procurement quotas to each Service Command, MDW, and OCT for screening of unassigned ASF personnel for SIC assignment. CIC personnel of commands mentioned accomplished the screening.

13 Apr War Department Circular 108, paragraph 4, was published transferring personnel of SIC to CIC (AG 322 20 Mar 46), and rescinded WD Circular 324, 1943.

13 Apr Commanding Officer, CIC Center, informed G2 that

0332

future CIC trainees would have to perform housekeeping duties during training because of manpower shortage.

13 Apr Commanding Officer, CIC Center, informed G2 that "increasing numbers of personnel who do not possess proper background for CIC duty and whose integrity, judgement and discretion are questionable are being received...trainees are young, immature and possess intelligence quotients comparable to high school students..."

13 Apr Commanding Officer, CIC Center, reported deterrent factors of being a Class IV installation subordinate to another Class IV installation and recommended moving to "a post of our own."

13 Apr Commanding Officer, CIC Center, reported TC was recalling 40% of the motor vehicles at the CIC Center by 30 June, taking eight currently and the other eight in June.

15 Apr Provost Marshal General credentials issued to the 602 SIC personnel were revoked and replaced by CIC credentials and badges.

15 Apr Chief, CIC, advised MIS that it was not considered desirable under present conditions to train members of the WAC as CIC agents but that twenty-six WAC's could readily be used in the Center in administrative capacities.

16 Apr Army Air Forces SIC students at the CIC Center were asked to comment on their course. Many said it was one of the best Army Schools, several wanted more legal, countersubversive, and counter-sabotage training.

22 Apr Direct enlistment of non-CIC personnel authorized for CIC if men enlist for three years, are US citizens, are twenty to thirty-eight years old, high school graduates, have AGCT score of 110 or higher, and have law education or have investigative or linguistive experience.

25 Apr Plan completed for consolidated, thirty-two week course of CIC instruction.

26 Apr Requisition received for 540 more CIC personnel. This added to a shortage of 300 on a former pro-

0333

curement, to 900 ASTP, AGF, ASF, and Marine Corps personnel scheduled for training and the scheduled replacement quota of 1,500. CIC Center had more than 3,000 men to train. Facilities were inadequate.

29 Apr Troop Commander, CIC Center, published uniform regulations for Camp Holabird.

29 Apr CIC Course at Engineer School, Fort Belvoir, Virginia, was revised with more emphasis on counter-sabotage techniques.

30 Apr First and Second Training Battalions reorganized at CIC Center; Third Battalion organized and Fourth Battalion discontinued.

30 Apr 405th CIC Detachment was deactivated after unit had been moved from New Delhi to Calcutta, India.

April Tour of Service Commands by CIC officer revealed no standardization of thought of desired CIC ZI training; viewpoints varied with geographical locations.

April Commanding Officer, CIC Center, informed G2 that returnees had reported that in the Pacific Theater only officers and warrant officers were used as agents and enlisted CIC personnel were used for other duties. If true, CIC recommended procuring more officers and appointing high caliber enlisted men to lieutenants or warrant officers.

April Two-hour Friday inspections and reviews at CIC Center, Camp Holabird, replaced Saturday morning inspections. Planning to organize CIC Band. Building 136 obtained for CIC use.

1 May Commanding Officer, CIC Center, recommended a six month basic course and Spanish language training for CIC personnel, for duty with attaches, missions, and commissions in South America.

1 May Commanding Officer, CIC Center, repeated recommendation that the CIC Center should have a post of its own.

1 May CIC Center faces a serious problem of procuring serviceable and presentable clothing to issue to its personnel.

[redacted]
0334

1 May Commanding Officer, CIC Center, strongly stressed the expediency of completing background investigations prior to graduation of CIC school students.

1 May CIC agents of 430th CIC Detachment, Austria, culminated long investigation with arrest of Helmut Von Hummel and recovery of six million dollars in church gold.

1 May War Department separation policy made eighty officers of the staff and cadre eligible for discharge; plans made to discharge in units of ten every ten days at CIC Center.

1 May Two officers furnished the Center on a TDY basis returned to Fort McClellan as unsuitable.

1 May Commanding Officer, CIC Center, reported that only seven out of twenty nine civilians authorized for the Center had been hired. He added that those of the right type and efficiency were "among the scarce categories."

2 May Personnel being shipped from the CIC School with only half of eight weeks training in order to meet critical demands.

6 May CIC screening team at Yale University to interest qualified ASTP students to transfer to CIC. ASTP students at Universities of Pennsylvania and Minnesota to be screened later.

10 May War Department ordered twelve CIC detachments to be activated in the nine Service Commands. MDW, and at the NYPOE for the TC.

13 May Consolidation of CIC units in Europe continued as 307th and 504th CIC units merged at Heidelberg, Germany.

22 May Inadequacy of Camp Holabird as a CIC Center became critical. Fort Meade surveyed; also inadequate. Camp Holabird could be made adequate if Signal Depot moved from post. Fort Warren, Wyoming to be surveyed.

22 May CIC, assisted by CID, MG, and US Constabulary, raided the 397 boats of the Danube River Units of the Hungarian Navy and arrested 232 persons. Small arms, land mines, and counterfeiting outfits were seized in raid near Passau, Germany.

CONFIDENTIAL

28 May Study showed 417,925 square feet needed for peak load of 6,000 students at CIC Center; average - 70 square feet per student, for classroom and administrative requirements.

28 May CIC agents in the Philippine Islands reverted from occupation status to military base security status as Philippine Islands inaugurated its first President.

31 May General operational policy of CIC remained unchanged as Secretary of War Book Message reaffirmed policy letter AG 322, 13 Nov 44.

31 May CIC authorized 600 EM as clerical specialists under T/O&E 30-500 to release qualified investigators. Personnel will be of lower quality and their use as special agents will not be permitted. One month administrative training recommended for them.

10 Jun The nine Service Command CIC Detachments (107-115) were reassigned to the six new Army areas.

10 Jun The 118th CIC Detachment at Washington, DC, was reassigned from the DI, ASF, to the DI, WD.

11 Jun Lieutenant General S. J. Chamberlain became AC of S, G2 WDGS.

11 Jun Army Service Forces deactivated and CIC control was assigned to G2, WDGS, under Security Group as a branch, with Lt Col C.E. Leydecker as Chief.

11 Jun CIC Planning Division recommended CIC Center control arrival of trainees and reported: (1) Unpredictable arrival of prospective trainees necessitated a processing system for handling from five to 500 persons at one time and made efficiency in handling an impossibility. (2) Approximately twenty-five percent of the prospective trainees were eliminated as ineligible after reporting to the CIC Center.

12 Jun CIC Detachment, ASF, disbanded and personnel were transferred to separation centers; CIC Center became Class II activity.

13 Jun Survey revealed ninety-five percent of all CIC Center correspondence was addressed to the G2, WD.

CONFIDENTIAL
01336

18 Jun Assignment of 400 enlisted administrative men, MOS 405, to CIC was authorized. Men to be sent to CIC Center for training.

19 Jun CIC Planning Division recommended two-week administrative course for 500 students which would require twenty-nine instructors, fourteen classrooms, and 500 typewriters.

19 Jun Chief of Staff approved Office of Provost Marshal General and Corps of Military Police as permanent components of the Army.

23 Jun CIC Planning Division completed programs for a twelve and a six week CIC course.

26 Jun Responsibility of CIC Branch, Security Group, Intelligence Division, for dealing with the Commanding Officer of CIC Center divided between Security Group, Personnel and Administrative Group, and Combat Intelligence and Training Group.

26 Jun CIC Center Planning Division prepared study on use of Keeler Lie Detector (Polygraph) and recommended experimental trial use of two machines.

28 Jun Armed Forces Staff College was activated at Norfolk, Virginia, as start of integration of services.

28 Jun Survey of results of 597 circular letters sent former CIC officers asking them to return to active duty: returned unclaimed - 17; no reply - 518; replies - 67; number recalled - 0.

June CIC school acquired 1,000 German language books from former Prisoner of War libraries in various sections of the country.

June CIC enlisted agents in Germany ordered into uniform; also ordered to wear rank and to live in Army barracks.

1 Jul Lieutenant General J. R. Hodge wrote the 971st CIC Detachment"...to express to the CIC Detachment in Korea my thanks and appreciation for the splendid work it has done...the mission of our Army of Occupation brought new concepts of CIC operations..."

2 Jul Chief, CIC Branch, stated a comprehensive study was contemplated to determine practicability of adoption for use by CIC units of such innovations in in-

0337

vestigative aids as the polygraph, infrared photographic equipment, improved wire and tape recording devices, concealable cameras, etc.

2 Jul — CIC Center reported a critical shortage of instructors. Training classes will average thirty to forty men with a student load of 1,500.

3 Jul — Recommend activation of the 118th CIC Detachment of four officers and six enlisted men to be assigned to the CIC Center and operate directly under Chief, Security Group, on high level War Department investigations.

4 Jul — Philippine Islands became independent and CIC at Manila closed four of its branch offices.

9 Jul — Study showed CIC had 3,988 men deployed worldwide but CIC requirements were 6,620 men with 2,156 in the ZI.

12 Jul — Study showed that of 120 hours of FBI type training, forty were of value to high ranking CIC personnel and another forty were of value to field agents. The final forty were of no CIC value.

15 Jul — CIC Center regulations published in General Order 19, CIC Center.

16 Jul — Training status report revealed thirty-seven groups totaling 1,136 CIC students consisted of 201 officers and 935 EM; of these 902 were schedule for Europe, 210 for Pacific, and twenty-four for Zone of the Interior.

16 Jul — Survey showed thirteen CIC agents on duty with Security Section, ID, and no means of promoting them on this TDY even though doing "important jobs."

18 Jul — CIC planning board recommended WD Memo 380-44, Subject: "CIC Monthly Reports, "be rescinded and new memo issued requiring monthly report from all CIC detachments combing administrative and operational data.

19 Jul — Deficiencies of major commands in meeting quotas on procurement of CIC personnel result in rescinding previous quotas and issuing a new quota of 245 CIC officers and 1,060 EM.

22 Jul — Study showed 200,925 square feet required for a

CONFIDENTIAL
0338

peak load of 2,000 students at CIC Center or an average of about 100 square feet per student for classroom and administrative purposes.

22 Jul CIC informed that under terms of Geneva Convention lead bullets were prohibited and were to be used for training purposes. Steel jacketed bullets issued for operational purposes.

24 Jul CIC planning division stated that, in view of the infrequent need of CIC units world-wide for a scientific criminological laboratory, the CIC should use FBI facilities as needed.

31 Jul Appointment of 400 second lieutenants to AUS for CIC duty was authorized.

31 Jul Security Group recommends CIC school increase instruction time on informants and decrease codes and ciphers and fingerprinting instruction time.

July Director of Intelligence, WDGS, takes over approval of direct appointment of warrant officers and second lieutenants.

5 Aug Screening of personnel at reception centers for civilian occupation specialties was started.

13 Aug CIC strength for fiscal year 1948 estimated at 4,670.

21 Aug CIC Center planning division recommended that CIC Center be relocated at Fort Francis E. Warren, Wyoming.

22 Aug Table of Operation for CIC Center based on 1,500 student load, five divisions with 208 officers, 429 enlisted men, twenty-seven civilians, or a total of 664. Grades included were four colonels, twelve lieutenant colonels, thirty-seven majors, 141 company grade and fourteen warrant officers. Enlisted grades included fifteen master sergeants.

26 Aug CIC recommended a Mobilization Plan based on global troop basis of 8,500, with two week refresher courses for recalled personnel.

August CIC agents provided coverage of the August riots in Korea.

0339

August CIC organized photographic course for Army officers who were to serve as military attaches.

14 Sep Study by CIC Center planning division on use of one-way glass recommended purchase of two sections at $7.00 per square foot.

17 Sep Commands notified that 400 enlisted clerical specialists were being procured for CIC duties.

18 Sep Revised CIC Center budget for 1948 submitted based on student load of 3,000 and calling for $461,815.91 or average of $153 per student direct expense.

18 Sep Chief, Security Group, ID, stated overall classification of basic and administrative CIC courses labeled RESTRICTED. For academic credit for courses at Army Service Schools CIC, courses in language, legal activities, report writing, typing, and English may be furnished, but length of course or information on techniques is classified.

25 Sep Commanding Officer, CIC Center, requested authorization for three wool shirts and two jackets to insure good appearance of men, since dry cleaning facilities for troops at Camp Holabird required a week.

26 Sep Brigadier General Arthur G. Trudeau, GSC, Chief of Manpower Control Group, authorized increase of 200 in CIC quota for recall to active duty for reserve and national guard officers as Corps was short 315 officers.

27 Sep CIC informed that because of budget limitations there will be drastic personnel reductions.

30 Sep AGAO-S-A-M 210.31 published revised regulations for assignment, investigation, training, and control of CIC personnel in ZI. Personnel to be assigned on recommendation of CIC but local procurement still authorized. Directive prevented arbitrary transfers to non-CIC duties.

September CIC Center recommended to ID that Keeler Polygraph machine be purchased and lie detector training be given to selected personnel.

2 Oct CIC planning division stated that trainees reporting to CIC Center for duty were younger, less experienced, and less educated with each procurement; study recommended new system of procurement.

CONFIDENTIAL
0340

1946

3 Oct Commanding Officer, CIC, stated he believed "tactical units not sufficiently familiar with the proper utilization of their assigned CIC detachments."

4 Oct Security Group officers visited CIC Center and "clarified outstanding differences..."with the Commanding Officer. Reported "feud" was straightened out. Reported Col Noble had many other troubles beside personnel assignment, training, and local administration.

7 Oct Commanding Officer, CIC Center, criticized for holding 2,000 people on parade for the uncertain arrival of G2 inspectors from Washington.

10 Oct War Department authorizes key CIC personnel to volunteer for retention overseas.

10 Oct CIC school ordered to reduce teaching of foreign positive intelligence from ten hours to two hours and reduce domestic intelligence from five to four hours.

10 Oct CIC Center planning division recommended that half a dozen cadre be trained as stenotype operators.

17 Oct Director of Intelligence informed 117th CIC Detachment that there was a critical shortage of CIC personnel and that if insufficient work existed agents not needed should be reported for reassignment.

18 Oct Protest by Commanding Officer, CIC Center, of being responsible to both the training and the security groups of ID was solved by DI by transfer from training to security group all responsibilities for activities at the CIC Center.

19 Oct CIC agents at Stuttgart, Germany, started investigation of Germany's first serious post-war sabotage--bombing of Denazification Court Building.

19 Oct General McNarney issued directive defining responsibilities between CIC and AMGOT in Europe.

20 Oct Chief, Security Group, ID, stated Commanding Officer, CIC Center, had made incorrect assumption of increased student load in planning reorganization, since load would level off at $2,000 a year in 1947 and ratio of cadre to students could be on a one for one basis.

CONFIDENTIAL
0341

21 Oct Chief of Security Group reported to DI that because of the very unusual status of the CIC in that the Corps is neither a branch or service it can be considered only as coming within a Branch Immaterial category. No allotment of officers, warrant officers, or enlisted men has been contemplated under Branch Immaterial. Col L. R. Forney recommended for the post-war Army an allotment of 5,925 men, of which 1,860 would be officers, 991 warrant officers, and 3,074 EM. Of these, 4,198 would be overseas, 1,512 in ZI commands, and 215 in the Air Forces. He also stated "whenever there is a reduction of occupational forces, there should be a corresponding increase in CIC coverage and personnel."

22 Oct Negro agents to be furnished detachments because of reports of a disproportionate number of incidents to the number of Negro troops.

22 Oct Vint Hill Farms School at Warrenton, Virginia, redesignated as Army Security Agency School.

30 Oct Major commands failed to meet CIC procurement quota by 192 men. Shortage and current needs resulted in a need for 400 additional enlisted administrative personnel for CIC (MOS 405).

October CIC agents in Korea investigated the rice riots where fifty policemen were killed. Leaders were identified and apprehended.

October CIC agents in Germany, in cooperation with British and with German police, raided 373 targets and at 245 banks and businesses recovered seven million dollars worth of diamonds, gold, silver, and platinum.

8 Nov Emergency requirements for 700 officers, 200 warrant officers, and 1,100 EM for CIC duty during next ninety days.

8 Nov War Department Memo 600-750-4 published authorizing direct enlistment for CIC for two years and providing for waivers of qualifications upon application.

12 Nov Security Group, ID, returned CIC Center reorganization proposal for revision. Cited small student load.

19 Nov CIC Center asked that its original recommendations be approved; stated personnel in school represented only half the total as an equal number were always

CONFIDENTIAL

on hand awaiting the start of classes or shipment following graduation. Furthermore, no housekeeping personnel were available so more were needed.

25 Nov CIC agents in Stuttgart, Germany, apprehended gang responsible for bombings; leader was sentenced to be hanged but was later pardoned.

25 Nov War Department Memo, 8 Nov 46, rescinded to remove delay caused by initial clearance requirement since men were so critically needed.

25 Nov War Manpower Board and G3 veto request for separate CIC detachment for Guided Missile Center at Fort Bliss, Texas; Fourth Army detachment ordered to handle.

27 Nov Forced CIC quota system inaugurated as ZI armies and services ordered to transfer 401 men during January 1947, with MOS 405 (administrative).

27 Nov CIC planning and liaison division worked on first draft of a text "CIC Detachment Administration."

29 Nov Foreign military personnel prohibited from attending the CIC school.

29 Nov New York Herald Tribune carried story by ex-CIC agent stating that General Joseph T. McNarney had "stripped CIC of its police powers in Europe."

30 Nov Major General W.A.Burress, G2, Europe, wrote the CO, 970th CIC Detachment, that General McNarney and his executive, General Huebner, had confidence in the CIC and had no intention of stripping it of any power. Directive of 19 Oct merely defined responsibilities.

November Assignment of fifty WAC personnel to the CIC was authorized and arrangements for training were started.

November 115th CIC Detachment discovers the presence of "Meat-Ball" Kawakita in the US. Gets ball rolling. FBI gets credit for conviction and death sentence for treason.

3 Dec Screening of all Air Force personnel in replacement stream for CIC and European Language Theater Training was ordered.

0343

10 Dec The 441st CIC Detachment, Japan, reported it was operating with only fifty percent of its authorized strength and that it would soon be reduced to twenty-five percent by anticipated losses.

13 Dec Chief of Security Group, G2, stated, "The demand for new CIC personnel during the past year simply has been beyond any possibility of being met. At a time when the old CIC was being wiped out by demobilization, new personnel coming into the Army consisted almost entirely of new men under twenty and those of the necessary age, maturity, and basic qualifications simply did not exist in the numbers required...In addition the great demands have forced curtailment of the period of specialized training in order to keep any substantial number of men in the field at all...This situation will continue critical at least until the summer of 1947 and even then there will be no great improvement in the quality of men procured because the new Army simply does not contain such men in quantity..."

26 Dec 970th CIC Detachment, Germany, was ordered to investigate black marketing in the American Zone, which had gone beyond control of CID.

December CIC planning division reported many complaints regarding the report writing course but the division had to shelve project for revision indefinitely.

December The 80th Metropolitan Unit of 441st CIC Detachment at Tokyo continued investigation of Case 700,109, Toguri D'Aquino, Iva (Tokyo Rose).

December The 970th CIC Detachment, Germany reported twenty-one important subversive organizations under surveillance.

December The 430th CIC Detachment swooped Austrian underground in black market raid coded "Operation Sugar."

December Authority obtained during 1946 for CIC officers who volunteer to remain overseas longer than the regular thirty-six month tour.

December During 1946 the Army was screened for urgently required linguists for CIC duty: Col C. E. Leydecker reported need partially filled.

December During 1946 MOS's 9302, 1301, and 1405 were reserved exclusively for CIC personnel to prevent

[redacted]

requisitions of these MOS's for other duties.

December During 1946 revision of TM 30-215, the Mobilization Plan, T/O&E 30-500, CIC Periodic Reports, and other basic data in progress.

December CIC extension courses were written during 1946 and preparations made to put them into use.

December All former CIC officers in ORC, MI-Reserve files were tabbed for CIC in the event of mobilization.

December CIC reserve training had been integrated into the general ORC program and coordinated with commanding generals of the Ground and Air Forces.

1 Jan Control of atomic energy was transferred from the US Army to the Atomic Energy Commission.

1 Jan Overseas survey revealed 2,446 men, with 1,640 in Europe, 692 in Pacific, and 114 in Alaska, Caribbean, and China and other areas.

2 Jan Security Group IOM delineated consolidation of activities and functions of CIC Branch, ID, and CIC Center to eliminate duplication and to keep CIC Branch exclusively as a policy organization.

6 Jan Survey revealed 623 CIC personnel authorized in the ZI had a backlog of 18,254 investigations. Increase of 169 agents authorized.

7 Jan General George C. Marshall was appointed Secretary of State.

10 Jan CIC Center ordered to give only refresher course to direct officer appointments, CIC.

14 Jan Officer troop basis for CIC as of 30 June established at 1,559; deficiency 580. Automatic assignment of OCS graduates to CIC was requested.

16 Jan President Harry S. Truman announced that the Army and Navy had agreed to merge under a Secretary of Defense.

16 Jan Three CIC agents sent to the Pentagon to gather material for a course on espionage activities in the US.

20 Jan Chief, Security Group, appointed a board of four officers to consider whether or not CIC should be a permanent branch of the Regular Army.

24 Jan AG stated a large number of CIC recruits were being sent to the CIC Center who did not meet requirements, particularly educational, and ordered that more careful screening of applicants be made.

31 Jan CIC Branch Board of Officers recommended that CIC be made a permanent Corps with a Brigadier General as Chief; with an Officer Corps of not over two percent of the regular officers and an enlisted strength of half of one percent of the strength of the Army.

CONFIDENTIAL
0346

1947

January — CIC agents in Wakayama sub-detachment of the 441st CIC Detachment, Japan, rode out an earthquake and tidal wave and worked with the Japanese authorities on disaster relief.

1 Feb — European Intelligence School, Oberammergau, Bavaria, Germany, was conducting a 251-hour German language course and a 248-hour Intelligence course including forty-two hours of occupation orientation; forty-three hours operational intelligence; seventy-six hours of counterintelligence, and thirty-three hours of German.

1 Feb — Survey revealed CIC had a strength of 3,789 of its 5,175 authorized on a Troop Basis. Of the 1,386 shortage, 1,025 were officer spaces.

1 Feb — Personnel survey revealed 612 agents on duty in Army areas and other special ZI assignments, 540 on duty at CIC Center, and 123 with the Army Air Force. CIC Center had 1,935 students.

3 Feb — Arrangements made to get an immediate FBI fingerprint check on the 600 incoming students at the CIC school each month.

6 Feb — Colonel L. R. Forney, Chief, Security Group, ID, recommended to G2 that CIC not become a permanent Corps because officer Corps would be too small; suggested officers be assigned by four year details, and enlisted men continue from Detached Enlisted Men's List (DEML)

7 Feb — The eighteen using agencies of CIC were sent a letter by DI on the subject: "Improvement of the Counter Intelligence Corps," which described the deterioration of the quality of personnel since the end of the war.

10 Feb — Chief, CIC Branch, ID, status report revealed:

a. CIC Center had five functions: viz, training, replacements, separations, depot, and laboratory.

b. Overseas trainees were given nine week basic course and three weeks of language with five languages being offered.

c. Two special courses given--four week administration and one week attache photographic course.

[redacted]

d. Former fourteen week overseas course and six week ZI course were being phased out.

e. CIC current student load of 2,100 believed peak and the end of emergency requisitions.

f. All small theaters and ZI up to strength; Europe and Pacific about two-thirds of strength.

g. To activate 315th MIS Detachment (linguists), 117 men taken from 441st CIC Detachment in Japan.

12 Feb Survey revealed that if CIC took over operation of Camp Holabird, 538 persons would be needed for housekeeping assignments, including 304 civilians.

12 Feb CIC budget for 1948 estimated at $461,815.91. Direct costs per student estimated at: $1.00, training aids; $4.00, textbook material; $3.00, CIC library; $4.00, surveillance practice; $3.33, investigative photography: total, $15.33.

13 Feb Emergency procurements since 20 Dec 45, had resulted in procuring 1,828 officers, 200 warrant officers, and 5,433 EM to date in addition to 389 direct lieutenant appointments and 183 warrant officer appointments.

18 Feb All major commands noted WAC personnel would be available for investigations as of 20 Mar 47.

20 Feb CIC agents of the 970th CIC Detachment, Germany, broke up a huge watch-stealing ring with the arrest of nine men and the recovery of 900 Army watches, as part of an anti-black marketing mission.

21 Feb Normal CIC procurement program set up as need for emergency requisitions appears ended. Clerk-typist ratio one for each twelve CIC agents.

21 Feb Annual CIC replacement figure estimated at thirty-seven percent and quotas requested on that basis to end "present undesirable emergency procurement system." Forty-two officers and 100 EM per month needed.

26 Feb Survey at CIC Center revealed CIC Training School had a total of 2,600 students.

CONFIDENTIAL
0348

1947

February	Third Army CIC in Germany consolidated with the 970th CIC Detachment with headquarters in Frankfurt.
3 Mar	By direction of Chief of Staff, General Dwight D. Eisenhower, a letter was issued on "Intelligence Functions and Responsibilities" and commanders were told to "Allocate personnel to Intelligence, recognizing the principle that as our positive power for security declines our reliance on intelligence to determine the strength and direction of threats to our security increases."
6 Mar	Cost of packing and crating CIC Center property for evacuation estimated at $67,989 on the basis of 1,689,740 pounds at four cents per pound.
7 Mar	CIC Group, ID, ordered CIC Center to prepare a staff study on its requirement for an experimental laboratory and board on the basis of an initial setup of six persons and a budget of $5,000.
15 Mar	Survey revealed 111th CIC Detachment, Atlanta, Georgia, had completed 6,500 cases in less than a year.
21 Mar	Executive Order 9835. The President of the United States directed the Secretary of War "to continue to enforce and maintain the highest standards of loyalty" within the Army.
21 Mar	Plans made to create special group in CIC--expert on enemy intelligence.
25 Mar	TAG letter was issued renewing authorization to appoint qualified CIC enlisted personnel as second lieutenants or warrant officers, junior grade.
26 Mar	CIC Center prepared a ten day course for future military attaches, including investigative techniques, technical aids, and security.
31 Mar	Average AGCT of enlisted men sent to the CIC Center by Army Ground Forces was 118.4.
31 Mar	The US Selective Service Act expired.
March	The first six WAC's graduated from the CIC school basic course.

[redacted]

1947

2 Apr CIC Board study was returned from ID to the CIC Center for more justification, better preparation.

18 Apr Procurement schedules exceeded requisitions for the first time since before World War II, starting with July.

18 Apr Per paragraph 3, SC 17, WD, Brig Gen George V. Keyser, FA, was assigned as CG, CIC Center; Chief, CIC; and CG, Camp Holabird. General Keyser's Staff consisted of Col M. C. Noble, Deputy; Lt Col C. E. Leydecker, Executive Officer; Lt Col J. E. Stearns, Assistant Commandant, CIC School; and Capt H.R. Aaron, Adjutant General.

19 Apr War Department Circular 101 provided for direct commissioning in the reserve to qualified CIC enlisted personnel.

24 Apr ID Security Group requests $2,000 to buy special equipment necessary for instruction course for certain State Department personnel.

April CIC school opened a new course specially designed for CIC agents to be assigned to continental US.

1 May Trieste sub-office of 428th CIC Detachment, Italy, became the 17th CIC Detachment as TRUST Command was activated.

6 May CIC Branch, ID, personnel, except for Liaison Officer, to be integrated into the CIC Center. Lt Col C. E. Leydecker as Executive; Maj James Reitz as Assistant. CIC Board officers to be Lt Col V. C. Neeson, Capt Hodgson, and Capt Jacobson. Investigations and Records Division, CIC Center, officers to be Capt Moran and Lt Sheward.

6 May CIC liaison office remaining at Pentagon to represent CIC with Career Management and to handle routine correspondence, Maj Hough to be CIC. Office to serve as an information center on CIC with WD.

8 May CIC WD Liaison Office made a branch of the Personnel Division, CIC Center.

13 May Assignment to ETO of CIC personnel with less than four years US citizenship prohibited by Chief of CIC.

15 May Chief, CIC, recommended to field that qualified EM

CONFIDENTIAL
0350

be appointed as warrant officers as a shortage existed, and not to lieutenants, where there was a temporary overage.

15 May The 502nd CIC Detachment was activated at Guam.

21 May Chief of Staff had proposal to make CIC school a special service school, quota obtained for Army Language School.

21 May Plan was formulated for CIC Reserve Officer program and for a CIC career management schedule. Quota obtained of MI reserve personnel authorized temporary duty.

21 May Lieutenant Colonel Leydecker summarized CIC progress since January 1946 when the CIC Branch, ID, had three officers and five civilians. He stated:

a. Since 1941 there had been "a succession of varying and often contradictory directives concerning the administration and operation of CIC..."

b. In CIC "change in actual control and lack of stable and permanent training facilities had all resulted in confusion and misunderstanding ..."

c. Greatest difficulties of the past sixteen months have included frequent changes in the CIC staff and extreme loss of qualified personnel.

28 May CIC Branch, ID, was dissolved and its functions were transferred to the CIC Center as a Class II activity under DI.

9 Jun CIC school was designated as a specialist school in accordance with AR 350-5 and listed in the Army School Catalogue as part of the Army School System.

9 Jun Reorganization of the CIC Center under the Chief, CIC, the Assistant Commandant became Director of the Organization, Operations and Training; Director of Supply became Director of Services and Supply to include mess, motor pool, and maintenance.

13 Jun First Army reported that with the personnel "re-adjustment" of 1 Jul it would accomplish only fifty percent of its requirements.

CONFIDENTIAL

1947

14 Jun War Department Circular 210 enlarged the CIC Specialization of Military Intelligence Reserve of the ORC.

16 Jun Chief, CIC, addressed the conference of G2's held at Fort Riley, Kansas, and told them:

a. CIC personnel must be requisitioned through command channels to the Adjutant General.

b. To changes must be requested through command channels to the Director of Organization and Training.

c. CIC had no overall quotas for various army schools. Men must be sent on local command quotas.

d. All locally procured CIC personnel must be sent to the CIC school at the earliest possible date.

e. Officer-Agent students are sent to ZI detachments to determine their field performance.

f. Loyalty investigations of prospective CIC personnel are Number One Priority.

23 Jun Fourth Army estimated it needed a twenty percent increase in personnel to handle its requirements.

30 Jun Global troop basis authorized CIC 5,241 officers and EM.

1 Jul Military Occupational Specialty 405, CIC Clerical, four week course started at CIC Center.

1 Jul Educational level of enlisted men sent to CIC Center for training included during second quarter averaged twelve years.

3 Jul Fifth Army stated with its present personnel it could accomplish about seventy percent of its mission.

14 Jul CIC detachment in Regensburg, Germany, broke up a subversive group in Regen, near Czechoslovakian border, with the arrest of three leaders.

23 Jul Commanding Officer, 441st CIC Detachment, Far East (Lt Col W.E.Homan), wrote Chief of CIC, "I believe

CONFIDENTIAL

it imperative we get away from the idea that something is better than nothing. That is not true in the sensitive and intricate work carried on by the CIC. More frequently an inapt or incompetent man is much worse than nothing at all..."

26 Jul President Truman signed the Unification Bill for the merging of the Armed Services.

29 Jul Chief, CIC, Brig Gen G. V. Keyser, stated that "...overseas our greatest difficulty in CIC is that counter intelligence staff officers and others in G2 sections are not vaguely familiar with the capabilities of agents and their proper use..."

31 Jul Comparative strength reports revealed the following:

Type	Auth	Actual	(1945)
Officers	1,173	1,194	1,359
WO's	605	385	0
Enlisted	1,986	2,213	4,360
Total	3,764	3,792	5,719

15 Aug CIC, Giessen, Germany, investigated suspected sabotage attempt of CIC and MG gasoline. Two men arrested but sabotage intent doubtful.

18 Aug Brigadier General G. V. Keyser, Chief, CIC, stated "...every time things go wrong in a foreign theater, the trouble can be directly traced to the G2's ignorance of the CIC mission, the nature of its personnel and operations, and the necessity for a minimum of military restrictions in order to give agents a better chance to operate...I am an advocate of an Intelligence Corps..."

21 Aug Caribbean Defense Command requested that its replacement personnel travel from the US to the command in civilian clothes.

August CIC detachment in the Philippine Islands closed its offices at Baguio and San Fernando.

August CIC, Stuttgart, Germany, uncovered a lead which led to the eventual apprehension by CIC of Gertrude Schloz-Klink, Nazi Women's Leader, and her lieutenant general husband, one of Himmler's school directors.

15 Sep The 17th CIC Detachment, Trieste, covered riots in which three were killed and seventeen injured, including eleven policemen.

1947

17 Sep National Military Establishment (NME) became operative with Army, Navy, and Air as three departments of the Defense Department.

22 Sep Central Intelligence Agency replaced National Intelligence Authority.

September CIC in Germany discovered evidence that it was Soviet policy to control traffic across the interzonal boundaries.

8 Oct Commanding Officer, 112th CIC Detachment, Fourth Army, estimated that with the new civilian loyalty program added to present CIC requirements, work will be quadrupled.

October Basic course at the CIC School increased from eight weeks to twelve weeks and two day "detachment problem" was inaugurated.

5 Nov The 428th CIC Detachment, Italy, was deactivated as Italian government took over full security; four officers were left behind for CIC work.

18 Nov Proposed revision of T/O&E 30-500 would provide 780 Regular Army Officers out of 4,335 total officer strength and would be increased until by 1951 the Corps would be fifty percent Regular Army officer.

November CIC Book Store opened to provide CIC personnel with basic reference books at reasonable costs.

November Three agents of the 401st CIC Detachment, Hawaii, were sent to Eniwetok and Kwajelein Islands to provide security for atomic tests.

November Reserve Affairs section established by G2 at the CIC Center.

14 Dec The last of the US Army troops sailed from Italy including the final four CIC agents.

15 Dec Okinawa CIC Detachment was separated from Philippine Islands. The fifty-five islands of Ryukyus Command now covered by 526th CIC Detachment.

31 Dec Army General Classification Test average of students at CIC Center up to 123.4 for final quarter and educational level of CIC students up to 12.7 years.

CONFIDENTIAL

0354

December Accomplishments of the year included design of an official CIC emblem for school use.

December CIC school figures showed that with the .45 caliber pistol, there were 12.2 percent experts and 27.17 percent who failed to qualify; with the.38 caliber revolver, there were 28.7 percent experts and 7.23 percent who failed to qualify.

December CIC in Japan was commended by GHQ Far East for its disclosure of the rice delivery slow-down plot of the Communists.

December Statistical summary revealed that during the Second World War, eight-three agents had died in line of duty.

December War Reports of General H. H. Arnold were published. General Arnold said, "In the future it will be suicidally dangerous to depend upon reports of military attaches and routine casual sources of information regarding foreign states.

December Brigadier General George V. Keyser was ordered overseas, but another General Officer was scheduled for replacement as Chief, CIC.

0355

16 Jan Brigadier General E. A. Zundel became Chief of CIC.

1 Jun First Service Command CIC unit reduced to sub-detachment as consolidations under Army Areas continued.

June G2 instructs that Intelligence Field Files be maintained only when derogatory information exists.

July CIC Center had an active Public Information Center which among other activities published the CIC Digest.

August Air Force, CIC, transferred to the Air Force Office of Special Investigations (OSI).

15 Oct G2, DA, proposed that five percent of the officers assigned to the Counter Intelligence Corps, Army Security Agency, and Strategic Intelligence be on a permanent career basis.

October 113th CIC investigation disproves one of the first flying saucer scares.

1 Nov Major General Stafford Irwin became G2 of the Army.

November Tightening background requirements led to large numbers of rejections at the CIC school.

December School Research Library, Student Library, and bookstore opened at CIC school.

1949

25 Jan Only forty six percent of the number of required instructors on duty at CIC School.

14 Feb CIC Center faced problem of men being lost to CIC when field units lifted their MOS.

14 Feb Chief, CIC, orders study to find out why CIC requires so many replacements.

16 Mar Pretests ordered at CIC Center to eliminate poor quality.

9 Jun Brigadier General John K. Rice became Chief of CIC.

9 Jun Major General A. R. Bolling became G2 of the Army.

6 Sep All emergency requisitions for CIC agents filled out and Corps approaching saturation point.

25 Oct To retain CIC Center cadre required that such personnel be trained as CIC specialists.

15 Nov More CIC agents needed in Austria as Displaced Persons Clearance Program starts.

December CIC assigned additional language spaces at Army Language School but school complained that men without aptitude were being sent.

5 Jan Dedication of Hubbard, Hunter, and Allen Halls at Camp Holabird.

5 Jan Out of 133 average reserve officers, 31 were selected to be recommended for retention.

13 Jan Authority received by the Center to establish a Clerk-Typist Course and awarded an SSN 405.

20 Jan CIC Equipment Panel organized to make recommendations on the selection, standardization, laboratory testing, training, maneuvers, testing, and adoption or rejection of equipment.

20 Jan CIC Center to study advisability of not listing CIC school in the DA School Catalgue to prevent present situation where CIC school quotas were listed and reprinted in the Army and Navy Jornal. ASA does not list its school.

20 Jan Security Control Division asked to draw up a set of security principles which would apply to Center and the Corps to end "rule of thumb" decisions.

24 Jan Center protests SR which limits brief cases to finance and property auditors and asks that CIC agents be included with those authorized to carry brief cases.

27 Jan Ground breaking ceremony for Cummins Apartments scheduled for 6 February.

7 Feb Security and Training Group Intelligence Division desires system whereby it can determine, if a reservist's CIC specialty in MI reserve is withdrawn whether man is eligible for some other MI specialty or should be transferred out of MI.

7 Feb Total of 60 officers lost to CIC by cutbacks. All but 15 company grade.

13 Feb WAC Chief approves plan to assign WACs with CIC, as 1405's and to train a limited number of enlisted WACs as 1301's.

13 Feb Chief, CIC, requested close liaison be maintained between CIC Center and Public Information School.

13 Feb CIC Advanced Course approved.

CONFIDENTIAL
0358

1950

14 Feb Policy established to have local Army Area detachments participate in CIC reserve detachment training.

17 Feb CIC Center authorized to assign SSN's 1301 and 1405 to WAC personnel.

17 Feb Economy move results in Center no longer authorized to have CIC personnel sent to their new stations via the CIC detachment headquarters at the Army Area. Men must go direct to field assignments.

21 Feb Army Field Forces proposed that it prepare, supervise, and amend T/O&E 30-500 as part of Army's decentralization. CIC Center opposed.

21 Feb Proposal made to assign a CIC officer to the Staff of Army Senior Instructor in states where there are a large number of CIC reservists.

28 Feb Plan worked out for securing reserve officers with mobilization assignment at the Center for 30,60, or 90 day tours in the division where they would be assigned.

3 Mar Study to be made of creating a small detachment to be available for maneuvers and exercises to handle technical work and be on call to ZI detachment to handle delicate investigations.

3 Mar 311th CIC Detachment commended for its excellent work with aggressor forces in Operation MIKI.

10 Mar Chief, CIC, inspection reveals 109th CIC Detachment and G2, Second Army, working together enthusiastically and in close harmony despite lack of clear delineation between staff and command.

10 Mar First 4405 (Clerk-Typist) class scheduled for graduation.

10 Mar Operations Branch Section and Training Group ID makes first use of CIC Center CIP files.

14 Mar PFC English instructor at CIC school could not be promoted because CIC Center has an overage in corporals.

20 Mar Second "temporary" long German course started to supply linguists for the 66th CIC Detachment.

[redacted]
0359

1950

20 Mar CIC Center informed Assistant Secretary of the Army that while the number of personnel in its pipeline was high, CIC "is not a situation typical to other schools."

20 Mar Army Field Forces will handle T/O&E 30-500, but the Intelligence Division will have final approval.

20 Mar CIC Center at Camp Holabird assured at least in peacetime.

20 Mar Microfilming report from the 66th CIC reveals only 158,400 cards photographed and one million yet to do. Also 270,000 dossiers to be done.

21 Mar Major James Hay of 112th CIC Detachment protests positive intelligence and psychological warfare missions assigned CIC agents in maneuver aggressor roles. Also suggested that if they are assigned undercover missions that agents from other areas be brought in to carry them out.

24 Mar Order published redesignating the CIC Center Staff Division to G1, 2, 3, 4. Six General Staff Corps with troop personnel spaces were authorized.

24 Mar CIC authorized to assign field grade officers to detachments as overstrength and without requisitions to compensate for shortage of company grade officers.

24 Mar Center authorized to assign twenty percent excess manpower to 116th CIC and eliminate semi-permanent TDY situation.

28 Mar CIC Center asked that it be allowed to comment on proposed revisions of SR 310-30-1.

31 Mar Hubbard Hall dedicated.

31 Mar Second Army informed G4, CIC Center, that fireproof, three-way, locked cabinets were being reserved for Top Secret documents.

31 Mar Department of Army requested to suspend all enlistments and reenlistments to CIC because of cut-down in school quota during July and August.

4 Apr As of 1 April all transfers to CIC were to be handled in accordance with the new AR 600-148 "Transfers to CIC."

CONFIDENTIAL

0360

1950

15 Apr Camp Holabird became Fort Holabird.

17 Apr Use of Fort Meade band authorized for Holabird.

25 Apr The Center was considering a Second Army request to provide space for an Organized Reserve Corps school.

28 Apr Office of Strategic Intelligence in the Philippines work over the files of the deactivated 229th CIC Detachment, and reported an estimated fifty to sixty percent duplication of files.

28 Apr Center had to inform overage MI Reserve officers that it could not make exceptions to retain them.

28 Apr CIC AG placed four file cabinets of historical material at disposal of the CIC school.

2 May Plans being discussed for a three-year Organized Reserve Corps training program.

2 May Survey shows only seventy percent of CIC reserve officers on active duty plan to sign new category statement. This means a loss of 400 officers in 1951, leaving Corps 120-130 under strength.

2 May Colonel Kibler, former chief of CIC completed fifteen day tour active duty in his mobilization assignment as Troop Commander, later changed to a staff assignment.

5 May Center G1 stated that while short seven lieutenant colonels in EUCOM, the command was over sixteen to seventeen majors, and the shortage of field grade was not "acute."

5 May Intelligence Career Plan, which included CIC program for recurring and continuous tours of CIC officers, approved by G2, DA.

10 May Chief, CIC, directs that when TM 30-215 is revised into an SR that it "clearly specify and define exactly what command responsibilities are deemed appropriate for CIC Commanders."

10 May Analysis of two student groups revealed officers and enlisted men below CIC standard. Chief, CIC, asked for investigation to see if waivers have been misused.

1950

10 May Chief, CIC, directed that students failing the 1301 course were not to be reassigned to the 1405 course.

12 May Department of Army, G4, reported mobilization status of Fort Holabird was being decided.

12 May Included in plans for CIC Reserve officer training would be sending out two teams, of four instructors each, to various Army areas.

12 May Chief, CIC expressed desire to know more about the Canadian counter-part of CIC and that training at the Center should be offered them. G2, DA, approval being requested.

12 May Plans being completed for one officer and nine EM's to handle security at Eniwetok tests.

12 May Secretary of Defense asked Chief, CIC, to make security surveys of nineteen government buildings in Washington, a project taking about a year.

12 May Chief, CIC, approved plan to send a CIC officer to the Command General School at Fort Riley to teach and to assist aggressor forces. He does not approve providing a CIC Detachment for the aggressor forces.

12 May CIC Center asked to provide personnel for a CIC section of the mobilization plan of Army Field Forces.

16 May CIC policy that all CIC officers assigned to Airborne units be either jump qualified or willing and able to be.

16 May Chief of CIC concerned about using first three graders for KP. Second Army to be asked to furnish permanent detail.

19 May Table of Allowances for Reserve units approved by Army Field Forces and now goes to Army area for comments.

19 May The Equipment Modification List for the 10th CIC Detachment was approved.

23 May Atomic Energy Commission provided one unit for the work on the new CPI files.

CONFIDENTIAL
0362

1950

23 May CIC center studying how to obtain accurate data on time and cost involving in conducting the average background investigation.

26 May Chief, CIC, asked that study be made of the effect of the increased attention placed on security within the government. The problem arose over the increasing backlog of work in the 116th CIC Detachment and its request for additional personnel.

26 May Proposal made to lengthen CIC investigations course.

6 Jun CIC asked to provide lieutenant colonel or senior major as security officer in office of Secretary of Defense.

6 Jun Out of ninety-four reservists with mobilization assignments at the CIC Center who were requested by letter to take training at the Center, forty answered, twenty declined, fifteen accepted and five said they would apply but did not.

6 Jun Out of thirteen to fifteen CIC officers submitted for approval for attendance at the Associate Advanced Course, only three approved, although a majority of the names submitted were officers with CIC duty during the war who had had background clearances.

6 Jun Plan to reorganize the CIC School on the G1, 2, 3, 4, basis to conform to the Center.

9 Jun Chief, CIC, decided field grade officer spaces would be filled, and if not enough had CIC experience some with G2 experience would be accepted.

30 Jun Fort Holabird alerted against sabotage as Korean War opened. No civilian clothing worn on post.

7 Jul Plans made for special course in language and area background to train agents for possible assignment to such areas as Korea, Yugoslavia, and Iran.

11 Jul G3 ordered to inquire what the present status would be of Fort Holabird in a mobilization.

11 Jul Center made plans to secure a reasonable quota of Branch Officer Candidate School spaces if the Korean War reopened them. Staff Conference notes state "Considerable disaffection was engendered during World War II by the inability of the Corps to com-

mission a large number of its qualified personnel."

18 Jul No reserve officers to be released prior to category expiration.

18 Jul Plans made for officer levy on Arms and Services for administration personnel to release 9302 and for calling up reserve officers if CIC qualifies in the Technical Specialty category, being recalled by the emergency.

18 Jul First inductees under new draft processed through Fort Holabird.

18 Jul Home Radio station and two vehicular radio units to be operating within a week at Fort Holabird.

21 Jul Study ordered on how to get back into CIC ranks the Niseis in Hawaii who were released when Corps was reduced in strength.

21 Jul Study ordered on how to earmark, prior to their basic training, draftees suitable for CIC.

21 Jul Fifth Army Commanding General informed CIC Center that loss of its CIC majors for shipment to Far East Command was going to disrupt operations to some extent.

21 Jul General Bolling, G2, ordered Center to furnish list of company grade MI reserve on AMP-2. Officers to be asked their desires on returning to active duty.

25 Jul Brigadier General John Weckerling named Chief of Intelligence Div, G2, DA.

26 Jul CIC asked to have the privileges of designating what units it desired and let Army Field Forces actually order them to active duty.

26 Jul Arrangements made with reserve affairs, G2, DA, to get up to date rosters of CIC reserve units after the Center discovered that only two out of seven agents cleared for assignment in units were still with them.

27 Jul Recommended CIC personnel be more careful in what they tell their wives. The accuracy of their information at times is almost uncanny.

28 Jul All foreign tours of personnel overseas frozen for

six months.

31 Jul Chief, CIC, stated he desires to support all CIC units in combat to the fullest extent even if it worked to the detriment of the rest of the organization. He stated he would meet field officer needs by recalling as quickly as possible selected reserve officers. He suggested that senior grade company officers might be promoted to major. He stated the need for CIC personnel today is such that, if possible, action should be initiated now.

1 Aug Six GSC spaces for the Center have been approved.

3 Aug SR 380-160-1 published, establishing criteria for clearances of personnel handling classified information.

14 Aug Center informed that the CIC field grade officers rushed to the port for FECOM, were held a week, and then sent on a slow victory ship.

18 Aug Chief, CIC, ordered the assistant commandant of the CIC school to make rounds of all Army branch schools, the Command and General School and the Army War College and arrange to have CIC on their guest speaker lists. The Chief said the results of such speaker publicity would be that:

a. Volunteers for CIC would be more plentiful.
b. CIC operation on a mutual faith and confidence basis would accrue.
c. Command and Staff relationships of CIC detachment commanding officers would be bettered.

18 Aug Microfilm team trained for Austria to be diverted by a FECOM request. Was not diverted on orders of Chief of CIC. A special team was trained for FECOM.

23 Aug No accurate information as to the existence of location of the original files of the inactivated Korean CIC detachment was found and only about twenty percent of the microfilm was readable.

23 Aug Survey disclosed that some ZI Army areas had failed to immediately secure PHS's from all personnel assigned to ORC CIC units.

25 Aug Plan made to train sixteen additional polygraph operators.

CONFIDENTIAL

0365

1950

1 Sep Ten British and Canadian officers of high rank and position to be given a one-day orientation at Fort Holabird.

1 Sep Arrangements made to have CIC casualty and decoration lists sent to Center, as it was found at the end of the World War II no such data had been compiled.

5 Sep Far East Command has asked approval for eight division and corp size detachments and one army size detachment to be organized in Japan and sent to Korea on detached service of the 441st.

7 Sep The 342d and the 279th CIC reserve detachments arrived at Fort Holabird.

8 Sep Newly arrived CIC detachments carried orders attaching them to Second Army instead of Fort Holabird. Snafu was straightened out.

12 Sep All Organized Reserve Corps five year commissions extended for an indefinite period.

15 Sep Propose change to SR 350-350-2 so that former CIC agents may elect to return to CIC directly upon graduation from OCS.

15 Sep About twenty-five percent of reservists reporting for CIC unable to qualify because of AGCT deficiency.

19 Sep Investigation revealed low AGCT reservists had no desire to serve with CIC. They had joined a CIC unit in their home area because it was the only one available.

19 Sep Chief, CIC, asks that procurement be speeded up. Three weeks with no action had passed since G1, DA, approved calling up 500 EMs for CIC training. Out of 141 reserve officers called on 15 August only nine accepted and they would not arrive until 8 October.

22 Sep The CIC Center was informed that its request to have CIC reserve units assigned to it instead of Second Army would be a major change in DA policy -- Center still seeking solution.

22 Sep CIC request for 527 additional warrant officers being held by G1, DA, pending revision of AR 610-15.

22 Sep G1 and G3, DA, approved CIC officer and enlisted men levy on Army area during mobilization.

CONFIDENTIAL
0361

1950

22 Sep Recall of 648 reserve officers to CIC approved.

26 Sep DA rules that ORC - CIC units will be assigned only to G2's or to Army Areas. CIC regiments will be assigned to G2, DA, and indorsed to the CIC Center.

3 Oct CIC Center protested plan of Engineers to recall all their officers on duty with CIC.

3 Oct A military subjects course was organized to fill in time until "overflow" of students started CIC school.

10 Oct Department of Army, G2, and Army Field Forces worked on plans to have all linguists coming back into service assigned to one training division as a pool from which various intelligence agencies, including CIC, could draw.

24 Oct Cellular CIC team at the Center proposed to handle high level cases.

24 Oct Center informed that G2, DA, had concurred on its plan for training post S2's for Army Field Forces.

24 Oct Activation of 210th CIC Detachment for X Corps, the 181st for the First Marine Division, and the 705th detachment for the Third Logistical Command ordered.

24 Oct Department of Army reported that 443 EM would arrive at the Center between 1 and 15 November and that 69 officers would arrive in November.

24 Oct Center advised that SR 615-120-50, "Enlistment and Reenlistment for CIC" had been approved and published.

31 Oct Chief, CIC, reported he had had a conference with G2, DA, and the Information Chief, DA, on CIC publicity. General Rice stated he wanted to show that the CIC was not a "novice" and disprove claims that it "couldn't possibly compete with foreign agents." General Rice said he desired to avoid any charge that he is attempting to build an "elite Corps."

14 Nov Army areas complained they were furnished unqualified CIC personnel. One man had a sixty percent disability. Another was 43 years old and had only

a seventh grade education.

17 Nov SR 380-405-1, "Military Security," was published 1 Nov. It outlined the Provost Marshal General's responsibility for the investigation of civilian employees working on DA contracts. This policy was contrary to the recommendations of two staff studies submitted to DA by CIC.

21 Nov Three ORC - CIC detachment were ordered activated at the Center 1 Dec with a mere nucleus of personnel. The units would be operated with administrative support of the Center AG and G4 for ten days before getting their full complement of men.

8 Dec CIC Center requested WAC detachment be increased to 200 women.

8 Dec Center G1 reported 81 officers who had been deferred "for some reason or other" would report for duty on 2 Jan 1951.

8 Dec CIC personnel for DP program were shipped to Austria as requested, except for a SMOE technician, " as there was no technician available."

11 Dec Colonel David G. Erskine became Deputy Chief of CIC and Chief of Staff of the CIC Center.

15 Dec G2, DA, ruled there would be no extension to any thing we have at the present time regarding our publicity policy -- no television, radio, and motion pictures.

15 Dec Because of the tight supply situation, only thirty percent of the actual vehicles were issued to newly activated units in training. After four months training fifty percent were issued.

15 Dec Proposal was made to change MOS 1405 to 4247.

15 Dec CIC troop commander reported he found personnel of reserve detachments completely unqualified to assume their own administration and recommended a weeks training in morning reports before activation of the unit.

19 Dec Chief, CIC, asked that all information discovered of CIC being included in awards to units of which it was a part be forwarded to the Center historical

CONFIDENTIAL

0200

1950

file.

22 Dec CIC protested that application of fifty percent cut in Army vehicles to its units as backlogs of investigation would "go out of control."

22 Dec CIC officers with world-wide experience advised the Center that in many cases, especially to foreign-born persons and overseas, the badge is far more impressive than the credentials.

29 Dec Study asked to define CIC/CIA responsibilities and procedures in development of special investigative equipment.

29 Dec CIC Center considering proposal that G2 move its clearances and file operation to Fort Holabird.

29 Dec "CIC' suffix to MOS 4247 approved.

29 Dec Second Army informed the Center that Fort Holabird troop capacity was 4,155 based on 120 sq ft for officers, 72 sq ft for first three graders, and 60 sq ft for other enlisted personnel.

[redacted]

HIGHLIGHTS ONLY FOR 1951 - 1955

1951

20 Aug Brigadier General Philip E. Gallagher, Chief CIC.

1952

November General Partridge became G2 of the Army.

December Physical security agency established.

1953

2 Jul CIC Board made permanent by DA memo 15-10-3.

19 Aug Lieutenant Colonel Gero Iwai of the 441st CIC completed 22 years continuous active duty with the Counter Intelligence Corps -- longest of anyone in the Corps.

25 Nov SR 600-145-32 published, defining selection and retention criteria for personnel assigned to Field Operation Intelligence (FOI) duties. School for FOI in June.

20 Aug Major General George B. Burton, Chief, CIC.

19 Oct Major General Boniface Campbell, Chief, CIC.

October General Arthur G. Trudeau, G2.

1954

31 Aug By General Order 65, DA, the Counter Intelligence Corps Center was redesignated the Army Intelligence Center.

1955

1 Jan Million dollar CIC school building dedicated.

1 May CIC school redesignated Army Intelligence School, as Class II activity.

MISSION OF THE COUNTER INTELLIGENCE CORPS

"The mission of the Counter Intelligence Corps is to contribute to the operations of the Army Establishment through the detection of treason, sedition, subversive activity, and disaffection, and the detection, prevention, or neutralization of espionage and sabotage within or directed against the Army Establishment and the areas of its jurisdiction."

FORT HOLABIRD, BALTIMORE 19, MARYLAND

ACSIH-GC 250/58/M 8 April 1959

SUBJECT: CIC History

TO: All Personnel Reading this Document

1. This volume is a portion of the History of the Counter Intelligence Corps which has been compiled in draft form by this headquarters.

2. Distribution of the History is being made as the volumes become available so that addressees may profit by the problems and accomplishments of the Counter Intelligence Corps in previous years.

3. When completed, the History will cover in as complete and accurate detail as possible, significant incidents and events leading to the organization of the Corps of Intelligence Police during World War I and the Counter Intelligence Corps in World War II. Events, accomplishments, changes, and problems encountered up until 1950 will be included in the thirty volumes planned.

4. In spite of the diligence of researchers and writers, there may be inaccuracies and omissions, since no records are available for some of the more than two hundred CIC detachments which were operational during World War II. Even some of the major campaigns were poorly documented.

5. Any comments should be forwarded to the Commanding General, United States Army Intelligence Center, Fort Holabird, Baltimore 19, Maryland, ATTN: G-3.

Chapter I

ENCIRCLEMENT AND REDUCTION OF THE RUHR

By 26 March, American soldiers occupied German soil east of the Rhine in five areas. The Ninth US Army, with the Canadian First and the British Second Armies, held fast to their two-day-old bridgehead around Wesel. First US Army's Remagen grab of 7 March had developed into an American fortress. Third US Army's breach of the Rhine south of the river's juncture with the Main River was solid after only four days. Seventh US Army had established its bridgehead north of Mannheim on the 26th. The same day, First US Army forces broke out of their Remagen hold and carved a southeasterly trail of destruction of German forces, making contact with Third US Army units.

Other units of First Army attacked eastward, parallel to Ninth Army's offensive farther north. Between the two armies lay the industrially important Ruhr. By 2 April, the day following the First French Army's Rhine-crossing operation at Phillipsburg, elements of the First and Ninth American Armies met near Lippstadt, completing the envelopment of the Ruhr. The enemy, caught within the sealed pocket, persisted in its defense until 18 April.[1]

SHAEF Keeps CIC Informed

While CIC units in the field kept pace with the fast-moving combat troops, SHAEF continued to issue operational directives to guide CI staff officers during this pre-surrender period. One of the more important directives indicated the division of responsibility between CIC and Military Government Public Safety detachments.

"Whereas Counterintelligence is primarily concerned with the discovery and supervision of secret and subversive activities, the main task of Public Safety is through the medium of a recognized German Police Force to establish secure conditions for civil administration to function."

With this definition of missions as a basis, the SHAEF directive outlined the responsibilities of Counterintelligence and Public Safety. Counterintelligence duties were to include the protection of Allied interests from espoionage, sabotage, and subversive activity; the collection and study of information

[redacted]

relative to under ground movements; the liquidation of the German Intelligence Service (the Schutz Staffeln and the Gestapo); and the arrest and investigation of Germans whose activities were a danger to Allied security. The area of Public Safety concern, more strictly limited by the terms of the directive, included the purging, reorganization, and reactivation of the German Police; the operation and control of the German Police in accordance with Military Government requirements; the enforcement of security measures in conjunction with CIC; and the investigation of public officials and applicants for public office.

In a significant comment at the end of the directive, it was pointed out that the division of responsibilities could not be construed as iron-clad and inflexible. CIC experiences in the ensuing months often called for the liberal interpretation of the provisions of the directive.[2]

SHAEF Requests Information for Psychological Warfare

Situations which required close liaison between counterintelligence and psychological warfare personnel were outlined in a memorandum from SHAEF's Psychological Warfare Division, published on 25 April 1945 for dissemination to G2 staffs at all levels.

The object of this memorandum was to secure cooperation from counterintelligence personnel for Information Control Units, whose main function was the control of German Information Services in the post-hostilities era. This cooperation was to consist of supplying information to Psychological Warfare Division, including background information on all personnel in the German Information Services field, plans made before surrender for clandestine or subversive information activities, location and quantity of communication installations and components, and organizational information about the German Information Services and their operations under Nazi control.

Psychological Warfare Division also requested that counterintelligence personnel remain alert for documentary evidence from Nazi sources "proving German guilt and the

2. SHAEF Directive for Counterintelligence (Pre-Surrender Period), Germany, from 15th Army Monthly CIC Rpt and CI Bulletins, Apr 45, L-633 (11), (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).
NOTE: 12th Army Group CI Directive for Germany, which is based upon the SHAEF Directive, but has been expanded in greater detail, is attached as Appendix 1.

[redacted]

responsibility of the National Socialist Party for the moral degradation of the German people."[3]

The Adversery

Besides releasing policy directives to CIC, SHAEF attempted to keep the forward units constantly informed about the intelligence organizations that CIC would have to deal with as they approached the heartland of the German Reich.

In their analysis of sabotage methods, it was stated that there would be an increasing tendency toward assassination and terrorism as the end of conflict approached. German agents were trained in the neutralization of sentries and guards as part of an attack on a sabotage target, and they were increasingly prone to use this training.

Part of the terroristic tactics SHAEF reported would be the attempted assassination of important figures and the use of antipersonnel bombs such as the "Buttermould" bomb. There would be use of poisoned aspirin tablets, chocolate bars, and sugar. One of the most fiendish of the new sabotage devices reported by SHAEF was a cigarette lighter that could poison a cigarette smoker. A small spherical pellet about one mm. in diameter of unknown chemical constitution was fixed on the cigarette lighter near the wick, so that when the wick burned, the pellet became heated and vaporized, giving off a deadly poison. This same chemical pill could be placed in an ash tray where the heat of a cigarette being stubbed would suffice to volatize the pellet.

SHAEF said that the new terrorist tactics could be partly traced to the assumption of control over sabotage activities by the Schutz Staffeln. The aims of this campaign were considered principally to foment trouble and general unrest as part of a long term political subversion that the Nazis would attempt in Allied countries. Within Germany, itself, the campaign was viewed by SHAEF experts as an underground resistance measure with efforts directed at the assassination of German nationals working for the Allies.[4]

CIC Agents in the field were also warned to view with

[redacted]

suspicion the German Postal officials in occupied towns. Captured documents revealed that the Nazi Government had solicited the postal authorities to determine what trustworthy postal employees would volunteer to stay behind in Allied occupied territory.

It appeared only logical that other Government departments had made similar arrangements to leave behind "good Nazis" in the belief that the Allied Military Government would retain them in their positions. CIC personnel were enjoined to "focus special attention on all Post Office officials who have remained at their posts."[5]

German Intelligence Reorganizes

The report of interrogation of a voluble prisoner of war (an officer of a German sabotage unit) provided SHAEF with a picture of the organization of the Abwehr during April 1945. A major change was noted in the assignment of the special mission of performing R-Aufgaben (stay-behind sabotage tasks) to Frontaufklaerungskommando groups. Abwehr units on the Eastern front had already undertaken these new duties. Weapons and explosives had been buried in the districts of upper Silesia, and citizens of that province had received training as partisans. The Nazis were also attempting to install priests as leaders of anti-Communist and anti-Russian activities.

The significance of these activities to the analysts at SHAEF was that blueprints for similar operations on the Western Front were said to exist. The code name for the Abwehr R-Aufgaben operation was a word that Allied officials were to encounter with increasing regularity in the coming months--Wehrwolf.[6]

12th Army Group: Reporting

Counterintelligence officials at 12th Army Group continued to gather and collate reports from lower echelons

5. SHAEF, G2, CIC Rpt and CI Bulletins, Apr 45, L-633,(11), (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.)

6. SHAEF Intelligence Notes, from CI Bulletin No. 3, Hq 15th US Army, 24 Apr 45, Annex "B": "More Notes on Sabotage and Espionage Agencies," in 15th Army Monthly CI Rpt and CI Bulletins, L-633 (11), Apr 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.)

[redacted]

[redacted]

until the end of the ETO Campaign. The Counterintelligence Periodic Report for April discussed the overall security situation as the Allied forces drove deep into Germany.

The main security problem for all Armies was the same: The attempt to control the mass migration of thousands of civilians who were fleeing in the van of the Russian advance to the comparative sanctity of the Western Occupation. CIC detachments throughout the commands faced an extraordinary melange of people--bona fide displaced persons, German soldiers in civilian clothes, German civilians, and legitimate German Prisoners of War en route to the rear. Screening of these masses was accomplished to the greatest possible extent at road blocks and displaced persons centers. But the task of sorting out all counterintelligence personalities from the chaotic jumbles of humanity was beyond fulfillment. CIC agents could hope to detain only the obviously suspect individuals for further interrogation.

The Counterintelligence operatives found that the German population was generally docile and amenable to the orders of military government. This attitude, it was felt, reflected the Germans' bewilderment under the first shock of battle and early occupation. The agents found that the matter of handling displaced persons was at once more immediate and pressing than controls over the civil population. Military traffic was clogged as DP's straggled along the highways to the West, and wholesale looting and violent reprisals against the Germans were committed by the people who had previously been the victims of the Nazi regime.

One factor that assisted CIC during this period was the surprisingly helpful attitude of local authorities and police toward counterintelligence staffs and personnel. In many towns, local police were required to furnish list of persons within the automatic arrest categories. Compliance with this order was customary.

The 12th Army Group was able to report a "generally satisfactory security status among its units, and an improvement in security consciousness was evident among personnel who entered into well-populated areas of Germany.

As the Allied Armies consolidated their gains in Germany, the problem of frontier security along the borders of the conquered country became increasingly important. The 12th Army Group discovered that the chief obstacle to establishing rigid frontier control was the lack of adequate manpower to guard and patrol the frontier and process displaced persons.

[redacted]

[redacted]

By the end of April, this obstacle was somewhat overcome. Corps Frontier Commands were established and Allied Expeditionary Forces personnel were assigned to guard the borders and to establish a Prohibited Frontier Zone through which travel was unauthorized.[7]

21st Army Group: Information and Advice

At 21st Army Group, a Counterintelligence news sheet was prepared, containing latest information on enemy espionage, sabotage and subversive organizations. More important, it indicated the principal counter measures which should be employed by Counterintelligence field units in tracking down the remnants of the German Intelligence Service.

The report stated that German Intelligence Service had built up elaborate and extensive records covering every field of its activities, including the names and histories of all its members, agents and informants. Although many of these records had been destroyed in the path of the Allied advance, many others had been removed to unknown destinations. The importance of these documents was obvious: The German Intelligence Service could be destroyed if its activities and the names of its operatives were exposed at the same time.

Personnel of the Amt III of the Reichssicherheitshauptamt (the Sturm Abteilungen proper) were deemed to be the most dangerous from a counterintelligence standpoint. These were the agents that in all likelihood would be selected for post-war missions to prolong the German hopes of eventual world conquest. Penetration of these agents into Allied staffs and national political parties had to be checked, and all evidence to support or refute rumors of subversive activities had to be closely studied during the counterintelligence drive on the German Intelligence Service.

The 21st Army Group suggested other cautions. The possibility of agents among foreign displaced persons who chose to remain in Germany and obtain posts with Allied organizations as drivers, cooks, interpreters and other miscellaneous workers had to be considered. Investigations would be required of small groups of ex-officers who might band together for secret meetings. Other subjects of surveillance were to be Hitler Youth members (both male and female) and persons

7. The 12th Army Group CI Periodic Rpt Nr 16 for Apr 45, dtd 6 May 45, in Ops Rpts 12th Army Group, L-570, Apr 45, (Unclassified), Departmental Records Branch, AGO, Alexandria, Va.

[redacted]

with close commercial connections in such countries as Spain, Switzerland, South America, and Sweden--places where German agents had already gained substantial footholds.

Another technique 21st Army Group predicted the residual Nazi organizations might employ was the breeding of dissention among the victors. Subversive propaganda, purported to have originated from Allied sources or persons liberated by the Allies, would be circulated to emphasize differences in pay, allowances, and living conditions among Allied troops and to breed resentment in the local population by accusing the Allies of encouraging Communism and Anarachy.

It soon appeared that these warnings of future German Intelligence Service activity were not merely speculation on the part of Army Group officials. The Allied forces intercepted a handbill alleged to have originated from American sources denouncing a supposed speech by Winston Churchill in which the Prime Minister lamented the absence of markets for British trade after the war because of American intervention.

Other leaflets picked up played on the theme of imminent conflict between the Western Allies and the Soviet Union. The documents were always framed to give the impression of having been composed by representatives of an Allied power.

From developments during the early days of May, 21st Army group was able to make one confident but cautious prediction: "There is reason to believe that the Wehrwolf organization has been overtaken by the march of events before it got into its stride." On 6 May, a German broadcast, supposedly by order of Admiral Doenitz, called for the cessation of Wehrwolf activities behind the Anglo-American lines.

In general, the 21st Army Group report indicated that British Field Security units were experiencing many of the same difficulties and successes as their American CIC counterparts. Lack of court evidence was one consistently nagging problem that cropped up in the trials of German civilians for offenses against the military government. A review of recent Field Security arrestees brought up for trial showed in many cases that the prosecution had failed to secure a conviction because the evidence produced by the Field Security Section was either insufficient or inaccurate. Frequently, the only evidence produced was a brief arrest report, and the Field Security was not represented in court to provide further details.

[redacted]

The 21st Army Group reminded the Field Security units that "CI personnel must constantly bear in mind that their eventual aim is to secure the conviction of the suspect for whatever offense he has committed.... If it is not desirable for the Field Security officer or non-commissioned officer to be present personally in court as a witness, he should send a written statement of evidence and a certificate that he is unable for military reasons to attend."[8]

First Army CIC Gives the Alert

On 5 April, CIC agents at First Army completed a Special Counterintelligence target study that forecast to subordinate CIC units what to expect in the closing phase of the battle for Germany. The following courses of action that the enemy intelligence was capable of pursuing were included in the estimate:

1. The installation of stay behind agents with radio transmitters in the larger towns. It was considered that the Nazis most likely would use wireless transmitter operators of French or Belgian nationality.

2. The increased use of stay-behind long-range saboteurs who would have previously prepared hiding places and stores of sabotage equipment at their disposal.

3. The employment of ever increasing numbers of Hitler Jugend agents for both sabotage and espionage missions. These youths in many instances would be well trained and completely equipped for their missions; making them highly suited to use by the German Intelligence Service.

4. Penetration by German agents into prisoner of war and foreign labor camps in order to escape detection, and penetration into Allied intelligence organizations or evacuation to France or Belgium as the first step of a long-range mission.

5. Infiltration of trapped Nazi officials or German intelligence personnel into Wehrmacht or Volkssturm units.

6. The use of short-range line crossing espionage and sabotage agents primarily of German, Luxembourg, French, Belgian or Dutch Nationality.

8. 21st Army Group News Sheet Nr 19, dtd 9 May 45 (SECRET).

2749

[redacted]

[redacted]

7. The use of mines, booby traps, and delayed action bombs in large buildings, particularily possible sites for future headquarters or billets.

8. The beginnings of partisan warfare combined with a program of "black" propaganda designed to arouse the population against the occupying troops and discourage collaboration with military government.[9]

Some Predictions Come True

Almost immediately some of the 301st CIC Detachment's predictions were shown to have been well founded. Reports that Skorzeny was broadcasting appeals to the German people to commit resistance and sabotage acts were received. It was also said that he was training saboteurs to remain in areas overrun by Allied troops and harass the occupation forces.

By the end of April, enemy subversive activities in the First Army area were definitely increasing. Enemy sabotage organizations had recovered from the initial shocks of defeat and had not yet seen the futility of resistance acts. CIC received reports daily that lone jeeps had been ambushed or pirated and US uniforms were frequently pilfered.

Ninth Army troops encountered two groups of Schutz Staffeln men operating radios in the vicinity of Moehne. In both cases, the men were fanatic enough to prefer death to arrest. Hitler Jugend members carried out instructions for incapacitating Allied vehicles and hacking wire lines, and in the early morning of 25 April, two Piper Cub aircraft were sabotaged.[10]

The training of German saboteurs continued even as the Allied troops approached. Reports from the First Army Master Interrogation Center indicated that a sabotage school had been launched at Dessau-Rosslau and had succeeded in graduating about 20 well-equipped teams of one officer and four men between 20 March and 10 April.[11]

9. 1st Army Rpt from Annex 2, G2 Periodic Rpt Nr 193, 82d Abn Div, dtd 8 Apr 45, subj: "Security Notes," in G2 Jnl & File, FUSA, 12 Apr 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.)

10. 1st Army Rpt, from A2 Periodic Rpt Nr 281, Hq IX Tactical Air Cmd, dtd 30 Apr 45, in G2 Jnl & File, FUSA, L-558, dtd 30 Apr 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.)

11. 1st Army Rpt in FUSA G2 Jnl, L- 558, dtd 3 May 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.)

[redacted]

[redacted]

Not all the sabotage efforts were committed on the ground. Former Luftwaffe pilots were captured in April when seven Arado type training planes carrying demolitions and documents were forced down in the First Army area. Subsequent interrogation revealed that the German Air Force men were part of a group of 50 planes and 100 fliers slated to accomplish missions near their home towns.[12]

In addition to the saboteurs, a number of German agents of French and Belgian nationality were captured in the First Army area. They had been dispatched by the German Intelligence Service to their own countries on long-range political espionage missions.[13]

False Expectations

While these espionage and sabotage efforts supported some forecasts in First Army's Counterintelligence estimate, other predictions failed to materialize. Partisan warfare did not break out as feared, and such resistance organizations as the "Wehrwolf" were encountered more in theory than in practice. The rapid advance of the Allied troops had caught most Wehrwolf units in the embryonic stage.[14]

First Army Counterintelligence officials were surprised that Gestapo agents from Cologne had been ordered to remain in the city and help the Wehrmacht. As soldiers, these once-feared Secret Police agents proved dismal failures and the Gestapo agents often ended up in POW cages. CIC agents were instructed to alert POW interrogators to the presence of former Gestapo operatives among their prisoners and to arrange for their transer to counterintelligence control.[15]

[redacted]

[redacted]

As the bitter German fighting gave way to Allied occupation, CIC began to realize its impending problems in the new occupational role. In the city of Leipzig, a "Free Germany" Committee, under the leadership of General Von Seydlitz, was found in operation. This Communist inspired group and the presence of Russian agents were indicative of Soviet intentions to disturb the Allied occupation before it had fairly begun. First Army CIC noted that "it can be assumed that intelligence from any 'Free Germany' Committee or Russian agents will be transmitted only to the Russians."[16]

Arrest Reports, First Army Format

On 30 April, the First Army G2, Colonel B. A. Dickson, published instructions for the CIC Detachments at Corps and Division level to follow when filling out Arrest Reports, SHAEF, Form Number Seven. Throughout the ETO campaign, the lack of proper arrest records had received official notice upon numerous occasions, but these instructions constitute the first comprehensive directive found in CIC records.

The Detachments were advised that these reports were to be completed fully by typewriter or legibly handwritten or hand-printed in ink. Pencil was taboo. Except in the case of POW each report was to concern a single individual. The full unit designation, not the telephone code name, was requested, and agents were told to sign all copies of the report. The arrestee's "Address of Last Residence," if known, and the "Place of Arrest"were to be stated clearly, using coordinates where necessary.

Certain requisites were established for filling in the item, "Military or Civil Authority Taking Custody of the Prisoner". If the arresting Detachment considered the suspect worthy of further interrogation or if the suspect was a security threat not covered by mandatory internment policies or if the arrestee was obviously of interest to other agencies at Army or higher echelons, the entry after the item was to read: "Master Interrogation Center."

If an individual had been arrested on the basis of mandatory internment policies, the "Reason for Arrest" topic was to include the arrestee's title, and the item involving custody was to be "First Army Internment Camp."

The status of the case was to be specified in the space allotted by the phrase which was most appropriate, such as

16. 15th Army CI Bulletin Nr 3, 24 Apr 45, in 15th Army Monthly CI Rpt and CI Bulletins, L-633,(11), Apr 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va).

[redacted]

[redacted]

"Case Closed," or "Investigation Continues." Additional notations, either "Investigation Report Follows" or "No Further Investigation," were to be made in cases where the Report of Investigation was not attached to the arrest document.

The three prescribed copies of the Arrest Report were to be carried by the Officer or non-commissioned officer in charge of the escort guard and turned over to the Military Police representative at the point of delivery and checked against the group of arrestees. No civilian arrestee was to be sent rearward without the accompanying Arrest Report.17

"Vehme" Means Revenge

On the night of 25 March, the Allied-appointed Burgermeister of Aachen was murdered. According to an account compiled from the remarks of witnesses, three German soldiers, dressed in jumper suits with zippers from crotch to neck, but wearing no headdress, had committed the killing. The soldiers, claiming to have been forced down on a return flight over Brussels, had appealed to the Burgermeister for aid. When he refused they shot him.

This was the story of witnesses. CIC agents of the 203d Detachment read more into the murder. It seemed plausible that this assassination was the first measure in an organized plan to create disorder and confusion among the civilians in Allied occupied territory, and that Otto Skorzeny, the prime promoter of aggressive activity in the German Intelligence Service, was behind the plan.

An organization known as Vehme (Revenge) was rumored to exist. Its membership was parceled into closely knit groups of from three to five persons whose aim was to kill Allied appointed officials and other Germans who chose to cooperate with the Allied forces. The assassination in Aachen possessed all the qualifications of a Skorzeny-directed mission. III Corps intelligence remained skeptical of the popular version of the assassination, but no evidence was found to disprove or confirm it.18

III Corps CIC Makes A Quick Catch

17. 1st Army G2 Ltr to Corps and Div G2s, subj: "Arrest Procedure," dtd 30 Apr 45 in 87th CIC Det Correspondence File, 6/44- 5/45 (Unclassified), Kansas City Records Center BX 25095.
18. III Corps G2 Periodic Rpt Nr 106, Annex 4, subj: "Revenge Warfare," dtd 27 Mar 45, in III Corps Opns Rpts (29) L-595 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.)

[redacted]

[redacted]

On 5 April, III Corps moved its Command Post to a new location. A few hours after this shift, agents of the 203rd CIC Detachment, operating with Corps Military Police, captured twelve Wehrmacht deserters in civilian clothes and five Nazi Party members who were within the automatic arrest category.

This hasty roundup indicated more than the fact that CIC was wideawake; 203rd CIC estimated that about 50 per cent of the male civilians of military age who were traveling along highways or living in occupied communities would prove to be enemy soldiers. Three distinct types could be discerned among these pseudo-civilians: bonafide deserters attempting to reach their homes; isolated troops trying to get back to an assembly area within their own lines, and agents on sabotage or espionage missions.

Some of the former German soldiers turned themselves in to the Allied authorities. One uniformed member of the Wehrmacht who appeared at the 203rd CIC Detachment was found to have in his possession both a Soldbuch and a Wehrpass. Since the Wehrpass was issued only to civilians or soldiers who had reverted to civilian status, the man was questioned closely by the CIC agents.

The POW revealed that the officers of two companies, including his own, had given their men Wehrpasses, and ordered them to infiltrate to Hannover. The plan required them to change to civilian garb at the first opportunity so that, with their identity papers, they could pass as legitimate civilians. When the CIC agents asked why he had surrendered, the prisoner explained that after walking for three days, Hannover still seemed a long way off.

There were still other problems involving POW and their identity documents. Some deserters in civilian clothing had to be stripped completely before their Soldbuchs were located hidden in their socks.[19] One member of a Schutz Staffeln Jagdverbande unit who surrendered to III Corps troops revealed that German sabotage units had received American uniforms prior to being sent on missions. Each of these units was also supposed to have Thompson sub-machine guns, carbines and M1 Rifles and five US Jeeps. Posing as American-equipped

[redacted]

French and Dutch soldiers who had been separated from their organizations, they were to operate behind Allied lines committing espionage and sabotage.[20]

Phony Passes

Skepticism was an attitude that CIC agents continually had to develop among American troops. The average GI was a frequent "sucker" for Germans who played upon his good nature and credulity. On 9 April, CIC Agents with the 203rd Detachment found two German soldiers dressed in civilian clothing. They presented "passes" that had been written on scraps of notebook paper as follows:

Johann Beckers
is allowed to go to
Freckenhorst

April 4, 1945
Mil. Gov.
Security Guard

Upon interrogation, the two men claimed that the passes were received from an American soldier at Burg; their destination, Freckenhorst, was about 150 kilometers north of this town. The prisoners admitted that the passes had aided them several times in their journey before they were apprehended by the 203rd CIC. How often similar false documentation had helped Germans past Allied scrutiny could not be determined, but CIC reiterated a familiar warning:

"The attention of all guards should again be directed toward the security threat presented by these civilian-garbed members of the Wehrmacht. No passes or permits should be accepted as valid unless the pass form is known to the guards. Slips of paper with unsigned instructions in English or alleged passes in foreign languages should not be accepted at face value---turn all questionable or suspicious individuals over to the nearest CIC Detachment."[21]

[redacted]

Phony Discharges

The false identity documents being carried by German soldiers were not limited to passes. On 16 April, Agents of the 203rd Detachment apprehended 43 former members of the Wehrmacht. Among them was a talkative Prisoner of War who told CIC of a discharge procedure that had been implemented by some German officers.

Several days prior to his capture, the POW, Walter Jost, had been ordered to escort five sick French Prisoners of War from Dusseldorf to Lauenau. On arrival at the destination, Jost learned from other German soldiers about a TODT organization office that was offering "discharges" to members of beaten and disorganized German units.

The system was quite simple in operation. Any German soldier or TODT worker wearing a uniform could go before one of several officers who issued and signed a discharge paper on the spot. Few questions were asked; no identification was required. The heading of the particular unit to which the individual belonged topped the document. These discharges were prepared by the hundreds on typewriters, and lacked official certification. The explanation for the missing stamp mark was that the certifying equipment had been destroyed by "enemy action."

How effective were these spurious papers? Jost, like the other recipients, had been ordered to proceed to his home and report to the local police chief to aid in home defense. After burning his Soldbuch and uniform, Jost had donned civilian clothes and started on the route home using his counterfeit discharge as identification when stopped or questioned. He had managed to travel more than 150 kilometers before the Agents of the 203rd CIC halted his progress.[22]

The Danger of Pseudo-Civilian

The counterintelligence officials' principal concern over the now-soldier, now-civilian routine was that espionage and sabotage agents in mufti could practice the same deceptions as the former Wehrmacht troopers. A POW report received by III Corps CIC from the Eifel area confirmed this fear.

The captured German soldier stated that several days

22. III Corps G2 Information Bulletin #43, dtd 16 Apr 45 in FUSA G2 Jnl & File - dtd 17 Apr 45 (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.)

[redacted]

earlier his friend, a Wehrmacht operative of the German Intelligence Service, had become drunk and spelled out the details of an undercover mission that was to be launched in the vicinity of Eitorf and Sieburg. Several teams of agents equipped with a radio set were to perform wireless transmitter operations within the Allied-held territory. All agents would, of course, discard their uniforms to appear as natives of the Eifel area. CIC's interest in these and other German Intelligence Service operatives made the need for close scrutiny of all "civilians" essential.[23]

V Corps CIC: Few Men, Much to Do

During the closing campaign, the cities of Leipzig and Kassel both fell within the V Corps zone of action. The 205th CIC Detachment had to be split into sub-units in order to handle the large counterintelligence task posed by these cities. In addition to the usual CIC routine of screening city officials and police and apprehending automatic arrestees and Black List personalities, the Agents had to inspect and arrange guards for the numerous important intelligence targets that ranged from manufacturing concerns to Gestapo Headquarters.[24]

Rear Echelon Saboteurs

While V Corps was operating in the city of Hof, American soldiers became suspicious of a man and four boys wheeling a push cart. Examination proved the suspicions; the cart was filled with sabotage materials. In the confusion attendant on this discovery, the man was shot and killed, and a search of his body revealed Schutz Staffeln papers. Under interrogation the boys quickly admitted that they were members of a group of 30 Germans who remained in rear areas with the purpose of committing acts of sabotage. The group was divided into six sections, similar to the one CIC had intercepted, of one man and five youths. CIC agents concluded that the modus operandi of all these sections might be identical and warned guards to watch for carts pushed by

[redacted]

seeming refugees. The term "rear area" could sound deceptively serene; it was in such areas that counter-intelligence work was often the most demanding.[25]

VII Corps CIC Detachment: Cologne, Then Move On

Agents of the 207th CIC Detachment continued their work in Cologne for a few days after the offensive across the Rhine had begun, tying up loose ends in so far as was possible for the succeeding CIC Detachment. Then they, too, moved to the Ruhr battle and later to the Harz Mountain area nearer the Elbe and Mulde Rivers.

Cologne was the scene of the largest scale CIC operation so far encountered in Germany. Among the problems was the disposition of thousands of Displaced Persons.

These people, mostly forced laborers, were left behind by the Germans when they evacuated. Ten thousand of them were handled by Military Government and CIC in Cologne alone.

The military government detachments with the 104th Infantry Division and the 3d Armored Division had set up collection areas, and the 207th CIC Detachment sent a team of agents to screen refugees sent to these points. Because of the preponderance of displaced persons and the scarcity of CIC personnel, only a superficial screening was planned, which called for no attempt to separate suspects from the pack unless they were easily detectable. CIC evidently favored 3d Armored's collection procedure: As soon as a truckful of displaced persons was collected, they were driven to a large center. The 104th used two centers, and often left it up to the displaced persons themselves to find their way to one of them. Eventually, however, all displaced persons were moved into the single center run by the 3d Armored Military Government. Few actual CIC investigations were accomplished as a result of this screening. Several denunciations were checked, but none proved positive.[26]

[redacted]

[redacted]

On 28 March, based on a denunciation report, a sixteen-year-old youth who was living with his girl friend was arrested. He admitted to having been trained in sabotage at a school run by the Germans for Hitler Jugend members and to having been given a mission---the usual---to sabotage targets of opportunity.

This young man lead CIC Agent Frank A. Wolff to the second member of the three-man team, who was working in the garden in his parents' home. He had buried the team's supplies in the same garden, and dug them up for the agent. Neither boy knew where the third member of the team was.

Under interrogation, the boys did not appear to be thoroughly indocrinated with Nazism, nor did they seem to be interested in carrying out the mission the Germans had assigned them. The fact that they had thrown some of their equipment in a manure pit, rendering it useless, substantiated this point of view.

Agent Wolff, moving out with his detachment, did not arrest the youths; and, in his report, suggested clemency for the third member of the team on the part of the succeeding agent handling the case.[27]

A man who had been a petty informer for the Gestapo had accepted a mission for the Americans after his arrest by the 104th CIC Detachment. On the 28th, the man set out to cross the Rhine but soon returned, complaining that the currents of the river were too strong for one man in a rubber boat to navigate. Special Agent Fenton Moran of the 207th CIC Detachment interrogated him and because of his disreputable background and his connection with the Gestapo, sent him to First US Army for internment as a security threat.[28]

Enemy Agents in Disguise

VII Corps CIC had a problem in common with other CIC units in Germany: Ferreting out enemy agents who had assumed varied disguises. In the course of VII Corps' rapid advance, hordes of non-Germanic oppressed laborers were overrun.

27. 207th CIC Det Memo for OIC, dtd 28 Mar 45, subj: "Hitler Youth, in 207th CIC Det Log Feb 45-Mar 45 (UNCLASSIFIED), (Kansas City Records Center, BX 25097).

[redacted]

[redacted]

French and Belgian Displaced Persons were most in evidence, but there were also large groups of Russians and Poles. The CIC Agents noted a dangerous tendency toward indulgence and blind acceptance of these individuals by the American troops. Soldiers accepted gifts of wine from the ebullient liberatees and eagerly entered into conversations with them.

CIC had good reason for urging caution before fraternization. Within a single week, seven German espionage agents were plucked out of the masses of displaced persons, and all indications pointed to the increasing use of this convenient cover.

The surest prevention of this espionage was to isolate the displaced persons from military installations and contact with American troops, and CIC suggested the following rules of thumb:

1. "Keep displaced persons away from your installations.

2. "Whenever possible, corral those wandering about and segregate them under guard to get them to the nearest Military Government camp.

3. Consider every one of these people a potential German espionage agent. Their true status will be determined by trained personnel at the rear following their evacuation.

4. "Above all, don't indulge in soft assumptions. Better to extend the good man's oppression another day than to ease the machinations of an enemy agent."[29]

VII Corps CIC Agents soon found that their suspicions of civilians had to be almost universal. Reliable informants stated that members of the Nazi underground movement were preparing to use "Red Cross" armbands as entree to occupied areas. The CIC Agents recommended that all civilians in the Corps zone be checked thoroughly for their connections with Red Cross activity. Even if they proved bona fide Red Cross workers, they would have to be kept under surveillance.[30]

5th CIC Detachment: Frankfurt and the Ruhr

29. III Corps G2 Periodic Report Nr 113, dtd 3 Apr 45, in FUSA G2 Jnl, L-558, 3-4 Apr 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va).

[redacted]

Agents of the 5th CIC Detachment spent the first week of April in Frankfurt collecting individuals of counter-intelligence interest. The Division's commitment against the German forces in the Ruhr during the middle of the month brought the agents sharply against a major problem: the hordes of German soldiers with recent discharge papers.

In the frantic last days of the Ruhr pocket, Wehrmacht members tried to obtain discharges as a means of evading capture, and the area was flooded with recipients of these wholesale releases from active duty. 5th CIC made it a policy to treat recently-discharged soldiers as POW, and announced publicly that all German soldiers discharged after 17 March must report to the Allied authorities.[31]

9th Infantry Division: Diversity

As Agents of the 9th CIC Detachment entered German towns in April, they found that the civilian population often resembled an international congress, so diverse were the nationalities present. In one town, all men of military age were brought to the Burgermeister's office for CIC screening. Of a total of 455 men questioned, there were 215 Germans, 100 Russians, 80 Serbians, 30 Poles, 25 Italians, and 5 Frenchmen. Most of these people were dealt with routinely, and POW found in civilian clothes were sent through prisoner of war channels. But among the number were eight displaced persons from Holland with suspicious backgrounds and three counterintelligence targets. These were held for further interrogation at the First Army Interrogation Center. The diverse national backgrounds of the men CIC had screened in this single town reflected the upheavals and migrations which were wrought throughout Europe during the War.[32]

The Man Called "B"

Among the persons that CIC had to investigate during the April drive was a man identified in reports as "B." Charged with violating the Military Government Weapon Proclamation, "B" was found to have further claim to CIC attention. The investigation disclosed the "B" had been employed for three years by a charcoal factory in Zueschen, where his principal

[redacted]

duties were to beat the Russian labor and to use any other means of coercion that would promote employee efficiency. One of "B's" favorite devices was to harass the foreign laborers by waving a pistol at them.

When the American troops occupied the towns, all German civilians were immediately instructed to surrender any weapons they possessed to the Burgermeister. "B" complied.. ..to a degree. He turned in two rifles, but withheld his pistol. When questioned about this violation, "B" explained that he had kept the pistol as protection against the Russian workers. The story of "B" was not uncommon. There were many such petty war criminals among the towns that CIC agents entered in Germany.[33]

CIC in Action: The Town of Koetchen

In the closing days of the ETO campaign, CIC agents with the 9th CIC Detachment entered and covered towns rapidly. The targets were similar to those exploited in hundreds of other towns, but experience had quickened and refined CIC techniques. The Agent Report submitted on the town of Koetchen gave a typical picture of the problems CIC faced and the work they accomplished.

In general, the CIC Agents found Koetchen and vicinity quiet. No organized subversive activity was observed, and the Agents concentrated on apprehending party officials, members of the Schutz Staffeln and German soldiers in hiding.

The civil situation was not as serene. The CIC agents discovered that the local Junkers plant had been looted and the tools stolen. Investigation revealed that the mayor had refused to prosecute the offenders, ostensibly to "save the face" of his fellow citizens, but actually for a more personal reason: some of his close friends had participated in the raid. The looters had been due money from the factory, and had decided to square their accounts with the management by paying themselves in tools and equipment. The raid and the civil adminstrations failure to act were submitted by CIC as "evidence of city-wide graft headed by the Mayor." Interviews with other officials of Koetchen confirmed the CIC analysis.

33. VII Corps G2 Periodic Rpt #97, Incl 4, subj: "Security," dtd 7 Apr 45 (source, 9th Inf Div) in 4th Inf Div G2 Jnl & File, 11-15 Apr 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va).

[redacted]

[redacted]

CIC also discovered a rather widespread black market in unpurified alcohol. Several families were found to be in possession of as much as five gallons of the deadly fluid which apparently had been intended for use as a V2 propellant. The civilians evidently had considered manufacturing and distilling a homemade liquor from the alcohol which could be sold or bartered in shops, stores or other homes in exchange for food and scarce commodities. CIC directed confiscation of the alcohol.

Among the political notes that CIC compiled was the report of a Communist movement which was under way in Koetchen. The Agents were unable to gather any positive information to support the rumor, and no overt party activity was observed.[34]

The 29th CIC Detachment: Rear Area Security and Military Government

The 29th Infantry Division, for most of this period, continued on its mission: "Rear Area Security and Military Government." The title of the mission is misleading since a static situation is indicated by it. As a matter of fact, however, the Division as a whole moved ninety miles into central Germany between the end of March and 19 April, and its 116th Regiment actively participated in the reduction of the Ruhr while other units, after taking part in the encirclement of that industrial area, raced on to the Elbe and saw action in the Klotze Forest skirmishes.

Emphasis was placed on rear area security because of the streams of displaced persons, freed Allied prisoners of war, refugees, and German soldiers in uniform and in civilian clothes in Ninth US Army area. To control this human flood, checkpoints were formed at each road junction in each unit's area, where all persons were stopped and held until transportation arrived to take them to central collection centers. Here they were segregated by nationalities, Germans being given a brief interrogation to determine their status. Suspicious persons were held for CIC interrogation. Freed Allied servicemen were placed in well-provisioned camps. Displaced person centers were also adequately supplied with necessities.

In the month from 19 March to 19 April, the division's

34. 9th Inf Div Agent Rpt on Koetchen, VII Corps G2 Periodic Rpt Nr 129, dtd 9 May 45, in FUSA G2 Jnl, 10 May 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va).

[redacted]

[redacted]

camps handled the following totals of persons in each category: 72,041 displaced persons; 40,442 freed Allied prisoners; and 845 German soldiers.

CIC's Part in the Mission

CIC Agents, augmented by Military Intelligence Interpreter personnel worked in teams with division artillery, division headquarters, and each of the three regiments. During this period 29th CIC Detachment agents introduced themselves to burgermeisters and chiefs of police as "The American Gestapo," and told these officials that they would be held responsible for the compliance of the citizens with military government and CIC decrees. "Under such an understanding," wrote Captain Ellis O. Mayfield, detachment commanding officer, "there has been complete deference to the CIC by all officials."

The division's area of responsibility for the period was a large one, shaped like an isosceles triangle with the base of forty miles running between the vicinity of Osnabruck and an area five miles southwest of Gutersloh, on a northeast southwest axis. The apex of the triangle, about fifty miles from the base, was located five miles NNE of Gladbeck.[35]

Detachment commander and division counterintelligence officer Captain Mayfield, who had previously voiced his discontent with military government procedures during the Battle of the Bulge in the German town of Alsdorf, again found cause for a multiplicity of complaints which he voiced in a memorandum to the division G2 on 14 April under the subject of "Problems encountered by CIC in the 'Security and Military Government Phase of Operations." The memorandum purported to be a consolidation of the comments from the Detachment's "five CIC operational teams...."

The main complaint centered around the number of military government personnel compared to CIC Agents, especially in view of the amount of effort the former expected the latter to expend. Captain Mayfield charged that the detachment was "not physically capable of carrying out the counterintelligence mission in an area 200 X 50 kilometers if they are forced to do a considerable share of the work of the 14 military government detachments and the military government section

35. 29th CIC Det Periodical Rpt from 19 Mar to 19 Apr 45, dtd 20 Apr 45, in 29th CIC Det Correspondence File Jun 44-Nov 45 (CONFIDENTIAL), (Kansas City Records Center BX 25094).

[redacted]

which are assigned to that same area." He cited many duties which together comprised "approximately fifty percent of all work," but either were not CIC responsibilities or were "compartively minor duties which could be handled by another agency." They included "(1) the establishment of civilian governments and the investigation of the persons placed in office; (2) the investigation of persons suspected of being deserters; and (3) the investigations of denouncement based on minor war atrocities, such as the beating of Allied Nationals."

In defense of this point of view, the CIC detachment commander outlined some incidents under each category which revealed the wastefulness of these types of investigations.

The captain stated, in connection with the first item, that CIC had "been asked or directed to find and place in office suitable officials for the local administration." He cited an instance when two agents and two interpreters had spent a full day with military government officers tracking down town officials. Only two prospects who could be cleared were found. What really made CIC's position difficult was that it took "the better part of a day for CIC to throw all the Nazis out of the office...." when military government officers established town adminstrations on their own. Captain Mayfield charged that military government, despite existing procedures and the continual denials of clearances for Nazis by CIC, persisted in submitting fragebogens of persons they wanted cleared when, on the first page of that document, the individual had admitted Nazi party membership.

Captain Mayfield stated that there were instances where military government officers entered towns, collected "all of the good pistols and cameras," and "left without any definite word to anyone about the town's problems."

After one such instance the Captain wrote that CIC, without any request from Military Government, undertook a house-cleaning in which they recommended the removal of the Burgermeister and twenty-four police and recommended suitable men for the jobs. The military government officer, after confiscating local arms, radios, and cameras, had left them with the Nazi Burgermeister, but had failed to give him any instructions. When CIC Agents arrived they discovered that the Burgermeister had not only fired two non-Nazis from the police force, but still continued to show motion pictures twice a day in his theater.

Captain Mayfield pointed out to the division G2 that

military government was "responsible for the establishment of a non-Nazi government" and that "all that is required of the CIC by the directives is that they check the appointees against the counterintelligence blacklists."

Captain Mayfield recognized the detection of German soldiers in civilian clothes as a CIC function, but he thought that Intelligence POW teams, after a brief orientation course in various German identity documents, would be able to screen out about fifty percent of the cases which were being sent to CIC. "The great majority," wrote the Detachment Commander, "of those being referred to our offices have complete civilian identity documents which are in proper order and have legitimate reasons for not being in the army." He indicated that seventy-five percent of a group of 121 civilians sent to CIC between 13 April and 14 April by one battalion for screening were considered suspicious because they carried "Wehrpasses"--the one authentic proof of civilian status. Nineteen of the group were sent all the way back to the division PW enclosure, although thirteen had complete documentation in their possession. Three were boys under the draft age. One admitted he was a deserter. Only real suspects stopped at the preliminary screen should have come under CIC investigation, he pointed out.

The Denounced and the Denouncers

Ninety-nine per cent of the reports concerning alleged Gestapo and Schutz Staffeln personalities were found to have emanated from Russians, according to the five CIC teams; and, in the agents opinions, twenty-five per cent of their time was spent running down these Russians stories with the following result: "Not one item of counterintelligence interest was developed from any investigation based on such reports." Most of the denouncements were the results of personal prejudices, language difficulties, or the wholesale "get-even" attitude of the Russian displaced persons.

Captain Mayfield suggested that all unit commanders be advised to listen to the Russians' stories carefully, to determine their reasonableness. Those with no firm basis to their stories were to be assured that the matter would be investigated and to be told to return to their camp.

Aside from these weaknesses in the mission of the Detachment, Captain Mayfield reported that on the whole "CIC is well received, if not well understood."[36]

36. 29th CIC Det, Memo for G2 29th Inf Div, dtd 14 Apr 45 in 29th CIC Det Correspondence File Jun 44-Sep 45 (UNCLASSIFIED), (Kansas City Records Center BX 25094).

Investigations of CIC Value

Many of the investigations undertaken by teams of the 29th CIC Detachment in the Ruhr vicinity proved of some counterintelligence value. One, completed in Muenchen-Gladbach before the Division crossed the Rhine, indicated that the Germans could not count too heavily on their Hitler Jugend members, no matter how well trained. In this case Special Agents Gordon M. Anderson and Emanuel Braude arrested and interrogated a leader in the local Hitler Jugend organization. Though he and twelve others had been ordered to stay behind and fight off American tanks with bazookas, the Hitler Jugend leader had not carried out the order because his mother had forbidden him. The young man informed the CIC Agents of other Hitler Jugend personnel in the area, and, because he had a knowledge of German flame-throwing tanks, the agents recommended that he be interrogated at a higher level by CIC and Military Intelligence personnel.[37]

Atrocity

1st Lt Lynn E. Neunechwander and Special Agent Sam D. Beall investigated an atrocity case concerning the crew of an American bomber which had been shot down in August 1944 near the community of Hohenhausen-Eichholz, twenty-five miles northeast of Gutersloh, Germany. Of the nine crew members, two failed to get out of the plane and burned with it, and two were carried to neighboring towns by their parachutes where they were captured by the German army. Investigation revealed that five came down in the vicinity of the crash, were captured and turned over to local police. Two officers of the local police took the Americans to a farmhouse, where they left three under guard of the farmer and a chimneysweep while they took the other two to a nearby field and shot them in the back. Returning to the farmhouse, the leading officer announced that the remaining three Americans were also to be shot. When his comrade in the first killing refused to take another life, his place was taken by the chimneysweep. The police chief, the farmer and the chimneysweep had the American airmen turn around, and from very close range, shot them in the back of the head.

The Americans had not been tried. They had not tried to escape. They had not pleaded for their lives. They had

37. 29th CIC Det Memo for OIC, dtd 30 Mar 45, subj: "Gorgus, Frederick," in 29th CIC Det Correspondence File Record of Arrests Jun 44-May 45 (UNCLASSIFIED), (Kansas City Records Center BX 25094).

[redacted]

said nothing. The five murdered airmen and the charred bodies of the two who had crashed with the plane were placed in a common grave.

Agents were able to arrest two of the killers and obtain their confessions as well as descriptions and photographs of the other two killers, and names and addresses of witnesses to the crime and the burial.

The documentary evidence and three witnesses were forwarded to the Judge Advocate of Headquarters, 29th Infantry Division, by Captain Mayfield; the two prisoners were sent through POW channels to the Ninth US Army Civilian Interrogation Center.[38]

Stay-Behind Ring

An espionage ring which the Germans had organized in October 1944 to operate in case of occupation by Allied troops was uncovered by Captain Mayfield and Special Agent Emanuel Braude on 15 April. The ring, organized by Front Aufklarungs Kommande 306 and taken over by an Abwehr Stelle in January 1945, was to operate in an area about twenty miles deep covering the towns Haltern, Dulmen, Lette, Darup and Coesfeld, over which the headquarters team of the 29th CIC Detachment had jurisdiction.

The five towns, mapped, are in a zig-zagging line running overall in a south-north direction. Agents in the towns were to serve primarily as channels of communication, with the "letter-drop" as the chief means of transmission of information until the message reached a well-camouflaged wireless transmitter plant in the woods near Munster. A secondary method of transmission was introduced allegedly with the addition of a pigeon loft in the vicinity of Lette, the intermediate station in the chain about five miles south of Coesfeld. In January, Havixbeck was believed to have been added as the territory for another agent. Other agents were established at Geschner, west of Coesfeld, and Merfeld, south of Lette.

The CIC Agents rounded up one agent at Coesfeld, one at

38. 29th Inf Div, ltr and incls, dtd 17 Apr 45, from Div CI officer to JA, 29th Inf Div, subj: "War Crime and Atrocity Rpts," in 29th CIC Det Correspondence File Record of Arrests, Jun 44-May 45, Doc #131 (UNCLASSIFIED), (Kansas City Records Center, Box 25094).

[redacted]

2768

Dulmen, two at Lette, one at Merfeld, and one at Darup.

At the time of the memorandum to the CIC on this case, Captain Mayfield and Special Agent Braude had not yet had an opportunity to interrogate the agent from Darup, described as a youth with a crippled left hand. The five others had confessed their association with the ring, but each had claimed their recruitment had been largely involuntary.

The agent from Coesfeld, a 65 year-old pharmacist, said he took the job because he wanted to escape evacuation. He claimed not to have been a member of the Nazi party.

The agent from Dulmen, though admitting party membership, claimed to be an anti-Nazi who had not intended to carry out his orders but had consented to serve the ring only to escape evacuation and service in the Volkssturm.

One of the two agents captured in Lette, a farmer, claimed to have enlisted in the ring to be able to stay on his farm. He also professed no intention of carrying out his orders.

His partner, a church organist and pigeon fancier, had been recruited to take care of the ring's pigeons as well as serve as an agent, but claimed to have changed his mind at a later date and to have notified the Front's commander of his new dicision. He had received no reply to his proposal of separation.

The Merfeld agent, the town's burgermeister-schoolteacher-farmer, also allegedly joined to prevent his evacuation and to escape serving with the Volkssturm. According to the arrestee, he was "violently anti-Nazi," and had been turned down for the job of espionage agent by the Kreisleiter. He sought to prove his claim by being cooperative, hoping as a result to curry favor with the Allies.

Documents located in the search of the headquarters of the group were turned over to Special Counterintelligence, Ninth Army. None of the agents were arrested. They were merely told that they would be kept under surveillance. Captain Mayfield noted the loose way the group was organized, and expressed the opinion that another ring may have existed in the same area.[39]

[redacted]

Logistics

Deterioration of the detachment's vehicles created a problem. Tires, in particular, were scare, and other deficiencies were not correctable due to a general lack of spare parts. The division as a whole was not awarded a priority, since it was not officially in combat. CIC's role, of course, had increased in scope and geographical area; yet there was no provision for it to replace or repair vehicles or equipment.40

The 35th CIC Detachment: Brushing the Surface

Following a rest in Kaldenkirchen, the 35th CIC Detachment, with the 35th Infantry Division, as part of Ninth Army's XVI Corps, attacked across the Rhine on 26 March and participated in the Ruhr encounters until 12 April.

The Division's counterintelligence report for the period of activity in the Ruhr notes, "The volume of counterintelligence business has been so great as to prohibit a report in detail." As a result, only a general picture of the activities of the detachment may be given.

In the Ruhr pocket it was especially apparent that CIC could only "brush the surface" of counterintelligence problems. There was an enormous increase in the number of automatic arrestees, and security control of civilians was particularly difficult. In the first place, ordinary troops were unable to determine whether a civilian was a security threat or even whether his actions were suspicious. Secondly, military government was unable to quickly control the movement and activities of the populace.

Believing that most civilians would comply with rules if they were informed, CIC indicated that the best way to control German civilians was to post military government proclamations immediately. Traffic between towns could also be reduced by definitive proclamations and by training troops in traffic control and using them for that purpose when possible. Many cases came up during the period which showed the extreme laxity of security resulting from the swiftly changing lines of battle. In one instance a German soldier in civilian clothes traveled unhindered from Paderborn to Buer--about sixty-five miles--part of the way as the guest of two

40. 29th CIC Det, Memo for G2 29th Inf Div, dtd 14 Apr 45 in 29th CIC Det Correspondence File Jun 44-Sep 45 (UNCLASSIFIED), (Kansas City Records Center, 25094).

[redacted]

American soldiers in a jeep. They had satisfied themselves of his integrity after a cursory glance at his driver's license. The same license got him past a guard post along the way. He was arrested in Buer. The case was not an isolated instance, but was repeated with variations many times.

This Detachment also reported that the Communists, though they were especially active in the Ruhr in trying to assist CIC, appeared largely unorganized and tended to confuse CIC by concentrating on "small fry" (i.e. prison guards, or just any Nazi Party member).

After finishing in the Ruhr, the detachment moved with the division on toward the Elbe, under XIII Corps.[41]

78th CIC Detachment: How-to-Do-It

During April, agencies of the 78th CIC Detachment arrested more than 350 people deemed security threats in addition to about 2,500 Wehrmacht members posing as civilians. The bulk of individuals in the security threat classification were former officials of the Nazi Party and other para-military organizations whose rank placed them in automatic arrest categories. These Nazi leaders were not always easy to locate and apprehend.

On 4 April, the 78th CIC Detachment heard from an informant who claimed that an Ortsgruppenleiter was hiding in the town of Asbach. Agent Emil H. Stracke, a member of the CIC team operating in Obereip, several miles from Asbach, was assigned to track down the man, a mission which was made doubly difficult by the tactical situation and the distance he would have to travel.

Upon arriving in Asbach, Stracke contacted several civilians and soon learned that the report was accurate. There had been an Ortsgruppenleiter in the vicinity, named Heinrich Zimmermann. Zimmermann could not be located at his former residence, and the citizens concluded that he had fled or gone into hiding. But, pursuing his inquiry, Agent Stracke learned that Zimmermann had been a baker by trade and that his brother also lived in Asbach.

These two facts provided the clue Stracke needed. He located the brother, who instantly disclaimed any knowledge of

[redacted]

[redacted]

where Zimmermann could be found. Playing a hunch, Stracke stated that he was sorry to hear this news, since he represented the Military Government and was looking for a baker to hire. He had hoped that Zimmermann would have been a suitable choice. This ruse activated the brother's sluggish memory. Now he just happened to remember where Zimmermann was located, and volunteered to accompany Stracke to the place. Within a few minutes, Agent Stracke had his man.[42]

Wire Crew Lends CIC An Assist

On 8 April, in the town of Wissen, the 78th CIC investigated a case which reflected both the need for and the result of security indoctrination. A wire crew reported that, while checking a line, they had overheard what they thought were the voices of American soldiers in conversation with German civilians. Captain Neil M. Ruge, the Detachment Commander, and 2d Lieutenant Arthur E. Anderson did not hesitate after receiving the information. They proceeded to the indicated house and stealthily crept near the door where they were able to overhear the conversation taking place in the house. Almost as if reading from a script for CIC's benefit, the soldiers inside committed one security violation after another. They told their German hosts the name of the unit to which they were assigned, the names of their officers, details of the battles they had fought and other choice bits of military information. When the CIC Agents had heard enough, they called for a guard to be posted around the house to prevent any escapes. Then they entered.

Inside the home, several soldiers were found drinking with a German family. The CIC men obtained the soldiers' names and ordered them to report back to their unit. Before leaving the house, the Agents warned the civilians not to repeat what they had heard. CIC work in the case was completed with the Agent's Report to the violators' unit, which was used in the Special Court Martial proceedings against the men.[43]

The Little Foxes

The 78th CIC Detachment spent a busy day on 28 April arresting boys who had been detailed to accomplish men's work.

42. 78th CIC Det Monthly Information Report, dtd 1 May 45 (CONFIDENTIAL), (Staff and Faculty Library).
43. 78th CIC Det Monthly Information Report, dtd 1 May 45 (CONFIDENTIAL), (Staff and Faculty Library).

[redacted]

[redacted]

Seven youths were apprehended at Alsfeld where they had gathered to plot destruction of Allied communication lines and to attack American vehicles in order to obtain arms and transportation. The boys, ranging in age from 15 to 18 years, admitted to membership in the Wehrwolf and the Hitler Jugend. They wore Nazi badges under the lapels of their jackets, and the CIC agents found a quantity of small arms, dynamite and 9 mm ammunition in their possession.

The same day, four German boys, alleged to be Wehrwolf members, were arrested on the basis of information received by CIC personnel at Giessen. The boys had only one pistol but many plans. They had intended to ambush an Army jeep, destroy a bridge in the vicinity of Dorlar, a railroad bridge between Lollar and Wetzlar, and an ammunition train. Although their plans were big, the youths still needed to procure the demolition material, arms and ammunition.

Although these young Wehrwolves had been caught before the act, the threat that they and their compatriots posed for the Allied troops was not an idle one. The main thing that these fanatic adolescents were lacking was organization. CIC had to make increasingly sure that other little foxes could not ban together.44

Take-Over Weaknesses Discussed

Weaknesses in the take-over system which had plagued CIC throughout the ETO campaign and a possible means for overcoming them were discussed by Captain Ruge of the 78th CIC Detachment in his April Monthly Information Report. Prefacing his remarks by a comment that, although his recommendation was too late to be of any value in the ETO campaign, it was being offered "for consideration in future campaigns in the Far East and any possible future wars." He suggested that CIC adopt the system used by Military Government. Under this system, a small detachment was permanently assigned to a division, and, during the combat phase, was assisted by teams permanently assigned to the area. When the division team moved on after the area was conquered, the permanent teams stayed on and could continue their work without any break in operation.

"Experience has shown that in several instances,"--Captain Ruge wrote, "permanent Military Government teams began operations in an area within a day or two of its conquest and

[redacted]

[redacted]

at the time of this report have operated continuously in that area for a month or more, while several CIC teams have attempted to cover the area with none of them being able to accomplish a satisfactory job because of their brief stay..."[45]

79th CIC Detachment: Suspect Denies All

Acting on a tip from an informant, British Field Security men attached to the 79th CIC Detachment arrested Wilhelm Soldan, a former Gestapo agent and Schutz Staffeln Hauptsturmfuhrer who had been responsible for outrages committed against anti-Nazis in Bochum and had been implicated in the deaths of eighty political prisoners on 8 April. During interrogation, Soldan stolidly denied all connections with the Gestapo. But there was more than sufficient evidence to counter denials, for the allegations against Soldan had been substantiated by the testimony of a dozen independent witnesses. CIC did not hesitate to forward the recalcitrant prisoner to Camp "Q" Ninth US Army's Civilian Detention Camp, for further questioning.

Radio Equipment Found

In Schwartz, an informant told the 79th CIC that a man named Emil Mauss was in possession of considerable radio equipment and would bear watching. On 26 April, a CIC raiding party led by 1st Lt Richard M. Gonzales surprised Mauss in his home and found sending apparatus, several radio sets and other radio equipment, just as the informant had claimed. Mauss stated that this equipment had been used in his job of teaching members of the Hitler Jugend how to transmit and receive messages. When a continued probe of Mauss' past activities failed to uncover any evidence to prove he was actually an agent, he was sent through prisoner of war channels on the charge of illegal ownership of a Wehrmacht sending set.

79th CIC agents uncovered more radio equipment before the end of April. A CIC team led by Special Agent Anthony Markusiewicz raided the hideout of five former German soldiers whom informants had termed members of a sabotage ring. In their lodging was a radio transmitter and receiver.

Interrogation failed to establish any connection between this ring and the previously-arrested Mauss. Three of the prisoners cooperated with the CIC agents and were dispatched

45. 78th CIC Det Monthly Information Report, dated 1 May 45 (CONFIDENTIAL), (Staff and Faculty Library).

[redacted]

[redacted]

through regular POW channels, after no further evidence was adduced to support the claim that all five were implicated in a plan for sabotage. The remaining two suspects who proved themselves liars with conflicting testimony were routed to Camp "Q" for further interrogation.

Not Quite Clever Enough

The wearing of civilian clothes was a device used by many former Wehrmacht members to escape detection. For the most part, this ruse failed because the apparent military age of an individutal usually aroused suspicions, and the documents in his possession often failed to substantiate his civilian status. Various devices also were used for forging documents. Agents of the 79th CIC Detachment uncovered an unusual one while screening a group of young men at a road block in the Ludinghausen sector. One man carried a pass on which the photograph seemingly was impregnated with a bona fide stamp until close scruntiny by the Agents revealed that the picture had actually been impregnated through the use of an ordinary five mark coin.[46]

An Anti-Nazi Organization

While covering the town of Hamborn, Agents of the 79th CIC Detachment came across an anti-Nazi organization known as the Frei-Korps, Rhein/Ruhr. The movement had been founded on 1 December 1944 by Herman Brockmann, a former Wehrmacht member who had received a medical discharge. Brockmann had managed to gather about fifty men, mostly foreign workers, to support the following goals:

1. Complete destruction of Naziism.
2. Complete destruction of German militarism, including all its affiliations and units.
3. Complete abolition of all laws put into effect by Nazis.
4. Severe punishment of all war criminals.
5. To work for peace, order, security and freedom.

The Frei-Korps, Rhein/Ruhr, had been able to distribute propaganda leaflets bearing caricatures and the following message: "The German soldier has it good: Hitler thinks for him, Himmler sees to it that his wife is not lonesome, and he,

46. 79th CIC Det Monthly Information Report, dtd 1 May 45 (CONFIDENTIAL), (Staff and Faculty Library).

[redacted]

himself, remains at the front until he dies."

The organization apparently was primarily active in influencing members of the Wehrmacht to desert. When the Allied troops arrived in the Hamborn area, Frei-Korps operatives organized the surrender of the town by putting up a white flag in the church steeple.

The existance of this anti-Nazi organization was encouraging, but CIC was unable to determine if similar groups were present in other locales.[47]

95th CIC Detachment: Factory Sabotage

The 95th Infantry Division moved on line along the Lippe River and Canal, and by 4 April, was committed to assist in the coordinated reduction of the Ruhr.

In the city of Neuss agents of the 95th CIC Detachment were informed that the Gestapo Chief had instructed plant managers of local factories to appoint workers to commit sabotage after the Allies entered. The number of men assigned this mission was to vary with the size of the plant.

The manager of the National Radiator Company in Neuss stated that he had been ordered to name four men at his factory but had failed to do so. He felt, however, that the appointment of sabotage agents might be a general rule, and advised CIC to contact plant managers who would know the names of the men selected.[48]

Toward the end of April, with the Division stabilizing, all intelligence personnel of the 95th Division were lumped into two classifications of military government activities: Special Purpose and General Purpose. The Special Purpose personnel, consisting of the CIC agents, were responsible for apprehending Nazi Party officials, screening all civilian appointees, interrogating persons arrested for suspicious activity, following up counterintelligence targets and locating new targets.

The General Purpose group, consisting of all other intelligence personnel and augmented by German linguists from

[redacted]

the area commander's unit, were to screen German civilian males, age 14-60, for military personnel, to segregate and screen personnel in prisoner of war and displaced persons camps, and to report and investigate all subversive and sabotage activities.

Existing records fail to point out the degree of success that this arbitrary division of activities achieved.[49]

97th CIC Detachment: Suspicious Soap Factory

In Oberkassel, CIC Agents of the 97th CIC Detachment were alerted to the possibility of subversive activity within a local plant, the P.C. Cremer Soap Factory, which despite the ebb and flow of war had continued operating with about 1,000 employees. The owner, before departing from the scene prior to the arrival of the Allies, had boasted to his employees that he would return and that there were some places in his factory area into which Allied military personnel would never penetrate.

Initial CIC inquiries uncovered a rumor that weapons were stored on the factory premises and that one of the high buildings was being used for observation purposes. Some form of communication between the factory and German forces on the Western side of the Rhine was considered likely and the presence of a guard on duty at the plant each night between 2000 and 2100 hours lent credence to this report.

Existing records fail to reveal the outcome of the 97th CIC's investigation. But the mere fact that CIC had to investigate such a harmless-seeming concern as a soap factory indicates the scope of counterintelligence activities as the Allies pressed the battle in the German homeland.[50]

During the closing phases of the ETO campaign, CIC Agents continued to round up Hitler Jugend members who had been sent on intelligence missions. Among these in Juchen was a sixteen-year-old who, with four weeks training, had been sent to the front in civilian clothes, but when captured was bearing ammunition for a combat patrol's machine pistols.

Two Hitler youths, caught by 97th CIC agents on 11 April,

[redacted]

told of being required to attend an "HJ Sports Instructors School" from 6 to 21 March. In the midst of this course these two boys and other volunteers were selected for training in Wehrwolf terrorism at a school called "ABS Rhoda Rhoen." Twenty boys were taught to drive pins through telephones wires to cause phones to ring at both ends of a circuit. They also learned to cut through cables and then, after insulating the severed ends, to seal the break in such a way as to prevent immediate discovery of the sabotage. The teachers at the school also impressed the youths with the need for distributing political tracts and pamphlets.[51]

Special Fighting Unit "Paul"

On 30 April, careful research and investigation by Agents of the 212th and the 97th detachments paid handsome dividends. In a dramatic round-up, twenty-eight members of an organized sabotage group known as Special Fighting Unit "Paul" were captured by the CIC men. The story behind the round-up is one of counterintelligence operations at its best.

CIC's interest in Special Fighting Unit "Paul" began when an apparently ordinary civilian contacted two agents of the 212th CIC Detachment, and gave detailed information concerning a group of German officers and men located behind Allied lines.

The 212th CIC, enlisting the aid of the 97th CIC, immediately began to develop the offered leads. The groundwork of investigation was completed on 30 April, and the CIC agents, supported by troops from the 387th Infantry, began to comb the wooded area between Seslarn and Schonsee, guided by the informant who had eventually admitted to being a deserter from the clandestine organization.

Members of "M" Company of the regiment succeeded in finding one German officer and two enlisted men, who themselves were attempting to locate the Command Post of Colonel Krueger, the commander of the organization. In another part of the woods a rude shack proved the abode of three foresters; a trio who, under detailed questioning, admitted that they were serving as a "front" for the hideout.

One of the men finally admitted that he had seen the

51. XVIII Corps G2 Periodic Rpt Nr 10, dtd 11 Apr in III Corps G2 Jnl, dtd 10 Apr 45, L-623 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).

Colonel that morning in the woods. The search was resumed, but two hours of hunting failed to flush out any enemy personnel. Just as plans were being made to suspend the search, one of the foresters told the location of the organization's supply shack.

Four CIC agents rushed to the indicated place, where they found two men in civilian clothes and three women. The informant immediately identified one of the men as Colonel Krueger, the other as one of his lieutenants, and the three women as members of the Reichsarbeitesdienst who were, according to the report, "working their way through college." When confronted with the information CIC had concerning his Special Fighting Unit, the Colonel agreed to lead the American troops to the woodland retreat of the members of his small command.

The Intelligence and Reconnaissance Platoon of the regiment accompanied the CIC agents and Colonel Krueger into the backwoods country timber and tangled underbrush which barely permitted the passage of motorized vehicles. Deep in the forest, the destination was reached. Colonel Krueger called out to his officers to gather the entire body of men and surrender. A rustling and crackling of the dense underbrush followed and out of perfectly camouflaged positions dug in the ground, the men of Special Fighting Unit "Paul" emerged from all directions. The captured group totaled seventeen. Informed of a second group of the same organization located five kilometers away, American personnel were dispatched at once and soon recovered four additional prisoners.

In subsequent study of the organization, CIC discovered that its mission was to remain in hiding in the woods until the American troops had passed the area, then form an attack upon Allied supply lines, aiming particularily at the destruction of gasoline trucks and depots. But this mission differed from the customary Wehrwolf pattern. Most of the members of Special Fighting Unit "Paul" wore regular army uniforms, and could always claim, if captured, the "protection of their lawful uniform."

CIC agents who had participated in the search could not deny that the organization had shown itself a worthy adversary. The entrenched positions were so well camouflaged that an automobile had been carried into the forest and completely concealed. In the initial search, an American patrol had

crossed the area without the slightest awareness of the presence of the enemy.[52]

99th CIC Detachment: Keeping Pace With the Division

April was a month of acceleration for the 99th Division. The advance was so rapid that CIC work was necessarily limited to checking communications in towns, apprehending individuals who fell within automatic arrest categories, screening travel restriction violators and spotting Wehrmacht deserters in civilian clothes.

By the end of the month arrests totaled 155 automatic arrestees and 1,906 German soldiers in mufti. A considerable number of the latter, who at first denied being soldiers, eventually admitted their true status; but were found to be of no counterintelligence interest and sent through regular prisoner of war channels.

The individual of greatest interest to the CIC Detachment was apprehended in Michelbach by combat troops on 25 April; the man was a cripple whose left leg was two inches shorter than his right. He claimed that his name was Ernst Vogel; that he had been bombed out of his home in Nurnberg, where his identity papers had also been destroyed; and that now he was trying to return to his home. He continued to give many details concerning his life.

When CIC agents managed to spot a discrepancy in the account of Vogel's education, he began to make admissions which finally led to his full confession. The final story was that he had been working as a teletypist in police headquarters in Nurnberg. On 10 April, he was transferred to Gestapo headquarters at Echwell and a week later was called before the local commissar along with twenty other employees having physical defects. Vogel was ordered to return to Nurnberg, which was then under Allied occupation, in order to observe the people and report on those accepting office or cooperating with the Americans. No sabotage instructions were included in this mission, Vogel claimed, but said he was told to note supply dumps and other strategic areas as targets for possible later sabotage. Finally, he

52. 94th Inf Div CI Notes, "Special Fighting Unit 'Paul'," Annex Nr 2, G2 Periodic Rpt Nr 31, in FUSA G2 Jnl dtd 2 May 45, L-558 (UNCLASSIFIED),(Departmental Records Branch, AGO, Alexandria, Va.).

had been given the code name "Vogt" and instructed to deliver his reports to the person who would call at his home using that code. 53

104th CIC Detachment: Three are Captured

During the early part of April, while the 104th Division was helping to trap the German troops in the Ruhr pocket, members of the 104th CIC Detachment had a correspondingly busy time reducing counterintelligence targets.

On the morning of 11 April, Lt Allan Fial and Agents Robert Robertson and Paul Schurf checked in with the S2 of the 414th Regiment for a briefing session. After scanning the situation maps, the CIC men decided that the area into which they were planning to go had been cleared of enemy troops during the night. Their mission was to cover the towns in the area for counterintelligence targets.

Driving in their jeep along the road of Scharzfeld, the Agents spotted one destroyed German tank. Otherwise, the road was clear and quiet. The town itself was equally serene. There were no persons on the street, and no visible activity.

Agent Schurf dismounted from the jeep and went into a house to find someone who knew something about the state of affairs in the town of Scharzfeld. A few minutes later, he came back with the report that there were neither German nor American troops in the area. The next stop was made at the city hall where the agents hoped to find the burgermeister. A Polish girl in the building told them that the burgermeister was taking refuge in an air raid shelter. She also revealed that there were still a few German soldiers in the town, but disclaimed any knowledge of their whereabouts.

The CIC agents decided to stay since American tanks were expected to rumble into town momentarily. Robertson returned to the jeep, which they had parked against a brick wall across the street from the city hall, to get the remaining weapons: a grease gun and a German rifle. As he started to leave the building, he glanced back to see four German paratroopers disarming Fial and Schurf. They had emerged from one of the rooms in the building.

53. 99th CIC Det Monthly Information Rpt, dtd 12 May 45 (CONFIDENTIAL), (Staff and Faculty Library).

Robertson went back to join the others, who were busily trying to convince the Germans that the whole American Army would be along in a few minutes, and that the wise alternative was to surrender now. The Germans simply replied that their commanding officer would be interested in this information. All three agents were taken from Scharzfeld in the jeep to a mountain hideout.

The commanding officer of the German unit proved a young ardent Nazi, who ordered a guard detail to accompany the captured Americans to the battalion command post. The CIC men, clutching at what seemed to be a last straw, tried to "work on" their guards during the trip. They almost succeeded, but the sergeant-in-charge, possessed with a strong sense of duty, refused to yield to the persuasion. On the way, Schurf managed to throw away his credentials.

The prisoners arrived at the battalion CP and were hastily shunted along to the regimental command post where they were searched thoroughly. The remaining credentials were found, and the Germans started a real interrogation, but the questioning was interrupted when a runner arrived with the message that the prisoners were to be brought immediately to division headquarters.

Once again the CIC agents were loaded into a vehicle. This time the drive lasted about thirty minutes and ended at a large house where a party was in progress. Fial, Robertson and Schurf were taken into the kitchen and soon all the women from the party crowded around them, plying the agents with such questions as, "What kind of treatment can we expect from the Americans?"

This impromptu session closed with the arrival of a colonel who was more concerned about military matters. After some additional interrogation, the colonel apologized about the makeshift quarters where the prisoners would have to be lodged and dispatched them to a barn under guard. The CIC men had a glimmer of hope when they discovered that their guard had been on the Russian front, had deserted and made his way back to Germany via Norway. He seemed to be disaffected and interested in defecting, but he could not make up his mind. Despite the urging of the Agents, the guard decided to postpone his decision until the next day.

The next day proved too late. The captives were moved to corps headquarters which was located in a hotel in a resort town. There, for the first time, they were faced with the pile of documents that had been discovered in their

jeeps---documents which had been accumulated over several days previously during which the agents had not been able to check in with headquarters. The most incriminating papers were arrest reports that had been stored in Robertson's brief case. These the G2, who was to conduct the interrogation, dumped on the desk before the Agents. The G2 started to send for an interpreter, but Schurf and Robertson both convinced him that this measure wouldn't be necessary--they both spoke perfect German.

Under the G2's orders, the agents began to explain rapidly the meaning of the arrest reports, surreptitiously slipping the most sensitive ones back into the brief case. The G2's principal line of questioning was directed towards finding out the nature of CIC. He knew nothing about the organization. The Agents managed to parry most of the G2's inquiries by keeping him talking about his own experiences on the Moscow front.

The interrogation came to an inconclusive end. Again the agents were moved, this time to Schutz Staffeln Battalion headquarters where they were hastily engulfed in a crowd of rough young soldiers, who had been separated from their own outfits, and some of their girl friends. All began to ask questions until an officer appeared who dispersed the crowd in order to have a private session with the prisoners. This man was strictly concerned with his own personal problems. His wife and children were in an Allied occupied zone and he wanted to know how they were being treated. The officer also began to extend feelers to the agents about the chances of getting a job with military government after the war.

Soon the heavily questioned agents were returned to the town and lodged, with apologies, in the city jail. Schurf and Fial were placed in one cell and Robertson in another, but later that night, at their own request, the three men were moved into a single cell. The evening was not entirely their own. They were taken upstairs to the council hall where there was a large table surrounded by high ranking German officers, evidently a German General Staff. The entire body rose as the Americans entered and their subsequent questions hewed largely to a single line: What kind of treatment could be expected from the Americans?

The next morning the 1st US Division began moving into town. The German general wanted to evacuate the town because there were many wounded soldiers in the hotels which had been utilized as emergency hospitals. The Schutz Staffeln would

[redacted]

not permit retreat. American shells bombarded the stubbornly-defended town, and the three CIC Agents in their cell played "Black Jack" to pass the time.

When night came the town was still in the hands of the Germans. An officer entered the agents' cell and gave quick vent to his intense hatred of the Americans. It turned out that his wife and children had been killed in an air raid at Paderborn, and the officer was intent on exacting revenge. Although he came near to shooting the captives on the spot, he eventually left, leaving the agents unharmed.

The CIC men were not out of danger. After the officer had departed, the jailer came in and apologetically announced that the order had been issued to execute the prisoners, since the town was being evacuated and the Americans could not be taken along. Besides, the Germans now realized that the CIC men were "Intelligence." In a few minutes, an officer came to carry out the execution, but through fast talking, the agents persuaded him to lock them up and join the retreating forces.

Even at this point, the prisoners could not breathe freely. The habit the GI's had, on entering a town, of tossing grenades into basement windows and looking later posed a new problem. The jailer unlocked the cell, but the men did not dare to go out because the American troops were still firing at anything in uniform that moved. Civilians began to crowd into the cell for protection, knowing the prisoners to be Americans. This was actually false security since the oncoming troops had no idea that their compatriots were imprisoned.

Robertson, at this point, reckoned on American psychology. He selected the most attractive girl from among the civilians and persuaded her to walk down the middle of the street until she found some American soldiers she could guide to the Jail.

"They will never shoot you," Robertson explained to the girl.

He was right. The three-day imprisonment came to an abrupt and welcome end shortly after. An interesting post script to the adventure was written when the war was over. Schurf returned to the scene of the capture and found his credentials where he tossed them from the jeep.[54]

The Caught Do Some Catching

Although these three agents of the 104th CIC, in their zeal for carrying out the counterintelligence mission, were apprehended, the detachment did some impressive apprehending themselves during April.

The biggest catch of the month was Dr. Albin Sawatzki, reported to have been the inventor of both the V-1 and V-2 rockets. Considered one of the foremost scientists in Nazi Germany, Sawatzki had been summoned early in 1944 to supervise the completion of an underground factory near Nordhausen, in addition to his work on the V missiles. In April 1944, with Himmler, Goering and Goebbels in attendance, a final test of the weapons was conducted at the plant site under Sawatzki's supervision.

Sawatzki was also responsible for the design of the Royal Tiger Tank, and the coordination of production of Junkers airplane engines. The CIC Agents who arrested him described him as "the typical MGM character to play the part"--slightly stooped, round shouldered, apologetic, and wearing thick-lensed glasses. Because of his technical knowledge and the valuable scientific information he possessed, Sawatzki was evacuated through Corps to be interrogated by Army technical intelligence.[55]

On 16 April, the 104th CIC Detachment began operations in Halle. Within short order, 429 German soldiers in civilian clothes were arrested. CIC was aided in apprehending these soldiers by use of a sound truck that traversed the main city routes, announcing in German that all members of the Wehrmacht would present themselves at one of four specified screening points or be liable to punishment as spies by American forces.[56]

Others apprehended by CIC included the police president, the oberburgermeister, five ortagruppenleiters, a member of the Sicherheitsdienst, a Gestapo secretary, 14 Sicherheitz-polizei (SIPO or Security Police) and members of the Gauleiter's staff.

55. 104th Inf Div G2 Periodic Rpt #169, dtd 13 Apr 45 in FUSA G2 in Jnl and File, dtd 14 Apr 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).
56. 1st US Army G2 Jnl and File, L-558, dtd 23 Apr 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).

A well-organized anti-Nazi group based at the University of Halle proved most helpful in providing counterintelligence information In addition, a Count Von Luckner who allegedly was opposed to militarism and favored a democratic government for Germany, tipped CIC off about the local Wehrwolf organization. Contact was established with one of the Wehrwolf leaders who agreed to accumulate evidence on members. He claimed that he had been merely posing as a Wehrwolf member to determine the real leaders of the movement. On 22 April, the 207th CIC moved in to complete the investigations in Halle started by the 104th CIC Detachment.[57]

Below the Belt

A 104th CIC Detachment informant who had spent seven years in various concentration camps in Germany charged that Max Schmeling, one-time world's heavyweight boxing champion, was an official at the Buchenwald Concentration camp near Weimar. According to the informant, Schmeling had been among the most cruel of the Schutz Staffeln men in his treatment of political prisoners. The CIC agents who heard this report passed it on through G2 channels.[58]

CIC Augmented in Closing Phase

In the final phase of the campaign, the counterintelligence work took on a greater urgency than most other intelligence responsibilities. Consequently, Military Intelligence Interpreter (MII), Order of Battle (OB), Photo Interpreter (PI), and German linguist personnel were ordered to reinforce the 104th CIC Teams as the Division boundaries were extended and stabilized for Occupation duties.[59]

The 503d CIC Detachment: Free-Wheelers

The 3d Armored Division, under VIII Corps, played a major part in the encirclement and reduction of the Ruhr. The 503d CIC Detachment also played a major part in top level Intelligence plans in that area, before the Division moved on to the Elbe.

The Detachment's activity on the offensive started with a wild goose chase undertaken by Detachment Commander Theodore M. Black. Lt James Denton of the 503d, Lt David Hanna of the

57. 104th Inf Div G2 Periodic Rpt #179, dtd 23 Apr 45, in FUSA G2 Jnl and File 25 Apr 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).
58. Available records reveal no further information on this matter.
59. 104th Inf Div G2 Intelligence Summary Nr 1, dtd 7 May 45, in FUSA G2 Jnl and File, L-558, 7-8 May 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).

104th, and enlisted Agents of both Detachments under the direction of Captain John H. Heminway of the 207th CIC Detachment, entered Alternkirchen early on the morning of 27 March, immediately after it had been cleared by tactical troops from both the 3d Armored and 104th Infantry Division. A thorough investigation was impossible, because residents had huddled in their cellars during the fighting and were told to remain there by Military Government until the divisions of VII Corps had all passed through.

The CIC group was looking for evidences that Skorzeny's saboteurs were present in the town, but they could find none. The members of the 503d CIC Detachment moved out the following morning and the 104th CIC Detachment was scheduled to leave shortly after. Evidently the apparent inaccuracy of the advance information the detachments had been given led Captain Black to ask in a note in his report, "Could it be possible that the Alternkirchen mentioned is the one located at G4708, rather than the one checked?" No record of any answer to his question has been found.[60]

The Detachment moved with the Division, apparently without too much happening of CIC interest, until it reached Paderborn on 3 April. The Division had travelled more than one hundred miles in the first week of its offensive.

CIC Agents attached to Combat Command "A" of the Division, interrogated a staff sergeant who claimed to have been a US Army Air Force prisoner of war liberated from a hospital in that city. The agents grew suspicious of the sergeant because he spoke fluent German and spoke English with a German accent, unexplained by reason of family or educational background. Although he had been in Germany fourteen months as a prisoner, interrogators believed it impossible for him to have developed a heavy accent that quickly.

A second puzzler increased CIC's interest in the non-commissioned officer. He stated he was the son of a share-cropper, yet he used English in the British manner, and possessed a vocabulary far beyond that of the high-school education he claimed. Letters from his sister revealed a much lower literacy level, although he claimed her education had been the same as his. The interrogatee appeared totally ignorant of American slang words, including the Air Force's own "gremlin" creation, and his knowledge of traditionally

[redacted]

American sports like football and baseball was inadequate although he showed knowledge of international sports. A Russian in the hospital with him said the sergeant had been there three months, not the one year he alluded to.

The agents arrested the alleged American, but because his injured foot required treatment, he was evacuated to a hospital.[61]

At Paderborn, five target objectives designated by the high-level Combined Intelligence Objectives Sub-Committee (CIOS) fell to the Third Armored Division, and CIC reported the status of each target through channels. Two of the targets were under Military Police guard, one was being protected by indigenous police, and another was occupied by US Army Engineers who were revitalizing the installation. The fifth target was being used by Military Government to house displaced persons, apparently inadvertently; and troops already had strewn many records around the area. CIC suggested direct CIOS exploitation and notification to higher Military Government authorities of the importance of the fifth target to head off damage the displaced persons might cause.[62]

507th CIC Detachment: Where's the Fire?

Few records are available for operations of the 507th CIC Detachment with the 7th Armored Division in Northwest Germany in April. One incident, however, revealed that the CIC task of checking Military Government civil appointees was not always a routine one.

In the town of Gelsenkirchen, a group of firemen and policemen were selected for employment by Military Government, but just before they were set to work, they were turned over to CIC for security screening.

(NOTE: CIOS was an agency of the Combined Chiefs of Staff which coordinated and considered nominations submitted by various Allied Intelligence agencies to exploit specific targets in enemyheld territory for technical and other important intelligence data).

[redacted]

The CIC interrogators discovered that the firemen and policemen had been ordered to join a group of 140 persons to go through the woods from Olsberg to Elleringhausen with the aim of disrupting Allied supply lines. They were to have been armed with French and Italian carbines. CIC's alertness and careful interrogation in this instance probably precluded a major sabotage effort against the Allied forces.[63]

Chapter 2

THE RACE TO THE ELBE

While some units of the First and Ninth US Armies were engaged in the reduction of the Ruhr, other units--some of which had been instrumental in the encirclement--raced across Germany to the Elbe River. By 14 April, that river--the line agreed upon for the meeting of the Allied armies from the West and the Russian forces from the East--had been reached by four American Divisions. Two bridgeheads east of the Elbe had been attempted, but only one was successfully retained.[64]

309th CIC Detachment: False Wehrpasses

Among the CIC Detachments participating in the eastward dash was the 309th attached to Ninth Army. One of the major problems encountered by CIC Agents with this Detachment was the fact that identity cards were being accepted by Military Government as prima facie evidence of a civilian's right to be in a particular place at a particular time. Frequently, CIC discovered that these identity documents had to be scanned with a skeptical eye.

On 20 April, Special Agent Paul L. Bellocchio, while inspecting the Wehrpass of a German who claimed to be a civilian, noticed that the document had an improper stamp and that all the entries had been made in the same handwriting. Agent Bellocchio's questioning of the individual disclosed that the Wehrpass had been used successfully to traverse two roadblocks operated by US Army personnel. Further investigation indicated that a woman had given him the false Wehrpass upon his discharge from the German Military Hospital in Bielefeld, Germany.

Shortly after the interrogation, CIC agents raided the office in which the woman was employed. They caught her flagrante delicto in the process of making forty-five similar fake Wehrpasses for German soldiers.[65]

[redacted]

A Field Day for CIC

By the beginning of May, Ninth Army units were poised along the banks of the Elbe and a virtually static situation had begun. No longer governed by factors of time and movement, CIC personnel had a field day arresting Germans in SHAEF automatic arrest categories. Arrests were slowed only by lack of counterintelligence personnel and the number of arrest reports CIC agents could write out in the space of each day.

All of the First Army area, except that occupied by V Corps, and a portion of the Third Army area were transferred to Ninth Army control. The only civilian internment camp in this additional area had a limited capacity, necessitating the immediate construction of a new camp to lodge civilian arrestees. 309th CIC agents were fortunate in that the departing units had left counterintelligence personnel, thus preventing a major take-over problem.

No reports of serious sabotage efforts were received during the ten days preceding the formal German surrender, but several American soldiers were killed in the Harz mountain area, presumably by German soldiers who had hidden in this wild and desolate region.

As the period drew to a close, the Assistant G2 of Ninth Army reported that reorganization for the static phase was well under way and a fine start had been made in removing the key men of the Nazi Party from all communities.[66]

VII Corps CIC: Cleaning Up

To handle affairs in Czechoslovakia as the VII Corps forces drove across Germany, the 207th CIC Detachment prepared a study of Naziism in that country. Included in the study was a brief history of the pro-Nazi parties that provided interrogators with back-ground information on the growth of the Nazi movement and the significant membership about which to question suspects.[67]

VII Corps CIC agents had mounting proof that the Germans had left behind a network of espionage agents to gather information on Allied troops even as the battle approached its

66. 9th US Army "After Action Rpt for Period 1-15 May 45, from G2 CI Branch," Incl 2 to G2 After Action Rpt, 1-15 May 45, in 9th Army G2 Rpts, May 45, L-654 (3) (UNCLASSIFIED), (Department Records Branch, AGO, Alexandria, Va.).

final stages. In the five day period from 23 April to 28 April, VII Corps CIC apprehended and obtained confessions from four stay-behind agents. Two of the men possessed radio sets.

CIC knew that these four were not the only ones. They considered the last-ditch agents to be a constant menace both as relayers of tactical intelligence and organizers of all forms of subversive and guerilla activities. "Security precautions cannot be too painstaking," was the concluding comment in the detachment's report.[68]

The Russian Way

A young German Luftwaffe pilot who voluntarily surrended to the American forces had some interesting information to relay to VII Corps CIC about Russian treatment and indoctrination of German prisoners of war.

The 23-year-old flier revealed that before joining the Luftwaffe he had been a leader in the Hitler Jugend, and was, according to his own admission, a thorough-going Nazi. From 1940 until 1943, he flew regular missions for the German Air Force until he was shot down over Russia. After being captured, he was shipped to a prisoner of war camp near Moscow and invited to participate in a re-education and indoctrination school for German prisoners. At first, the flier resisted, but he finally became interested and attended the five-month course.

The prisoner explained that the school was run jointly by Russians and a staff of Germans, exiles from German and "converted" prisoners of war, principally high ranking officers. Among the pilot's classmates were several German generals, and the course was under the auspices of the "National Committee for Free Germany."

The success of the system seemed to lie in the careful selection of the teaching staff and the emphasis on modern history which included demonstrations of the falsehoods in the Nazi theories and "convincing presentation of the true course of events since Hitler's regime." Just what background the young flier had for judging the accuracy of this material was debatable: he had been exposed previously

68. VII Corps Periodic Rpt #118, Incl 4, "Enemy Agent at Large," dtd 28 Apr 45, in 4th Inf Div G2 Jnl and File, 30 Apr-11 May 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).

2792

to material that had been prepared by the German propaganda mills and little more. Proof of the falsity of these doctrines was enough to shatter his faith.

Under the influence of the teaching and contacts afforded by the school, the flier was won over to an anti-facist outlook and volunteered to further the cause of the movement. The sponsorship of high-ranking German officers to whom the students could look for guidance was cited as a factor in the indoctrination.

Graduates of the school were given three choices: to carry on propaganda work inside other prisoner of war camps; to perform propaganda work at the front through loudspeakers and pamphlets; or to participate in secret anti-Nazi work in Germany. The flier selected the third alternative and was assigned with other "converts" to do some military espionage in the Torgau-Wittenberg area which the Russians expected to occupy. On 28 March, he was dropped by parachute with two co-consipirators, including a radio operator with a wireless transmitter set, near Torgau. Separated from the others during the jump and unable to complete the mission, the flier went home.

How truly effective the Russian indoctrination had been was difficult for CIC to gauge. The flier stated that the majority of the "students" with him shared his favorable reaction to the course and attended the school out of genuine interest rather than desire for better living conditions. He placed the number of Germans who had volunteered for espionage work against the Germans "in the hundreds."

According to the CIC informant, no attempt had been made to instill a communist faith among the students; instead the goal had been "in a democratic direction." The flier believed that the Russians planned to use members of the National Committee to organize military government in occupied Germany, and he contended that the communist system would not be forced upon the country by the Russians.[69]

"National Komitee Freies Deutschland"

VII Corps CIC had previously received information about the "National Komitee Freies Deutschland" (National Committee

69. 9th US Army G2 Periodic Rpt #219, Annex Nr 1, in FUSA G2 Jnl, L-558, dtd 2 May 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).

for Free Germany). On 18 April, when American troops of the VII Corps entered the city of Leipzig, Military Government found itself for the first time in the German campaign confronted with a German underground movement of apparent size and force. The leaders of this movement immediately contacted Allied authorities and put themselves at the disposal of the occupation. This contact with Military Government proved a mere formality. The National Komitee had acted in the Allied interest, although without Allied instructions, before the occupation of Leipzig, in the midst of the arrival of US Forces, and soon thereafter. By 26 April, the Allied Military Government had no choice but to order the movement's disbandment on the grounds that several of its adherents had taken unauthorized actions, and the organization as a whole had a political nature.

But the Allies had not completely finished with the organization. VII Corps CIC was called upon to conduct an investigation of the movement to ascertain the true motivation of this German resistance group and to appraise its potentialities for future use by the Occupation.

The CIC inquiry revealed that the National Komitee Freies Deutschland was, from its start in 1935, formed by the union of disparate, anti-Nazi groups. Some of the group survived various anti-Nazi purges and in the spring of 1943, under the influence of Russian broadcasts, the movement --now strongly anti-Fascist--formally adopted the title of "National Komitee Freies Deutschland." From this time on, the Leipzig committee was able to keep in continuous touch with similar resistance groups in Chemnitz, Dresden, Thuringia, and Berlin.

Although the National Komitee Freies Deutschland never committed any positive sabotage and confined itself primarily to distributing anti-Nazi leaflets, the movement was sufficiently well-known to the Gestapo to cause the arrest and execution of about 20 prominent members between the end of 1944 and April 1945. On the basis of the investigation, the CIC agents concluded that although the National Komitee Freies Deutschland had derived its name from the Russian-inspired, anti-Nazi movement in Moscow, there was no evidence of actual contact between local members and Russia. The agents also felt that the choice of title was dictated by the need for "some recognized banner around which to rally," rather than the fact that many of the present members were former communists.

CIC evaluated the Leipzig leaders as sincere men whose initial interest was to assist the Allies in the uprooting of Naziism. The VII Corps Detachment recommended to Military

[redacted]

Government that the organization be partially reactivated and utilized as an informer service, in recognition of the need of a far flung informer system for counterintelligence in the densely populated city. The CIC analysis ended with the statement, "Although not without blemish or above suspicion, the National Komitee Freies Deutschland has the virtues of being ready-made and, for a German organization, understandably in the same directions as American interests."[70]

VII Corps CIC Ammo Dump Investigation

On 23 April, a German in civilian clothes was stopped by Agent Gary G. Hauptmann of the 207th CIC Detachment in the vicinity of the Corps' Command Post and asked for his papers. This simple identity check led to an important find. The man produced a Military Government pass which was made out to an Otto Miller, stating that he had permission to go "home." Since this was a rather anomalous destination, Agent Hauptmann interrogated the man thoroughly, discovering that he was still a member of the Wehrmacht. The man had obtained the pass from a farmer named Otto Miller whom he had met on the road.

The German told the agent that one of the last tasks he had participated in for the Wehrmacht was hiding a cache of ammunition and demolitions equipment for the use of the Wehrwolf organization.

A raiding party was formed and moved to the locale of the hidden supplies. As they approached, they were fired upon, and after their first volley in return, three German soldiers came out of the woods and surrendered. Added to the two guards the party had surprised and captured, CIC was doing all right in the POW market, but they had come seeking a hidden ammo dump. The German soldiers led the party to it. On their way, they picked up a civilian whom the German soldiers identified immediately as the man placed in charge of the Wehrwolf activity for the area. He denied this vehemently, but had no papers or other identification.

The ammunition dump was discovered and destroyed, and the raiding party and their seven prisoners headed back to Thale. Along the way they were stopped by American Engineers who were going to blow up a booby-trapped German vehicle that was blocking the road. As the party waited for the explosion,

70. Army G2 Periodic Report #253, Annex 2, dtd 15 May 45 (Source VII Corps) in 9th US Army G2 Periodic Reports, L-654, May 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).

[redacted]

[redacted]

the alleged leader of the Wehrwolf cell leaped out of the Detachment's vehicle and tried to get away over a cliff. Immediately, the Agents opened fire, wounding the man severely in the left leg, necessitating his removal to a first aid station and later to an evacuation hospital.[71]

A simple identity check had again proved its worth.

213th CIC Detachment: Few Reports

The scanty reports that have survived the activities of the 213th CIC Detachment during the end of the Germany campaign indicate that, like all CIC units, the main order of the day was rounding up automatic arrestees and others deemed dangerous to the United States Troops.

On 7 May, 213th CIC Detachment agents captured two Germans as they tried to pass through a road block as refugees. The interrogation which followed preliminary screening resulted in confessions from the men that they had taken advance demolition and sabotage courses and were currently on their first mission. Their assignment was to dynamite railroad tracks at Bodenteich and ammunition dumps at two airdromes. But the captured men never saw their goals. They were sent by the Corps agents to higher level for prosecution.[72]

The 218th CIC Detachment: A Busy Period

XVIII Corps and their CIC detachment, under Captain Albin P. Dearing, were working at the outset of the period with other American and British units to expand their bridgehead at Wesel and to make it more secure. On 30 March, the Corps moved back to base and were attached briefly to the British Second Army.

Most of the detachment's activity was in searching for white and black list personalities and providing civil and military security. All information Corps agents had produced in the Wesel-Peddenburg-Dravenack area was turned over to the British 74th Field Security Section at Wesel when the XVIII Corps moved back to base. On 31 March, the CIC Detachment

71. 207th CIC Det Memo to CIC, dtd 24 Apr 45, subj: "Ammunition Dump for Wehrwolves," in 207th CIC Det Log, Feb-Mar 45 (CONFIDENTIAL), (Kansas City Records Center, Box 25097).

[redacted]

moved to Appelhulsen, to wait until the tactical situation would permit entry into Munster. Elements of the US 17th Airborne Division and the British Coldstream Guards took Appelhulsen, and the 218th CIC Detachment moved in at 0900.

By the time CIC arrived, the unsupervised soldiers had resorted to raiding and general disorder after locking the inhabitants in a school building. There was no Military Government agency available to excerise control of the population, and the Detachment had to assume the responsibility for emergency Military Government functions. They screened the entire population of 400, segregating and interrogating all males between the ages of fourteen and sixty; and sending 165 Displaced Persons rearward to the center at Wesel. Due to the proximity of the front lines, security was strengthened by collecting all the townspeople in the Catholic Church under the responsibility of the local priest, who had been investigated and cleared previously by CIC.

In his weekly report the detachment commander cited other non-CIC duties which required much of CIC's time. Captain Dearing reported: " A day spent carrying women through the street who have fainted from starvation (three days locked up in a school building without food or water); helping midwife a cow (the farm labor was also interned and the droves of fine stock left untended); doctoring a young girl who had lacerations on her face from our shelling; settling the problems of sorting out and shipping 78 Poles, Dutch, Italians, and French, while at the same time finding white bread for a dying diabetic; putting out fires; chasing drunken GI's out of the Headquarters; and finding details to bury dead Jerries...is a far cry from the intelligent, systematic search for the dissident elements whom we have come here to find, all of which are problems which would not have existed had civilians been allowed to remain in their homes." This, he said, was the general condition of all German towns which had been occupied by the Americans long before Military Government assumed responsibility. He stressed that such a situation left a very poor impression in the minds of the townspeople who had been locked up without food while the ransacking was going on or who had been left interned when troops quit the area. This type of atmosphere would produce civilians vulnerable to incitement by underground Nazi elements, he asserted.[73]

73. 218th CIC Det Weekly Summary of Activities, 25 Mar-1 Apr 45, dtd 2 Apr 45 in 218th CIC Det Weekly Summary Rpts, Feb-May 45 (CONFIDENTIAL), (Kansas City Records Center, Box 25098).

[redacted]DENTIAL

2797

Munster fell finally on 4 April and CIC Agents of the 218th CIC Detachment worked in the town under small arms fire and shellfire for six hours until they were relieved by the 213th CIC Detachment, reinforced by two British Field Security teams, a US Navy counterintelligence team, a Ninth US Army CIC Detachment, Army Group "T" Force and the 17th Airborne Divisional Detachment. Documents, files, information and personnel dossiers on Munster were delivered to the G-2 of XIII Corps. During their operations in Muster, the Corps CIC Agents had located only one white list personality. The Detachment rejoined Corps Headquarters in the field at Dillenberg on 8 April.

At Dillenberg, the detachment discovered that the Communists had taken control. A Karl Schneider appeared to be the ringleader of a group which had installed a burgermeister and other officials who were sympathetic to the Communist cause. As a CIC informant, his information was described as "voluminous and filled with personal bias," of little value except as confirmation of information obtained from other sources.

Several industrial and political institutions were raided in Dillenberg and in the immediate surrounding area, but nothing exceptional interest developed. Some important documents were returned to First US Army CIC Detachment, and several tools were forwarded to Engineer Technical Intelligence at Fort Belvoir, Virginia, U.S.A.[74]

A Boost for Non-Fraternization: Nazi Style

Agents operating in Siegen discovered a number of important documents and one interesting propaganda campaign planned by the Germans to effect a non-fraternization program of their own.

The systematic preparation of the German people for non-fraternization was to be launched with a news release, purported to have been written by a United Press correspondent, in which the non-fraternization steadfastness of the Germans in the Eupen area during the previous winter was lauded. The second installment was to be a message telling loyal Germans not to harbor deserters. This was to be released as occupation became inevitable. The last was a listing of rules of behavior which, if followed would have made enforcement of non-fraternization rules placed on the American soldier

74. 218th CIC Det Periodic CI Rpt, 2 Apr-8 Apr 45, dtd 8 Apr 45, in 218th CIC Det Weekly Summary Rpts Feb-May 45 (CONFIDENTIAL), (Kansas City Records Center, Box 25098).

[redacted]

infinitely easier. These steps were not followed, however, for the documents themselves were found in a sealed envelope which noted that it was not to be opened except on orders from the Fuehrer.[75]

Other unopened envelopes were found which, when inspected by CIC, revealed large scale plans for the evacuation of German civilians and industry. The first phase of this proposed program featured the orderly reduction of material stockpiles and specified that procurement was to be limited to a fourteen day requirement basis. Other phases were similarly designed to limit material on hand, yet enable the factories to continue at full blast until evacuation orders were received, at which time an orderly plan was to be followed. People were to be evacuated--women and children first--in accordance with a code-word system. The complete plans, including the code-words, were picked up by CIC, but the war ended too quickly for use to be made of them.

The 218th CIC Detachment continued working in and around Dillenberg during the week of 9-15 April, arresting a number of prisoners of war in civilian clothes and sending them through POW channels. Informants were obviously growing less and less recalcitrant. The number of denunciations handled by the Detachment increased. Several agents and people having mysterious connections with the Gestapo were arrested, as were a few automatic arrestees and security threats. When the Detachment finally did move out, pertinent information was turned over to the British Town Major in Siegen.[76]

Maria of the Cologne Kripo

Captain Dearing, on 16 and 17 April, participated, with the 97th CIC Detachment, in the round-up of a number of Cologne Kripo agents, including Klemmens, their chief. This was noted to be the first wholesale arrest of Gestapo-connected agent personnel.[77] Among those captured was a Dutch girl who, as Kriminal Kommissar Klemmens' servant, was assigned to bring civilian clothes to German agents in their underground hideout, a minor role, at best. During the interrogations that followed the arrest of the Gestapo group, a CIC

[redacted]

[redacted]

[redacted] Agent realized that Maria was not quite as fanatically Nazi as her comrades and suggested that she be used to "finger" others connected with the group. She quickly agreed and led a CIC team to a nest of radio operators. The 218th CIC Detachment eventually "adopted" her, and she was "outfitted to the extent of four suitcases full of clothing nabbed in a later raid on an Abwehr Espionage Agent's School, treated to a shampoo, bath and permanent and installed as a reasonably permanent fixture among the Detachment's informants."

Maria showed her hearty distaste for Gestapo personnel by willingness to chase them down at any time, day or night. Sitting before a map, she was subjected to a night-long interrogation concerning the location of Gestapo members-at-large of which she had knowledge, and was able to pinpoint on the map many of her former comrades and acquaintances. Her information was coordinated by agents of the detachment and led to the raid upon the town of Marienheids.

Ten hours prior to the raid, which lasted from dawn until 1600 hours, part of "M" Company of the 28th Infantry Regiment of the 8th Infantry Division blocked off all roads and trails leading from the town, locked up all civilians caught roaming and required proper identification from all military personnel. The rest of "M" Company and the Corps CIC Detachment embarked at dawn upon the search of every house, store, office and factory in the town.

The area was systematically zoned and numbers were chalked on each door. Then fifteen three-man teams went from house to house, and, as they entered, handed the senior house-member written instructions to have every resident of the house assembled immediately in one room. When this was done, two searchers and the householder checked every section of the building from cellar to roof. In the room selected for the gathering of the residents, the third member of the raiding party advised each person to register on the instruction form giving his name, age and sex. Six hundred males of military age were sent under the escort of one searcher to CIC Headquarters in the principal hotel.

More than twenty deserters in civilian clothes, a uniformed Wehrmacht Colonel, a number of contraband weapons, and documents concerning the Gestapo were picked up in the process. One man who failed to heed the command to halt was shot and killed.

Abwehr Espionage School Raid

Maria also helped in a raid on the Abwehr Esponiage

[redacted]

School at Wiehl. Acting upon leads furnished by former students, two agents of the 218th CIC Detachment, accompanied by Maria and an ex-graduate, approached the school by jeep at about dusk. American and British officials had surveyed the personalities and the property of the school four hours before, finding nothing remiss. The school had been closed when the Allied vise closed around the Ruhr and began compressing its resistance into a smaller and smaller area. All the students had been quickly graduated and a fast face-lifting had been administered to make the school seem to be a simple hunting lodge. Obviously this disguise had been sufficient for CIC's predecessors. It might have been for CIC, too, if two dignified Abwehr officers had not been called in from their hiding places in the surrounding woods after the first visitors had left. When they saw CIC's jeep approaching, they attempted, unsuccessfully, to escape through the garret and out to the roof, without shoes. Both men were colonels in the German Intelligence Service, one being the former commandant of the school, the other, an assignment officer. Though much material had been removed from the school prior to its evacuation by the German students of the last class, the CIC agents found documents, identification photographs, money and ten trunks of civilian clothes. Maria was rewarded with part of the clothing. Underground caverns beneath the structure could have provided numerous hiding places.

The ex-commandant and his fellow Abwehr officer were forwarded to the First US Army Interrogation Center. When the 218th CIC Detachment moved on, it reluctantly turned Maria over to the succeeding detachment as an informant.[78]

How the General Died

The leader of the German forces that became entrapped in the Ruhr pocket, Field Marshal Walter Von Model, had committed suicide. Of this, the Allies were fairly certain, but official authentication of the fact was lacking.

The 218th CIC Detachment was unable to prove the suicide theory but it did provide information that suggested the frame of mind of the commanders of the beleaguered forces. According to a reliable informant, Brigadier General Ekhardt, Model's Dusseldorf Commander, took his own life on 17 April. The informant, who saw the General's body, reported that Eckhardt

78. 218th CIC Det Monthly Information Rpt for Apr 45, dtd 2 May 45 in 218th CIC Det Periodic Rpts Jan 45-May 45 (CONFIDENTIAL), ([redacted] City Records Center, Box 25098).

had returned from a meeting with Model late in the morning, changed to civilian clothes, and dined in the apartment of a Captain Dusseldorf. After the meal, General Eckhardt retired to a bedroom and shot himself. The Dusseldorf Police came to remove the body.

As for the Field Marshal himself, CIC was told it was rumored Model had not received orders from Hitler to fly to Berlin, even when the plight of his forces was obvious beyond a doubt. The Fuehrer, according to rumor, had decided that the flagging Nazi morale might be bolstered by the heroic death of a Field Marshal on the Ruhr battleground. The CIC informants who reported this theory stated that Model, piqued by Hitler's attitude, would have tried to slip through the American lines and rejoin his wife. The Field Marshal's mother-in-law revealed to CIC that her daughter was still residing at the Model home in Dresden. Beyond this fact, the 218th CIC agents were stymied in their investigation.[79]

Secret Weapons

That the Nazis had hoped to win the war by secret weapons became evident to XVIII Corps CIC Agents with the capture and subsequent interrogation of Werner Piel, a special air courier of secret technical devices for the Luftwaffe.

Piel claimed that the German laboratories that had produced V-1 and V-2 missiles had also perfected an array of diabolical devices that needed only large scale production before they could be used against the Allied armies.

The stangest and most fascinating of these secret weapons was described as a "secret ray" that would paralyze any vehicle to a halt. The instrument, which the Germans called "Adlergeracht" or "Eagle Apparatus," was demonstrated to Piel and others at a proving ground near Danzig in July 1944. Piel asserted that an automobile driven across the testing area was brought to a complete standstill by the ray as if the spark of the vehicle had suddenly failed.

The mechanism was principally adapted for use by the Luftwaffe in night fighting. Planes equipped with the Adlergeraeht could allegedly trail behind an adversary, bring

79. 82d Abn Div Situation Summary Nr 19, Annex Nr 2, dtd 27 Apr 45, (Source XVIII Corps) (Abn) FUSA G2 Jnl and File, L-558, dtd 30 Apr 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).

him in range and then drop him from the sky by "konking out" his engines without firing a single round. This was the theory. No estimate of actual effectiveness had been made.

Piel's connection with the secret devices was largely during the six weeks prior to his capture when he ferried the equipment from Berlin to Glasshuette, where the finished devices were made, and then delivered them to aircraft manufacturers.

Before CIC completed the interrogation of the ray-obsessed Piel, the Agents learned the current disposition of the informant's organization, the Air Force High Command, Chief of Technical Division for Air Armament Transport. Apparently, Allied Bombing of Berlin had been so effective that this German technical air wing had to be split into two branches, one in Austria and the other along the Baltic Sea.[80]

219th CIC Detachment: Augmented

At the beginning of May, elements of XIX Corps were deployed along the Elbe River at Magdeburg. Firm contact had been made east of the Elbe with units of the XXVII Russian Corps.

Since XIX Corps had no area of occupation strictly its own during this period, only a single CIC team was assigned to Corps headquarters. The remainder of the Agents worked under control of 2d Armored, 8th Armored and 30th Infantry Divisions. CIC strength was augmented by the assignment of Prisoner of War Interrogator, Positive Intelligence and Military Intelligence Interpreter teams.

Many Wehrmacht deserters came in voluntarily to the CIC offices, but the agents kept apprehending German soldiers in civilian clothes. The main counterintelligence emphasis remained on the arrest of known Nazi Party leaders and black list personalities as the situation became stabilized for the Occupation.[81]

2d CIC Detachment: In Leipzig

80. XVIII Corps (Abn) G2 Periodic Rpt Nr 9, Annex Nr 1, "CIC Notes," dtd 5 May 45, in FUSA G2 Jnl and File, 7-8 May 45, L-558 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.)

81. XIX Corps After Action Rpt, CIC Rpt, L-648, 1-9 May 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).

[redacted]

Activities of the 2d CIC Detachment centered in and around the city of Leipzig during the latter part of April. Every day brought new faces to the CIC office as the roundup of automatic arrestees and other counterintelligence personalities moved at a steady pace.

On 23 April, a German accused of being a Wehrwolf leader in the City was arrested. On-the-spot questioning drew forth the alleged fact that the organization possessed some weapons and had established a headquarters in the northeast section of Leipzig, but CIC was unable to learn more from the prisoner. On the way to the regimental CIC office, he attempted to escape and was shot.

"Naturally, a Bullet through the Head"

The counterintelligence "catch of the day" on 24 April was a man named Otto Klinger, who had been chief of the Constabulary of Berlin until August 1944 and possessed the impressive-sounding title, "General-leutnant der Polizei und Gruppenfuehrer der Schutz Staffeln (SS)."

When newspaper correspondents with the Allied forces heard that there was a German general at CIC Headquarters, they made a quick dash to see the creature in person. Ushered into the presence of the captive, the newsmen soon sought to bait him with pictures of the atrocities that had been committed in various concentration camps. The general, who appeared "incapable of producing either a frown or a smile," replied that he was unaware of these mass crimes. He said that he had on one occasion visited the camp at Orianburg and found the inmates well cared for and even happy, but admitted, however, that he had inspected only a small portion of the camp.

The newsmen, eager to crack the German's stolid front, asked what treatment he would expect from his capture if he were Kaltenbrunner, one of the most brutal concentration camp overseers, rather than Klinger. The general responded in character. Naturally, he said, he would have "put a bullet through his head" before being arrested.[82]

Forced Labor

One of the major investigations of the 2d CIC Detachment

82. 2d Inf Div G2 Periodic Rpt Nr 303, dtd 24 Apr 45, in III Corps G2 Jnl dtd 27 Apr 45, L-623 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).

[redacted]

[redacted]

in April started with the arrest of a guard of the concentration camp at Flossberg and expanded into a full scale examination of the camp itself.

As German concentration camps went, Flossberg seemed an emergency affair that had been established when the German government let contracts to a Leipzig firm for the construction of a factory that could produce panzerfausts. Labor for the building was alloted from the concentration camp at Buchenwald, and arrangements were made by 15 December 1944 for the transporting, guarding and working of the slaves by two companies of Schutz Staffeln troops.

The labor proved as efficient as it was cheap. By February 1945, the factory began to produce and a rate of 1,200 weapons per month had been reached when the plant closed in the beginning of April. A high price in human lives had been paid for the speed. The treatment of the slaves was "inconceivably brutal"; between 400 and 600 of the enforced laborers were beaten to death during the period from December to April. The dead bodies were deposited in piles of 10 to 20 in graves well concealed in nearby woods.

CIC compiled records on the individuals who had directed the enterprise, including the chief of the Schutz Staffeln guards who was known by the name of "Zick-Zack."[83]

8th CIC Detachment: Travelling

The final period in the battle for Europe found the 8th Infantry Division shifted north from the area around Bonn until the unit was placed under the operational control of the British Second Army, ending the combat phase in Schwerin. The 8th CIC detachment travelled with the Division.

On the town of Duez, five members of the Hitler Jugend were captured by the 8th CIC. The boys were all dressed in civilian clothing, but they were heavily armed. Hand grenades, pistols and rifles formed their portable arsenal. One of the boys had, in addition, a supply of tacks.

Under CIC interrogation, the youths admitted that they were part of a group of 200 Hitler Jugend members committed to cross the lines and harass Allied troops. CIC sounded the

83. 2d CIC Det Monthly Information Rpt, dtd 2 May 45 (SECRET), (Staff and Faculty Library).

[redacted]

alert to watch for 17 more of these members in the XVIII Corps area.[84]

Near the end of April, a series of quick CIC raids that developed from leads furnished by informants netted two enemy agent radio operators with their transmitters and an American-born woman spy who for five years had worked with the German Military Intelligence. At the time of her arrest, this woman was trying to get employment as an interpreter for the Military Government.[85]

9th CIC Detachment: The German Foreign Ministry Files

One of the most significant document finds of the entire European Theatre of Operations campaign was made by Special Agent George J. Novak of the 9th CIC Detachment in the waning days of the battle for Germany.

On 17 April the Ninth Infantry Division was operating in the town of Pansfelds in the Harz Mountains. Agent Novak, the sole CIC agent attached to the 47th Infantry Regiment, was directed by the S2 to take charge of a column of jeeps and search a castle in which German Foreign Minister Von Ribbentrop allegedly was hiding.

Novak assembled the column and headed towards the designated region. Little resistance was faced by the motorcade, but American soldiers lying in ditches alongside the roads continued to mop up the remaining German troops. The searching party found the castle, or chateau, deeply imbedded in the evergreen forests that utterly concealed it from air attack The place evidently had been chosen by the Nazis for its seclusion.

Novak led his small force into the castle. There was no sign of Von Ribbentrop, but there was a wealth of evidence that the Foreign Minister had been there. At the door of one of the buildings, the searchers were met by Baron Witilo Von Griesheim who had with him a large board containing keys to all the rooms in the castle where secret documents were stored.

84. 97th Inf Div G2 Periodic Rpt, dtd 6 Apr 45, in FUSA G2 Jnl and File, dtd 8 Apr 45 (UNCLASSIFIED),(Departmental Records Branch, AGO, Alexandria, Va.).
85. 82d Abn Div Situation Summary Nr 19, Annex Nr 2, dtd 27 Apr 45, in FUSA G2 Jnl and File, 30 Apr 45, L-558 (UNCLASSIFIED), (Departmental Records Branch,AGO, Alexandria, Va.).

[redacted]

As the Baron led Novak around the castle, he unlocked room after room in which documents were carefully stacked, in neat packages that bore mysterious numbers. Von Griesheim had a master catalogue and knew where to locate every one of the thousands of documents stored in the castle. Novak did not open any of the files. Realizing the immense importance of the discovery, he stationed Military Police around the castle with strict orders to allow no one to enter or leave the area. As an additional security reminder, Novak put up a CIC poster showing that the castle was off limits to all Army personnel.

After Novak had been through the entire castle he asked the Baron to accompany him and his interpreter back to higher headquarters. This was a polite way of telling the Baron that he was under arrest.

The Baron showed Novak a telegram which he had received several days before from Berlin, ordering him to destroy all the documents at once. The wily nobleman had burned, instead, some old newspapers to make it appear as though he had complied with the Berlin mandate. He told Novak that he had saved the documents so historians of the future could determine the facts and responsibility for the war.

And well they could. The pile of papers represented the German Foreign Ministry files from 1871 to 1944. Among the subjects covered were the official exchanges between Berlin and London during the Chamberlain years, the documents dealing with the German-Russian negotiations in 1939, and a letter sent by the French turncoat General Petain to Hitler in early August 1944, three weeks before Paris was liberated, in which the old Marshal had begged the Fuehrer to declare the French capital an open city and save it from destruction.

When the report of the great discovery reached SHAEF, a message came back immediately stating that nothing further was to be done until a two-man team representing the State Department and the British Foreign Office arrived to authenticate the material. The diplomats arrived, certified the identity of the documents correct as reported, and soon about 200 trucks came through the mountains to the castle and transported the documents back to Army headquarters.

Eventually, as Novak recalled, the documents were transferred to Berlin where historians assumed the task of studying

[redacted]

[redacted]

them. The documents also may have provided evidence for the trials at Nuremberg.[86]

The 29th CIC Detachment Moves Further East.

After its action in the encirclement and reduction of the Ruhr, the 29th Division moved on to the Elbe River, advancing their jurisdiction control to an area 120 miles further into central Germany, continuing their rear area mission of "Security and Military Government." Elements of the Division also participated in the fighting in the forest at Klotze.

After their arrival at the Elbe, the 29th CIC Detachment entered an occupational phase. Displaced persons and freed prisoners of war continually were a problem, streaming along major supply and communication routes. In controlling these people and guarding vital installations, the entire 29th Infantry Division had become engaged in basic counterintelligence duties.

The 29th CIC Detachment, supplemented Military Intelligence Interpreters (MII) and Interrogation of Prisoner of War (IPW) personnel, retained the same set-up as in the previous period-five operationally autonomous teams. Automatic arrestees, war criminals and security menaces provided the bulk of work for the Detachment's teams, although, "personalities," traitorous collaborators from various countries who sought to hide out on farms, in hospitals, and in obscure towns, were also discovered and turned over to their native countries through counterintelligence channels.[87]

It was in Luchow, however, a small town not far from the Elbe, that most of this detachment performed its investigations. The day before, Captain Mayfield and Special Agent Braude had arrested a woman and three civilian-clad German soldiers she was harboring. She quietly confessed.[88]

86. Letter from George J. Novak, Law Offices, Kuicek, Novak, & Kubicek, 837-841 Highley Bldg, Cedar Rapids, Iowa to Historical Project, Fort Holabird, Maryland, dtd 20 Dec 54, (UNCLASSIFIED).

[redacted]

002808

On 24 April, a fanatic Nazi woman was taken into custody by men of the 5th Armored Division and turned over to "CIC, Luchow," headquarters team of the 29th CIC Detachment.

There were a number of complaints against the woman. Denunciators claimed she had urged her fellow townspeople to withdraw their white flags of surrender, and had become quite bellicose when a picture of Hitler was "abused." Under questioning by CIC Agents, she expressed her admiration of Hitler, her opinion that victory would be Germany's in the end, and her wish that the German people would fight on to that end. The woman was sent back for internment.[89]

Three youths in civilian clothes, who turned out to be soldiers of the Wehrmacht (the oldest having served almost four months), were picked up by American troops at Kaltenhof, in the vicinity of an explosion at a railroad bridge. They were turned over to CIC, Luchow. Agents interrogating the trio had no luck until one cracked. Then the other two quickly confessed to sabotaging the bridge. All three had received sabotage training as part of their Hitler Youth training. They were sent to Camp "Q" Ninth US Army's Civilian Dentention Camp.[90]

Eight days before the Detachment's final case of the war, agents of the detachment located at the University of Berlin a complete collection of secret strategic intelligence documents, newspaper clippings dealing with economic and political subjects of all countries, and a card index file. The documents had been moved to Wieren by the Germans for sa safe keeping.

Captain Mayfield notified the Counter Intelligence Branch of the Ninth US Army of the find, expressing the opinion that the documents could be of value to the Psychological Warfare Division. No final record is available of the ultimate disposition of these documents.[91]

[redacted]

Last Case of the War for the 29th

By 9 May the 29th CIC Detachment was in the process of moving into a new area, but that did not hinder Special Agent Emmanuel Braude from following up some information provided by a former female Abwehr employee. She implicated a naturalized German citizen of Swiss birth as an agent of the German Intelligence Service. The man had lived in a Paris apartment house which the Germans used exclusively to house their confidential agents and informers. He had large sums of money at all times, though he had no apparent means of obtaining it, and he was seen on several occasions at a Parisian cafe which was a rendezvous for German agents.

Because of his detachment's temporary situation, Braude was able to give the man only a superficial interrogation. The CIC agent also searched the German's quarters, finding a large sum of money in new bills in series, parts to a radio set on which the suspect was working, and letters from the man's wife which were "of considerable interest," according to Agent Braude. These things were sent to Camp "Q" with the suspect.92

The informant who had provided the information, described by Agent Braude as "a woman of culture and education," was at the time of her interrogation an implicitly trusted employee of the British Military Government in Warendorf. She, too, was sent to Camp "Q" by the agent, but with instructions that she was to be handled tactfully. No charge was placed on her arrest report, but Agent Braude's report mentioned the possibilities that she was "either extremely clever or sincere in her dealings with Allied authorities." The report stressed that the woman had not been formally arrested, and that her assistance was to be viewed as voluntary. Special mention was made to ensure that she not be allowed to believe she was being traiorous by giving information about German agents to Allied authorities, but rather that she was helping Germany.93

[redacted]

[redacted]

On 3 April, in the town of Neunkirchen, a booby trap apparently mounted on the spring of a jeep exployed. One soldier in the vehicle suffered the loss of both of his feet and another was injured.

Agents of the 30th CIC Detachment, who were called in to investigate the incident, discovered only a few scraps of brown paper and a battered eight-inch piece of aluminum as remnants of the bomb. Further investigation disclosed that the vehicle had been parked outside an American occupied building over night under the "general surveillance of a guard in the vicinity." It was believed that the bomb must have been placed during this interval.

On the morning of 3 April, the jeep had been driven to another part of the town and parked outside a unit headquarters under constant observation of American soldiers. The driver came out of the building, moved the vehicle to the center of the road, and stopped while other soldiers climbed in. It was at this point that the booby trap was detonated.

The incident was another grim reminder that American troops had to maintain unceasing vigilance against sabotage acts by a still hostile populace. The report on the explosion stated: "Standard military booby traps and materials for makeshift devices must be assumed to be widely dispersed about this area. All that a would-be saboteur needs for another such act as this is carelessness on our part."94

CIC Agents in Germany had been accustomed to the fact that English-speaking German soldiers could take advantage of their linguistic ability in a number of ways. A possible new technique was revealed to the 30th CIC Detachment, when a deserter from a German espionage unit claimed that members of his organization might pose as Allied Military Police and misdirect convoys of Allied supplies.95

The 35th CIC Detachment: To the Salt Mine

Two major discoveries highlighted the 35th CIC Detachment's

94. 15th US Army G2 Periodic Rpt Nr 12, Annex 4, dtd 12 Apr 45, "In Occupied Germany," in G2 Periodic Rpts April 45, L-633 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).
95. XX Corps G2 Periodic Rpt Nr 324, dtd 28 Apr 45 in FUSA G2 Jnl, L-558, 28 Apr 45 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria , Va.).

[redacted]

2811

[redacted]

work on their move from the Ruhr to the Elbe. At Grasleben, a lead from Ninth US Army and one from 448th AAA Battalion directed CIC Agents to a salt mine. Exploring the mine, the only one in the area, the agents located the municipal files of important German cites, Reichsverischerungs Anstalt records, and records of the Reich Propaganda Ministry--430 meters underground. Pending the arrival of a T-Force group, Agents placed five of the persons involved in the operation in custody and placed guards at the mine.[96]

The second discovery, from CIC's point of view, was of greater significance. In the northern part of the Forest Letzlingen, Agents Darrel D. Drolsum and Alfred H. Ronleder had been searching for officials of the Kreis Gardelegen who were thought to be hiding there. The forest had been by-passed by American troops in their drive to the Elbe a few days before, and elements of the German Army, known to be in the area, had ambushed motor convoys and raided rear installations.

In spite of this, the two agents went about the business of systematically searching the forest. They interrogated all the civilians they encountered, a procedure which paid dividends. In one house in the forest the CIC agents made the most important arrest of the period. Although he was wearing civilian clothes, Major General Heinz Jost, head of all Gestapo activities outside the territorial limits of Germany, was recognized by the agents. This Nazi's connection with the Sicherheitspolizei and the Sicherheitsdienst, his position as Brigade Fuehrer of the Shutz Staffeln and as head of the "Amt Ausland" of Reichsicherheitshauptamt, classified him easily as one of the most dangerous of the enemy. He was believed to have been actively engaged in an underground resistance movement at the time of his arrest. The agents, with their quarry in tow, returned to the detachment.[97] Jost was evacuated to Ninth US Army's Civilian Internment Camp.[98]

[redacted]

CIC was apprehending Nazi Party leaders, major and minor, most of whom claimed that they had been "forced into the Party." But counterintelligence activity also had to include screening civilians, many of whom turned out to be members of the Wehrmacht.

Among the masses of displaced persons and prisoners of war, the CIC Agents discovered many counterintelligence personalities but the screening was at best a fairly porous seive. The extreme confusion attendant on the enemy's sudden reverses and the huge numbers of stragglers clogging the roads made for a "seemingly insurmountable situation." The only means to cope with the problem was the use of all echelons to aid in the screening; and, at times, this became the main duty of command channels.

In the days of May leading to the surrender, security patrols were kept in operation throughout the 69th Division sector. At first, these patrols were established to apprehend German soldiers, but their responsibilities were expanded to include the screening of civilians. Motorized patrols served as roving road blocks and were also employed to check on civilians violating curfew regulations.[99]

The 83d CIC Detachment: No Detours

Under XIX Corps, the 83d Infantry Division was one of the Ninth US Army units that sped straight to the Elbe, with no detour for the Ruhr. From the Oberkassel-Neuss arena of counterintelligence, the CIC Detachment with the Division found itself in a very fast-moving situation until the Elbe was reached.

There was no opportunity to follow cases through to a logical conclusion. "Only the most temporary provisions for civil security" were undertaken, and those provisions had more to do with the maintenance of military security than with civil arrangements. Key German government and Nazi Party officials, the detachment discovered, had fled the larger towns in the wake of the Allied advances. In smaller towns most of the key officials who remained behind tried to hide, and five even committed suicide.

German civilians, in some instances, encouraged CIC

[redacted]

Agents to shoot local officials rather than arrest them and also proved ready to lead CIC Agents to caches of arms and equipment to prevent their use by fanatical opponents of the occupation.

In Eschershausen, about half-way from the Rhine to the Elbe, agents of the 83d Detachment came upon the Stein Company, engaged in the manufacture of aircraft for the Luftwaffe. Ten officials of the company were apprehended, arrested and forwarded to the Ninth US Army Interrogation Center.

The Stein Company conducted most of its operations underground with the use of impressed labor. CIC interest was channelled mainly into two concentration camps established near the company and upon Schutz Staffeln personnel who operated the camps. In addition to arresting the ten company officials, the detachment discovered some official papers in the home of the leading Schutz Staffeln figure, and forwarded them to the 219th CIC Detachment.

Many party records were discovered intact, as a result of the speed with which the tactical forces advanced. In one town, the removal of the enemy had been so swift that CIC Agents found a half-consumed cup of tea and a piece of toast still on the desk of a party official at Kreis level. Sealing those buildings in which Nazi records were kept remained a preliminary CIC duty.

In almost every town entered by 83d CIC Agents, enemy communication facilities were found to be in working condition. CIC had to make sure that these communications were neutralized at once, a task which required coordination with Signal personnel. Smashing telephone cables with an axe was forbidden, for it was essential to preserve the systems for later communication with rear areas. The trained Signal personnel who accompanied CIC on its communications forays accomplished their mission by simply removing certain vital parts from the telephone equipment.100

The 83rd CIC Detachment arrested a Polish national who claimed to be an Office of Strategic Services operative. The Pole knew so much about the operations of the organization that the CIC agents were convinced that, if his story was not true, he was at least a clever enemy agent. The detachment,

2814

[redacted]

still on the move, sent the Pole to the Ninth US Army's Interrogation Center.

Two days later, on 12 April, a German suspect said that up until 1942 he had veen an Abwehr agent, "with the work of sending spies and saboteurs to the United States and Britain," and that he later became a Signal non-commissioned officer in German Naval Intelligence engaged in deciphering Allied codes. He, too, was sent to Ninth US Army Interrogation Center.

Once the Division reached the Elbe, the Detachment moved into a static security phase, setting up headquarters at Calbe, near the Saare River. More permanent steps were taken to ensure the security of the Division area.

Travel was frozen throughout Division area. Agents discovered that most of the violators were German soldiers in civilian clothes, attempting to return to their homes. In the first five days, fifty of these POW's were apprehended.

A report of Wehrwolf activity in Calbe precipitated the arrest of five alleged leaders, two of whom, denied any connection with the underground organization. All five were evacuated as security threats.

A youthful German caused the only terrorist activity in the area when he fired upon an officer of Division Rear Echelon. He missed, but four American soldiers who witnessed the incident did not, and the German youth was killed. "This occurrence has had a salutary effect upon the population of Calbe," the detachment's report noted.

In the early days of the occupation-type activity in Calbe, many concentration camp evacuees arrived in that area from Magdeburg. When a middle-aged man who claimed to be a factory worker stated it took him a week to get from Magdeburg by bicycle, CIC agents were suspicious, and when the suspect produced a deferment paper which appeared to be about two weeks old but which was dated 1943 the Agents evacuated him as a probable enemy agent.[101]

As the Russians moved toward the American positions on the Elbe, an increased flow of refugees from the Russian occupied area attempted to reach American-held territory. The

[redacted]

Counter Intelligence Periodic Report for the rest of the time the detachment operated in Calbe indicated that "every effort was made to prohibit entry into the American lines from the Western side of the Elbe River...." In spite of this action it was feared that many persons of counterintelligence interest might have successfully made their way through. It was even opined that "some important Nazi officials, particularly from Berlin, may now be found in or out of hiding within the American and British areas of occupation." However, the detachment made no arrests.[102]

Waterborne Saboteurs

On 20 April, three would-be saboteurs were brought to the 83rd CIC after their attempt to destroy Allied bridges across the Elbe River met with failure.

The men were members of the Kriegsmarine and formed a team that had the mission of placing a torpedo mine under a bridge near Breitenhagen. The first two were captured shortly after dawn near Breitenhagen; and the leader, a lieutenant, was located during the afternoon by troops who found him lying concealed in the bushes approximately 400 yards from the bridge. The team had lost their bomb when they had become tangled in mine-sweeping devices. These snares had set off an explosive charge that totally disorganized the swimmers.

The prisoners mentioned that a second team composed of four men had been assigned a similar mission of destroying another American bridge if the first team failed. All seven men of the two teams were volunteer swimming experts who had received training in underwater demolition at the Kriegsmarine Specialty School in Venice, Italy. After completing their training, the men had been assigned to their original units to await a call for special service. On 17 April, they had assembled in Berlin, where they received instructions from a Kreigsmarine officer in the use of a torpedo-type mine. The next day they were taken by truck to a forest near Steckby. Attached to the truck was a trailer bearing two of the torpedo mines.

At 0100 hours on 20 April, the group had backed the trailer into the Elbe River, unloaded the mines, and proceeded downstream to the Allied bridges. Darkness and river currents worked against the teams and they became separated. Three

[redacted]

hours after their entry into the Elbe, the captured men encountered the minesweeping boom and nets that had foiled their sabotage plan.[103]

84th CIC Detachment: A Berserk Burgermeister

Screening of civilians for employment by Military Government was a necessary but often tedious duty for CIC agents. Occasionally, the routine of this screening was interrupted by an individual who proved especially interesting. Such was the case in the town of Bomengion, which agents labeled "The Case of the Berserk Burgermeister."

When the commanding officer of a combat battalion situated near the town noticed that an unprecedented number of official passes seemed to be circulated among the civilians, he decided to have a few words with the local Burgermeister. His efforts to track down the town official led to a Rathaus where the Burgermeister was "in a rather unprofessional situtation" with a pretty young stenographer. Feeling that such behavior was hardly within the category of official business, the battalion commander referred the matter to Agents of the 84th CIC Detachment.

From this point, the original account of the investigation continues: "Like a Congressional committee, CIC descended upon the hapless Burgermeister. The latter, of Napoleonic height, 35-40 years of age, with popping blue eyes, was again enjoying the delights of feminine companionship. Thus encouraged, CIC took to their task with unbounded zeal. Six more women were discovered in connecting offices. Further search revealed five policemen and a jail in which was lodged an irate individual who claimed that he was the real Burgermeister and that the incumbent Don Juan was a usurper; in fact, a nut, who only recently was released from an insane asylum.

"Presented with these allegations, the incumbent was indignant and with kindly gestures waved his accusers away. Much against his wishes, the pseudo-Burgermeister was searched and papers found proving him to be a slightly cracked nut.

"Back at the asylum, the usurper was heard to remark,'It

103. XIX Corps G2 Periodic Rpt Nr 310, dtd 21 Apr 45, in FUSA G2 Jnl & File, 22 Apr 45, L-558 (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va.).

[redacted]

was a lot of fun while it lasted,' to which we can only echo our agreement."[104]

Other impostors encountered by 84th CIC could not be regarded so lightly. In Salzwedel, a CIC agent was approached by an auxiliary civilian policeman and requested to serve as an interpreter for a "CIC" officer who did not speak any English. This request became the first step of an investigation.

The agent discovered that a few doors from the headquarters of the local Military Government unit, a deserter from a German Parachute Regiment had set himself in office as the local CIC, and was freely conducting investigations. CIC hastily put this impersonator under arrest and added his name to the list of people to be tried by a Military Government court.[105]

The 97th CIC Detachment: Jackpot!

One of the more recent arrivals on the continent, the 97th Infantry Division moved from defensive positions west of the Rhine, where it had been under the Fifteenth US Army, to partake in the reduction of the Ruhr as a component of XVIII Corps of the First US Army.

Perhaps it was beginner's luck, but the 97th CIC Detachment, under Captain Oscar Grimes, wasted little time in establishing a favorable reputation for itself. Seventeen days after joining XVIII Corps, the detachment rounded up a substantial package of Gestapo operatives. The Corps Detachment Commander, making a "routine visit," was on hand when the agents of Division CIC went into action. Captain Albin P. Dearing, commanding the 218th CIC Detachment, was obviously so pleased with the catch that he authorized the official report on the case sent to higher headquarters.[106]

The chain of events leading to the Gestapo round-up began with the arrival of Mademoiselle Paulette Pauleo at the 97th

[redacted]

CIC Detachment Headquarters in Mulheim. Allegedly a French agent, the mademoiselle expressed a desire to culminate "two year' work of penetrating the Nazi secret services" by arresting high Gestapo officials--with American help, mais naturellement.

(b) The informant related two versions of her past. The first was that, as a native of Belfort, France, she had at the tender age of sixteen volunteered to work as an interpreter for the Deuxieme Bureau. Being fluent in German and Arabic as well as in her native tongue, she was suited for this work, and her subsequent thoroughness in that type of activity, she said, made the French aware of her possibilities as an agent. She was sent through the lines to report German troop dispositions and later to penetrate the German secret services. She possessed certain feminine charms and the frame of mind to use them to gain her ends. She said who was eventually a arrested by the Germans, imprisoned, "tortured,"[107] and sentenced to die. She escaped and, little by little, managed to ingratiate herself into the favor of the Secret Police to such an extent that she eventually became a prominent Gestapo agent. Her father had been an officer in the French Foreign Legion, she declared, adding one more note of dime-noval drama to her first story.

(c) Her second story differed in respect to her activities after she had passed through the German lines. She claimed this time to have been arrested and jailed for political reasons in Germany for seventeen months, at which time she was allowed to leave after giving her word "to behave." She said she joined the German Motor Corps, served loyally and retreated with the Germans toward the Rhine. When they were overrun by advancing Americans, she was captured and imprisoned "long enough to get another 'mission' from the French." She recrossed the lines, still in her Motor Corps uniform, into the outstretched arms of her German acquaintances "who had been pretty worried about her." From that time on, she said it was just a matter of getting along with the "right folks" until she came to the attention of Dr. Vende, Sicherheitsdienst Chief ~~in Cologne.~~ He recommended her to Klemmer, alias Klemmens, Kriminal Kommissar. Then she waited for the right moment to expose her colleagues.

At any rate, the informant led the agents to Klemmer's underground hideout, where they arrested Klemmer and three of his leading lieutenants, including the leader of the Nazi-

107. These quotation marks appear in the original report.

[redacted]

subsidized National Socialist French Movement, and four women agents of the German Secret Police.

These were the first ranking Gestapo agents of the Third Reich captured by any Allied agency and the action resulted in the collection of information on past activities and future underground plans "of this specially despised category of Naziism." A considerable amount of documents, false identity cards, uniforms and civilian clothes for escape purposes, weapons, police paraphernalia, and all the "drab panoply of cloak and dagger detective yarns" were discovered including poison, hair bleaching powders, and secret coded messages.

According to the Kriminal Kommissar, whose name ranked high on SHAEF's list of wanted persons, his orders had been to change identity, allow American troops to overrun his hide-out in the swift American deflation of German Commander Model's Ruhr pocket, and then spy on all Germans collaborating with the Allies, making lists of them while awaiting further orders.

The once-proud Nazis proved to be very willing to cooperate with their CIC interrogators, to the point of informing on each other and members of the group who had not yet been apprehended. The men had been in the service of Nazidom since the early days, and their high ranks indicated the esteem with which the Reich considered them. As captives, deprived of their deathgrip on the German people, these Nazis were ready to sell out anyone or anything. They were so despised by the German people that none had given them food or water in their travels; and, after Mlle. Pauleo had informed on them, CIC had received three calls from German civilians that they were in the area.

The girls, each of whom had been compromised in one fashion or another in earlier days and had eventually found their way into the Gestapo lair at Cologne, seemed penitent also in revealing their rather sordid pasts. One wished to get to her American father in Detroit or to her brother in the US Air Force. Another wanted to return to the two children she had borne to her uncle, whom she had married when the first child was on its way. A Third, a Dutch girl, who played a minor role in the attempted deception, sought to be an informant for the Allies to return herself to the good graces of the folks back home. The fourth, a comely miss who had been the cause of a row between the Kriminal Kommissar and his Kriminal Assistant, said nothing.

(C) As for Mlle. Pauleo--all did not go well for her either. By some odd twist of fate, a bona fide French penetration agent

[redacted]

showed up at CIC's headquarters less than thirty minutes after her departure with the CIC Agents. The Frenchman had been shot in the leg trying to escape from the very group which Mlle. Pauleo claimed to be exposing. Another French agent, a friend of the late arrival, had been killed in the escape. An American tank crew had found the successful escapee lying on a road and, after reviving him, had taken him to CIC at his request. He identified each of the gang, including Mlle. Pauleo, as Gestapo operatives. The mademoiselle, however, clung to her story of being a French spy, and since she was regarded suspiciously by both the Germans and the Allies, Division CIC left it up to higher echelons to classify her. Unfortunately, the complete absence of records of her final disposition give the case a "Lady or the Tiger" finish.

The Dutch girl, Maria Van Castel, was used by CIC, and she led them to a nestful of radio operators in the employ of the Gestapo. En route, she was mobbed by Russian displaced persons who recognized her as a Gestapo personality. In spite of this, she successfully carried out her mission and was later adopted by the 218th CIC Detachment to whom she rendered invaluable aid.[108]

All the prisoners, including Maria, were sent to the First US Army Interrogation Center after the Division had given them preliminary interrogations. Maria then was reclaimed by the Corps' CIC Detachment.

"Freies Deutschland"

Second Lieutenant Kurt F. Korf of a CIC Military Intelligence Interpreter Team (MII), participated at regimental level in interviewing members of the Dusseldorf Free Germany movement which had been formed prior to American entry into the city by consolidating five resistance groups into one. They told ~~of having selected five~~ leaders from among themselves to serve as officials at police headquarters in the town after they had jailed the Police President and Schutz Staffeln Brigadier General, who were key figures in resisting the Allied conquest of the city. They installed as Police President a Lieutenant ~~Colonel~~ who had public confidence and democratic leanings.

When one of the selected leaders returned to the jail later and was not heard from, a second went to see what had ~~happened and~~ he too disappeared; so did the Lieutenant Colonel. One of the remaining leaders made the educated guess that Schutz

[redacted]IDENTIAL

[redacted]

Staffeln Police leader Gutenburger of the city had discovered the rebellion and had countered it by killing the three Free German members along with two others, and allowing the jailed Nazis to be released. A German First Lieutenant, who had occupied a desk in the Police Headquarters until five minutes before the S2 of the 303d Infantry Regiment of the Division had arrived to arrest him, was cited as the executioner of all five of the resistance group.

When the Americans arrived, about two days after the Free Germany group had attempted their coup, the bodies of the five members of the organization were discovered. The Nazis concerned with their murder had gone into hiding or escaped.[109]

102d CIC Detachment: Among Those Arrested

In the early days of May, the types of individuals that the 102d CIC Detachment apprehended gave a summary view of counterintelligence activities as the Division settled into a semi-occupational role.

The discovery by a CIC informant of a scrap of paper carelessly discarded on a street led to the arrest of a Hauptscharfuehrer of the Schutz Staffeln, and former guard at Buchenwald Concentration Camp.

A prosperous land owner was turned over to the CIC agents when he was heard to state that he was living for the day when the Americans would leave and he could put the Poles back to work.

The mayor of Kassieck was arrested and jailed, after an ultimatum period during which he had failed to produce the murderer of an American soldier.

A German escapee from an American POW enclosure was brought to the CIC office by a Polish displaced person whom the prisoner had asked for a set of false identification photos, mistaking the DP for a German. The entrapped POW made another break for freedom in front of the CIC office but was recaptured and eventually placed under protective custody of a Russian provisional guard in the POW cage.[110]

[redacted]

[redacted]

These were all isolated cases and were dealt with individually. In addition, the 102d CIC agents encountered several people whose arrests had wider implications.

Division Combat troops flushed out four armed Schutz Staffeln men hiding in a home in Bonn, a building which investigation revealed to be a station along the underground that was transporting Schutz Staffeln men back to their homes clandestinely. The woman who owned the home was a former German Army nurse who told CIC interrogators that her obligation to German soldiers was far greater than any American Military Government proclamation.[111]

On 9 May, the 102d CIC Agents operating out of the town of Neuhaldensleben uncovered and arrested four Gestapo agents, who in their confessions compromised almost the entire police unit. In this fashion, some investigations expanded into matters of further counterintelligence interest.[112]

503d CIC Detachment: Division Spearheads VII Corps' Advance

After assisting in the complete encirclement of the Ruhr, the 3d Armored Division raced across to Dessau on the Elbe in the fore of VII Corps' attack, crossing the Weser River, passing south of the Harz Mountains, and then swinging northeast to their objective. Again the rapid movement interfered with CIC's attempts to provide security. It also made evacuation of arrestees and displaced persons impossible, and thrust upon Military Government an extremely difficult collection and concentration problem, in which CIC gave assistance. Facing increasing hostility on all sides as they moved deeper into Central Germany, the troops became more security conscious, making the security task somewhat easier.[113]

After relinquishing Dessau to the 9th Infantry Division, the 3d Armored moved to a rest and rehabilitation center where the 503d CIC Detachment kept working, covering an area of one

[redacted]

thousand square kilometers which later was expanded to "about 3,500 square kilometers." The change occurred after a plan for the systematic coverage of the first area had been developed.

Division IPW and MII personnel were placed at the disposal of CIC, and, after establishing offices in five towns, the detachment set about the business of rounding up automatic arrestees and German soldiers in civilian clothes through town screening procedures. In two weeks, 742 of the civilian-garbed POW were taken and more than thirty towns were screened. A total of 138 Nazi officers within the automatic arrest category were apprehended. General security was rated fair.[114]

Extensive Record Find

Certainly one of the major record "finds" of the campaign was accomplished through the efforts of Special Agent U.S. Collins and Agent P.L. Ettlinger of the Detachment. Military Government in Sangerhausen had a tip that Schutz Staffeln men were living in the Kryffhauser Hotel there, and the two CIC Agents took off after them. They found no Schutz Staffeln agents, but they did find 200,000 case files that dated back to 1934, each case concerning an investigation of a Schutz Staffeln agent and prospective bride. The hotel had become the main office of the marriage record bureau of the Schutz Staffeln, a Heiratz Amt. Before any member and his frau-to-be could be married, they had to send their family background records to this office where an investigation was undertaken to ensure that both the Schutz Staffeln man and his future bride had only Aryan blood in their veins. Both Waffen and Allegemein Schutz Staffeln men had submitted these applications, and pictures of half of the applicants were still in the files.[115] Additional records were unearthed by members of the Combat Command "B" CIC team, including the personal correspondence of Schutz Staffeln Obergruppenfuhrer Richard Hildebrandt. The records were later inspected and removed by members of First US Army's Documents Section.[116]

[redacted]

Underground

Two members of the Hitler Jugend provided harassment for the 503d CIC Detachment by cutting two wires. CIC and combat troops elicited the names of the guilty by applying pressure on the townspeople of Kinsdorf. Two other cases of wire-cutting in a forest in the area remained unsolved however, and the delayed report of the discovery lessened the possibility that they ever would be.

Seven Nazis and Sturm Abteilungen of Wickerode who threatened a Military Government-appointed anti-Nazi policeman with assassination were arrested. But these instances were minor compared to CIC's detection of the Pionier Sonderkommando Wehrwolf group.

The members of this group were Wehrmacht engineers, who had been hurriedly trained and equipped, and sent through American lines for the purpose of disrupting supplies and communications. This was the first organized resistance the Detachment had encountered, but it could hardly be called "underground" even though it bore a Wehrwolf designation. In fact, its members all wore uniforms. Of the five captured by the Detachment, only one--who claimed to have deserted--was not officially garbed.[117]

The lead which awakened CIC to the threat of the sabotage group was furnished by a captain who found the group's log book in a cave in the area on 25 April. The log gave the names of the members, their area of operations and an account of the damage they had caused up to the date it was found.[118]

Three days later, Division troops captured the first two men in a field. Both were in uniform and armed, and had demolitions in their possession. Captain Black and an IPW Officer questioned the men, thus obtaining additional background information on the group.[119]

Although the five prisoners claimed that a much larger

[redacted]

number were apparently still operational, no others were rounded up in 3d Armored area.[120] Agents Ettlinger and Veitner (MII) and Collins followed up a tip by making the rounds of Gast-Hauser Taverns in three villages; and uncovered not beer, but Wehrmacht radio equipment in each of the establishments. The agents recommended an area-wide continuance of these searches to ascertain whether this was an established procedure with the enemy.[121]

Numerous additional prisoners and security threats and nearly two hundred automatic arrestees were tagged by the Detachment during the two-week period. The thirty CIC, IPW, and MII personnel were still providing counterintelligence coverage for the 3,500 square kilometers at the end of the conflict in Europe.[122]

505th CIC Detachment: Murder, Wehrwolf Style

On 9 April, Amtsburgermeister Peiper of the town of Kirchlegern was shot shortly after nightfall. The following morning, a police officer who had been at the scene immediately before and after the crime, reported to the 505th CIC Detachment. Stationed near the office of the murdered man, the police officer had observed the prospective murderer for several days previously--a young man who had always beat a hasty retreat when asked what he wanted. The day of the murder he replied to the Policeman's question that he wanted to speak to the Burgermeister about a personal matter. The policeman told the youth that the Burgermeister was in his office, sent him in, and then started home for dinner.

Several moments later, two pistol shots rang out. The officer hurried back and found the Amtsburgermeister Peiper lying wounded on the floor of his office. He coughed two or three times and rolled over dead. Beside him on the floor was a scrap of paper, the word "traitor" scrawled in red crayon and beneath, in ink, the inscription, "Die Wehrwolfe." Numerous young Germans had responded to the call to resistance

with a vengeance, but this was the first instance that 505th CIC Agents encountered where an overt act had been committed by the Wehrwolf since the organization's formation was announced by German radio broadcast on 1 April.[123]

CIC Agent in Emissary Group

With the troops of Combat Command "R" drawn up outside Rintelin, an emissary group from the unit composed of the S2, the IPW Officer and CIC Agent Krekow, went into the town to persuade the German commander to surrender and spare destruction. On the next day, the German Commanding Officer agreed to surrender the town and the successful emissaries returned. In the report on the affair, notation was made that "the value of such an undertaking is that, even if the Commanding Officer will not give up, the townspeople learn that the offer has been made to save their city..."

Nazi Hater?

505th CIC Agents were paid a visit by a 20-year-old German who offered "any and all assistance against the Nazis." The youth's anti-Nazi feeling seemed, to the Agents, to have developed during a year's imprisonment in a concentration camp.

Detailed questioning of the youth by the CIC Agents made his story less credible, and a careful body search proved his downfall. In the boy's shoes were two certificates signed by fellow soldiers which acknowledged the fact that he personally accounted for two American tanks, the latest on 11 April.

These documents forced the young soldier to admit that he had hoped to pass as a civilian, go to his home, and work for CIC until such time as he was contacted by a Nazi resistance group at which time he could show the certificates of his military prowess to prove that in reality he was working against the Americans. He had one regret: The rapid advance of the 5th Armored Division had prevented him from destroying his third tank for which he would have been awarded a fifteen-day furlough.[124]

508th CIC Detachment: Moving with Division

Agents of the 508th CIC Detachment, under command of 1st Lt Arnold G. Huebner, accompanied the Eighth Armored Division as it moved north, across the Lippe canal at Dorsten, and then east to Sennenlager. After helping in the reduction of the Ruhr pocket, the Division joined units that were completing the destruction of German panzer forces in the Harz mountains. OB, PI, MII and IPW teams were assigned to CIC to aid in overcoming occupation problems. Other than this fact, no reports remain to indicate what the 508th CIC was doing or how they were doing it.125

Chapter 3

FROM THE RHINE TO THE DANUBE

Several Third US Army units had fought across Germany in a wide arc, some ending in a southerly push to the Danube. On 22 April, the III and XX Corps established bridgeheads over the Danube River to the east and west of Regensburg. Other units, notably the 11th Armored Division of the XII Corps, pushed into Austria, arriving in Linz on 5 May. One day later, the V Corps, a reinforcement from the First US Army (then with the Third US Army), entered Pilsen, Czechoslovakia, to wait for Russian forces along an agreed line of restraint.

The Sixth US Army Group had met considerable opposition from the enemy in its advance from the Rhine, but it continued on. On 16 April, the XVI Corps took Nurnberg, on the 30th, Munich, and on May 4 Berchtesgaden and Salzburg. The XXI Corps and VI Corps crossed the Danube on 22 April, and on 3 May, Innsbruck fell. Later, elements of the 103d Infantry Division moved into the renowned Brenner Pass.[126]

Sixth Army Group; General Survey

At Sixth Army Group, the Monthly Counter Intelligence Report covering the closing phase of the ETO Campaign contained several important generalizations in the survey of the counter-intelligence situation. The rapidity of the advance of Army Group forces from France to Bavaria had caused security coverage of the area to be "cursory." But, despite the broad area that had come under Seventh Army control, no major act of sabotage was reported during the victorious drive across southern Germany.

A profound sense of relief that the war was almost over was noted among the civilian inhabitants. In most villages, counterintelligence authorities received cooperation once the rabid Nazis were interned, and no shortage of informants was reported.

In some instances, the speed of the forward rush did not permit close interrogations. Suspects had to be detained even when the burden of proof had not been established. Counter-intelligence units were urged to weigh carefully each apprehension that did not fall in an automatic arrest category.

126 Op cit. Eisenhower, pp 412-418.

[redacted]

[redacted]

During this final period, little was heard or seen of the German Intelligence Service. Apparently GIS personnel had fled or gone into hiding. The organization had prepared for retreat by destroying its files in such key cities as Karlsruhe, Stuttgart and Baden-Baden.

Military security by Sixth Army Group forces remained reasonably good during the rapid advance. CIC detachments watched for signal communications available to the enemy or the civilian population, and agents discovered that, in many towns, the telephone systems were still in operation. Signal Corps personnel assisted in the neutralization of these systems.

With the Allies occupying a large portion of southern Germany, the problem of frontier security loomed large for counterintelligence officials at Sixth Army Group. The French-German border was patrolled on a twenty-four hour basis by elements of the Seventh Army, and, by agreement with Sixth Army Group, G2, the Swiss-German border was declared a "prohibited zone." Orders were issued for the entire border zone to be evacuated and then protected by barbed wire fencing and a minefield. Once these barriers had been erected, the area was to be guarded by sentries and patrols with orders to shoot any person travelling within the prohibited zone. Pending completion of the fencing, Sixth Army Group troops were ordered to seal off the border "by any means at their disposal." [127]

307th CIC Detachment: Catching Remnants of the Rout

While the scope of Seventh Army CIC's activities remained the same in April as in previous months, the quantity of work to be accomplished, increased manifold. The speed of the advance meant that counterintelligence measures, instituted on the run by divisional detachments, could never be completed. To the 307th CIC Detachment fell the task of apprehending the remnants of the rout.

It was discovered that Nazi officials and black list personalities had left the cities before the Allied occupation and had taken refuge in small outlying villages in the Seventh Army area. Small squads of agents from the 307th CIC were continually dispatched to the towns reported as possible centers of clandestine activities.

Flexibility in the deployment of personnel was a necessity. Available security resources had to be spread thinly over the

127 6th Army Group Monthly CI Rpt No 13, for 25 Mar-25 Apr 45, (Unclassified) (Departmental Records Branch AGO, Alexandria, Va.)

[redacted]

large service area of Seventh Army. Even with decentralization, there was more than enough work for every member of the detachment.

During April, two reports of political unrest among the civilians in Seventh Army service area were investigated by CIC agents. One group of alleged anti-Nazis had been accused of starting a movement against former Nazi party members holding public office. Carrying out the Military Government structure that forbade opposition to the duly constituted authorities, CIC investigated and warned the individuals supporting the movement.

A second group of Germans who fell within the 307th CIC's jurisdiction were found to be confiscating food not only for German ex-soldiers hiding in the woods but also for frightened Nazi party members still hiding in the cities. The stock of hoarded food was seized and the leader of the movement was arrested and turned over to Military Government.[128]

Gestapo Agents

The disintegration of the German Intelligence Service, which accompanied the repeated setbacks of the German Field forces, made spy-catching a secondary task for 307th CIC agents many of whom were busy rounding up Gestapo members, and other counterintelligence persons in automatic arrest categories.

The cases of "special interest" reported by the 307th CIC Detachment dealt primarily with apprehended Gestapo men, some of whom attempted to evade arrest through strategem. Among those was a man named Laszlo Santa.

On 7 April, Santa volunteered to 307th CIC agents, information about Nazi and Shutz Staffeln individuals in the cities of Darmstadt and Zoningenburg. When questioned about his activities, Santa told the interrogators a story of his life that "would label him as a nonpartisan in any Nazi activities." CIC accepted Santa's account, grateful for the information that he had provided.

But Santa overplayed his good luck. On 9 April, he returned to the CIC office with further information. This time the interrogating agents, Lt. George A. Perper and Chandler Flickinger, were more skeptical of Santa's background. Intensive questioning finally brought out his true past. Santa had been an agent for the Gestapo and the Abwehr. He had performed various missions in France and Belgium before the outbreak of war and had been imprisoned by the Belgians before the Nazi

128 Ibid

[redacted]

conquest. From 1940 until the Allies neared Darmstadt, Santa fulfilled the typical Gestapo role of informing on anti-Nazis, communists and foreign workers. After obtaining a full confession from the man, CIC recommended that he be interned as a security menace. [129]

CIC and The German Civilians

Unlike some of the CIC units in the north, the 307th, CIC did not advertise itself as the "American Gestapo." Agents found that by taking a tough and disciplined attitude towards their work, they made a greater impression upon the German civilians than by attempting to intimidate them. Most of the agents from the 307th CIC were well seasoned veterans whose service extended back to the North African campaign. They were "not in any mood to be pushed around by the Germans," and they discovered that once the civilians learned that CIC was an intelligence unit, cooperation was certain. The civilians obeyed the orders of the CIC agents, and often seemed frightened of the counterintelligence operatives although "CIC gave them no outward reason for that feeling."

While the Germans were, on the whole, cooperative with agents of the 307th CIC, there was no rush of informants to the Detachment headquarters. The Germans accepted their lot as a conquered people but did not over extend themselves on behalf of the occupying force. [130]

307th CIC Agents at Dachau

The Commander of Seventh Army, General Patch, had consistently demonstrated his faith in the agents of the 307th CIC. The efforts of the Detachment in Southern France and Alsace in making the Seventh Army area "off limits" for German Intelligence, justified his confidence. When the Seventh Army forces reached the Dachau concentration camp, scene of the Nazis' most brutal and wanton outrages against their prisoners, General Patch requested the 307th CIC to provide a team of agents to handle the preliminary investigations.

The two agents on this team were the first investigators to arrive at Dachau. Their immediate mission was to weed out Shutz Staffeln and other Nazi officials who conceivably had gone undercover in an effort to escape retribution for their crimes.

[redacted]

Among the camp officials that the agents plucked from hiding, was a Dr. Schmidt masquerading as a hospital patient. In general, CIC agents discovered that the men who had been the harshest guards were the most cowardly when imprisoned by the Americans.

To assist in the uncloaking of Dachau's personnel, the CIC team organized committees of inmates, representing every nationality present in the camp. These committees were also used to screen the people in the camp for their nationality, and to spot individuals who might be of counterintelligence interest.[131]

Preparations to Reduce the National Redoubt

As elements of the Seventh Army started their southern swing towards Austria, Allied authorities feared the possibility of a German national redoubt near Berchtesgaden, which fanatic Nazis would defend to the last man. CIC agents, serving with Seventh Army, were alerted to this possibility and specially schooled in the most recent techniques of German sabotage. They were shown how the dangerous explosive, nipolite, could be moulded into the lining of raincoats, belts, shoes, and other wearing apparel. All the last-minute training was in anticipation of, what Allied Intelligence believed to be, a diehard Nazi sabotage campaign.

What the Americans eventually discovered was in sharp contrast to what they had expected. According to one of the 307th CIC agents, the "Germans had had enough of war," and the meager preparations for a resistance campaign at Berchtesgaden supported this conclusion. The supposed redoubt "could not possibly have been used as a base for a German military attack." However, there were some plans, for industrial sabotage, that never left the drafting stage. Funds that had been earmarked for this sabotage were intercepted at several places by CIC, and the speedy reconnaissance of the Berchtesgaden area, by elements of the Seventh Army, set the Allied authorities at ease.[132]

Gold in Austria

During one of the waning days of battle, while elements of the French First Army penetrated into the Tyrolean regions of Western Austria, a pastor presented himself at the 307th CIC office. He revealed that he had been formerly connected with the German Foreign Office and was apparently a highly trusted agent. He came to the Detachment, to tell CIC about two caches of gold bullion which the Germans had hidden in the area being overrun by the French forces. The pastor preferred that the Americans should recover the bullion rather than the French, who conceivably might discover it by accident.

Special Agent Victor de Guinzboug was called in to take charge of the recovery operation. Considerable care had to be taken to prevent arousing French suspicions when an American convoy entered their zone. Therefore, de Guinzbourg planned to have the convoy wait nearby, while he accompanied the informant to the supposed location of the gold cache.

The plan was executed as scheduled. After the entry into the French zone, de Guinzbourg and the pastor went to one of the storage points, a building which at that time was occupied by a group of French WACs. According to the Germans, the gold was stored in the cellar, under a pile of coal. The problem facing de Guinzbourg was how to get at it. The CIC agent ordered the convoy to draw up near the building. Then, assuming his most commanding appearance, de Guinzbourg entered the temporary barracks and ordered the WACs to leave. The squad of military police, who had accompanied the convoy, rushed into the building, searched the cellar, and uncovered several tons of gold. The soldiers hoisted the precious metal bars up the stairs from the cellar, out of the building, and into the waiting trucks. The operation went quickly, without a "hitch," and the convoy was out of town before any trouble could start.

This escapade was only the first phase of the gold-seeking operations. The second cache was not far from the first--also within the French zone of operations. The German pastor lead Agent de Guinzbourg to a farm house, where the two met a farmer and his wife. After telling the couple that he had come to "fetch for the Americans what the Germans had left," the pastor was shown the hiding place and Agent de Guinzbourg quickly had the bullion bars loaded onto trucks. Without further ado, the treasure-laden caravan sped back to the American zone.

The fortune in bullion was turned over the Seventh Army finance officer, once the convoy had returned, and the Americans deposited the funds in the Allied account. Almost eight tons

[redacted]

of gold had been recovered as a result of the snatch operation. [133]

Legal Knowledge Needed

After the 307th CIC had been in Germany for more than two months, Major Alvie L. McDuff, the Detachment Commander, noted that the agents' operations had shown a lack of knowledge about the legal aspects of investigations. He suggested that CIC personnel be trained in the formal definitions of espionage sabotage, and treason so that adequate facts could be presented in a proper manner in the cases brought to trial. With arrest lists swelling daily, it was increasingly important that the individuals interned by CIC were rightfully detained. [134]

303rd CIC Detachment: Intelligence Center

The tremendous volume of counterintelligence work during April, motivated Third Army to establish an Intelligence Center to expedite the handling of personality and organization targets. By the close of the month, 44 officers and 316 enlisted men were on duty at this Intelligence Center.

At the beginning of the month, the Third Army Interrogators had to adopt a policy of brief questioning of suspects, primarily with the aim of extracting tactical information or establishing identity. When the Third Army Intelligence Center was set in operation, interrogations were carried out more effectively and prisoners were routed to the agencies that could best use their information. Among the branches that were included at the Intelligence Center, in addition to CIC interrogators were: a Research Section for developing counter intelligence and intelligence targets; Counter Intelligence Personality files; Enemy documents section; "T" Branch activities; Advance Censorship Detachment; and War Crimes Section with personnel furnished by the Judge Advocate General.

The small nucleus of CIC agents, working with enemy documents, personnel who staffed the Research Section, were able to utilize information for use both by lower and higher echelons. The records developed by this section afforded an accurate check for corps and division CIC units when suspects were apprehended.

134 Ibid.

2835

[redacted]

In addition, the counterintelligence personnel operating at the Third Army Intelligence Center were supplemented by fifty clerks and linguists, procured through reinforcement channels. These men were grouped into "Security Detachments" that were employed under CIC direction.

Allied Army Members Screen Displaced Persons

The Third Army Intelligence Center effectively reduced the burden that previously had been borne by corps and division CIC units in the field. This was actually the second boon that Third Army CIC had received within a month. Late in March, a special unit composed of members of the Belgian, Dutch, French, and Polish Armies, and augmented by displaced civilians, who served as interpreters, had been organized into teams for the purpose of screening Displaced Persons. Military Government assumed administrative control of these teams, while G2, operational supervisors, and CIC directed their operations.[135]

Non-Combatant Identification Credentials

The administrative shufflings that helped to centralize counterintelligence activities in Third Army, clearly aided the 303rd CIC Detachment's operations in April.

As the campaign neared a close, CIC kept wary of all possible German Intelligence Service attempts to infiltrate Allied lines. A large number of non-combatant personnel, (war correspondents, Red Cross workers, and technical observers), operating with the US forces, possessed credentials that could be utilized, if captured, by the German Intelligence Service. Several of these non-combatants were already POW, and CIC Detachments were warned to check, closely, the credentials of every person in the combat area who claimed to be a civilian. Troop commanders were informed that the best counter-measure for possible German Intelligence Service infiltration was to be especially suspicious of individuals in non-combatant categories and to refer, to CIC, any person who could not be positively identified.[136]

German Non-Commissioned Officer in Monk's Clothing

The 303rd CIC agents found that in the face of the rout of

[redacted]

German field forces, Wehrmacht members deserted in droves. These German soldiers, properly POW, hoped, by donning civilian clothes to escape internment. There seemed no limits to which the soldiers would go in attempting to disguise themselves.

An agent with the 103rd CIC Detachment, while conducting an investigation of suspected Wehrmacht members, encountered two Franciscan monks. One proved to have a valid status in the Brotherhood, the other, replete with a six day growth of beard to enhance his disguise, turned out to be a former German non-commissioned officer. [137]

As the close of hostilities neared, in May, deserters from the Wehrmacht increased to such an extent that highways were choked with individuals in uniforms, in mufti, and in combinations of civilian and military garb. CIC agents could not check all these soldiers, and strays wandered, virtually at will, through areas that had not been consolidated by Allied troops. [138]

203rd CIC Detachment: Civilian Reactions and Attitudes

Agents of the 203rd CIC found that gauging civilian attitudes in the wake of the Allied rush to victory was a difficult matter. The first reaction, from all overrun sectors, was relief that the war had now passed them and, with the exception of diehard Nazis, a "wait and see" attitude seemed to prevail.

There was a difference, however, between the reception that the troops had received in the Rhineland and the reception in central Germany. In general, the Americans were eyed coldly. In the heavily-Catholic Rhineland, people had stayed behind, waiting for the Allied occupation, despite threats of coercion. Here, in a section of Germany which had been among the first to align with the Nazi party, hostile elements had been swelled by the influx of refugees from both the eastern and western areas of Germany.

The civilians attempted no uprisings against their conquerors, but cooperation was often reluctant. Goebbel's propaganda, frequently shrugged off by civilians of the Rhineland, had taken a deeper hold in central Germany, and ever-increasing Wehrwolf threats restrained individuals who wished to cooperate with the Allies.

---

137 3d Army G2 Information Bulletin #47, Annex 2, dtd 25 Apr 45, in FUSA G2 Jnl & File, 26 Apr 45, (Unclassified), (Departmental Records Branch, AGO, Alexandria, Va.).

138 3rd US Army Monthly Periodic Rpt. No 3, for May 45, dtd 25 May 45, (SECRET), (Staff and Faculty Library).

Typical was the case of an individual, screened by the Allies, and found suitable to serve as Burgermeister of Goettingen. After tentatively accepting the appointment, the man refused the office out of fear for his personal safety. CIC had proof that Wehrwolf threats had caused this change of heart.

Whether the Wehrwolf was actually effective in promoting a resitance campaign was not CIC's only concern. The organization could do vast damage by serving as a propaganda mill and creating a fear psychosis among the German civilians in occupied territory. [139]

Informants Report on the Wehrwolf

According to the report of a former administrative employee of the Gestapo, on about 15 April, high officials of the Reichssicherheits-Hauptampt, the party security organization, came from Berlin to Gestapo headquarters in Nurenberg. These officials along with local Gestapo and Schutz Staffeln leaders, were entrusted with the mission of organizing the Wehrwolf movement in Nurenberg. Their aim was to enlist Schutz Staffeln men, party officials, discharged Wehrmact members, and other Nazis in a "coming freedom movement" (Kommense Freiheitzbewegung). This organization was scheduled to materialize instantly, prepared to operate as soon as the Allies occupied an area. Its functions were dual: to terrorize Germans who were inclined to assist the Allies, and to sabotage Allied Military installations and communications lines. The group's ultimate purpose was to render Allied military government so ineffective that the Nazis could re-seize the reins of power. [140]

The plans of these fanatic Germans proved far more impressive than their deeds. On 25 April, the agents of the 203rd CIC captured Karl Volkert, a Nazi Kreisleiter, who was well aware of the resistance situation, in and around Nurnberg, and was quite willing to talk. When questioned about the Wehrwolf, Volkert suggested that the American Army had little to fear from the organization, because planning for the resistance had begun too late. Even as Kreisleiter, Volkert had been given no personnel, no workable plans, and no material for creating an effective Wehrwolf band. He summed up the Wehrwolf plans by stating that the Gauleiter had "just told us to do what we

139 78th Inf Div G2 Periodic Rpt No 126, 17 Apr 45, from III Corps G2 Jnl, L-623, 19 Apr 45, (Unclassified) (Departmental Records Center, AGO, Alexandria, Va.)

140 III Corps G2 Periodic Rpt No 137, dtd 27 Apr 45, in III Corps G2 Jnl 27 Apr 45, L-623, (Unclassified) (Departmental Records Branch AGO, Alexandria, Va.)

could." Volkert did mention, however, the possibility that some "loyal" Germans, influenced by the talk of a Wehrwolf organization, might attempt to accomplish, singly, what had been planned for a group effort.

After Volkert had finished minimizing the significance of the Wehrwolf, he went on to explain that the Freikorps Adolf Hitler posed a far more serious threat to the security of the Allied armies. Twenty-three men had been requisitioned from his kreis to receive training in guerilla warfare and sabotage at a special camp. These men were to form a hard core of armed resistance.

The Kreisleiter either could not, or would not, supply CIC with information on the location of this Freikorps' hidden weapons caches, but 203rd agents gathered this information from other informants and the contraband was collected from about six munitions stores.

Portrait of a Diehard Nazi

The CIC agents who interrogated Volkert had the opportunity of learning the philosophy of a diehard Nazi. The Kreisleiter claimed that his flight, from the city of Furth to a cabin in a forest, was not an act of cowardice. He firmly believed that the war would be decided within two weeks, probably in a German victory, and that by hiding he could escape capture by the Americans. Volkert felt that if he was apprehended his fate would be public humiliation before his countrymen, followed by execution.

When he was asked about the Nazis' probable course of action, the Kreisleiter retorted that, if by some remote possibility the Americans should win the war, Hitler would take up arms and join his troops in the field where he would fight until killed. In this way, Volkert contended, the Fuehrer, like Christ, would be martyred at the hands of his enemies, and his ideas would live on eternally.

The thought of defeat had plunged Volkert into despair. He envisaged that Germany would be turned over to the Jewish people who would seek revenge. A German victory, on the other hand, would assure that Germany would be rebuilt again in ten years, through the strength of Adolf Hitler. This, then, was the state of mind of one of the Nazi minions that 203rd CIC Agents encountered during the final days of battle.[141]

CIC Agents as Gravediggers

On the afternoon of 6 May, upon the recommendation of the Military Government-appointed Oberburgermeister of Landshut, three agents of the 203rd CIC Detachment, armed with shovels

141 III Corps G2 Periodic Rpt No 135, dtd 25 Apr 45, in III Corps Opns Rpts, 25 Apr 45, L-623, (UNCLASSIFIED). (Departmental Records Branch, AGO, Alexandria, Va.)

[redacted]

and pickaxes, proceeded to the local cemetery, where they had heard some items of interest were buried in a vault.

At the cemetery, the agents contacted the director who led them to the vault. Aided by two soldiers, from the 99th Infantry Division, the CIC agents pushed aside the marble cover of the tomb. They peered inside the vault and spotted seven cases, many loose bundles, and a coffin. With the aid of the director, the cases and bundles were dragged to the surface and pried open. Inside were many Wehrmacht records pertaining to the Kreis Landshut: officers' and enlisted men's personnel service records, secret honor court procedures, and other documents. Still unopened was the coffin that lay in the center of the vault.

The agents ordered the director to open the coffin, but, after bending over it several times, the man demurred, claiming that he required a gas mask since he "could not possibly stand the bad smell of the bones in this coffin." When he had asked for the gas mask a third time and started to perspire freely, one of the CIC agents became suspicious and climbed down into the vault to open the coffin himself.

The contents surprised even the agent. In the coffin were the Sturm Abteilungen uniform of a Sturmfuehrer, flags, boots, a picture of Goering, a silver bust of Hitler, books ranging from a Catholic almanac to a dogeared copy of Mein Kampf, and a photo of the cemetery director. The culprit's anxiety over opening the coffin had been justified.

The cemetery director confessed to the CIC agents that he had received the Wehrmacht files a few days prior to the entry of US troops. As for the personal items in the coffin, the director had placed them there"in order to have something to remember those times which were Germany's greatest." The CIC agents took the man back to headquarters. The report concluded with the statement that the erstwhile cemetery director "is now in an Army Internment Center trying to forget." [142]

206th CIC Detachment: Travel Control

During April, the 206th CIC Detachment made sure that strict travel control was maintained within the Corps area. In cooperation with Military Government, a uniform type of pass was created, and specimens of this single authorized pass were distributed to all individuals responsible for checking travel permits, in order that they might become familiar with it. Issuance of the passes was kept to the minimum consistent with

142 III Corps Periodic Rpt No 147, dtd 7 May 45, in FUSA G2 Jnl, L-558, 9-11 May 45 (Unclassified). (Departmental Records Branch, AGO, Alexandria, Va.)

[redacted] 2840

[redacted]

efficient civil administration.

The VI Corps CIC and Divisional detachments supervised the establishment of strategically placed road blocks manned by a battalion of Dutch Fusiliers. The road block guards referred all violators of travel restrictions to the nearest CIC office for interrogation. Those considered as suspects were detained for further investigation while those charged as being only travel violators were sent to local Military Government authorities for punishment. [143]

The 220th CIC Detachment: Franconia to Thuringia

The XX Corps of Third Army took part in the northeastern thrust into Thuringia.

Two members of the Gestapo and the Schutz Staffeln presented themselves at the Detachment's Headquarters at Mainz on 29 March, volunteering to act as informers to escape being arrested. Informants revealed that both had been guilty of informing and of brutalities against the Jews. CIC decided not to arrest the pair immediately, and they reaped a dividend from this postponement in the person of an Abwehr official who came in two days later and presented himself to the Detachment. After determining that these were the only three such personalities left in the Mainz area, CIC arrested them and sent them to the Third US Army Interrogation Center.

Among civilian curfew violators, there were, consistantly, some who, for one reason or another, were regarded with more suspicion than the normal offender.

Carl Hoferbert was an example. On 31 March, Hoferbert was brought to the 220th CIC Detachment office in Mainz, Germany. He gave his name as Albert Kruger and presented an incomplete document which showed no armed forces' experience. The arrestee claimed he had not been inducted into the Wehrmacht because of a stomach ailment. When CIC agents pointed out that the Mainz address which he had given was that of a building which had been reduced to rubble by bombardment, he then claimed that he had been living with a woman in Morbach, Germany. Hoferbert and a CIC agent set out for Morbach to verify this fact.

En route to Morbach, Hoferbert suddenly stated that he was a German soldier, separated from his unit, and that he had found Kruger's papers. He then gave his real name. The CIC agent, nevertheless, continued on to Morbach where the woman identified

143 XXII Corps G2 Periodic Rpt No 10, Annex No 3, "Counter-intelligence," (Source, VI Corps), dtd 8 Apr 45 in FUSA G2 Jnl & File, 9 Apr 45 (Unclassified) (Departmental Records Branch, AGO, Alexandria, Va.)

[redacted]

Hoferbert as Kruger. Confronted with a threat of imprisonment, the woman was broken easily and revealed that Hoferbert had made her promise to recognize him as Kruger because he was a German soldier trying to return to his unit.

Since the suspect was in civilian clothes and had tried to deceive the counterintelligence authorities, he was forwarded to Third US Army Interrogation Center as a possible agent.

A third case in Mainz involved an alleged Frenchman who claimed to be an agent of French Intelligence. He named his specific unit and his case officer. He was traveling with three others, one of whom, he said, was a Fifth Columnist wanted by the French, another the fiancee of a German agent supposedly hard at work in Paris organizing an underground ring, and the third a Displaced Person. Since Office of Strategic Services personnel could not identify the man, CIC reasoned that if the Frenchman's story were true, two dangerous persons were in his party and, if untrue, possibly four dangerous persons were involved. Keeping the Frenchman's claim of association with an Intelligence organization a secret from his three companions, CIC turned the group over to the Third US Army Interrogation Center with instructions to preserve the Frenchman's disguise until it could be substantiated or refuted; thus he would be able to follow through on his investigation if his status were verified. [144]

Herr Doktor

Within ten days, in early April, this Detachment arrested three German doctors who were examples of the corruption of ethics in the medical profession under Hitler's regime. The first operated as a political informer for the Sicherheitsdienst, using natural cover and employing a ring of twelve informants to procure information for a weekly report on the behavior of the people in Spangenberg and their willingness to follow Adolf Hitler. He was arrested on the advice of a CIC informant and, under interrogation, revealed much information about Sicherheitsdienst personalities.

A week later, a second doctor was arrested in Weimar. He was an officer of the Sturm Abteilungen, the Totenkopfverband Schutz Staffeln, and a member of the Schutz Staffeln and the German Army Medical Corps, serving as director of 21,000 inmates

144 220th CIC Det Monthly Information Rpt for Mar 45, dtd 4 Apr 45, in 220th CIC Det Rpts, Aug 44-Oct 45, (Confidential), (Kansas City Records Center, Box 25098).

[redacted]

[redacted]

at Buchenwald, near Weimar. As such, he conducted experiments using human beings ("tests on guinea pigs were unreliable") as the test animals. Eighty percent of six groups of from twenty to eighty people died as a result of one series. This Nazi claimed he had given the identity documents of three dead French workers to three captured Allied agents, but, even if true, CIC did not believe that to be restitution enough for his cruelties and sent him through Provost Marshal channels as a war criminal.

The third doctor, also from Weimar, served as an indicator to CIC that many of these Nazified professionals were not repentant. CIC conducted an investigation of the doctor and of the hospital staff based on information supplied by a member of a hospital staff. This individual was afraid that the entire personnel of the hospital, including patients, would suffer if the doctor were allowed to follow certain plans he had professed. CIC found that the doctor was, as the informant had said, actively engaged in preparing an underground cell to harass the Allied occupation. Weapons had been buried in the hospital's yard and elsewhere, and the doctor himself was doing the recruiting, aided principally by his wife and one of the laboratory technicians. Some of the hospital patients were former Wehrmacht members and had expressed the desire to cooperate. CIC arrested the three principals in the organization and evacuated them to the Third US Army Interrogation Center, with the written confessions obtained by the interrogating agents of the 220th CIC Detachment.

Gestapo Men Grabbed

Preliminary and general inquiry had indicated that the Weimar Gestapo had fled. However, on the day the underground operation of the third doctor was exposed, 16 April, three Polish forced laborers brought to the CIC office a Roumanian, whom they identified as a Gestapo agent who had been brutal in his treatment of foreign workers in Germany. This chagrined the Roumanian, since he had secured from the Poles the promise that they would say he had been only an interpreter for the Gestapo, and it had been his idea for them to go to CIC.

After his compromise by the vengeful Poles, the Gestapo agent, seeking other avenues of self-preservation, informed CIC that three important Gestapo officials were still in hiding in Weimar. From this information, CIC was able to take into custody the wives of the three officials and the Kriminal Kommissar. The Kriminal Kommissar was interrogated for four hours, but refused to admit his Gestapo connections until confronted by the statements his wife had made under separate interrogation. The other two wives were threatened with arrest as hostages. Their husbands surrendered to CIC on the following day. The trio was evacuated through POW channels.

[redacted]

[redacted]

Bluffs are Tried

At the Corps Detention camp at Amberg, voluntary informant Guido Wilde, a Dutchman, told camp authorities that two of their prisoners were not German, but Dutch, and that they should be released immediately. Unfortunately, for the would-be-liberator, a member of the Dutch Intelligence organization overheard the allegation and reported it to be a complete lie. CIC then interrogated Wilde and learned that he had been a Dutch Nazi since 1941 and had worked for the Germans as a statistician in Nurnberg. A search of his person revealed detailed accounts of all American military movements in the vicinity of Amberg, and Wilde was sent to the Army Interrogation Center as an espionage suspect.

The same day a woman told two American soldiers that another woman was harboring a German soldier. The other woman promptly told the soldiers that her accuser, Johanna Simmerman, alias Janina Cieslowna, was a German spy. This looked like a grudge denunciation, but after the soldiers turned Simmerman over to CIC, the case developed into one of real counterintelligence interest.

From her interrogation CIC agents learned that shortly after the Americans had arrived in Amberg, Simmerman, a native of Poland, had been evacuated to the Sicherheitsdienst offices, in Regensburg, where she was given fifty marks and a mission. She had been working for the organization since January 1945, listening in on conversations, wherever she could, to determine who was politically reliable. She was now instructed to observe who aided the Americans, who was captured by them and who was shot. Whether she had turned her back on her Sicherheitsdienst employers in the wake of American successes or was attempting to ingratiate herself with American authorities by telling of her friend's hidden soldier is not determinable from the record.

Among Others in April

A retired Luftwaffe Lieutenant General, a proud Nazi who would not reveal his party position until CIC agents alluded to his lack of patriotism for the Reich, and two war criminals, rounded out the Detachment's key arrests for April. Each was evacuated to appropriate higher echelons. [145]

Maytime in Austria

Because of the rapidity of their advance through Bavaria

145 220th CIC Det Monthly Information Rpt for Apr 45, dtd 5 May 45, in 220th CIC Rpts Aug 44-Oct 45, (Confidential), (Kansas City Records Center, Box 25098).

[redacted]

into Austria, there were relatively few outstanding cases for the XX Corps CIC Detachment to report until the static period, after the hostilities, was officially declared ended. Before that happened, however, CIC agents with the Detachment did manage to arrest a female Schutz Staffeln agent. She was one of a group of four women sent to Regensburg on a tactical espionage mission by a Waffen Schutz Staffeln unit commanded by General Dietrich. The Detachment also apprehended four officials of the Nazi Hungarian Government who had fled from the Russians into Rhein, Germany.

CIC ended the combat phase by arresting, on 9 May, an American-born German who had spent five of his twenty-eight years in German prisons for his opposition to National Socialism. Equipped with some home-made American credentials, identifying himself as the Chief of the American Secret Service, he was confiscating equipment of Wehrmacht deserters and issuing them passes to return home, and also was removing certain German officials from public office. He had impressed three former Wehrmacht members into his service, and provided them, too, with his home-made credentials. He could give no reason for his action, and he was sent to the Army Interrogation Center. His three "aides" were evacuated as POW. [146]

208th CIC Detachment: With a Corps Under Three Armies

The VIII Corps was under the Third US Army until 22 April, when it went under First US Army which it served until 6 May when Ninth US Army became its higher headquarters. At one time, the Corps found itself with five divisions operating under it. Despite conditions which might have provoked confusion, CIC operations--inasmuch as possible under the constant geographical change--were relatively unaffected. The primary change was that horizontal liaison suffered and that the arrestees were scattered among three Army CIC Detachments and Interrogation Centers by the end of the period.

These changes in jurisdiction were the result of the Corps' direction of advance. The advance in a more northerly direction than any of the other units under Third Army, crossed the Rhine at a point between the Lahn River and the turn in the Rhine which parallels it. The Corps then veered due east, eventually widening their frontal territory and thereby making it a logical move for them to be transferred to First US Army jurisdiction since most of the Third Army was farther south.

146 220th CIC Det Monthly Information Rpt for May 45, dtd 1 Jun 45 in 220th CIC Det Rpts Aug 44-Oct 45, (CONFIDENTIAL), (Kansas City Records Center, Box 25098).

[redacted]

CIC Summary of Activities

While the Corps was still under Third Army, CIC agents of the 208th CIC Detachment conducted security surveys of thirty-two towns across Germany. Each of these towns had its original population almost intact and was bolstered by scores of Displaced Persons who seemed determined to steal, loot and commit other acts of "revenge" against the populace. These Displaced Persons were the most persistent violators of Military Government regulations. They pleaded innocent, because posters, announcing the regulations, were prepared only in German and English neither of which, as a rule, they comprehended. CIC recommended that future posters be multi-lingual, including as many languages as possible.

Seven Corps Artillery observation aircraft were damaged by saboteurs, but due to the laxity of the guards at the airfield, none of the saboteurs was apprehended. A spot investigation, on the night of the incident, by members of the 208th CIC Detachment, 24-25 April, revealed no leads.

Civilians in Jena reported that they were receiving threatening letters warning them not to cooperate with the American authorities. CIC set out to find the source of the letters, after being informed that a Wehrwolf group was known to be operating in the area. CIC recorded names and addresses of ten members and arrested some of them, but no indication of an organized effort existed, and no lead to the source of the warnings was uncovered. [147]

The Detachment arrested ten Hitler Jugend members who, as Volkssturm members, had borne arms against Allied troops. In addition to the Jugend members, three other Volkssturm members who fought against the Allies, 243 Wehrmacht deserts in civilian clothes, and seventy-two automatic arrestees and security threats were apprehended. [148]

Under First Army

In the first week under First US Army, the VIII Corps Detachment noted not only that there was little or no change from previously overrun populations, but also that civil security continued to be poor due to the lack of opportunity for enforcement. The general type of major arrestees continued to be

147 208th CIC Det Weekly CI Rpt #1, dtd 29 Apr 45, in 208th CIC Det Jnl of Rpts, Jan 45-Jun 45, (CONFIDENTIAL,) (Kansas City Records Center, Box 25097).

148 208th CIC Det Monthly Information Rpt #1, for the month ending 20 Apr 45, in 208th CIC Det Jnl of Rpts Jan 45-Jun 45 (CONFIDENTIAL,) (Kansas City Records Center Box 25097).

[redacted]

the same as before. It was also discovered that Wehrmacht deserters, who had reported voluntarily to Military Government often had been told to return to their homes, many without having been issued passes signed by Military Government. This complicated CIC's job of screening and classifying all males of military age.

By the end of April and the beginning of May, the corps found itself in a static situation. Traditionally, static situations permitted CIC detachments to improve the security of their areas. Now, however, the corps detachment found itself floundering around in an area 120 kilometers long and 90 kilometers wide, too large an area to cover adequately.

Time became the deciding factor as to whether or not a Military Government-appointed official was investigated, records were guarded or investigated, and allegations were reported or followed up.

In spite of the huge area under its jurisdiction, the detachment managed to produce tangible evidence of its value to the armies. Documents yielding information about operations, training, and confidential funds of Abwehr, and about other organizations and personalities of counterintelligence interest were turned over to the 301st CIC Detachment. Testimony that some Kripo officials in towns under 25,000 population had missions as Gestapo agents was also passed along.

During the corps' operation under First Army, the Corps Detention Camp--largely a CIC project--handled 252 cases from corps detachment and various division detachments, including twenty-one cases involving enemy intelligence personnel. The Detention Camp functioned to process Party officials, government officials, enemy agents, the Schutz Staffeln, the Sturm Abteilungen, and the Hitler Jugend members of the Sicherheitsdienst. The camp also processed police in the automatic arrest category, and war criminals and security threats.[149]

4th CIC Detachment: Racing

The 4th CIC Detachment, under Captain Oliver D. Appleton, dealt with no special cases during April. For the greater part of the month, the agents were racing across Germany with the division, seldom working in any one town for more than twenty-four hours. First priority was given to the security of tactical troops, and second priority to the "arresting of as many individuals as possible who held high enough positions in the Nazi

149 208th CIC Det Weekly CI Rpt #2, dtd 6 May 45 in 208th CIC Det Jnl of Rpts Jan-Jun 45 (CONFIDENTIAL) (Kansas City Records Center, Box 25097).

[redacted]

[redacted]

regime to place them in the automatic arrest category." [150]

The touch-and-go character of investigations was shown in a typical report, the daily CIC report for 16 April, 0001 to 2400 hours:

"Location of CIC Hqs: Creglingen
Towns worked:
Rinderfeld, Streichental, Dundendorf:
Very small farming communities; inhabitants display little or no interest in politics; further CI work deemed unnecessary. Arrested two officials.
Windentierbach, Heinberg, Hachtel, Wokersfelden:
All under same administration; on recommendation of CIC, a new Burgermeister was appointed. CI situation good. Hermann BECK was reported to have mistreated American aviators. Case with names of witnesses reported to XXI Corps JAG.
Vorbachzimmern:
Burgermeister, Nazi, should be removed. Ortsgruppenleiter arrested. Nothing else of CI interest.
Neuherberg:
Small town of no CI consequence.
Ettenhausen:
Said to have less than 10 members of NSDAP. Burgermeister believed reliable. Ortsgruppenleiter arrested.
Strueth:
Population doubled by refugees; checked, apparently authentic. Burgermeister deemed reliable.
Bartenstein:
Officials and people cooperative. Priests say no dangerous persons present."

In this fashion, agents of the 4th CIC Detachment attempted to account for at least minimum security as the division pursued the routed Wehrmacht. [151]

36th CIC Detachment: Covering the Rear

With the advance of the Seventh Army forces east of the Rhine, the responsibility for security in the rear of army area was given the 36th CIC Detachment. Between 29 March and 27 April, the 36th Division was not operating under a corps, but directly under Army.

The swollen size of the Army made it "particularly difficult to enforce travel restrictions," and there was comparative freedom of movement throughout the area. Through the posting of Military Government proclamations and the screening of the male population in the sector, 679 POW were apprehended between 2 April and 15 April. An attempt by one 17 year-old to organize a Wehrwolf cell was squelched. The boy was arrested as a result of information from a youthful informant who had tried unsuccessfully to join the organization. On the other side of the ledger, members of Zentraler Aktionsausschuss, an organization formed by middle-of-the-road political elements, proved very valuable as informants against high office Nazis.[152]

While under Seventh Army's direct control, the 36th CIC Detachment sent to the division POW cage ninety-four persons whose position in the Nazi party, its organizations, or the government of the Third Reich made them automatic arrestees. Twenty-five security threats were sent to the same cage, along with the Wehrwolf organizer and three travelers who had no identification.

It was not until the division came under the jurisdiction of the XXI Corps and moved into Bavaria and Austria, that the 36th CIC Detachment produced high quality results.

Between 27 April and 8 May, the Detachment arrested nineteen persons in the automatic arrest category, three security threats, and one war criminal.

German publisher Max Amann, the number three Nazi on the Party list, was arrested on 4 May at St. Quirin am Tegernsee. On the same day, the former Nazi Governor General of Poland, Dr. Hans Frank, reputed to be "No. 1 on the Russian Black List," was captured by agents of the detachment at Eischhausen am Schliersee.

On 8 May, CIC agents discovered a cache of hidden treasure, jewelry, watches, precious coins, bullion, and banknotes, in-

152 36th CIC Det Periodic CI Rpt for 15 Mar 45-15 Apr 45, dtd 15 Apr 45, in 36th XX CIC Det Periodic Rpts, 1945. (CONFIDENTIAL) (Kansas City Records Center, Box 25095.)

[redacted]

[redacted]

cluding a large amount of US currency. The cache also contained the personal card of Ernst Kaltenbruner, Himmler's second in command, and a currency-filled envelope bearing the seal of the German Minstry of the Interior, Chief of Police. The wealth was turned over to the XXI Corps' Counterintelligence officer with a report of the discovery. 153

42d CIC Detachment: An Enemy Within

On 29 March, [redacted] a Military Government assistant in the town of Bruckweiler, was arrested by agents of the 42d CIC Detachment after he had aroused suspicion by his persistent attempts to gain travel permits. The arrest was made at an opportune moment because [redacted] was considered a likely appointee as mayor of the town.

What CIC discovered from [redacted] after persistent interrogation, was enough to chill the Allied officials who had selected and worked with him. During February and March, [redacted] a Polish national, had attended two sabotage and demolition schools operated by the Nazis. He was then ordered to secure a position with the Allies from which he could sabotage US Army equipment and supplies, kill American soldiers at night, and report on troop movements and insignia.

On 23 March, [redacted] had accomplished the first step in his mission. He had managed to obtain civilian clothing from a German woman, but he was unable to transmit information to his headquarters due to the restrictions on civilian travel.

On 23 April, after the confessed spy had been tried by courts martial, he was executed by firing squad. Psychological Warfare personnel prepared a poster picturing [redacted] tied to a stake and blindfolded, and stating that other spies and saboteurs would meet the same end. This poster was printed in German and given wide distribution over the Seventh Army area. 154

[redacted]

44th CIC Detachment; Overrunning the Fleeing

The thousands of Nazis who had sought refuge in the heart of Germany from the fast moving Allied forces, discovered that as far as their safety was concerned, they had taken a "flight to nowhere." Agents of the 44th CIC Detachment screened numerous refugees during April and ferreted out wanted individuals from all parts of Germany.

However the divisional detachment could not do a thorough job; their task was too large, their personnel too small, and their time too limited. All possible measures were taken to prevent enemy access to Allied military information. Due to the enemy's decreased area of operations, opportunities for espionage were substantially reduced. At the same time, the fluid situation and the enemy's presence behind Allied lines increased the likelihood of sabotage.

CIC agents confiscated and destroyed all wireless transmitting sets and other sending equipment that they encountered, in addition to suspending all means of civilian communication. These measures, coupled with the apprehension of the automatic arrestees who readily could be found, were 44th CIC's major contributions to the security of the division in April.[155]

Detachment Commander Murdered

On 17 April, slightly more than three weeks before V-E Day, the bodies of Captain Peter M. Cummins, Jr., 44th CIC Detachment Commander, and Major Bennet, Division G5, were discovered in the woods near Eherbach. The two men apparently had been murdered.

At the time, the 44th Infantry Division was moving diagonally across the area of the 63rd Division to go into action on line. The killings were reported to agents of the 63rd CIC Detachment. First reports received from a 44th Division Military Government officer indicated that the two men had been severely beaten and tortured before being shot to death, but subsequent medical reports from the Division failed to support this story.

The 63rd CIC Detachment, supplemented by three agents of the 307th CIC, instituted an immediate investigation. The first measure was accomplished by an order from the G3, 63rd Division, for the immediate clearing of the forest area.

---

155 44th CIC Det Historical Rpt for month of Apr 45, in Army Opns Rpts 207.03 (CONFIDENTIAL) (Departmental Records Branch, AGO, Alexandria, Va.)

[redacted]

[redacted]

Prisoners caught in this woodland dragnet were turned over to the CIC Agents. Within a few hours of the roundup, the CIC men had pieced together the whole story from the interrogations of two captured German soldiers.

A small German battalion, of approximately 130 men, commanded by a Captain Schwaben, had been passed by the onrushing American troops in the forested area around Eherbach. The mission of this intentionally stranded unit was to harrass Allied supply lines in the rear. On the evening of 16 April, the German soldiers at one of the battalion's outposts spotted Captain Cummins and Major Bennet travelling along a road through the forest and opened fire. The two officers, who apparently had lost their way, were caught completely unaware and, in the exchange of fire, Major Bennet was killed. Captain Cummins, slightly wounded in the encounter, was taken prisoner and led before the battalion commander.

The German officer wasted no time. He ordered the American transported to the scene of the fighting and shot. After the murder was accomplished, German soldiers dragged the bodies of the two men about fifty yards from their vehicle, and removed the men's credentials, papers, and boots.

The CIC interrogators did not cease their questioning of the German prisoners until they had learned the names and descriptions of the officers and men responsible for the killing. This data was provided all POW cages, and the windup of the case was left to Seventh Army CIC when the 63rd Division moved on.[156]

45th CIC Detachment: On the Offensive

The 45th Infantry Division was one of the few which operated under the same Corps, the XV Corps, throughout the whole period of the final offensive. The Division attacked across the Rhine toward the Main and Tauber Rivers. Automatic arrestees, security threats, war criminals, POW, and accused snipers comprised the bulk of arrests made during this period. Two German diplomats were sent rearward to the Seventh Army G2 for special counter-intelligence use. Early in the period almost all arrestees were sent back to Corps or Army CIC, but as the campaign progressed,

156 63d Inf Div, Unit History of G2 Sect, CIC, from 1 Apr to 30 Apr 45 (UNCLASSIFIED) (Departmental Records Branch, AGO, Alexandria, Va.)

[redacted]

[redacted]

the least dangerous ones were sent through POW channels directly to internment.[157]

Bensheim Gestapo Case

On 28 March, Agents Willard A. Schutt and Albert Schiff of the 45th CIC Detachment, while checking a report of an atrocity perpetrated against two Allied airmen in November 1944, opened up another atrocity case. This case was to be closed several times during the following month, only to be reopened each time as new information cropped up in various cities. The Bensheim (Hesse) Gestapo office was the focus of the investigation, but the investigation itself was carried out in an area more than 150 miles long.

The mayor of Westhofen on the Rhine and one of the town's inhabitants were the guilty parties in the case involving the two Allied airmen. That case, at the time, seemed to be an isolated incident. The mayor had fled, but his accomplice was captured and turned over to the Worms Allied Military Government office, along with statements by persons who witnessed the atrocity.[158]

At the same time, another atrocity report was being investigated by other agents of the detachment at Bensheim on the east side of the Rhine. A man appeared at the CIC office with information that he had witnessed the escape of a Gestapo agent. Unfortunately, for the "witness," CIC agents subjected him to a lengthly interrogation, during which he explained that he knew the escapee was a Gestapo agent, because another man had pointed him out as such. However, when interviewed by Agent Herman W. Kristeller, the man, who allegedly had pointed out the Gestapo agent, suggested that the "witness" may have helped the agent escape. When other information, obtained locally, indicated that the "witness" probably was himself a Gestapo agent, he was sent rearward to the division cage along with a Frenchman who claimed, without substantiating evidence, that he had been beaten by the Gestapo in Bensheim a week previously.[159]

[redacted]

Agent Walter Wimer interviewed a Polish janitor-handyman who had worked at the Gestapo Headquarters. In the course of the same investigation, Alfredo Parisi, attached to the detachment by the division, apprehended a woman who allegedly only had been an interpreter for the Gestapo.

The janitor gave information which increased the probability that the woman was more than just an interpreter, and he also gave details of an atrocity which had occured on 24 March 1945 at the headquarters. Nine men and three women from a nearby prison had been tortured and killed, as had four American soldiers. The janitor, personally, knew of only two murders. He had seen two of the Americans interrogated and then marched down a stairway. The janitor heard three shots while the group was on the stairs, and immediately thereafter saw the bodies of two American soldiers being buried in the garden of Gestapo Headquarters. Gestapo men trampled on the earth, attempting to hide evidence of the grave. The janitor led CIC agents and the detachment commander to the graves, where the body of an American serviceman was exhumed. Official Army and personal documents identified the American. [160]

Later the second body was uncovered. The remains, personal effects, photographs of the wounds, and boots found at the Gestapo Headquarters were turned over to Special Agent Peter J. Badilya of the XV Corps CIC Detachment. [161]

During initial interrogation, the woman interpreter had identified by full or partial names, function, and description--49 persons who had been employed by the Gestapo in Bensheim. However, she claimed to have no knowledge of any interrogation of Allied servicemen. [162]

The Polish janitor-handyman named and described 51 personalities of the Bensheim Gestapo office, including six secretaries, and identified by name, title, and description, the

[redacted]

two men who had murdered the Americans. He also told how he had sabotaged one of the Gestapo's getaway cars and had purposely failed to put two suitcases belonging to one of the Gestapo chiefs in another car. Instead, he dropped them on the street and fled. [163]

Agents Arnold Vyth and Herman Kristeller interrogated the first of the secretaries, arrested on information furnished by the janitor. The 21 year old girl had worked for the Gestapo and the Sicherheitsdienst for four years.

The CIC agents secured from her, not only a list of fifty personalities of the Bensheim Gestapo office, but also were given an accurate breakdown of departments and functions. She also gave information concerning methods of operation of the Gestapo at this office, possible German Gestapo counterintelligence agents hiding in the vicinity, and destinations of those Gestapo personnel who had fled prior to the American entry. The young woman explained that all key Gestapo people had received cover identification in non-automatic arrestee units of the German armed forces. Their names and birthdates remained the same on the new identification. [164]

A second secretary, interviewed by the two agents, revealed substantially, the same information about personalities already mentioned by the previous three interrogatees. She pointed out, however, that the woman interpreter had been a long term employee of the Gestapo and was, if nothing else a traitor to France. She also knew that one of the Americans had been interrogated by the Gestapo, and she also had been told by the Polish janitor of the murder of two American prisoners. [165]

A third secretary was interviewed by Agent Vyth. She also named key Gestapo figures. She had been in the Bensheim office

164 45th CIC Det, ltr to G2 45th Div, dtd 28 Mar 45, subj, "Leonard, Erna," in 45th CIC Det File, Nov 44-Mar 45, (CONFIDENTIAL) (Kansas City Records Center, Box 45121).

165 45th CIC Det, ltr to G2 45th Div, dtd 29 Mar 45, subj, "Franziska Meier, Employee of the Gestapo," in 45th CIC Det File, Nov 44-Mar 45 (CONFIDENTIAL) (Kansas City Records Center, Box 45121).

only a short time before it fell to the Americans and could not give much information about its operation. She did remember, however, seeing one American leave the office with the two Gestapo men the janitor had identified as the criminals and she remembered that the two Gestapo men returned shortly afterward without the prisoner. [166]

Agent Kristeller interviewed a fourth secretary. She was in an administrative position and "too busy to pay attention to anything but her own work." She gave little information, except for the single fact that there were 60 officials and employees in the Bensheim office. [167]

Because the divisional detachment had to move on with its parent organization the whole case was turned over to the 215th Detachment. The 45th CIC Detachment had developed, however, very complete information, all from "little people," as Captain Guenther pointed out in the periodic report. [168]

If, with the transfer of information, arrestees, and informants to the XV Corps CIC, the 45th CIC Detachment felt they would be through with the Bensheim case, they later discovered they were mistaken. It had only been temporarily interrupted.

Now information regarding the Bensheim Gestapo atrocity case was developed in the former Gestapo Headquarters at Grossumstadt on 1 April. CIC agents Fausto E. Molinet, Schiff, and Herman Kristeller found and forwarded to the 45th Division AC of S G2, two steel helmets containing liners marked with the serial numbers of the murdered soldiers. Fingerprint records of the murdered men were sent along, too. These had been provided by the Graves Registration group which had been given the bodies. [169]

169 45th CIC Det ltr to G2 45th Div, dtd 1 Apr 45, subj, "American Equipment Found on Gestapo Headquarters at Grossumstadt," in 45th CIC Det File Apr-May 45, (CONFIDENTIAL), (Kansas City Records Center, Box 45121).

[redacted]

On 2 April, the same agents discovered a number of photographic plates. They believed that these were to be photographs of Gestapo agents and personnel from the Bensheim Gestapo office, so they sent the plates to the Seventh Army CIC Detachment, which had taken over the case. Once again the 45th CIC wrote "finis" to the Bensheim Gestapo case, and once again they were premature in doing so. [170]

Four Guards from Bensheim

On 14 April, four Estonions, who had served as guards for the Sicherheitsdienst and the Sicherheitspolizei in Bensheim, surrendered to American troops in Bamberg. Once again the 45th CIC opened the Bensheim Gestapo file. The guards had made their way, on foot, from Bensheim to Grossumstadt to Bamberg. One, who had been in Bensheim on the night of the atrocity, was vague about how much of the incident he had noticed, saying only that he saw two Americans and heard shots. He claimed not to have witnessed the actual execution or the burial. Agents Henry J. Fronauer and Herman W. Kristeller conducted the interrogations of the Estonians. [171] Once more the file was closed.

Then, after almost two weeks of relative obscurity, the Bensheim Gestapo case was news again. A civilian travelling through the woods at Ammerfeld was picked up by elements of the 45th Infantry Division after a firefight between the Americans and some German infantrymen. He was sent through the regimental POW cage to the divisional cage, where he identified himself, during interrogation, as Heinrich Lenz, and claimed he was searching for his wife. He had none of the usual documents on his person, but the three he carried were of recent vintage. A body search revealed a tatooed "A" on his left armpit. He admitted then that he had been a member of the Schutzpolizei, but claimed that he had deserted and used an alias to avoid capture by German police. A review of the files of the Bensheim Gestapo office identified the man as Heinrich Lacks, a member of the Bensheim Gestapo. When confronted with the evidence, he became

---

170 45th CIC Det ltr to G2 45th Div, dtd 2 Apr 45, subj, "Photographic Plates Found in Gestapo Headquarters at Grossumstadt," in 45th CIC Det File Apr-May 45, (CONFIDENTIAL), (Kansas City Records Center, Box 45121).

[redacted]

[redacted]

very cooperative, naming persons and organizations, describing how members of the Bensheim Gestapo were travelling, and even revealing the destinations of some. He gave information about the establishment of a passive, information-gathering group, known as Bundshuh, and cited which towns were to be its communication centers. He mentioned nothing of the atrocity in which the two Americans had been murdered, but he gave information which indicated that one of the four Estonian guards, already in custody, had murdered a woman who had been entrusted to his care.

Based on the information given by the captured Gestapo counterintelligence operative, the detachment alerted the XV Corps CIC and, with trucks, combed the division area. In addition to a member of the Gestapo from Nurnberg, the detachment managed to apprehend two more of the Bensheim group. [172]

These two were a team with a definite mission for Bundshuh. One was identified, from the Bensheim files, as a person with a reputation for brutality. Agents told him they knew of his methods and informed him he might expect similar treatment if he did not cooperate. After that threat, he became very talkative. He corroborated the Polish janitor's accusation of two specific individuals in connection with the atrocity. He cited Lacks as one of two members of Bundshuh whose role was to eliminate people who were not carrying out their orders. He disclosed the complete organization of Bundshuh, named rendezvous points, gave passwords and countersigns, described the mission of his team, and named a number of Gestapo personnel of various offices. [173]

The teammate also proved a willing confessor of other people's sins. He stated that one group of eight Bundshuh members had active sabotage missions. He, too, revealed rendezvous points, passwords, personalities, and organized data. [174]

172 45th CIC Det, ltr to G2 45th Div, dtd 27 Apr 45, subj, "Lacks, Heinrich, member of Gestapo, Bensheim," in 45th CIC Det File, Apr-May 45, (CONFIDENTIAL) (Kansas City Records Center, Box 45121).

173 45th CIC Det, ltr to G2 45th Div, dtd 27 Apr, subj, "Frischbier, Karl, Kriminalsekretar, Gestapo, Bensheim, Germany," in 45th CIC Det File, Apr-May 45, (CONFIDENTIAL), (Kansas City Records Center, Box 45121)

174 45th CIC Det ltr to G2 45th Div, dtd 27 Apr 45, subj, "Gotz, Heinrich, Gestapo Agent," in 45th CI Det File, Apr-May 45, (UNCLASSIFIED) (Kansas City Records Center, Box 45121)

[redacted]

The interrogating CIC agents felt that, despite the avid cooperative spirit exhibited by the three captives, they should be reinterrogated at XV Corps CIC--in case some information "may have slipped the subject's mind." [175] On this note, the Bensheim case closed.

CIC With the Division's Advance

All the various facets of the Bensheim investigation were accomplished while the 45th CIC Detachment was on the run with the division. The division had remained on the attack until the end of the war, cutting a semi-circular path from Worms into Bavaria, and thence through the German cities of Aschaffenberg, Nurnberg, Munich and hundreds of small towns and villages. The Detachment made arrests in thirty-one of these towns. Most of these were routine arrests of persons in automatic arrest categories, but a few were of more than routine interest. [176]

On 4 April, Dr. George Schaller, who had served as vice-consul in various countries when the seeds of Naziism initially were being planted preceding each country's conquest, was arrested in Marnes. He was interrogated by Agent J. H. Birsner before being turned over the division G2 for special counter-intelligence exploitation. [177]

On 12 April, Agent Molinet heard the Hitler Jugend anthem coming from a home in Konigshofen. The residence belonged to a German police lieutenant and a subsequent search produced papers which apparently had come from the Luftwaffe High Command. Interrogation of the policeman"s wife revealed that she had made technical drawings of an antiaircraft missile,based on the V-2 principle, which incorporated a timing device, enabling it to explode at any desired altitude. Agent Molinet recommended haste and tact in following up on his interview.

He did not arrest the woman, but he notified higher authorities of her existence. [178]

In Nurnberg

As Captain Guenther explained in the Detachment's Monthly Information Report for April, the 45th CIC never, during their entire campaign in Germany, had been supplied with T-Force-type target information by higher echelons. In preparing for the fall of German cities to the 45th Infantry Division, the Detachment organized its own target sheets by culling information from general documents. However, the Detachment was supplied with complete target information, well in advance of the actual seizure of Nurnberg.[179]

Fortunately, the Detachment had additional target information. Agent Leonid Ruminoff had interrogated a girl who had worked in the Intelligence office of the Headquarters of the Wehrkreise Military District. She provided information about personnel and physical targets in Nurnberg, including where some of the personnel and target offices had moved, how many had been destroyed, and which ones were believed to be inoperative.[180]

The Target Sheets and Personnel

Each target sheet gave the name, location, a brief description, source of information, and the priority rating of each target. The majority of the target locations were plotted on town plans. The operational plan for the Nurnberg Target Force called for targets to be raided and quickly searched by CIC. Guards were then to be posted in the more cruicial areas.

To accomplish this, a Target Force was formed from the following: the 45th CIC Detachment and a supplement of 20 CIC agents and Military Intelligence Interpreter personnel from the XV Corps and Seventh Army; an engineer battalion to serve

[redacted]

[redacted]

as guards; and five Military Government officers from the division with a Military Government Detachment and a field artillery battalion (for additional security guards). Personnel from the three component groups established a central headquarters for the operation.

A company of engineers was sent to each of the three infantry regiments, to move in with forward elements and, as each target was cleared of opposing troops, to post "off-limits" signs, establish a guard system, and notify Target Force Headquarters. Targets which had been moved or destroyed were also reported.

CIC teams were to inspect each target and evaluate the contents to make recommendations for increasing, decreasing, or removing the guard system entirely. It was impossible for CIC to cover the targets as quickly as they were cleared, but the placement of the guards secured them from belated attempts at destruction by the enemy.

Liaison was established between each engineer company and its regiment, and radio communication with the battalion, Target Force Headquarters, and division headquarters was maintained. The S2 and the S3 of the engineers, the engineer companies and Target Force Headquarters kept situation maps during the reduction process.

Record of Activities

Continuous account of the uncovering of targets, their inspection, guard provisions, condition of targets, and decisions reached by all coordinating officials of the Target Headquarters and the division G2 was kept in a journal which was turned over to the relieving force when the division moved out of Nurnberg. A copy of the journal was also attached to the Detachment's Monthly Information Report.

Brief Look at the Operation

From the journal, it is possible to get a complete picture of the operation of the Target Force personnel in Nurnberg. For the 100-hour period that the force operated in that city, 161 entries were made in the journal. Excerpts from these entries give an indication of the scope of work performed.

According to the first entry, at 1130 hours on 17 April, two days before the Force actually became established in Nurnberg, Agent Ernest J. Gearheart, one engineer officer, and a squad of men answered a call from the 180th Infantry Regiment concerning a German POW compound which housed 13,000 Allied Prisoners of War. On the same day, Agent Francisco S. Quaranta and French

[redacted]

Lieutenant Schmutz checked civil guards at an "electric factory" and two ammunition dumps. Captain Guenther and an unidentified warrant officer took part in a tactical battle against some Germans, believed to be Schutz Staffeln men. Agents Albert Schiff and Frederich J. White located a suitable command post for Target Force Headquarters. By nightfall, arrests were beginning to be made. One informant told of a Wehrwolf organization, and Agents Willard A. Schutt and Henry J. Fronauer went out to arrest the organizer. Security risks were promptly interned. German soldiers in civilian clothes were found everywhere.

Agents Thomas and White, on their way to pick up an automatic arrestee, were informed at Hersbruck that the town for which they were heading was in German hands. They collected tactical information about the situation ahead and forwarded it to Target Force Headquarters, along with a report of initial security measures they had instigated in Hersbruck. In addition to the normal arms collection, curfew, travel restrictions, and communications disconnection, the two Agents arrested an official of Organization Todt and indicated the existence of a war crimes' situation in the town. Agent Schiff was performing all interrogations as the day ended. Most of this work had been performed in suburban areas.

On 18 April, Nurnberg, itself, had not yet been entered. Loose ends were picked up. Information from Hersbruck had been passed on to the XV Corps War Crimes by the division's G2. Army CIC Teams were scheduled to arrive at 1330 hours, and Corps teams had already been placed on duty at the POW cage and at the division command post. A depot of Red Cross supplies was uncovered at 1450, and German police guards were arrested, de-uniformed, and released by American troops. Engineer-guards were placed on the depot, and Military Government was notified. The city had been reached.

Captain Guenther and a Major Bishop surveyed roads in the area with an eye toward setting up truck patrols to pick up circulating civilians. A displaced persons center site had been selected, and agents were beginning their inspection of numbered targets.

At 1620 hours, 1,000 people were found in a German displaced persons camp, and three CIC agents went to investigate the forced laborers.

Ten minutes after Agent Herman W. Kristeller learned from a Frenchman of the existence of two Nazis nearby, he had arrested them and returned to Target Force Headquarters with them.

At 1730 hours an undestroyed heavy equipment factory had

been inspected and "off-limits" signs posted. An old night watchman was allowed to remain on duty. Ten minutes later, the Nurnberg Chief of Police was arrested by the 179th POW Interrogation Team. Several railroad cars, filled with heavy equipment, were found at a target site, and, since it was decided that the equipment could not be sabotaged or looted, guards were deemed unnecessary.

At 1805 hours, Agents Schutt and Leonid Ruminoff reported that they had searched several targets, finding in one office a document which showed the new location of Party Headquarters. The Nazis had been bombed out of their old quarters. Captain Guenther and Captain Coniff of the engineers announced completion of their plans for a displaced person center requiring 24 guards for 24 hour duty on four posts, plus two noncommissioned officers. However, the Military Government Officer, Major Campbell, claimed that it was unfeasible to use that much manpower, and suggested instead, "coaxing methods to get displaced persons off the road and into the camp, plus reliable Displaced Person guards." The journal does not describe what "coaxing methods" were appropriate, or whether Major Campbell had been specific in his suggestion.

Captain Guenther and Agent Schiff, in the meantime, had returned the city's chief of police to the detachment, along with 11 of his policemen. The policemen were to act as guides for the engineer-guards in Nurnberg.

On 19 April, Agents White and Gordon B. MacPherson, located, in Lauf, a ceramics plant which made high frequency radio parts. They removed a tube from a radio transmitter in the laboratory, and detained two officials of the plant for interrogation. One was a Volkasturm Captain and a "probable Sicherheitsdienst informant." Signal Intelligence, upon being notified of the find, scheduled an inspection.

At 1000 hours, Major Campbell located a numbered target and, finding it almost completely destroyed, left one squad of engineer-guards to protect it.

More targets, (i.e. post offices, factories, canal bridges, and official offices of the local and national party and government) as well as an increasing number of arrestees, were uncovered by the Target Force personnel as the day went on. Road patrols picked up five travel violators, two of whom were POW. The other three were punished by Major Campbell, who "put them in a room in Fishback for two days, without food, under the supervision of the Mayor." Captain Coniff reported at 1900 that he had secured Schutz Staffeln headquarters. One-half hour later a report came in that jet airplane engines and radio parts were on railroad cars in the city marshalling yards. CIC

[redacted]

Agents Schutt and Molinet were sent to inspect the target. At 1930 on 19 April, Target Force Headquarters moved into Nurnberg proper. In the marshalling yards, the agents found the jet engines in good condition. Other cars in loading areas were on fire, however, and some were filled with explosives and incendiaries. The agents reported that this was a security hazard in itself, especially at night. The news was passed up through intelligence channels. At 2150 hours, some of the cars began to explode in the loading areas.

Agent Gearhart's group reported on nine scheduled targets and one target of opportunity they had covered, but nothing of much importance had been developed. A POW Interpreter Team sent in word that the local party leader had an estate near Cadolzburg.

The work in Nurnberg continued at a swift pace on 20 April. Secondary targets, which had not been handled in the initial phase, were scheduled for consideration, the order being "to hit as many...as possible."

At 1515 hours, four men, claiming to be undercover Allied intelligence operatives, were sent to the Military Government office in Lauf where an Office of Strategic Services representative was to pick them up.

The rudiments of inspection and the guarding of targets continued to be the primary aim of the Target Force for the remainder of the time in Nurnberg. Records which seemed important were often transferred to Target Force Headquarters, but less crucial documents merely were kept under guard. Personnel targets were immediately placed in proper channels.

The final journal entry was made at 1500 hours on 21 April. Presumably, at the time, the division had moved through Nurnberg and continued on the offensive. The information gathered by members of the Target Force was turned over to the receiving organization for further exploitation. [181]

Into Munich

The 45th Infantry Division entered the last phase of its operation in its march to Munich, breeding place of the early Hitler movement. In this key city, too, the 45th CIC Detach-

181 45th CIC Det Monthly Information Rpt for Apr 45, dtd 30 Apr 45, in 45th CIC Det File, Aug 43-May 44, (sic), (UNCLASSIFIED), (Kansas City Records Center, Box 45121).

[redacted] 2864

[redacted]

ment was able to control, satisfactorily, the civilian population, except for disorders provoked by non-enemy nationals upon their release. Since they entered a stable period after the fall of Munich, the agents of the Detachment also were able to delve more deeply into counterintelligence matters.

The day after Munich was cleared of enemy forces, a Security Control Branch, consisting of a field grade officer from the G2 Section of the 45th Infantry Division Headquarters and a special agent from the 45th CIC Detachment, began operations. Immediately, transportation and communication facilities were frozen. Civilian circulation between towns was forbidden, road blocks were placed on the main routes, and curfews were published and enforced. Mass arrests of violators on the first few nights, resulted in the civilian population being more compliant with the curfew laws.

The 45th CIC Detachment set up an interrogation center in the middle of the city and received and screened individuals sent in from regimental check points. A team of CIC agents from the 307th CIC Detachment "hit" many dangerous personality targets quickly, thereby reducing the possibilities of organized guerilla efforts. Mobile columns of riot troops from the infantry were available for momentary dispatch by radio to threatened communities. Vulnerable industrial and commercial installations were guarded by the field troops to prevent looting. German prison camps were guarded too, to retain the inmates for processing. Liaison was maintained with the military police and the Security Branch of Military Government. [182]

63rd CIC Detachment: Scratching the Surface

Like other units of the Seventh Army, the 63rd Infantry Division pushed forward at full speed in April, crossing the Danube and driving within reach of the Swiss border before being relieved by the 36th Division.

Agents of the 63rd CIC Detachment operating with the Division's regiments found that they had barely enough time to scratch the surface in any town for counterintelligence coverage before the order to advance was given. Several mayors and police officials were screened for Military Government, and considerable time was also spent in checking the steady stream of German

182 45th Inf Div, G2 Section, Counterintelligence Periodic Rpt for 14 Apr-14 May, dtd 14 May 45, in 45th CIC Det File, Apr-May 45, (UNCLASSIFIED) (Kansas City Records Center, Box 45121).

[redacted]

soldiers (in civilian clothes) that spilled across Allied lines. A Seventh Army TWX, stating that Wehrmacht deserters should not be apprehended unless either they belonged to the Schutz Staffeln or constituted a security threat, eased the CIC teams' work somewhat, late in April.

Among the important investigations carried out by the 63rd CIC agents towards the campaign's end, was the determination of the murderers of the commanding officer of the 44th CIC Detachment.[183]

CIC agents reported that the Military Government was seriously negligent in its handling of weapons confiscated in occupied Germany. In several instances, the weapons turned in by civilians, upon order of Military Government, were collected and placed in the local town hall, without any measures of safeguarding them.

A similar failing was noted in the storing of German military weapons, ammunition, and hand grenades. Shacks and other buildings, easily within access of the Germans, provided convenient, but obviously insecure, storehouses. CIC recommended that action be taken, at once, to correct this practice.[184]

70th CIC Detachment: Destroying Sabotage Cells

During April, the 70th Division was engaged in mop-up operations and the protection of Third Army communication lines east and west of the Rhine. The more or less static situation gave agents of the 70th CIC Detachment an opportunity for careful investigative work within the Division area. The agents met the challenge by breaking up a major sabotage organization that had affiliates throughout Allied occupied regions.

Interrogation of a Schutz Staffeln member, who had been arrested in Bad Krueznach, started CIC on the trail of six sabotage cell organizations. Between 17 and 21 April, the Detachment arrested 16 individuals who confessed that they were saboteurs with the mission of destroying Allied material. All the arrestees were members of a group, subdivided into local cells, consisting of a few trained men and supplied with food and sabotage equipment.

From the confessions of these individuals, 70th CIC Detachment was able to furnish higher headquarters with information and undeveloped leads about eleven related sabotage units in

183 cf., 44th CIC Detachment, this Section.

[redacted]

the Moselle region but outside the Detachment's jurisdiction.

In a separate investigation early in April, members of the 70th CIC Detachment discovered a saboteurs' hideout at the bottom of a mineshaft, 300 meters underground. Two of the saboteurs were killed as they attempted to break for safety. A third member of the cell was apprehended and provided CIC with additional leads on saboteurs still at large.[185]

71st CIC Detachment: Female Wehrwolf Organizer

Agents of the 71st CIC Detachment discovered, in the town of Hessburg, that individuals in Germany who wanted to resist the Allied occupation were not all males. Elizabeth Stolle, apprehended on 12 April, admitted having been swayed by Wehrwolf radio propaganda. She had contacted at least a dozen families in Hessburg with the intention of organizing a Wehrwolf band, its slogan to be, "To destroy the enemy wherever we find him after he has entered Germany."

The time limitations that hampered the work of other CIC Detachments during April, also limited the activites of the 71st CIC Detachment. On occasion, the advance of the division was so rapid that the lists of targets received from Corps CIC dealt with towns and locations that had already been passed.[186]

The 87th CIC Detachment: The Long Thrust

The 87th Infantry Division remained a part of the VIII Corps throughout the final campaign. On 22 April, the VIII Corps passed from the control of the Third to the First US Army.

The Division moved from the Rhine, in the vicinity of Koblenz, into Czechloslovakia. By 29 April, their CIC Detachment, under First Lieutenant Sam E. Harwell, had turned over town plans and arrest reports covering 204 German and Czechoslavakian communities.[187]

[redacted]

In the Division's advance through the state of Thuringen, generally conceded to be the hotbed of Nazi fanaticism, it was found that the Detachment's fears that the population would become increasingly hostile were baseless; instead the population's reaction was "passively unfriendly." The most serious security problem came from civilian forced laborers, who, considering the arrival of American troops to be synonomous with "liberation,' departed by the thousands in all directions. Mixed in with them were German soldiers, war criminals, high party officials, and others who had chosen cover as displaced persons to lose their punishable pasts. Control was Military Government's responsibility, but to CIC fell the task of weeding out the false displaced persons.[188]

Summary of Events

The 87th CIC Detachment maintained rather complete Daily Activities reports, noting disposition of personnel and the work performed by different teams of the Detachment. Some of the highlights form the basis for the following narrative of the Detachment's activities.

The first area, east of the Rhine, worked by the 87th CIC Detachment was a wooded area south of the intersection of the Lahr and the Rhine Rivers. On 26 March, tactical equipment was picked up by a headquarters CIC team on a mountain-top which had served, until a few hours before, as an observation post for six German soldiers. The mountain also housed the ruins of a medieval Teutonic castle, called Dragonfels.

Detachment activities, for the first few days, consisted mostly of security checking of towns, arrests of Volkssturm members as POW, apprehension of displaced persons, and the reporting of security violations. On 29 March, near Balvenstein, they examined Castle Shaumberg, which the Germans had used as a library for naval text books and fiction which was sent to German naval personnel on active duty. Several crates of books and a small quantity of arms and ammunition were impounded by the agents, but no records or data of counterintelligence value were found.

On 31 March, Special Agents Edmund St. Strul and Frank B. Arnold, with interpreter Kurt Reineke, arrested the director of an underground aircraft parts factory. A search of the factory was made, and Army Air Force and Tactical Air Command Intelligence officers were notified.

188 87th CIC Det Summary of CI Activities, 13 Dec 44-30 May 45, in 95th (sic) CIC Det Rpts, Folder of Bi-Weekly Rpts, Sept 44-Jun 45, (UNCLASSIFIED), Kansas City Records Center, Box 25095).

[redacted]

On 1 April, as a result of information forwarded by one of the regimental CIC teams who had interrogated informants about tactical information; three US tanks and accompanying infantrymen captured 200 German soldiers in the woods near Langgons.

For the next ten days all efforts were directed to clearing non-Nazi Burgermeisters, investigating rumors, following up statements of informants, and similar routine activities. On 11 March, however, an informant developed by one of the regimental CIC teams lead headquarters CIC personnel to 11 metal-lined, waterproofed boxes in which were considerable stores of food and ammunition, ostensibly earmarked for use by Wehrwolf personnel.

On the following day a woman accused a friend of burying food and ammunition. Her friend, seemingly perplexed, told CIC agents that the informant originally had directed her to purchase the material. Investigation revealed that the original informant was a purposeful prostitute and that her friend was an Ortsgruppenleiter. The Ortsgruppenleiter was immediately arrested.

The prostitute eventually made it known that her own occupation had two sides to it; she was also an agent for the Communist party in Germany. Her modus operandi was quite basic. She "lured" men to her apartment, drugged them, and then searched their clothing for documents or papers. The detachment did not consider this woman to be "a security threat at the present time," but the CIC agents suggested that she be kept under observation, and they filed a report with higher headquarters.

On 13 April, a headquarters CIC team investigaged a Machine Records Unit of the German Navy, located in a roadside Tavern on the way to Rudolstadt. The pay records of 80,000 naval employees and servicemen were kept by the unit, but all secret records had been burned two weeks before the Americans arrived. The personnel and equipment of the office were placed under guard by Military Government; and the director was made personally responsible for the maintenance of remaining records and the behavior of his personnel.

Three days later CIC was handed a civilian by division troops. Interrogator Bamberger learned that the man, Walter Schubert, was an Oberstrumfuhrer in the Waffen Schutz Staffeln and an employee in Department II of the Reichssicherheitshauptant. Threatened with internment in a Russian Prison Camp, the arrestee broke down and cried. He was sent back to the POW enclosure, with a recommendation that he be interrogated further.

The same day, the troops of the 35th Engineers brought in three men: a middle-aged man, a Russian, and an Italian POW. The Russian denounced the middle-aged man as a German soldier, claiming the men knew where some wireless-telegraph sets were stored, and offered to lead the Americans to some buried ammunition and weapons. The middle-aged man proved that he had been discharged from the German Army in 1942, but admitted having been seen by the Russian in a Volkssturm uniform, though he did not participate in action against American troops. Upon inspection, the "wireless-telegraph sets" were discovered to be regular radio receiving sets which a retail store owner had moved to a barn for protection from damage by shelling. The "buried arms and ammunition" turned out to be foodstuffs which evacuees, living in the area, had hidden for an amergency.

Once again, according to reports, activities became rather routine, until 26 April when a CIC team assisted Military Government in blowing up a large bank vault of the Reichbank at Plauen. Three-quarters of one million dollars were found,--$275,000 in US gold currency--and one hundred cases and trunks of material confiscated from occupied territories. Schutz Staffeln Chief Himmler had deposited the gold. [189]

How to Meet the Russians

An undated, unsigned, and unclassified document, presumably copied by the 87th CIC Detachment, is the only available source which indicates what the established procedure was for the meeting of the Western Allies with the Red Army.

According to the report the Third US Army had notified the VIII Corps that the Russians were "25 kilometers east of us. We will hold present positions. Liaison parties of Russians will be allowed to come across our lines, but no large bodies of troops will be permitted to cross and no territory will be given up except on authority of this headquarters."

The VIII Corps notified its subordinate units, advising that "Russian POW be used to assist in identifying and translating. Be particularly alert for the approach of Russians, so as to avoid a fight over mistaken identity. Notify this headquarters immediately when contact is made. If any high ranking Russian Officer appears, send him to this headquarters."

189 87th CIC Det Daily Activities Rpts, dtd 26 Mar-9 May 45 in 95th (sic) CIC Det Rpts, Folder of Bi-Weekly Rpts, Sep 44-Jun 45, (UNCLASSIFIED), (Kansas City Records Center, Box 25095).

[redacted]

General Culin, Commanding General of the 87th Infantry Division, at "conference call," gave the following instructions for subordinate units to follow.

"1. Contents of preceding message from VIII Corps apply to all elements of this command. This headquarters, referred to above, means through Division.

2. Get Russian interpreters to front line units at once.

3. Be sure every road leading into your positions from the east is covered and blocked and have interpreter at each point.

4. Hold your present outpost positions and restrict patrolling, first to lateral patrols for contact between units and second to investigage reported presence of Russians to the front, then later get interpreters.

5. Use Civil Affairs Officers and personnel section to secure Russian interpreters, preferably our own people and, if POW, use former Russian soldiers that will assist in identification. If unable to secure same in necessary numbers, notify Division G2.

6. No contact with Russian troops other than transactions of official business.

7. You can expect arrivals of numbers of German soldiers withdrawing from the Russian advance. These may possibly be willing or anxious to surrender to Americans rather than Russians, but be alert and place under strong guard any such German.

8. All forward positions will have normal guards doubled until further notice.

9. Such additional measures as you think necessary will be taken. Notify G3 of any change in present dispositions resulting from additional measures.

10. All shoulder and hand weapons of any foreign make will be taken up immediately by unit CO's. You may tag such weapons for present owners. They may be held under guard and returned if and when situation permits.

[redacted]

11. Do not assume this means termination of hostilities, or broadcast such impression by any word or act, or relax, in any degree, any measures of security now ordered or directed by the circumstances."[190]

89th CIC Detachment: Scorecard

The consolidated statement of activities for the members of the 89th CIC Detachment during April revealed some impressive totals: 71 towns were covered; 5,323 displaced persons were screened and turned over to Military Government for handling; 1,942 former Wehrmacht members, in civilian clothes, were apprehended and interrogated; an additional 17,804 civilians were interrogated regarding their military status; and 713 counterintelligence arrests were made.

The Detachment which compiled this record spent a third of the month in a static position in the vicinity of Greiz, which enabled the agents to make more complete coverage of towns within the Division area than had been previously possible. Directories of the Nazi party and Schutz Staffeln members, picked up by agents in the towns, often simplified the task of determining automatic arrests, too.

Interrogations could not always be completed, even in the case of automatic arrestees, and the CIC agents often dealt with individuals whose guilt was apparently greater, but against whom evidence was lacking. Four persons among the many that CIC arrested attempted to commit suicide rather than submit to Allied justice. CIC noted that in each instance, there was not enough information at hand to make a case against the individual, and these four might have gone free had their conscience or fears not mastered them.

The suicide of Willy Schon fitted the pattern. An hour and one half of interrogation had failed to reveal anything more about Schon than Nazi political affiliations and an industrious business life along with his position in the Schutz Staffeln as a Standerenfuhrer. However, Schon must have expected more to eventually come to light, and he took his own life by hanging.

Some of the German offenders anticipated retaliation from the Americans on a quid pro quo basis. One woman internee,

190 Document titled: "No rumors Will be Spread about the Following Message," undated, unsigned, in 87th CIC Det Correspondence File, 6/44-5/45, (UNCLASSIFIED), (Kansas City Records Center, Box 25095).

[redacted]

fully aware of her misdeeds, asked whether she would be shot on the spot or in another town.

A great boon to the CIC agents was the excellent cooperation received from local civilian police who followed orders to the letter and, at times, volunteered information which led to the arrest of individuals of counterintelligence interest.[191]

CIC could not secure the names of all persons who merited internment under an automatic arrest category, and it was almost inevitable that chance, which allowed some individuals to escape, would also trap others.

One man, picked up, after curfew, by a roving patrol, was brought to the 89th CIC for routine screening. Nothing would have indicated this person to be more than a curfew violator, but persistent CIC interrogation forced the man to admit that he had been a Schutz Staffeln guard in the concentration camps at Auswitz and Buchenwald. CIC had the man interned as a war criminal on the grounds "that the sights at Ohrduf (another concentration camp) testify that no person connected with any such institution can be considered anything but a war criminal.[192]

By the end of April, with reports spreading that the war in Europe was practically over, agents of the 89th CIC Detachment, feared that a let-down in security consciousness might make the American forces vulnerable to attack. If not by enemy troops, possibly by Wehrwolves or other resistance groups. Therefore, they cautioned their operatives, "Let us remember the old adage 'a chain is as strong as its weakest link' and keep all phases of our security up to the highest standards."[193]

Four Prefer Death

During the early part of May, the 89th Division was on occupation status in the Zwickau area, and 89th CIC agents were able to complete a wave of arrests. Evasion by wanted Germans

---

191 89th Inf Div After Action Rpt, dtd 1 Apr to 30 Apr 45, (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va).

192 89th Inf Div G2 Periodic Rpt #47, Annex 4, CIC Activity Rpt dtd 26 Apr 45, in FUSA G2 Jnl & File, dtd 27 Apr 45, (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va).

193 89th Inf Div G2 Periodic Rpt #50, Annex 5, CIC Activity Rpt dtd 29 Apr 45, in FUSA G2 Jnl & File, dtd 30 Apr 45, L-558, (UNCLASSIFIED), (Departmental Records Branch, AGO, Alexandria, Va).

was made more difficult by the stable situation, and the "ones who got away" frequently did so only by suicide.

A man named Dost, whom CIC had been trying to grasp for three weeks, was finally located and brought into the CIC office for questioning. After the initial interrogation session, Dost was left alone in an attic devoid of furniture and stripped of all weapons and instruments for self-destruction. But the following day, with the aid of a trip of silk, Dost was able to hang himself.

Another Zwickau resident, and former Kreisamtsleiter, was arrested and placed in a city hall awaiting further disposition. Before he could be transferred, this individual also committed suicide by hanging.

Not all the Nazis who took their own lives waited to be taken into the custody of the Americans. One 89th CIC agent located the address of Martin Hammitzch, the brother-in-law of Hitler, but when Hammitzch discovered that capture was imminent, he fired a pistol into his temple.

A CIC agent almost arrested Otto Halm, a much-hated individual who had performed acts of cruelty against both the British POW and the foreign labor that had worked in his mines. But, as the agent started up the stairs of the house, Halm killed himself.

Final Skirmish

As 89th CIC agents were beginning to become accustomed to occupation-type duties, they found themselves accompanying combat troops in cleaning up a pocket of enemy resistance in the town of Lugau.

In the early hours of 7 May, the armed detail moved towards the objective, and proceeded smoothly to a roadblock guarding the approach to the town. The American soldiers blasted out this position, and the CIC agents went forward with the combat troops until pinned down at a crossroads by small arms fire. The agents skirted the circle of troops and tried to reach the Rathaus to apprehend the Burgermeister and obtain a map of the town. Machine-gun fire halted their advance, and they were forced to return to a temporary command post where civilians from the captured sectors of Lugau were screened.

This operation was interrupted for three hours when American artillery rounds were lobbed into the town, and all persons sought safety in cellars. Soon after the shelling ended, the town was taken. All male civilians were brought before the CIC

[redacted]

team for checking. Of the 1,200 persons screened, 75 were interned as security threats, and an entire new city administration was effected by the combined efforts of CIC and Military Government units.[194]

The 100th CIC Detachment: Fast Moving

The 100th Infantry Division remained on the offensive until April 25th, when they assumed occupational duties. Security in the Division sector, according to this Detachment's Monthly Information Report, continued as top priority. Surveys of the most sensitive installations were conducted as frequently as possible, and recommendations regarding locations and guard systems were made. Due to the rapidity of the advance, many towns were by-passed and received no counterintelligence attention.

Automatic arrestees, security threats, and potential agents comprised the bulk of the internees taken by the Detachment, although the outfit did have an opportunity to act against an alleged Wehrwolf plot. Based on information received by the Detachment, of an impending Wehrwolf plot to stage a riot and kill a company commander on 29 April, 19 persons were arrested. Of these, seven were interned, after interrogation, as fanatical Nazis and as the probable influences of any planning to keep Nazism alive in the town of Fellbach. No traces of an organized Wehrwolf group or of a scheme to riot were uncovered. The internment of the seven was a measure to ensure that no similar subversion would be perpetrated in the town at any time.

The leader of another potential resistance group, the Hitler Jugend, was arrested in Sulzbach. The youth admitted painting threatening signs, found in the village of Sulzbach, and intended to carry out underground activity, until American tanks rolled into town, shattering his nerve. He was interned through POW channels.[195]

Generally, however, the 100th CIC Detachment found no organized underground movement in its advance across Germany. Agents noted the overwhelming sentiment among the German people that resistance was futile, and reported that informants told

101st CIC Detachment: Agents Alerted For Special Mission

The final Allied offensive found the troops of the 101st Division driving deep into Austria, while agents of the 101st CIC were busy apprehending Black List Nazis along the way. The Detachment was split at the beginning of this drive, as Captain McGuire and several other agents were alerted for a special mission. The remainder of the Detachment was placed under command of Lt Francis E. Martini.

The special mission was to be performed with some agents of the 82d CIC and a battalion of paratroopers from each division. SHAEF was fearful that fanatical Nazis might execute Allied POW en masse in retaliation for losing the war, and a target list of 30 POW camps was compiled, many of which were deep behind enemy lines. If the Allied intelligence discovered that the Germans would carry out the grim executions, the task force was prepared to jump into the POW camps and hold off the Nazis until aid arrived. McGuire was placed in charge of all CIC men assigned to the mission. However, the threat never materialized, and the agents were relieved from what might have been extremely hazardous duty.[197]

103d CIC Detachment: Slow Start, and Then...

Up to 29 March, the 103d Infantry Division had been in the final offensive of the Sixth Army Group west of the Rhine. On that date the Division moved under the direct jurisdiction of the Seventh US Army, and assumed occupational duties east of the Rhine in areas cleared by other attacking US units. The CIC office was located in Schifferstadt for four days, then in Neustadt and finally, on 8 April, to Bensheim, where it remained until the Division was committed to the offensive on 20 April as a component of the VI Corps.

Since there were approximately fifty towns for each agent, CIC limited its activity, in the initial occupation phase, to only the most important areas. As a result, many towns did not receive counterintelligence coverage. A survey of the territory, made by airplane, indicated too much civilian travel, but, fortunately, nothing noticeably detrimental to security occurred.

In addition to routine security and counterintelligence investigations, the agents of the 103d CIC Detachment had several interesting experiences.

---

197 Interview with Major Martin E. McGuire on 24 Mar 54, Ft Holabird, Md, (UNCLASSIFIED).

[redacted]

In one case, a man claiming to be an American citizen was located in a prison in Frankenthal and immediately transferred to the Division's civilian cage at Neustadt. John Ketterring, alias Hans Kettering, told CIC interrogators that he had been a resident of the United States from 1922 to 1939, and an officer in the US Army Air Corps. Ketterring claimed to have been forced to serve as a captain in the Todt organization, where he had the responsibility of supervising from 100-3,000 forced laborers for the Germans. He was unable to explain how it was possible for him to write to his wife for his citizenship papers, yet not visit the American Consulate between 1939 and 1941. Ketterring's contention that he had been placed in prison for failure to fight ggainst the Allies was disproved by prison records which indicated the charge against him as rape. Other falsifications in his story were uncovered, and the agents sent him to Army CIC as a treason suspect and for making false official statements.

In the occupational phase, six agents from army CIC, five Military Intelligence Interpreter (MIII) teams, six Interrogation of Prisoner of War (IPW) teams, two Order of Battle (OB) teams, 30 linguists and two stenographers were placed at the disposal of the 103d CIC Detachment. These teams either brought their own transportation or were supplied vehicles by tactical units in their areas of operation.

From 20 April to 4 May, the Division was able to advance 250 miles, due to the crumbling Nazi resistance. In all towns covered by CIC, the leading Nazi officials were arrested. At Grieslingen, a group of CIC agents remained for a few days to clear up the local situation. On 4 May, Innsbruck fell to the Division, and the Detachment once more resumed an occupational role.

The outstanding case of this period involved Leopold Volker, self-described "professional espionage agent," who claimed to have been in that field since 1928. His story was that he had worked for the Germans as a special censor for all telephone, telegraph, and mail communication in Berlin until 1940 at which time his book, "Rudiments of Censorship," was established as the text for later workers. From then until May 1942 he was stationed in Paris where he organized a headquarters to handle all army espionage work in France. Volker said he served in that capacity until he was arrested by the French authorities and released, reporting back to Sicherheitsdienst Headquarters in Berlin. For a time, he headed a Sicherheitsdienst Agency in Tunis. Recalled to Berlin in 1943, he was later returned to France where he was to make a study of the operational methods of the De Gaullist espionage system in Paris, Marseille, Lyon, Toulouse and Bordeaux.

[redacted]

[redacted]

In December 1944, Volker explained, he made a complete report of the American, English, French and Polish methods of espionage, but as the Allies advanced, he withdrew to Germany and helped formulate underground plans for the Nazis. He gave CIC complete information on personalities and meeting places of underground Nazi agents. In the course of the interrogation, he also mentioned Syn-Archie, an espionage organization, supposedly founded by European industrialists about the time of the Spanish Civil War, which had succeeded in planting members inside the secret police systems in Europe. The detachment forwarded the man to the 307th CIC Detachment for additional interrogation.

Another case involved Alfred Fravenfeld, who identified himself as "only a simple major in the Wehrmacht." A lengthy interrogation revealed that he was actually one of the party pioneers, and had served as Gaulziter of Austria from 1929 until 1932. An attempted coup by Fravenfeld in 1934 caused his imprisonment for six months. After the Germans occupied Austria, Fravenfeld was told that he was too notorious to be given public office there, but he was treated very well by the Nazis. From 1940-1943, he was General Counsel to von Ribbentrop, and as late as January 1945, he had addressed an assembly of Sicherheitsdienst and Gestapo agents in Vienna, calling for stern resistance. His identification papers proved to be forgeries and, after his unsuccessful attempt at suicide, 103d CIC Detachment turned him over to Army CIC.

"Tomorrow the World"

One of the most fanatic of all the individuals the 103d CIC agents arrested in April was Dieter Klemm, a 12½ year old member of the Hitler Jugend. When asked his name, this former Jugendschaftfuhrer answered promptly, but as the interrogator queried the youth about his address, Klemm snapped to attention, and, instead of answering the question, answered:

"I hate you Americans. I wish I had a pistol to kill all of you. I shall never betray my Fuehrer as long as I breathe. I realize that you are going to put me away in some camp or prison, but some day I shall be released and then I shall continue my fight for Hitler and Nazi Germany. There are at least a dozen boys in Auerbach of my age, whom you have not arrested, who think exactly as I do. I shall not give you their names. As for the boys who were brought here with me, I am proud to say that my brother, Wolf, and three more are just as good Germans, and therefore just as good Nazis, as myself. I am ashamed of those among the boys who betray the Fuehrer. Do not hope ever to eradicate our National Socialistic ideals or ideas. There are enough of us left to continue the fight as

[redacted]

[redacted]

long as we live. That is all I have to say and now you can do with me whatever you please."

Klemm was evacuated through POW channels for internment as a security menace.[198]

Other CIC Units in the Final Campaign

In the closing weeks of the battle for victory, several CIC units, that had not previously been committed to action, joined the European campaign. The 13th Armored, 16th Armored, 20th Armored and 86th Infantry Division were accompanied respectively by the 513th, 516th, 520th, and 86th CIC Detachments. No records of the activities of these detachments have been recovered.[199]

Chapter 4

THE REAR AREAS

During this period, the Fifteenth US Army conducted operations on two fronts: the 66th Infantry Division contained German forces within the Lorient-St. Nazaire pockets, while the XXII Corps aided in "the greatest double-envelopment in the history of military tactics--that of the Ruhr Pocket."

As the advance of the Allied armies proceeded eastward from the Rhine, the Fifteenth Army occupied, organized, and governed the Rheinprovinz, Saarland, Pfalz, and that portion of Hessen west of the Rhine River.[200]

In addition to the units of the Fifteenth Army, organizations under communication zone headquarters, and those assigned various high echelon headquarters, operated in the rear areas.

CIC Personnel Available to Fifteenth Army

As of 1 April, agents of both the 222d and 223d CIC Detachments were operating under the XXII Corps, since the XXIII Corps had not yet become operative. The organic 315th CIC Detachment from army headquarters was operating in Dinant, Belgium. These three Detachments, augmented by both French and German MII teams and IPW teams, attempted a static coverage. Higher headquarters furnished one tactical reserve CIC team, from the 418th CIC Detachment, to cover the city of Cologne. A team from the 315th CIC Detachment, augmented by an IPW team and two Netherlands interpreters, assumed the responsibility for the city of Aachen and that territory west of the Roer River to the German frontier. The massive area to be covered and the few personnel available to cover it made for superficial security at best. Various specialist teams were gradually made available during the month, until, by the end of April, five tactical reserve CIC teams, plus a full complement of MII and IPW teams were operating in Fifteenth Army's territory.

On 11 April, Rheinbach Prison was established as the Army's Interrogation Center, although an agreement with First US Army permitted First Army Interrogators to continue their work in the installation until cases already under way were completed. Initial inspection indicated that more than 400 permanent in-

---

200 History of the Fifteenth US Army, Foreword, Lt Gen, G. T. Gerow, p 3, (UNCLASSIFIED), (Staff and Faculty Library)

[redacted]

ternees-- "proscribed and automatic arrest categories"--were imprisoned there, as well as a number of displaced persons, war criminals, German police for use by Military Government, and POW. This overcrowded condition prevented effective security and the efficient operation of a detailed interrogation center. Three IPW teams and one MII (German) team were added to the interrogation staff in the following few days, and the Army Provost Marshal made available custodial and housekeeping personnel.

Frontier Control

The Twelfth Army Group released operational control of the CIC teams employed along the German frontier to Fifteenth Army also, which Army, in turn, passed under the control of corps in their respective areas. The general policy for frontier security contemplated establishment of a prohibited frontier zone not to exceed five kilometers in width from the frontier inside Germany, from which all civilians would be evacuated, and which would be patrolled by a security command supplemented by air reconnaissance to prevent unauthorized border-crossings. Crossings were to be made only when authorized and only through designated ports of entry and exit. The Army commander was authorized to modify the inner line of the prohibited zone in order to take advantage of natural barriers. This would also prevent the need for displacement of persons in large cities or those engaged in essential occupations, such as farming. Any modifications were to be consistent with security considerations.[201]

XXII Corps: Travel Control

Operating within the rear areas in Germany--from the border to the Rhine--the XXII Corps placed a heavy accent on counter-intelligence operations. In their area they were charged with the responsibility of placing personnel from the CIC Detachments operating along the border at predetermined transit points to provide competent and complete coverage of the border area. Policies for permitting or denying frontier passage were established by SHAEF, Twelfth Army Group, Fifteenth US Army and XXII Corps.

During this period, the 222d CIC Detachment was given five specific duties.

201 15th US Army, G2 After Action Rpt for Apr 45, dtd 6 May 45 in G2 Section 15th Army After Action Rpts, Apr-May 45 (UNCLASSIFIED) (Departmental Records Branch, AGO, Alexandria, Va.)

[redacted]

First, they were to provide a counterintelligence staff for corps headquarters. The duties, number of personnel, and organization of this staff are not described in available documents.

Secondly, they were to provide personnel for the Rhine River Control Teams, which operated at each bridge site. These teams were to screen all non-US military personnel seeking to cross, according to policies devised by corps and higher headquarters. These teams, while functioning as one separate unit, operated under the commander of the area in which the bridge was located.

A third duty was the reinforcement of area CIC staffs, mainly by operating in areas in which no division CIC detachment had representation. The counterintelligence operations within any area were the responsibility of the area commander as a normal command security function. Those division CIC detachments which needed augmentation were to be provided with personnel from the corps CIC detachment. Areas under the control of units having no organic counterintelligence personnel, i.e. field artillery brigades or battalions, were to be supplied members of corps CIC IPW and MII detachments on an attached basis.

The fourth duty was to make special investigations as called for, though it is not known how many personnel were available to the corps if its members were operating elsewhere.

The fifth provision of the program dictated the training of additional personnel in counterintelligence functions.[202]

To accomplish the training of the additional personnel, a Counterintelligence School was organized in Munchen-Gladbach to present a series of three five-day courses. These sessions began on 25 April, 1 May, and 7 May respectively.[203]

Classes were scheduled from 0800 hours to 1700 hours daily, and students were instructed to spend two hours each evening on studies. The student group was comprised of one officer and one enlisted man from each battalion in the corps, except for those battalions within the 28th Infantry Division and the 82d Airborne Infantry Division, although the latter was permitted

[redacted]

to send "a limited number." Students, the notification advised, "should have some aptitude for investigatory techniques, previous experience in intelligence or comparable subjects, and, if possible, ability to speak German."

Each unit was to send the names of the persons who would attend 24 hours prior to the beginning of the course. The students were instructed to report to the corps' G2 Section at Building 285 on Bokal Street, one block north of the opera house. Mess and billeting arrangements had been made, except for cots, bedrolls, and mess kits which had to be brought by each student, along with a notebook, fifty sheets of 8"x10" paper and a writing implement. This registration was to be accomplished before 1700 hours of the day prior to the beginning date for the session.[204]

The object of the school was to provide, for each company or battery in the corps, at least two persons who had been alerted to German undercover organizations, sabotage methods, and rudimentary counterintelligence techniques.[205]

XXIII Corps CIC: On Its Own, At Last

The XIII Corps, a January arrival to the battle scene, became operational for the first time in April, and its CIC detachment was able to put into practice much of the experience it had gained under the tutelage of the 303d and 222d CIC Detachments.

The first assignment, undertaken on 10 April, was in an area of operations containing high Nazi officials, automatic arrest personalities, displaced persons, espionage agents and saboteurs, and large numbers of Wehrmacht deserters.[206]

The town of Idar-Oberstein was the first of many in the Saar-Mosel area of Germany to receive counterintelligence coverage from the XXIII Corps Detachment working on its own.

[redacted]

The first step taken was to screen the town's police force.[207] Teams from the Detachment were deployed to six towns while one was retained at headquarters. Leads supplied by the G2, XXIII Corps, were disseminated to teams in the field, and a "vast quantity" of general information on target personalities was secured from ETOUSA and the Fifteenth US Army. In their immediate towns and the surrounding areas, Detachment agents took "automatic arrest category" Nazis into custody, enforced security measures, tightened up restrictions on displaced persons, and investigated shooting forays and other disturbances between German nationals and internees in camps for nationals of Allied nations.

In conjunction with Corps G2, the Detachment "re-drafted" the Personal History Questionnaire for use in investigating German nationals for temporary employment with the US organizations in the area. A system of screening German nationals to serve as informants for CIC was instituted, producing "invaluable" results.[208]

On 12 April, the 223d was augmented by the 516th CIC Detachment, ADSEC Detachment Nr 418-28, an Army Reserve CIC team, two IPW teams, and one MII team.[209]

Liaison was established among all interested agencies and offices, and progress was made in the clearing of civilians for employment by Military Government.

The CIC Detachment was already working at its peak on 22 April when their outstanding case broke. It involved Sonderkommando W-12, a German sabotage movement affecting the entire area of Corps responsibility. The 70th CIC Detachment had uncovered the underground organization, but the 223d CIC Detachment took over the case when the 70th was alerted to join its division in Frankfurt. The case status report and prisoners of the 70th CIC Detachment connected with the ring were turned over, and all teams of the 223d CIC Detachment went into action. This was undertaken in addition to the regular duties of the

[redacted]

teams. Members of the ring were sought, captured, and interrogated for further information and to secure confessions; caches of sabotage equipment and foodstuffs were unearthed; and liaison was established with ordnance and other sections which cooperated in the movement by taking charge of reclaimed explosives and destroying them. The Fifteenth US Army sent a photographic team to corps CIC office to accompany various elements of the Detachment, to photograph evidence for use in military courts and to obtain material for a countersabotage training film under production by the army. Special night interrogation facilities were constructed. Sonderkommando W-12 became a round-the-clock problem.[210]

Developments

A confidential informant led agents of the Detachment to four of the underground group's supply dumps on the first day.[211] The following day two suspected saboteurs were picked up, but one was released after interrogation.[212] The other confessed to being a member of a sabotage cell. He lead CIC Agents to another cache of supplies and gave new personality information. On the same day, 24 April, a woman was picked up and interrogated about the suspected sabotage activities of her husband and one of her friends.[213] On the 26th, the friend was picked up. He confessed, giving names of other members--one of whom CIC had already arrested. Another confessed saboteur of the group led CIC agents to three sabotage supply caches.[214] Two more members of the ring were apprehended and interrogated, both confessing. One of them led CIC agents to three dumps in the Trier area, while the other provided information about his cell's operation and personnel.[215] On 29 April, three members of still another cell were apprehended,[216] and, on the 30th, two more saboteurs were arrested. The net gain in this last

case was only one, however, since a suspect arrested earlier was released. A search for another suspect, supposedly in the area, proved fruitless[217] until 28 May, when, upon arrest, he confessed immediately to having attended the Wiesbaden Sabotage School. He was placed under house arrest pending further investigation.[218] On 1 May, two new sabotage dumps were located by the agents,[219] and a week later they discovered another dump and the body of a former member of one of the cells. Investigation revealed that he had been murdered.[220]

Progress on the case had slowed down perceptibly by the day of official surrender, but had not stopped. The Detachment had, by that time, developed the information that Sonderkommando W-12 cells were operating in eighteen towns in that area and in other units' areas nearby.

Neutralization of the enemy's sabotage plans was, of course, the main objective of the CIC investigations. Teams in the field were reassigned to areas with access to the territory of operations for the known cells. "Wanted persons" lists containing the names of known cell members were distributed.

The problem was somewhat complicated by the uncovering, on 5 May, of Sonderkommando Bienenstock, an airborne saboteur group fostered by the Luftwaffe for behind-the-line action. Two members of the group were captured and confessed to their CIC interrogators. Teams of two airmen were to land German aircraft behind Allied lines, destroy the craft after removing all sabotage equipment, and function as sabotage teams. The self-confessed agents outlined other aspects of the plan, including areas in which the alleged landings would be made. They claimed that 30 or 40 aircraft, manned by these teams, were already on their missions. The 223d CIC Detachment arranged for flash warnings to be sent through G2, XXIII Corps, to the cities which were cited as targets.

The search for members and munitions belonging to the Sonderkommando W-12 group carried on into June, with eventually

four more arrests and two investigations of sabotage dumps, which were found to be empty.[221]

Another Corps School for Counterintelligence

Some agents of the Detachment served as instructors at the XXIII Corps Counterintelligence School, instituted by the Corps G2. Three classes were held, resulting in the training of nearly 400 individuals in counterintelligence and counter-sabotage work. The quality of instruction in this school was commended by Major General Hugh J. Gaffey of the US Army in a letter to the members of the faculty on 23 May.[222]

The 94th CIC Detachment: Ruhr and Occupation

The 94th Infantry Division of the XXII Corps was one of the units under the Fifteenth US Army which participated in action against the enemy during this period. The 94th was directly concerned in the encirclement and reduction of the Ruhr, and in its later occupation.

The 94th CIC Detachment, under Captain Carl K. Goodson, boasted a diversity of experience by the end of the tactical war which was matched by few detachments. With their division, they had participated in the containment action against the St. Nazaire-Lorient pockets, in the active defense of the Saar-Moselle triangle, in the breakthrough from the Saar to the Rhine, and in the Ruhr as a tactical and occupational force. On the basis of this wide background which "afforded encounters with every type of security responsibility, civilian and military," a collective critique[223] was prepared "to indi-

221 223d CIC Det Rpt After Action Against the Enemy, undated, unsigned, for periods 10-31 May and 1-30 Jun 45, in 223d CIC Det Unit History, (UNCLASSIFIED) (Kansas City Records Center, Box 25099)

222 223d CIC Det Rpt After Action Against the Enemy, undated, unsigned, for period 1-9 May 45, in 223d CIC Det Unit History, (UNCLASSIFIED) (Kansas City Records Center, Box 25099)

223 NOTE: The critique is, unfortunately, an unsigned, undated, and unfinished document, classified Secret. Plans had evidently been made to include an Appraisal after the Critique, but, for an unknown reason, this segment of the document was not attempted beyond the title stage. Within the twelve pages of critique are three sections: Personnel Problems, Equipment, and Administration and Operations. Under each section some suggestions or explanations have been crossed out in pencil. Although obviously "unofficial," this document contains so much pertinent material that it is impossible to ignore it.

[redacted]

cate the most effectual and realistic solution of the operational necessities of counterintelligence under all combat conditions." The critique is twelve pages in length, broken down into three subheadings: Personnel Problems, Equipment, and Administration and Operations.

Under the heading, "Personnel Problems" the "desirability of having in reserve at higher Counter Intelligence Corps headquarters a pool of trained CIC personnel available to supplement the tactical unit detachment. . . ." was noted, especially for ". . . . relatively static operations (and) to augment tactical detachments during an initial, urgent, and turbulent occupational period in an area of the magnitude occupied by this division in the . . . Ruhr pocket." The training of CIC agents in the basic rudiments of the language of the country in which they would be operating was recommended. "A more rapid assimilation of the language once foreign operations were undertaken, " was anticipated by this, as was the ability of the agent to interview and interrogate better through interpreters because of the control which could be exercised. Another suggestion was for much closer liaison between forward and rear counterintelligence echelons, when tactical detachments are in a mobile combat phase. In this way there would be increased "security continuity" through the formation and utilization of "permanent, or semi-permanent pin-point occupational counterintelligence teams." According to the critique, these teams would accompany the division detachments into towns and cities specifically designated for their coverage.[224]

An increase in the number of operational teams within the CIC detachment was advocated to permit the attachment of at least one two-man team to give CIC service to the "artillery positions and skilled artillery personnel" of division artillery. A second increase in the T/O was suggested to provide for drivers and service personnel to handle and keep in repair the detachment's vehicles.

---

224 (NOTE: The document elaborates this suggestion, explaining that these teams should study their assigned areas comprehensively through research, and that they could be held in reserve at corps or army level until fall of their target area was imminent. The document also criticized "apparently superfluous CIC personnel...complacently engaged in routine assignments of a highly postponable character" in rear areas, "(army, army group, and com Z levels)," stating the belief that "these rear area supernumeraries could have been employed to much greater advantage, and would have contributed more tangibly to the counterintelligence function, if they had been deployed as aforementioned pin-point teams. . . .")

[redacted]

[redacted]

The critique also favored establishment of the ranks of agent and special agent on a basis similar to the warrant officer grades or that of Flight officer in the air force,[225] and the maintenance of stability within operating teams of the detachment by keeping inter-team transfers of personnel at a minimum. There was also a positive suggestion for the redeployment of personnel. It would be accomplished on a "loan" basis with CIC personnel from evacuated static areas being sent to active areas.[226]

Under "Equipment" the complaint was repeated that much of the "impediments" provided for the detachment had proven superfluous, including most of the special investigative equipment. However, the lack of listening devices was noted definitely as an oversight. Numerous instances had arisen where such devices could have been used advantageously by the detachment.

The only other recommendation concerned the substitution of one three-quarter-ton truck and trailer for the jeep and trailer originally provided for moving the detachment. The three-quarter-ton vehicle, the document explained, could be utilized (1) to move bulky and weighty items more efficiently, (2) as a mobile office in rapidly changing field situations, and (3) for transporting large groups of arrestees to jails, interrogation centers, and sites of local detention, "when the tactical situation makes it temporarily impossible to obtain suitable unit transportation."

Administration and operation recommendations were numerous. The first suggested that the system of supplying the division detachment with only one copy of master blacklists was most inefficient, since the lists could not be reproduced at division level soon enough to be of use unless agents were taken off operational duties and given the administrative task of copying the lists. According to the critique, a minimum of five lists should have been supplied, one for each CIC team and one copy for CIC headquarters.

---

225 (NOTE: This recommendation was crossed out on the document with no hint being given as to the deleter's identity or the reasons for the deletion. Before its cancellation, the paragraph had dealt specifically with (1) the high-quality caliber of CIC personnel, (2) the important responsibilities they were expected to assume, (3) the authority and influence each agent wields which "is totally incommensurate" with their status in the "military hierarchy," (4) the difficulty high-ranking officers had in conducting mutually-necessary affairs with enlisted CIC agents.)

226 This was also crossed out, in pencil.

[redacted]

[redacted]

The detachment also suggested the appointment in each combat squad of a "security NCO" who would be trained in elementary counterintelligence to enable him to handle minor civilian problems on his own. Informative lectures on the responsibilities of Military Government and CIC would complement this program, providing for all troops, general background information on civilian problems in the combat phase and clearly defining the categorical differences between incidents of CIC concern and instances of Military Government interest. Such a plan would make available a supplemental force of combat men who could provide basic security in outlying towns usually not covered by CIC in fast-moving situations.

The third recommendation involved the pre-alerting of CIC when a unit was to move into a new area. Thus CIC could send agents into the new area, with or before the advance party, to effect a take-over from the preceding detachment and begin security measures before the bulk of the unit arrived.

Another recommendation concerned the establishment of counterintelligence document teams in a task force. The sole responsibility of these teams would be the analyzing of documents of counterintelligence interest at pre-determined targets. This would provide CIC teams with information promptly, and permit them to seek out personality targets much more rapidly.

Finally, the critique dealt with the most propitious time for CIC agents to enter a combat area to begin counterintelligence action. The document reflected a belief that the arrival of CIC should coincide with the establishment of the regimental command post in any specific area. Premature entrance had usually proved "abortive," according to the document, since the civilian contacts were unable to cooperate with agents while the fighting was still raging or the combat clean-up was still in progress.[227]

CIC Work During the Period

One of the 94th CIC Detachment's notable accomplishments during April was the arrest of Hans Goebbels, brother of the notorious Minister of Propaganda, Dr. Josef Goebbels. The head of the largest insurance business in the area and holder of several German and Nazi Party honors, Hans Goebbels claimed that he was not too active in politics or party affairs. He openly admired his brother. A search of his home was unproductive. CIC agents sent Goebbels to the division POW cage

227 94th CIC Det, Doc #81, in 94th CIC Det Correspondence File Nov 43-Aug 44 (CONFIDENTIAL) (Kansas City Records Center, Box 25095)

[redacted]

[redacted]

until he could be picked up by representatives of higher Intelligence echelons to "be milked of all the information a person of his position, influence, and consanguinity may be expected to have."

The leader of the Dusseldorf Bund Deutcher Madel was arrested by the detachment also. Holding a rank equivalent to that of colonel, she had ten thousand girls under her command. She explained the organization's aims, and told of a recent meeting she had attended where the topic to be discussed was Wehrwolf activities for the organization. She claimed that her hesitation about committing herself to live up to the party's dictates concerning Wehrwolf activities had caused the discussion to be called off. Evidently the Nazis were fearful that she would break easily under interrogation if she were not for the plan wholeheartedly. She gave pertinent counter-intelligence personality information on the Bund Deutcher Madel and on the Hitler Jugend.[228]

Threats

On the morning of 7 April, an informant from Kaldenhausen came to the 94th CIC Detachment with a warning sign which had been placed on the front door of his home during the night. The sign, constructed of cardboard from a US Army ration box, carried the following message written in heavy blue pencil:

"AUCH FUR DICH DU USA SOLDLING IS DIE
STUNDE DER BERGELTUNG NAHE I .WARNUNG SS"

(For you too, USA hireling, will come
the day of vengeance soon. 1st Warning SS)

Agents discovered that another individual, who had been used by CIC as an informant, had received an identical warning on his door. However, neither of the informants had any idea who might be responsible for the threats.

CIC made arrangements to put both houses under guard of US Army personnel during the hours of darkness. CIC fully realized that an informant's willingness to cooperate would be likely to falter in the face of these threats.[229]

Cologne: CIC Still Busy

Tactical Reserve Team Nr 14 of the 418th CIC Detachment had assumed counterintelligence control of Cologne, Germany, after the American advance west of the Rhine had begun. At the end of their first week of operation there, the Detachment reported:

> "At the present time, in the city of Cologne, there are more than 300 cases on which action is deemed necessary, but which this team has been unable to develop due to lack of personnel."

As a result, only high priority cases were given immediate action. Security violations were handled by security guards, responsible for the enforcement of Military Government proclamations. These guards were active in a raid against an anticipated Hitler Jugend meeting on the night of 2 April. They arrested 13 youths who had gathered in cell-size groups of two or three. Some of these claimed to be members of "Edelweiss," and all were released. Arrangements were made to secure an informant to penetrate the organization and keep CIC informed.

Two Rhine-crossing enemy agents were apprehended and sent through channels for disposition.[230]

Team 28 of 418th CIC Detachment

Team 28 commanded by 2d Lt Alfred R Oliver of the 418th CIC Detachment, moved into Trier, Germany, about five miles from the Luxembourg border, and became an unofficial CIC occupation organization. Team 28 was evidently subordinate to the 223d CIC Detachment of XXIII Corps of Fifteenth US Army.

In addition to providing counterintelligence measures in Trier and surrounding areas, personnel of Team 28 manned screening offices in a civilian internment camp and a displaced persons center.

Three buried caches of sabotage equipment were uncovered through the efforts of CIC agents of Team 28 and of XXIII Corps who were led to the hiding places by an informant. In each instance, the explosive and equipment were buried near a tree which had been marked with a "W." Motion pictures of the excavating were taken for training purposes. The sabotage equipment was removed from the CIC office by an engineer battalion.

230 418th CIC Det (12th Army Group) TRP 14, Counterintelligence Rpt for 30 Mar-5 Apr 45 (CONFIDENTIAL) (Staff and Faculty Library)

[redacted]

[redacted]

Forty persons were arrested by the Detachment's agents in and around Trier, including a Schutz Staffeln officer; a Sicherheitsdienst official and Gestapo informant; two Sturm Abteilunger members; and a Hitler Jugend member who had hidden weapons and ammunition.231

The 13th Airborne CIC Detachment: at Oise in France

The 13th Airborne CIC Detachment, commanded by Captain Frank Popisil, continued to provide security for the 13th Airborne Infantry Division, posted in an area thirty miles north of Paris, France and attached to the Oise Section, Com Z.

The bulk of the Detachment's investigations was concerned with civilian loyalty checks for potential employees of the US Army, and with security checking of troop movements, base echelons, and thirteen marshalling areas. Thirteen of the potential employees were found to be "of doubtful morals and character."

During April, personnel of the Detachment prepared a Counter Intelligence Plan and a CIC Annex for an airborne operation which was later cancelled. Before that happened, however, division command had issued a staff memorandum, delineating duties in the areas which were to be conquered, and giving authority for full control over civilians jointly to CIC and Military Government. By a subsequent field order, CIC was permitted complete freedom of movement and the full cooperation of all elements of the command.

In addition to checking security and civilian loyalty, the Detachment conducted two military loyalty checks and six cases categorized as "Miscellaneous." Under that title came an investigation of a censorship violation picked up by the US Censorship office, which contained a reference to time and place of troop movements. The offender acknowledged his guilt and faced trial by courts martial. In the second, military personnel -- five officers and four enlisted men -- were found "guilty of loose talk and illegal use of government property", and were subjected to disciplinary action. The third case involved a French civilian who was photographing a practice airborne operation. His film was impounded, but investigation revealed nothing derogatory about the man. The fourth bit of miscellany netted, with negative results, two talkative Frenchmen who loitered around military installations. Another in-

[redacted]

volved theft of lard legitimately shipped from the United States for distribution to French civilians. CIC turned this case over to the French. An investigation of counterfeit invasion currency led to Corbeil, France, where the Criminal Investigation Detachment, Seine Base, took over the case.

Cases involving blackmarketing and rumors complete the resume of types of investigation conducted by the CIC agents of the detachment. Unfortunately, US military personnel sometimes were involved in both types of violations.[232]

The COM Z Units

Communications Zone CIC Detachments were scattered throughout most of the western portion of the European continent, from the Pyrenees to the Netherlands, and from the Cherbourg peninsula to central Germany. The final 45 days seemed, on the whole, uneventful for these organizations.

For Section 420-C, however, operating on the Cherbourg peninsula, a tactical attempt on the part of the Germans gave the Detachment agents something to do. They interrogated captured members of an 18-man sabotage group which had landed on the beach near Vauville, Manche, France. The mission of the group was to disrupt transportation on the peninsula and in Cherbourg Harbor. The group succeeded -- without causing any physical damage -- for all work in the area stopped until 17 of the Germans were captured. The 18th was believed to have been killed by mines.[233]

The Joining Up

On 25 April, soldiers of the 69th Infantry Division of the V Corps met elements of the Red Army's 58th Guards Division in Torgau. This was the first meeting of the two Allies on the battlefield and burial ground of Germany.

As both the American and Russian Armies drew up along the Elbe River, these meetings increased.

233 420-C CIC Section, Beach District, NBS, Monthly Information Rpt, dtd 30 Apr 45 (SECRET) (Staff and Faculty Library)

[redacted]

Another "first" meeting took place on 8 May between soldiers of the 103d Infantry Division of the VI Corps, Seventh US Army, and soldiers of the 88th Infantry Division of the Fifth US Army from Italy.[234]

For the tactical troops, the war was at an end. For CIC, however, the war continued. In the days, months, and years following the surrender -- as long as the occupation of Germany and Austria lasted -- army counterintelligence in Europe grew in importance.

234 Op Cit, Eisenhower, pages 410-418.

HEADQUARTERS
U. S. ARMY INTELLIGENCE CENTER
FORT HOLABIRD, BALTIMORE 19, MARYLAND

ACSIH-GC 250/58/M 8 April 1959

SUBJECT: CIC History

TO: All Personnel Reading this Document

1. This volume is a portion of the History of the Counter Intelligence Corps which has been compiled in draft form by this headquarters.

2. Distribution of the History is being made as the volumes become available so that addressees may profit by the problems and accomplishments of the Counter Intelligence Corps in previous years.

3. When completed, the History will cover in as complete and accurate detail as possible, significant incidents and events leading to the organization of the Corps of Intelligence Police during World War I and the Counter Intelligence Corps in World War II. Events, accomplishments, changes, and problems encountered up until 1950 will be included in the thirty volumes planned.

4. In spite of the diligence of researchers and writers, there may be inaccuracies and omissions, since no records are available for some of the more than two hundred CIC detachments which were operational during World War II. Even some of the major campaigns were poorly documented.

5. Any comments should be forwarded to the Commanding General, United States Army Intelligence Center, Fort Holabird, Baltimore 19, Maryland, ATTN: G-3.

COUNTER INTELLIGENCE (CI) DIRECTIVE FOR GERMANY

1. This directive contains the policies and detailed instructions governing CI operations in GERMANY which are designed to;

a. Secure our forces against enemy espionage, sabotage and subversive activities;

b. Destroy the enemy secret intelligence services, all security or secret police agencies and affiliated para-military organizations;

c. Assist in the dissolution of the NSDAP and its affiliates and prevent their rebirth in any form;

d. Aid in the disposal of the German General Staff Corps, including equivalent Air Force and Naval officers; and

e. Insure the detention of selected enemy scientists and industrial technologists.

2. Organizations, upon redeployment from GERMANY, will return their issued copies of this directive to this headquarters.

HEADQUARTERS 12th ARMY GROUP
COUNTER INTELLIGENCE (CI) DIRECTIVE FOR GERMANY

CHAPTER I

INTRODUCTION

1. GENERAL.

a. The instructions contained in this directive pertain to CI in GERMANY.

b. Wherever the term "CI" is used herein it will be understood to mean counterintelligence as supervised by the G-2 of an appropriate command.

c. All references herein to Army/Military Districts will be understood to refer as well to the U.S. Port Enclave.

d. The attention of all CI personnel is directed to the following SHAEF publications:

(1) HANDBOOK FOR MILITARY GOVERNMENT IN GERMANY.

(2) PUBLIC SAFETY MANUAL OF PROCEDURES.

(3) HANDBOOK GOVERNING POLICY AND PROCEDURE FOR THE MILITARY OCCUPATION OF GERMANY.

2. DEFINITIONS. For the purposes of this directive, the following definitions will apply:

a. Counterintelligence (CI). Pertains to and includes passive security control measures, offensive measures designed to counter and destroy enemy espionage, sabotage and subversive organizations and activities, and those operations of CI agencies which will aid in the dissolution of the NSDAP and affiliates and prevent their resurgence in any form.

b. CI Personnel. All personnel assigned or attached for CI duty.

c. Security. Pertains to and includes all internal, civil, frontier, travel, and port security control measures designed to ensure the protection of our military interests. (See Chapter III).

d. Internal Security Control. Pertains to the passive security control measures adopted within the military body to neutralize the efforts of enemy intelligence, sabotage and subversive elements. (See Chapter III).

e. Civil Security Control. Pertains to the passive security control measures prescribed for and imposed upon the civilian population to neutralize the efforts of enemy intelligence, sabotage and subversive elements. (See Chapter III).

f. Sabotage. Pertains to any surreptitious efforts to destroy facilities and materiel vital to our forces. From a CI point of view, sabotage does not include demolition or destruction, when attempted in support of normal military operations by undisguised enemy troops. However, CI personnel will be accorded the opportunity to interrogate such of these enemy troops who may be captured. The countersabotage measures of security control will defend against all sabotage, whether or not it comes within the scope of the definition of sabotage as stated above. (See Chapter IV).

g. Subversion. Pertains to and includes the surreptitious activities of the enemy and of our own military personnel who seek to interfere with our military interests through mediums other than espionage and sabotage such as, propagandizing, rumor mongering, incitement to riot or resistance, intentional violations of security laws or regulations and organization of groups opposed to the aims of MG.

3. ESTIMATE OF THE SITUATION.

a. With the advance of our forces into GERMANY, counterintelligence, especially the security aspect thereof, has become increasingly vital. Prior to the defeat of the enemy's orthodox, organized military forces, security will become even more important; the enemy secret intelligence services, aided by fanatical and sympathetic civilians, are intensifying their efforts. Our forces are opposed by an unscrupulous enemy nation desperately fighting its last stand on its own soil against unconditional surrender.

b. The enemy secret intelligence services, security and secret police, and para-military organizations are believed to have made elaborate plans and preparations for progressively going underground as our forces advance. It is assumed that these organizations, united with other elements of the NSDAP will constitute major threats to the successful accomplishment of our military mission in GERMANY.

c. At the present time no major underground operations of an obvious or significant nature have been revealed in GERMANY. However, it is believed that the basic policy of the organized underground is of long-range character; to lie low initially, participating only in that espionage, sabotage and subversive activity which will not endanger the organization itself, pending an opportunity to regain active control under more favorable conditions. In later stages, guerrilla warfare and sporadic resistance in the form of sabotage and subversive activity, including

[illegible] from individual members of our forces and individuals who collaborate [illegible], [illegible] will be forthcoming to a much greater degree from organized [illegible] semi-organized resistance groups and fanatical individuals.

c. The ultimate defeat and disarmament of the enemy military organi[illegible] may somewhat lessen the security problem of CI. However, the new and [illegible] problems of [illegible] every vestige of the enemy secret intelli[illegible] services, security and secret police and para-military organizations, and [illegible] dissolution of the NSDAP and its affiliates, will then dominate all CI opera[illegible].

2. Military collapse by the enemy may be accompanied by a general condition of internal chaos and disorder. Some eight million displaced persons will [illegible] to return to their homes; many will seek revenge before departing from [illegible]. Although some individuals may attempt to ingratiate themselves in the presence of the conquerors, the belligerent attitude of the German population, [illegible] substantial percentage of which is known to be armed, probably will not undergo [illegible] early change. Resistance will probably continue to stem from semi-organized groups and individuals. Initially, there will be no dependable nor acceptable assistance available to our CI agencies from German police or other civil authorities. The organized underground will foster the continuance of unsettled conditions and will take advantage of the confusion to strengthen its position for the future; plans for the destruction of and secreting of documents, secret processes and equipment probably will have been implemented; plans for the penetration of all administrative offices, industrial programs and public enterprises to be established or supervised by MG will be set in motion; guerrilla warfare may be continued. Many enemy intelligence and police agents, war criminals and NSDAP officials, other than those individuals who upon their own initiative have escaped, hidden themselves and/or assumed new identities, and those who have gone "underground" with the organized underground movement, will seek to escape across neutral borders. Many will attempt to escape across national boundaries in the guise of displaced persons and Allied PWs. Others will surrender themselves to our control, hoping to obtain clemency in exchange for becoming informants. The arrest and detention problem in the US Zone may be increased substantially by the many agents, criminals and officials who, along with the civilians of other categories, may flee from the Russian to the US Zone. As a final premise, every native German and displaced person found within the REICH must be considered initially, from a CI point of view, a suspect individual.

4. RESPONSIBILITIES.

a. Army/Military District Commanders. The operation of CI is a responsibility of Army/Military District Commanders to be discharged pursuant to the instructions contained in this directive.

b. Naval Commanders. Naval Commanders are responsible for the security of naval installations and stores ashore, and the CI precautions for all naval ships and craft in port. (See Chapter III).

c. Air Force Commanders. Air Force Commanders are responsible for the internal security of Air Force installations, and for air-travel security control.

5. ORGANIZATION. Army Commanders are responsible for concurrently:

a. Maintaining a CI organization to conduct tactical CI operations with their lower units during the advance into GERMANY.

b. Establishing progressively the organization for static CI coverage of areas conquered by their lower units in GERMANY. (See Chapter II).

6. MISSION. The CI mission of our forces within GERMANY is:

a. To provide maximum security for our military interests against espionage, sabotage and subversive activities. (See Chapter III).

b. To destroy the enemy secret intelligence services, all security or secret police and affiliated para-military organizations. (See Chapter V).

c. To assist by CI procedures in the dissolution of the NSDAP and its affiliates and in the prevention of their rebirth in any form. (See Chapter V).

d. To aid in the disposal of the German General Staff Corps, including equivalent Air Force and Naval officers. (See Chapter V).

e. To detain selected enemy scientists and industrial technologists. (See Chapter V).

7. BASIC PRINCIPLES.

a. The non-fraternization policy will be considered in all CI planning and operations.

b. The security of military interests will take priority over the welfare and convenience of the enemy civilian population.

c. Every effort will be made to contain within GERMANY all persons of CI interest.

d. No arrestee, identified as coming within the categories enumerated in Table "C", Chapter V, will be released from arrest without the specific approval of this or higher headquarters.

e. Evidence collected against all persons of CI interest and War Criminals, whether captured or not, will be collected and maintained in accordance with such procedures as will ensure the maximum value of such evidence upon its admission in court. (See Chapter VI).

f. Upon capture by any agency, all known and suspect spies, saboteurs and subverters, and all persons belonging to or associated in any manner with the enemy secret intelligence services, security or secret police and the prescribed members of para-military organizations, will be referred to CI for interrogation and investigation.

g. The burden of proof as to identity and innocence will be placed upon the accused when such matters are under CI investigation.

h. Concurrent with the military advance, positive action will be taken to gather documentary and other evidence against those persons of CI interest who have fled into enemy occupied territory or who, for other reasons, remain at large.

i. US Army Commanders whose forces advance into areas to be later occupied by British, Russian or French forces will, upon withdrawal therefrom, insure prompt delivery of all CI internees and arrestees and pertinent detailed CI records to the appropriate relieving authorities, as well as such other information which has an exclusive bearing upon such areas. This principle is likewise applicable in the event that an area occupied by one US Army is turned over to another US Army.

j. Prior to surrender by the enemy, the maximum CI emphasis will be placed upon military security. Other than to satisfy the immediate requirements of military security, the search for, arrest, detention, investigation, trial and execution of judgment concerning enemy intelligence agents and subversive individuals who do not constitute an immediate threat to security will be secondary to security. However, when conditions permit, positive action will be taken concurrent with the military advance to obtain documentary and other evidence against those persons of CI interest who remain at large.

8. INFORMATION AND INTELLIGENCE.

a. Information and Intelligence. To assist in the implementation of CI within GERMANY, Army/Military District commanders and commanders of lower echelons, where appropriate, have been, or will be supplied with information and intelligence to include the following:

(1) "BASIC HANDBOOK, GERMANY": Contains general description of historic, economic, political and administrative structures of the German nation.

(2) "GERMANY ZONE HANDBOOKS": Contain detailed information concerning specific areas in GERMANY and supplements information contained in the "BASIC HANDBOOK, GERMANY".

(3) "TARGET ADDRESSES, WEHRKREISE": Lists of the locations and also titles of certain place targets and officials of CI interest.

(4) Personality Cards (Black and White Lists): Contain information from MI 5, MI 6, MI 9, MI 14, PWE, OSS, captured documents, PW interrogations, field reports, Allied governmental and miscellaneous sources, regarding personalities of the enemy intelligence services; renegades of Allied nationality; officials of General Civil Administration; Police, including Feldgendarmerie; SS; party members or members of para-military organizations, and persons who may be helpful to the Allies or prove useful as informants.

(5) "CI HANDBOOK, GERMANY": A general guide to the main administrative and intelligence agencies of the Nazi state.

(6) "IDENTITY DOCUMENTS IN GERMANY": Contains information and examples of the categories of identity and other documents now carried by Germans, alien laborers and free aliens in the REICH.

(7) "Wanted" Lists: Details concerning individuals of CI interest who were previously unknown to CI and who continue to remain at large; to be distributed periodically by this headquarters.

(8) SCI Information.

(9) Summaries of CI information of general and special interest.

(10) Periodic CI Reports.

(11) Miscellaneous CI studies pertaining to the enemy intelligence services, security or secret police, para-military organizations and other organizations within or affiliated with the NSDAP, German General Staff, enemy scientists and industrial technologists.

b. Field Sources of Information and Intelligence. Appropriate commanders will collect additional CI information in the field through:

(1) The interrogation of arrestees.

(2) The study of captured documents.

(3) The interrogation of appropriate PWs.

(4) The reports of voluntary and paid informants.

(5) The interrogation of civilians (other than arrestees and informants).

(6) Use of undercover agents.

(7) Coordination with MG, PM, P & PW, Signal Corps and the personnel of other appropriate staff sections.

c. Essential Elements of Information.

(1) The German Intelligence Services, RSHA (Reichssicherheitshauptamt) and subordinate or affiliated agencies including:

(a) SD.
(b) Abwehr.
(c) GFP (Geheimefeldpolizei).
(d) Jagdverbaende.

Information on personalities, organizations, headquarters, methods of operation, location of sabotage dumps, training programs and schools, future operations in post-hostility period and cooperation or dissension between services.

(2) Military, Para-Military and Police Organizations including:

(a) Waffen SS (Schutzstaffeln).

(b) Allgemeine SS (Schutzstaffeln).

(c) SA (Sturmabteilung).

(d) NSKK (Nationalsozialistisches Kraftfahrer Korps).

(e) HJ and BDM (Hitler Jugend and Bund deutscher Maedels).

(f) NSFK (Nationalsozialistisches Fliegerkorps).

(g) Orpo (Ordnungspolizei), including Technische Nothilfe.

(h) Sipo (Sicherheitspolizei), including Kripo (Reichs-Kriminalpolizei), Gestapo (Geheime Staatspolizei) and Grenzpolizei.

Here the emphasis should be placed upon secret communication systems of the above organizations, definite knowledge of local personalities, names and addresses of leaders, names of outstanding members, as well as any recent changes in programs or organization. Priority on information concerning plans for postwar underground activity.

(3) Other Party Organizations including:

(a) NSF (Nationalsozialistische Frauenschaft).
(b) RAD (Reichsarbeitsdienst).
(c) DAF (Deutsche Arbeitsfront).
(d) NSV (Nationalsozialistische Volkswohlfahrt).
(e) VDA (Volksbund fuer das Deutschtum im Ausland).

Information on local personalities, with stress on fanatical members.

(4) Local Officials.

(a) Oberbuergermeister, Buergermeister or Landrat.
(b) Gauleiter and members of Gauleitung.
(c) Kreisleiter and members of Kreisleitung.
(d) Ortsgruppenleiter and members of Ortsgruppenleitung.
(e) Zellenleiter.
(f) Blockleiter.

Detailed information concerning activities, length of time in office, degree of fanaticism and location of offices.

(5) Anti-Nazi Personalities and Underground Movements.

(a) Information concerning names, addresses, background and activities of anti-Nazi individuals, with an estimate of their degree of hostility to the party and an evaluation of their basic patriotism and loyalty to GERMANY.

(b) Information concerning organized anti-Nazi resistance movements, their leaders, activities, symbols or insignia and the evaluation of the degree to which they may be of assistance to Allied Forces.

(6) Miscellaneous information concerning:

(a) Plans for escape of Nazi officials.

(b) Personalities involved in war crimes.

(c) Ordensburgen and Junkerschulen; location, training programs, known graduates and their present activities.

(d) Current attitude towards the war and postwar period on the part of German youth and German women.

(e) Volkssturm (Peoples Army); organization, plans, degree of training, evaluation of effectiveness during military operations, and its possible effectiveness after cessation of hostilities.

(f) Functions and capabilities of individual enemy scientists and industrial technologists as related to their future contributions to the recreation of GERMANY as a first class military power.

(g) Communications of subversive organizations.

9. RESOURCES. The following personnel, facilities and funds are or will be made available to G-2 for CI:

a. Allied CI Liaison Personnel. Personnel of Allied CI services attached to the G-2 Sections of this Headquarters, Army/Military District and certain other headquarters. Their function is to provide liaison between the headquarters to which they are attached and the security services of the nation which they represent. In addition, they perform important functions relating to the security screening of their own nationals in GERMANY. (See Chapter X).

b. CI Branch (CIB) Personnel. Assigned CI staff personnel of G-2 sections. Their functions, under the direction of the G-2 of the appropriate headquarters are to formulate CI policy and to supervise generally all CI operations and the activities of attached CI personnel.

c. CI Corps (CIC) Personnel. Personnel attached to the G-2 Sections of this Headquarters, Armies, Corps, Divisions, Military Districts and certain other headquarters. CIC personnel are trained to perform all general CI operations. (See Chapter VIII).

d. Intelligence Laboratory. Laboratory facilities are available at this headquarters for the scientific analysis of items believed to have an evidence value of CI interest. (See Chapter XI). This facility is available to Hq, 6th Army Group.

e. Machine Records Unit Facilities. The basic information contained in the SHAEF Personality Card Index held by this headquarters has been recorded on Machine Record Unit cards. Various rosters and other information can be reproduced expeditiously by this method of recording and will be supplied to appropriate headquarters, including those of 6th Army Group, upon request. (See Chapter VII).

f. Civil Censorship Facilities. These facilities will be made available to CI personnel to assist in the accomplishment of the CI mission. (See Chapter XII).

g. Combat and Service Troops. Commanding Generals of Armies, Corps, Divisions, Military Districts and certain other headquarters having attached CI elements will provide them with the requisite combat and service troops, equipped with transportation necessary to effect arrests and searches, escort arrestees, patrol and guard the frontier and the Prohibited Frontier Zone, guard arrestees and premises, and afford protection to CI personnel. In order that combat and service troops may perform their CI work with maximum efficiency, CI personnel will be required to train them in the techniques of their special duties; therefore, consideration should be given to the permanent detail of specific troops to assist in CI operations.

h. Confidential G-2 Funds. These funds have been allotted to this Headquarters, Armies, Corps and Divisions and will be allotted to Military Districts and certain other headquarters for confidential G-2 purposes.

i. Countersabotage Officers. This headquarters and each Army/Military District headquarters will have available a specially trained Engineer officer to recommend countersabotage protective measures and a specially trained CIC officer to supervise countersabotage investigations. (Chapter IV).

j. Document Center Facilities. Centers for the examination of captured documents and the preparation of reports relating thereto, including those of CI interest, will be established and operated under G-2 supervision by this headquarters and the headquarters of Armies/Military Districts. Frequently, by reason of their being the first troops to discover and identify documents, CI personnel will be able to render valuable assistance to Document Centers. CI personnel will report promptly to Document Centers, through G-2 channels, information pertaining

to the source, location, nature and volume of documents discovered. Small quantities of documents will be transmitted to Document Centers or placed for safekeeping in a local general repository; the location of large repositories of documents will be reported to the nearest tactical commander in order that he may take necessary action to preserve them.

k. Document Sections. Prior to the establishment of Document Centers, Document Sections at Army Group and Armies will assist in CI matters to the fullest possible extent.

l. Internment Camps. Internment Camps for the detention of CI arrestees will be established by Army/Military District Commanders. (See Chapter VI).

m. Interrogation Centers. Interrogation Centers having CI Annexes will be established at this headquarters and at each Army/Military District headquarters for the purpose of interrogating certain CI arrestees. The CI Annex of the Interrogation Center of this headquarters will be made available to Hq, 6th Army Group. (See Chapter VI).

n. Interrogation, Prisoners of War (IPW) Team Personnel. As the normal work of this personnel decreases, they will be assigned exclusively to assist CI personnel in the accomplishment of the CI mission. Prior thereto, they will assist in CI operations to the fullest possible extent.

o. Military Censorship Facilities. These facilities may be utilized by CI personnel in requesting examination of specific written or wire communications of military personnel. Periodic military censorship reports will be examined for indications of local and general matters of CI interest.

p. Military Intelligence Interpreter (MII) Team Personnel. As the normal work of this personnel decreases, they will be assigned exclusively to assist CI personnel in the accomplishment of the CI mission. Prior thereto, they will assist in CI operations to such extent as is possible.

q. Prohibited Frontier Zone. A Prohibited Frontier Zone, from which all unauthorized persons will be evacuated, is being established along the German frontier to assist in the implementation of frontier control. (See Chapter III).

r. Radio Direction-Finding Facilities. The services of mobile equipment and operators for the detection of clandestine radio transmitters are available through this headquarters. (See Chapter IX).

s. Security Committees. In order to achieve the maximum degree of cooperation, joint security committees of CI and MG Public Safety representatives, together with representatives of other interested agencies, may be formed in all

suitable areas to consider policy and action upon matters of common security interest.

t. Security Enforcement. The Provost Marshal is responsible for assisting MG in the enforcement of civil law and order, including security measures, through military police, MG Security Guards or other troops, where the civil police or other civil law enforcing agencies are not available. CI, MG and PM will insure that close cooperation and mutual assistance exist among them in the enforcement of security measures upon the civilian population.

u. Special CI (SCI) Personnel. Personnel attached to the G-2 Sections of this headquarters, Army/Military District headquarters and certain other headquarters. This personnel functions largely as advisers and as a means for conveying special information to CI branches on CI matters. (See Chapter IX).

v. Technical Assistance. When CI personnel require assistance of a technical nature, such as for the severing of communications and the clearing of mines or booby traps, qualified technical personnel from service units will be made available to them by appropriate commanders.

w. Teletype Network. This headquarters will provide, as soon as practicable, for CI teletype communications from this headquarters to the headquarters of Armies/Military Districts, and laterally between the headquarters of Armies/Military Districts. Commanders of Armies/Military Districts will provide for CI teletype communications within their command during the static phase as follows:

(1) At headquarters Army/Military District to subordinate headquarters of Military Sub-Districts and Internment Camps.

(2) Laterally between all headquarters of Military Sub-Districts and Internment Camps.

(3) Between Frontier Security Control Posts. (See Chapter III).

10. COORDINATION AND LIAISON. All CI personnel will coordinate matters of mutual interest and maintain liaison with:

a. CI elements of adjacent commands.
b. MG personnel, particularly Public Safety Officers.
c. G-1 personnel.
d. PM personnel, including MP and CID personnel.
e. JA personnel, including War Crimes Investigators.

f. "T" Force.
g. Civil Censorship personnel.

13.

HEADQUARTERS 12th ARMY GROUP
COUNTERINTELLIGENCE (CI) DIRECTIVE FOR GERMANY

CHAPTER II

CI ORGANIZATION

14. GENERAL. Army commanders are responsible for concurrently:

a. Maintaining a CI organization to conduct tactical CI operations with their lower units during the advance into GERMANY.

b. Establishing progressively the organization for the static CI coverage of areas conquered by their lower units in GERMANY.

15. PLANNING PRINCIPLES. The easterly advance of the Armies will gradually open territory in which the inherent problems of frontier security control, area security control, security control of major cities, and security control of the Rhine River crossings will require the immediate and continuous attention of CI personnel. In addition to these security problems, numerous targets of CI interest will be uncovered and will require exploitation over relatively long periods of time.

a. Experience has shown that CI coverage in a static area is effected most efficiently when the supervision of the area is continued under the control of the CI unit which instituted the original coverage.

b. The rapid easterly advance of the Armies, and the initial shortage of CI personnel, make it immediately necessary to prepare plans for the organization of static CI coverage, including the allocation of the present supply of CI personnel into areas and tasks where their efforts will render the most effective results.

16. ALLOCATION OF CI PERSONNEL. This headquarters will attach CI personnel to Armies/Military Districts in accordance with the various pertinent provisions of this directive. Army/Military District Commanders will allocate CI personnel to their lower commands and will provide for the augmentation of CI personnel from appropriate intelligence or other personnel sources under their control.

a. While Corps are tactically employed, Corps Commanders will be responsible for maintaining the CI support of their own operations, and, in accordance with Army instructions, will initially establish the static CI organization using the CI personnel allocated by Armies for that purpose.

b. While Divisions are tactically employed, Division Commanders will be responsible for maintaining the CI support of their own operations.

c. When Corps and Divisions are in static areas, Corps and Division Commanders will be responsible for the internal security control of their respective commands. However, Army/Military District commanders may make Corps and Division commanders responsible for CI coverage within a specific area or may withdraw CI personnel from Corps and Divisions.

17. ORGANIZATION FOR CI STATIC OPERATIONS.

a. Attached as Appendix I is a chart illustrating the currently planned organization for CI static operations.

b. A chart illustrating the organization of the CI Branch, G-2 Section of this headquarters is attached as Appendix II.

c. A chart illustrating the suggested organization of the CI Branch, G-2 Section of an Army/Military District, is attached as Appendix III.

d. The details pertaining to the organization of the CI Annex of an Army/Military District Interrogation Center are included in Chapter VI.

e. The details pertaining to the CI staff of an Army/Military District Internment Camp are included in Chapter VI.

f. The details pertaining to Frontier Security Control Posts are included in Chapter III.

g. Headquarters of CI Sub-Districts will be organized by Army/Military District commanders.

h. The CI organizations required for security control and other CI operations in urban and inter-urban areas will be organized, as necessary, to function under the supervision of the headquarters of the appropriate CI Sub-Districts.

SECURITY CONTROL

21. INTERNAL SECURITY CONTROL. All commanders will continue to be responsible at all times for the internal security of their commands in GERMANY.

a. All personnel will be thoroughly instructed in the fundamentals of individual security discipline, and the non-fraternization policy will be enforced strictly.

b. Adequate patrols, guards, sentries, physical barriers, countersigns and countersabotage measures are essential aids to internal security control and will be employed to the fullest extent.

c. All measures necessary for the safeguarding of classified material will be implemented and continually checked for effectiveness.

d. Civilians will not be transported in military vehicles, except when expressly authorized in writing by appropriate military authorities. (See letter, this headquarters, file 230 (PM), dated 5 November 1944, subject: "Carrying civilians in military transportation".)

e. Enemy, ex-enemy and co-belligerent nationals may be employed by our forces for menial tasks or for work directly concerned with enemy civilian welfare or similar activities. They will not be employed in any case unless all efforts have failed to procure the necessary personnel from (1) US and Allied military resources, (2) nationals of liberated territories, or (3) non-Germans in GERMANY. They will not be employed under conditions which would foster fraternization or give them access to classified information or vital parts of the military establishment.

f. (1) Displaced persons, who are not enemy, ex-enemy or co-belligerent nationals, may be employed by Allied military units and agencies after due consideration of security requirements. The employing unit or agency is responsible that CI clearance is obtained in doubtful cases.

(2) CI clearance initially will be provisional only. It will be based upon a personal interview with the prospective employee and a name check against available records. Final clearance will be made by MG in conjunction with CI. Prior to final clearance,

employment will be provisional only. Upon provisional employment, the employee will be required by his prospective employer to fill out the required Fragebogen which will be sent to MG for evaluation. This evaluation will be made by MG in accordance with Section VI of the Public Safety Manual of Procedures. CI investigative agencies and data will be available to MG to assist in the final clearing of the provisional employee.

g. Countersabotage measures will be established and maintained. (See Chapter IV).

22. CIVIL SECURITY CONTROL. The security control of the civilian population in occupied GERMANY is a command responsibility which is exercised normally through MG, in close consultation with CI. In general, all civilian control regulations are published by MG in the form of proclamations, laws, ordinances, notices and other enactments and are rigidly enforced by MG Detachments through their supervision of the German police and other resources available to them. The closest working relationships will be maintained by MG Detachments and CI staffs and personnel. Wherever practicable, MG Detachments will serve as the channel for dealing with agencies of the public and will insure, in particular, that requisite police assistance is given to CI personnel. However, in emergencies and on routine matters, CI personnel will deal directly with appropriate police agencies. To coordinate security matters, joint security committees may be established, consisting of representatives of all agencies concerned with the security control of the civil population. The following information, policies and instructions are of particular interest to CI:

a. Security Control Regulations.

(1) Blackout. Blackout will be observed as directed by the responsible military commander.

(2) Curfew. A curfew will be imposed on all civilians as directed by the appropriate military commander. When essential, exemptions from curfew may be granted by MG to certain classes of persons.

(3) Travel Restrictions. Where travel restrictions are necessary, MG will establish check systems at road barriers, bridges, railway stations and docks.

a. Initially, civilians will be prohibited from travelling more than six kilometers from their homes, except by virtue of a MG pass.

b. Travel by motor vehicles or train will be permitted only by MG pass.

c. Civilian motor transport will be used only in the interests of our forces.

d. Civilians will not be transported in military vehicles except when expressly authorized in writing by appropriate military authorities. (See letter, this headquarters, file 230 (PM), dated 5 November 1944, subject: "Carrying civilians in military transportation".)

e. MG may authorize German transport agencies to issue permits for their own circulation within a fifty mile radius of a given point. However, circulation beyond that distance will require specific MG approval.

(4) Documents.

a. Identity Cards. All civilians twelve years of age and older will be required by MG to carry identity cards at all times. Any recognized document such as a Kennkarte, Wehrpass, Mitgliedsbuch, Arbeitsbuch or MG Form DP/1 identity card will be satisfactory, initially, as valid identification. At some later date, new identity documents containing photographs, fingerprints, registration numbers and other identifying data may become necessary, in which case a standard form and procedure will be prescribed by this headquarters.

b. Passes, Permits and Exemptions. MG will be responsible for the preparation and issuance of passes, permits and exemptions pertaining to security restrictions. CI, in consultation with MG, will be responsible for determining the applicable policy and will work in close coordination with MG in the implementation of such policy. Exemptions from security restrictions will be held to the minimum.

1. CI personnel will be supplied by MG with forms for the issuance of passes and permits in special cases only. Normally, MG will issue passes, permits and exemptions for CI purposes.

2. Particular precautions will be taken by MG to insure that there is strict accountability for all exemption forms, passes and official stamps.

[redacted]

3. Exemption forms will be numbered.

c. Forgeries. MG will report to CI all forgeries of CI interest, including forgeries of identity cards, permits and passes.

(5) Political Activity and Meetings.

a. Political Activity. Political activity of any kind will be prohibited by MG.

b. Public Meetings. Gatherings of more than five persons for purposes of discussion, either public or private (except those of an immediate family or when authorized by MG) will be prohibited by MG.

c. Religious Meetings. Bonafide religious services should not be curtailed. However, religious authorities will furnish MG due notice of the time and place of all proposed religious services in order that such services may be observed by MG or CI personnel.

(6) Prohibited Articles.

a. Cameras. Civilians will not be permitted to use cameras or photographic material.

b. Firearms and other Lethal Weapons. All firearms, ammunition, explosives and other lethal weapons will be collected and securely impounded by MG. Firearms and limited supplies of ammunition may be reissued to police by MG after clearance by CI.

c. Pigeons. Pigeon flights will be prohibited by MG. Public notice thereof will be given by MG and the pigeons will be confiscated or collected by MG. The birds, if not desired by the Signal Corps, will either be killed or have their wings clipped.

d. Radio Transmitters. MG will prohibit possession of and will collect all radio transmitters and actual or possible radio communication devices, regardless of power or type, or will require that such transmitters and devices be placed under the control of US Army authorities.

[redacted]

c. Uniform. Civilians will not be permitted to wear US uniforms or any part thereof. (See letter, this headquarters, file 421 (G-2), dated 10 November 44, subject: Unauthorized Wearing of United States Uniform.)

(7) Security Control Check Points and Security Control Raids.

a. Security Control Check Points. CI, in conjunction with MG and PM, will establish check points, where appropriate, for the "snap" security checking of civilians.

b. Security Control Raids. CI, in conjunction with MG and PM, will conduct unannounced periodic raids in civil communities for the purpose of checking the effectiveness of the enforcement of security regulations.

(8) Violations of Security Control Regulations. Violations of security control regulations will not be overlooked under any circumstances. Suitable publicity will be given to the punishment of offenders. MG will inform CI of any serious, extensive violations or of evidence of organized activity detrimental to security.

b. Wehrmacht, Volkssturm and Todt Personnel.

(1) Wehrmacht Personnel.

a. Former Members of the Wehrmacht. All persons who served in the Wehrmacht at any time will be required by MG order to register themselves with MG. In addition to personal details, this registration should include dates of service, branch of service, highest rank attained and date of and reason for the last discharge.

1. Wehrmacht personnel discharged by the Germans prior to the cessation of hostilities should have a Wehrpass giving details of their service.

2. Members of the Wehrmacht discharged by the Allied authorities subsequent to the cessation of hostilities will not have a Wehrpass in their possession but should have a discharge certificate.

b. Discharged Wehrmacht Personnel. Discharged Wehrmacht personnel are to be treated as civilians and, as such, are not entitled to PW status.

c. Deserters in Civilian Clothing.

1. Any person in civilian clothing who is determined to be a Wehrmacht deserter will be treated as a PW.

According to the circumstances of the capture of the deserter, the nature of the military identification carried by him and whether such identification was carried openly or hidden on the person, and the prisoner's statement under interrogation will accompany all German soldiers evacuated in civilian clothing. This report may be written on the reverse side of the Arrest Form which must accompany all persons evacuated in civilian clothing through PW channels.

(2) Volkssturm. Captured members of the Volkssturm will be treated as lawful belligerents and given a PW status, provided that:

a. They were commanded by a person responsible for his subordinates.

b. They wear the prescribed armlet bearing the German emblem and the words "Deutscher Volkssturm".

c. They carry arms openly.

d. They conduct their operations in accordance with laws and usages of war.

(3) Todt Workers. Foreign workers in the OT will be treated as displaced persons; German OT workers as refugees and will be screened as such. The officers and uniformed guards thereof will be disarmed by combat troops and placed in concentration areas pending disbandment. There is no CI arrest category in OT. The static organization is not of CI interest and its headquarters are not CI targets. It will be dissolved, disarmed and disbanded locally by MG.

c. Allied Military and United Nations Personnel.

(1) Allied PWs. When not detained as security suspects, persons of Allied nationality who claim to have been PWs and are encountered outside PW camps, will be referred to MG to be cared for, initially, as United Nations displaced persons.

(2) Escapers and Evaders. When not detained as security suspects, persons who claim to be members of the Allied Military forces who have escaped or evaded capture by the enemy and are encountered in the course of military operations will be referred to MG to be treated initially as United Nations displaced persons

(3) United Nations Nationals Demobilized From the German Armed Forces. Such individuals when not detained as security suspects will be referred to MG for disposition.

(4) United Nations Nationals Who Are Members of the German Armed Forces and Captured While in Uniform. Those not detained as security suspects will be treated as PWs.

d. Concentration Camps, Political Prisoners and Internees.

(1) Concentration Camps. Army/Military District Commanders, upon the occupation of an area, will insure that all places of detention, including concentration camps, are promptly seized and investigated and that the cases of the inmates are reviewed with the least practicable delay.

a. All concentration camp guards and staffs will be arrested and detained by MG.

b. Each concentration camp will be provided with an MG Administrative Staff which will include such CI representation as may be necessary under the circumstances.

c. Each concentration camp will establish a Case Review Board which will include CI representation, to review the cases of inmates and make specific recommendations as to their disposal.

(2) Political Prisoners. CI personnel will assist MG in dealing with security suspects uncovered by MG examination of persons held in detention as political prisoners by the Germans.

(3) Allied Civilian Internees. When not detained as security suspects, US and British civilians who claim to have been civilian internees and are encountered outside Internment Camps, will be referred to MG to be cared for, initially, as United Nations displaced persons.

e. Displaced Persons and Miscellaneous Personnel.

(1) Displaced Persons. Displaced persons are those civilians who, by reason of war, are outside the national boundaries of their country and are (1) desirous, but unable, to return home or find homes, or (2) are to be returned to enemy, ex-enemy or co-belligerent territory.

a. The care and repatriation of United Nations displaced persons is a MG responsibility. Displaced persons in this category will be restrained in place until such time as facilities are available to transport these persons, in sealed trains or trucks, to Reception Centers outside GERMANY where appropriate national authorities will arrange for the care, fooding and repatriation of their respective subjects. These national authorities will be responsible for the CI screening of such persons in order to insure that none of the persons categorized in Table C, Chapter V, have escaped through displaced persons channels. In addition, they are responsible for making security checks of all displaced persons of the United Nations.

b. The control and repatriation of enemy, ex-enemy and co-belligerent displaced persons will be a responsibility of the German authorities, acting under MG supervision.

c. MG will have available Allied Liaison Officers for Repatriation to assist in the processing of the displaced persons of their nations. Their specific duties include:

1. Issuing repatriation visas.

2. Assisting MG in the verification of identity and registration of their nationals.

3. Assisting military authorities and appropriate Allied CI liaison personnel in making security checks of their nationals.

d. MG and CI personnel are jointly responsible for insuring that none of the persons categorized in Table C, Chapter V, escape from GERMANY through displaced persons channels.

e. The security check of displaced persons by CI personnel, assisted by appropriate Allied CI liaison personnel, at Displaced Persons Assembly Centers, will consist of:

1. Identifying the individual, with the aid of the Allied Liaison Officer for Repatriation concerned.

2. Checking the name of the individual against available CI records.

3. Conducting such additional investigation as is practicable and necessary.

f. Displaced persons found travelling without authority will be interrogated by CI personnel and, if not detained as security suspects, will be referred to MG for disposition.

g. Processing centers for displaced persons will maintain rosters of persons received therein and checks will be made to insure that all persons received in the camp are present. Names of missing persons will be reported to CI in order that prompt search for such persons may be instituted.

h. United Nations displaced persons, while awaiting repatriation, if approved by the appropriate Allied Liaison Officer for Repatriation, will be given the opportunity to join the armed forces of their country or engage in approved civilian work.

i. In order to prevent the infiltration and escape of "wanted" persons, as well as the smuggling of documents, funds, and goods, MG will insure that:

1. Only displaced persons who have been thoroughly searched and security checked are loaded into trains, trucks or other vehicles for movement out of GERMANY.

2. The transporting of displaced persons from the loading point to and across the German frontier is accomplished in "sealed" and guarded trains or convoys.

(2) Expatriates. When not detained as security suspects, persons who claim to be United Nations expatriates, i.e., United Nations nationals permanently residing in but not nationals of GERMANY, will be referred to MG for disposition.

(3) Stateless Persons. When not detained as security suspects, stateless persons, including stateless persons of German origin, will be referred to MG for disposition. Such persons will be handled under the same procedure as those for the processing of United Nations displaced persons.

(4) Neutrals. When not detained as security suspects, neutral displaced persons will be referred to MG for disposition and will be accorded the same assistance granted to United Nations displaced persons.

(5) Enemy, Ex-enemy and Co-belligerent Nationals. Enemy, ex-enemy and co-belligerent nationals will be identified and registered by MG. Those whose freedom of movement might endanger the security of our forces, or who are otherwise undesirable, will be interned by CI or their activities will be curtailed to the extent necessary under the circumstances.

(6) Enemy Diplomatic and Consular Officials. Enemy diplomatic and consular officials of countries at war with any of the United Nations will be dealt with in accordance with instructions to be issued.

f. Enemy Civilian Labor and Employees.

(1) Civilian Labor. MG will prohibit and suppress strikes and lockouts which threaten security.

(2) Civilian Employees.

a. MG will consult with CI when doubt exists as to the political tendencies of an official or employee directly or indirectly supervised by MG.

b. Civilian employees of the Army will be granted no special privileges not necessitated by their official duties.

g. Civil Communications.

(1) Under the provisions of MG Law No. 76 (Amended) entitled, "Posts, Telephones, Telegraphs and Radio", all telephone and telegraph and radio services (inland, foreign, and transit) and all internal, external, and transit mail services are suspended in GERMANY. The reopening of such suspended communications is a command function and will be conducted strictly in

accordance with procedure outlined in paragraph 5 of Circular No. 2, this headquarters, dated 15 January 1945. subject: "Civil Censorship in GERMANY."

(2) All active Nazis and ardent Nazi sympathizers will be removed from the Reichspost by MG, assisted by CI. Other Reichspost employees may be required to remain at their positions until otherwise ordered by MG. MG will inform Reichspost officials that they will be held responsible for taking all precautions to prevent the sabotage of communications and any interference with the carrying out of MG instructions covering the operation of communications facilities.

(3) MG will arrange for the impounding and protection of all mail found to be in course of circulation and will inform G-2 (Censorship) of the measures taken. Such mail will be disposed of pursuant to censorship instructions. However, CI personnel will be permitted to examine such of the mail as may be of immediate CI interest.

(4) MG will arrange for the guarding and protection of post offices, telephone exchanges, repeater stations, and other premises vital to communications.

h. Propaganda and Information Services.

(1) Propaganda. Propagation of enemy doctrines in any form will be prohibited by MG.

(2) Public Information Services. MG will prohibit unauthorized German operation of press services, radio stations, printing facilities, public entertainment facilities, and other facilities for the dissemination of news and information. Operation of such public information services by civilians will not be permitted without the approval of this headquarters.

i. Countersabotage.

(1) MG will direct that officials of all German agencies insure the countersabotage protection of all facilities directly or indirectly under civil control. MG will notify appropriate German authorities, officials and employees that they are held responsible for the safeguarding of structures, installations, equipment, stores, fuels and facilities and for the preservation of documents, information and records. MG will be responsible for arranging

for the guarding of all civilian premises vital to our military interests. Incidents which, after preliminary investigation by MG appear to involve sabotage, will be referred to CI by MG.

23. FRONTIER SECURITY CONTROL. Frontier security control will be established and GERMANY will be "sealed off".

a. Frontier security control is a command responsibility to be exercised by the Army or Military District commander in whose zone of operations any part of the borders of GERMANY, as of 1937, is located.

b. The "sealing off" of GERMANY by the imposition of rigid frontier control measures is required in order to:

(1) Assist in the detection and the prevention of the movements of personnel, communications and funds of the German intelligence services, secret police and para-military organizations and of any underground subversive organization out of occupied GERMANY.

(2) Prevent the escape of Black List and categorized individuals enumerated in Table C, Chapter V, War Criminals and other "wanted" persons.

(3) Assist in the control of displaced persons.

(4) Prevent all unauthorized movements into and out of GERMANY of persons, communications including documents of all kinds, funds and property, particularly those funds and properties illegally acquired.

c. Military Government Law No. 161 has been revised to prohibit movement into the "Prohibited Frontier Zone" as well as the unauthorized movement of persons, goods and property over the frontier of GERMANY. This law will be published to the German people by MG, and the appropriate German authorities will be instructed by MG to enforce this prohibition. The following persons only will be authorized to cross the German frontier:

(1) Persons who are in possession of valid US, British or Allied Military Identity Documents and appropriate travel orders.

(2) Persons having in their possession a properly executed AEF Permit issued by SHAEF authority and a valid national passport.

(3) Displaced persons identified as moving for repatriation, under the auspices, responsibility, and supervision of MG.

(4) Frontaliers travelling pursuant to the provision of subparagraph m, below.

(5) War Correspondents holding War Correspondents' licenses issued by US, British or other Allied Service Departments and who are accredited to SHAEF.

d. To assist in the implementation of frontier security control, responsible commanders will establish a "Prohibited Frontier Zone", paralleling and adjacent to the German frontier and extending approximately five kilometers into German territory. The commander responsible for an area will fix the exact zone and is authorized to vary the inner line thereof to conform to natural barriers or to avoid the evacuation of large centers of population, such as AACHEN.

(1) All persons, except those expressly authorized to remain therein, who are not members of the Allied armed forces, civilian agencies and employees attached thereto, will be evacuated immediately from the Prohibited Frontier Zone into GERMANY.

(2) After the Prohibited Frontier Zone has been evacuated, all unauthorized movement into it will be prohibited. Only those persons authorized to cross the German frontier will be permitted to enter the Prohibited Frontier Zone and then only on the routes specifically designated for such travel.

(3) The specific travel routes for use by individuals authorized to cross the Prohibited Frontier Zone and the German frontier will be announced by the responsible military commanders. Railways will normally remain open; however, appropriate commanders will select the minimum number of highways required for civilian travel only through the Prohibited Frontier Zone and will publicize them as "authorized civilian travel routes". All roads and footpaths, not specifically designated as military "main supply routes" or as "authorized civilian travel routes" will, at the inner and outer boundaries of the Prohibited Frontier Zone, have erected thereon physical barriers constructed so as to prevent ingress without force, by vehicles or persons travelling on the road or pathway. In addition, such barriers will be posted with notices prohibiting movement into the Prohibited Frontier Zone and specifying the nearest route for authorized civilian travel through the Prohibited Frontier Zone.

(4) MG will make appropriate public notification of the Prohibited Frontier Zone instructions and will widely publicize the punishments of violators as announced by MG courts.

(5) All persons who act, or conspire to act, in violation of Prohibited Frontier Zone instructions will be apprehended and placed under immediate arrest. Such persons will be escorted to the nearest Frontier Security Control Post for interrogation and investigation.

(6) Unauthorized persons who, without intent to violate Prohibited Frontier Zone instructions, seek permission from Prohibited Frontier Zone guards to cross the Prohibited Frontier Zone on the routes specifically designated for travel, will be denied permission and will be referred to the nearest MG agency responsible for displaced persons and refugees. Notices in all appropriate languages will be prominently displayed at the entrances to the Prohibited Frontier Zone on the military main supply routes and the authorized civilian travel routes to inform all concerned of the location of the nearest MG establishment responsible for displaced persons and refugees.

e. The Communications Zone is making available to this headquarters and to Hq, 6th Army Group a limited number of CIC teams, type B-3, which will be placed under the operational control of Army Group headquarters initially. This personnel will man the several Frontier Security Control Posts in the Prohibited Frontier Zone.

f. Army commanders will provide the troops, equipped with necessary transportation and radio communications, for Frontier and Prohibited Frontier Zone guards, patrols and escorts. CIC personnel will not be employed as guards and patrols but may be used as escorts under unusual circumstances involving special cases of CI interest. Whenever practicable, aerial reconnaissance patrols of the Prohibited Frontier Zone will be established. The aircraft so employed should have direct communication with ground patrol personnel in order to facilitate the capture of persons making "cross-country" traverses of the prohibited Frontier Zone.

g. SHAEF has retained responsibility for negotiating the broad policy agreements necessary for frontier control purposes between liberated and neutral nations and the Allied armed forces. However, the responsible Army/Military District Commander will consult with the local frontier guard representatives of the nation concerned regarding any possible local assistance and local frontier control operational procedures and responsibilities.

h. Existing German frontier control authorities and personnel will be discharged by MG in consultation with CI at the earliest opportunity. At a later time, personnel of the purged and reorganized German frontier control organizations may be allowed to operate under strict CI supervision and control.

i. The responsible Army/Military District commander will provide:

(1) Teletype and telephone facilities for communication between the Chief, CIB, at Army/Military District Headquarters and the Frontier Security Control Posts and between all Frontier Security Control Posts in his area.

(2) Radio facilities for communication between Frontier Security Control Posts and Frontier Security Control Patrols.

(3) Telephone facilities for communication between Frontier Security Control Posts and all fixed Frontier Security Control Guard Posts.

j. Frontier Security Control Posts are established within the Prohibited Frontier Zone on each route authorized for travel through the Zone. The function of the CI personnel operating the Frontier Security Control Posts will be to:

(1) Identify and examine the credentials of those travellers who are escorted to the Post by border patrol troops.

(2) Detain, interrogate, investigate and render appropriate reports upon apprehended violators of the Prohibited Frontier Zone instructions. A check of the Black List will be made as part of the preliminary investigation of all violators apprehended.

(3) Insure delivery to the appropriate Internment Camp or Interrogation Center of those arrestees who are considered to be security suspects, together with Arrest Reports giving full details concerning the arrestees.

(4) Insure that those violators of Prohibited Frontier Zone instructions who are not detained as security suspects are escorted to MG. A full report concerning the capture of each violator will accompany the violator.

(5) Conduct searches and examinations of persons and effects as deemed necessary. Particular attention will be given to luggage which might contain radio transmitters, sabotage devices, etc.

(6) Insure that persons crossing the frontiers of GERMANY are not carrying unauthorized communications.

(7) Make daily inspections to determine the effectiveness of the implementation of frontier security control measures and, when necessary, make recommendations to appropriate authorities for the improvement thereof.

(8) Effect security checks of railroad crews and passengers on international trips.

(9) Maintain close working liaison and coordination at their level with adjacent Frontier Security Control Posts, the frontier control personnel of the bordering nation and with MG Border Control Stations or other MG agencies.

k. Unauthorized persons who attempt to enter GERMANY will be handed over to the frontier control authorities of the country from which they enter unless they are wanted by the Allied occupational authorities.

l. MG will establish Border Control Stations upon the frontier of GERMANY in order to process displaced persons arriving thereat.

m. Agreements and the issuance of permits pertaining to frontaliers will be an MG responsibility for handling locally in consultation with CI when conditions are stablized. However, frontaliers will not be granted access to the Prohibited Frontier Zone except to pass through on the civilian travel routes specifically authorized for such travel. A standardized travel permit form for issuance to frontaliers will be provided by this headquarters when received from higher headquarters.

24. PORT SECURITY CONTROL.

a. Port security control is a responsibility of the US Port Enclave Commander. It will embody all appropriate internal, civil, frontier and travel security control policies and measures contained in this directive.

b. To assist in the implementation of port security control, several CIC port teams will be made available to the Port Enclave Commander from the CIC Occupation Detachment. The Port Enclave Commander will provide CIC Port teams with the water transportation necessary to accomplish their duties.

c. (1) The staff of the Port Enclave Commander will include a CI staff element (CIB, G-2) to which will be attached appropriate CI operating personnel such as CIC and SCI.

(2) The Chief, CIB, G-2 Section of the Port Enclave will, in addition to his normal duties, act as advisor on CI matters to Naval and other authorities in the Port Enclave.

d. The specific duties of the Officer in Charge of each CIC Port Team will include the following:

(1) Implement directives and instructions relating to travel control received from the Port Commander.

(2) Conduct security surveys within the Port area and recommend to the Port Commander those measures designed to insure the security of merchant ships and installations ashore. (Each Port Commander is responsible that masters of merchant vessels conform to security regulations of the port and mount adequate sentries and guards.

(3) Plan and supervise the control of entry to, and exit from, the dock areas from the landward side and from ship to shore. (Initially, and for a considerable period thereafter, shore leave for merchant vessel personnel will be prohibited; if such shore leave is permitted, it will be controlled and regulated by the Port Commander and passes will be issued by CIC Port Teams.)

(4) Establish and supervise the necessary security check and control of civilian labor and personnel, and persons with business in the port, to whom passes are issued for entry into the dock areas.

(5) Board and search any vessel or craft, (other than Allied Naval vessels) when deemed desirable for travel control or other CI purposes. Register all fishing vessels and harbor craft and screen their crews before they are permitted to operate in or out of the Port Enclave.

(6) Within the port area, establish and coordinate measures to prevent illicit communications between sea and shore, and illegal entry or exit along the coastline. Measures ashore relating to the security of the coastline will be coordinated with any security measures established by appropriate naval authorities.

25. TRAVEL SECURITY CONTROL.

a. Travel security control responsibilities for the issuance of travel permits (other than for permits issued to frontaliers) for travel over the German

frontier and for negotiating broad policy agreements with the authorities of liberated and neutral countries contiguous to GERMANY with reference to travel control have been retained by SHAEF. However, this headquarters (Chief, CIB, G-2) will authorize the travel of civilians leaving GERMANY for intelligence or CI reasons, under the waybill procedure.

b. Air-travel. Appropriate Air Force commanders are responsible for effecting rigid air-travel security control at all airfields used for flights into and out of GERMANY.

26. INTER-ZONAL BOUNDARY CONTROL. At the present time, it is not contemplated that any fixed security control of movement be established between national occupational zones in GERMANY.

27.

28.

HEADQUARTERS 12TH ARMY GROUP
COUNTERINTELLIGENCE (CI) DIRECTIVE FOR GERMANY

CHAPTER IV

COUNTERSABOTAGE

29. GENERAL. The countersabotage protection of our materiel and installations, including civilian facilities vital to the interests of our forces, is a command responsibility.

30. PERSONNEL AND FUNCTIONS. This headquarters and the headquarters of each Army/Military District will have countersabotage officers and personnel available as follows:

a. The Engineer Section of this and Army/Military District headquarters will have available an engineer officer specially trained in countersabotage preventive techniques. This officer, upon request, will conduct surveys and inspections of vital facilities and installations and will recommend protective measures therefor.

b. The CI Branch, G-2 Section of this headquarters has organized a CIC Countersabotage Section. The functions of this section are contained in G-2 letter, this headquarters, dated 6 February 1945, subject: "CIC Countersabotage Section."

c. The CI Branch, G-2 Section of each Army/Military District headquarters has available a CIC officer specially trained in countersabotage. This officer will supervise the investigation of sabotage cases.

d. All CIC personnel are qualified and will be made available, as necessary, to conduct countersabotage security surveys and investigations in conjunction with the engineer officers and CIC officers mentioned in paragraphs a and c above.

31. INVESTIGATIONS. All cases of suspected sabotage will be reported immediately, through G-2 channels, to appropriate CI staffs. The investigation of such cases will be undertaken by CI personnel. If it becomes apparent that an offense under the Articles of War by Allied military personnel may be involved, PM (Criminal Investigation Detachment) will be informed.

a. Information from special sources regarding sabotage activities of enemy agents will be made available to CI staffs by SCI personnel. This personnel will also advise CI staffs on the action to be taken with respect to such agents.

b. Any arrestee known or suspected to be a saboteur will be processed as an enemy agent.

32. DISPOSAL OF SABOTAGE EQUIPMENT. The responsibility for the neutralization or removal of enemy sabotage devices or equipment rests with the engineers or with the ordnance bomb disposal squads. In an emergency, CI personnel may deal with such devices or equipment, but, whenever practicable, they should await the assistance of engineers or an ordnance bomb disposal squad. After sabotage devices and equipment are rendered harmless by the engineers or ordnance bomb disposal personnel, they will be handed over to CI personnel for disposition as instructed by CI staffs. New types of sabotage devices and equipment will be delivered, as soon as practicable, to the Chief, CIB, G-2 Section, this headquarters.

33. JOINT COUNTERSABOTAGE COMMITTEES. Joint countersabotage committees, which should include appropriate representation from G-2 (CI), G-3, Engineer, Ordnance and Signal Corps sections, may be established by commanders of major units in order to consider and solve countersabotage problems which will exist in GERMANY.

34.

35.

36.

HEADQUARTERS 12TH ARMY GROUP
COUNTERINTELLIGENCE (CI) DIRECTIVE FOR GERMANY

CHAPTER V

EXTIRPATION OF NAZISM AND GERMAN MILITARISM

37. GENERAL. The dissolution of the NSDAP and the eradication of Nazism as well as the corollary destruction of German militarism, are declared war aims of the United Nations. The German armed forces, the German National Socialist Workers Party (NSDAP) and its affiliates, and the German government, including the war production and civil administrations, are motivated by the Nazi moral, political and economic concepts. Therefore, the measures required to effect the extirpation of Nazism and German militarism (see Tables A, B, C, D and E attached hereto) will include:

a. The abolishment of the NSDAP and its subsidiary non-military political organizations.

b. The disarmament, demobilization and disbandment of the armed forces and all Nazi military and para-military organizations.

c. The purging, reorganization and control of the German police.

d. The dismissal of all active Nazis and ardent sympathizers of the party and of all militarists and leading military figures from government offices and other positions of influence and trust.

e. The dismantling of super-centralized and typically Nazi agencies of government and of agencies for war mobilization and production.

38. MG LAW NO. 5. MG Law No. 5, entitled, "DISSOLUTION OF NAZI PARTY", is the instrument which declares the illegality, prohibits the activities, and orders the dissolution of NSDAP and all offices, organizations and institutions enumerated by the law. (See Table A hereto). This law will be publicized by MG.

39. RESPONSIBILITIES. The enforcement of the provisions of MG Law No. 5 is a command responsibility to be conducted pursuant to these and other appropriate instructions. The operations necessary to accomplish the dissolution of the Nazi Party and its affiliates and the eradication of Nazism and the agencies particularly concerned therewith, are as follows:

a. The dissolution of the NSDAP and its subsidiary organizations is a primary responsibility of CI, assisted by MG.

b. The disarmament, demobilization and disbandment of Nazi military and para-military mobilized bodies is a responsibility of all commanders, advised and assisted by MG and CI.

c. The purge of the police and the removal of Nazis from the civil administration of GERMANY is a primary responsibility of MG, assisted by CI.

d. MG, assisted by CI, will be primarily responsible for ensuring that all persons placed in civil administrative posts and other positions of influence and authority are neither active Nazis nor ardent Nazi sympathizers.

e. The reorganization of all types of administrative agencies necessary for government is a primary responsibility of MG.

f. CI will be primarily responsible for ensuring that those Nazis who might be dangerous to military security are interned or kept under surveillance.

40. PERSONS TO BE DISMISSED OR SUSPENDED FROM OFFICE. All political office holders and civil servants, as enumerated categorically in Table B hereto, will be dismissed or suspended from office by MG. Table D hereto enumerates those positions, the holders of which will be denied service with MG if held at any time. Table E hereto enumerates those quasi-governmental positions from which the principal officers should be removed. Those persons of the categories listed in Tables B, D and E, who are also categorized in Table C hereto, will, if encountered by MG, be arrested by MG and referred to CI for disposal.

41. ARREST CATEGORIES. All persons who are identified to be, or to have been, in the prescribed categories enumerated in Table C hereto, will be arrested and interned by CI.

42. GERMAN POLICE AND PARA-MILITARY ORGANIZATIONS. As soon as the military situation permits, the command hierarchy of the German police will be abolished, and chief officers of regional and local police units will be made responsible to civil administration officials at regional and local levels. Under MG control, the police will be responsible for maintaining civilian law and order. Nazi officials, methods and influences will be eradicated from the German police and operations inimical to the interests of the United Nations will be prevented. Undesirable police personnel will be discharged and, where necessary, interned. All military training and military practices will be discontinued, and the police will be disarmed of all weapons, except that sidearms and carbines may be reissued, where necessary, due to exceptional circumstances. The ammunition per weapon will be strictly limited. With the exception of the Criminal Police, all elements of the Security Police, including the Gestapo and the Sicherheitsdienst der SS, will be dissolved. All offices combining control

of both the police and SS, or police and the SD, or completing a chain of command from the national to the local level will be abolished. Armlets and warrant cards will be furnished to approved German police by MG.

a. Security Police and Security Service of the SS (SIPO and SD). CI will seize the headquarters, records and documents of the Sicherheitspolizei and the Sicherheitsdienst of the SS and will arrest and dispose of all members thereof.

b. The Secret State Police (GESTAPO). CI will seize the headquarters, records and documents of the Gestapo and will arrest and dispose of all members thereof.

c. The Technical Emergency Service (TENO). The Technische Nothilfe embraces units of highly skilled civilian engineers used for demolitions and repairs to public utilities damaged in air raids. They are likely to be encountered in mobilized units. They hold stocks of explosives and, unless controlled, are dangerous as potential saboteurs. MG will be responsible for disarming them and for seizing stocks of explosives.

d. The Criminal Police (KRIPO). MG will seize the headquarters and records of the Kripo, and CI will arrest and dispose of those Kripo members who are prescribed in the arrest categories (Table C). After the Kripo has been purged by MG in consultation with CI, it will continue to function as part of the local police administration, but not under control of the Central BERLIN Office.

e. The Barracks Police (Kasernierte Polizei). The Barracks Police, a special branch of the Schupo originally formed to quell strikes and riots, have been used extensively against the resistance forces of the occupied countries. They are not specifically of CI interest but are likely to contain a high percentage of War Criminals.

f. The Mobile Police (Motorisierte Gendarmerie). The motorized units of the Gendarmerie are likely to be found as mobilized armed units. They are not specifically of CI interest.

g. The Order Police (ORPO). In order to provide a police element for the maintenance of law and order, the Ordnungspolizei, which includes the Schupo (the municipal police), the Gendarmerie, Fire, PAD and all other uniformed police services will be disarmed, purged, reorganized and controlled by MG in consultation with CI. MG will seize the headquarters and records of the Orpo, and CI will arrest and dispose of those Orpo members who are prescribed in the arrest categories (Table C).

h. Waffen SS. All commanders responsible for disarmament and control of enemy forces will give highest priority to and take extraordinary

precautions in the primary disarmament and control of the Waffen SS. After primary disarmament, all Waffen SS officers and non-commissioned officers of the rank of Scharfuehrer and above will be arrested and interned. All Waffen SS units will then be completely disorganized as units and the personnel will be attached to Wehrmacht units. In effecting this attachment, care will be taken to insure that a minimum number of individuals who previously served together in the same unit are attached to the same Wehrmacht unit. Wehrmacht commanders will be held responsible for the conduct of this personnel and will be instructed to distribute them evenly throughout their Wehrmacht units so that the total number of Waffen SS personnel in any one unit never exceeds 25% of the total unit's strength.

i. The Allgemeine SS. The Allgemeine SS will be dissolved, disarmed and dispersed locally by MG. CI will seize Allgemeine SS headquarters and documents, and will arrest and dispose of such Allgemeine SS members as are prescribed in the arrest categories (Table C). Members who hold public office will be a responsibility of MG in consultation with CI.

j. Nazi Party Storm Troops (SA). The SA will be dissolved, disarmed and dispersed locally by MG Detachments. CI will arrest and dispose of the SA officers prescribed in the arrest categories (Table C).

k. Hitler Youth (HJ). Mobilized units of the HJ will be processed pursuant to the instructions for processing mobilized units of NSKK (see paragraph m, below). The static HJ organization will be dissolved, disarmed and dispersed locally by MG. However, CI will seize the headquarters, records and documents of the static organization and will arrest and dispose of the HJ members prescribed in the arrest categories (Table C).

l. National Socialist Flying Corps (NSFK). Mobilized units of the NSFK, together with personnel of schools and training establishments, will be processed pursuant to the instructions for the processing of mobilized units of the NSKK (see paragraph m, below). The static organization will be dissolved, disarmed and dispersed locally by MG. However, CI will seize the headquarters, documents and records of the static organization and will arrest and dispose of the NSFK members prescribed in the arrest categories (Table C).

m. The Nazi Party Motor Transport Corps (NSKK). The NSKK will be encountered as mobilized units serving with the Wehrmacht and as a static organization controlling all transport within the Wehrkreise. Mobilized units; together with personnel of schools and training establishments, will be disarmed by combat troops and concentrated for disbandment. NSKK officers will be "screened" by PW and intelligence personnel in order to identify those officers who are prescribed in the arrest categories (Table C); at the time of disbandment, those officers will be referred to CI for disposal. The static organization will be

SECRET

dissolved, disarmed and dispersed locally by MG. However, CI will seize the documents and records of the static NSKK organization and will dispose of those members thereof who are prescribed in the arrest categories (Table C).

n. German Labor Service (RAD). All units of the RAD will be processed pursuant to the instructions for the processing of the mobilized units of the NSKK (see paragraph m, above). The organization will be dissolved, disarmed and dispersed locally by MG. However, CI will seize the headquarters, documents and records of the organization and will arrest and dispose of the RAD members prescribed in the arrest categories (Table C).

o. Todt Labor Forces (OT). The officers and uniformed guards of OT will be disarmed by combat troops and concentrated for disbandment. The static organization will be dissolved, disarmed and dispersed locally by MG, except for such units as may be retained at the discretion of Army/Military District commanders for clearing of devastated areas or other rehabilitation.

p. Heimat Flak. Regular GAF personnel in the Heimat Flak will be discharged through the armed forces machinery.

43. GERMAN GENERAL STAFF.

a. The coordination and supervision of the search for and arrest of all members of the German General Staff Corps and equivalent Naval and Air Force officers is a CI function.

b. All General Staff Officers and their Naval and Air Force equivalents, excluding those officers who have been captured in military operations prior to "A" Day, will be disposed of as follows:

(1) Those officers whose names appear on Personality Cards as having adverse records or who are listed as War Criminals will be processed as other individuals in those categories.

(2) Those officers who are not in the category as set forth in (1) above but who are regarded as security threats will be interned.

(3) Those officers who are not in the categories as set forth in (1) and (2) above will be detained, placed under house arrest and/or kept under CI surveillance.

c. Those German General Staff Officers who, after initial detention, house arrest and/or surveillance, are found to be of potential value in assisting disarmament and demobilization duties will be permitted to return to their posts

but will be kept under CI surveillance through local arrangement with the appropriate U.S. military disarmament or disbandment authorities concerned.

d. Lists of officers to be detained are to be furnished by SHAEF through this headquarters.

44. GERMAN SCIENTISTS AND INDUSTRIAL TECHNOLOGISTS.

a. Disposal and control of those German scientists and industrial technologists whose background and prior activities are such that they could conceivably play an important part in the rebirth of the German war machine is a CI function.

b. Such individuals will be detained pending further instructions. Information and interrogation reports will be transmitted to this headquarters.

c. Lists of German scientists or industrial technologists to be detained will be distributed as received from SHAEF.

45.

46.

47.

TABLE "A"

NAZI POLITICAL ORGANIZATIONS TO BE ABOLISHED

1. Central Offices of the NSDAP.

a. Party Chancellery (Partei Kanzlei).

b. Fuehrer's Chancellery (Kanzlei des Fuehrers der NSDAP).

c. Organization of Germans Abroad (Auslandsorganization).

d. Offices in GERMANY of the National Union for German Elements Abroad (Volksbund fuer des Deutschtum in Ausland).

e. Center for Volksdeutsche (Volksdeutschenmittelstelle).

f. Party Scrutiny Commission for the Protection of National Socialist Literature (Parteiamtliche Pruefungskommission zum Schutze des NS-Schrifttums).

g. Office of the Reich Organization Leader (Reichsorganisationsleiter der NSDAP).

h. Office of the Reich Treasurer of the Party (Reichsschatzmeister der NSDAP).

i. Supreme Party Court (Oberstesparteigericht) and Subordinate Courts.

j. Office of the Fuehrer's Commissioner for the Supervision of the Whole Intellectual and Ideological Training and Education of the Party (Beauftragter des Fuehrers fuer die Ueberwachung der Gesamten Geistigen und Woltanschaulichen Schulung und Erziehung der NSDAP).

k. Office of the Reich Propaganda Leader of the Party (Reichspropagandaleiter der NSDAP).

l. Office of the Reich Leader for the Press (Reichsleiter fuer die Presse und Zontralverlag der NSDAP (Eherverlag) together with the publishing houses owned by the Party and controlled by him.

m. Office of the Reich Press Chief of the Party (Reichspressehof der NSDAP).

n. Reich Office for the Agrarian Population (Reichsamt fuer das Landvolk).

o. Head Office for Public Health (Hauptamt fuer Volksgesundheit).

p. Head Office for Technology (Hauptamt fuer Technik).

q. Head Office for Teachers (Hauptamt fuer Erzieher).

r. Head Office for Local Government (Hauptamt fuer Kommunal-politik).

s. Head Office for Officials (Hauptamt fuer Beamten).

t. Office of the Party Commissioner for all Racial Questions (Beauftragter der NSDAP fuer alle Volkstumsfragen).

u. Racial-Political Office of the Party (Rassenpolitischesamt der NSDAP)

v. Office of Genealogical Research (Amt fuer Sippenferschung).

w. Colonial Office of the Party (Kolonialpolitischesamt der NSDAP).

x. Foreign Office of the Party (Aussenpolitischesamt der NSDAP).

y. Reichstag Party of the NSDAP (Reichstagsfraktion der NSDAP).

z. Reich Women's Leadership (Reichsfrauenfuehrung).

aa. Head Office for War Victims (Hauptamt fuer Kriegsepfer).

2. Regional and Local Offices of Party Administration.

a. Gauleitung in each Party Gau or Reichagau.

b. Kreisleitung in each Party Kreis.

c. Ortsgruppenleitung in each Party Ortsgruppe.

d. Zollen and Block offices.

e. The Beauftragter der NSDAP in each Governmental Unit.

3. Professional, Political and other Party Organizations.

a. Reich League of Doctors (NS-Acrztebund).

b. Party League of German Technicians (NS-Bund Deutscher Technik).

c. Party League of Teachers (NS-Lehrerbund).

d. Reich League of German Officials (Reichsbund der Deutschen Beamten).

e. Reich Colonial League (Reichskolonialbund).

f. NS Women's Organization (NS Frauenschaft).

g. NS Reich League of Nurses (NS Reichsbund der Deutschen Schwestern).

h. German Women's Association (Deutsches Frauenwork).

i. Reich Student Leadership (Reichsstudentenfuehrung).

j. National Socialist German Students' League (NSD-Studentenbund).

k. German Students' Association (Deutsche Studentenschaft).

l. National Socialist German Lecturers' Association (NSD-Dozentenbund).

m. Party League of Lawyers, Notaries and Accountants (NS-Rechtswahrerbund).

n. Party League of Old Students (NS-Altherrenbund der Deutschen Studenten).

o. Reich League of German Families (Reichsbund Deutsche Familie).

p. German Labour Front (Deutsche Arbeitsfront).

q. Party Association for Physical Training (NS-Reichsbund fuer Leibesuebungen).

r. NS-Ex-Servicemen's League (NS-Reichskriegerbund).

s. Reich Chamber of Culture (Reichskulturkammer).

t. German Local Government Union (Deutscher Gemeindetag).

u. German Hunters' Association (Deutsche Jaegerschaft).

v. Council of Experts on Population and Race Politics (NS Rasse und Siedlungshauptamt).

w. Reich Committee for the Protection of German Blood (Reichsausschuss zum Schutze des Deutschen Blutes).

x. National Socialist Relief Organization for War Victims (NS-Kriegsepferversergung).

y. Winter Relief (Winterhilfswerk).

z. Reich Chamber of Commerce (Reichswirtschaftskommer).

4. Para-Military and Police Organizations.

a. The SS (Schutzstaffeln), including the Armed-SS (Waffen SS) and the SD (Sicherheitsdienst).

b. Secret Police (Geheime Staatspolizei).

c. The Storm Troops, SA (Sturmabteilungen), including the SA-Wehrmannschaften or pre-military training centers.

d. The National Socialist Flying Corps, NSFK (NS-Fleigerkorps).

e. The National Socialist Automobile Corps, NSKK (NS-Kraftfahrer-Korps).

f. The HJ and BDM (Hitler Jugend and Bund deutscher Maedels).

g. The Reich Labour Service, RAD (Reichsarbeitsdienst).

h. The Todt Organization, OT (Organization Todt). (See par 42,o, this Chapter for exception).

i. The Technical Emergency Squads, TENO (Technische Nothilfe).

Note: Pending surrender, or the declaration by the Supreme Commander that the Germans have been defeated, all German personnel of the organizations cited in paragraph 4 above are entitled to the status and privileges of Prisoners of War.

TABLE "B"

POLITICAL OFFICERS AND CIVIL SERVANTS WHO SHOULD BE DISMISSED OR SUSPENDED

(The holders of the offices marked with asterisk will be suspended)

Item	Title of Position
1.	Reich Ministers and State Secretaries, Ministerial Directors**
2.	Land Ministers, State Secretaries and Ministerial Directors of the Laender**
3.	(a) Provisional Presidents and Reich Governors.
	(b) Department Heads of Provinces and Reichsgaue**
4.	Other Supreme Reich Authorities. At present these are:
	Commissioner General for Medical and Health Service Reich Housing Commissioner Reich Commissioner for Security of the German People Reich Commissioner for Shipping Inspector-General for Water and Power Inspector-General for German Roads Inspector-General for Motor Transportation Reich Commissioner for Treatment of Enemy Property Reich Youth Leader Head of the Reichsstelle fuer Raubmerdung Division Chief in Four-Year Plan Office
5.	Heads of Reich Institutions. At present these are:
	Supreme Administrative Tribunal Reich Committee for Public Health Service Reich Office for Social Insurance Reich Hereditary Court Reich Labor Court Reich Honor Court Reich Archives
6.	Reich Labor Trustees
7.	Reich Food Estate Officials from Kreisbauernfuehrer up

Item	Title of Position
8.	Chiefs of Military and Civil Administration in the Occupied Countries
9.	Regierungspraesidenten
10.	Landraete
11.	Oberbuergermeister of Cities of more than 100,000 inhabitants
12.	Officials of the Reich Ministry of Public Enlightenment and Propaganda, National, Regional and subsidiary agencies
13.	Reich Ministry for Armaments and War Production high officials, including the Chairman of the Hauptausschuesse and Ringe
14.	Members of the present German Reichstag not already covered on account of other positions held
15.	Members of the Supreme Court (Reichsgericht), the People's Court (Volksgericht), Special Court (Sendergericht), members of the Courts of Appeal (Oberlandesgericht)**
16.	Chief Public Prosecutors (Oberreichsanwaelte, General Staatsanwaelte, and Oberstaatsanwaelte)**
17.	Police Officials:

(a) Reich Leader SS and Chief of the German Police

(b) All higher SS and Police leaders

(c) All Police Presidents and Directors, and Police Officials above the rank of Lieutenant-Colonel

(d) All members of the Gestapo and Sicherheitsdienst

(e) Members of the Administrative Police who are serving with the Gestapo, either in their Hq or as "Special Investigators". Those who have served should be treated on their merits after investigation.

(f) Inspectors of the Security Police and ORPO

Item	Title of Position
	(g) Commissioned officers of the Technische Nothilfe
18.	University Rectors and Curators, including Heads of Institutions of University rank

TABLE "C"

NAZI PARTY, POLICE, PARA-MILITARY AND

OTHER PERSONNEL TO BE INTERNED

All individuals (whose names are contained in the SHAEF Personality Card Index for GERMANY and all persons) who are identified to be or to have been in the categories prescribed below will be arrested and interned in GERMANY.

A. GERMAN INTELLIGENCE SERVICES.

1. Acmter (Departments) I, II, III, VI, including Militaerisches Amt (formerly Abwehr), and VII of RSHA, together with the out stations and organizations dependent on or controlled by any of them — all personnel.

2. Geheime Feldpolizei (Secret Field Police) — all personnel.

3. Reichssicherheitsdionst (Reich Security Service) — all personnel.

B. THE SICHERHEITSPOLIZEI.

1. Gestapo (including Grenzpolizei) — all personnel.

2. Kripo — all officials down to and including the rank of Oberst (Colonel).

C. HIGHER POLICE OFFICIALS.

1. Polizeipraesidenten und Direktoren.

2. Oberpraesidenten in Prussia, Stadtpraesident in Berlin, Regierungspraesidenten und Landracte.

3. Befehlshaber der Orpo und der Sipo.

4. Hoehere SS und Polizeifuehrer.

D. ORDNUNGSPOLIZEI — all officers down to and including the rank of Oberst (Colonel), (Landesfuehrer in Tono and Luftschutzpolizei) in the following branches:

1. Schutzpolizei.

2. Feuerschutzpolizei.

3. Luftschutzpolizei.

4. Gendarmerie.

5. Wasserschutzpolizei.

6. Verwaltungspolizei.

7. Hilfspolizei.

8. Technische Nothilfe.

E. PARA-MILITARY ORGANIZATIONS.

1. Waffen SS — all officers and NCOs down to and including the rank of Scharfuehrer, all ranks of the Tolenkopfverbaende and all female members of the SS.

2. Allgemeine SS — all officers and NCOs down to and including the rank of Unterscharfuehrer and all female members (except those members of the Orpo and Kripo who would appear to have held only nominal SS rank and not to have taken an active part in SS work).

3. SA —all officers down to and including the rank of Sturmbannfuehrer.

4. Hitler Jugend — all officers down to and including the rank of Stammfuehrer.

5. Bund deutscher Maedels —all officers down to and including the rank of Bannmaedelfuehrerin.

6. NSKK — all officers down to and including the rank of Staffelfuehrer.

7. NSFK — all officers down to and including the rank of Sturmbannfuehrer.

8. RAD — all officers down to and including the rank of Arbeitsfuehrer.

F. NAZI PARTY OFFICIALS

1. Administrative officials of the Party down to and including the post of Amtsleitor at Ortsgruppe level.

2. All other members of the Party down to and including the rank of Gemeinschaftsleiter.

G. REICH AUTHORITIES.

1. All members of the Hoehere Dienst appointed since 1 March 1939.

2. All civil servants down to and including the rank of Ministerialrat or its equivalent, irrespective of the date of appointment.

H. GERMAN GENERAL STAFF. All members of the German General Staff, including equivalent Air Force and Naval officers.

TABLE "D"

POSITIONS IN NAZI PARTY ORGANIZATIONS AND FORMATIONS AND RELATIONS TO THE PARTY WHICH ARE TO BE REGARDED AS DISQUALIFYING HOLDER FROM SERVICE WITH MG IF HELD AT ANY TIME

1. NSDAP; National Socialist Workers Party: membership in the NSDAP prior to 1933.

2. NSDAP; National Socialist Workers Party: holders of the positions in the Nazi formations referred to below or listed among the Party Officials in Table C.

3. SS: Schutzstaffeln--holders of the rank of Unterscharfuehrer or higher, and any person who was a member of the SS before 1933.

4. SA Sturmabteilung: holders of the rank of Scharfuehrer or higher, membership in the SA prior to 1933.

5. Hitler Jugend and Bund deutscher Maedels: holders of the rank of Bannfuehrer or Bannmaedelfrehrerin or higher.

6. NS Dozentenbund: officials of this formation.

7. NS Deutscher Studentenbund: officials of this formation.

8. NS Frauenschaft: officials of this formation.

9. NS Kraftfahrer Korps: holders of commissioned rank in this formation.

10. NS Fliegerkorps: holders of commissioned rank in this formation.

11. RAD—Reichsarbeitsdienst: holders of the rank of Arbeitsfuehrer and above.

12. Business men who have accepted Nazi honors, such as the "Ehrendolch" or "Ehrensold" or "Blutorden".

13. Persons holding the positions in quasi-governmental organizations listed in Table E.

14. Officials in the "Affiliated Organizations" of the NSDAP named in items a, b, c, d, n, p, and x in Category 3 of Table A(Professional, Political and other Party Organizations) and officials of the NSV (NS Volkswohlfahrt).

15. Officials of the "Supervised Organization of the NSDAP named in item d in Category 1 of Table A (CENTRAL OFFICES) and officials of the similar organizations named in items e, g, h, n, o and q in Category 3 (Professional, Political and other Party Organizations) of Table A.

TABLE "E"

QUASI-GOVERNMENTAL POSITIONS FROM WHICH PRINCIPAL OFFICERS SHOULD BE REMOVED

1. Head of the National Economic Chamber (Reichswirtschaftskammer), and his immediate subordinates; or president or chairman of a Gau Economic Chamber or affiliated Economic Chamber.

2. Chairman, president or deputy of a Reichsgruppe or an Economic Group (Wirtschaftsgruppe).

3. Chairman, president or deputy of a National Transportation Group (Reichsverkehrsgruppe).

4. Wehrwirtschaftsfuehrer.

CHAPTER VI

PROCESSING OF CI ARRESTEES

48. GENERAL. The arrest and internment of all persons whose continued liberty is likely to constitute a threat to the security of our forces is a command responsibility to be accomplished primarily through the employment of CI personnel. The following categories of persons will be arrested by CI.

a. Those Nazis who are to be arrested because of their rank or office. (See Table C, Chapter V).

b. Those security suspects named in the SHAEF Personality Card Index for GERMANY, most of whom are to be arrested because they are known or suspect members of the enemy intelligence services.

c. Those persons who become security suspects as a result of CI field operations.

49. VIOLATIONS OF MG SECURITY ENACTMENTS.

a. Persons who violate MG enactments for the security control of the civilian population are not necessarily security suspects nor are they necessarily of interest to CI. Normally, such persons will be arrested and disposed of by MG. However, if there is any reason to believe that the offense involves espionage, sabotage or subversive activity, the arrestee will be referred to CI for investigation.

b. CI personnel will transfer to MG those cases which are not of CI interest, but which are merely violations of MG security control enactments. In all such cases, the arrestee and a fully completed arrest report will be handed over to MG.

50. WAR CRIMES AND CRIMINALS. War Crimes are violations of the laws and usages of war of general application and acceptance, including acts in contravention of treaties and conventions dealing with the conduct of war, as well as other offenses against persons or property which outrage common justice or involve moral turpitude, committed in connection with military operations or occupation with or without orders or sanction of governments or commanders. War Criminals are those who have committed War Crimes, or who have ordered, directed, or countenanced the commission of War Crimes, without regard to their nationality or the capacity in which they acted.

a. When a person arrested by CI personnel is discovered to be a War Criminal, as well as an arrestee of CI interest, the following procedure will be applied:

(1) The War Criminal will be identified by CI personnel, who will complete in triplicate the detention report form to be provided by SHAEF for that purpose.

(2) The completed detention report form will be forwarded to the G-1 of the command in whose area the arrestee is being detained. The detention report form will be accompanied by a notification to the effect that the War Criminal is being detained not as a War Criminal but as a person primarily of interest to CI.

(3) If absolved of suspicion as a security suspect, the War Criminal will be continued in detention and instructions as to his disposal will will be requested from the appropriate G-1.

(4) In all other respects, the War Criminal will be handled according to CI requirements.

b. Whenever CI personnel, in the course of their CI operations, obtain oral evidence pertaining to a War Criminal, whether apprehended or not, such evidence will be reduced to writing in the form of a statement sworn to by the witness, or, if the witness refuses to testify under oath, in a statement sworn to by the interrogator and those other witnesses who may be present when the evidence is given. Photographic and physical evidence will be submitted together with appropriate affidavits pertaining to the procurement thereof. All evidence pertaining to War Crimes will be submitted to the appropriate G-1.

c. Since CI personnel are being employed to apprehend the numerous persons of the categories defined in paragraph 48 above, normally such personnel will not be required to apprehend, identify, investigate or detain War Criminals unless they are specifically of CI interest.

51. CI ARRESTS. CI arrests will be accomplished as follows:

a. Wehrmacht Personnel. Personnel of the Abwehr, Geheimefeldpolizei, Lehr Regiment Kurfuerst and similar organizations held as PWs in the ETO will be processed by intelligence and other interested personnel of all echelons to locate those who are prescribed for arrest as CI personality targets. CI will be notified as to the persence of such prescribed personnel, after which those who are to be arrested will be discharged from the Wehrmacht and turned over to CI for arrest and internment as civilian security suspects.

b. Personnel of Para-Military and Police Organizations. The procedures for the arrest of members of the mobilized units and static elements of the various para-military and police organizations are included in Chapter V.

c. Persons in the arrest categories hold as PWs outside the ETO will, when repatriated be discharged, arrested and interned as civilian security suspects, provided that other persons in similar arrest categories continue to be interned.

d. All other persons specified for CI arrest will be apprehended and arrested by CI personnel, assisted by combat troops, MG Military Police and such specialist personnel as are necessary. Normally, CI personnel will not themselves effect the physical apprehension of persons to be arrested but will direct combat troops and other elements assisting in the operation.

e. Power of Arrest. All members of our forces are empowered to arrest any person committing acts prejudicial to MG, to the security of our forces, or in violation of any MG proclamation, law, ordinance, notice or order. Arrested persons will be turned over without delay to the nearest CIC, MG Security Guard or MP with a written statement, signed by the arresting individual giving the time, date, place and reason pertaining to the arrest.

52. SEARCHES MADE IN CONNECTION WITH ARRESTS. Searches made in connection with arrests will be made by CI personnel or other personnel operating under the supervision of CI personnel. Such searches will be made as follows:

a. Premises. The living quarters and offices of arrestees will be searched thoroughly. Items of evidence collected will be catalogued under heading "Office at (address)" or "Residence at (address)" on the receptacle which is to contain them.

b. Arrestees. Arrestees will be ordered to surrender all possessions held on their persons; the items surrendered will be catalogued under the heading "Surrendered", on the receptacle which is to contain them. The arrestee will then be thoroughly searched and those items he failed to surrender upon order will be catalogued under the heading "Not Surrendered Voluntarily", on the receptacle which is to contain them.

c. Chain of Possession. All items of evidence will be placed in a suitable receptacle, labeled, sealed and delivered with the arrestee. The label will state clearly the identity of the arrestee, where and when the evidence was recovered, and the name, rank and serial number of the officer who inventories the evidence. Whenever there is a change in the custody of the evidence, a receipt will be entered on the receptacle label.

53. EVACUATION OF ARRESTEES. Arrestees will be guarded, escorted and evacuated by CI personnel or personnel operating under the supervision of CI personnel.

a. Persons arrested because of their rank or position, i.e., those who are identified as being persons prescribed for arrest in Table C, Chapter V, will be evacuated to Internment Camps.

b. Known or suspect members of the enemy intelligence services, to include persons detected in acts of espionage, sabotage or subversion and persons found in possession of sabotage equipment, secret writing materials, codes or communication devices, or in other suspicious circumstances, will be evacuated to the CI Annex of the Army/Military District Interrogation Center.

c. Other security suspects will be processed according to the merit of the individual case.

d. Certain priority subjects, as defined in paragraph 54, f, below, will be evacuated to the CI Annex of the Army Group/U.S. Zone Interrogation Center.

54. DETENTION OF ARRESTEES. Arrestees will be detained by CI personnel, or personnel operating under supervision of CI personnel, in available facilities or in those to be provided as follows:

a. House Arrest. Arrestees may be held under guard in "House Arrest" for limited periods of time, pending their evacuation to more secure places for detainment.

b. Local Jails. Arrestees may be held in local jails or prisons, pending the completion of preliminary identification, interrogation and investigation prior to the evacuation of arrestees to internment camps or the Army/Military District Interrogation Center. If local jails exist, MG will make them available for this purpose and will provide for the guarding of inmates. When CI personnel place arrestees in local jails, they will provide the jailor with an Arrest Report stating that the prisoner is to be held incommunicado on security grounds pending further instructions from CI.

c. Local Detention Camps. In areas where adequate civilian jail facilities are not available, local commanders will provide and administer detention camps where arrestees may be held, pending the completion of preliminary identification, interrogation and investigation, prior to the evacuation of arrestees to Internment Camps or the Army/Military District Interrogation Center.

d. Internment Camps. In instructions separate from these, each Army/Military District Commander is directed to establish Internment Camps within his command. The following special requirements of CI for Internment Camps have been specified:

(1) From the CI point of view, the desirable capacity of a single Internment Camp is 7,500 internees. However, any capacity between 5,000 and 10,000 internees is considered satisfactory.

(2) Insofar as conditions permits, it is desirable for CI purposes to have Internment Camps established near the major centers of population and spaced equally distant within Army/Military District areas. The safeguarding of the inmates should be the paramount consideration in determining the siting of Internment Camps.

(3) Each Internment Camp should have a distinctive name or other designation which will facilitate the maintenance and identification of CI records pertaining to CI internees held therein.

(4) Each Internment Camp should be so arranged as to permit segregation and appropriate supervision of male and female internees. If persons other than those of CI interest are to be interned in the same Internment Camp in which CI arrestees are interned, arrangements for the complete segregation of the two categories are essential. It may also become desirable to segregate the various categories of CI arrestees interned.

(5) Each Internment Camp should have accommodations for the solitary confinement of 50 CI arrestees.

(6) Each Internment Camp will have a Reception Center wherein arrestees will be held for processing, prior to being interned.

(7) The Administrative Staff of each Internment Camp should have interpreters qualified to interpret in the German, French, Dutch, Russian, Polish, Slavic and Italian languages.

(8) The Administrative Staff and facilities of each Internment Camp should be organized to process arrestees upon their reception at the Camp in accordance with the following schedule.

(a) CI arrestees are not to be accepted for processing and internment unless accompanied by an Arrest Report properly executed in triplicate. If the arrestee's escort does not have an Arrest Report pertaining to his prisoner, the Internment Camp CI officer will be consulted.

(b) Receipt of Person and Property will be rendered to the officer or guard who escorts the arrestee to the Internment Camp for detention. This receipt should be entered on the escort's copy of the Arrest Report which will be returned to the arresting agency.

(c) An identification number will be assigned to each arrestee received for internment. The identification number should be prefixed by the Internment Camp designation.

(d) Each arrestee will be registered by reception date, identification number and name.

(e) Any property and evidence which is delivered with the arrestee to the Internment Camp will be registered and placed in secure custody.

(f) A Detention Report Form (to be furnished by SHAEF) will be completed in triplicate for each arrestee. Copies will be distributed as follows:

1 One forwarded to G-1 Division, SHAEF.

2 One forwarded to Army Group/Zone Headquarters. (Attention: G-1 Section).

3 One retained.

(g) Each arrestee will be fingerprinted.

(h) Each arrestee will be photographed.

(i) All Arrest Reports and evidence will be delivered along with the CI arrestee to the Internment Camp CI officer for CI processing.

(9) A CI staff, from CI personnel resources of Army/Military District commanders, will be attached or assigned to each Internment Camp approximately in strength as follows:

(a) 1 CI officer. (CIC)

(b) 3 assistant CI officers.

(c) 12 interrogators.

(d) 6 clerical personnel.

(10) Each Internment Camp will provide the CI staff thereof with all necessary office space, furniture and equipment, and private interrogation rooms.

(11) The duties of the CI Staff at the Internment Camps will be to:

(a) Advise the Internment Camp Commander regarding the internal security of the camp.

(b) Complete a Fragebogen (MG personnel questionnaire) on each CI arrestee received for internment.

(c) Interrogate each CI arrestee received for internment.

(d) Submit to Army/Military District Hq the required periodic CI reports.

(e) Transmit to this headquarters, through G-2 channels, the Arrest Reports, Fragebogen and a copy of interrogation reports pertaining to all CI internees.

(f) Recommend to the CI Annex of the Army/Military District Interrogation Center which CI arrestees should be interrogated in detail at the Army/Military District Interrogation Center.

(g) Maintain CI records pertaining to CI internees.

(h) Report to this headquarters, through G-2 channels, any change in status of an internee (release, escape, execution, natural death, etc.)

(i) Operate an informant system among the CI internees in the Camp.

(j) Clear CI arrestees for release upon instructions of the Army/Military District Commander.

(k) Prepare Arrest Reports on arrestees who are delivered for internment without an Arrest Report.

e. CI Annex to the Army/Military District Interrogation Center. In instructions separate from these, each Army/Military District Commander is directed to establish an Interrogation Center to accomplish intelligence and CI interrogation within his command. These Interrogation Centers are to be fully self-administered and self-contained and prepared to handle female as well as male prisoners. Each Interrogation Center should have interpreters qualified in the German, French, Dutch, Russian, Polish, Slavic and Italian languages, available to assist CI interrogators when required. In addition, each Interrogation Center will have a CI Annex for which the following special requirements are specified.

(1) Accommodations for the secret solitary confinement of up to 100 arrestees at one time. The facilities for the detention, messing, exercising, interrogation, etc, of all CI prisoners will be a part of the Interrogation Center, but should be so arranged so that the presence of an individual CI arrestee in the Interrogation Center may be kept secret from all other CI arrestees and inmates thereof.

(2) Ten cells, so constructed and equipped as to provide for the secret monitoring and recording of conversations which may take place in the cells.

(3) Ten private, sound-proof interrogation rooms.

(4) Twenty expert, full time, German-speaking CI interrogators.

(5) Twenty stenographers, (5 of whom should be German linguists) equipped with stenographic necessities, to work at the disposal of the CI interrogators.

(6) Facilities for the photographing and fingerprinting of each arrestee.

f. CI Annex to the 12th Army Group/US Zone Interrogation Center. The facilities of the CI Annex of the Army Group/US Zone Interrogation Center will be utilized as follows:

(1) Only those persons who are in possession of detailed information of value to our operations against the German Intelligence Service, Security Services, and subversive hostile elements will be subject to interrogation at the CI Annex of the 12th Army

Group/US Zone Interrogation Center. The mere fact that a person is a known or suspect agent will not of itself require that such a person be processed at this Center.

(2) Priority subjects for processing at this Center are persons possessing detailed information concerning the organization, personnel and future intentions of:

(a) Reichsicherheitshauptamt (RSHA).

(b) Sicherheitsdienst (SD).

(c) Abwehr.

(d) Geheimestaatspolizei (Gestapo).

(e) Sicherheitspolizei (Sipo).

(f) Geheimefeldpolizei (GFP).

(3) Other priority subjects are persons in possession of detailed information concerning future intentions of the following organizations with particular reference to plans of these, or affiliated organizations, to go underground upon the cessation of hostilities in GERMANY.

(a) SS.

(b) SA.

(c) NSDAP.

(d) Nazi Youth Movements.

(e) NSKK.

(f) NSFK.

(g) Ordensburgen.

(h) Junkerschule.

(4) All such persons will be sent to the Interrogation Center as soon as possible, subject to the provision that no persons, regardless of category, will be forwarded to the Interrogation Center without the specific approval of the Chief, CIB, G-2 Section of

this headquarters. All information pertaining to subjects believed to warrant interrogation at this Center will be transmitted to the Chief, CIB, this headquarters, in writing or orally, with a recommendation for processing at this Center.

(5) In every instance, escorts accompanying persons forwarded to the Interrogation Center will be in possession of a completed Arrest Report, including a reason for arrest sufficiently detailed to serve as a basis for interrogation, together with all pertinent documents and materials.

55. DOCUMENTATION AND REPORTS RE CI ARRESTEES.

a. Arrest Report. When an arrest is made, the arresting agency will complete the standard Arrest Report forms in triplicate, and will include a brief record of any important statement made by the arrestee when he was being arrested.

(1) The original Arrest Report will accompany the arrestee at all times.

(2) The first copy of the Arrest Report pertaining to an individual who is accepted for internment or interrogation by the Army/Military District Internment Camps or Interrogation Centers will be sent immediately to this headquarters (Attention Chief, CIB, G-2 Section), through G-2 channels.

(3) The second copy of the Arrest Report will be retained by the arresting agency, but will be sent with the arrestee to the Internment Camp or Interrogation Center in order that a receipt of person and property may be entered on the copy for return to the arresting agency.

b. Photographs. Each arrestee accepted at an Internment Camp or Interrogation Center will be photographed, if the photographing has not been accomplished at another Internment Camp or Interrogation Center. The photograph will be mounted upon the Detention Report Form which will be prepared in triplicate by the Commanding Officers of all PW and Internment Camps and Interrogation Centers.

c. Fingerprints. Each arrestee accepted at an Internment Camp or Interrogation Center will be fingerprinted, if he has not been so processed previously at another Internment Camp or Interrogation Center in accordance with instructions to be issued by SHAEF.

d. Fragebogen. A Fragebogen (MG form PS/G-9 "Personnel Questionnaire") will be completed for each arrestee accepted at an Internment Camp or Interrogation Center, if he has not been so processed previously at another Internment Camp or Interrogation Center. The Fragebogen will accompany the arrestee until his interrogation and investigation at the Internment Camp or Interrogation Center is completed. It will then be transmitted to this headquarters (Attention: Chief, CIB, G-2 Section) together with the Summary Report cited in paragraph f below.

e. Special Reports. Whenever, during the course of an investigation or interrogation, information, believed to be of vital interest, is developed, a special report thereof will be transmitted to this headquarters (Attention: Chief, CIB, G-2 Section) through G-2 channels.

f. Summary Reports. When the interrogation and investigation of an arrestee has been completed and the disposition to be made of the arrestee has been decided at Army/Military District level, a report containing a summary of all facts and information pertinent to the case, together with the Fragebogen, will be transmitted to this headquarters (Attention: Chief, CIB, G-2 Section) through G-2 channels.

(1) In the case of an individual who is interned after interrogation at the Internment Camp and is not considered of sufficient importance to merit detailed interrogation at the Army/Military District Interrogation Center, the Summary Report together with the Fragebogen will be transmitted to this headquarters (Attention: Chief, CIB, G-2 Section) from the Internment Camp through G-2 channels.

g. Status Reports. This headquarters (Chief, CIB, G-2 Section) will be notified of any change of status pertaining to an arrestee accepted at an Internment Camp or Interrogation Center. Status Reports will be rendered when an arrestee is transferred from one place of detention to another, and also in the event of an arrestee's release, escape, execution or natural death. In the event of an arrestee's natural death or execution, his records will be sent to this headquarters (Attention: Chief, CIB, G-2 Section) through G-2 channels.

h. Transfer of Arrestees. Whenever, an arrestee is transferred between Internment Camps and Interrogation Centers, the records on the arrestee will accompany the arrestee and will be receipted for by the recipient.

i. Evidence. Confessions of identity or guilt and incriminating testimony of witnesses will be reduced, wherever possible, to writing and subscribed to under oath. Whenever a witness refuses to subscribe to his testimony under oath, the evidence given will be submitted in statements sworn to by the interrogator

and any other witnesses. Evidence of probative value found in documents may be submitted in the form of certified photostatic or photographic reproductions of the document or in the form of hand written or typewritten extract copies of the document, sworn to as true copies but, whatever practicable, the document itself should be submitted. Original papers of evidence will accompany the arrestee at all times.

56. INTERROGATION OF ARRESTEES. Arrestees will be interrogated as follows:

a. In the case of Black List or categorized individuals, the interrogation of an arrestee by the arresting agency will consist only of that interrogation which is required to (1) identify the arrestee, (2) extract from him any information which will assist in the immediate arrest of other individuals, (3) enable the immediate recovery of documents and material of CI interest, and (4) enable the immediate neutralization of any sabotage, espionage and subversive effort already made by the arrestee.

b. The interrogation of persons delivered to Internment Camps will consist of only that interrogation necessary to identify the arrestee, determine his background and discover whether he should be interrogated in detail at the Army/Military District Interrogation Center.

c. The interrogation of a person accepted at Army/Military District Interrogation Centers will be made in detail in order to extract from him the essential elements of information enumerated in paragraph 8, Chapter I, and to determine the appropriate disposition of the arrestee.

57. DISPOSAL OF ARRESTEES.

(rescinded 21 Sept 45)

a. No person who is interned because he is an individual named in the SHAEF Personality Card Index for GERMANY will be released from internment without the specific approval of this or higher headquarters.

b. No person who is interned because he is one of the persons described in the prescribed arrest categories (See Table C, Chapter V) will be released from internment without the specific approval of this headquarters.

c. The ultimate disposal of captured members of the German intelligence services will be decided by this or higher headquarters (Chief, CIB, G-2 Section).

d. Those persons against whom sufficient evidence has been gathered to warrant trial will be prosecuted by the appropriate US Military Commission or MG Court.

e. Those persons who are considered to be security hazards if allowed to remain at liberty, and against whom there is insufficient evidence to warrant trial, will be interned for such time as is deemed appropriate.

f. Army/Military District Commanders will establish review boards to review on a tri-monthly basis the cases of those persons interned pursuant to the instructions contained in paragraph e above. The review boards will include appropriate representation from G-2 (CI), G-5, IA, and PM, and will recommend the release, provisional release, or continued internment of the individuals whose cases are reviewed.

58.

59.

60.

HEADQUARTERS 12TH ARMY GROUP
COUNTERINTELLIGENCE (CI) DIRECTIVE FOR GERMANY

CHAPTER VII

REPORTS AND RECORDS

61. PERSONALITY INDEX. Army/Military District Commanders will maintain their copies of the SHAEF Personality Card Index for GERMANY. Supplementary information to be recorded on these cards, as well as additional cards, will be supplied by this headquarters.

62. ROSTERS OF PERSONALITIES. This headquarters will supply Machine Record Unit rosters of "Wanted" persons; CI arrestees, and other information as indicated in Appendix B hereto.

63. FILES. Army/Military District Commanders are not required to maintain permanent files or dossiers pertaining to individual arrestees. This headquarters will be the central repository for all such files and records, to include those received from Hq, 6th Army Group.

64. SPECIAL STUDIES. Army/Military District Commanders are not required to prepare special studies pertaining to CI organizations, trends or personalities. When such studies are required by lower echelons, a request therefor will be submitted to this headquarters.

65. REPORTS. Army/Military District Commanders are required to submit the various reports and records pertaining to individuals, as directed in Chapter VI. In addition, CI Periodic Reports will be submitted monthly by Army/Military District Commanders in the form attached hereto as Appendix I. The reports will be submitted in sextuplicate so as to arrive at the Army Group/Zone headquarters on the twenty-fifth day of each month.

66. DISTRIBUTION. Necessary reproduction and distribution of CI intelligence and information will be made by this headquarters.

67.

68.

69.

(NOTE: Words containing a letter or letters with umlaut will be written with the expressed "e", i.e., u will be written "ue", a will be written "ae".)

APPENDIX I

FORM FOR CI PERIODIC REPORTS TO ARMY GROUP/ZONE HEADQUARTERS

CI PERIODIC REPORT NO ____

For the month of _____, 194 ____.

PART I - CIVIL SECURITY CONTROL

A. General survey.

B. Security control of civil population.

C. Resistance organizations.
Reports on organizations attempting to stimulate resistance to the Allies or engaged in activities prejudicial to Allied interests.

D. Attitude of local authorities and police to CI staffs and personnel.
A note on the performance, satisfactory or otherwise, of the duties assigned to German authorities.

E. Special cases of CI interest.
A summary of arrests of important persons or other information about them.

F. Pro-Allied and anti-Nazi organizations.
Reports on organizations claiming to favor the Allied occupation or to assist in the eradication of Nazism.

G. Rumors.

PART II - INTERNAL SECURITY CONTROL

A. General survey.

B. Security of information.
Report on measures taken to prevent leakage of information with notes on serious violations.

C. Security of material.
Report on measures taken to prevent sabotage with notes on sabotage incidents.

D. Security of personnel.
Report on enemy propaganda (leaflets, broadcasting, publications, etc.) and its effects.

PART III - PORT, FRONTIER AND TRAVEL SECURITY CONTROL

A. Port Security Control.
(Information under the following headings will be submitted for each port under control of the U.S. Port Enclave)

1. Number or port CI personnel and area covered.

2. Port CI.

   a. Security of dock area.

      (1) Physical barriers.
      (2) Adequacy of gate and perimeter control personnel.
      (3) System of issue of passes.
      (4) Shore leave policy.
      (5) Control of harbor craft.
      (6) Control of fishing.
      (7) Countersabotage precautions.

   b. Relations with other port authorities.

   c. General comments.

3. Coastline security control.

4. Travel security control.

   a. Ships:

      (1) Entering port _____
      (2) Leaving port _____

   b. Civilian passengers:

      (1) Arriving _____
      (2) Departing _____

   c. Seamen:

      (1) Signed on _____
      (2) Signed off _____

   d. Censorship violations, etc.

e. Special reports
(Give brief details - subject, reference and date of any special reports on travellers (passengers/seamen) or on travel security matters submitted during the period under review).

f. General comments.

B. Frontier Security Control.
(This will be a consolidated survey covering the entire frontier under the control of the Army/Military District concerned.)

1. General survey.
This includes the location or disposition, as of last day of the period under review, of:

a. Frontier security control posts.

b. CIC detachments.

c. AEF frontier guards.

d. MG border control stations.

e. Indigenous frontier control personnel.

(It will be sufficient to note changes where these are few.)

2. Authorized civilian travellers.

a. Number entering GERMANY _____

b. Number leaving GERMANY _____

3. Displaced persons.

a. Estimated number of authorized displaced persons allowed to cross frontier.

(1) Out of GERMANY _____
(2) Into GERMANY _____

b. Estimated number of unauthorized displaced persons dealt with.

c. General comments.

4. Prohibited Frontier Zone.

5. Relations with frontier control authorities.

6. General comments.
(Including details of any unauthorized crossings of the frontier.)

2984

CONFIDENTIAL

APPENDIX II

MACHINE RECORDING OF SHAEF PERSONALITY CARD INDEX FOR GERMANY

SECTION I. GENERAL.

1. All basic information contained in the SHAEF Personality Card Index for GERMANY ("Black and White Lists") is being recorded at this headquarters on Machine Record Unit (MRU) cards.

2. The following information, or that part of it available on the original SHAEF card, is a basic minimum recorded by the MRU; therefore, it is readily possible to prepare by mechanical means a listing of all individuals having the same entry on any single item or any group of the items enumerated hereafter:

a. Name of subject, to include known aliases.

b. Towns in which subject might be located.

c. Sex of subject.

d. Wehrkreise of towns referred to in "b".

e. Classification of subject according to SHAEF categories.

f. Organization to which subject is attached.

g. Level or organization at which subject worked.

h. Rank or position held within the organization.

i. Year position was held according to last report.

j. Age of subject.

k. Nationality of subject.

l. Source of information.

m. Status of case.

n. Place of detention, if arrested.

o. Disposition of case.

p. Case number.

3. a. Special lists of personalities who are members of specific German intelligence or security services or affiliated agencies, as well as rosters of "Black or White List" individuals in designated communities or areas, will be furnished to authorized headquarters or agencies upon request to Chief, CI Branch, G-2 Section, this headquarters.

b. Inasmuch as this headquarters, serving as a Central Registry, will maintain complete records and supply all information requested by subordinate units, it is not considered necessary for other headquarters to duplicate this Machine Records system.

4. Details regarding the spacing assignment and the coding system utilized in the machine recording of the SHAEF Personality Card Index for GERMANY are contained in SECTIONS II and III below.

SECTION II. Spacing Assignment on the Machine Records Unit Cards.

SPACES	INFORMATION
1 - 20	Individual's name
21 - 34	Town
35	Sex of subject
36 - 37	Wehrkreis
38	Classification of subject
39 - 43	Organization or rank
44 -	Organizational level
45 - 46	Rank or position
47 - 48	Year position held at last report
49 - 50	Year of subject's birth
51 - 52	Nationality of subject

53 - 54	Source of information
55	Status of case
56 - 58	Place of detention
59 - 60	Disposition of case
61 - 65	Case number
66 - 67	Arresting agency
70 - 75	Arbitrary number assigned MRU card for accurate sorting
80	Duplicate cards

SECTION III. Code used on the Machine Records Unit Cards.

1 - 20 INDIVIDUAL'S NAME

Name spelled out, in order, last name
first name
middle initial
title

Each alias to be entered on a separate card in spaces 1 - 20, the normal space for names, and "C - (proper name under which filed)" entered in the space normally reserved for the name of the town, i.e., spaces 21 - 34 (C - being a one column homonyn for see). In this way each alias will have an alternate MRU card for cross reference purposes.

21 - 34 TOWN

Town in which individual is most apt to be found (spelled out).

If individual has had an important post in one town and a residence in another, or if he has had any recent connection with more than one town which might suggest his continued presence in one of several towns, separate cards will be created.

35 SEX OF SUBJECT - one letter code

Male M. Female F.

CONFIDENTIAL

36 - 37 WEHRKREIS

The Wehrkreise are indicated by arabic numerals substituted for the usual Roman numerals except for the three indicated by the following two letter code:

R - denotes a renegade, any individual who owes allegiance to a power other than GERMANY but pays homage to Nazidom.

S - denotes a member of the SS other than an SS member who is also a member of Sipo and SD or the police and is therefore classified in one of the other other categories even if primarily SS. (The normal SHAEF classification is SS).

U - denotes an individual who is the leader or a member of an organization plotting resistance against any Allied occupying force in GERMANY or an individual who has announced his intention of forming or joining such a group. (This is not a SHAEF classification.)

W - denotes a War Criminal. (This is not a SHAEF classification).

39 - 43 ORGANIZATION OR RANK - 5 letter and numeral code.

The code employed in spaces 39 - 43 is to be read in conjunction with the classification noted in space 38.

When space 38 shows classification "A", "B", "C" or "D", if the individual is a member of the Abwehr, the branch, and if possible the level, of the office for which he worked will be shown by a code built up in the following manner:

ABT1A - denotes a member of Abteilung I A - personnel

AB1WI - denotes a member of Abteilung I Wirtschaft - economic information

ABT2S - denotes a member of Abteilung II S - sabotage

AB3KG - denotes a member of Abteilung III Kgf - prevention of espionage in PW camps

ABTZX - denotes a member of Abteilung Zentralkartei - central registry

ALS1H - denotes a member of Abt I H in an Abwehrleitstelle or Alst

AS1MT - denotes a member of Abt I MT in an Abwehrstelle or Ast

NES2S - denotes a member of Abt II S in a Nebenstelle or Nest

AU1TL - denotes a member of Abt I TL in an Aussenstelle or Aust

MEK3H - denotes a member of Abt III H in a Meldekopf or MK

If the individual is identified merely as associated with the Abwehr with no indication of branch; the code will be ABT. If only partial association is noted as "Member of Amt II", as much information as is noted is entered, in the example given, ABT2.

When space 38 shows classification "A", "B", "C" or "D", if the individual is a member of the Sicherheitspolizei und Sicherheitsdienst, the code to be used will be SIPO if no indication is given of Aemter or other subdivision. If an Amt of the RSHA or SD is indicated, the code used will be SD followed by the number of the Amt, e.g., SD6. However, if Amt IV of the RSHA or the SD is mentioned, the code will be GESTA, as it will be when the only mention is Gestapo. If the individual holds a rank in the SS, the code for SS ranks noted below will be used in preference to the more general SIPO or SD inasmuch as the type of activity has already been indicated in column 38.

If the individual is a member of the Geheimefeldpolizei, the code used will be GFP.

If the individual is a member of the Nachrichten Dolmetscher Ersatz Abteilung the code used will be NDEA.

If the individual is a member of the SS Jagdverbaende or any subordinate group including the Streifkorps, Jaegerbataillon 502, a Feldjaegerkommando, Lehrregiment Kurfuerst, or the 150 Panzer Brigade, the code used will be JAGDV.

If the individual is a member of the Brandenburg Division, the code used will be BRAND.

If the individual is a member of the Kriminalpolizei, the code used will be KRIPO.

It will be noted, in recapitualtion, that wherever possible standard abbreviations as listed in the SHAEF CI HANDBOOK GERMANY are used in coding the Personality Card Index for MRU. Othen than standard abbreviations so listed, the following codes may be found in spaces 39 - 43, if space shows classification "A", "B", "C" or "D":

ABT - the Abwehr, if followed by further identification, a specific branch of the Abwehr.

AL or ALS followed by numeral and letter - an Alst of the Abwehr.

NE or NES followed by numeral and letter - a Nest of the Abwehr

AU or AUS followed by numeral and letter - an Aust of the Abwehr.

ME or MEK followed by numeral and letter - a Meldekopf of the Abwehr.

BRAND - a member of the Brandenburg Division.

JAGDV - a member of a Jagdverband.

NDEA - a member of the Nachrichten Dolmetscher Ersatz Abteilung.

When space 38 shows classification "N", the standard abbreviations as listed in the SHAEF CI HANDBOOK GERMANY for the National Socialist Party and its affiliated organizations furnish the code. Chief among these are the following:

NSDAP - National sozialistische Deutsche Arbeiter Partei - National Socialist German Workers Party - the Nazi party.

NSF - NS Frauenschaft - Nazi party women's organization.

HJ - Hitler Jugend - Hitler Youth.

BDM - Bund deutscher Maedels - League of German Girls.

RAD - Reichsarbeitsdienst - Compulsory national labor service.

NSAD - NS Aerztebund - National Socialist Physicians League.

NSDSB - NS Deutscher Studentenbund - Nazi University Students League.

SA - Sturmabteilung - Organization of the storm troopers.

When space 38 shows classification "O", no indication of position will show in spaces 39 - 43 unless the title, i.e., MAYOR, can be spelled out or a reasonable abbreviation, e.g., LDRAT for Landrat, can be used.

When space 38 shows classification "P", the customary short-name of the organization or the first five letters of such short-name will be found in spaces 39 - 43 as follows:

ORPO - Ordnungspolizei - the regular uniformed German police.

SCHUP - Schutzpolizei - city police, branch of Orpo.

GEND - Gendarmerie - rural police, branch of Orpo.

FGEND - Feldgendarmerie - military police.

SELBS - Selbstschutzpolizei - civilian auxiliary police.

However, SS ranks where shown on the original card are entered in spaces 39 - 43, according to the code in the next paragraph, in preference to any of these police organizations.

When space 38 shows classification "S", spaces 39 - 43 will show the rank within the SS held by the subject as follows:

RCHFR - Reichsfuehrer	1
OBTGF - Oberstgruppenfuehrer	2
OBGRF - Obergruppenfuehrer	3
GRUPF - Gruppenfuehrer	4
BRIGF - Brigadefuehrer	5
OBERF - Oberfuehrer	6
STANF - Standartenfuehrer	7
OSTBF - Obersturmbannfuehrer	8
STUBF - Sturmbannfuehrer	9
HSTUF - Hauptsturmfuehrer	10
OSTUF - Obersturmfuehrer	11
USTUF - Untersturmfuehrer	12
STASF - Stabsscharfuehrer	13
STSCF - Sturmscharfuehrer	14
STOBJ - Standartenoberjunker	15
HSCHF - Hauptscharfuehrer	16

OSCHF - Oberscharfuehrer	17
SCHAF - Scharfuehrer	19
USCHF - Unterscharfuehrer	21
ROTTF - Rottenfuehrer	24
STURM - Sturmmann	25
S-MAN - SS Mann	26

When space 38 shows classification "F", "M", "R", "U" or "W", customarily there will be no further identification in spaces 39 - 43. Exception will occur when the individual has an SS rank or NSDAP affiliation.

When, after arrest, a man is interned for no further reason than the fact that he is considered a threat to the security of Allied military authorities, the code used will be SECTH.

44 ORGANIZATIONAL LEVEL - one digit code.

Space 44 is only filled when space 38 shows the classification "N" or "O", to indicate at what level of the regional organization the subject individual is employed:

1 - Reich, Reichsministerium

2 - Gau, Land, Provinz, Regierungsbezirk

3 - Kreis, Landkreis

4 - Ort, City (Gemeinde)

5 - Zelle

6 - Block

45 - 46 RANK OR POSITION - two digit code.

The rank within the organization which is held by the subject individual will be shown in spaces 45 - 46 by a number descending from the highest position to the lowest according to a two digit code. In police and paramilitary formations, this code is based on relative ranks so that all numbers are not represented within every formation. The numerical code for SS ranks, employed whenever a position

for a member of the SS is used in spaces 39 - 43, is found after the ranks of the ; coded above.

If space 38 shows "N" and space 44 is filled, the following code is used to indicate the relative party position at any level:

1 - Leiter

2 - Hauptamtsleiter or Amtsleiter

3 - Hauptstellenleiter

4 - Stellenleiter

If space 38 shows "N" and space 39 - 43 show "HJ" or "BDM", the following code is employed in spaces 45 - 46:

1 - Reichsjugendfuehrer

2 - Stabsfuehrer der Reichsjugeadfuehrung

3 - Obergebeitsfuehrer

4 - Gebeitsfuehrer, Gebeitsfuehrerin

5 - Hauptbannfuehrer, Hauptmaedelfuehrerin

6 - Oberbannfuehrer

7 - Bannfuehrer, Bannmaedelfuehrerin

8 - Oberstannfuehrer

9 - Stammfuehrerin, Maedelringfuehrerin

10 - Hauptgefolgschaftsfuehrer

11 - Obergefolgschaftsfuehrer

12 - Gefolgschaftsfuehrer, Maedelgruppenfuehrerin

19 - Oberscharfeuhrer

21 - Scharfeuhrer, Maedelscharfuehrerin

22 - Oberkameradschaftsfuehrer

23 - Kameradschaftsfuehrer, Maedelschaftsfuehrerin

24 - Rottenfuehrer

26 - Hitlerjunge, BDM Maedel

If spaces 39 - 43 show "SA", "NSKK", or "NSFK", the following code is employed in spaces 45 - 46:

1 - Stabschef

3 - Obergruppenfuehrer

4 - Gruppenfuehrer

5 - Brigadefuehrer

6 - Oberfuehrer

7 - Standartenfuehrer

8 - Obersturmbannfuehrer, Oberstaffelfuehrer

9 - Sturmbannfuehrer, Staffelfuehrer

10 - Hauptsturmfuehrer
